

God tier Farm 3251

Chapter 3251 Agree (1)

Elon Musk hesitated for a moment, and said with some embarrassment, ""Mr. Xia, I'm really willing to provide a Dragon Ship and an extended cabin for free. But ... If Mr. Xia can agree to a small request of mine, that would be even better. "

"Tell me about it first," Xia ruofei said with a smile.

The more subtle Elon Musk was, the more Xia ruofei felt that this "small request" might not be so simple, so he was very cautious.

"I'd like to hire Mr. Xia as my private medical consultant," said Elon Musk. Of course ... I have a special medical team to serve you, so you don't have to stay in the United States all the time. However, if I or my family encounter more troublesome health problems, I hope to receive your help. The salary will definitely satisfy you. You can ask for a salary and I will definitely satisfy it!"

After witnessing Xia ruofei's treatment of little X, Elon Musk began to have this idea.

He was undoubtedly a rich man, richer than most people on earth. He could squander his wealth for a few lifetimes and could basically enjoy any material conditions he wanted.

However, on the issue of birth, aging, illness, and death, it was fair to everyone. If one really got a terminal illness, money actually didn't have much use.

Gang leader Qiao was much richer than Elon Musk, but in the face of a dangerous and malignant tumor like pancreatic cancer, his money could only extend his life for a few years. In the end, it was not enough to turn the situation around.

Hence, Xia ruofei's magical medical skills were extremely precious.

Elon Musk quickly realized Xia ruofei's value, so he changed his previous cautious attitude and even offered to give Xia ruofei a Dragon spaceship for free, as well as a few extended cabins. To put it bluntly, he was interested in Xia ruofei's ability to bring him back to life.

If he could make Xia ruofei his personal medical consultant, it would be like adding another layer of insurance to his life!

Of course, Xia ruofei would not easily agree to such a "small request" from Elon Musk. As an Aurous core stage cultivator, was it not a joke to be a medical consultant for an ordinary person? What's more, it was foreseeable that he would spend more and more time on cultivation in the future. How could he fly to the United States for no reason because of the health problems of Elon Musk?

Xia ruofei thought for a while and said, ""Mr. Masker, I'm afraid I can't agree to this ... I think we should talk about business as usual! We can spend money to buy your company's spaceships and expansion cabins, and we will definitely give you enough profit space! This seemed more convenient! Of course, if Mr. Masker is not willing to sell the Dragon Ship, we will not force you ..."

"Mr. Xia, you've misunderstood," Elon Musk quickly said. "I don't mean to use the spaceship to threaten you. I've said that it's just a small request. If it's not convenient for Mr. Xia, just pretend I didn't say

anything! However, I can still give you the spaceship and the expansion cabin for free as a token of my gratitude to Mr. Xia! You saved little X. This is not just business!”

Elon Musk was still clear about the basic situation. He knew that Xia ruofei’s medical skills were equivalent to the power to bring the dead back to life. Furthermore, little X’s treatment was still in progress. How could he easily offend Xia ruofei? Even if he couldn’t hire Xia ruofei as his private medical consultant, the benefits of having a good relationship with someone as powerful as Xia ruofei were obvious. If he were to suffer from a terminal illness in the future and beg Xia ruofei for help, perhaps he would be willing to help him because he had given him the spaceship for free today.

Of course, Elon Musk didn’t want to get a terminal illness in the future, but he still had the awareness to prepare for a rainy day.

If that day really came, as long as Xia ruofei cared a little about their friendship today, the spaceship would not have been given away for nothing.

Xia ruofei saw that Elon Musk was so understanding, and he had already said so much. He was too embarrassed to reject him too thoroughly.

After a moment of silence, Xia ruofei said, ”I can make a move three times.”

Elon Musk was stunned for a moment, and he did not come back to his senses. ”What?”

”I’ll be taking the spaceship. You have three chances to ask me for help in the future.” Xia ruofei replied, ”of course, it’s only limited to health issues! You can use the three chances on yourself, your family, or even people who have nothing to do with you, but I can only help you three times. After that, we’ll be even. ”

Elon Musk finally understood. He said in surprise and joy, ”That’s great! Thank you! Thank you, Mr. Xia! You are a generous gentleman!”

Xia ruofei smiled and said, ”you’re welcome, Mr. Masker. We’re just taking what we need.” By the way, I need to remind you of something. ”

”Please speak!”

”I believe that you won’t use up all three chances in a short period of time.” Xia ruofei said, ”so, I can’t guarantee that I’ll be free when you need my help one day. I can leave you a contact number. If I can’t come due to unforeseen circumstances, I’ll make the appropriate arrangements in advance. I hope you can understand.”

A practitioner’s promise was not something that could be casually made. If Xia ruofei went into seclusion for a few years and did not come out, and Elon Musk happened to ask him for help again, he would probably be in despair. Hence, Xia ruofei had also made things clear to Elon Musk in advance to avoid more problems later on.

Chapter 3252 Agree (2)

Of course, if Xia ruofei had to go into seclusion for a long time or was unable to contact the outside world, he would make some arrangements in advance. For example, he would leave behind a few petals

of the spirit Heart Flower. After all, a promise meant karma. If one could not fulfill one's promise, one's Dao heart might be affected at some point in the future.

"No problem! No problem!" "Mr. Xia, I'll go and arrange the spaceship," Elon Musk said quickly. This should be relatively quick. The spaceship and the cabin are already available. We only need to remove the useless system and make some adjustments to the internal design. Then, we will do the assembly work. It won't take too long. "

"That's great!" Xia ruofei said, "in other words, the spaceship and the expansion cabin were assembled before the EVA suit?"

"Of course!" "Yes," Elon Musk said without hesitation. "If you need it, it can be completed in two weeks at the latest! Do you think ... It will be delivered together with the EVA suit, or the part for the spacecraft in advance?"

Xia ruofei thought for a while and asked, "If it's two weeks later ... By then, we should be able to provide some of the spacesuits and oxygen supply modules, right?"

"Theoretically, yes!" Elon Musk hesitated for a moment and said, "but this way, we will need to make some adjustments to the workflow. Originally, I was planning to assemble the spacesuits together after all the parts were produced. "

"Then I'll have to trouble you to make some adjustments. It'll be perfect if you can give us a few sets of spacesuits and a certain number of oxygen supply modules when we deliver the spacecraft in two weeks!" Xia ruofei said.

Elon Musk pondered for a moment before saying, "It should be no problem! I think ... It should be possible to provide five sets of spacesuits and hundreds of oxygen supply modules!"

"Then it's decided!" Xia ruofei said, "Mr. Masker, I'm counting on you!"

"You're too kind!" Elon Musk said, "Mr. Xia, I'll take my leave first! I have to make arrangements for the spaceship's modification ..."

Having just received three life – saving promises from Xia ruofei, Elon Musk was full of energy.

"Please do!" Xia ruofei also stood up and said, "I'll go and check on little X's condition."

.....

For the next three to four days, Xia ruofei continued to stay in the mansion of Elon Musk, performing acupuncture on little X step by step and providing Chinese medicine on time.

Although little X did not undergo a full body examination again, Elonmask and gramus could still see that little X's condition was improving day by day. The two of them were naturally very happy. Little X was diagnosed with Strigoi not long after he was born. This huge haze had been lingering in their hearts for a long time. Now, the haze had finally been dispelled.

In the blink of an eye, Xia ruofei had already stayed at Elon Musk's house for a week.

According to his treatment plan, the acupuncture was basically over, but the process of taking the medicine would continue for about three weeks.

Xia ruofei didn't need to stay here any longer – Yingluo couldn't really stay here for a month.

Of course, before he left, Xia ruofei left a sufficient amount of Chinese medicine for Elon Musk.

Xia ruofei had brewed the Chinese medicine in advance and divided it into small portions according to the dosage of little X.

For the convenience of storage, Elon Musk had also specially purchased a set of vacuum – packed Chinese medicine equipment. This way, Xia ruofei could easily divide the Chinese medicine into small portions.

He had to take it three times a day for 21 days, so he had 63 bags of Chinese medicine.

Elon Musk had people stick a label on each bag of Chinese medicine, indicating the date of consumption. Then, he bought a refrigerator to store these medicines separately and sent someone to guard them 24 hours a day.

After giving all the necessary instructions, Xia ruofei left the mansion in Elon Musk's exclusive car, the one and only Tesla electric car.

Naturally, elonmask and gramus personally sent him off.

Even little X, who had not left the room for a long time, was carried out by Grims to see Xia ruofei off.

Of course, this was also because little X's condition had greatly improved. Otherwise, even if Grims wanted to do this, Mannu's medical team would not allow it.

Back at the Beverly Hills Hotel in Los Angeles, Xia ruofei immediately gathered everyone.

Song Wei and the rest had been here for a week and had nothing to do. Fortunately, Li Yifu, the host, had made very detailed arrangements. They did not stay in the hotel for the whole week and basically went out to have fun with Li Yifu, enjoying the Super VIP treatment.

One should know that in this group, Song Wei and Ling Qingxue were Xia ruofei's cultivation partners. In terms of seniority, they were on the same level as Li Yifu's grandmother. Chen Xuan and Yu Xin 'er were both well – known Masters and had high status in the cultivation world. Not only did Chen Xuan have a good father, he was also a golden core stage expert. Li Yifu would definitely have to serve any of these four people carefully.

The wealth, status, and fame of the secular world were not worth mentioning in the world of cultivation.

Everyone was gathered in Xia ruofei's room.

Chen Xuan smiled and said, "brother Xia, it's been hard on you this week!" We followed you to the United States, but we didn't help much. It's all your help!"

Chapter 3253 Agree (3)

“Yeah!” Yu Xin ‘er also smiled. We’ve all heard from fellow Daoist li that it’s all thanks to brother Xia that we were able to successfully buy the equipment we wanted this time!”

Xia ruofei laughed and said, “you’re welcome. We’re a team!” Besides, I’m the first one who doesn’t advocate the use of force easily. Since my medical skills can be used and can allow us to get what we want through relatively peaceful means, I’m bound to do my best. ”

“Oh,” Xia ruofei added, “we had agreed to return to China first, but there’s a change in plans.”

“Oh? Did the American go back on his word?” Chen Xuan said with a frown.

“How is that possible?” Xia ruofei laughed. “It would take about a month to get all the spacesuits ready, so I didn’t want to wait in the United States. I told them that I’d return home after the treatment. However, it’s different now. We only need to wait for another week and we’ll get five spacesuits and a few hundred oxygen supply modules! “Of course, the most important thing is that Elon Musk promised to give us a spaceship for free. He even took the initiative to add a few expansion cabins to the spaceship. This way, it is more than enough to accommodate the nine of us! The modified spaceship and the expansion cabin will be delivered in a week, so ... I think we should just wait in the United States! Anyway, I don’t have anything important to deal with back in the country, so I’ll just take it as a vacation and relax!”

Xia ruofei did not tell Chen Xuan and the rest about the details of the second discussion with Elon Musk.

On one hand, he wanted to give everyone a surprise. On the other hand, Xia ruofei did not want to talk about these things over the phone because he had considered the surveillance of the United States intelligence Department.

Therefore, everyone knew that things had gone much smoother than they had expected.

“That means you won’t have to wear a bulky spacesuit and drift in space for a month or two?” Song Wei asked in surprise.

Xia ruofei smiled and nodded. “”Relatively speaking, with such a spaceship, everyone’s journey will be much more comfortable. However, an EVA suit was still a must, and he had to prepare as many as possible! After all, we don’t know when we’ll be able to use it. It’ll be a life – saving weapon in space!”

“It seems like brother Xia’s medical skills have completely convinced this American!” Chen Xuan laughed. This was a good thing! Let’s quickly send this good news back and let the seniors be happy!”

Xia ruofei smiled and waved his hand, “let’s wait!” We’ll take the spaceship and spacesuits and go back to our country directly. Besides, we’re in the United States. Even if we use a satellite phone, I’m afraid we can’t rule out the possibility of being monitored, so it’s better not to talk about these details over the phone!”

“That’s true ...” Chen Xuan muttered.

Xia ruofei smiled and said, “originally, the spacesuits were only assembled after the spare parts were produced. I asked masker to adjust the process and give us five sets to be delivered together with the spacecraft. This is so that we can try out our design first and see if it’s feasible. At the same time, we can

test whether the spacecraft is reliable in orbit. Let's treat it as a rehearsal before the official moon landing!"

Chapter 3254 The spaceship is in our hands_

Chen Xuan's eyes lit up as he said, "that's a good idea!" We're going to the moon this time. It's a historic feat in the cultivation world. There's no predecessor's experience we can learn from. If we can test it in low – Earth orbit first, that would be great!"

"This is indeed the safest way. I'm sure the seniors will agree!" Song Wei smiled and nodded.

"It's only a week or so. Let's just wait here!" Xia ruofei said, "there's nothing much to do if I go back in the short term. Besides, the child of the Elon Musk family is still being treated. If I stay in the United States, it'll be easier to deal with any situation."

"Then it's decided!" Chen Xuan nodded and said, "I'll let my father know. However, just tell him that we still have things to deal with here. Don't tell him the details."

Chen Xuan obviously agreed with Xia ruofei's point of view. He felt that too many details could easily be leaked over the phone.

Xia ruofei nodded and smiled. "It'll be hard on you for the next few days. We haven't been to the United States before, so you have to show us the scenery of the United States."

"No problem!" Li Yifu quickly replied. Martial granduncle, I'll definitely let everyone eat, drink, and play well!"

.....

A week later, Xia ruofei and his group, who had a relaxing tour in America, took Li Yifu's private plane to Houston, the famous Space City in America.

The group did not go to a hotel. After they got off the plane, they got into two business cars arranged by Li Yifu and left the airport for the suburbs east of Houston.

Halfway through the journey, two container trucks drove out from an intersection and followed behind the MPV.

The van stopped at the entrance of an inconspicuous factory. Li Yifu got out of the car and led everyone to the rusty iron gate. He pressed the doorbell.

The camera on the iron door lit up. After a moment, a deep voice said, "Please wait!"

After a few minutes, footsteps could be heard.

A black man in his 30s opened the iron door and walked out. Li Yifu handed him a card.

After the black man took the card, he took out a device that looked like a POS machine. After swiping the card and looking at the information displayed on the screen, the guard on his face lessened a little.

He then looked at Xia ruofei and the others beside Li Yifu and asked with a frown, "Why are there so many people?"

“We’ve already made an appointment in advance,” Li Yifu said indifferently. “That’s the number of people. If you can’t make the decision, you can call and ask for instructions!”

The black man’s eyes were cold and he snorted. “No need, come in!”

After he finished speaking, he made way for Xia ruofei and the others to walk into the dilapidated yard of the factory.

The black man was the last to catch up. After carefully locking the door, he quickly followed.

He led the way and led Xia ruofei and the others through the courtyard to a thick gate at the side.

The black man pressed his fingerprint and went through an iris scan before the door opened. A group of people walked in.

In contrast to the dilapidated state outside, Xia ruofei and the others only found a whole new world inside after passing through the door.

It was a spotless factory with bright lights. The most eye – catching thing was a large container covered with a golden waterproof cloth in the middle of the tall factory. It was more than ten meters long and much wider than a standard container.

In addition, hundreds of boxes of various sizes were neatly stacked on the wall of the factory.

A staff member wearing a white anti – static one – piece suit came up and looked at the black man.

The black man nodded at him, indicating that he had already checked his identity. Then, he stepped aside without saying a word.

The white man in a white one – piece said with a blank expression, “Hello, I’m the person in charge here. You can call me John.”

It was obviously a fake name, but no one cared what the staff member’s name was. “Mr. John, we’ve been notified to come here today to collect the goods!” Xia ruofei stepped forward and said.

“Everything is ready,” John said indifferently. “You can check it!”

In fact, Xia ruofei had scanned the goods with his psyche the moment he entered the factory. He was very clear about the situation of the goods, including the hidden door and the dozen armed security guards who had not shown themselves.

In the large container in the middle of the factory, there were already assembled spaceships and expansion modules. In the boxes stacked along the wall, there were a total of five EVA spacesuits and 500 oxygen supply modules. There was no need to check them one by one.

Hence, Xia ruofei said directly, “no need, let’s load it up!” Can the car be driven in?”

“Of course!” John replied, nodding.

Then, John shook his head at the black man. The black man understood and walked to the side. He opened a control box on the wall and pressed a button. The entire wall of the factory facing the yard began to rise slowly. It turned out to be an extra large rolled – up door that could open the entire wall.

Then, the black man walked out with Li Yifu and opened the courtyard door to let the two trucks in.

Chapter 3255 Getting the spaceship (2)

The extra – large container with the spaceship and the expansion cabin was lifted and placed on one of the trucks. The other truck was a cargo truck. Xia ruofei and the others personally loaded the hundreds of containers onto the truck in a short while.

Li Yifu personally got into the first truck while Xia ruofei and the others got into their respective vans. Soon, the four cars left the seemingly dilapidated factory in a single file. They did not have much interaction with Mr. John and the black man throughout the entire journey.

The fleet of four cars did not leave Houston. Instead, they drove to the southern suburbs, where Li Yifu had prepared a large warehouse in advance.

The car drove straight into the warehouse and quickly unloaded the large container. As for the other containers, Xia ruofei and the others were still doing it themselves. In order to reduce the number of irrelevant people, no unloading workers were arranged here. Even the drivers of the few cars had no idea what they were transporting this time.

After Li Yifu sent all the cars away, he quickly returned to the warehouse and locked the door.

Xia ruofei and the rest had already pried open the lead seal of the extra – large container and opened the container door.

The Dragon Ship revealed its true appearance. It was roughly split into two parts, an orbital module and a return module. However, in the orbital module, there were a few more extended modules.

The exterior of the spacecraft and the expansion cabin were not sprayed with any marks. In fact, the interior of the spacecraft was the same. All signs related to SpaceX had been removed.

At the entrance of the container, there was a small and exquisite box.

Xia ruofei took the box and opened it. There was a thick stack of paper documents inside. Similarly, they did not have any logos and were all printed on ordinary paper.

These documents included the simple operation manual of the spacecraft, a quick fault check list, and so on. In addition, there were also the key points of the EVA spacesuits, Functions Introduction of various parts, and a quick replacement of the oxygen supply module.

Xia ruofei flipped through a few pages and put them back in the box.

Everyone gathered around the container's door and looked at the spaceship that looked a little strange because it was connected to a few expansion cabins.

Chen Xuan couldn't help but chuckle, "this big guy is even more powerful than a flying boat in space?" I think the material is just ordinary!"

Xia ruofei laughed and said, "this is the power of technology!" The material of the spacecraft had been tested countless times. Not only could it withstand a huge temperature difference, but it could also shield cosmic rays. The return cabin was also equipped with a special heat – resistant material that could

withstand thousands of degrees of heat. This was because the violent friction with the atmosphere during the return process would produce a huge amount of heat. In addition, the overall sealing of the spacecraft was also highly demanding. To put it bluntly, it's a difference in the environment of use. It was designed to operate in space for a long time. "

"Yeah!" Chen Xuan nodded. The technology of the secular world can't be underestimated!"

Xia ruofei laughed."Especially in the field of aerospace. You can say that it has integrated the best parts of human technology."

At this moment, Li Yifu walked over after locking the door and said respectfully,""Grand uncle – Master, the driver has been sent away. I just checked the surveillance cameras, and there are no suspicious people nearby. We can put away these things."

Xia ruofei nodded and released his spiritual power to scan the area. Then, he smiled and said,""Alright, then let's get to work! After that, we should return to our country. I guess sect leader Chen and the others are all waiting anxiously!"

Chen Xuan looked at the huge spaceship in the container and said,""It seems that we can only rely on brother Xia for this big guy. The space of our storage magic weapons is limited, and our spiritual power is not enough to collect such a big thing!"

There were only two Aurous core stage cultivators, Xia ruofei and Chen Xuan. If even Chen Xuan found it difficult, they could only rely on Xia ruofei.

Xia ruofei smiled."My storage spiritual treasure can hold it. I'll take this spaceship."

With that, Xia ruofei looked at the Flying Ship in the container and covered it with his mental power. Then, with a slight thought, he kept the Flying Ship into the mountain and sea realm in the spirit map space.

The size and weight of this spaceship were much larger than the small yacht that he had put in his spatial space. Even though Xia ruofei's spiritual power was much higher than before, he still felt a long – Lost sense of dizziness the moment he stored the spaceship. However, the dizziness was very light and lasted only for a moment before he returned to normal.

Xia ruofei also kept the small box filled with the operation manual into the spirit map space.

The container was now empty.

Chen Xuan raised his thumb and smiled."Amazing!"

Xia ruofei laughed and pointed at the remaining boxes."Let's share some of these things!"

All that was left were five extra – Space suits and 500 oxygen supply modules. The items were not big, and everyone's storage space could fit them all.

Xia ruofei, Ling Qingxue, and Yu xiner each collected an extra – terrestrial spacesuit and 100 oxygen supply modules.

As for the remaining two spacesuits and 200 oxygen supply modules, they were all kept by Chen Xuan.

The warehouse, which had been a little crowded just now, was suddenly emptied again.

Xia ruofei said to Li Yifu, "Yifu, I'll leave the finishing touches here to you. Also, you have to continue to follow up on Elon Musk's side. You also have to urge him to deliver the remaining spacesuits and oxygen supply module on time."

"Don't worry! Senior granduncle!" Li Yifu said, "I'll stay in Houston for the time being until I've finished delivering everything."

Xia ruofei nodded and said, "I won't be coming for the next delivery. You'll be fully responsible." Just let me know when you receive it. We'll go back to China first. You'll be in charge of the affairs in the United States for this period of time. Don't worry about other things, I'll arrange everything. "

Xia ruofei was naturally referring to the incident on Peach Blossom Island. However, since Chen Xuan and the rest were present, he was vague about it. However, Li Yifu could definitely understand it. He said respectfully, "Yes! Senior granduncle! Disciple will remember. If anything happens here, this disciple will report it to martial granduncle at any time. "

"Mm! Then I'll have to trouble you!" Xia ruofei nodded and turned to Chen Xuan and the rest. "Let's go back then!"

The group arrived at the back of the warehouse. This area was rather remote and almost unpopulated. Xia ruofei took out the black – armored flying ship from the spirit map space. After everyone jumped onto the Flying Ship, he stood at the side of the ship and waved at Li Yifu. Then, he steered the Flying Ship in the direction of Huaxia.

The black Phoenix flying ship was much faster than an ordinary commercial plane. Even though it was not flying at full speed, the entire journey would only take two to three hours.

In these two to three hours, Xia ruofei and the others were not idle. They were all reading the thick operation manual.

After all, if cultivators were in space, their survival ability would not be much better than ordinary people. Especially for Qi refining cultivators like Ling Qingxue and Yu Xin 'er, if they were exposed to space, they would not be able to last more than a few minutes than ordinary people. Therefore, they still had to learn the operating procedures of the spacecraft and the process of putting on and taking off spacesuits.

Once in space, the outside of the spacecraft was a vacuum environment. There were strict procedures for entering and exiting the cabin. Which door to open first, which door to open again, the operation of pressure release, pressure release, etc. In addition, if the spacecraft had a leak, there was also an emergency evacuation process. Everyone had to remember it in their hearts. Otherwise, if they accidentally lost their lives, they would have no place to redress their grievances.

Under normal circumstances, an ordinary person would need to go through a long period of training and participate in various assessments in order to become a qualified astronaut. The time span was calculated by years. Fortunately, they did not need to master a comprehensive knowledge like real astronauts. Moreover, they were all cultivators, so their learning speed and memory were much better

than ordinary people. Therefore, it would not take too much energy to master some operating procedures and emergency plans.

As he studied, time passed by quietly. Before he knew it, the black Phoenix flying ship had already arrived in the sky above the capital of Huaxia.

Chapter 3256 Flight verification (1)

When the black – armored flying ship stopped above the courtyard in liuhai Lane, the ordinary people in the courtyard did not notice it at all. However, Chen Nanfeng and the other cultivators had long since discovered the traces of the Flying Ship and came to the courtyard to look up.

Xia ruofei and the rest jumped off the flying boat.

Xia ruofei did not put away the flying boat. Instead, he let it hover above the courtyard house.

Chen Nanfeng smiled and walked up to him, saying, "Fellow Daoist Xia, it's been hard on you to cross the ocean!"

Xia ruofei smiled. "Sect leader Chen, you're exaggerating. I'm just running errands. It's not a big deal!"

"It's not convenient to talk about many things over the phone. Xuan 'er didn't explain it clearly. " Chen Nanfeng asked, "fellow Daoist Xia, did your trip go smoothly?"

"I didn't fail you!" Xia ruofei smiled and said, "the equipment that we need has been completed. However, the production and assembly will take time, so we will have to wait for more than half a month before we can get the equipment. Also ... Other than the EVA suit and the oxygen supply module, there's another surprise. "

"Oh? Little brother Xia, don't keep us in suspense. Tell us, what's the surprise?" Mu Sheng could not help but say.

"Let's let brother Chen tell everyone!" Xia ruofei smiled.

"Xuan 'er! Tell me!" Chen Nanfeng said as he looked at Chen Xuan.

"Yes! Father!" Chen Xuan replied respectfully, "this time, it's all thanks to brother Xia! He saved that American's life, and that guy didn't want to cooperate at first. Fortunately, brother Xia found a breakthrough and made him willing to produce spacesuits and oxygen supply modules for us. He also provided us with a spaceship that could travel in space for free!"

"A flying ship?" Chen Nanfeng narrowed his eyes and asked, "are there airboats in the secular world?"

"It's different than an airboat!" Chen Xuan explained, "this is specially designed to be used in space. The material used to make the spaceship can ensure that it can operate in space for a long time. Furthermore, it can produce oxygen and is extremely well sealed. It's almost the same as if a person is on the ground ..."

"Of course, it's impossible to completely meet the conditions on the ground." Xia ruofei smiled and added, "at the very least, the problem of weightlessness is not something that can be solved with the

current level of human technology. Besides, the space in the spaceship is relatively small. It will be difficult to travel for a long time.”

“That’s true for ordinary people.” Chen Xuan chuckled. “However, for cultivators, this isn’t considered tough at all. It’s no different from living on the surface. So, brother Xia has helped us a lot this time!”

Chen Nanfeng was overjoyed and said, “I didn’t expect this! The technology of the secular world was actually so effective! This is all thanks to fellow Daoist Xia!”

Xia ruofei laughed and said, “you’re being too serious. I’m also joining this expedition!” Of course, I want to try my best to have better conditions. I’m also helping myself!”

“Does this mean that the obstacles in our way to the moon no longer exist?” Liu Mansha asked.

Xia ruofei said seriously, “Valley master Liu, I can’t be sure now. After all, everything in space is unknown. No one in the cultivation world has ever wandered in space for a long time. We don’t have any experience to learn from. I feel that even if we find the crater on the moon, there may be many tests waiting for us. So, we can’t take it lightly.”

Xia ruofei paused for a moment and continued, “For safety’s sake, I brought the ship back in advance, along with a few extra spacesuits. We’re going to take an airboat to the low – Earth orbit to test it. It’ll be a test flight!”

Liu Mansha’s eyes lit up and she said, “that’s a good idea!” Indeed, space is unknown territory for us. It’s a bit too risky to launch a long – distance voyage rashly!”

Chen Nanfeng stroked his beard and smiled, “fellow Daoist Xia is a meticulous person!” He’s indeed a young hero!”

“You’re flattering me ...” Xia ruofei said. “This is what I’ve been thinking. There are only five sets of spacesuits and nine of us are going to explore the moon. We’ll have to do it in batches. In addition, the seniors who are not going to the moon ...”

“We won’t be joining in the fun!” Mu Sheng said readily.

“En!” Chen Nanfeng nodded. Fellow Daoist Xia, I think it’s best that you arrange this flight verification!”

Xia ruofei nodded. “That’s my initial plan. I’m going to control the black Phoenix flying ship, so I’ll have to participate every time. This will take away one of my slots.” In addition, the main thing is to consider separating the Aurous core stage fellow Daoists to ensure that there are at least two Aurous core cultivators on each verification flight. This way, in the event of an accident, the safety of the Qi condensation stage fellow Daoists can be guaranteed to the greatest extent. ”

“That makes sense!” Chen Nanfeng agreed, “I think this arrangement is more appropriate!”

Xia ruofei said, “in that case, I’ll make the arrangements!” “This test flight won’t take too long. After all, even though there’s a lot of energy left in the oxygen supply module, no one knows what we’ll encounter when we reach the moon. We don’t know how long we’ll have to stay, so we should try not to consume too much energy in the early stages.”

He glanced at the crowd and continued, ""The flight verification is mainly divided into two groups. The first group consists of me, Ling Qingxue, brother Chen, Elder Willow, and miss Xin 'er. I'll still be participating in the second batch, and there's also elder muhua, brother Jianfei, elder Shen tianfang from the first heaven society, and lady yurou. Does anyone have any objections to this group?"

Chapter 3257 Flight verification (2)

Xia ruofei's grouping had already taken into account the situation of each sect.

For example, Yang Liu and Yu Xin 'er were both from the flying flower Valley. If they were arranged to be in the same batch, they would be able to take care of each other and trust each other more. The same logic applied to mu Hua and mu Jianfei from the surging waves sect. As for the first heaven society, there were two golden core cultivators in the first batch. Considering that there were only five spots in each batch, Chen Xuan had to be alone. Shen tianfang and Xu yurou were in the same batch, so they could take care of each other. As for Chen Xuan, with his cultivation, he would not have any worries if he was in the first batch alone. At least, he could protect himself.

Chen Nanfeng, Mu Sheng, and Liu Mansha all smiled and nodded. Chen Nanfeng said, ""Fellow Daoist Xia's arrangement is very good. Let's split up according to this group!"

Xia ruofei smiled. "If that's the case, then let's learn some of the operating procedures of the spacecraft and the things to take note of when using the EVA suit. Of course, you can also experience it in the actual operation process. As for the operation of the EVA suit, we can do a few simple exercises on the ground first. "

After saying that, he took out the spacesuits and the box of manuals. Chen Xuan and the others also took out their spacesuits.

The members of the exploration team separated the information and read it one by one.

Xia ruofei and the others had already learned some of it on the way here, so they just happened to start from the back. Mu Hua, mu Jianfei, and the others, who were waiting for news in the capital, started from the beginning.

Everyone was a cultivator, so it was very fast to learn something seriously. Not to mention that these were some operational tips. Basically, they just had to memorize it and then practice it a little during the actual operation.

Soon, everyone practiced putting on and taking off the spacesuits a few more times. These spacesuits were very heavy, and under normal circumstances, they needed the help of others to put them on or take them off. However, everyone had mental power. Although some people's mental power cultivation was very average, they had no problem with simple object control skills. So after a little practice, they basically didn't need the help of others and could put on and take off the spacesuits with more proficiency.

If an ordinary person were to wear such an EVA suit on the ground, they would basically be unable to move because it was too heavy.

Therefore, when astronauts carried out relevant training programs, they were generally carried out in specially built pools. They used the buoyancy of water to offset gravity and simulate the weightless environment during orbit.

As for Xia ruofei and the others, they were all cultivators. It was not difficult for them to move, but they still felt some difficulty in moving.

For this reason, Shen tianfang, Yang Liu, and the others still had some doubts. They were worried that they would not be able to react in time if they were to be in danger on the moon dressed like this.

Xia ruofei smiled. "The moon's gravity is only one – sixth of earth's. Anyone on it would be as light as a swallow. When flying in space, there's almost no gravity at all. So, the spacesuits' effects are not as great as you think. In addition ... This thing is used to save one's life. Without a spacesuit, no one will be able to survive for long in a low temperature and vacuum environment. I'm afraid that even a Qi condensation fellow Daoist will only be able to last for a few minutes."

"Of course!" Chen Nanfeng nodded and said, "choosing the lesser of two evils is the best plan we can think of at this stage!"

Xia ruofei smiled and nodded. "I heard that primordial soul Stage cultivators can survive in space, but at most, they can only last for one or two days. As for us golden core and Qi refining stage cultivators, without the power of technology, we can't even think about leaving Earth!"

"It's already incredible that he could last one or two days!" Chen Nanfeng sighed. "The primordial soul Stage ... Is really too far away from us ..."

Chen Nanfeng should be the one closest to breaking through to the next realm among all the Aurous core stage cultivators in the world of cultivation. However, he only saw a glimmer of hope for the nascent Soul Stage. He really did not dare to have any extravagant hopes for the immortal soul Stage, nor did he see any hope of breaking through.

After all, the current cultivation world was too harsh. In the past, with Chen Nanfeng and Chen Xuan's aptitudes, breaking through to the immortal soul Stage would have been a piece of cake. However, it had now become an unreachable realm.

"Maybe this trip to the moon will give me an opportunity to break through!" Xia ruofei smiled and said, "don't be discouraged, sect leader Chen. You are already very talented to be able to reach such a cultivation level despite the deterioration of the cultivation environment. Perhaps you just need an opportunity and you will be able to break through!"

"Then I'll count on your blessings!" Chen Nanfeng said with a smile.

He had a chance to reach the original infant stage. He knew it clearly. Just like what Xia ruofei had said, he was only lacking an opportunity to break through. But the primordial spirit stage ... That was too far away.

Xia ruofei saw that everyone was almost done with their practice, so he kept all the operation manuals and put all the spacesuits into the boxes. Then he smiled and said, "The first group of fellow Daoists will board the Flying Ship with me! Let's carry out the first test flight!"

Chen Xuan and the others nodded in agreement.

Song Wei was worried. She grabbed Xia ruofei's hand and said, ""RUO Fei, you must be careful! If you think it's too difficult, just give up. Don't take the risk!"

Xia ruofei smiled and nodded. ""Don't worry! We're just going to the low – Earth orbit, there won't be any danger. "

He had already gone up with Chen Nanfeng and the others once before, and that time, there were no protective measures at all, so he was still confident.

"You must take good care of Qingxue!" Song Wei said. If anything happens to her, I'll hold you responsible! Do you know that?"

Ling Qingxue held Song Wei's hand and said, ""Wei Wei, don't worry! With RUO Fei around, nothing would happen! Besides, we're just going to test out the spacecraft and spacesuits. We'll be going to the moon in a few days!"

"I'll be waiting for your good news at home!" Song Wei nodded.

On the other side, Chen Nanfeng and Liu Mansha were also giving Chen Xuan and the others some instructions. After a while, Xia ruofei, Ling Qingxue, Chen Xuan, Yang Liu, and Yu Xin 'er greeted everyone and jumped onto the black Phoenix flying ship.

Everyone stood by the ship's side and waved to them. Then, Xia ruofei steered the black Phoenix flying ship and began to ascend.

Very quickly, the spacecraft was at an altitude of about five thousand meters. At this altitude, the oxygen content was relatively low. Under normal circumstances, ordinary people could breathe normally at an altitude of three thousand meters and below. At higher altitudes, they would feel all kinds of discomfort after a long time. If it was eight or nine thousand meters above ground, without oxygen, ordinary people might faint in less than ten seconds.

Of course, cultivators could still move freely at this height.

Xia ruofei first controlled the flying boat to hover at this height, then smiled and said to everyone, ""Everyone, take a break and put on your spacesuits. We're going to fly into low – Earth orbit."

Xia ruofei provided the basic data of the nine people's height and body shape for Elon Musk. It was basically tailor – made, which meant that each person had two sets.

However, the five sets that were handed in first were basically larger in size, so they definitely wouldn't fit petite girls. However, they could still be used.

On the deck of the black Phoenix flying ship, everyone had put on their spacesuits and transformed into bloated figures.

From this moment on, everyone was breathing in the oxygen provided by the oxygen supply module.

With a thought from Xia ruofei, the black Phoenix flying ship began to ascend again, directly flying out of the atmosphere.

Chapter 3258 Space experience (1)

10 kilometers.

50 kilometers.

100 kilometers ...

Unlike rockets, the black Phoenix flying ship did not require a powerful thrust to overcome the effects of gravity. Hence, it maintained a very high elevation speed. Without realizing it, the black Phoenix flying ship had already risen to an altitude of about 400 kilometers above the ground.

At this height, the atmosphere was already very thin, close to the state of vacuum.

Moreover, everyone was already in a state of weightlessness.

For Xia ruofei and the others who were wearing the spacesuits, they felt more at ease in the zero – Gravity state. Although the cumbersome spacesuits still looked bloated, they seemed weightless.

Sound couldn't be transmitted in a vacuum.

However, Xia ruofei and the others did not need to use their spiritual power to communicate as the spacesuits all had an intercom system. They had set the frequency to the same channel in advance, so they could communicate directly through the same frequency.

Xia ruofei said, "we're just testing the flight. I think we should just maintain this altitude. It's almost the same altitude as the Tiangong experiment module in our country." Brother Chen, what do you think?"

Chen Xuan made an 'OK' gesture and said, ""Sure!"

This time, Xia ruofei was the main person in charge of the flight verification. Naturally, no one had any objections.

"Then I'll release the spaceship!" Xia ruofei said.

With that, he used his spiritual power to control the control panel of the black Phoenix flying ship, expanding the protective barrier of the ship by about twenty meters. This was almost the limit of the protective barrier. Maintaining such a large area for such a long time would consume crystals at a much faster rate. However, Xia ruofei still had to do this. If he released the spaceship rashly, many big countries would probably notice the sudden appearance of an unknown spaceship in the 400 – kilometer orbit. Hence, he had to keep the spaceship within the range of the shield.

After adjusting the barrier of the black Phoenix flying ship, Xia ruofei took out the Dragon God ship from the spirit map space.

The Dragon Ship appeared beside the black Phoenix flying ship in an instant. At this time, the black Phoenix flying ship was already maintaining an altitude of four hundred kilometers, flying around the Earth. The Dragon Ship and the black Phoenix flying ship were in a relatively stationary state.

Xia ruofei used two straps to connect the Dragon Ship and the black Phoenix flying ship together. The straps were the safety ropes used by astronauts when they went out of their spacesuits. There were

several of them in every EVA suit's accessory box. Now that the two spacesuits were still and there was no pulling force, it was enough to use the straps to make a simple connection.

Furthermore, even if the black Phoenix flying ship and the Dragon Ship were to drift far away in space, Xia ruofei could still control the black Phoenix flying ship to chase after them. He would definitely not get Lost in Space.

"Fellow Daoists, I'll be going first!" Xia ruofei said with a smile.

With that, Xia ruofei lightly stepped on the deck of the black Phoenix flying ship and flew towards the Dragon Ship.

Xia ruofei did not take any safety measures. Instead, he grabbed onto a fixed rod on the exterior of the spaceship and waved at Chen Xuan, Ling Qingxue, and the rest who were on the deck of the black Phoenix flying ship behind him.

It was basically impossible for an ordinary person to enter a sealed spaceship in space.

In fact, in space flight, if the cabin door was opened directly from the outside, the strong internal and external pressure difference would probably blow the cabin door out directly. When astronauts went out of the cabin, they would first come to the sealed cabin and depressurize it so that the cabin would become a vacuum without any pressure difference from the outside. Only then could the hatch be opened.

Of course, this was not a problem for cultivators.

Xia ruofei grabbed the pole outside the Dragon Ship with one hand, then extended his spiritual power into the return cabin. The return cabin was also the cockpit of the spaceship, and all the control was completed here.

Although the power system of the spaceship had been dismantled, some of the basic control units were still kept. Otherwise, the spaceship would be a big can and would not be able to meet the needs of space life.

Xia ruofei followed the operation manual and used his spiritual power to remotely control the outside of the spaceship. He turned on the main power supply of the spaceship and unfolded the solar sails to ensure that the spaceship had sufficient power.

Then, he pressed the button to depressurize the cabin he was about to enter.

After that, Xia ruofei used his spiritual power to pull the handle of the hatch and opened the airtight hatch.

Then, Xia ruofei easily pushed the door and entered the spaceship.

Xia ruofei did a simple check and said, "Everyone, come over!"

Chen Xuan and the others also leaped off the black Phoenix flying ship and made their way to the top of the Dragon Ship with ease. They then filed into the ship.

Five people in spacesuits entered the cabin, making it a bit crowded.

Xia ruofei quickly closed the hatch and extended his spiritual power to the cockpit to check the seal of the cabin. After making sure that the hatch was closed and there was no problem, he began to apply pressure to the cabin.

Soon, the air pressure in this cabin was the same as that of the other cabins.

Xia ruofei opened the door to the other cabins and said,""Alright, everyone can take off your spacesuits now. However, the Qi condensation cultivators, please wait for a moment. Brother Chen, elder yang, and I will go first!"

Chapter 3259 Space experience (2)

Xia ruofei and Chen Xuan were both Aurous core stage cultivators. If there was a problem with the oxygen content in the spaceship or if there were any other dangers, their survival rate would be much higher than that of Qi refinement stage cultivators.

Xia ruofei and the other two followed the procedure and took off their spacesuits.

They tried to take a few breaths. The feeling was not much different from that on the ground. It was just that they felt a little uncomfortable in the weightless state. However, the internal environment of the spaceship was definitely not a problem. Even if an ordinary person from the secular world appeared on the spaceship at this moment, they would still be able to survive well.

Hence, Xia ruofei gestured to Ling Qingxue and Yu xiner.

The two of them couldn't wait to take off their Eva suits.

There was already air in the cabin, so everyone could communicate directly.

Xia ruofei said,"initially, in order to ensure that in the event of danger, everyone could change into their spacesuits and escape the spacecraft quickly. All of their spacesuits were designed to be left in this cabin. However, everyone has their own storage artifacts. So, it's better for everyone to keep their spacesuits. This way, there will be more space in this cabin!"

Everyone nodded and put their spacesuits into their storage artifacts.

After that, Xia ruofei brought everyone around the spaceship.

These cultivators were still somewhat unaccustomed to the zero – Gravity environment. They always felt that the ground beneath their feet was light, and they no longer had the concept of up and down. Therefore, they stumbled as they moved forward. Fortunately, when the spaceship was designed, soft bags had been used in some of the easily – bumped areas, so the protection was still quite good.

Xia ruofei and the rest strolled around and realized that the expanded cabins were not very big, but their design was very reasonable.

For example, there were two resting quarters, so that men and women could be separated. Of course, the so – called resting quarters were actually sleeping bags fixed on the wall. Because they were in a weightless state in space, there was no distinction between up and down, so everyone felt the same standing or lying down.

The Flying Ship also had a special area for bathing and using the toilet.

In addition, as they did not need to carry a large amount of living supplies or undertake in – Orbit scientific experiments, they naturally did not need to carry experimental equipment, which saved a lot of space in the cabin. Xia ruofei did a simple estimate. Even if there were a few more people, it would still be more spacious.

Of course, this was all relative. If compared to the ground, the interior of the spaceship would definitely be cramped.

Everyone followed the operation manual of the spaceship and practiced some basic operation procedures a few times. This was also the most basic requirement. In a one – or two – month long voyage, any situation could happen. Naturally, everyone needed to be able to perform the basic operation of the spaceship independently.

Fortunately, they were all cultivators, and this operation was not particularly difficult. The main test was still memory, so everyone mastered it very quickly.

Xia ruofei and the rest stayed in the spaceship for about half an hour before they put on their spacesuits and returned to the orbit chamber.

Xia ruofei locked the door to the return cabin and used his spiritual power to operate the buttons on the spaceship to depressurize the cabin.

Following that, the cabin door was opened, and everyone left the spaceship in a single file, returning to the black Phoenix flying ship.

Xia ruofei didn't keep the Flying Ship immediately. Instead, he started to set up an array on the surface of the Flying Ship.

The main thing was the simple shielding formation. To Xia ruofei, the formation itself was not difficult. The real difficulty was that he had to prepare the materials for the formation in advance and fix them on the surface of the spaceship. These materials had to be able to adapt to relatively harsh environments.

When Xia ruofei was in the United States, he had already asked Li Yifu to make preparations in advance.

The material he used was a type of nephrite. Although it was not very hard, it had the best ductility among all Jade materials. Even if the temperature changed greatly, it would not crack easily.

Xia ruofei placed the Jade talismans that he had drawn earlier on the surface of the spaceship. For the sake of the voyage operation, there were many grooves and handrails on the exterior of the Dragon Ship. Xia ruofei placed the talismans one by one according to the circumstances. After checking once, he returned to the interior of the ship.

The hatch of the spaceship was not closed yet. Xia ruofei entered the cabin skillfully, closed the hatch, and applied pressure.

Finally, he came to the cockpit. This was the control center of the spaceship. Xia ruofei had also arranged the core of the array here.

Although he was wearing a heavy EVA suit, Xia ruofei used his spiritual power to set up the array. Hence, it did not affect his speed. He set up the control core of the array with great familiarity, then embedded an origin crystal in it and left the spaceship.

The main function of this array was to shield the spaceship. This way, the monitoring equipment on earth, the satellites in orbit, space stations, and so on would not be able to detect the spaceship. Even with the naked eye, ordinary people would not be able to see it.

This way, the black Phoenix flying ship did not need to keep the barrier at its maximum setting. When the barrier was at its maximum setting, it would consume a lot of crystals. It would be fine if it was just a little bit of waste, but the round trip would take a month or two, and it would not be just a little crystal waste. Hence, Xia ruofei naturally had to make some improvements.

After directly setting up the shielding array on the Flying Ship, one origin crystal could be used for one or two months. This kind of consumption could basically be ignored.

In fact, spiritual crystals could be used in the shielding formation. However, Xia ruofei did not want to change spiritual crystals frequently, so he used origin crystals.

In this way, he only needed to control the opening and closing of the array. He basically didn't need to worry about the energy depletion of the array during the entire voyage, which was almost free of maintenance.

After Xia ruofei left the Dragon God ship, he did not keep it immediately.

He also closed the cabin door and used his mental power to remotely control the cabin. He pressurized the cabin again and turned off the power of the spaceship. However, he didn't retract the solar panels. The mountain and sea realm in the Xuanji spirit map was spacious enough, so there was no need to retract the solar panels to save space. They could be stored directly in the cabin. Moreover, collecting the solar panels frequently would increase the risk of failure, so keeping them open directly should be the most stable.

After doing all this, he kept the Dragon flying boat into the spirit map space and turned off the shielding array of the flying boat temporarily.

Xia ruofei returned to the black Phoenix flying ship and immediately reduced the range of the barrier. She then smiled and said to everyone, "Alright, everyone's first space experience ends here! We should return! The second batch of passengers is waiting to board the ship!"

Everyone's relaxed laughter could be heard in the channel.

To be honest, when they first boarded the black Phoenix flying ship, Ling Qingxue and Yu Xin 'er, the two Qi condensation cultivators, were quite nervous. After all, space was filled with the unknown, and to them, fear was inevitable.

However, after about an hour of experience, the fear had weakened a lot, and they were more confident.

Xia ruofei steered the black Phoenix flying ship and began to descend. After finding a suitable trajectory, he steered the Flying Ship in the direction of Huaxia's capital city as he descended.

The speed of descent of the airboat was very stable. This was also thanks to Xia ruofei's precise control. As the altitude dropped, Earth's gravity began to take effect. If there was no control, the speed would definitely be faster and faster. However, under Xia ruofei's control, the airboat could basically maintain a constant speed of descent. This made the 'passengers' more comfortable.

At an altitude of about 3000 meters, the airboat had arrived above the capital city of Huaxia through a precise descent trajectory.

Xia ruofei controlled the black Phoenix flying ship to hover in the air. Then, everyone changed out of their spacesuits. At this altitude, the oxygen content was sufficient. The temperature was also within an acceptable range for ordinary people. Naturally, they no longer needed the protection of spacesuits.

The spacesuits that everyone had changed out of were not kept. Instead, they were left on the deck of the black Phoenix flying ship. This was because the next batch of expedition members would be boarding the Flying Ship soon, and they would still need to use these spacesuits.

After changing, Xia ruofei controlled the flying boat to continue descending. It stopped a few meters above the courtyard in liuhai Lane.

Chapter 3260 Everything is in place (1)

The other cultivators who had stayed behind to guard the courtyard house were already looking up from the courtyard.

Chen Xuan and the others stood on the deck of the black Phoenix flying ship and waved to the people below.

Chen Nanfeng smiled when he saw his son standing by the ship's railing unscathed.

It was impossible to say that they were not worried. Although they had been on the black Phoenix flying ship once before, it was far from reaching an altitude of four hundred kilometers. Furthermore, they did not have an EVA suit at the time, so they did not stay for that long.

This time's verification flight could basically simulate the situation on the way to the moon. If there were any problems, they would definitely be exposed, and there would be a certain degree of safety risk.

Therefore, from this perspective, the first batch of people participating in the verification flight was much more dangerous than the second batch.

Xia ruofei and the rest jumped off the black Phoenix flying ship. Chen Nanfeng went up to them and asked, "Fellow Daoist Xia, did everything go smoothly?"

Xia ruofei smiled and nodded. "No problem! Our plan should be feasible! We've tested the spacesuits and the spacecraft's functions. It's almost as we expected, so it should be able to support our return trip to the moon!"

Seeing that her soaring Flower Valley's Elder Willow and her beloved disciple Yu xiner were unscathed, Liu Mansha's suspended heart also relaxed. After she heard Xia ruofei's words, she asked, "Fellow Daoist Xia, a round trip to the moon will take at least one or two months! The durability of that ship ..."

"I've asked the American," Xia ruofei said with a smile, "the Dragon Ship is designed to be in orbit for at least a year, so it can be in space for a long time. This was something that Valley master Liu could rest assured about. The technological level of the secular world had long been able to reach. The peace space station's service period was as long as 15 years, and it had been built in 1976. Human technology had already reached this level decades ago. The International Space Station that was in orbit now was also in orbit for a long time. The Dragon space station's design and construction had used more advanced technology and materials, so it definitely wouldn't have a problem supporting it for a few months. Unless it was hit by a meteorite or some force majeure, which caused serious damage. "

Chen Xuan chuckled as well. "The probability of a meteorite impact is very low. I'm more worried about the space trash ... However, the space trash is mainly scattered around low – Earth orbit. Once they're far away from earth, the space trash will be almost non – existent. Furthermore, everyone's spiritual power is not just for show. If we really encounter an impact, we can definitely detect it in advance and avoid it!"

"If that's the case, we can rest assured!" Chen Nanfeng said with a smile.

"It seems that fellow Daoist Xia has already considered these factors. It seems that we have been worrying for nothing!" Liu Mansha nodded with a smile.

Xia ruofei laughed and said, "there are too many unknown in space. It's necessary to plan ahead. Moreover, accidents can never be completely avoided. We still have to adapt to the situation. So, we just have to do our best to prepare. As for the risk ... If we're afraid of the risk, why would we form this exploration team?"

Xia ruofei's words were to Mu Sheng's liking. He laughed heartily and said, "Cultivation is to fight against the heavens. Cultivators pursue longevity, and this in itself conflicts with the laws of the heavenly Dao! The greater the risk, the greater the opportunity. Little brother Xia, to be honest, I'm very envious of you! If I can pass the selection, even if these old bones are buried on the moon, this old man will definitely take a trip! Hahaha!"

"The Father's legacy will be passed on to the son. It's the same if brother Jianfei goes to the moon in your place!" Xia ruofei said with a smile.

Then, he turned to mu Jianfei and the others and said, "Elder mu, elder Chen, brother Jianfei, lady yurou, please board the boat! Let's begin the second flight verification!"

Mu Hua and the other three smiled and nodded. At this moment, they were feeling much more relaxed. After all, Chen Xuan and the others had already passed through the first group.

Xia ruofei saw that the four of them had already jumped onto the flying boat, so he smiled and said to Chen Nanfeng and the others, "Three seniors, I'll accompany elder mu and the others on another trip!"

"Thank you for your hard work!" Chen Nanfeng smiled and nodded.

Mu Sheng and Liu Mansha also nodded at Xia ruofei in greeting. Mu Sheng then looked up at mu Hua and mu Jianfei who were standing by the side of the black Phoenix flying ship and loudly warned, "After you go up, pay attention to your safety. Listen to little brother Xia's arrangements and don't act on your own!"

“Yes!” Mu Hua and mu Jianfei quickly bowed and replied.

Xia ruofei cupped his hands at everyone and then jumped onto the flying boat.

The following procedure was the same as before. Xia ruofei steered the airboat to an altitude of 5000 meters and had everyone change into their spacesuits. Then, they headed straight for the 400 – kilometer orbit.

In the orbit, Xia ruofei released the Dragon Ship and connected it to the black Phoenix flying ship. Then, he brought everyone into the ship.

Unlike the previous time, Xia ruofei did not need to adjust the range of the black Phoenix flying ship’s shield. He only needed to activate the shield formation on the ship.

At the same time, he didn’t need to open the solar – powered sailboard, because the sailboard was always open.

Hence, Xia ruofei only used his spiritual power to remotely turn on the main power switch of the Dragon Ship. After deflating the cabin that they were entering, he opened the door and got into the ship first.
