

God tier Farm 3261

Chapter 3261 Everything is in place (2)

This time, they stayed in orbit for about the same amount of time. Xia ruofei let everyone practice the basic control of the spaceship a few times and familiarized them with the various cabins of the spaceship. After rehearsing the process of entering and exiting the cabin, he brought everyone back to the surface.

Chen Nanfeng and the others even steered their flying swords to the side of the black Phoenix flying ship and inspected it carefully.

The final result made Chen Nanfeng and the others feel at ease. The black Phoenix flying ship had gone through two flight tests and had not suffered any damage at all. This fully demonstrated that the black Phoenix flying ship's material was strong enough to withstand the harsh conditions in space.

As for the Dragon Ship, after Xia ruofei's explanation, everyone was no longer worried about whether it could last long in space.

.....

The next few days, everyone waited patiently.

Everyone used this time to familiarize themselves with the control Manual of the spaceship and the spacesuits. During this time, Xia ruofei even organized everyone to take the black Phoenix flying ship to the 400 – kilometer orbit and did two practical operations according to the grouping previously.

The learning ability of cultivators was very strong. With these few practical Operations practice and the constant use of time to study the operation manual, basically everyone had mastered the basic operation of the spacecraft and the use of the EVA spacesuits. They had also memorized some of the things to take note of in space.

This knowledge was likely to be useful in the process of going to the moon, and it might even save their lives. Therefore, everyone was very serious about learning.

Other than his daily studies, Xia ruofei also took time to go out.

The purpose of this trip was very simple. He wanted to send Song Wei away first. Moreover, he did not want Song Wei to return to school or her home at the three mountains. Instead, he wanted her to stay on Peach Blossom Island temporarily.

The mission to the moon would take at least one to two months. Xia ruofei and Ling Qingxue were on the expedition team list. Only Song Wei had to stay on earth because she did not pass the music selection.

Xia ruofei was still worried about Song Wei's safety.

After all, Jindan stage seniors like Chen Nanfeng, Mu Sheng, and Liu Mansha had all stayed on earth.

As for what kind of opportunities there would be during the exploration, it was still unknown. Xia ruofei had to consider whether the forces that were still in their honeymoon period would turn hostile if the

benefits were great enough. These possibilities existed. By then, Song Wei would become Xia ruofei's weakest link. Hence, he had to make arrangements for Song Wei in advance.

The Paradise Island was undoubtedly the most secretive and safest place.

Initially, Xia ruofei wanted to build a communication system so that Song Wei could keep in touch with them even on the ground.

However, when he was in the United States, he had asked Elon Musk about heaven and earth communications, and he knew that it was very difficult to realize it. It required a huge measurement and control network and the support of countless communication equipment. Of course, Xia ruofei and the rest were still in low – Earth orbit. In theory, they could even hear the content they wanted to broadcast through a normal radio. However, as the spacecraft entered the earth – Moon orbit or even the moon, the signal would be very weak. They could only listen and not communicate, so it was not very meaningful.

Not to mention, this kind of one – way broadcast could theoretically be heard by everyone within the effective area, provided that they knew the frequency band of the communication. Therefore, there was no confidentiality to speak of. It could even cause a huge uproar if it was overheard by some fanatical fans. At the current stage, China did not have any manned space missions, so it would be quite scary if the voices of the Chinese suddenly came from space.

Hence, after Xia ruofei understood the difficulty of communicating with the heavens and earth, he gave up.

In this case, there was no need for Song Wei to stay in Beijing.

After knowing that Xia ruofei and the rest would lose contact with the ground during their journey to the moon, Song Wei was still worried because Xia ruofei had told her that he would keep in touch with her. However, after hearing Xia ruofei's explanation, Song Wei expressed her understanding. After all, Xia ruofei would not increase his workload just for this matter.

Moreover, even if Xia ruofei wanted to work hard to complete it, it was basically impossible.

The Chinese astronauts were communicating with the ground from the Tiangong experiment module. It was the result of the joint efforts of countless control stations, including the control ships that had been sailing in the ocean. No matter how capable Xia ruofei was, it was impossible for him to build such a control network in such a short time.

Of course, the astronauts' sky – to – Earth communication was of very high quality. Not only was there sound, but there were also images. The synchronization of sound and image was also very good. Not only that, but the astronauts in the Tiangong experiment module could also see the images and hear the sounds on the ground. This was a real video call.

After this period of interaction, Chen Nanfeng and the others had a better understanding of Xia ruofei. The initial mutual wariness had also reduced a lot.

Therefore, when Xia ruofei and Song Wei went out alone, Chen Nanfeng and the others did not interfere and did not ask for anyone to follow them.

Of course, Chen Nanfeng and the rest were not worried that Xia ruofei would take this opportunity to fly the black Phoenix flying ship to the moon alone. On one hand, Xia ruofei had a large number of businesses in the secular world and the star Seizer sect, which was closely related to him in the cultivation world. If Xia ruofei really dared to go back on his word, Chen Nanfeng and the rest would definitely deal with the star Seizer sect with lightning – fast methods. On the other hand, to avoid suspicion, Xia ruofei had given all the spacesuits and oxygen supply modules to Chen Xuan, mu Jianfei, and the others for safekeeping. He only left the Dragon Ship behind. Without the spacesuits and the oxygen supply module, he naturally could not head to the moon.

Just like that, Xia ruofei and Song Wei took the black Phoenix flying boat and circled the Pacific Ocean a few times. After making sure that no one was following them, they turned around and headed straight for Peach Garden Island.

In reality, with the black Phoenix flying ship's speed, even if there were people following it, they would definitely lose their way after making a few turns. This was because the current cultivators' ability to ride flying swords was simply unable to keep up with the black Phoenix flying ship's speed. Even Chen Nanfeng could not do it.

Unless there was a hidden Yuanying stage master, the probability of this was very low.

After bringing Song Wei to the Peach Blossom Island, Xia ruofei instructed Luo Qingfeng and Zheng Yongshou, who were guarding the island, to take good care of Song Wei. At the same time, they had to be alert at all times and ensure the safety of the island. Then, he left some cultivation resources for Song Wei and hurriedly left the island on the black Phoenix flying boat. He did not even have time to meet up with the guards.

After returning to the capital, Xia ruofei continued to familiarize himself with the spaceship's operation manual and other materials with the cultivators from the three sects in the siheyuan. That was until he received a call from Li Yifu.

Li Yifu told him over the phone that Elon Musk had produced the remaining EVA suit and oxygen supply module and delivered them.

Hence, Xia ruofei immediately told Chen Nanfeng and the others about this news. Everyone was very excited.

After preparing for such a long time, the materials and equipment needed for this expedition were finally ready.

Everyone decided to leave for the United States overnight to retrieve their spacesuits and oxygen supply modules.

This time, even Chen Nanfeng and the others were there. Everyone left the liuhai Lane courtyard house.

Xia ruofei gave Wu Qiang some instructions. After all, if everything went well, he would soon follow the exploration team to the moon and might not return to the courtyard house for a long time.

Besides, Xia ruofei had also considered the fact that there were so many people. They could not just disappear into thin air. After all, the front and back doors of the courtyard were guarded.

Hence, after instructing Wu Qiang, Xia ruofei brought the cultivators and left through the front door of the courtyard house.

However, they did not go far. The alley was very quiet at night. After they turned a corner, Xia ruofei took out the black Phoenix flying boat. Everyone quickly jumped onto the flying boat. Soon, the black Phoenix flying boat rose in altitude and flew across the capital city's night sky like a shooting star, heading towards the other side of the ocean.

Chapter 3262 Set off in full gear (1)

In Houston, America.

The sun was shining brightly, and there were no clouds in the sky. The black Phoenix flying ship hovered above a warehouse in the suburbs. Li Yifu stood respectfully in the courtyard to welcome them.

Xia ruofei was the first to jump off the flying boat, followed by Chen Nanfeng and the others.

"Senior granduncle, seniors, and fellow Daoists, you've had a long journey!" Li Yifu bowed and called out.

Xia ruofei kept the black Phoenix flying ship as he smiled and said, "You've worked hard! You've been keeping an eye on him in America all this time!"

Chen Nanfeng, Mu Sheng, and the others also greeted Li Yifu with a pleasant expression.

"This is what this disciple should do!" Li Yifu quickly said.

"Did everything go well after receiving the last batch of supplies and equipment?" Xia ruofei asked.

"Everything is going smoothly! Elon Musk didn't play any tricks, and everything was delivered with good quality!" Li Yifu said, "the items are all in the warehouse. Grand uncle – Master, please come in!"

Xia ruofei nodded and the group of people followed Li Yifu into the warehouse.

Half a month ago, Xia ruofei had been here as well. He had personally received the Dragon Ship and the first batch of five Eva suits. They had been transported to this warehouse as well.

As Li Yifu walked, he said to Xia ruofei, "By the way, granduncle, Elon Musk's son just had a comprehensive examination two days ago, and the results showed that the tumor in his body has completely disappeared. From a medical point of view, he has completely recovered. Those United States doctors thought it was incredible!" Elon Musk specifically asked me to convey his gratitude to you!"

Xia ruofei smiled and said, "we're just taking what we need." By the way, I left your contact information with him, and he gave us a spaceship. I promised him that if he unfortunately gets an incurable disease in the future, he can ask me for help, and I will help him three times. My trip to the moon this time might not be short. If he really contacts you during this time, you have to explain it to him."

"Understood, martial granduncle!" Li Yifu said.

"Fellow Daoist Xia, you've sacrificed too much for our trip to the moon!" Chen Nanfeng said.

“Yup!” Mu Sheng also said, “we can’t let little brother Xia suffer a loss! If this American really needs you to treat him, we will provide all the rare herbs you need!”

“Agreed!” Liu Mansha nodded. Also, the trip to and from the moon will take a long time, and the energy consumption of the flying boat will also be very large. We’ve already discussed earlier that the required origin crystals will be borne by our sects, and we’ll hand them over to fellow Daoist Xia before we set off.”

Xia ruofei chuckled. “Seniors, you’re too polite. Since we’re working together, there’s no need to be so calculative ... Although I’m not as wealthy as you big sects, I can still afford the crystals we’ll use on the journey.”

“It’s one thing that you can afford it, but we can’t do that.” Chen Nanfeng smiled and said, “if this gets out, we’ll be the ones taking advantage of the younger generation. It’s not nice to say! That’s why! We’ve already discussed it, so just do as we say!”

“Alright!” Xia ruofei smiled and said, “then I won’t stand on ceremony with you!”

As they spoke, everyone walked into the warehouse.

The corners of the warehouse were neatly stacked with boxes.

There were 13 slightly bigger boxes, which contained the entire set of EVA spacesuits.

The rest of the smaller boxes were all mass produced oxygen supply modules.

As the production of the oxygen supply module was relatively simple, apart from the ones that were delivered last time, Elon Musk had prepared a total of 3000 sets this time. The surplus was quite large. Even if Xia ruofei and the rest of the nine people were to use their EVA spacesuits the entire time, it would be more than enough to use for two months. Furthermore, with the Dragon Ship, they could spend most of their time in the ship and did not need to use the oxygen supply from the oxygen supply modules. This meant that the oxygen supply modules could last longer.

Once Xia ruofei entered the warehouse, he used his spiritual power to check all the supplies and equipment.

In fact, Chen Nanfeng, Mu Sheng, and the others were doing the same thing. However, they didn’t know much about spacesuits, so they couldn’t see any problems.

Xia ruofei laughed and said, “there’s no problem with the items. Everyone, come and claim them!” We’ll split the oxygen supply modules equally. Everyone’s storage artifacts should be able to store them, right? If you can’t, just tell me, I can store more!”

The EVA suit was made according to everyone’s body size. There were nine specifications in total, with two sets of each. Of course, this included the five sets that were delivered last time. All the EVA suits were numbered, so everyone just had to find their own two sets according to the corresponding number.

Chen Xuan and the others took out the five spacesuits that they had used previously. Following the serial numbers, they found two of their own and kept them in their storage artifacts.

Xia ruofei also kept his own two sets.

Xia ruofei also told Ling Qingxue to keep her spacesuit.

This was the safest way. There were too many unknown factors in space. Xia ruofei could not guarantee that he would not be separated from Ling Qingxue. If that happened and Ling Qingxue's EVA suit was with Xia ruofei, the outcome would be tragic. Therefore, as a last resort to save their lives, everyone had to keep their own EVA suit.

Chapter 3263 Set off in full gear (2)

This included the oxygen supply modules. The two batches of oxygen supply modules added up to an average of 400 per person, which was enough to sustain breathing for 2000 to 3000 hours.

The boxes of the oxygen supply modules were stacked together and did not take up too much space, so there was enough storage space for everyone. Everyone in the exploration team kept the oxygen supply modules properly, including Ling Qingxue.

After all the equipment and supplies were distributed, Xia ruofei said to Li Yifu, "Foster husband, there's some cleaning up work here in the United States. Take your time to deal with it. We'll talk about it when you're done."

Li Yifu knew what Xia ruofei meant was that he did not need to rush back to Peach Blossom Island. However, he could not say it out loud since Chen Nanfeng and the others were present.

"Yes!" He quickly replied. I understand!"

This time, Xia ruofei definitely could not send Li Yifu to Paradise Island. Besides, Li Yifu had returned to the United States by plane and entered the country through normal procedures. It was best to have an exit record when he returned. Otherwise, if he returned through normal channels, he would not be able to explain clearly how he came back from overseas without any exit procedures.

Li Yifu continued. "Grand uncle – Master, the journey to the moon is long and full of unknown dangers. You must take care of yourself and pay attention to your safety!"

Xia ruofei smiled. "Don't worry about me. Just take care of everything at home. I'll be careful!"

"Please rest assured, grand uncle – Master!" Li Yifu quickly replied. There are disciples at home, so you don't have to worry about anything!"

Xia ruofei smiled and nodded. "Then I'll take my leave first!"

"Have a safe journey, martial granduncle!" Li Yifu said respectfully.

He sent Xia ruofei and the others to the courtyard and watched as they boarded the black Phoenix flying ship and disappeared into the horizon. There was still a trace of worry on his face that could not be erased.

After all, Xia ruofei was going to the moon, which was hundreds of thousands of miles away. Even if Li Yifu had great confidence in Xia ruofei's abilities, he could not help but be worried. It was the moon, which did not even have air and had an extremely harsh natural environment! The power of nature was

always revered by people. In that lonely land of death, if there was any danger, there was not much difference between an Aurous core stage cultivator and an ordinary person.

However, Xia ruofei was an elder in his sect. No matter how worried he was, he could only bury it in his heart. He could not persuade Xia ruofei not to go to the moon.

Li Yifu valued seniority the most.

He looked at the sky where the black Phoenix flying ship had long disappeared and let out a long sigh. He turned around and locked the warehouse door. This matter was extremely confidential. After the items were transported, he had sent all the workers away. He had to complete all the cleaning work himself and could not let others do it.

.....

Xia ruofei controlled the black Phoenix flying ship and spent one to two hours before the group crossed the ocean and returned to Huaxia.

However, they did not go to Beijing this time. Instead, they went to a Holiday Manor in Nanhai province.

This was one of the properties of the first heaven society in the secular world. The first heaven society had already cleared the entire Manor in advance, and all the staff members were on leave. Only a few Qi condensation disciples transferred from the sect were left to serve everyone.

On the way back, everyone had already discussed and agreed that the expedition team would set off to the moon in three days.

The reason why he left a three – day buffer time was that he hoped that everyone could use the three days to rest and adjust to their best condition. On the other hand, they were going to the moon. It was an unprecedented feat. Therefore, everyone had to make some preparations and replenish their supplies.

Xia ruofei also agreed to make full preparations. After all, even he was not confident in this trip. If they left in a hurry, it would be even more dangerous.

In these three days, the first heaven sect, the surging waves sect, and the soaring Flower Valley had all made a lot of preparations for the disciples who were about to go to the moon.

This included some life – saving magical treasures, talismans, spare flying swords, various practical magical treasures, spirit stones, and so on. There were even a lot of spirit crystals and origin crystals. The three sects were all top – tier sects in the cultivation world and were very rich. For this trip to the moon, they had also taken out their most precious treasures and provided them to the disciples who were joining the expedition team as much as possible to increase their ability to deal with risks.

In addition, the first heaven society, as the host, had also organized people to transport a large amount of food, drinking water, and other living supplies, filling up the storage magical equipment of every member of the exploration team.

Of course, apart from Xia ruofei's spirit map space, the mountain and sea realm was an independent world. No matter how many resources there were, they could only occupy an unremarkable corner and could not fill it up.

Among the food, there were quite a few compressed biscuits and other similar compressed food. These were the last survival resources. After all, compressed food took up a small space, but it could provide sufficient energy. A small piece could sustain the energy required by an ordinary person for half a day. Cultivators had a relatively small need for food. If they were really trapped in a dangerous place and could not leave, these compressed food could greatly increase the survival time of the cultivators.

In fact, Xia ruofei did not really need these things.

This was because his spirit map space had a large amount of supplies stored in it. This was a normal operation for him. Ever since he had the spirit map space, he had gotten used to storing enough living supplies in the spirit map space so that he could use them at any time.

This was the so – called “when there’s surplus food in the family, one doesn’t have to panic.”

In addition, the spirit map space could even be self – sufficient. His hundreds of free laborers worked hard to cultivate the land of the mountain sea realm every day under Xia Qing’s supervision. In addition to various Chinese medicinal herbs, they also planted high – Quality rice.

It could be said that even if he was trapped in a certain place, Xia ruofei could still rely on the resources of the spirit map space to obtain an endless supply of food. At least, he could guarantee that he would not starve to death.

Of course, in order not to arouse suspicion, Xia ruofei did the same as everyone else. He stored the supplies that the first heaven society had provided him with into the spirit map space.

Besides, Xia ruofei had also secretly transferred some of his cultivation resources, mainly spiritual crystals and origin crystals, to Ling Qingxue so that she could keep them in her storage ring.

Naturally, this was also a precautionary measure in case the two of them were separated by force majeure.

With those resources and the cultivation resources that Xia ruofei had provided, even if Ling Qingxue was trapped alone, she could still rely on these resources to survive.

This was the worst case scenario and Xia ruofei had to consider it. Under normal circumstances, Xia ruofei would definitely avoid being separated from Ling Qingxue.

Three days passed by in a flash, and it was soon the day of departure.

The night sky was filled with stars and the bright moon hung in the sky, giving off a hazy Halo.

A group of people stood in a small square in the holiday villa, looking up at the moon in the sky. This would be their destination for the next few days.

The black – armored flying ship hovered a few meters above the small square.

Xia ruofei and the rest of the group stood below the black Phoenix flying ship. Opposite them were Chen Nanfeng, Mu Sheng, and Liu Mansha.

“Sect leader Chen, sect leader mu, Valley master Liu,” Xia ruofei said with a smile. “We’ll part ways here!”

"I'm fine!" Chen Nanfeng nodded solemnly. "We wish you all a smooth journey!"

Then, he looked at Chen Xuan and said, "Xuan 'er, you might face unpredictable dangers on this trip. I hope you can cooperate with me sincerely. I'll wait for your good news at home!"

"Don't worry, father!" Chen Xuan nodded. "I will be careful!"

On the other side, Mu Sheng and Liu Mansha were also giving instructions to their own disciples. Xia ruofei and Ling Qingxue were holding hands and standing at the side. For the sake of safety, Xia ruofei had already sent Song Wei to peach source Island in advance, so no one was sending them off tonight.

After a long farewell, Xia ruofei and the rest of the nine people jumped onto the flying boat.

The black Phoenix flying ship rose slowly, and a group of people stood by the ship's side, waving goodbye to the three sect leaders on the ground.

Following that, the black – Phoenix flying ship suddenly accelerated, turning into a small black dot in the blink of an eye before disappearing into the night sky.

Chapter 3264 Target: the moon (1)

Chen Nanfeng and the other two didn't leave for a long time. They watched as the black Phoenix flying ship disappeared from their sight and then quickly flew out of the range of their spiritual power. The three of them still maintained their posture of looking up at the sky.

After a long time, Chen Nanfeng sighed and said, "Fellow Daoists, I don't know if their departure will be a blessing or a curse!"

This time, not only did Chen Nanfeng send out the sect's elder, Shen tianfang, who held an important position in the sect, but even his own son, Chen Xuan, was also on the expedition. Mu Sheng's vast waves sect had also sent an elder. Mu Sheng's son, mu Jianfei, was also in the expedition team. As for Liu Mansha's soaring Flower Valley, they had also sent elder Yang Liu and Liu Mansha's personal disciple, Yu xiner. Hence, the three of them were in a similar mood.

"Brother Chen, even if you know that this trip is dangerous, if you choose again, I'm sure you'll still agree to let nephew Chen go!" Mu Sheng sighed.

"Yeah!" Chen Nanfeng smiled bitterly. "Since you've embarked on the path of cultivation, you must be prepared to face all dangers and challenges. Flowers in a greenhouse can't stand the true wind and rain!"

Liu Mansha pursed her lips and smiled, "fellow Daoists, why are you even more sentimental than a woman like me?" Other cultivators couldn't even dream of such an opportunity! To be honest, I'm a little envious of them. If I could pass the screening of that piece, I wouldn't hesitate to join!"

"That's true ..." Chen Nanfeng said, "if a cultivator doesn't even have the courage to take risks, then his cultivation achievements will be limited!"

"Hahaha! Brother Chen, Valley master Liu, they've already left, so let's not stay here and worry!" Mu Sheng smiled and said, "isn't there a saying? Children and grandchildren have their own fortunes! Even if we regret it now, we won't be able to catch up to them! That's why! Don't think about anything else,

just go back and wait patiently! I've heard that you've hidden a lot of good wine and your famous wild tea. This time, don't keep searching, take it out and share it with everyone!"

"No problem!" Chen Nanfeng laughed. Let's go! I've asked the disciples to prepare a banquet, let's have a good drink!"

The three of them left the small square of the resort together and walked in the direction of the main building.

In the near future, this holiday villa would no longer be open for guests, and Mu Sheng and Liu Mansha would also be staying here.

Their sect's matters had already been arranged. The only thing they had to do now was to wait patiently. Before they left, Chen Nanfeng had made it clear to Xia ruofei and the others that they would still land here when they returned.

If everything went well, Xia ruofei and the others would be back in about two months.

Two months was nothing for golden core stage cultivators. Even a small closed – door cultivation would take longer than this. Therefore, Mu Sheng, Liu Mansha, and the others were too lazy to go back and forth. They simply stayed here and waited patiently.

.....

On the black Phoenix flying ship, Xia ruofei and the rest had been standing on the front deck the entire time, looking down at the scenery that was rapidly becoming smaller.

Soon, the tens of thousands of lights on the ground were like stars, and for a moment, it felt like the world had been turned upside down.

The black Phoenix flying ship continued to rise at a constant speed. When they reached an altitude of about three thousand meters, Xia ruofei got everyone to put on their Eva suits.

However, he did not stop the flying boat this time. Instead, he let the flying boat continue to ascend at a constant speed.

Before they knew it, the spaceship had already reached an altitude of about 400 kilometers.

At this moment, everyone was already in a state of zero gravity. However, they still remained on the deck. In any case, the black Phoenix flying ship had activated a barrier and a protective barrier, so it was impossible for everyone to float outside due to the lack of gravity.

On the contrary, as they continued to rise, the magnificent scenery outside became even more attractive, so no one was willing to return to the cabin.

Everyone was now at an altitude of four hundred kilometers. Standing on the deck of the black Phoenix flying ship, they could already see the huge outline of the blue Earth. The hazy Halo at the boundary between dawn and dusk, as well as the city lights scattered all over the place, gave a rare and magnificent view that gave people a very shocking feeling.

Standing on the deck of the black Phoenix flying ship, one's line of sight was completely unobstructed, and the view was excellent. It could be said that out of the billions of people on earth, only a few people could appreciate such a scenery.

Only one in a million or even one in ten thousand astronauts would be able to see such a scenery. Other than a small number of astronauts who had experience walking in space, the rest of the astronauts would be in spaceships, experiment modules, and even space stations. They would only be able to see parts of the earth through the narrow porthole. How could they have such a panoramic view?

The black Phoenix flying ship was not always rising in a straight line. Its trajectory was somewhat similar to a rocket's, but it was more precipitous than a normal rocket's. However, at an altitude of four hundred kilometers, the black Phoenix flying ship was basically in a state of orbiting Earth.

According to the original plan, they would have to switch to the Dragon Ship at this height. Hence, under Xia ruofei's control, the black Phoenix flying ship stopped ascending.

Xia ruofei laughed in the communication channel. "Everyone, take a good look at this scenery! Once we enter the ship, we won't have such a wide view!"

Chapter 3265 Target: the moon (2)

"It's alright, the view from the ship is pretty good too!" Chen Xuan laughed. Besides, no one is in the mood to appreciate the beautiful scenery now. We'd better save it for the return trip!"

"Hahaha! What brother Chen said makes sense!" Xia ruofei smiled and said, "everyone, get ready. We'll transfer into the spaceship immediately!"

With that, Xia ruofei gently stomped on the ground and flew up. He grabbed the top of the black Phoenix flying ship and clumsily arrived at the small deck area at the end of the Flying Ship.

Chen Xuan and the rest followed Xia ruofei to the stern of the ship.

The stern deck was much smaller than the prow, so it was a little crowded with nine people in spacesuits.

With a thought, Xia ruofei took out the Dragon God ship from the spirit map space.

The gigantic Dragon Ship appeared in the pitch – Black space in an instant. It was suspended not far from the black Phoenix flying ship's stern, maintaining a relatively static state with the black Phoenix flying ship.

The moment the Dragon Ship appeared, Xia ruofei had already activated the ship's shielding formation with his spiritual power.

At the front of the Dragon ship's mass, five traction ropes had been placed in advance. Xia ruofei had asked Li Yifu to custom – make them while waiting for the last batch of Eva suits.

The five traction ropes were all made of high – strength alloy and each end had two hooks made of the same material. Xia ruofei had already hung the five traction ropes in advance during the previous flight test.

The two hooks at the front of each traction rope were hung on different outsides of the Dragon spacecraft assembly. Due to the lack of gravity in space, the five traction ropes were suspended in a twisted shape.

Xia ruofei used his spiritual power to grab the five leashers and pulled them over. Then, he hung the hooks at different positions on the side of the black Phoenix flying ship.

This kind of alloy hook had a strong spring, and it required a lot of force to unbuckle. Therefore, unless the spring failed, it was basically impossible to unbuckle by itself.

Five traction ropes were used at one time, and each traction rope had two hooks at each end, which was quite reliable. With so many safety measures, the probability of a problem occurring at the same time was almost zero.

Moreover, Xia ruofei had asked Li Yifu to order ten more of the same traction rope. They were now stored in the space as backup. If there was a problem with the traction rope during the voyage, they could be replaced at any time.

It could be said that Xia ruofei had already done his best to ensure safety.

After he connected the Dragon Ship to the black Phoenix flying ship with a leash, Xia ruofei then used his spiritual power to probe into the interior of the ship's cockpit. He turned on the main power switch and methodically made the preparations for the transfer.

Finally, after the pressure release procedure, some of the doors of the Dragon spaceship Assembly's orbital module were remotely opened by Xia ruofei's spiritual power.

Xia ruofei turned around and looked at the crowd. "The orbital module is relatively small, so we'll enter in two batches according to our original plan. The first group will follow me into the cabin!"

Everyone had already simulated this process on the ground a few times in advance, including the grouping. So, when it came to actual operation, everyone was in an orderly manner.

Ling Qingxue, Chen Xuan, Yang Liu, and Yu xiner followed behind Xia ruofei as they floated towards the Dragon God ship.

After a while, the five of them entered the orbital module.

Then, Xia ruofei closed the hatch from the inside. The computer started to check the seal of the cabin and released the air from the high – pressure bottle to pressure the orbital module.

In fact, as the main passage to enter and exit the module, the Dragon ship's orbital module carried eight high – pressure air tanks. Every increase and decrease in pressure were done through the air tanks. Applying pressure was the process of releasing the air in the air bottle. Only when the air pressure in the cabin was balanced with that of the other cabins could the doors leading to other cabins be opened. On the other hand, reducing the pressure was the exact opposite. By using the device inside the gas bottle to suck in air, the cabin would form a vacuum. This way, the air pressure in the cabin would be the same as the air pressure in outer space, and the hatch door to the exit cabin could be opened.

In theory, the air in the high – pressure air tanks could be reused. However, there would be a certain amount of loss during each process of increasing or decreasing the pressure. There was also a chance of

failure. Hence, Xia ruofei had specially requested to bring a few more high – pressure air tanks to prevent any problems from occurring after multiple trips in and out of the cabin.

Of course, even if all the high – pressure air tanks failed, Xia ruofei and the rest would not be trapped in the spaceship.

The spacecraft had also designed a manual decompression device that could directly compress the air and discharge it into space, thus forming a vacuum in the cabin.

The process of applying pressure was even simpler. Xia ruofei and the others had brought enough oxygen supply modules. If all the high – pressure tanks failed, they could just release the oxygen stored in the oxygen supply module after closing the door and apply pressure to the cabin.

In a short while, the orbital module was pressurized. Xia ruofei's spiritual power detected that the control panel in the cockpit showed that the air pressure in the orbital module was exactly the same as the other modules. The air quality met the requirements.

Hence, Xia ruofei asked everyone to take off their spacesuits and put them into their storage artifacts.

Then, he opened the door to the other cabins.

Following the original plan, Xia ruofei and Ling Qingxue went to the cockpit at the front of the spaceship.

Chen Xuan, Willow, and Yu Xin 'er went to the other resting cabin that was about the same size as the orbital module.

Chen Xuan was the last to leave the module. He locked the airtight doors that connected the module to the other modules tightly. This way, the module was completely separated from the other modules.

Xia ruofei and Ling Qingxue sat in the cockpit.

According to the design, this cockpit could accommodate up to four astronauts, and they would be four astronauts wearing Eva suits. Hence, it was still very spacious even though it could only accommodate Xia ruofei and Ling Qingxue, who were wearing their work clothes.

Xia ruofei found the button in the cockpit to depressurize the module and pressed it. The control panel showed that the module had returned to a vacuum state. Xia ruofei then used his spiritual power to remotely open the module door.

Then, he said in the communication channel, ""Elder Shen, the ship is ready. Please bring your team into the cabin!"

According to the drill, Shen tianfang of the first heavenly school was the person in charge of the second group. He led Xu yurou, a Qi refinement disciple of his school, and Mu Sheng and mu Jianfei of the Canglang school. A total of four people also successfully floated towards the Dragon spaceship mass and entered the orbital module in order.

Shen tianfang personally closed the airtight door leading to outer space.

Xia ruofei operated the cockpit and pressurized the module again.

When the air pressure in the orbital module returned to the same level as the other modules, Xia ruofei told Shen tianfang and the others in the communication channel that they could take off their spacesuits.

Shen tianfang and the others took off their heavy spacesuits and put them into their storage artifacts. Then, they opened the airtight door to the other cabins.

This way, all the cabins in the Dragon Ship were connected, and everyone's activity space was relatively spacious.

In terms of the size of the living space, the combined body was even larger than the Tiangong series space laboratories in China. After all, it was made up of several cabins.

If this mass was built using conventional means, it would take at least several rocket launches, and then fine orbital changes, docking, and other operations in orbit, which would cost a lot.

On the other hand, Xia ruofei had placed the spaceship in the spirit map space and traveled to the 400 – kilometer orbit in the spaceship. It was simply too easy!

After everyone had entered the cabin, Xia ruofei, who was sitting in the cockpit, laughed and said, "Is everyone ready? We're going to the moon!"

Chapter 3266 Space life (1)

This time, the people sent to the moon by the sects were all elites of their respective sects. These people's psychological quality was not worse than the astronauts, so even though they were in deep space, everyone did not feel too nervous.

In a state of zero gravity, there was no such thing as up or down. Chen Xuan was standing at the entrance of the cockpit. His body was perpendicular to Xia ruofei and Ling Qingxue. He peeked at Xia ruofei from the entrance and said with a smile, "Everyone can't wait. Let's go!"

"Alright!" Xia ruofei laughed and said, "everyone, sit tight!"

As he spoke, Xia ruofei's spiritual power had already extended out. He remotely controlled the black Phoenix flying ship, leaving the 400 – kilometer orbit and continuing to fly higher.

The black Phoenix flying ship was activated, and the five leaslines that connected the Dragon ship's mass slowly tightened.

Xia ruofei and the rest felt a slight tremor in the spaceship. Then, the spaceship began to move to a higher orbit under the pull of the black Phoenix flying ship.

Under Xia ruofei's intentional control, the black Phoenix flying boat's acceleration process was relatively slow. Hence, the pulling rope did not exert too much force.

In the history of human exploration of the Moon, whether it was a manned moon landing or an unmanned exploration, the process of going to the moon was basically the same. It was to change the orbit of the aircraft in the process of revolving around the Earth, so that the orbit would become higher and higher, and the circle would naturally become larger and larger, and finally, it would enter the Earth – Moon transfer orbit. Only then would it decelerate and enter the moon's orbit.

The black Phoenix flying ship's journey to the moon was similar. However, as the Earth's gravity did not affect the black Phoenix flying ship much, the process of raising its altitude was much faster, and the curve was naturally more steep.

Of course, in terms of time, the black Phoenix flying ship had taken more time to reach the moon than any moon exploration in human history.

The reason was very simple. It was simply his speed.

Using a rocket to send a probe or an astronaut to the moon was a continuous acceleration process. For the Apollo 11 manned moon landing mission, in order to enter low – Earth orbit, the rocket had already accelerated to 7.67 kilometers per second, and when it entered earth – Moon transfer orbit, the speed had reached 10.5 kilometers per second. Hence, it took Apollo 11 three to four days to send the astronauts to earth.

On the other hand, although the black Phoenix flying ship was much faster than ordinary commercial aircraft, it was still much slower than the high – thrust rocket. Its advantage was that the array had already offset the influence of gravity, so it did not need to travel at an extremely fast speed to get rid of the Earth's gravity. It could even fly directly to the moon at a constant speed.

However, no matter what, the straight – line distance of about 300000 kilometers still had to be covered by flying, so it naturally took a little longer.

After the black Phoenix flying ship was activated, all the exploration team members in the Dragon Ship had to do was wait patiently.

There was nothing much to do in the cabin. Many people chose to fix themselves on the wall and take out spiritual crystals to cultivate.

Although Xia ruofei had to control the black Phoenix flying ship, he only had to use a trace of his spiritual power to monitor the flying condition most of the time. This was because the black Phoenix flying ship only had to fly at a constant speed in the direction away from earth.

In fact, from the 400 – kilometer orbit, the black Phoenix flying ship would need more than ten days to reach the traditional earth – Moon transfer orbit at its current speed, which was about 60000 to 70000 kilometers from the moon. In traditional space flights, the further away from earth, the less the effect of the Earth's gravity. When the spacecraft was about 60000 to 70000 kilometers away from the moon, the moon's gravity would take the lead. The spacecraft would be captured by the moon's gravity and fly around the moon. After continuous adjustments, it would finally fly around the moon steadily, in preparation for the next step of landing on the moon.

The black Phoenix flying ship's array ensured that it would not be affected by gravity, so the journey to the moon was not that complicated. However, the route was basically the same.

In other words, the black Phoenix flying ship would have to drag the Dragon ship's combined body for more than two hundred thousand kilometers in these ten days.

This process was, of course, very boring.

Moreover, there was nothing in space, so there was no need to choose a flight route, so the control was very simple.

Xia ruofei only needed to make sure that the black Phoenix flying ship was at its maximum speed. It was similar to the 'cruise control' of a car, or even simpler, as there was no need to control the steering wheel.

Of course, for safety reasons, they still had to monitor the flight status.

In fact, although the Dragon Ship had been reduced by a lot, the technology was still very advanced. After a period of learning and practice, everyone was very familiar with the basic control of the spaceship, so everyone had arranged the duty schedule in advance. When the time came, two people would take turns to guard the cockpit and monitor the flight state.

Xia ruofei, on the other hand, had to take care of the black Phoenix flying ship. He had to split a small portion of his mind power at all times.

Of course, to Xia ruofei, this was not tiring at all. He could even divert his attention to other things.

In the initial stages of the flight, considering that they were still relatively close to earth and that there were various satellites, space stations, and experiment modules in orbit, the situation would be more complicated than later. Thus, on the first day, Xia ruofei decided to be on duty personally, and his partner was naturally Ling Qingxue.

Chapter 3267 Space life (2)

It was very quiet in the spaceship. Everyone was cultivating in the cabin behind them. There was only the dim light of the display screen and the muffled sound of the cooling fan in the cockpit.

Xia ruofei said to Ling Qingxue, "Qingxue, why don't you sleep for a while?" Or you can just cultivate for a while. It's too boring to stay here!"

Ling Qingxue had been leaning sideways in front of the Oval – shaped porthole of the spaceship. When she heard Xia ruofei's words, she did not get up. She said without turning her head, ""I don't want to sleep yet! The scenery outside is so beautiful!"

Xia ruofei turned his head and looked out of the porthole. They could see the huge outline of earth from this angle.

The blue Earth was like a gem. Although they couldn't see the entire earth, the shock they felt was even stronger.

Xia ruofei smiled and said, "let's rest for a while!" In the next ten days, you'll see the same scenery. No matter how beautiful it is, you'll get tired of it soon!"

"I know!" Ling Qingxue said, "but I can't help but want to see it!"

Then, Ling Qingxue said, ""I would never have dreamed that I would one day go into space and look back at the home that gave birth to human beings ... Ruofei, my life has become so wonderful after meeting you ..."

Xia ruofei laughed and said, "the most exciting things are always in the future!" This is only the beginning!"

Xia ruofei stretched his back and said, ""Qingxue, I'll take a nap for a while. Call me if anything happens!"

"Mm! You can sleep!" Ling Qingxue said.

Xia ruofei put his hands in his pockets and closed his eyes.

In such a weightless environment, the sleeping posture was not important. It was the same even if he was standing upside down.

Of course, there was no up and down in a weightless environment, so there was no such thing as handstands. Everything was relative.

However, it was best to keep both hands on the body. This was also specifically mentioned in the spacecraft operation manual.

The reason was simple. When a person was unconscious after falling asleep, their hands would naturally float in the air. When a person woke up and saw his hands floating in front of him like a zombie, he would definitely be shocked.

In fact, in a weightless environment, people would lose their sense of direction, and the body fluid would also be redistributed. This was also the reason why many astronauts had swollen faces in space, so there was actually quite a big difference compared to on the ground. Especially for people who were in space for the first time, they would feel very uncomfortable and not easy to fall asleep.

However, to Xia ruofei and the other cultivators, this little bit of discomfort was nothing. It was easy to overcome.

Hence, Xia ruofei quickly fell asleep.

He opened his eyes after a few hours of sleep and subconsciously turned his head to take a look.

Xia ruofei realized that Ling Qingxue, who was beside him, was not sleepy at all. He could not help but rub his eyes and said, ""Qingxue, are you really not tired?"

"I'm not sleepy at all!" Ling Qingxue turned around and smiled. "You're awake? How was your sleep?"

"It's pretty good!" Xia ruofei replied, "I don't think it's any different from the ground. I fell asleep as soon as I lay down ..."

Xia ruofei looked at his watch and said, "It's Five O' clock in the morning in China! Qingxue, are you hungry? Do you want to eat something?"

Ling Qingxue thought for a moment and said, "sure!" It's time for breakfast!"

Xia ruofei unbuckled his seat belt and said, ""Wait for me! I'll go wash up and then we'll eat together!"

The simplest thing on the ground, brushing teeth and washing face, would become a difficult thing in space. The main reason was that in a weightless environment, liquid was floating in balls. If it splattered everywhere, it could easily cause danger such as short circuits.

It was the same for eating. In the early days, space food was made into a paste and stored in a toothpaste – like container. The process of eating was to squeeze the “toothpaste” into the mouth. Although it had improved later on, it was still a very troublesome matter on the whole.

However, it was much easier for cultivators.

As long as he used his mental power to bind the liquid, they would be obedient and would not run around.

Xia ruofei came to a special cabin. This small cabin was equivalent to a “men’s bathroom”. Washing up and going to the toilet were done in this cabin. There were two such small cabins at the two ends of the spaceship mass, and the other one was naturally the “women’s bathroom.”

He took out a small bucket of spirit pool water from the spirit map space. After the bucket of water was taken out, it immediately turned into a floating ball of water.

However, under the restraint of Xia ruofei’s spiritual power, the water ball did not go out of control and obediently hovered in the air.

Xia ruofei opened his mouth and sucked in a mouthful of water. Then, he gargled and spat the water out. The water that he had gargled with was bound by his spiritual power and floated to the side.

Then, Xia ruofei squeezed some toothpaste onto a normal toothbrush and started brushing his teeth.

During the process of brushing his teeth, some foam would inevitably fly out, but he used his mental power to restrain it so that not a trace of it would dissipate.

The process of him brushing his teeth was basically the same as when he was on the ground. The only difference was that after brushing his teeth, there was an extra ball of wastewater.

Xia ruofei kept the unused spirit pool water back into the spirit map space. Then, he took out a sealed bag and locked the wastewater in it before throwing it into the spirit map space.

Cultivators like them had a great advantage over ordinary people when they used spaceships, and that was that almost no garbage would be produced inside the spaceships. The garbage produced could be directly sealed and stored in storage magical treasures.

Since it wouldn’t produce garbage, there was naturally no need for a device to deal with garbage and waste, and there was no need to calculate the load of the garbage, which reduced the burden on the spacecraft a lot.

After brushing his teeth, Xia ruofei started to wash his face.

Washing his face was even easier. He directly used his spiritual power to control it, draw water in the spirit map space, wring a towel, and then take out the towel to wash his face.

Similarly, the small amount of water droplets that escaped could be directly bound with spiritual power and stored back into the spirit map space.

Xia ruofei washed up quickly and pulled on some of the handheld devices in the spaceship, floating back to the cockpit.

He was getting more and more familiar with moving in zero gravity.

“You should go wash your face too!” Xia ruofei smiled and said, “I’ll just watch over here!”

Ling Qingxue nodded and got up to stretch. She then left the cockpit and went to the “women’s bathroom” at the back to wash up.

When Ling Qingxue returned, Xia ruofei took out some food from the spirit map space.

After all, they were in space, so they naturally couldn’t cook and fry like they did on the ground. It was relatively simple for everyone to eat.

Xia ruofei and Ling Qingxue chose a simple sandwich and milk for breakfast.

Even though the spacecraft had reduced a lot of equipment, the microwave was still there. Xia ruofei heated the sandwich in the microwave and then ate breakfast with Ling Qingxue.

The milk was also normal milk in a box. It was impossible to suck it directly in zero gravity because there was no atmospheric pressure outside. However, they still used a straw, but they used their mental power to push the milk into the straw.

It was inevitable that some food residue would be produced while eating the sandwich. However, with Xia ruofei around, Ling Qingxue did not have to worry so much. She could just eat heartily. Xia ruofei would naturally use his spiritual power to collect all the food residue and put them into a sealed bag.

After breakfast, the two of them even “extravagantly” brushed their teeth again.

...

They then stayed in the cockpit for another two hours before Willow brought Yu xiner to the cockpit. They would be in charge of the cockpit for the rest of the day.

Chapter 3268 A long voyage (1)

Over the next ten days or so, the black Phoenix flying ship maintained a constant speed as it flew toward the higher Earth – Moon orbit.

Maintaining such high – speed flight for over ten days in a row was also quite a large consumption of origin crystals.

However, before they set off, Chen Nanfeng and the rest had gathered fifty origin crystals and handed them to Xia ruofei. With the increasing shortage of cultivation resources, it was not easy for even a top sect to take out fifty origin crystals.

Xia ruofei had stored these crystals in the black Phoenix flying ship in advance. During the flight for more than ten days, whenever a crystal was exhausted, he would use his spiritual power to remotely control the object and replace it with a new crystal to ensure that the Flying Ship would have a continuous supply of power.

Within the Dragon Ship, the nine members of the exploration team lived a very regular life.

They took turns keeping watch in the cockpit, while the others cultivated and rested in different cabins.

As the flight distance increased, the number of times they went to the porthole to watch the scenery also gradually increased.

Two to three days after leaving the 400 – kilometer orbit, everyone could see the entire earth through the porthole.

The Blue Planet hanging in the pure black sky gave a very strong visual impact.

Moreover, as the earth became smaller and smaller in their field of vision, everyone also had a deep feeling of being far away from home. Even though they were all cultivators, and they were going to the moon as a group of nine, in the lonely space, seeing the blue Earth hanging there all by itself, everyone couldn't help but feel a sense of loneliness in their hearts. This wasn't the loneliness of their physical bodies, but the loneliness of humans in the vast universe when they looked back at Earth from space.

After more than ten days of flight, everyone was already very used to life in the spaceship.

Cultivators had much better physical fitness than ordinary people, and with the help of mental power, the discomfort in the weightless state only lasted for a short time. Now, each of them could walk through the cabins with ease. They were also very flexible in the process of floating around, unlike when they had first entered the spaceship, where they bumped into things from time to time.

At this moment, the black Phoenix flying ship had already flown about 250000 kilometers with the Dragon Ship.

In fact, their position had already passed the earth – Moon transfer orbit point and was closer to the moon.

Today, everyone will follow the plan and move to the black Phoenix flying ship to complete the final part of the journey.

This was because after reaching the moon, there would definitely be some deceleration, orbital change, and other operations. The Dragon Ship itself did not have any power. Over the past ten days, the black Phoenix flying ship had been dragging the Dragon ship's mass forward at a constant speed.

If the black Phoenix flying ship were to slow down during this process, there would be no such thing as air friction in an environment that was infinitely close to a vacuum. Hence, the Dragon ship's mass would still maintain its original speed, and there would only be one result – a 'rear – end'.

As such, when the black Phoenix flying ship neared the moon and needed to carry out some relatively complicated operations, it would be time to store the Dragon God ship's body away.

If not, it would not matter if the black Phoenix flying ship was hit or knocked. However, the Dragon ship's bulk would not be able to withstand such a collision. As long as the outer shell cracked, the airtight seal of the cabin would not be guaranteed. Then, during the return journey, everyone would have to wear an EVA suit for the entire journey.

How torturous would it be to be cooped up in a cumbersome spacesuit for ten to twenty days!

Besides, Xia ruofei and the rest had also considered that once they got close to the moon, the unknown dangers might increase. If they encountered any danger during the subsequent voyage, they would not be able to react in time since they were in the Dragon spaceship Mass. Not only was it cumbersome to

put on a spacesuit, but they also had to wait for the pressure to be released when they left the cabin. After a series of standard procedures, it would be too late.

Hence, everyone felt that they should gather on the black Phoenix flying ship at the end of the voyage. This way, they would be able to deal with any possible danger as quickly as possible.

As for the Dragon ship's mass, it was a warm nest for everyone on their return journey, so it naturally had to be properly preserved.

After passing the earth – Moon transfer orbit point, the black Phoenix flying ship continued to fly at a constant speed towards the moon. Meanwhile, Xia ruofei and the rest had already begun their preparations to return to the black Phoenix flying ship.

Everyone cleaned up the interior of the spaceship, then began to follow the procedure and prepare to leave.

The first four to return were mu Hua, mu Jianfei, Shen tianfang, and Xu yurou.

They put on their spacesuits and checked the oxygen levels before closing the hatch. Xia ruofei, who was in the cockpit, pressed the button to release the pressure.

Soon, the orbit module was in a vacuum.

Mu Hua and the other three opened the cabin door and once again entered the vast universe. They followed the rope and floated back to the black Phoenix flying ship.

Then, Xia ruofei used his mind power to close the exit of the module and check the seal. At the same time, he released a high – pressure bottle to increase the cabin's pressure.

After the cabin pressure was at the same level, Xia ruofei brought Ling Qingxue, Chen Xuan, Willow, and Yu Xin 'er to the orbit module.

He still had to put on the spacesuit, check the spacesuit's performance and oxygen content, lock the hatch, and relieve the pressure.

Finally, Xia ruofei and the rest left the Dragon Ship.

Chapter 3269 A long voyage (2)

Xia ruofei was the last one to leave.

He held onto the railing and used his power of the will to close the hatch.

Immediately after, he extended his power of the will to the cockpit and pressed a button to perform an airtight seal on the orbital module. He then began to apply pressure.

After that, Xia ruofei cut off the main power supply of the spaceship. The control computer was shut down and all the lights were turned off.

Xia ruofei still did not put away the solar panel.

He followed the leashed rope and pulled slightly, floating towards the black Phoenix flying ship.

In fact, throughout the entire process, the black Phoenix flying ship and the Dragon Ship were still heading towards the moon at an extremely high speed.

However, the speed of the two was exactly the same, so they were relatively still.

As such, when Xia ruofei returned to the deck of the black Phoenix flying ship and released the hooks of the five leashes, there was no change in the distance between the two.

After Xia ruofei released the traction rope, he directly moved the Dragon Ship into the spirit map space.

Now, only the black Phoenix flying ship was left alone in space.

They didn't return to their cabins; instead, they came to the front deck of the airboat.

Xia ruofei kept the Dragon Ship and returned to the front deck.

Xia ruofei said in the communication channel, ""Fellow Daoists, everyone has to be alert! If nothing unexpected happens, we should be able to reach our destination soon!"

Chen Xuan grabbed onto the side of the black Phoenix flying ship to control his own body. Raising his head to look at the moon, he sighed. ""This is the first time in my life that I've seen the moon from such a close distance!"

Everyone couldn't help but laugh when they heard that.

Indeed, everyone had the experience of looking up at the stars when they were young, and they would certainly have all kinds of fantasies. However, none of them would have thought that they would one day come to observe the moon at such a close distance.

Other than the Apollo program's astronauts, they were the only ones who had personally observed the moon from this position.

Of course, this conclusion might not be accurate. Because, according to the magical illusion that the music had brought everyone into, if there was such a paradise – like place on the moon, then at least someone from the cultivation world must have been here before. Otherwise, who would have left behind that Mystic realm?

Xia ruofei looked back at the lonely blue Earth and added, ""This is also the furthest we've been from home ..."

Everyone felt the same way, and they all nodded somewhat awkwardly.

The scene in space was indeed spectacular. No one was willing to return to the cabin, including Xia ruofei, who stayed on the front deck. This place was definitely an Invincible Universe observation deck.

He used his mind power to control the black Phoenix flying ship while he remained on the deck.

In fact, this method didn't consume a lot of spiritual power, and the benefits were obvious. The view was secondary, but the view was excellent. If they stayed on the deck, they would be able to find out immediately if there was any danger. It was also more convenient for them to find the place they had seen when they were listening to music.

There was still about 50000 kilometers to go. The black Phoenix flying ship slowed down slightly and drew a large arc in the air. As it flew toward the moon, it began to enter the moon's orbit.

The next flight took about two days.

For the past two days, everyone had been cooped up in their spacesuits, so naturally, it was not as comfortable as staying in the Dragon Ship.

The oxygen supply module would run out of oxygen every six hours or so, and everyone would have to replace it.

In addition, eating, drinking, and pooping were also problems. Fortunately, cultivators were not like ordinary people, who had to eat every few hours. During this time, everyone tried to eat as little as possible.

The process of eating was also very strange. Everyone took out the food from their respective storage artifacts, and then the food would appear directly under the spacesuits' masks. Naturally, they didn't use their hands, so the whole eating process was controlled by their mental power. If an ordinary person saw this scene, they would be shocked.

As for the "three emergencies" problem, eating less would naturally mean excreting less, but it was inevitable. After all, cultivators were not mayflies that could only take in but not out. At this time, the adult diapers that he had prepared on earth came in handy.

After two days of flight, the black Phoenix flying ship was already very close to the moon's surface.

Although the moon was much smaller than the earth, that was relative. When they reached the moon, Xia ruofei and the others still saw a huge celestial body. The craters on the moon's surface were much larger than they had imagined.

When everyone looked back at the earth, they realized that the earth they were looking at now was almost ten times bigger than the moon they saw from earth. Moreover, the earth from this angle was also much brighter than the moon they saw from earth.

In reality, the nine members of the exploration team had all experienced the wondrous illusion produced by the music. The scene of the illusion started from the earth flying to the moon, but the speed was much faster than when they were on the black Phoenix flying ship. Therefore, the nine of them had a rough idea of the location of the place in the illusion.

Xia ruofei controlled the black Phoenix flying ship and descended along the moon's orbit. When the Flying Ship reached the dark side of the moon, it began to accelerate and descend until it was about 300 kilometers away from the moon's surface. Then, everyone began to search for the landing spot in the illusion.

A cultivator's memory was quite amazing, not to mention that the experience of the musical illusion was imprinted in everyone's mind. So, when they approached the moon, they quickly found a familiar ground landmark, a huge crater.

Like everyone else, Xia ruofei was overjoyed when he saw the crater. At the same time, he did not hesitate to control the flying boat to descend quickly towards the crater.

At this moment, everyone was completely sure that the scene in the illusion was real.

Everyone was even more confident that they would be able to find the secret realm that was shown in the song.

The black Phoenix flying ship's altitude continued to drop. In the end, it was only about a thousand meters away from the moon's surface. This was considered a low – altitude flight on earth.

As Xia ruofei maneuvered the black Phoenix flying ship across the moon's surface at high speed, Chen Xuan and the rest were also observing the situation below.

In the illusion of the music, they had cut into the moon from this huge crater, then flew at a low altitude and high speed for a long distance, almost crossing half of the moon, before coming to a Valley behind the crater, and then the portal appeared.

The black Phoenix flying ship was fast, but Xia ruofei's control was extremely precise. He was practically reenacting the musical illusion that everyone had experienced.

The environment below was almost exactly the same as in the illusion.

As Xia ruofei controlled the flying boat, he sighed with emotion. The rising Dragon Order could be traced back to at least 3000 years ago. Although it would be reassembled every few decades, he didn't know if the illusion would be the same as this one. However, nothing had changed in the illusion even after thousands of years. This could only be possible on the moon because the environment here was dead silent and there would be no human overdevelopment. Unless a meteorite hit the moon's surface again, it would not change.

Xia ruofei controlled the black Phoenix flying ship and flew along the route in his memory for about five hours. However, it was only a short time in the illusion. The black Phoenix flying ship was still too slow. Finally, the nine of them cheered in the communication channel.

They saw a familiar ring – shaped mountain, which meant that if there were no accidents, they would reach the end of their journey by turning to the valley at the back.

Chapter 3270 Finally reaching the target (1)

Although everyone had experienced the process of traveling from earth to the back of the crater in the illusion, it was a completely different feeling to experience it in person, and it was a lonely voyage that lasted more than ten days.

Even though they were all cultivators, the lonely journey in space still brought them a lot of psychological pressure.

Now that their destination was close at hand, everyone felt a sense of relief.

Of course, Xia ruofei and the others did not relax completely. On the contrary, they were even more vigilant. Up until now, everything they had experienced in the illusion had been confirmed on the moon. If the portal really appeared at the final destination, it meant that this must be a secret realm set up by the cultivators. In that case, it was very likely that there would be various unknown dangers and tests waiting for them.

Hence, the five golden core stage cultivators, including Xia ruofei and Chen Xuan, expanded the range of their spiritual senses and raised the alert Level to the highest.

As for Ling Qingxue, Yu Xin 'er, mu Jianfei, and Xu yurou, the four Qi refining stage cultivators, they did not release their spiritual power. Their spiritual power was not strong to begin with, and it would be too exhausting to keep their spiritual power on alert all the time. Moreover, their spiritual power could only sense a small area. If there was any danger, Xia ruofei and the others would have sensed it long ago. Thus, they did not have to waste their energy.

Xia ruofei controlled the black Phoenix flying ship to lower its altitude. It flew at a low altitude of about one to two hundred meters above the moon's surface and adjusted its flight attitude as the moon's altitude rose and fell.

The black – armored flying ship flew at high speed along the periphery of the huge crater. When Xia ruofei discovered a small crater, he immediately steered the black – armored flying ship to approach it. At the same time, he kept increasing his flying altitude. This small crater was an obvious landmark when they were in the illusion. In the illusion, they had climbed from this crater to the top of the crater and then to the valley at the back.

Xia ruofei controlled the black Phoenix flying ship and flew over the small crater. The black Phoenix flying ship flew close to the mountain ridge and soon reached the top.

Everyone's eyes suddenly brightened up. What appeared in front of them was a huge crater with a diameter of at least ten kilometers, and it looked unfathomably deep.

One could imagine how violent the impact of the meteorites that formed this crater was.

The black – armored flying ship soared into the sky, then quickly descended into the valley behind the ring – shaped mountain.

As the moon's surface was in a vacuum, there was not the slightest sound of wind despite the black Phoenix flying ship's extreme speed. Other than the faint static from the communication channel, everyone could only hear dead silence.

It was currently night on the dark side of the moon. The crater formed by the huge crater was pitch – Black, like the gaping mouth of a bloodthirsty monster. In the dead silence, it gave people an inexplicable pressure.

Xia ruofei and the others were still calm. At the same time, the Golden core cultivators expanded their spiritual power to the limit and maintained a high level of vigilance.

As for Ling Qingxue and the other four Qi condensation cultivators, they were also standing on the deck, helping to verify the coordinates. If the black Phoenix flying ship's flight path deviated, they would be able to warn them in time.

However, under Xia ruofei's control, the black Phoenix flying ship's flight path was extremely precise. It was almost completely following the flight path that everyone had experienced in the illusionary realm.

Of course, this was also thanks to the magical music. As long as one experienced a musical illusion once, everything would be deeply engraved in their mind. Every detail was clear and impossible to forget.

The black Phoenix flying ship flew for about 15 minutes inside the huge crater. Everyone's eyes looked at a spot about 50 meters ahead in unison. Xia ruofei had already made his preparations and slowed down the speed of the black Phoenix flying ship.

There was a moment of silence on the communication channel. Then, Xia ruofei's voice came through everyone's headphones. "We're here!"

"It's not easy!" "Fellow Daoists," Chen Xuan said, "everyone, get ready to go down!"

At this point, the black Phoenix flying ship was basically hovering in the air. Xia ruofei controlled the Flying Ship to descend slowly until it was about two meters above the ground. Then, the black Phoenix flying ship finally stopped moving.

Xia ruofei looked around and said, ""Let's prepare to disembark! Everyone, please check your spacesuits again!"

The nine of them immediately checked their spacesuits in an orderly manner, and at the same time, they tested the flow of communication.

After confirming that everything was normal, Xia ruofei said, ""Now, everyone, change all the oxygen supply modules in your spacesuits to new ones. No matter how many you use, replace them now."

He had taken into account that the situation down there was still unknown. He didn't know what he would face if he went down. If it was too dangerous, he might not even have time to change the oxygen supply module. If he changed to a new module now, he could at least last a little longer.

Everyone did as they were told and changed the oxygen supply module.

In terms of experience, Xia ruofei was definitely not as experienced as Yang Liu and Shen tianfang, especially when Shen tianfang was an intermediate golden core cultivator. However, Xia ruofei had made a huge contribution to the expedition this time. If he had not taken out the black Phoenix flying ship, everyone would have been stuck on earth, staring at the moon. It would have been impossible for them to cross the harsh space environment and fly more than 300000 kilometers to reach this place. Besides, during the flight, Xia ruofei also showed strong leadership skills and was very careful. Therefore, everyone started to regard Xia ruofei as the center.
