Chapter 3271 Finally reaching the target (2)

Although the exploration team did not have a clear leader, Xia ruofei was undoubtedly the leader now.

After everyone had changed their oxygen supply modules, Xia ruofei said, "Let's start landing on the moon! Brother Chen and I will lead the way, while elder Shen, elder yang, and elder mu will bring up the rear. The four Qi condensation cultivators will be in the middle. Does everyone think this arrangement is acceptable?"

"No problem!" Chen Xuan was the first to speak up. "Let's do as brother Xia says!"

Seeing that the young sect leader had agreed, Shen tianfang naturally did not have any objections. Furthermore, he would not be at a disadvantage even if he were to cover the retreat. After all, everything down there was still unknown. Thus, he said very readily, "I agree!"

Since the two golden core cultivators of the first heaven society had no objections, the rest of the people naturally didn't have any objections either. Everyone expressed their agreement to this arrangement.

Hence, Xia ruofei and Chen Xuan exchanged a look. Then, they stepped lightly on the deck at the same time. The two of them flew over the side of the ship and landed on the surface of the moon.

The moon's gravity was only about one – sixth of earth's, and ordinary people could be as light as a swallow on the moon. People who had watched Apollo program – related movies knew that when the Americans landed on the moon, even though they looked clumsy in their bulky spacesuits, they could easily pick out the level of Earth's sports Masters. As a result, the astronauts preferred to jump like kangaroos on the moon's surface.

Ling Qingxue, mu Jianfei, Yu Xin'er, and Xu yurou followed behind Xia ruofei and the others. They jumped out of the black Phoenix flying ship and landed on the surface of the moon.

Shen tianfang and the other two did not waste any time and quickly left the black Phoenix flying ship.

Xia ruofei and Chen Xuan were the first to land.

After the two of them landed on the surface of the moon, they jumped more than a meter high and took another step forward with inertia, leaving two pairs of clear footprints on the moon.

Xia ruofei and Chen Xuan stood still and turned around to wait for the others.

Looking at the footprints he had left, Xia ruofei smiled and said, "I suddenly thought of Benjamin Armstrong's famous quote."

"A small step for me is a big step for humans?" Chen Xuan asked with a smile.

"Yup!" Xia ruofei said, "I'm thinking, if humans were to land on the moon again in the future and come to the crater on the back of the moon, would they be scared to see these footprints ..."

As sound could not be transmitted in a vacuum, everyone was communicating through the radio. Naturally, everyone could hear Xia ruofei and Chen Xuan's conversation clearly.

Elder mu Hua of the surging waves sect, Shen tianfang, and Yang Liu had just jumped off the Flying Ship. They had just landed on the surface of the moon and left behind a pair of footprints.

When mu Hua heard this, he laughed and said, "the dust on the moon is so thick. The footprints will soon disappear!" How can it scare people?"

Xia ruofei chuckled and said, "elder mu, you may not know this." On the moon, footprints would not disappear easily. The first time that Americans landed on the moon was in 1969, which had been decades since then. However, the footprints left by Armstrong still existed to this day, and there were almost no changes. If you're interested, we can go around to the other side of the moon to take a look when we return!"

The moon was much smaller than earth. At its fastest speed, the black Phoenix flying ship could circle the moon once in an hour. Therefore, it was not particularly troublesome to visit the historical footprints. However, everyone was now focused on unraveling the ultimate secret of the rising Dragon Token, so they naturally did not have the mood to visit it.

After Xia ruofei finished speaking, even the elder of the flying flower Valley, Yang Liu, was very interested. She couldn't help but ask, "Why is that? Could it be that the footprints will solidify?"

Yu xiner had a series of education experiences in the secular world. She even had a master's degree, so she naturally knew some common sense questions. When she heard an elder from her own sect ask such a trivial question, she couldn't help but be a little stunned. Before Xia ruofei could reply, she hurriedly explained, "Martial uncle Liu, there is no air or water on the moon, so there will be no wind or rain. The dust on the moon's surface will not be washed away by rain or blown away by wind. As long as no one destroys it, the footprint will never disappear."

Xia ruofei chuckled. "It's not that absolute. The moon will occasionally shake slightly, just like the earthquakes on earth. However, the magnitude of the tremors is very small. It basically won't affect the footprints. In addition, solar wind and cosmic particle flow could also cause wear and tear on the moon's surface, but one millimeter of wear and tear would take tens of millions of years, so it could be ignored. Therefore, unless someone deliberately damaged the footprints, or a meteorite or asteroid happened to hit the location of the footprints, it would naturally be destroyed. Of course, the probability of that happening is too small."

Ling Qingxue couldn't help but roll her eyes at Xia ruofei. "Xin 'er, this guy is just bickering!"

"But there's nothing wrong with it!" Yu xiner laughed. The logic behind it is very strong!"

Xia ruofei laughed and said, "I'm just joking!" Everyone, get your spirits up! The token's Secret is right in front of us, whether or not we can solve it will depend on us!"

"Fellow Daoist Xia, I think the key is still the eight spots of light that we've all seen. They should be the key to solving the secret and opening the door!" Shen tianfang said as he walked forward.

The few people who had landed on the moon that day had all passed the music selection. Everyone had experienced that wonderful illusion and clearly remembered that in this Valley, there were spots of light that lit up one after another. They lit up three times in total, and then a gourd – shaped instrument

made of ceramic appeared. Then, the door appeared. They could even feel the drooling spirit Qi through the door and see the beautiful scenery that was like a paradise.

The most direct way to understand it was naturally the eight light spots in the music illusion. They were demonstrating the way to open the door to the secret realm for everyone, and they were even demonstrated three times in a row.

Xia ruofei nodded. "My suggestion is to use your spiritual power. Follow the order shown in the illusion and stab at the eight spots of light. See if there will be any reaction."

"Agreed!" Mu Hua nodded. Let's stand on the outside and use our spiritual power to control it from a distance. We'll see if it works so that we can avoid danger in time!"

Yang Liu and Chen Xuan also expressed their agreement. With that, the five golden core cultivators were of the same opinion.

"In order to ensure smooth operation, I suggest that it should be done by one person," said Xia ruofei.

For a golden core stage cultivator, it was not a particularly difficult thing to use their mental power to probe the eight positions according to the order of the illusory realm demonstration. At least, the five of them could do it.

Therefore, no one had any objections to Yingluo's smooth completion of the task as a few people working together. Since the ability could be achieved, why would they deliberately increase the difficulty?

"Since no one has any objections, I'll give it a try first?" Xia ruofei said, "if it doesn't work, I'll ask the other fellow Daoists to help!"

Shen tianfang was the intermediate stage golden core cultivator with the highest cultivation in the expedition team. He had planned to do it himself, but Xia ruofei suggested to try it out before he could say anything. This way, Shen tianfang could not reject her, or it would be too offensive.

Shen Tian said with relief, "there's no harm in letting him try first. If he really can't do it, I'll make my move."

As for Chen Xuan and the rest, their cultivation levels were about the same as Xia ruofei's. At least, mu Hua and Yang Liu thought so. Chen Xuan knew that he had been left far behind by Xia ruofei.

Therefore, they naturally did not have any objections.

Hence, Xia ruofei adjusted his breathing and adjusted his condition to the best. Then, he decisively released eight wisps of spiritual power to explore the position of the light spot in the illusion ...

Chapter 3272 The scene reappears (1)

Although Xia ruofei's spiritual power was invisible, it could actually be used. Furthermore, within the range of his spiritual power, the speed was extremely fast.

Of course, mental strength couldn't be used directly to cause a serious physical attack to the enemy. In terms of pure strength, it was very small. It was naturally not a problem to use it to control things and the like. It was also not a big problem to use mental strength to trigger the possible information of traps.

Xia ruofei's spiritual power quickly and accurately touched the position of the first light spot, raising clouds of Moondust.

The moment his spiritual power touched that spot, Xia ruofei immediately felt a trace of abnormality under the 10 – centimeter – thick lunar dust. This spot was obviously different from the other spots. There was a standard round stone slab below. His spiritual power could even feel a trace of spiritual power on this small stone slab.

Xia ruofei didn't think too much about it. He quickly touched the stone slab with his spiritual power.

This was only the position of the first light spot. According to the demonstration in the illusion, although the eight light spots seemed to be connected and lit up, there were subtle differences in their order.

Hence, Xia ruofei controlled the eight wisps of spiritual energy at the same time and probed the eight spots of light.

This was also thanks to his profound spiritual power cultivation, which allowed him to control it to the finest detail.

After the first light spot was touched, the remaining seven spots were touched by Xia ruofei's spiritual power in sequence and time.

The entire set of actions could be said to be done in one go.

Shen tianfang, Chen Xuan, and the others nodded in agreement at Xia ruofei's actions. At the same time, they made a comparison in their hearts. If they were in Xia ruofei's shoes, would they be able to do it so easily? Could it be accurate to the point where it was not the slightest bit off?

In the end, Chen Xuan, Yang Liu, and mu Hua, the three Aurous core stage cultivators, came to a conclusion. Even they themselves could barely do it without error, but they definitely couldn't do it as easily as Xia ruofei did.

Shen Tian made a comparison in his heart and felt that he could only reach Xia ruofei's level at most. After all, he was an intermediate golden core cultivator!

In fact, Shen tianfang's spiritual power cultivation was slightly inferior to Xia ruofei's, but he did not know it.

When Xia ruofei's spiritual power quickly touched the positions of the eight light spots, everyone held their breath and stared intently in front of them, afraid of missing any detail.

However, nothing happened after all eight encounters.

Everyone felt a little startled.

Xia ruofei was the first to react. Without any hesitation, he followed the time difference in the demonstration and immediately started the second attempt.

After he finished, he repeated it for the third time.

In the illusion that everyone had experienced, the eight dots of light had lit up three times in a row. The order and rhythm were exactly the same each time.

Hence, when there was no reaction after the first contact, Xia ruofei made a decision in a split second. He would do it three times as demonstrated in the illusion.

In fact, Xia ruofei was still very confident.

This was because his mind power had already detected that the positions of the eight spots of light were not ordinary lunar soil under the floating dust. Instead, they were all circular stone slabs of the same color.

It was possible for one or two of these standard – shaped objects to be naturally formed, but for eight of them to be exactly the same, and in the exact same position as in the illusion, this was definitely not a coincidence.

Xia ruofei was sure that the eight round stone slabs were man – made.

After all, this was the dark side of the moon, a place where humans from the secular world had yet to set foot in. There were only two possibilities for an artificial object to appear here. One was that it was left behind by aliens. Wasn't there always a rumor that there were mysterious aliens living on the dark side of the moon and that they were constantly monitoring earth? The other possibility was that it was left behind by a cultivator.

Considering that these eight positions completely coincided with the positions of the light spots in the illusion, it could be basically confirmed that these were left behind by the cultivators.

In fact, after Xia ruofei's spiritual energy had circulated three times, the eight positions immediately began to emit a blinding light, just like how it was demonstrated in the illusion.

Beams of light shot into the sky.

There was no air on the moon, so when everyone looked up, all they could see was the Dark Universe.

And these 8 pillars of light, also shot straight up, directly shining into the universe space.

The order in which the light pillars lit up was the same as the order in which Xia ruofei touched them. In other words, the light spots that appeared in the illusionary realm were exactly the same.

Then, a gourd – shaped ceramic instrument slowly rose.

The moment the ceramic instrument appeared, Xia ruofei and the other golden core cultivators couldn't help but look at it. They all shouted in unison, ""Spatial dimension laws!"

That's right, the moment the instrument appeared, the Golden core cultivators felt an obvious fluctuation in the rules of space.

In other words, the ceramic instrument looked like it was rising from a thick layer of lunar dust in the demonstration, but it was actually summoned from a small space. However, after it appeared, it began to rise again, so it looked like it was being lifted up from the lunar dust.

Chapter 3273 The scene reappears (2)

After the gourd – shaped ceramic instrument appeared, it quietly floated about a meter above the moon.

Everyone was staring at the ceramic instrument, hoping to hear the intoxicating music that they had heard in the illusionary demonstration.

It was strange. After everyone experienced that wonderful illusion, everything they experienced in the environment was engraved in their minds. It was extremely profound, not missing any small details. However, they couldn't remember the melody of the music played by the ceramic instrument. They only had a very intuitive feeling that the music was so beautiful that they couldn't help but be intoxicated.

At first, Xia ruofei thought that he was the only one who could recall the exact melody. However, after asking the other eight members of the exploration team, he realized that they were all the same. They could not recall the exact melody.

However, after waiting for about half a minute, the ceramic instrument did not move at all. It just floated there quietly.

"What's the situation?" Chen Xuan couldn't help but Mutter to himself.

"It can't be that they want us to play it, right? We can't remember the melody of the song!" Mu Jianfei asked, "by the way, what instrument is this? I've never seen it before. "

The elder of the soaring Flower Valley, Yang Liu, stared at the ceramic instrument and said, ""It looks like an ancient musical instrument called the Xun ..."

"Elder yang, do you recognize this instrument?" Xia ruofei asked.

Yang Liu nodded slightly and said, "I do have some understanding of Yi. If I'm not wrong, this should be Tao Feng."

"Please introduce us!" Chen Xuan said.

Willow said, "the Xun appeared about 7000 years ago. It is one of the oldest wind instruments in China. Most of them are round or oval. Gourd – shaped ones are really rare ... But did everyone notice that there are six holes on this gourd – shaped ceramic instrument? there are two rows of three holes in each row ..."

Xia ruofei and the others looked closely and realized that it was true.

"This is one of the distinctive features of the Leviathan," Willow continued. Under normal circumstances, if one were to hold it with both hands and play it to the mouth of the pot, the six holes were the sound holes. By closing and opening them, as well as different combinations, they could make different sounds. The principle was similar to playing a flute. The sound produced by the Xun is very beautiful, and at the same time, it has a unique ethereal texture. "

"I've really gained some knowledge!" Xia ruofei smiled and continued to ask, "so, elder Yang can play this ancient instrument?"

Yu Xin 'er smiled and said,"martial uncle Yang's musical Foundation is the strongest in our flying flower Valley. I've never seen a musical instrument that can stop her!"

Willow smiled bitterly."It's no problem to play a simple instrument. The principles of the instruments are similar, but ... Even if I barely know how to play it, we can't remember the melody of the song. It's useless!"

"That's a problem ..." Xia ruofei could not help but frown. At the same time, he tried to recall the illusion he had experienced. However, no matter how hard he tried, he could not remember anything about the song. It was as if he was looking at flowers in the fog. He could not remember any specific melody.

Shen tianfang, Chen Xuan, and the rest were also trying to recall their experience in the illusion. However, just like Xia ruofei, they could not recall anything from their expressions.

At that moment, Ling Qingxue's eyes lit up and she said,""Elder yang, do you think it's the song that brought us into the illusion?"

Ling Qingxue's words seemed to have opened up a door, making everyone feel as if they had suddenly been enlightened.

"That's quite a possibility!"Chen Xuan exclaimed excitedly. In any case, this is the first time I've heard such a magical song in my life. If I were to ask what song this ceramic instrument is most likely to play, I think it might really be that song!"

Xia ruofei calmly analyzed,"let's analyze it together!" If it's that song, why didn't we remember this part of the illusion demonstration? Do you think it's because we're already in the illusion constructed by the song, and we can't hear the melody clearly in the illusion? we can't even hear a single syllable!"

Shen tianfang opened his eyes and said,""You don't know the true face of Mount Lu and are only fated to be on this mountain?"

"This is what I meant!" Xia ruofei said,"what do you guys think?"

"Interesting ..." Shen tianfang smiled."No matter how likely it is, I think we should ask elder yang to give it a try first. What if we're right?"

Everyone turned to look at the Willow. Xia ruofei laughed and said,""Elder yang, you're the most proficient in musical instruments here, no one else can! It seems that I can only trouble you! By the way, you probably haven't forgotten that song, have you?"

"I do remember the tune," said Willow with a smile. "It shouldn't be a problem for me to play it with a Xun." If I was on earth, I would just practice a few more times, but now ... How can I brag?"

Everyone was wearing a bloated spacesuit. In fact, the spacesuit was like a miniature survival cabin. Everyone was completely isolated from the outside world.

The head was a transparent cover that didn't affect one's vision at all. The inside of the spacesuit was normal atmospheric pressure, and oxygen was constantly being absorbed from the oxygen module, so the environment inside the spacesuit was basically the same as earth. Of course, everyone was on the moon, and the gravity they felt was only about one – sixth of earth 's.

Then, here came the problem.

How could he play this instrument when he was wrapped up so tightly?

Willow thought for a while and said, "how about ... I take off my helmet?" I should be able to hold on for a while in such an environment ..."

Xia ruofei smiled bitterly, "you can't blow this Vulture even if you're directly exposed to the vacuum!" There isn't even air here, and sound can't travel!"

Yang Liu was stunned for a moment and said, "I really didn't think of this ... Then what should we do?"

Xia ruofei thought for a while and said, "it's obvious now. It doesn't matter if we're right or not. At least we have to make this thing sound ... But it can't be done in a vacuum, so ... Why don't we try to put it into the storage space and then take it out directly into the mask? then we just need to control the holes with our spiritual power and we should be able to play it."

Yang Liu hesitated for a moment and said, "directly put it into the storage magic treasure?" It's very likely that this was left behind by a powerful cultivator ..."

"We can only try this now ..." Shen tianfang supported Xia ruofei's opinion.

Following which, Chen Xuan and mu Hua also expressed their approval.

As for the opinions of the Qi condensation cultivators, they weren't important ...

Hence, Yang Liu decided to take everyone's advice. She took a deep breath and used her mental power to probe Tao Feng. Then, she had an idea ...

At this time, everyone was on guard, afraid of any unexpected danger, especially Willow, who was more careful.

However, Tao Feng disappeared into thin air without any accidents.

Immediately after, Willow revealed a look of surprise and said, "It's really in! I'll try to release it into my mask ..."

Then, everyone saw Tao Feng appear behind the transparent mask of the Willow.

The spacesuits' interior was quite spacious, and since Tao Feng wasn't that big, the space inside the spacesuits could easily accommodate it.

Willow first used her mind power to support Tao Feng, then said, "I'll try to play that song ..."

After she finished speaking, she held Tao Feng's breath in her mouth and used six wisps of mental power to seal the six vocal holes. Then, she began to test the sound.

Chapter 3274 The secret realm finally appears (1)

In fact, Willow's current appearance was a little funny. She was just holding Tao Feng in her mouth and blowing hard with her mouth. However, Xia ruofei and the others were all focused on the Willow and listening to their earphones. They did not think about anything else.

Yang Liu tried to blow a few notes, then temporarily spat Tao Feng out and used her spiritual power to hold him up. She then said, "It should be no problem! This is a six – hole Tao Feng. I've played an eight – hole Tao Feng before, and the principle is similar. "

Xia ruofei and the rest were overjoyed. They were worried that Tao Feng could not blow the flute! Moreover, whether this thing was a musical instrument like the Xun was only Willow's analysis. No one was sure.

Now, all his worries were gone.

"Elder yang, then I'll have to trouble you to try to play that piece of music!" Xia ruofei said.

The Willow nodded slightly and took Tao Feng's vocal cords in its mouth again. After a moment of silence, it began to try to play the instrument.

Xia ruofei and the others were selected through that song. They had a deep impression of this song, so everyone could tell that Willow was a little choppy at the beginning. Some of the notes were not standard, and sometimes, because she was not familiar with it, she would stammer.

But no matter what, he could still hear the familiar melody.

After Willow tried it once, her proficiency improved significantly when she played it a second time.

Cultivators had strong mental power, so it was very easy for them to get familiar with such technical items.

Xia ruofei and the others held their breaths as they watched the Willow play the song.

In fact, everyone was not confident. It was not that they did not have confidence in Willow. With Willow's ability, she would definitely be able to perform the song almost perfectly soon. What everyone was worried about was whether this song was the song that Tao Feng had played in the illusion.

Besides, Xia ruofei and the others had another concern. The moon was a vacuum, and sound could not travel. The Willow was playing inside the spacesuit's helmet, and everyone could only hear it through the radio. Since sound couldn't travel, even if the song was chosen correctly, and Willow's performance was fine, it might not be effective at all!

Therefore, everyone was actually a little worried about the gains and losses as they watched Willow try again and again.

Before he knew it, Willow had already played the instrument seven or eight times. It could be said that she was more skilled with each play, but there were still some flaws in each performance.

By the ninth time, everyone was still listening attentively. Willow soon finished the last note, and even she didn't realize that her performance was quite perfect ...

At this moment, the eight dots of light suddenly changed.

Originally, the light produced by these eight points was straight to the sky, but after the Willow played the song perfectly, the eight rays of light suddenly began to slowly shift, from perpendicular to the ground to slowly form an inward angle.

This way, the eight rays of light naturally began to converge above.

As the angle increased, the intersection point also began to slowly move downward. It only stopped moving when it was about three meters above the moon.

Xia ruofei and the rest stared at the scene in front of them with wide eyes. Willow was even more stunned. She did not even realize that Tao Feng was still in her mouth. Even when Tao Feng fell out of her mouth and into her mask, she did not realize it.

When the eight rays of light stopped moving, the circle of light at the intersection point began to gradually expand downward and to both sides. In a short while, it formed a light curtain that was three meters tall and two meters wide.

When Xia ruofei saw this, the only guess in his heart was denied. Before this, he had been wondering if there was another possibility, that the rising Dragon Token was actually left behind by an alien civilization.

This was because the encryption method of the floating point patterns on the rising Dragon Order and the music score that they had finally cracked with the help of a supercomputer did not look like the work of a cultivator. Instead, it looked like it had been created by an advanced technological civilization.

In addition, the location was on the moon, so people couldn't help but speculate in this direction.

However, when the screen finally appeared, Xia ruofei felt that the possibility of it being a technological civilization was extremely small.

That was because when the light screen appeared, Xia ruofei could feel the obvious energy fluctuation. This energy fluctuation was not ordinary energy. It had the obvious characteristics of the cultivation world and was dense with spiritual Qi.

In the process of the light screen appearing, everyone could feel traces of spiritual energy dissipating.

Obviously, this was not something that could be done by any technology.

If this was really left behind by an alien civilization, it should be a masterpiece of an alien cultivation civilization.

Very soon, that light screen gradually stabilized.

Just like what they had experienced in the illusionary realm, the light screen was like a door, and everyone could feel the abundant spiritual energy inside this door. And after the light screen stabilized, everyone could even faintly see the Fairyland – like scene inside the door.

Everyone's breathing became heavy, and their eyes shone.

Wasn't all the preparation work done in the early stages and the arduous journey in space for more than ten days all for this moment?

Chapter 3275 The secret realm finally appears (2)

The ultimate secret of the rising Dragon Order, everything he had experienced in the illusionary realm, had finally come to the final scene.

At that time, the illusionary realm that everyone had experienced had their consciousness rapidly sucked back to Earth after this light screen had appeared. Then, the entire illusionary realm experience had ended.

And now, they had finally seen the formation of this light screen in reality.

In fact, even though the journey was tiring, it was very smooth overall. It was so smooth that Xia ruofei and the others could not believe it.

They didn't encounter any danger, nor did they encounter any major difficulties. Just like that, they steadily made it to the final step.

In the beginning, everyone had made sufficient preparations for the difficulties, but they did not expect that none of them would be used.

Seeing that the light curtain had already stabilized, the next step was naturally to enter the portal. Otherwise, everyone had worked so hard to come here just for sightseeing?

Moreover, no one knew how long the door would be open, so they naturally had to enter as soon as possible.

At this moment, Willow also came back to her senses. She put Tao Feng away in her storage magic treasure.

Even though everyone did not know if this Tao Feng would still be of use, Yang Liu had done a great job this time. She had kept Tao Feng away, and no one said anything. In any case, someone had to keep him. They couldn't just leave Tao Feng here again, right?

Then, everyone came to the light screen.

"Fellow Daoists, I think we must enter in batches," Xia ruofei said. "Let's quickly discuss the order!"

Chen Xuan nodded and said, "that's right!" We don't know how long this gate will be open. It'll be troublesome if we delay for too long and the gate closes again. "

No one knew if the door would open again after it was closed, so everyone nodded in agreement.

At this moment, the only mid – Stage golden core cultivator in the exploration team, Shen tianfang, cleared his throat and said, ""I'll tell you first! We can discuss the order of these people again. Elder Willow, I hope you can take the rear. "

Yang Liu immediately realized Shen tianfang's intention. She smiled and said, ""No problem, I'll be the last one! This way, if anything happens to the door, I might be able to use Tao Feng's music to stabilize it!"

"I think so too." Shen tianfang smiled and nodded. In addition, my cultivation is the highest among us, and I have more experience than all of you. Why don't you let me go first? I'll go in first to explore. If there's any danger inside and I can still go back, I'll come back to warn everyone!"

Shen tianfang's suggestion was reasonable, and everyone nodded in agreement.

Even though the first one to enter might have the highest chance of obtaining an opportunity, it was also the most dangerous. As an intermediate golden core cultivator, Shen tianfang took the initiative to ask to be the first one to explore the way, and no one had any reason to refuse.

Next was the order of the others. Because of time constraints, no one was particularly conflicted about who was first.

After a short discussion, the order to enter the door was decided. Except for Shen tianfang, everyone would be in pairs.

Shen tianfang was the first to enter, followed by mu Hua and mu Jianfei. The third was Chen Xuan and Xu yurou, the fourth was Xia ruofei and Ling Qingxue, and the last was Yang Liu and Yu xiner.

There were two minutes between each group.

Shen tianfang cautiously released his flying sword and used his spiritual power to control the sharp flying sword to circle around him. He then took a deep breath and said with a smile, "Fellow Daoists, I'll go in first!"

"Elder Chen, take care!" Chen Xuan called out with a grave expression.

Shen tianfang cupped his hands at Chen Xuan and said, "Thank you, young sect master!"

After that, Shen tianfang cupped his hands at everyone again, then turned around and strode into the light curtain Door.

Shen tianfang's vital Qi was exposed, and his flying sword was circling around him. He was ready to deal with any danger.

Xia ruofei and the others also looked at Shen tianfang nervously.

In the blink of an eye, Shen tianfang had already walked to the light screen without any danger. After Shen tianfang stood still, he took another deep breath and maintained a high state of vigilance. He first reached out his right hand to the door formed by the light curtain.

Xia ruofei and the others did not even dare to breathe as they looked at Shen tianfang without blinking.

No one, including Shen tianfang, knew how to enter the door. They also did not know what kind of danger they would face when they passed through the door. This was because the illusion that everyone experienced did not involve these things. After the door was opened, the illusion ended very quickly.

However, even Shen tianfang did not expect that his right hand would pass through the light curtain without any resistance.

Shen tianfang had been prepared to use force to break the spell, but he did not expect that there was no need to do so.

What was even stranger was that after his palm reached into the light curtain Door, he could not sense his own palm at all. It was clearly a part of his body, but it seemed to be missing. Furthermore, he could not sense the existence of his palm with his mind power at all.

Shen tianfang was shocked. He subconsciously retracted his hand.

He turned it over and looked at it for a while. His palm was intact, and he was secretly relieved.

Since the door did not have any resistance, Shen tianfang had nothing to worry about. Even though he still did not know what would happen after he entered, he had already come this far. There was no reason to retreat.

Furthermore, Shen tianfang had already reached a bottleneck in his cultivation. If he did not have any good opportunities, it would be extremely difficult for him to break through to the late – Stage of the Golden elixir realm. The secret realm in front of him was not simple at all. There might be a super great opportunity inside. For Shen tianfang, it might be an opportunity to break through to the late – Stage of the Golden elixir realm. Even if he knew that there might be fatal dangers inside, he would not retreat.

Shen Tian calmed himself down and did not probe any further. Instead, he filled his body with Yuan Qi and walked into the light screen.

Xia ruofei watched Shen tianfang's movements intently. At the same time, a wisp of spiritual power was also locked on Shen tianfang.

Shen tianfang stepped into the light curtain Door and disappeared.

Xia ruofei's spiritual energy was blocked outside the door. The moment Shen tianfang entered the door, he could only vaguely sense the dense spiritual Qi and nothing else.

Besides Xia ruofei, mu Hua, Yang Liu, and Chen Xuan also released their spiritual power.

However, everyone was the same as Xia ruofei. They did not find anything.

Moreover, after Shen tianfang entered the door, everyone tried to use their mind power to check it out. However, they realized that although the light curtain did not block Shen tianfang, their mind power could not penetrate it at all. It was as if they had encountered an impenetrable iron wall.

Soon, Xia ruofei and the others gave up trying and stood still.

According to the previous agreement, the second group to enter the portal would be mu Hua and mu Jianfei, and they would enter in two minutes.

The reason why they waited for two minutes was that they hoped that Shen tianfang would be able to Scout the way for them. If there was any danger, they also hoped that Shen tianfang would come back to warn them.

Just now, Shen tianfang had also said that if everything was safe inside, he would come back in time to inform everyone so that everyone could enter together.

Of course, if Shen tianfang was instantly killed after entering, or if there was no way back, then everyone's waiting would be meaningless.

However, the situation inside was completely unknown, so this arrangement was also a relatively cautious approach.

Time passed by, and everyone was very quiet. No one spoke, and everyone stared at the light screen door, hoping to see Shen tianfang again.

...

Chapter 3276 Caught off guard (1)

Two minutes passed by quickly, and the light screen door was still standing there quietly. Shen tianfang did not appear again.

While they were waiting, everyone's communication channel was silent. Obviously, after Shen tianfang entered the light screen portal, his communication with everyone was cut off.

This was expected. Everyone was a cultivator and they knew that although the entrance to the mystic realm appeared on the moon, it was possible that the mystic realm was not on the moon at all. Instead, it was located in a folded space. No matter how far the effective distance of radio communication was, it was impossible to transmit radio waves across space.

Everyone's spacesuits came with multi – function wristwatches. Mu Hua raised his hand and looked at the countdown on his wristwatch. He secretly sighed and said, "Time's Up, we can't delay any longer! Jianfei, let's go in too!"

"Alright!" Mu Jianfei answered without hesitation.

No one knew how long the light screen would last. So, since the agreed time of two minutes was up, mu Hua and mu Jianfei could not wait any longer even if Shen tianfang did not return.

Mu Hua and mu Jianfei stood in front of the light curtain Door. Mu Hua turned around and smiled faintly, "Fellow cultivators, we, uncle and nephew, will also take our leave first. If possible, I will come back to report the news in two minutes!"

"Elder mu, brother Jianfei, take care!" Xia ruofei said seriously.

There were too many possibilities. He might have been caught in danger and couldn't get out in two minutes, or he might have been killed as soon as he entered. It was also possible that the light curtain Door was a one – way passage, and there was no way to come back after entering. There were many other possibilities.

But no matter which possibility it was, it meant danger. Mu Hua and mu Jianfei were the second group to enter, so they naturally took a great risk, especially mu Jianfei, who was only a Qi refining cultivator, and his cultivation was too low.

Xia ruofei had a good relationship with mu Jianfei, so he was worried for him.

Mu Hua and mu Jianfei didn't say anything more. They just smiled and waved at everyone, and then stepped into the light curtain Door without hesitation.

Xia ruofei and the others watched as mu Hua and mu Jianfei disappeared into the light curtain. The light curtain only shook a few times and quickly returned to normal. This time, Xia ruofei and the others tried to use their spiritual power to probe but as expected, they found nothing.

After mu Hua and mu Jianfei entered the door, there were only six people left outside. They were Xia ruofei and Ling Qingxue, Chen Xuan and Xu yurou, Yang Liu and Yu xiner.

In fact, this group was divided according to the sect. Other than Shen tianfang, who was in the intermediate stage of the Golden core realm, who was the first to enter the Mystic realm alone, the other eight people were all in pairs from the same sect. The other group was Xia ruofei and Ling Qingxue, the pair of cultivation partners. They were also a combination of one golden core realm cultivator and one Qi refinement realm cultivator.

This way, everyone would be more at ease when grouping, and they could also take care of each other.

Xia ruofei and the other five stood quietly outside, staring at the light screen door. After mu Hua and mu Jianfei entered the portal, Chen Xuan calmly turned on the timer on his watch, telling them that he and Xu yurou would be the next group to enter.

After a minute, Chen Xuan gestured for Xu yurou to get ready to enter the virtual screen. Then, he turned to Xia ruofei and the others and said, ""Brother Xia, elder yang, I don't think elder mu will be able to return. I think you can wait for a while after Xu yurou and I go in, but I don't think it's necessary to wait for two minutes." Once I enter, if I can turn back, I will immediately turn back! In addition, if I can't come out after I go in, I think there's no need for the four of you to split up again. You might as well go in together! After all, we don't know how long this door of light will last. "

Xia ruofei nodded and said, "that makes sense!" We'll judge based on the actual situation! As for brother Chen ... We don't know anything about the situation inside, so you must prioritize your safety and not enter rashly!"

"Don't worry!" Chen Xuan nodded and smiled. I treasure my life the most!"

At this time, Chen Xuan's watch showed that two minutes had passed, but the portal was still silent. After mu Hua and mu Jianfei entered, there was no more news from them.

"Haha!" Chen Xuan laughed and said, "it's finally our turn! Yurou, get ready, we're going in!"

"Yes! Young sect leader!" "Yes," Xu yurou replied.

"Brother Chen, take care!"

"Young sect leader Chen, take care!"

Xia ruofei and Yang Liu said in unison.

Chen Xuan smiled and said, "we'll meet again in the secret realm!" I wish everyone good luck! Yurou, let's go!"

After that, Chen Xuan and Xu yurou strode into the light door without hesitation.

Xia ruofei watched as Chen Xuan and Xu yurou's figures disappeared into the light curtain Door. He looked at the Willow and said, ""Elder yang, what do you think of brother Chen's suggestion?"

Yang Liu pondered for a moment and said, "Xin 'er and I will be the last batch to enter!" We've been waiting for so long anyway, I think the light gate won't collapse in another minute or two. "

Chapter 3277 Caught off guard (2)

No matter what Willow's considerations were, Xia ruofei would not force them. He was even more willing to split up. After all, both parties could not trust each other completely. If they entered together, they would have to be on guard against the dangers in the mystic realm as well as the other party. After all, money could move people. Moreover, there might be some great opportunities hidden in the mystic realm. As long as the temptation was big enough, it was easy for them to turn against each other.

Hence, Xia ruofei nodded and said, "Alright then! Then we'll go in first ..."

With that, Xia ruofei turned to Ling Qingxue and said seriously, "Qingxue, after we go in later, no matter what happens, remember to follow me closely. Don't stray too far from me."

"I'll remember that, don't worry!" Ling Qingxue nodded.

Xia ruofei smiled bitterly. How could he be at ease? Seeing that Shen tianfang and the others had gone in three batches and there was no news at all, he was not confident at all. He even regretted listening to Song Wei and Ling Qingxue and bringing Ling Qingxue along.

If he was alone, he wouldn't have so many concerns. If there was any danger, he still had the spirit painting scroll as his trump card!

Xia ruofei thought for a while and said, "if we get separated as soon as we enter, don't panic. Try to contact each other through radio communication first." If we're both in the secret plane, maybe we can use the radio. In short, we must stay together as much as possible. If we are separated, we must find a way to gather at the first moment!"

"Mm! I know!" Ling Qingxue said.

"If we get separated, you must first ensure your own safety!" Xia ruofei said, "you've learned how to use the spacesuit, right? This multi – function watch can detect the air quality, oxygen content, and the temperature of the environment. You have to make sure the environment is suitable for survival before you can take off the spacesuit!"

Ling Qingxue couldn't help but burst out laughing. "Didn't we already plan for this on the way here? I remember everything, don't worry! I'm really going to get nervous if you keep nagging ..."

Xia ruofei smiled awkwardly and said, "I was indeed a little too nervous ..."

Willow couldn't help but laugh and said, "Fellow Daoist Xia, fellow Daoist Ling, the two of you are truly a loving couple!"

Yu Xin 'er giggled and said, "he fed me dog food on the moon!" It's fine to eat dog food on earth, but I didn't expect that I still couldn't hide even when I'm on the moon!"

Ling Qingxue couldn't help but blush and rolled her eyes at Xia ruofei. Xia ruofei, on the other hand, laughed heartlessly.

However, with this interruption, the tense atmosphere from before eased up quite a bit.

Xia ruofei did not look at his watch and said, "It's almost time, let's go in!"

"En!" Ling Qingxue nodded, then turned to Xiner and said, "Xiner, I'll go in first!"

“Go ahead!” Yu Xin ‘er said with a smile. With fellow Daoist Xia taking care of you, you’ll definitely be fine! We’ll be there soon!”

Ling Qingxue and Yu xiner were about the same age, and their cultivations weren’t that far apart. Yu xiner had only been accepted as the personal disciple of the valley master of the soaring Flower Valley, Liu Mansha, by chance after she had obtained her master’s degree in the secular world. Thus, she had a lot in common with Ling Qingxue. In the past ten days of lonely travel, the relationship between the two of them had also become much closer, and they were already very good friends.

Ling Qingxue nodded and said, “I wish everyone good luck!” We’ll meet again in the mystery realm!”

“Alright!” Yang Liu laughed. I hope everyone can get a great opportunity! See you in the secret realm!”

Xia ruofei and Ling Qingxue held hands and waved at Willow and Yu xiner. Then, they turned around and walked into the light screen.

At this moment, Xia ruofei was on full alert and his vital Qi was all over his body. Although he didn’t release his flying sword to be on guard, he was still connected to the spirit map space with a trace of his mind. If there was any danger, he would be able to react at once.

Xia ruofei and Ling Qingxue’s bodies entered the light screen.

Xia ruofei only felt that the light screen became very eye – catching. His eyes were almost blinded by white light and he could not see anything.

In addition, he could also feel that he seemed to be bathed in warm sunlight, and his whole body was warm. The spacesuit was supposed to keep the high temperature out, but he could still feel the warmth that seeped into his soul.

Xia ruofei, who was bathed in the white light, did not stop walking. He continued to walk forward for two or three steps before the white light in front of him suddenly disappeared.

There wasn’t the shifting of the stars that he had imagined, nor was there any pulling force. He just walked over lightly.

After the white light disappeared, what appeared in front of Xia ruofei was an emerald green grassland. It was a very comfortable green at first glance. The grassland seemed to have no end, extending to the limit of his vision.

Xia ruofei turned his head slightly and was shocked to see that Ling Qingxue had already disappeared.

When they entered the light curtain Door, Xia ruofei was clearly holding Ling Qingxue’s hand as they walked in. The whole process felt like a few seconds and they had already passed through the white light area. In those few seconds, Xia ruofei did not even notice that Ling Qingxue had disappeared.

The two of them had walked through the door hand in hand. Ling Qingxue had disappeared so mysteriously, yet he had not noticed at all. This was simply too outrageous.

Xia ruofei couldn’t help but panic. He quickly called out in the communication channel, “”Qingxue! Qingxue! Where are you? Can you hear me?”

Other than the faint sound of electric current, there was dead silence in the communication channel.

“Qingxue! Please answer if you can hear me!” Xia ruofei’s voice was trembling.

Before they came in, Xia ruofei and Ling Qingxue had predicted all kinds of situations, including the possibility of them getting separated. Xia ruofei had even specifically told Ling Qingxue a lot of things to pay attention to. However, when things really came to a head, Xia ruofei still felt very flustered for no reason.

Ling Qingxue was only a Qi refining cultivator. Now that she had to face everything in this secret realm alone, the danger level was obvious.

Xia ruofei was filled with regret. He regretted bringing Ling Qingxue to the mystic Luna realm. At that time, Ling Qingxue had insisted on coming along and Song Wei had spoken up for her. Xia ruofei thought that since he had the spirit map space, if there was any danger that he could not deal with, he could just put Ling Qingxue into the spirit map space. Now that Xia ruofei, Ling Qingxue, and Song Wei had established absolute trust, it was not impossible for him to let Ling Qingxue know his biggest secret if necessary. Hence, he felt that his safety should be basically guaranteed.

However, he had never thought that the secret realm was not what he had imagined. The two of them had entered together, but were forcibly separated. All the preparations he had made were useless. Everything that followed would have to be faced by Ling Qingxue alone.

Xia ruofei forced himself to calm down. He kept calling for Ling Qingxue, Chen Xuan, Shen tianfang, and the others in the communication channel.

However, no matter how he called out, no one responded.

Calculating the time, Willow and Yu xiner should have entered the secret realm by now. Xia ruofei turned around and looked around. He realized that he was in the middle of the grassland. There was no white light at all. It was as if he had appeared out of thin air.

In other words, the passage through the light curtain was simply one – way. After entering, if one wanted to leave, it was impossible to return the same way.

This also explained why no one returned to report the news of Chen Xuan and the others entering the secret realm.

Xia ruofei muttered to himself, “calm down!” Calm down! Qingxue’s storage ring has enough oxygen supply modules, a spare spacesuit, a large amount of food and water, and the cultivation resources I gave her ... If she’s in a similar environment as me, she shouldn’t be in any danger for a while! Qingxue’s so smart, she’ll definitely be able to protect herself ...”

Chapter 3278 The journey (1)

Xia ruofei forced himself to calm down and not think about Ling Qingxue.

He knew very well that the more difficult the situation was, the more he couldn’t mess up, or it would only get worse.

Furthermore, this was not the worst situation. At least, there was no danger in his current position. If Ling Qingxue had come to such an environment like him, she would be safe for the time being.

Xia ruofei took a few deep breaths and gradually calmed down.

He first raised his hand to look at his watch. After pressing a few buttons, he saw the information on the watch. The air quality here was very good and completely suitable for human breathing. The surrounding temperature was also very suitable, about 23 or 24 degrees.

Hence, Xia ruofei turned on the lock and removed the spacesuit's mask. He took a few breaths and confirmed that there was no problem.

He then took off his spacesuit and put it into the spirit map space.

In fact, the moment they entered the mystic realm, Xia ruofei could already feel the huge difference between the environment on the moon and the one on the moon. First of all, the gravity here was much stronger than on the moon and was basically the same as on earth. If it were not for the fact that the physical strength of cultivators was far superior to ordinary people, they would have found it difficult to move even a single step in their heavy spacesuits. Besides, even though he was wearing a spacesuit, Xia ruofei's spiritual power could still feel that the spiritual Qi in this secret realm was very rich, even more so than that on Peach Blossom Island.

After taking off the spacesuit's mask, this feeling became more intuitive. The rich spirit Qi hit his face, making his mind clear.

Of course, according to Xia ruofei's intuitive feeling, the concentration of spiritual Qi in this secret realm was still a little worse than that in the spirit map space.

However, the difference wasn't that great.

In the world of cultivation on earth, this was definitely a cultivation paradise, or even a cultivation sanctuary.

Even the best cultivation place in the heavenly sect couldn't have such dense spiritual Qi. Only by using a spiritual gathering formation to gather the surrounding spiritual Qi in a small area at all costs could such an environment be formed temporarily.

After Xia ruofei kept the spacesuit, he took out a set of ancient clothes and changed out of the undergarments that he was originally wearing under the spacesuit. These undergarments were quite tight – fitting; he couldn't possibly run around in a set of 'tight – fitting' clothes! The reason why he had changed into an ancient costume was, on one hand, for the convenience of moving around. On the other hand, considering that this Mystic realm had existed for at least a few thousand years, no one could be sure if there were cultivators in it. So, it was more convenient to wear an ancient costume than modern clothes. If he really encountered an ancient cultivator, at least he wouldn't be regarded as an alien.

After quickly changing his clothes, Xia ruofei checked his surroundings.

The biggest feature of this place was the rich spiritual energy. Other than that, there was only a sea of green. No matter which direction he looked, he could only see the green grassland that stretched into the distance.

Moreover, to Xia ruofei, the grassland was too flat. It could be said that there were no ups and downs, just like Minecraft's super flat mode.

Apart from that, it was worth noting that this place was really very, very quiet.

It was reasonable to say that no matter how quiet the grasslands on earth were, there would still be some insects chirping in the grass.

However, there was no sound at all here. It was so quiet that Xia ruofei felt a little flustered. In fact, in such an environment, he could clearly hear his own heartbeat.

Xia ruofei was suddenly in a dilemma.

Everything looked the same except for the grassland. If he wanted to explore this secret realm, which direction should he go? There was no sun, moon, or stars in the sky, so it was impossible to tell the direction. If one were to explore rashly, it would be easy to get lost.

The place where Xia ruofei was standing now might not be able to find the way back, but at least this was the place where he entered the secret realm. If the exploration was fruitless, he would definitely have to return here to look for other clues. Perhaps he would need this place to return to the Moon!

Hence, Xia ruofei could not leave so easily, in case he could not find her again.

It would have been fine if this really was Minecraft's super flat mode, and they could just set up a Beacon here. No matter how far they went, they would be able to see the pillar of light that shot into the sky, so they definitely wouldn't get lost.

But that was a game, after all, and there was no way to achieve it in reality.

Xia ruofei couldn't just stand there and not leave. He had entered the secret realm to search for possible opportunities. Moreover, he had been separated from Ling Qingxue. How could he stay in the same place? He definitely had to find Ling Qingxue first.

Hence, Xia ruofei decided to make a mark at this location in the hope that he would be able to find his way back.

Xia ruofei's method of marking was very simple. He took out a two – meter – tall steel pipe from the spirit map space, wrapped it with a large piece of red cloth, and made a simple flag on the ground.

Other than the primitive symbol, Xia ruofei also placed a signal transmitter beside the flag.

This was a rescue facility that came with the EVA spacesuit. When an astronaut was in danger, they could turn on this signal transmitter and continuously send out radio signals. Within a range of 50 kilometers, the astronaut's wristwatch could directly receive the signal and locate the position. Considering that the terrain here was very flat and there was no cover, the range of the signal could probably be further.

Chapter 3279 The journey (2)

Moreover, the transmission and reception of this kind of signal did not need satellite relay. The wristwatch could directly receive the signal.

Xia ruofei gave it a try. He could clearly locate the signal transmitter on his watch from tens of meters away. This meant that at least radio waves could be transmitted here, which made him feel more at ease.

The signal transmitter had a very low power consumption, and the battery it came with could last for about a month. It could also work continuously even in high temperatures, underwater, or other harsh environments.

Of course, the radio could be transmitted here, but the other members of the exploration team couldn't be called through the communication channel. This also meant that the other members were very far away from him, out of the effective range of the communication equipment. They might not even be in the same space as him.

Xia ruofei had the spirit map space and his understanding of the rules of space was deeper than most of the cultivators on earth. He knew that there might be more than one space in this secret realm and they might have been transported to different spaces.

If that was the case, radio communication equipment would naturally not work.

Now, Xia ruofei could not think too much. There was no way back, and Ling Qingxue was also lost. He could not just sit and wait for death! Therefore, he had to move first.

As for which direction to go, there was no condition for reference at all, so he could only rely on his feelings.

Xia ruofei decided to use his "ultimate killing move". He took out a boot from the spirit map space and threw it up. When the boot landed on the ground, he put it back into the spirit map space with a thought and flew in the direction the tip of the boot had pointed to.

Xia ruofei walked a few hundred meters before stopping. In fact, all he saw was the same grassland. If he did not look back and see the flag that he had just raised, he would have thought that he had stayed in the same place.

Xia ruofei felt that this was too slow. He had no idea how big the grassland was! If he had to run on his own feet, how long would it take?

Thus, he summoned his flying sword from his dantian and wanted to explore the grassland by riding on it.

However, as soon as the flying sword left his body, it fell to the ground with a clatter. No matter how he tried, he couldn't control the flying sword to float, let alone ride it.

He could use his mental strength to lift the flying sword, but that was not riding a sword, and it was impossible to rely on his mental strength to fly at high speed.

Xia ruofei had no choice but to keep the flying sword in his body.

He then tried the black Phoenix flying ship.

Actually, Xia ruofei had already given up hope. After all, sword Kinesis flight and the black Phoenix flying ship's flight were based on the same principle.

Since sword Kinesis flight was not possible in this secret realm, the black Phoenix flying ship was most likely not usable either.

As expected, after Xia ruofei took the black – armored flying ship out of the spirit map space, it fell on the grass. The control formation of the Flying Ship seemed to have lost its effect.

Fortunately, Xia ruofei was prepared. He did not follow his previous habit of throwing the black Phoenix flying boat into the air, so the flying boat was not damaged.

Xia ruofei smiled bitterly as he kept the black Phoenix flying ship.

He could now confirm that the secret realm he was in was a small space, and the rules of this space were not something he could understand with his strength. But at least he could be sure that the rules were very different from the outside world.

Regardless of whether it was controlling the black Phoenix flying ship or flying on a sword, they all relied on the assistance of formations to offset the effects of gravity. At the same time, they gave the Flying Ship or sword the speed to rise, fall, advance, and retreat. This naturally involved spatial laws the most.

Of course, Xia ruofei did not know much about the black Phoenix flying ship and the flying sword's array formation. It was enough that he knew how to use it.

Whether it was on earth or on the black Phoenix flying ship to the moon, or even further in the universe, they all belonged to the same space. The rules of space were universal, so the black Phoenix flying ship could still be used normally in space.

However, in this secret realm, both the black flames flying ship and flying swords had lost their effectiveness. This meant that the laws of space had changed greatly, causing the arrays on the Flying Ship and flying swords to be completely ineffective.

But the amazing thing was that in this space, radio waves could still transmit normally. This made Xia ruofei not know whether to laugh or cry.

He'd rather not use the radio here than not be able to use the flying sword or the flying boat!

This was equivalent to binding his hands and feet!

Without the help of the black Phoenix flying ship and flying swords, he could only measure this grassland with his feet.

Xia ruofei smiled bitterly and shook his head. He stopped thinking about taking the shortcut and started to explore again.

Xia ruofei did not know how long he had been walking. He could not see the sun, the moon, or any other celestial bodies in the sky, but there was a natural and gentle light. However, the light would never change. In other words, there was no change in day and night here.

The scenery around them remained the same, and even the ambient light did not change at all. It was like driving on an overly monotonous highway, and it was inevitable that one would feel drowsy after a long time. This was also why the highway was designed to add some turns to prevent the driver from dozing off!

Walking in this secret realm was much more monotonous than driving on a high – speed road.

Ling Qingxue was still on his mind. As he walked, he tried to call Ling Qingxue and the other teammates through the radio, but there was no response.

Xia ruofei, who was physically and mentally exhausted, was about to stop and take a break when he suddenly looked in front of him and his eyes widened ...

Less than a hundred meters ahead, there was a towering tower!

The tower was over a thousand meters tall, more than a hundred meters higher than the tallest building on earth, the Burj Khalifa.

The strangest thing was that Xia ruofei had been heading in this direction. Logically speaking, he should have been able to see such a tall building from a distance. How could he have only noticed it when he was less than a hundred meters away?

Besides, Xia ruofei was sure that the thousand – meter tall tower was empty just a few seconds ago. Just now, he had only lowered his head to catch his breath. When he raised his head again, the tower appeared in front of him out of thin air, as if it had teleported over.

All of this was filled with a strange atmosphere.

However, it was better to change than not.

If they continued walking, the surrounding scenery would be the same forever. Xia ruofei felt that he would really go crazy.

Now that a tower had appeared, no matter if it would be dangerous or not, it was at least a possibility.

The appearance of a variable often meant new possibilities. The so – called crisis had always been an opportunity hidden in danger.

Hence, Xia ruofei only hesitated for a moment before he quickly ran towards the tower.

Even though he was slightly tired, he did not use up much energy, so he did not need to adjust his state of mind. Even if he was a little tired, he did not want to waste any more time to recover. He had to find Ling Qingxue as soon as possible.

The distance of a hundred meters was covered in the blink of an eye. Xia ruofei had already filled his body with Yuan Qi and was in a state of high alert.

He even summoned his flying sword. Although he couldn't use sword secrets, he still used his mental power to wrap around the flying sword. Once there was danger, although he couldn't control the flying sword as easily as he controlled it with sword secrets, he could at least use it as a sharp weapon.

Moreover, the flying sword was so sharp that even if it was just a simple slash, the power would not be small.

Chapter 3280 The Grand Tower (1)

In the blink of an eye, Xia ruofei had arrived at the base of the tower – shaped building that was a thousand meters tall.

It was even more shocking when he got closer. The octagonal base of the tower covered dozens of acres, and each side was one to two hundred meters long. Xia ruofei walked closer and felt that the tower was really majestic. Just by standing there, there was an inexplicable sense of oppression.

In addition, the biggest feature of this tower was its height and size. It seemed to be an enlarged version of the towers commonly seen in China. The base of the tens of acres was hundreds of meters high from the ground. There were eighteen steps in eight directions leading to the vast base, and each step was five or six meters high. Each floor of the nine – story tower was close to a hundred meters tall, and the bells hanging on the eaves of each floor were actually huge copper bells.

Xia ruofei stood in front of the two – stair – High steps and looked up at the thousand – meter tall tower. It was as if he had suddenly arrived in the Kingdom of Giants.

Since he was already here, he naturally had to enter the tower to take a look.

The two – stair – High flight of stairs was not a problem for Xia ruofei. Although it was impossible to fly on a sword in this secret realm, a cultivator's physical fitness would not be weakened. Moreover, the sculpted marks on the huge stone steps were very obvious. The rough marks left by knives and axes were scaled to an equal scale. Hence, there were many leverage points on the vertical surface of the steps. Even if Xia ruofei was not a cultivator, he could easily climb up with the skills he had trained in the special Combat Assault team.

Now that he was a golden core cultivator, a height of five to six meters was naturally not a problem.

He stood on the same spot and jumped four or five meters high. Then he reached out and used a carved mark on the vertical side of the stairs to pull himself up again. He easily climbed up the stairs.

It was more like a huge platform than a flight of steps. The width of this flight of steps was 70 – 80 m and the depth was 20 – 30 m. The sculpted marks on the surface of the steps formed deep ravines.

Xia ruofei jumped through the ravines and soon reached the second step.

Just like that, Xia ruofei continued to climb up the stairs. He climbed up eighteen steps in a row.

During this process, Xia ruofei was on full alert and did not dare to relax.

However, he had not encountered any danger so far. Although the tower looked majestic and majestic, it was just like the grassland he had just explored. Everything was relatively calm.

On both sides of the 18 steps, there were stone railings that were 20 to 30 meters high. Only the steps had a passage that was 80 meters wide.

Xia ruofei passed through the passageway and finally arrived at the base of the tower.

In fact, this was the true base of the tower, and the base was already 100 meters above the ground. It was clear how spectacular the tower was.

The tower was built on this Foundation, and its bottom was also octagonal. It should be in the same Center as the foundation, but it was smaller. However, the length of each side of the tower's bottom was about 100 meters.

Xia ruofei stood on what could be described as a vast platform, like a tiny ant.

He ran towards the bottom of the tower.

The base of the tower was also made of huge bluestone. Xia ruofei did not know where the builder of the tower had found such a huge bluestone.

He finally arrived at the bottom of the tower. In front of him was another five steps, two stories high. After climbing up, he came to a corridor that was tens of meters wide.

This corridor surrounded the entire bottom of the tower.

Xia ruofei did not enter the door of the tower, but he could still see the huge stone embossed on the first level of the hundred – meter tall tower. These relief sculptures looked very ancient and primitive. The contents of the embossed were not the Bodhisattva, Arhat, or Vajra that were commonly seen in Buddhism. Instead, they were scenes of cultivation.

Xia ruofei walked along the huge corridor and admired the embossed on the outside of the tower.

He finally saw the entrance of the tower after going around half a circle.

It was a huge stone door that was 80 meters tall and 20 to 30 meters wide. The tightly shut stone door looked very heavy. Even if Xia ruofei, a golden core stage cultivator, were to come and hit it, he would not be able to open it with all his strength.

There were also very complicated patterns on the stone door, but the patterns on it were very different from the calm cultivation scenes outside the tower just now.

The stone gate was carved with scenes of a tragic battle.
