

God tier Farm 3301

Chapter 3301 The wonderful journey of the spirit painting scroll (2)

After the little old man had taken the spirit painting scroll, he did not realize that the target of this large search operation was actually hidden in the item he had accidentally picked up.

He leaped onto the courtyard wall again, and his sharp eyes swept around.

When the old man did not find any trace of Xia ruofei, he ordered the puppets to continue the search.

The other jiedan stage puppets quickly nodded in agreement.

The little old man then leaped up and ran towards the center of the town.

Actually, Xia ruofei had a slight impression of this old man. He had seen this old man when he first stepped into the mini town under the guidance of the Taoist child Qing Feng.

However, at that time, the old man was begging for food in the corner of a shop with a miserable face. Xia ruofei had met him once, but he did not know that he was so powerful.

The little old man carried the spirit painting and ran madly. Xia ruofei could use the most basic perception in the space to observe the situation outside.

The scenery in Xia ruofei's vision changed rapidly. It was clear that the old man's speed was extremely fast.

In a short while, the old man arrived at the street corner where Xia ruofei had first seen him.

Xia ruofei was speechless. Did this old man come back to beg for food?

Now that all the puppets had left their roles and were searching for Xia ruofei with all their might, could it be that this old man was still reluctant to leave his role and was trying to "resume his old career"?

Even though the situation was urgent, Xia ruofei still found it funny.

The little old man bent down and picked up a broken bowl with three holes on the ground. He wiped the dust off it with his sleeve and then put it in his shirt.

After that, the old man left the corner and turned into a small alley.

Xia ruofei's vision changed rapidly. Soon, the old man arrived at the entrance of a courtyard.

The little old man pushed open the courtyard door and walked in, walking into the room with familiarity.

Obviously, this should be the little old man's home.

After the little old man entered the house, he picked up his teacup and gulped down a few mouthfuls of tea. Then he sat down and unfolded the painting again, studying it with great interest.

Xia ruofei was speechless.

He had originally wanted to take advantage of the little old man's inattentiveness to suddenly appear in the outside world, and then immediately put the spirit map scroll into his palm, and then escape without hesitation.

However, this little old man seemed to really like this painting scroll very much. After sitting down, he had been admiring it without end.

Finally, Xia ruofei waited for the old man to put down the painting. To his surprise, the old man stood up and poured another bowl of water. After gulping it down, he sat back down to look at the painting.

Xia ruofei couldn't help but complain. You're a puppet, not a real human. Do you have to be so realistic? He was drinking water non – stop ...

Especially when Xia ruofei saw that the time in the perceptual mirror was getting closer and closer to two hours, he was even more anxious.

If this little old man continued to look at the spirit painting for half an hour, then his hopes of breaking the record would be dashed.

With Xia ruofei's ability, he only needed nine more puppets to complete the mission. Twenty minutes should be enough.

However, this little old man alone had wasted nearly ten minutes of his time, and this was because the little old man's speed was extremely fast. From that dead end to his return home, the time spent on the journey was very little.

Xia ruofei could only watch as the time in the perceptual mirror's career increased, but he could do nothing but stare at the old man.

When there were only ten minutes left before the record was broken, the little old man finally put down the spirit map scroll.

This time, he was really going to leave the house, because the little old man had carefully rolled up the spirit map scroll. Then, he opened the lock of a box and placed the spirit map scroll into the box before locking it up.

"Hurry up and leave! Hurry up and leave!" Xia ruofei couldn't help but shout in his heart.

Although the old man had stopped studying the painting, Xia ruofei would not be able to come out if he stayed in the room.

Fortunately, the old man seemed to have heard Xia ruofei's thoughts. After locking the painting, he left the room and walked out of the courtyard, heading towards the central Street of the mini – town.

As the owner of the painting, Xia ruofei's perception was completely useless in this situation. As the painting was locked in the cabinet, it was completely dark in his vision.

Xia ruofei did not know that the old man had already left the courtyard.

However, he really did not have time to waste. Furthermore, the Golden core stage puppets that he had encountered before basically had no mental power. So he could only take a gamble. He was betting that if this little old man was still in the house, he would not be able to detect his mental spying.

This was, of course, very risky. After all, the little old man was a puppet with the strength of the original infant stage.

However, Xia ruofei still released his spiritual power determinedly.

He carefully controlled the range of his spiritual power and slowly expanded it.

Very quickly, Xia ruofei had a full view of the situation outside.

The old man was no longer in the room. Xia ruofei's spiritual power continued to spread and soon realized that the old man was no longer in the house.

He did not continue to expand the range of his mental strength. He was confident that outside of this large range, the little old man would not be able to discover his whereabouts.

Of course, this was just Xia ruofei's guess. In reality, it was still dangerous.

However, time waited for no one. If he wanted to break the record, he had to take a risk.

Xia ruofei made up his mind and returned to the outside world.

He didn't even think about it and put the spirit map scroll back into his palm.

Xia ruofei put the painting away and his heart finally settled down.

He couldn't be bothered to search the little old man's house and directly jumped out of the back window. Then, he quickly jumped over the wall of the backyard.

There was still some distance to the center of the mini town. Most of the puppets were attracted to the dead end, so the area was very empty. Xia ruofei's spiritual power did not detect the existence of the puppets.

He strode towards the dead end, and at the same time, he kept his mental power radiating outward.

There were less than ten minutes left, and he still needed to kill nine puppets.

Otherwise, even if he completed the mission, he would not have the chance to break the record.

Very quickly, Xia ruofei's body turned sideways and he entered a narrow alley. Using his mental power to check, he found three early – Stage golden core cultivators walking from the opposite side of the alley.

...

Without any hesitation, he threw out the spirit map scroll again and stuffed it directly above the lintel of a courtyard gate. Then, he entered the space with a thought.

The three early gold core realm puppets quickly walked over.

When they passed the location of the spirit map, Xia ruofei returned to the outside world with a thought. Almost at the same time, he released the qushuang flying sword and the blue immortal sword.

The two flying swords pierced toward the three puppets with a sharp whistling sound.

Xia ruofei didn't hold back at all. The three puppets were all at the early golden core stage and were the weakest among the puppets.

Xia ruofei was very willing to meet such an opponent. Even if there were three puppets at the same time, he would not give up.

The three puppets were caught off guard, and two of them were stabbed in their vital points in one round, dying on the spot.

The other puppet had just shouted when Xia ruofei, who was following closely behind the flying sword, smashed the top of its skull with a palm.

With Xia ruofei's current strength, it was not difficult for him to deal with an early – Stage golden core puppet, which was much weaker than an early – Stage golden core cultivator.

However, with three puppets working together, it would be difficult for Xia ruofei to kill them all in an instant.

The last puppet cried out for help before it died.

...

After Xia ruofei killed the puppet, he didn't even bother to hide the corpse. He left the alley immediately.

His mind power had already searched the nearby area so he had already chosen his escape route. Before the other puppets arrived, Xia ruofei had already left the area.

Chapter 3302 Record – breaking (1)

Xia ruofei's brain was working at full speed. He had to kill at least six puppets in the short amount of time left. These puppets were all moving. Especially after he successfully attacked three puppets, the other puppets' speed suddenly increased a lot and they were all rushing towards the location of the attack.

Xia ruofei had to take some risks. He had to take advantage of this time to attack from the side and try to kill a few more puppets. Otherwise, he would not have enough time when the commotion died down.

Furthermore, Xia ruofei knew that the original infant stage puppet would soon realize that the painting was missing. By then, he did not know what would happen.

Hence, Xia ruofei's strategy became more aggressive. He did not wait patiently for the right moment like before. Instead, he went to meet the three puppets who were coming in a group.

He had a map of the entire town in his perceptual mirror. In addition, Xia ruofei was using his spiritual power to investigate the situation in the area. He had already grasped the weakness of each puppet.

Now, Xia ruofei's brain was like a high – speed computer. He had simulated all the possible routes that the puppets might have taken and finally chose the less risky plan, which was to face the three puppets.

After all, each puppet's route was uncertain. The alleys in the mini town were interconnected so there were many possibilities. However, according to Xia ruofei's calculations, there was a 70% chance that he could find an opening to face these three puppets without being affected by the other puppets.

Moreover, according to his estimation, he should have about half a minute. As long as he could get rid of these three puppets in half a minute, he would have time to escape.

A 70% chance was not low. Besides, the other puppets were harder to deal with. Hence, Xia ruofei did not hesitate and went straight for the three puppets.

The three puppets all had the appearance of children. However, the strength of a puppet had nothing to do with its appearance. Although these three child puppets had braids that faced the sky and had an innocent expression on their faces, their strength was not bad at all.

Among the three puppets, one was at the advanced stage of the Golden core realm and the other two were at the intermediate stage of the Golden core realm. If Xia ruofei wanted to eat them all at once, he would need to put in some effort. Moreover, he only had half a minute to unleash his full power.

Xia ruofei quietly approached the three puppets, but they still did not notice the pattern of the puppets' low perception ability, which was vividly displayed on the three puppets.

The flying sword flew out without a sound. Xia ruofei's figure was like a ghost, emerging from the shadows.

Although he was determined to fight to the death this time, he still chose to win by surprise.

The blue immortal sword and the qushuang flying sword both attacked the late Aurous core stage puppet.

Xia ruofei also used the floating steps and attacked the late – Stage golden core puppet.

Xia ruofei's idea was simple. He wanted to focus all his attacks on the strongest puppet among the three of them. He hoped to defeat it with one strike. As long as this late – Stage golden core puppet was killed, the remaining two intermediate – Stage golden core puppets would not be a problem.

The three child – like puppets were still very vigilant. As soon as the two flying swords appeared, they immediately began to Dodge.

However, Xia ruofei's angle of attack was very tricky. The two flying swords were feints. The real killing move was Xia ruofei's own palms.

These three puppets were quite organized. When they were attacked, they immediately dodged separately. However, all of Xia ruofei's attacks were focused on the late golden core puppet. After the other two puppets dodged, he had more room to display his skills.

The late Jindan stage puppet had just sent the blue immortal sword flying with the iron rod in his hand when the qushuang flying sword was already in front of him. He hurriedly fell to the ground and avoided the attack in a very embarrassing way.

At this time, the blue travel immortal sword had stabilized again and continued to stab at the puppet. The puppet had lost its opportunity and could only roll on the ground, barely avoiding the fierce attack.

However, at this moment, Xia ruofei's real killing blow had already been launched.

From the corner of his eyes, the puppet saw a pair of palms rapidly growing in his field of vision. He revealed an inexplicable look of horror, but it was too late to Dodge.

With a "PU Chi" sound, the puppet's head was crushed by Xia ruofei's full – Power Strike. The puppet did not even make a sound before it fell to the ground and died.

The other two puppets of the intermediate golden core stage were both shocked and furious. They shouted and pounced on Xia ruofei from both sides.

Xia ruofei faced the two puppets with the strength of the intermediate stage of the Golden core realm without any fear.

One of the puppets with braids was holding two metal cudgels in his hands. He swung them towards Xia ruofei's head with a terrifying momentum.

Xia ruofei used the graceful steps and dodged his attack. Then, he turned around and attacked another puppet.

At the same time, the blue immortal sword and the qushuang flying sword stabbed toward the back of the puppet's head under his control.

The puppet had just witnessed its companion's head being smashed by Xia ruofei, so it did not dare to relax at all. When it heard the sound of the wind behind its head, it quickly dodged.

But this time, the qushuang flying sword and the blue immortal sword were still feints.

Chapter 3303 Record – breaking (2)

Just as the puppet dodged, the two flying swords drew an arc and changed their direction of attack, heading toward his next move.

Although the puppet tried its best to Dodge, it still couldn't completely Dodge. It felt a cold sensation in its leg and looked down to find that its left leg had been cut off from the knee by the flying sword of qushuang.

Xia ruofei's eyes were filled with killing intent. He lunged forward and kicked the puppet's head.

This was a sure – kill move, and the puppet was no longer able to Dodge.

However, after Xia ruofei dodged his first attack, the puppet with braids immediately attacked Xia ruofei again. At this time, it was already behind Xia ruofei.

The puppet couldn't save its companion in time, so it could only use this method to make Xia ruofei give up on attacking.

Xia ruofei knew that it would be very difficult to get rid of all three puppets in half a minute. Now was his best chance. If he missed it, he would have to run away and it would be impossible for him to break the record.

In a split second, he gritted his teeth and twisted his waist, using all his strength to avoid the attack from behind. However, his leg's momentum did not decrease, and it kicked toward the puppet's head with a whistling sound.

Bang! Bang! Bang! Bang!

The first sound was the sound of Xia ruofei kicking a puppet. Without any suspense, the puppet fell to the ground and was as dead as dead could be.

The second sound was the sound of the iron rod hitting Xia ruofei's body.

Although he tried his best to avoid it, in order to maintain his center of gravity and make sure that the whip kick would not deviate, his range of dodging was very limited. In the end, he was still hit in the shoulder by one of the iron rods.

Xia ruofei had actually gathered all his vital Qi on his shoulder and back to defend himself. However, after being hit by the metal rod, he still felt a splitting pain. He suspected that his shoulder blades had been broken.

Xia ruofei felt that it was a good deal to exchange injuries for lives.

Sometimes, he just had this kind of ruthlessness.

After being hit by the iron rod, Xia ruofei did not fall. Instead, he used the force to lean back and came to the front of the last puppet. He turned around and used the inertia to hit his elbow behind him.

The three puppets looked like children. The last puppet with a braid was only a little taller than Xia ruofei's waist. Hence, Xia ruofei's elbow hit the puppet's head directly.

The puppet was also stunned at the critical moment. He thought that Xia ruofei would definitely Dodge. He did not expect Xia ruofei to be so cruel to himself. He would rather take his iron staff head on to kill the puppet.

In that moment of distraction, Xia ruofei's elbow had already arrived.

The vital Qi – infused elbow struck the puppet squarely, and with a crack, the puppet's neck snapped, and its head tilted to one side.

After Xia ruofei killed the last puppet, he immediately endured the pain and jumped onto the bent Frost Flying sword. He then quickly flew away. He could now control the bent Frost Flying sword to fly, and his escape speed was much faster.

97 puppets had been killed, so the number of puppets in the mini town had been reduced by more than half. Xia ruofei found a quiet alley with ease.

He took out the spirit map scroll and hid it before entering the spirit map space.

In order to save time, he directly came to the space of the Archean realm and immediately called Xia Qing.

Xia Qing immediately rushed to the Archean realm. When she saw Xia ruofei clutching his shoulder in pain, Xia Qing was shocked and hurriedly asked, "Master, are you injured?"

Xia ruofei said, "brew me some medicine immediately!" "I'll come in and use it later!"

"Yes!" Xia Qing quickly replied. Master!"

Xia Qing ran to the medicine cabinet to look for medicinal herbs, while Xia ruofei directly took out the preservation box that contained the petals of the spirit Heart Flower. After opening the lid, he used his spiritual power to lift a petal and pressed it directly on his injured shoulder.

A cool feeling spread from the wound to the whole body, and the burning pain disappeared without a trace.

Xia ruofei knew that one petal was definitely not enough. After all, the petal was very useful, and he definitely did not want to waste it. So he decided to use only one petal. Combined with Xia Qing's medicine, the problem should not be too big.

After Xia ruofei used up a petal of the spirit Heart Flower, he immediately closed the safety box and put it back to its original place. Then, he left the spirit map space.

He didn't have much time left. He still had to kill three more puppets, so he had to race against time.

As soon as Xia ruofei returned to the first level of the Tower of Trials, he immediately released his spiritual power to cover the entire town. He was surprised to find that there were two solitary puppets in two places. Judging from their auras, they did not seem to be in the nascent Soul Stage.

Xia ruofei didn't hesitate. He stepped on his flying sword and flew close to the ground, quickly rushing over.

Three minutes later, he had successfully killed the two puppets.

One of the late – Stage golden elixir realm puppets took a bit of effort while the other one was killed by Xia ruofei in a second.

He was only one puppet away from completing the mission.

If he wanted to break the record, Xia ruofei had to finish the last strike as soon as possible.

He continued to release his mental energy to investigate, but the goddess of luck seemed to no longer care for him. After killing the 99th puppet, he did not find any more puppets that were alone.

They always acted in groups of at least three, and each group had a late – Stage golden core puppet.

Xia ruofei could only choose a small group that was closer to the true yang temple. This way, it would be much easier for him to escape. Moreover, there was only one late – Stage golden core puppet in this small group. The remaining two puppets were one at the early stage and one at the intermediate stage.

Xia ruofei's target was the early golden core puppet.

There wasn't much time left. Xia ruofei could only choose to end the battle quickly. He didn't have much time to think.

The moment he appeared, he was discovered by the three puppets. They immediately swarmed and pounced on Xia ruofei.

Xia ruofei calmly released the qushuang flying sword and the blue immortal sword, multitasking. On one hand, he controlled the qushuang flying sword and the blue immortal sword to attack the early gold core puppet. On the other hand, he had to use the graceful steps to avoid the other party's attack.

Although his injured shoulder had mostly recovered, there were still waves of pain which affected Xia ruofei's performance.

Even when the other two groups of puppets had almost arrived, he was still unable to kill the early gold core puppet.

Xia ruofei gritted his teeth. It seemed like he could only take the risk.

The mission had already progressed to this stage. He was aiming to break the record. Now, he was only one step away. How could he bear to give up?

Therefore, he simply ignored the attacks of the other two puppets and focused on attacking the only early gold core puppet.

This puppet was not as powerful as Xia ruofei, and now that Xia ruofei was taking care of it, it looked even more pathetic.

This early Aurous core stage puppet had the appearance of a young girl and looked very sweet. However, Xia ruofei was not so stupid as to treat a puppet with tender feelings.

Therefore, he finally killed the 100th puppet with a fierce attack and two injuries on his body.

The timer in the perceptual mirror's field of view had also stopped moving. The time displayed on it had stopped at 1 hour and 55 minutes.

...

When Xia ruofei saw the time, he heaved a sigh of relief. He had hurried and finally broken the record. Even if it was only five minutes higher than the record, it meant that from now on, the best record for the Tower of Trials 'first level mission would belong to him alone, unless someone amazing broke his record again.

After Xia ruofei killed the early gold core realm puppet, he naturally had no desire to continue fighting. Now that his mission was completed, the only thing he had to do was to go to the second floor as soon as possible.

Since he had decided to leave the first level, Xia ruofei had nothing to worry about. He didn't even care about the two angry puppets. He stepped onto the bent Frost Flying sword and flew towards the valley behind true yang temple.

Chapter 3304 Tower of Trials "second floor_

Although the two puppets were more powerful than Xia ruofei, Xia ruofei was riding a flying sword while they were chasing him on the ground. Naturally, they could not catch up with him.

The two golems bellowed in rage, and soon, the other golems were alerted as well. Besides, Xia ruofei did not hide his tracks on purpose this time, so the puppets soon discovered him.

In a short while, a long tail was following behind Xia ruofei.

Xia ruofei could see through the vision of the perceptual mirror that there were many intermediate and advanced Aurous core puppets behind him. The weaker puppets had all been slaughtered by him. He could not help but feel a little scared.

Fortunately, through the perceptual mirror, he also knew that he had completed the mission of the first level of the Tower of Trials. The passage to the second level had been opened. As long as he rushed over, he could enter the second level, and these puppets would naturally be unable to do anything to him.

Xia ruofei's sword Kinesis flight was extremely fast. Even though there were puppets blocking his way, he had been releasing his spiritual power all the time, so he could always avoid them in advance.

Even though he had to take a detour, he could avoid direct contact with the other puppets.

In a short while, Xia ruofei had already gone around true yang temple.

He even took the time to look inside and found that there was no one inside. Not only was old Daoist Zhen Yang nowhere to be seen, even the Daoist child Qing Feng was nowhere to be found.

Xia ruofei rode on the qushuang flying sword and quickly saw the big tree.

At that moment, a door of light appeared on the tree. It was similar to the door of light that Xia ruofei and the others had used to enter the Mystic realm on the moon.

Xia ruofei knew that this must be the entrance to the second floor. He couldn't help but feel happy.

At this time, a furious roar suddenly came from the direction of the mini town. Immediately after, a terrifying aura approached the entrance of the second floor at an extremely fast speed.

Xia ruofei's expression turned serious. He quickly activated his sword technique and increased his speed. He pounced towards the door of the light curtain on the big tree.

Xia ruofei was like a swallow passing through the forest. He stepped on his flying sword and entered the door of the light curtain. The moment he entered the second floor, Xia ruofei kept his qushuang flying sword.

From the corner of his eye, he saw that the moment he entered the second level, the nascent Soul Stage puppet wearing a coarse shirt was charging towards him with a furious expression.

Obviously, this old original infant stage puppet had already discovered that the spirit map had been stolen. Once he came out, he realized that Xia ruofei was the person they were after, so he was even more shocked and angry.

Xia ruofei even saw the old man swing the iron rod in his hand and hit the big tree.

However, this clearly wasn't a real tree. As the entrance to the second level of the Tower of Trials, the tree was obviously not something that could be easily destroyed. Thus, before the old man puppet's iron pestle could even touch the tree, a layer of light film appeared around the tree, bouncing the iron pestle back.

Immediately after, Xia ruofei felt the world before his eyes spin and he arrived at another place.

He felt lucky in his heart. If he had been half a second later, he would definitely not have been able to escape.

The old puppet's angry attack was unimaginably powerful. If Xia ruofei had not entered the second level of the Tower of Trials, he would not have been able to Dodge it. If the iron pestle had even touched him, he would have broken his bones.

At the same time, Xia ruofei felt a sense of fear. He was in the final stage of the mission and did not have much time to hide his whereabouts. If this old original infant stage puppet had discovered him a little earlier, he would have been dead.

Thinking of this, Xia ruofei could not help but worry about the safety of the other members of the exploration team, especially Ling Qingxue.

Although old Daoist Zhen Yang had said that Ling Qingxue was safe, that was only when Xia ruofei asked her. She was temporarily safe. If Ling Qingxue was faced with the same mission at the first level of the trial Pagoda, it would not be easy for her to complete it. Furthermore, if there was a slip – up, her life might be in danger.

Xia ruofei could only suppress the worry in his heart and deal with the current situation first. He would head up as much as possible and might meet Ling Qingxue and the others.

His most urgent thought was naturally to meet up with Ling Qingxue.

In that case, with the spirit painting, he could at least guarantee Ling Qingxue's safety.

Now that Xia ruofei was on the second level of the Tower of Trials, he did not dare to let his guard down since the first level was already so difficult. He did not dare to be distracted at this time, so he quickly got rid of all distracting thoughts and carefully observed his surroundings.

Xia ruofei soon realized that he was in a dense forest. He released his spiritual power to investigate out of habit but found that his spiritual power was suppressed here.

On the first floor of the Tower of Trials, his spiritual power Search range was basically no different from the outside world. It could almost cover the entire first floor of the Tower of Trials.

However, after coming to the second floor, he found that even if he used all his strength, his mental power could only extend to about two kilometers. This was much less than the range of his mental power detection under normal circumstances.

Besides, Xia ruofei was surprised to find that the second floor of the trial Pagoda was much larger than he had imagined.

It was at least more than two kilometers, because his spiritual power had been expanded to the extreme, but he still hadn't touched the boundary of the trial Pagoda.

From the outside, the trial Pagoda's first level should be the largest, and the higher one went, the smaller the area.

In theory, the second floor should be smaller than the first floor.

Chapter 3305 Tower of Trials "second floor (2)

However, the area that Xia ruofei's spiritual power could detect was already much larger than the first level of the trial Pagoda.

Xia ruofei took out his flying sword and stepped on it. He wanted to go to a higher place to see how big the second floor was.

As soon as he activated his sword technique, Xia ruofei realized that it was harder to fly on a sword than on the first floor.

Although it wasn't to the extent of being confined to the ground, the consumption of his mental power and vital Qi was several times higher than when he was on the first floor.

And after flying, it became much more difficult to control the flying sword.

It was as if the sword had suddenly become several times heavier. Xia ruofei was not used to it and even his posture became clumsy.

The forest was almost completely covered by tall trees, and the visibility was very low. Xia ruofei rode his sword to the top of the tree and looked around. He realized that the dense forest seemed to be endless.

Xia ruofei knew that there was a boundary to the trial Pagoda. However, the boundary was too big for him to see. Naturally, he did not know which direction to go.

But at least he was sure that the second floor of the trial Pagoda was much larger than he had expected.

Obviously, although the trial Pagoda was divided into many levels, they might not actually be in the same space. The size of each level that was seen from the outside was actually an error in estimation.

Xia ruofei lowered his flying sword and returned to the ground.

He didn't know why, but he felt uneasy in the air, as if something dangerous was spying on him.

Xia ruofei had felt this kind of danger a few times in his career in the Army. It turned out that his senses were quite sharp. Xia ruofei had faced a life – and – Death crisis a few times, and one of them was the time when Hu Zi had been sacrificed.

Hence, when the alarm went off, Xia ruofei immediately returned to the ground, fully alert.

At this moment, a voice was heard in Xia ruofei's mind. "Tower of Trials 2nd level mission, kill 100 middle level star beasts. [Mission description: there are 510 star beasts on the second floor. Among them, 300 are elementary, 200 are intermediate, and 10 are advanced.] Elementary star beasts were

equivalent to the strength of a Qi layer cultivator, and so on. Intermediate star beasts were equivalent to golden core stage cultivators, and advanced star beasts were equivalent to nascent Soul Stage cultivators. The current record for an Aurous core stage cultivator to pass the second level of the Tower of Trials is 2 hours. ”

Hearing this, Xia ruofei raised his eyebrows.

This time, the Tower of Trials was more straightforward in issuing the mission. It directly transmitted the mission requirements to his mind without arranging any other story or plot.

At the same time, Xia ruofei was full of admiration for the powerful cultivator who set up this trial Pagoda. Obviously, this powerful cultivator’s cultivation had reached a level that Xia ruofei could not imagine.

Of course, Xia ruofei was also curious and suspicious. He did not know what a star Beast was. He had a lot of cultivation books in his mind that came directly from the Jade talisman of inheritance, but none of them had any records of a Star Beast.

What the hell was this? Xia ruofei muttered to himself.

After the mysterious voice passed the message to Xia ruofei, a floating box of the mission progress appeared in Xia ruofei’s perceptual view. It showed 0/100 and a countdown timer appeared, starting from four hours.

Xia ruofei was also very curious about the Star Beast.

Of course, he soon got the answer. Yingying had just received the mission, and his mental power had sensed something approaching him from about two kilometers away.

Xia ruofei used his spiritual power to investigate and saw that the monster looked like a Badger on earth, but it was covered in hard scales and had a single horn on its head. The monster’s eyes were slightly squinted. When it opened its eyes, one could see Starlight flowing in its eyes, as if there was a bright Galaxy in its eyes.

Just as Xia ruofei’s spiritual power discovered this monster, a line of words appeared in his perception mirror: “, equivalent to the strength of a Qi cultivation Level 3.”

Seeing this, Xia ruofei’s spirit was lifted. He knew that this was a Star Beast.

In Xia ruofei’s eyes, a third Qi layer cultivator was too weak to withstand a single blow. However, Xia ruofei did not dare to let his guard down.

He sensed that this primary star Beast was running straight towards him. His expression suddenly became serious and he became fully alert.

Normally, a monster in the Qi refining stage wouldn’t attract Xia ruofei’s attention. However, he knew nothing about the second floor of the trial Pagoda. He also didn’t know if his strength would be greatly suppressed. Besides, there were also 10 star beasts that were equivalent to nascent soul cultivators. He didn’t know if they would appear at any time.

Moreover, when Xia ruofei was flying on his sword to the top of the tree, he felt a dangerous aura. It was very likely from a Star Beast. As for what level the Star Beast was, Xia ruofei had no idea.

He used the advantage of his spiritual power to carefully move his body, hoping not to encounter the astral beast.

However, Xia ruofei realized that as soon as he changed his position, the astral beast would change its direction accordingly and always approach Xia ruofei. This made Xia ruofei even more alert.

Could it be that this Star beast's perception was extremely sharp? To be able to lock onto a target from such a long distance wasn't something a Qi condensation cultivator could do, but a Star Beast could.

After a few attempts, Xia ruofei simply gave up on avoiding the Suan ni. It was just a Qi refining Star Beast anyway, so he might as well face it head – on.

After making up his mind, Xia ruofei advanced towards the Star Beast.

In a short while, the Star Beast with scales all over its body appeared in front of Xia ruofei.

After seeing Xia ruofei, the Star Beast didn't rush up to attack him. Instead, it stood in place and stared at Xia ruofei with its Starry Eyes.

Xia ruofei didn't rush forward either. He just stood there quietly. However, he had already taken out the qushuang flying sword. It was now floating beside him. The tip of the sword trembled slightly as it was pointed at the Star Beast. It was ready to launch a fierce attack at any time.

After a few seconds, the astral beast took a few more steps forward.

Xia ruofei immediately became alert. He controlled the qushuang flying sword and was about to stab forward.

At this moment, the astral beast, which was about five meters away from Xia ruofei, stopped again. It opened its mouth and spat out a Pearl. Then, it used its long mouth to push the Pearl in Xia ruofei's direction.

Xia ruofei couldn't help but be stunned. What was this?

Before he could react, the Star Beast had already turned around and ran towards the dense forest.

Xia ruofei hesitated for a moment. He didn't control the flying sword to chase after Tao Wu. After all, his mission was to kill an intermediate Star Beast. This was only a primary star Beast. Killing it wouldn't help him in his mission.

Moreover, the Star Beast's appearance was strange. Since it had left on its own, Xia ruofei would not act rashly.

The Star Beast quickly disappeared from Xia ruofei's spiritual perception range.

This made Xia ruofei even more fearful. If a beginner – Level Star Beast could be so fast, then wouldn't a golden core – Stage intermediate – Level Star Beast be even faster?

In this case, it would be somewhat difficult to rely on the crooked Frost Flying sword and the blue immortal sword to sneak attack and kill the middle – rank Star Beast.

Xia ruofei looked at the bead that the Star Beast had left behind and walked forward carefully.

The Star Beast's body language was very obvious. It wanted Xia ruofei to take the Pearl. It didn't seem like it was here to attack Xia ruofei, but to deliver something.

However, the Star Beast was Xia ruofei's main opponent on the second level of the trial Pagoda. Would the item it sent be dangerous?

If this was a scheme and Xia ruofei went up rashly and was ambushed by the Pearl, it would be a joke.

Xia ruofei tried to use the perceptual mirror to check the situation of the Pearl. He was just giving it a try. Unexpectedly, when he scanned it with the perceptual mirror, a line of information immediately appeared in Xia ruofei's vision ...

...

Chapter 3306 Elemental storage Pearl (1)

The information that appeared in the perceptual mirror made Xia ruofei slightly stunned.

Energy storage Pearl (reward for breaking the record on the first floor of the Tower of Trials)

Xia ruofei couldn't help but laugh. He had been nervous for half a day and it turned out that this was the reward for completing the first level of the Tower of Trials. He didn't expect the Almighty who set up the Tower of Trials to have such a bad taste and use such a method to give out the reward.

It was one thing for a Star Beast to deliver the treasure, but he had also announced the mission for the second level. Xia ruofei already understood that he had deliberately sent another star Beast to deliver the prize after killing 100 intermediate star beasts.

Xia ruofei did not suspect that the information provided by the perceptual mirror was fake. He continued to read the introduction of the elemental storage Pearl carefully.

It turned out that the elemental storage Pearl was used to store elemental energy.

Cultivators could transfer their vital Qi into the elemental storage Pearl and store it. This elemental storage Pearl could store all the vital Qi of an ordinary late – Stage golden core cultivator.

Although this function was simple, it was very practical.

Xia ruofei liked it very much. He was so happy that his eyebrows were raised.

Although he didn't lack cultivation resources, whether it was absorbing spirit crystals or origin crystals, he needed to cultivate in order to transform their energy into Origin Energy.

Therefore, if one consumed a lot of Yuan Qi in a fierce battle, there was no way to replenish it with spirit crystals or origin crystals. No one could cultivate while fighting.

On the other hand, the elemental storage Pearl stored the cultivator's own elemental energy. It could be directly absorbed and used, which was obviously much more convenient and fast.

Even though Xia ruofei was much stronger than the average Aurous core beginner stage cultivator, in terms of vital energy, he did not have much more than Chen Xuan and the rest. This elemental storage Pearl could store all the elemental energy of a late – Stage golden core cultivator. In other words, Xia ruofei would have to exhaust his elemental energy several times before he could fill the elemental storage Pearl.

As long as he carried the elemental storage Pearl, he could use the elemental energy inside at any time. It was equivalent to having a dantian that was several times larger, and he could use his elemental energy in battle without any worries.

Xia ruofei walked forward and picked up the energy storage Pearl. After observing it for a long time, he tried to inject some energy into it.

As expected, this wisp of Yuan Qi was easily absorbed by the energy storage Pearl and stored inside.

Next, he tried to use this strand of vital Qi. With a single thought, this strand of vital Qi was sucked out and reentered Xia ruofei's meridians.

Xia ruofei felt it carefully and realized that it was his own vital Qi. There was no sign of rejection at all. It had directly integrated into his dantian.

If Xia ruofei's elemental energy was consumed too much during a battle, he could directly absorb the elemental energy from the elemental storage Pearl.

"What a great treasure!" Xia ruofei couldn't help but exclaim.

He held the energy storage Pearl in his hand and muttered to himself for a moment. Then, he immediately used his mental power to examine it. After that, his figure flashed to his right.

The trial Pagoda's second floor was a forest terrain, and he quickly found a place that was easy to hide the spirit map scroll.

This was a very well – hidden small tree hole, and there was a large amount of grass outside. If he didn't use his spiritual power to investigate, he probably wouldn't have noticed it with his naked eyes.

Xia ruofei took out the painting from his palm and stuffed it into the tree hole.

Then, he camouflaged the surroundings of the tree hole and entered the medium.

Xia ruofei immediately appeared in the spirit map space.

The first thought that came to his mind when he obtained the elemental storage Pearl was to fill it with elemental energy.

Now that he had started the second level's trial mission, time was very precious.

In the first level's trial mission, he had broken the record and received the elemental storage Pearl as a reward. This reward made him extremely satisfied, so he naturally wanted to try and break the second level's record.

If he were to directly inject vital Qi into the elemental storage Pearl on the second level of the Tower of Trials, on one hand, it would waste a lot of time. Even if he used up all his vital Qi, he would not be able

to fill the elemental storage Pearl all at once. He would have to absorb the energy of the elemental crystals again and then continue to inject. On the other hand, the second level of the Tower of Trials was filled with the unknown to him, and was rather dangerous.

It was much safer to operate it in the spirit map space.

The most important thing was that it could save a lot of time.

The moment Xia ruofei entered the spirit map space, he called Xia Qing over and asked, "Xia Qing, have you prepared the medicine?"

Xia ruofei's shoulder was severely injured on the first level of the Tower of Trials. Although he had used a petal of the spirit Heart Flower at the first moment, he had not fully recovered.

He was about to complete the trial mission on the second floor, and he could foresee that the battle would be very intense. His injuries would definitely affect him, so he had to get rid of the hidden dangers first.

"It's done, master!" Xia Qing said respectfully. Then, she took out a small bottle of ointment and handed it to Xia ruofei with both hands.

Xia ruofei took the ointment and said with a smile, "You've worked hard, go do your work!"

"Yes! Master!" Xia Qing replied. Then, her figure flickered, and she returned to the mountain and sea realm in the spirit map space.

Xia ruofei took the ointment and set up the time array flag. Then, he entered the array flag's range.

This way, the difference in time flow between two to three thousand times allowed him to do many things with ease, while the time in the outside world would not be wasted.

Xia ruofei first applied the ointment on his injured area before he started to pour his elemental energy into the elemental storage Pearl.

Chapter 3307 Elemental storage Pearl (2)

The elemental storage Pearl greedily absorbed the elemental energy that Xia ruofei was releasing.

Xia ruofei kept transferring his energy into the energy storage Pearl.

When his vital Qi was about to be exhausted, he would sit down cross – legged and start cultivating to recover.

The spiritual Qi in this space was very dense. Xia ruofei did not even need to waste spiritual crystals or origin crystals.

Because the time flow in the time formation was very different from the outside world, Xia ruofei was not in a hurry. Naturally, he could not bear to use spiritual crystals and origin crystals, which were rare cultivation resources.

The spirit Qi in the Archean realm rapidly surged towards the time array flag. Due to the difference in the flow of time, a huge amount of spirit Qi was consumed per unit of time.

Fortunately, Xia ruofei did not usually cultivate in the interspace. Besides, the interspace had been upgraded so many times that the concentration of spiritual Qi was much higher than before. Hence, it did not affect the interspace much even if he cultivated once or twice.

Xia ruofei had used up all his elemental energy four times. Finally, on the fifth time, the elemental storage Pearl was filled to the brim before he could cultivate again to recover.

Xia ruofei held the energy storage Pearl in his hand. Although the energy storage Pearl did not become heavier after absorbing the energy, Xia ruofei still felt that this treasure was very heavy.

He gently tossed the energy storage Pearl and thought to himself that he would have enough energy to use this time!

After filling the energy storage Pearl, Xia ruofei was not in a hurry to leave.

He sat in the time formation and analyzed the situation on the second floor step by step.

First of all, Xia ruofei was almost certain that the ultimate Star Beast he was going to deal with was most likely a puppet.

He had already made this judgment when he saw the Star Beast uncharacteristically coming over to deliver something.

Xia ruofei didn't know if there was really a monster like the astral beast, but it was very obvious that the astral beast had obediently come over to give him the prize and didn't attack Xia ruofei at all.

If this was a real astral beast, it wouldn't listen to a human's command at all, let alone give away a prize.

Secondly, Xia ruofei felt that even though the star beasts were extremely fast, he should still try to use a sneak attack. He should try to kill a group of star beasts first to avoid being attacked by a group.

Xia ruofei used his spiritual power to check and found that there were no astral beasts in a two – kilometer radius.

Xia ruofei knew that it would not be easy to expect the Star Beast to come to him. He had to take the initiative to find it.

Otherwise, as time passed, it would be very difficult to break the record.

With this in mind, Xia ruofei decisively left the spirit map space and kept the spirit map scroll in his body.

After that, he randomly chose a direction and started to explore. Xi Jue had flown up to the treetops to investigate just now, but he didn't find anything. Thus, he could only try his luck.

In addition, he had felt his heart palpitate when he was at the top of the tree, so even though he was still searching forward on his flying sword, he had been flying close to the ground the whole time, and did not dare to rashly go higher.

He had a faint feeling that if he stayed in the air for a long time, he would be in great danger.

Xia ruofei controlled the qushuang flying sword and nimbly avoided the trees and other obstacles in the dense forest. He continued to explore forward.

The maximum range of his mental power was only about two kilometers.

After flying close to the ground for about three minutes, a Star Beast suddenly appeared in Xia ruofei's spiritual power domain.

His spirit was immediately roused, and he began to control the flying sword even more carefully. Without even making a sound, he quietly approached the Star Beast.

At the same time, Xia ruofei also used the perceptual mirror to check the Star Beast's condition.

As long as it was within the range of his spiritual power or vision, the perceptual mirror could detect specific information.

Xia ruofei used the perceptual mirror to scan and was immediately disappointed. Yingying was only a primary star Beast and would not be of any help in completing the mission.

However, Xia ruofei still decided to attack the Star Beast.

This was because no matter if it was an elementary Star Beast, an intermediate Star Beast, or even an even more powerful advanced star Beast, they were all the same species. Xia ruofei knew nothing about astral beasts. Although this beginner – Level astral beast could not improve his progress, it could give him some information.

Hence, Xia ruofei jumped off the qushuang flying sword and took out the blue immortal sword at the same time. He sneaked towards the primary star Beast in the forest.

That primary star Beast was completely unaware of the impending danger and was still wandering aimlessly in the jungle.

Xia ruofei only stopped when he was about ten meters behind the Star Beast. He held his breath and controlled the qushuang flying sword and the blue immortal sword to approach the Star Beast from both sides.

Immediately after, Xia ruofei used his spiritual energy to grab the blue travel immortal sword. The two flying swords shot out at the same time.

The Star Beast's reaction speed was very fast, and the soft sound of the flying sword breaking through the air immediately made it vigilant.

The Star Beast shook its head and saw a sharp sword light coming at it.

It immediately stomped on its hind legs, bringing with it a large mass of grass and mud. Its body suddenly rose into the air, and it leaped towards the depths of the forest.

However, it was already too late to escape.

Although the blue travel immortal sword controlled by his mental power missed, the flying sword controlled by his Sword Art nimbly drew an arc in the air, took a shortcut, and firmly stabbed the Star Beast's neck from the side.

Xia ruofei clearly felt the qushuang flying sword pause for a moment. With some difficulty, it pierced through the Star Beast's scales and then into its neck.

Blood spurted out, and the Star Beast let out a sorrowful cry. It suddenly fell to the ground, its two hooves desperately stomping on the ground, even digging out a few small pits.

After two minutes, the Star Beast finally stopped breathing.

Xia ruofei had successfully killed a primary star Beast, but there was no joy on his face. On the contrary, his expression was rather solemn.

First of all, a primary star Beast would not help him complete the mission, and there was nothing to be happy about.

Secondly, through this attack, Xia ruofei clearly felt that even if it was just a Star Beast at the beginning of the Qi refining stage, it was not easy to deal with. The Star Beast's speed and reaction were excellent. If Xia ruofei had not been so skilled in controlling the qushuang flying sword, the Star Beast would have escaped successfully.

It was only a beginner – Level astral beast, and Xia ruofei almost failed. What if it was the target of this mission, an intermediate – Level astral beast? They were definitely stronger than beginner – Level astral beasts in all aspects. Xia ruofei felt that he might not be able to kill intermediate – Level astral beasts with this kind of sneak attack.

Xia ruofei felt that he had to think of other ways. Otherwise, it would be difficult to complete the task, let alone break the record.

One must know that there were many high – Level star beasts of the original infant stage on the second level of the trial Pagoda. If it was not easy to kill mid – level star beasts and even attract high – Level star beasts, then Xia ruofei would be in deep trouble.

He frowned slightly and decided to continue searching.

He couldn't make a correct judgment just by looking at a primary star Beast, so he decided to try looking for a medium star Beast first. Only after dealing with a medium star Beast would he have a more intuitive judgment.

Before leaving the scene, Xia ruofei tried again, hoping to keep the Star Beast's body into the spirit map space.

...

However, his attempt still failed. The corpse of the Suan ni Star Beast couldn't be stored in a storage treasure.

This further confirmed Xia ruofei's judgment.

He had always thought that the astral beast was a puppet created by the Almighty being who set up the trial Pagoda, and now it seemed that it was true.

Since he couldn't collect it, Xia ruofei found a quiet place to hide the body.

After that, he continued his search.

After walking for another five minutes, Xia ruofei suddenly saw an intermediate Star Beast ...

Chapter 3308 Another strange path (1)

The encounter this time caught him off guard.

Xia ruofei and the Star Beast were stunned for a moment. Then, the Star Beast's eyes revealed a trace of ferocity. It growled and pounced at Xia ruofei.

Xia ruofei finally saw the middle – rank Star Beast and his spirits were lifted. He stepped on the bent Frost Flying sword and drew an arc nimbly. At the same time, he used his spiritual power to control the blue immortal sword to attack the middle – rank Star Beast.

To Xia ruofei's surprise, the intermediate Star Beast didn't Dodge and continued to charge at him.

The intermediate Star Beast and the blue immortal sword were both extremely fast, so in the blink of an eye, the blue immortal sword had already pierced the Star Beast's body.

Although Xia ruofei only used his spiritual power to grab the blue immortal sword and throw it at the intermediate Star Beast, the speed was still very fast. The flying sword even made a sound of breaking through the air. In addition, the blue immortal sword itself was very sharp. When Xia ruofei saw that the Star Beast was so easily pierced, he could not help but be happy and a smile appeared on his face.

However, his smile quickly froze.

When the blue immortal sword touched the body of the Star Beast, it did not Pierce into its body as Xia ruofei had expected. Instead, it made a sound of metal clashing. Xia ruofei even saw a few sparks. Then, the blue immortal sword shook violently and was bounced away.

The sharp blue travel immortal sword was thrown out by Xia ruofei at such a fast speed, but it did not even Pierce the scales of the middle – grade Star Beast.

The defense of this intermediate Star Beast was beyond Xia ruofei's expectations.

In fact, when he killed the beginner – Level astral beast, Xia ruofei had already felt that its skin was rough and thick. He didn't expect that an intermediate – Level astral beast would be even more abnormal. Its defense was several times stronger than that of a beginner – Level astral beast.

Xia ruofei didn't have much time to think about it since the intermediate Star Beast was already in front of him.

Xia ruofei decisively jumped off the qushuang flying sword and rolled on the ground, avoiding the middle – grade Star beast's aggressive attack.

In fact, the safest and most effective way to fly on a flying sword was to climb up quickly. However, Xia ruofei was still afraid of the sudden sense of danger when he went up to the top of the tree to investigate, so he would rather look more embarrassed and roll on the ground to avoid the attack of the intermediate astral beast than to climb up again.

Xia ruofei didn't blindly defend. As he rolled and dodged, he had already made a Sword Art and controlled the flying sword to attack the intermediate Star Beast.

It was obviously not powerful enough to use spiritual power to grab the flying sword. Hence, Xia ruofei decided not to use the blue immortal sword anymore. Instead, he focused on controlling the qushuang flying sword to fight with the middle – rank Star Beast.

The flying sword controlled by the sword Art was naturally much faster than the blue immortal sword. The faster it was, the more powerful it was. Moreover, when controlled by the sword Art, the flying sword seemed to be a part of his body, which made it many times more flexible than the blue immortal sword.

The qushuang flying sword let out a soft cry, and streaked across the air like a Phantom, stabbing toward the intermediate Star Beast.

The intermediate astral beast seemed to have realized the danger. This time, it didn't try to resist the attack with its body. Instead, it chose to Dodge.

In this way, the intermediate Star beast's attack on Xia ruofei was interrupted, and Xia ruofei's passive situation was alleviated.

After he rolled on the ground to avoid the intermediate astral beast's attack, he immediately stood up, turned around, and ran toward the intermediate astral beast.

The flying sword of the bent frost was like a butterfly flying through the flowers, circling around the middle – grade Star Beast and launching fierce attacks from time to time.

Xia ruofei also used his palms and the qushuang flying sword to attack the intermediate Star Beast.

In a short while, the situation was completely reversed. The intermediate Star Beast had no chance to attack anymore. It was focused on defending against Xia ruofei's attacks.

However, Xia ruofei soon frowned. Not only was this intermediate Star beast's defense extremely strong, but it was also extremely fast and agile. Even though the gentleman sword technique he used was very exquisite, and he also took the risk to attack in close range, not many attacks actually landed on the Star Beast's body. Moreover, they almost didn't cause any damage, only leaving a few superficial wounds.

What happened next was beyond Xia ruofei's expectations. The intermediate Star Beast did not fight to the death with him. Instead, it fainted and ran away.

Xia ruofei didn't notice it, and the Star Beast was fast. By the time he reacted, it was too late to pursue.

Xia ruofei watched as the Star Beast quickly disappeared into the forest. He controlled the qushuang flying sword to chase after it for more than a hundred meters. Seeing that it was impossible, he simply gave up.

Xia ruofei punched the tree beside him dejectedly.

It was really an unfavorable start!

The mission required them to kill 100 middle – rank astral beasts, but the first one they encountered was already so difficult. They had been busy for half a day, but it had actually escaped!

Xia ruofei could not help but feel a headache. For a moment, he was actually at a loss.

He couldn't think of how the record – breaking predecessor had done it.

According to his speculations, he was at the Golden core stage, so the mission requirement was to kill intermediate star beasts. If a nascent soul cultivator entered here, he would probably be asked to kill high level star beasts.

In other words, no matter if the record – breaking expert was at the Qi refining stage, the Golden core stage, or the original infant stage, the difficulty of his task would definitely not be lower than Xia ruofei's.

Xia ruofei found it hard to imagine that under such difficulty, he could actually kill 100 star beasts of the same level as him in four hours.

However, Xia ruofei did not have the time to think too much about it. He knew that he could not stay here any longer.

He couldn't guarantee that the escaping intermediate astral beast wouldn't call for help. If the astral beasts decided to group up, even if it wasn't a high – Level astral beast, he wouldn't be able to stand a group of intermediate astral beasts!

After Xia ruofei had fought with this intermediate Star Beast, he had a rough idea in his heart. If he was surrounded by many intermediate star beasts, he would not be able to escape without using the spirit map scroll because they were too fast.

Hence, Xia ruofei immediately cast aside all distracting thoughts and left the place on his flying sword.

He didn't have a specific target. He randomly chose a direction and flew on his flying sword while sticking close to the ground.

Of course, during the process of moving, Xia ruofei still maintained his spiritual power to the maximum range to explore the surrounding situation to avoid being surrounded by the star beasts.

This forest seemed to be very large. Xia ruofei flew on his flying sword for 20 to 30 miles, but he still did not encounter any star beasts.

Xia ruofei had just gone through a fierce battle. Then, he had to fly on his sword at full speed and nimbly avoid all kinds of obstacles in the forest. He had used up a lot of his energy.

He was already dozens of miles away from the place where the battle had taken place. He thought for a while and stopped to rest. At the same time, he had to think of a suitable way as soon as possible to realize that it would be difficult to complete the mission with just courage.

Hence, Xia ruofei jumped off the flying sword and searched the nearby area carefully. After making sure that it was safe for the time being, he walked to a big tree and sat down. He took out a bottle of spirit pool water from the spirit map space and drank it in big gulps.

After that, he sat under the tree to rest and recover while thinking of countermeasures.

Now, it seemed that this mid – grade astral beast had almost no weakness.

It was fast, had high defense, and its attack power was not weak.

If he wanted to kill the Star Beast, he had to make sure that it wouldn't run away. Otherwise, if the Star Beast was determined to escape, he really wouldn't be able to keep it.

Xia ruofei's mind was spinning, and soon two words flashed in his mind.

If he wanted to kill the Star Beast quickly, it seemed that he would have to use the help of array Dao.

Xia ruofei had obtained many precious array books from the Jade talisman of inheritance. In addition, he often drew array talismans to set up various arrays. He had rich practical experience. It could be said that his array skills had reached a higher level.

Xia ruofei's brain worked quickly and he quickly came up with a plan.

...

A set of trap and kill array blueprints had already been outlined in his mind.

This wasn't a finished product. Xia ruofei had combined his knowledge of arrays with the large amount of array blueprints he had in his mind and the actual situation of the Star Beast to create a temporary array.

Xia ruofei simulated the formation in his mind twice and did not find any obvious problems. He immediately took out a jade talisman and began to draw the runes. He had stored quite a number of high – Quality blank Jade talismans in the spirit map space and they could be put to use this time.

This trap & kill array was not very complicated and Xia ruofei was very familiar with the process of carving talismans. Hence, in less than half an hour, he had finished carving all the talismans he needed. However, he made two mistakes in the middle and broke two blank Jade talismans. Other than that, everything went smoothly.

Although he had spent about half an hour, sharpening a knife would not delay the work of cutting wood. If he could increase the probability of killing the Star Beast, then this half an hour would be worth it.

However, Xia ruofei was still facing another problem. This trap and kill array could not be set up just by using a few Jade talismans with formation patterns. It also required specific supplementary materials to be set up in different positions.

In other words, he couldn't immediately cast the array talisman to form the array in an instant when he encountered a middle – rank Star Beast. Instead, he had to set up the array in advance.

However, the forest seemed to be boundless and the probability of encountering a mid – grade astral beast was not high. Xia ruofei could not set up a formation in advance, or he would be waiting for the rabbit.

Xia ruofei frowned. Suddenly, his eyes lit up as he thought of the Star Beast that had just escaped.

If that astral beast was really going to get reinforcements and come back for revenge, wouldn't there be a ready – made ambush spot? As long as the formation was set up in the vicinity, there was a chance to encounter a medium star Beast, and it was likely that there would be more than one star Beast.

Thinking of this, Xia ruofei seemed to see the hope of breaking the record and completing the task!

...

Chapter 3309 please enter the jar (1)

Xia ruofei quickly put away the materials and took out the curved Frost Flying sword. He turned back in the direction he had come from.

The forest was very dense. If it were an ordinary person, they would have lost their way long ago. However, Xia ruofei had a strong memory and had the help of his strong mental power. In addition, he was not far from the place where he had encountered the Star Beast in a straight line. Hence, in a short while, Xia ruofei had quietly sneaked into the vicinity.

He didn't return to his original spot directly, but at a position about two hundred meters away, he first carefully used his spiritual power to investigate, and then began to set up the array.

Although this trap & kill array was not his original creation, it was indeed something that no one had ever used before. It could be considered as an improvement and combination based on the foundation of the predecessors. As for the specific effect, he was actually not particularly confident in his heart.

However, based on his understanding of arrays, he more or less had an idea of the power of this trap and kill array.

He felt that as long as they didn't encounter any high – Level star beasts or dozens or even hundreds of middle – grade star beasts, this trap & kill array wouldn't be easily broken.

Xia ruofei skillfully set up the formation and then quietly lay in the forest. He maintained the maximum range of his spiritual power and carefully observed the surrounding situation.

In fact, Xia ruofei was also taking a gamble. He was betting that the intermediate astral beast that had escaped would come back for revenge.

If that intermediate Star Beast were to escape, Xia ruofei would be wasting his time here.

After all, if he wanted to break the record, he had to race against time.

However, Xia ruofei still believed in his own judgment. Since this mid – grade astral beast knew how to run away when it couldn't win, it was obvious that it had a high IQ. It was only natural for it to call for help and seek revenge. After all, from the contact just now, it could be seen that this mid – grade Star Beast was quite courageous. It could even use its body to withstand the flying sword. It was unlikely that it would be scared and run away, never to come back.

However, as time passed, Xia ruofei could not help but feel anxious.

Fortunately, he didn't wait too long. After hiding in the forest for more than ten minutes, there was movement at the edge of his spiritual power detection range.

Xia ruofei's spirits were lifted. He continued to maintain the maximum range of his spiritual power and focused on the direction of the movement.

Soon, Xia ruofei used his spiritual power to detect that the Star Beast that had just escaped had appeared in the range of his spiritual power. Behind this Star Beast, there were fifteen or sixteen other star beasts.

Xia ruofei's eyes brightened. After scanning with his spiritual force, a dense amount of information appeared in his perception mirror. He glanced at it but did not find any information about the high – Level astral beast. He was overjoyed.

Including the Star Beast that had escaped earlier, there were a total of 16 intermediate star beasts.

If Xia ruofei had not prepared the trap and kill array in advance, he would have fled without hesitation when he encountered such a lineup.

But now, the formation hidden in the forest behind him gave him a lot of confidence.

The only problem now was how to lure all 16 intermediate star beasts into the trap and ensure his own safety. After all, if all 16 extremely fast intermediate star beasts attacked him at the same time, Xia ruofei would not even have the chance to defend himself.

In fact, if he didn't have the spirit map, he wouldn't even be able to escape.

Xia ruofei already had a plan in mind. He did not rush to meet them.

Firstly, he was too far away from the formation, and his safety could not be guaranteed.

Secondly, he had already discovered that these star beasts had relatively high intelligence, even higher than the human – shaped puppets on the first floor of the trial tower. If he knew that there was a large wave of star beasts coming, but he didn't run for his life and instead faced them head – on, this kind of abnormal behavior might cause the star beasts to be on guard.

Besides, Xia ruofei wasn't worried that the astral beast would leave so easily. The fleeing astral beast had called so many reinforcements. With such a big formation, it was obvious that they wouldn't give up until they found him. According to common sense, Xia ruofei couldn't possibly stay in the same place all the time. Hence, he judged that the astral beasts would definitely spread out to search for him. Once they found him, they would immediately call for their companions to surround him. His current position was definitely within the search range of the astral beasts.

Hence, Xia ruofei decided that biding his time was the best choice.

He was quietly hiding in the forest, his mental power always covering the group of star beasts.

To be honest, seeing such a large group of star beasts slowly approaching him, Xia ruofei still felt some pressure in his heart. However, he was more excited. This feeling was very similar to when he was in the Army and watched the enemy's small troops walk step by step into the enemy's encirclement through the scope of his sniper rifle. Although his heart would more or less beat faster, it was more like his blood was boiling. At the same time, he could still maintain absolute calmness. His finger on the trigger did not move at all.

Xia ruofei was like that now. He lay on the ground and completely hid himself under the tall grass. He mainly used his spiritual power to investigate, so he didn't need to care if his vision was blocked.

In fact, mental power could detect almost 360 degrees without any blind spots, which was much larger than the field of vision with the naked eye, and less likely to make mistakes.

Soon, the 16 star beasts arrived at the place where Xia ruofei had fought with the star beasts.

They were not surprised to not find any trace of Xia ruofei. Instead, they quickly spread out in a fan – shaped formation and began to search the front. They seemed to be well – trained.

However, these star beasts did not expect that their every move was under Xia ruofei's surveillance and that they were walking step by step into Xia ruofei's carefully laid trap.

As the star beasts got closer and closer to Xia ruofei, his expression became more and more serious. He held his breath and did not dare to relax for even a moment as he used his spiritual power to detect the position of the star beasts.

When the astral beast that was searching for Xia ruofei's hiding place was about a hundred meters away from him, Xia ruofei pretended to notice it.

Of course, he did not panic to the point of standing up and running away. As the saying goes, too much is as bad as not enough. After acting, it would no longer be real.

Xia ruofei deliberately made a little noise and then ran in the direction of the formation.

Although there wasn't much movement, a slight shake in the grass immediately alerted the Star Beast.

Its sharp eyes scanned the area and immediately found Xia ruofei who was running away in the grass.

The Star Beast immediately stomped its hind legs and its body streaked across the air like a Phantom, chasing after Xia ruofei.

At the same time, it let out a sharp howl. The astral beasts that were searching nearby stopped in their tracks and surrounded Xia ruofei.

After Xia ruofei made a big commotion, he did not stop at all. Without hesitation, he flew in the direction of the formation.

After being discovered by the Star Beast, he didn't even bother to hide his body. He stood up and stepped on the flying sword of the warped Frost, flying close to the ground.

In terms of absolute speed, Xia ruofei was definitely not as fast as the Star Beast. However, if he were to ride a flying sword, the Star Beast would not be able to catch up to him in a short time, no matter how fast it was.

Hence, Xia ruofei was soon followed by a large group of star beasts. Everyone was moving at their maximum speed. One was chasing while the other was running. The short distance between Xia ruofei and the array was covered in the blink of an eye.

After Xia ruofei passed through the array, he did not hesitate to cast a few spells. Three spiritual energy seals with mysterious patterns flew into the grass and the array that had been set up was activated in an instant.

These 16 star beasts didn't seem to be aware of it as they charged into the range of the formation.

In fact, Xia ruofei had already stopped and turned around to look at the star beasts that were chasing after them.

However, as soon as these star beasts entered the formation, they immediately lost their target. The area in front of them suddenly turned white, and their visibility was less than a meter. They were surrounded by thick white fog.

These star beasts had probably never seen the array of human cultivators before, so they all started to run around in circles like headless flies.

The star beasts were also hot – tempered, and after they found themselves trapped, they also launched their strongest attacks towards their surroundings.

However, this trap and kill array obviously couldn't be destroyed by brute force. In fact, most of the star beasts' attacks fell on empty space, and only a few of them hit the base of the array talismans. However, because the array was interconnected, such an attack was equivalent to being evenly borne by the entire array, and it didn't hurt at all.

Some of the astral beasts couldn't see their surroundings at all, so their attacks even landed on their companions. In an instant, three astral beasts were accidentally injured by their companions, and they let out angry roars.

This was also the reason why Xia ruofei felt assured when he detected that there were no high – Level astral beasts in the Horde.

...

If a high – Level astral beast's random attack hit the key part of the formation, there was a chance that it would damage the formation. However, there was no need to worry about this group of middle – Level astral beasts. If this level of attack landed on Xia ruofei, it might break his bones. However, when it landed on the formation, the seemingly fierce attack would be no different from scratching an itch after it was shared by the entire formation.

If he was not in a hurry, Xia ruofei could have just watched the show from the side.

However, if he wanted to break the record, he naturally had to end the battle quickly. Therefore, it was meaningless to just trap these star beasts here.

Other than trapping the enemy, the deathtrap array naturally had a killing move.

Xia ruofei didn't waste any time. After making sure that all the 16 star beasts had entered the trap, he immediately cast a spell and threw a few more seals into the center of the array.

The formation that was originally just a dense fog, after the activation of the seal technique, immediately underwent a violent change.

Chapter 3310 A team wipe (1)

The astral beast that had fought with Xia ruofei was also trapped in the formation. As it was the one who had called its partner over to seek revenge, it was also the one who charged the fiercest. Correspondingly, it was also the one who was the deepest in the formation.

This Star Beast had been accidentally injured by its companion just now. It was caught off guard and its back was ruthlessly clawed by another star Beast. Although star beasts had rough skin and thick flesh, the attack from a Star Beast was also very heavy, so it had suffered a lot this time. The softest part of its waist had been scratched open, and blood gushed out.

The astral beast roared in anger. It stomped its two hooves on the ground and charged into the mist as fast as lightning.

At this moment, it had already lost its mind and wanted to use brute force to break the formation.

At this moment, Xia ruofei used a seal to activate part of the array's function. A black light flashed through the fog and shot straight at the Star Beast.

The astral beast had lost its mind, and at the same time, it was in the fog with extremely low visibility, so its ability to sense danger had been greatly reduced. In addition, the black light was silent, so it was completely unaware of it and was directly hit by the black light from the side.

With a bang, the black light disappeared into the Star Beast's body.

The Star Beast's forward – charging figure suddenly froze. Then, it let out a shrill scream, and a finger – sized hole appeared on its body.

The attack of the formation was not limited to this. After the black light hit the body of the Star Beast, the glossy fur on the Star Beast's body suddenly burst into flames. It rolled on the ground in pain, causing the nearby weeds and shrubs to fall.

Although the Star Beast kept rolling on the ground, the flames were like maggots in its bones. Not only did they not extinguish, but they also grew stronger and stronger, and the smell of roasted meat even filled the air.

Xia ruofei, who was standing outside the formation, was amazed. He could basically tell that these star beasts were man – made puppets. However, they were extremely realistic. The materials used to make these star beasts even had the smell of roasted meat after burning ...

After a while, the Star Beast's screams gradually weakened, and finally, there was no more sound.

It would never have thought that it would bring its companions to encircle Xia ruofei in such a menacing manner, only to catch a glimpse of Xia ruofei's back and then lose its life in this formation.

When the astral beast finally quieted down, Xia ruofei's perceptual mirror finally showed a change in the mission progress. It was 1/100.

Xia ruofei was overjoyed. Although it had been a long time since he had entered the second floor of the Tower of Trials, it was still a good start.

Moreover, the remaining 15 star beasts in the formation were also in deep trouble. It was only a matter of time before they became Xia ruofei's number on the mission progress.

Almost at the same time that the first Star Beast was attacked, the other star beasts were also attacked by the terrifying black light.

Some were lucky enough to avoid the attack, but most of the star beasts were not spared. The only difference was that some of the star beasts were directly penetrated by the black light, while some only had a few scratches.

Of course, the result would be the same. The most terrifying attack of the black light was not the penetrating injury, but the inextinguishable flames that would erupt after coming into contact with the Star Beast.

Therefore, even the star beasts that had their skin scratched were ignited in flames after a short time.

This flame looked a little pale, but it was extremely hot. Most importantly, no matter how the star beasts rolled on the ground or crazily rubbed against the tree stump, it was of no use. One star Beast was even lucky and directly rolled into a small pool, but it still couldn't change its fate of being burned to death.

The Star Beast's body was in the water, but even so, the flames were still burning under the water, as if it didn't need any oxygen to support it.

In this round, a total of ten astral beasts were hit by this sudden attack. The mission progress in Xia ruofei's perception mirror had become 10/100.

The remaining six star beasts were like birds startled by the mere twang of a bow, and they were running around in circles like headless flies.

This formation only blocked the line of sight. At the same time, it used some mysterious formation patterns to create an illusion for the targets inside the formation. They thought that they were moving in a straight line, but in fact, they were running around in circles.

However, the formation did not isolate sound.

Therefore, the six surviving star beasts could clearly hear the terrifying screams of the other star beasts inside the array.

As a result, they were naturally even more nervous, because no one knew when the disaster would suddenly befall them, and then they would die in screams like their companions in front of them.

However, they didn't dare to charge out, and they were also worried that they would trigger a more powerful formation, making it even more difficult to escape.

Fortunately, Xia ruofei didn't let them struggle for too long. He made a hand seal and controlled the array again.

The formation's attack was so powerful because, on one hand, it was very intricately designed. On the other hand, there was enough spiritual Qi to support Xi Jue in killing the ten star beasts. Xia ruofei had also paid the price of a hundred spiritual stones.

However, considering how difficult it was to deal with the Star Beast and how important the mission was, it was worth it to use these 100 spirit stones.
