

God tier Farm 3351

Chapter 3351 Thousand illusionary array (3)

However, Xia ruofei did like the terrain.

At least, it wasn't as complicated as the forest. One could see far away from here.

After the battle with the Shen beast, Xia ruofei could confirm that spiritual detection was not omnipotent. Many monsters with higher cultivation than him or even similar cultivation to him could hide their aura very well.

In such a situation, it was very important for one's vision to be unobstructed.

In such an environment, Xia ruofei could at least detect that something was wrong and respond to it before danger came.

If they were in the forest, they would often be caught off guard and respond in a hurry.

After looking around, Xia ruofei did not find any danger.

Of course, he wasn't so lucky that he would be teleported to the same place as his companion.

In his field of vision, he did not see anyone at all, not even a shadow.

The mission for the trial Pagoda's fourth floor had not been released yet.

Xia ruofei looked around. Every direction looked the same and the scenery was the same. It was all a desolate scene.

He could only choose based on his feelings.

Xia ruofei immediately took out the qushuang flying sword and casually threw it into the air. Then, he let the flying sword fall to the ground.

When he couldn't determine which direction to go, Xia ruofei could only use his flying sword to make the decision. It was similar to throwing his shoes.

The tip of the qushuang flying sword was pointed right in front of Xia ruofei.

Xia ruofei nodded. His right hand grabbed at the air and the qushuang flying sword immediately floated in the air.

Then, Xia ruofei stepped on his flying sword and flew in the direction the hilt of the sword had pointed to. It was the exact spot behind where he had been standing.

Initially, Xia ruofei wanted to choose the direction of the sword tip. However, he changed his mind and thought, "why not do the opposite?" Perhaps he could immediately find the companion who had come here randomly!

In fact, there was no difference in the direction of the sword tip and the hilt. To Xia ruofei, he did not know what was waiting for him in front, so he might as well take the initiative to look for it.

Xia ruofei stepped on his flying sword and flew close to the ground.

The qushuang flying sword carrying Xia ruofei brought along a whistling sword wind and rapidly advanced about a foot above the ground.

The wilderness seemed to have nothing but camel's thorns, so Xia ruofei could fly freely without having to worry about avoiding obstacles.

Just as he was about ten kilometers away, a line of words suddenly appeared in the perceptual mirror: The fourth level of the Tower of Trials mission has begun!

Xia ruofei quickly stopped and carefully read the details of the mission on the fourth level.

On the mission bar in the field of vision of the perceptual mirror, there was a line of words: "the trial tower's fourth level mission." The difficulty of the mission will be determined by the cultivation of the companion who will be randomly sent to this small space with you and your own cultivation. The higher the cultivation, the higher the difficulty. The number of missions will be doubled.

This way of determining the mission was exactly the same as the third level of the Tower of Trials. Hence, Xia ruofei did not study it in detail after a quick glance.

The next section was the specific content of the fourth level's trial mission. The time limit for breaking the record was four hours, and the time limit for completing the mission was twelve hours. If the mission was not completed within the time limit, it would be judged as a failure. Regardless of whether the mission was completed or not, the time limit for staying on the fourth level was twelve hours. If the time limit was exceeded, the person would be forcibly teleported out of this space.

Chapter 3352 Out of expectation (1)

When Xia ruofei saw the mission notification, he suddenly felt a sense of pressure.

The missions on the previous levels only had a standard, but there was no time limit. If they wanted to break the record, they had to race against time and complete the task within the time limit. However, if they only wanted to complete the task, they could actually slow down the pace a little.

In other words, unless one died in the process of the mission, one could continue to complete the mission until it was completed.

However, on the 4th level of the trial Pagoda, the missions started to have a time limit.

Twelve hours, that was twelve hours.

No matter how successful the mission was, Xia ruofei would only be able to stay in this trial space for 12 hours.

The mission this time was no longer to kill monsters, but to collect items.

Xia ruofei did not know what the yellow jade essence was. However, according to the rules, even if Ling Qingxue or one of the other Qi refining cultivators was randomly sent over, the number of tasks would be measured according to Xia ruofei's strength and would double on that basis.

In other words, it was not easy to collect five hundred pieces of yellow jade essence.

Not to mention breaking the record, if he could not collect enough Topaz essence within twelve hours, it would mean that he had failed the mission and Xia ruofei would be teleported out of this trial space.

Then this trip to the trial Pagoda would come to an end.

Xia ruofei and the rest had gone through a lot to reach the moon and find this secret realm. The Tower of Trials was obviously the most important place in this secret realm. If they gave up halfway, they would not be able to gain much from this secret realm.

Xia ruofei saw that after the mission was announced, a countdown had appeared on the top of his perceptual mirror. In other words, the countdown had already started as soon as the mission was announced. No matter how the mission was completed, Xia ruofei's journey to the fourth level of the Tower of Trials would end in twelve hours.

He immediately felt a mountain of pressure.

Xia ruofei stepped on the qushuang flying sword and flew in the direction he had chosen earlier. At the same time, he was scanning a large area with his spiritual power. He was in the dark and had no idea what the yellow jade essence was, so he could only search blindly while riding his flying sword.

Speaking of which, Xia ruofei had an advantage over ordinary cultivators. After all, he could ride a flying sword and his speed was much faster than the other cultivators.

However, Xia ruofei stopped after flying for a short while.

It wasn't that he had encountered any danger. On the contrary, this wasteland was extremely calm, and there was nothing wrong at all.

Xia ruofei saw some changes in his perceptual mirror.

Just like the first floor of the Tower of Trials, a map appeared in the field of vision of the sensory mirror, and the range was getting larger and larger, as if it was going to cover the entire fourth floor of the Tower of Trials.

This was the first time Xia ruofei had encountered such a situation. On the second and third floor of the Tower of Trials, the sensory mirror could not display the entire map because of the large space. Only the places that Xia ruofei had walked past would be displayed on the map.

By right, the fourth floor of the Tower of Trials shouldn't be showing all the maps!

Xia ruofei watched as the map in his perceptual mirror expanded.

Immediately after, he noticed that golden dots of light had appeared on the map one after another. Some of the dots were quite far apart, while some were simply several dots of light gathered together.

In a short while, the dots of light on the map were like stars, almost covering the entire map.

An idea popped up in Xia ruofei's mind. Could these light spots represent the Topaz essence?

He quickly felt that this idea was too crazy. If it was really like this, then what kind of difficulty would this trial Pagoda's fourth level mission have?

No matter what, with such a strange situation happening, Xia ruofei would definitely ask for verification.

On the map of the perceptual mirror, he was a blue circle of light with an arrow on it. When he turned his body, the arrow would also turn, similar to walking navigation.

Hence, Xia ruofei found the spot of light closest to him, changed his direction, and flew over on the qushuang flying sword.

The map showed that it was not far away, but Xia ruofei still flew for more than two minutes before he reached the spot of the light.

There was nothing in this position, not even a camel's thorn.

Xia ruofei muttered to himself. He felt that the spots of light in the perceptual mirror were not random. Since there was nothing on the ground, he would dig down and take a look.

It was mostly saline – alkali land. However, for a cultivator like Xia ruofei, digging a Hole in the Rock was not a difficult task.

Xia ruofei took out a shovel from the space and started to dig at the spot of light indicated on the perceptual mirror map.

He used a wisp of Yuan Qi and waved the military shovel like it was flying. The soil was thrown to the side.

In a short while, he had dug out a hole that was 20 to 30 centimeters deep.

Xia ruofei did not continue digging because there was a hexagonal crystal – like object with a light yellow color at the bottom of the pit.

He used a shovel to dig away the soil around the yellow crystal, then reached out and gently dug out the yellow crystal from the pit.

Chapter 3353 Out of expectations (2)

Just as Xia ruofei was about to use his spiritual power to examine the light yellow crystal, he realized that the real – time mission completion status in his perception mirror had changed.

1/5

Xia ruofei was stunned for a moment. He looked at the light yellow crystal in his hand and couldn't help but Mutter to himself, ""You're the yellow jade Spirit? You've completed one?"

Xia ruofei couldn't believe it, but his rationality told him that the yellow jade essence in his hand was real. When he picked up the light yellow crystal, his companion who was randomly sent to this small space happened to find a yellow jade essence. The probability of this happening was too low.

The difficulty of the fourth level of the Tower of Trials was beyond Xia ruofei's expectations.

Not only were there no monsters guarding the area around the yellow jade essence, but it was also easy to dig it out. Most importantly, Xia ruofei's sensory mirror had already marked the distribution of the yellow jade essence in detail. Xia ruofei only needed to follow the map.

Xia ruofei almost laughed out loud. How could such a difficult task need four hours to be completed? Even if the mission requirements were doubled, it shouldn't have taken so long!

Could it be that breaking a record was a very simple matter?

Xia ruofei thought for a moment and guessed the reason. He had obtained the Kasaya perceptual mirror by chance. Other cultivators who had made it to this level might not have one. Without the help of the perceptual mirror, the location of the yellow jade Spirit would not be directly marked on the map. It would not be so easy for them to complete the task.

In that case, this record – breaking reward should have been picked up for free.

However, Xia ruofei still needed to confirm.

What if the mission progress was really completed by another companion who was randomly sent to this space, and the light yellow crystal in his hand was not the Topaz essence? wouldn't he be happy for nothing?

Hence, Xia ruofei immediately followed the instructions on the perceptual map and flew towards the next golden light spot on his sword.

This light spot was closer and Xia ruofei's flying sword was very fast. Hence, he arrived at the light spot on the map in less than a minute.

Xia ruofei jumped off the flying sword and started to work with the shovel without a word.

After a while, another pale yellow crystal with a hexagonal shape appeared in front of Xia ruofei.

He reached out his hand and grabbed the light yellow crystal in his hand.

At that moment, Xia ruofei's attention was focused on the small mission bar in his perceptual mirror.

The moment his hand touched the crystal, the progress bar jumped to 2/500!

"Yay!"

Xia ruofei, who had always been steady, could not help but jump in joy.

He looked at the two Topaz essence in his hands. He could now confirm that they were Topaz essence. He was grinning from ear to ear.

If the first time could be a coincidence, then the probability of a coincidence happening again this time could be ignored.

Hence, Xia ruofei was no longer worried about the mission.

Unless there was a terrifying monster in this trial space that would waste a lot of time, according to the distribution of the Topaz essence on the map, he would be able to complete the task in less than an hour. He could see through the scope that there were many places with large golden light spots connected together. In other words, there should be many Topaz essence distributed there, which would save him a lot of time on the road.

Xia ruofei thought to himself, "For this trial mission, the record was definitely going to be broken, and it was very likely that it would become an unattainable record. In the future, if others had the opportunity to enter the Tower of Trials, it would be impossible for them to break the record of this level.

This is called walking one's own path and leaving others with no path to walk!

Xia ruofei was not even in a hurry to go to the next spot to dig for the Topaz essence. He carefully observed the two pieces of Topaz essence in his hand, his eyes full of curiosity.

What was the consideration of the great expert who designed the mission? What was the use of collecting this yellow jade essence?

Xia ruofei decided to spend some time to study the yellow jade essence. This would also leave a chance for those who came later to break the record!

Xia ruofei first tried to put the yellow jade essence into the spirit map space.

As expected, the attempt failed.

Xia ruofei thought to himself, "it seems that this is also a mission item. I can't take it away when the mission ends, so I can't put it in my storage space."

Of course, there was another possibility. The material of this yellow jade essence was very special and could not be stored in storage magic weapons.

Xia ruofei then tried to use his spiritual power to check if he could find out the internal structure of the Topaz.

He actually didn't have much hope.

It was obvious that the mighty figure who designed the mission was much stronger than him, a golden core cultivator. After killing the puppets, star beasts, and Shen beasts, not only could they not put their bodies into the spirit map space, but there was also no result when he used his mental power to investigate.

However, Xia ruofei did not expect that his spiritual power would successfully explore the interior of the Topaz.

However, before Xia ruofei could sense the internal structure of the yellow jade essence, there was a sudden change.

An extremely pure energy appeared within the yellow jade essence and directly entangled with Xia ruofei's spiritual energy.

This surprised Xia ruofei. He could feel that the pure energy seemed to come from the same source as his mind power, and the two immediately entangled with each other.

He quickly retracted his mental power, but in such a short moment, the Topaz Essence's gloss seemed to have dropped a lot.

Xia ruofei did not care about the condition of the Topaz. He was nervously looking into his sea of consciousness.

After the mental strength returned to his sea of consciousness, Xia ruofei immediately caught its trace. It seemed to be different from other mental strengths. It was obviously much stronger than the same mental strength.

Xia ruofei was stunned. Could it be that ... The Topaz essence could increase one's spiritual power?

With the perceptual mirror in his hand, he could accurately find the location of the yellow jade essence. Even if the yellow jade essence was destroyed, it would not affect him from breaking the record.

Hence, Xia ruofei decided to control this spiritual force and explore the inside of the Topaz essence again.

This time, Xia ruofei was fully focused on the situation inside the Topaz.

When his mind power entered the yellow jade essence, another wave of extremely pure energy immediately entangled him.

This time, Xia ruofei did not try to stop it. Instead, he allowed the energy to entangle his spiritual power.

One wave, one wave, and another wave ...

There were no less than eight streams of energy that directly entangled the wisp of mental energy from the inside of the yellow jade Spirit.

Xia ruofei could clearly feel that when he tried to use his spiritual power to grab objects, it was much more effective. This small wisp of spiritual power was usually impossible to do telekinesis, but this time, he used the strengthened wisp of spiritual power to easily lift up the table he used for his experiment.

When the ninth energy completely entangled with Xia ruofei's mental strength, cracks began to appear on the surface of the Topaz essence. The cracks grew bigger and bigger until the Topaz essence turned into a pile of lusterless gravel.

...

Xia ruofei flipped his hand and the pile of gravel landed on the wilderness.

Then, he took a look at the vision of the perceptual mirror and found that although one Topaz essence had been used up, the mission progress had not changed. It was still 2/500.

"I can't believe there's such a good thing ..." Xia ruofei muttered to himself.

Since consuming the Topaz essence could strengthen one's mental strength and would not affect the mission progress, Xia ruofei naturally did not hold back.

He immediately sent his mental energy into another Topaz ...

Chapter 3354 A great harvest (1)

After a while, the energy in the second piece of Topaz essence had been completely absorbed. Xia ruofei threw away the crushed Topaz essence in his hand and glanced at the perceptual mirror. Indeed, the mission progress had not changed because the Topaz essence had been consumed. It was still 2/500.

Xia ruofei could not help but click his tongue in wonder. Although the Topaz essence could not be stored in the storage space, it could be absorbed directly and was of great help to the cultivator's spiritual power.

Xia ruofei did some calculations. After absorbing two Topaz essences, his spiritual power had increased by about one – thousandth.

Although one – thousandth sounded insignificant, Xia ruofei's spiritual power cultivation was already at the level of a late – Stage golden core cultivator. It was very difficult for him to improve even a little.

According to the map of the perceptual mirror, there were a lot of Topaz essence on the fourth floor of the trial Pagoda.

As the saying goes, small things make a lot, and sand makes a tower.

If Xia ruofei could absorb 2000 Topaz essences, it would be equivalent to doubling his spiritual power. Of course, this was under the premise that he could continue to absorb Topaz essences without weakening.

Of course, Xia ruofei had to verify this.

However, even if his mental strength could not double, absorbing the Topaz essence would increase his mental strength cultivation much faster than usual.

Xia ruofei was deep in thought.

All the signs pointed to the fact that the trial Pagoda's fourth level was not a test, but a reward.

Xia ruofei made a bold guess. Perhaps this was really a reward for the cultivator who had successfully passed the first three levels of the Tower of Trials. It was just that the reward was given in the form of a mission.

Otherwise, there was no way to explain why he had not encountered any danger on this level of the trial space so far, and he could even absorb the Topaz essence to improve his mental strength.

Xia ruofei couldn't help but look excited. Everyone had traveled hundreds of thousands of miles to this Mystic realm on the moon and then entered the Tower of Trials to seek opportunities. Wasn't the fourth level of the Tower of Trials a huge opportunity?

At this point, Xia ruofei finally understood why the "mission" on this level had a time limit.

Any cultivator who discovered that the Topaz essence could improve their spiritual power cultivation so quickly would definitely want to collect as much as possible. Even if they couldn't take it away, it would be excellent for their own use!

And the rewards couldn't be unlimited, so the Almighty who designed the trial mission stipulated that every cultivator couldn't stay more than twelve hours in the fourth level, which was twelve hours.

As for how much benefits the cultivators could obtain in these twelve hours, that would depend on their own abilities. After all, everyone's abilities and opportunities were different.

Xia ruofei felt that the existence of the perceptual mirror might be a result of the Grandmaster's carelessness. He did not consider everything and did not impose any restrictions. This meant that the

Topaz essence that Xia ruofei had collected in the past 24 hours would be much more than other cultivators.

Even if the number one cultivator, Chen Nanfeng, entered this space, his speed of collecting Topaz essence would definitely not be as fast as Xia ruofei's.

These thoughts only flashed through Xia ruofei's mind for a moment. He quickly realized that time was precious.

Xia ruofei didn't say another word. He stepped on the qushuang flying sword and flew towards his right.

In fact, the yellow jade Spirit that was closest to him was just a little to his left, but he did not choose to go there.

The reason why he ignored the near and went far was that Xia ruofei saw a large golden light spot about two kilometers to the right. That meant that there was a large amount of Topaz essence there.

In comparison, although the front to the left was much closer, there was only one golden light spot, which represented a yellow jade essence.

Of course, Xia ruofei chose a spot with more yellow jade essence. This way, he could save time on the way back and forth. In fact, it would be more efficient.

Xia ruofei soon arrived at the location indicated on the perceptual map.

He didn't say anything and started to dig down with his shovel.

A few minutes later, a huge hole appeared in front of Xia ruofei.

In this huge pit, there were many Topaz essence densely distributed. He roughly counted and found that there were at least twenty of them.

Xia ruofei's face lit up. He bent down and began to dig out the Topaz essence with his bare hands.

Every time he dug out a piece of Topaz from the ground, the mission progress in the field of vision of the perceptual mirror would be updated.

By the time Xia ruofei had dug out all the Topaz essence in the big pit, the mission progress in the perceptual mirror had become 26/500.

It had been less than 10 minutes since the mission was issued.

At this rate, Xia ruofei would only need about three hours to complete the task of excavating 500 Topaz essence.

The record for this mission was four hours, which was five hours. Xia ruofei could definitely raise the record to a level that would make other cultivators despair.

And this was based on the cultivation level of the companion who was randomly sent over and Xia ruofei's cultivation level. The person with the higher cultivation level was chosen as the standard. On this basis, the number of tasks was doubled.

In other words, a cultivator of the same cultivation level as Xia ruofei would need to collect between two hundred to two hundred and fifty Topaz essence.

Chapter 3355 A great harvest (2)

Before this, the mission record was five hours. The cultivator who broke the record only had to complete half of Xia ruofei's mission.

One could see how big the gap was.

Xia ruofei took out a backpack from his spatial space and stuffed all 24 Topaz essence into it. Then, he put the bag on his back and stepped on the qushuang flying sword. Without stopping, he rushed to the next gathering point of Topaz essence.

Xia ruofei did not immediately absorb the energy of the yellow jade essence. On one hand, he hoped to complete the mission as soon as possible. On the other hand, he wanted to save time and discover as much yellow jade essence as possible.

As for absorbing the energy of the Topaz essence, Xia ruofei had also considered that he might be forcefully transported out of this space after twelve hours, and the Topaz essence could not be brought out. So, it was not that he did not want to absorb the Topaz essence, but he hoped that he could manage the time well and increase the efficiency to the maximum.

Therefore, he would not stop to absorb the yellow jade essence for the time being. Instead, he would try to collect as much yellow jade essence as possible.

After all, he didn't know who the companion that was randomly teleported to the fourth level with him was.

If it really was Ling Qingxue, then it would be easy. If it was anyone else other than Ling Qingxue, Xia ruofei would face the problem of competition.

Therefore, he decided to collect as much Topaz essence as possible at the beginning of the mission.

Xia ruofei controlled the qushuang flying sword and pushed its speed to the limit. It took about a minute for them to arrive at the next gathering place of the Topaz according to the perceptual map.

The shovel danced in the air. The soil on the wasteland was quickly dug up by Xia ruofei and thrown to the side.

He used all the skills he had learned in the Army to dig for cover. After a while, a big pit appeared in front of him, and half of the Topaz essence was exposed.

Xia ruofei threw the shovel away and bent down to pick up the Topaz essence.

The mission progress in the perceptual mirror started to jump up again until Xia ruofei had collected all the Topaz essence in the pit. The mission progress finally stopped at 53/500.

Xia ruofei stuffed the forty or so Topaz essence into his bag and immediately rode the qushuang flying sword to the next gathering point of Topaz essence indicated on the perceptual mirror map.

.....

As time went by, there were more and more Topaz essence in Xia ruofei's backpack. The big backpack started to bulge.

The mission progress in the perceptual mirror's field of view was also moving up.

Xia ruofei felt great. It was as if he had found a bug in the system while playing a game and used the bug to add a large amount of gold coins to himself.

After three hours, the mission progress in the perceptual mirror finally broke through 500, directly becoming 503/500.

Although he had broken the record, Xia ruofei did not stop. Instead, he picked up his pace.

The big backpack he was carrying was already full.

Since he could not put the backpack with the yellow jade essence into the spirit map space, Xia ruofei turned the backpack around and carried it on his chest. Then, he took out a new backpack from the spirit map space.

On the perceptual mirror map, there were fewer and fewer places where a large pile of Topaz essence was gathered at one point. Although there were still a few, they were too far away and quite scattered. Rushing to excavate the Topaz essence and then rushing to the next gathering point, the time spent on the road was also very considerable.

Therefore, Xia ruofei was no longer obsessed with the gathering point of the Topaz essence. Instead, he dug out the Topaz essence closest to him based on the principle of proximity.

Besides, what worried Xia ruofei was that he had not met Ling Qingxue or any of his other exploration team members.

Of course, this kind of worry was more or less better than the worry he had when he was doing the mission on the previous level.

After all, if Ling Qingxue had been sent to this small space with him, there wouldn't have been any danger in there.

As for the mission, it was split into teams of two. As long as one person completed the mission and broke the record, the other person would also receive the corresponding record – breaking reward.

Hence, Xia ruofei was not in a hurry.

In any case, whether the person who was teleported in was Ling Qingxue or not was already a foregone conclusion, so there was no point in him being anxious.

In the field of vision of the perceptual mirror, there was a map of the entire trial space of the fourth floor. With this map, it would be relatively easy for Xia ruofei to find his companion who had been teleported to this small space with him.

Xia ruofei's top priority was to collect as many Topaz essence as possible.

It would be great if he could meet his companion who had been teleported to this trial space with him while he was collecting the yellow jade essence. It would be perfect if his companion happened to be Ling Qingxue!

After Xia ruofei took out a new bag, he didn't even take a sip of water. He directly rode on the qushuang flying sword and flew to the next point.

There were about nine hours left. If he used it well, Xia ruofei could collect at least 1500 Topaz essence, or even more.

If Xia ruofei were to use all the yellow jade essence, his spiritual power would double.

By then, his spiritual power would have broken through to the level of the early stage of the original level.

Thinking of the magical effects of the yellow jade essence, Xia ruofei couldn't help but feel full of energy. When he used the shovel, his efficiency was much higher than that of ordinary people.

Time passed by.

Xia ruofei was collecting more and more yellow jade essence in the fourth level of the trial Pagoda.

Soon, the second bag was full.

And there were still more than seven hours left.

Although Xia ruofei had broken the record and completed the trial mission, the mission progress bar still faithfully recorded the number of Topaz essence that Xia ruofei had collected. It went from 500 to 600,700, and finally 1011.

Xia ruofei's backpack was stuffed to the brim.

This more or less caused some inconvenience to his movements.

Hence, Xia ruofei decided to get rid of the Topaz before going into battle.

Xia ruofei did not immediately take out the Topaz essence from his backpack. Instead, he began to absorb the Kasaya. Although the absorption rate of the Topaz essence was very high, Xia ruofei still felt that it was a waste of time.

He took out the time array flag from the spirit map space and set it up around him.

Then, he set up a few alarm arrays around the time array flag.

Then, Xia ruofei entered the time array flag's range with his two big backpacks.

There was no way to bring the yellow jade essence into the spirit map space. Otherwise, the time array flag, combined with the time acceleration effect of the primordial realm in the spirit map space, would create an even greater difference in the flow of time.

However, Xia ruofei was using the time array flag to set up an array in the trial space. The time acceleration effect was quite impressive.

The materials for setting up the time formation and the alarm formation were readily available, and he was extremely familiar with the method of setting them up, so it took him very little time to set up the formation. Compared to the time saved by using the time formation, it was almost negligible.

...

Xia ruofei sat down cross – legged in the formation of the time array flags. He took out the Topaz essence from his backpack and started to absorb the energy inside.

As Xia ruofei absorbed the pure energy, his spiritual power began to increase at a slow pace. It was difficult to notice the growth of spiritual power normally. Although it was slow now, he could feel it. It was a relatively fast speed.

Xia ruofei spent about half an hour to absorb all the energy in the Topaz essence.

And this amount of time, when compared to the time that really passed outside the array, was almost negligible.

Chapter 3356 Spiritual power skyrocketing (1)

By the time Xia ruofei had finished absorbing all the Topaz essence, there was a pile of broken pieces of Topaz essence around him.

At this moment, he felt as if he had been enlightened.

All along, Xia ruofei's cultivation of spiritual power had been faster than his cultivation level. He was at the beginning stage of the Golden core realm, but his spiritual power was equivalent to a cultivator at the later stage of the Golden core realm.

It could be said that among all the cultivators Xia ruofei had met so far, only Chen Nanfeng's spiritual power was stronger than his. He gave him an unfathomable feeling.

Even Shen tianfang, who had just been killed by Xia ruofei, was much stronger than Xia ruofei. However, in terms of spiritual power, Xia ruofei might be stronger than him.

However, no matter how strong Xia ruofei's spiritual power was, it was only because of his cultivation technique. It was also accumulated bit by bit when he cultivated the "great Dao Sutra".

Normally, the increase in spiritual power would not be obvious.

But this time, in just half an hour, he had improved his mental power by a large margin by absorbing the Topaz essence. Now, his mental power was almost 1.5 times stronger than it was before.

In other words, after absorbing more than 1000 pieces of Topaz essence, each piece of Topaz essence still had a significant effect on improving Xia ruofei's spiritual power. The effect was not significantly reduced.

Xia ruofei felt as if he was floating in the air as his spiritual power had increased greatly in a short time.

It was different from the improvement of one's vital Qi cultivation. Once one's spiritual power was improved, the cultivator's five senses would be much sharper than before. In Xia ruofei's eyes, it was as if the whole world had a clear sense of hierarchy.

His brain seemed to be working even faster.

Xia ruofei felt an indescribable pleasure. He couldn't help but let out a long whistle, which revealed endless joy.

However, Xia ruofei was only delayed for a few seconds. He immediately collected his thoughts and put away the time array flag and the alarm array as fast as he could. There were still more than seven hours left, and the sensing mirror map showed that there were still many Topaz essences, but they were quite far from him and scattered. He had to seize the time to collect as many Topaz essences as possible.

In fact, even if he was given another seven hours, he would not be able to collect all the Topaz essence on the fourth floor of the trial Pagoda. The main reason was that the trial space was too big. He had already dug out the Topaz essences that were close to each other or were concentrated in one place. Now, it would take a lot of time to collect each one.

Hence, Xia ruofei could only try his best to excavate as much yellow jade essence as possible.

He knew very well that such an opportunity would not appear in the future.

The Topaz essence, which could increase one's mental strength so quickly without any side effects, was definitely a very precious heavenly treasure.

Xia ruofei didn't know why the Almighty who set up the trial space and missions would be so generous as to spread this precious treasure in the trial space to reward the cultivators. However, he knew that the Almighty had a deep meaning.

Since it was a gift from a senior, Xia ruofei would not hold back and would definitely take as much as he could.

He put away the time formation flag and the alarm formation as fast as he could, then immediately stepped on the qushuang flying sword and flew toward the yellow jade essence that was closest to him.

Although the wilderness was vast and the remaining Topaz essence was scattered, the terrain here was very flat and there was almost no vegetation. Hence, Xia ruofei could fly at a very high speed even at a low altitude.

This also greatly increased the speed at which he excavated the yellow jade essence.

Xia ruofei carried a backpack in one hand and a shovel in the other. He was carrying another backpack on his back. He stepped on his flying sword and flew across the wilderness. He didn't look like a cultivator at all. If he didn't have the qushuang flying sword, he would look like a brother of a farmer who was going to work.

Of course, Xia ruofei did not care about his image here. Efficiency was the most important.

This way, when he found a place, he could roll up his sleeves and start working with a shovel. When he found the Topaz essence, he could put it in his backpack at the first moment.

In the next few hours, Xia ruofei's figure flew back and forth in the vast wilderness. When he stopped, he would be digging with all his might.

Of course, he was also trying to find a companion who was randomly sent to the same trial space as him. However, this wasteland was simply too big. Even though Xia ruofei had flown to many places, he had not set foot in most of the areas.

The main reason was that there was no yellow jade essence in these areas, or there were only one or two yellow jade essence within a radius of ten kilometers or dozens of kilometers. For efficiency's sake, Xia ruofei would definitely not go there.

In fact, he might not go to these areas until the end of the mission, because the Topaz essence in other areas was enough for him to dig until the end of the mission.

If that companion had been sent to an area where Topaz essence was rare and had been wandering around in that small area, he might not have met Xia ruofei during the entire mission.

Of course, Xia ruofei did not deliberately look for his companions.

Even if this companion was Ling Qingxue, Xia ruofei was secondary. His first task was naturally to excavate the yellow jade essence.

Chapter 3357 Spiritual power skyrocketing (2)

In any case, there was no danger in the fourth level of the trial Pagoda. No matter who this companion was, they would still be transported to the same space on the fifth level. If they couldn't find him here, it wouldn't be too late to find him at that time.

And the opportunity to excavate the yellow jade essence, if he missed it, he would not have another one.

Xia ruofei spent more than five hours and once again collected about a thousand Topaz essence. His two backpacks were full again.

Xia ruofei still had a backpack in the spirit map space. However, since the yellow jade essence could not be stored in the spirit map space, he had to carry it on him all the time. If he carried another backpack, it would be inconvenient for him to move around.

In fact, ever since he had the spirit map space, Xia ruofei had gotten used to storing things in the space. He was not used to carrying all the bags by himself.

When both backpacks were full, Xia ruofei stopped. He took out the time formation flag and the materials for the alarm formation from the spirit map space and started to set up the formation with ease.

Then, Xia ruofei brought the two big bags of yellow jade essence into the time formation. He sat down cross-legged and started to absorb the energy of the yellow jade essence.

After spending about half an hour in the time formation, Xia ruofei had once again finished absorbing more than a thousand Topaz essence, leaving behind a pile of fragments.

Xia ruofei stood up. He didn't leave the time formation immediately. In fact, his spiritual power had grown too fast. He was even a little unaccustomed to it. Hence, he might as well take advantage of the difference in the flow of time in the time formation to adapt to it.

Xia ruofei shook his head and felt the majestic spiritual power in his sea of consciousness.

Since the beginning, Xia ruofei had absorbed more than 2000 pieces of Topaz essence. His spiritual power had doubled.

Originally, Xia ruofei's spiritual power was already equivalent to a late – Stage golden core cultivator, which was the late – Stage of the spirit gathering realm. However, it was not easy to break through to the spiritualization realm, which was equivalent to a nascent soul cultivator. Thus, even though his spiritual power had more than doubled, he was still far from the spiritualization realm.

Xia ruofei made a rough estimate. If he could absorb another four to five thousand Topaz essence, his spiritual cultivation would have the hope of breaking through to the spiritualization realm.

However, there was obviously not enough time now. There were only about two hours left. Now, the map of the perceptual mirror showed that the distribution of the Topaz essence was more scattered and further away. It was already a good result to collect 500 Topaz essences in two hours. It was impossible to collect 4000 or 5000.

Even so, Xia ruofei was very satisfied. If he cultivated by himself, he would need at least a few years to absorb the spiritual power from the Topaz essence.

His mental power would only be able to break through to the spiritualisation boundary when his cultivation broke through to the intermediate or even late golden core stage.

Today, he had only spent a few hours to double his spiritual power. This was something he would not have dared to imagine in the past.

Xia ruofei quickly put away the time formation flag and the formation materials. Then, he picked up the shovel and his backpack and started his excavation journey again.

There were still about two hours left. Xia ruofei felt that if he worked hard, he should be able to dig up about 500 Topaz essence.

After all, his mental strength had improved so much that his control of the flying sword had also become more precise. When he used the qushuang flying sword to ride a flying sword, his speed had also increased a lot.

This could more or less offset the speed loss caused by the spread of the Topaz essence.

Xia ruofei stepped on the qushuang flying sword. After finding his target, he flew over at his fastest speed. The qushuang flying sword let out a violent piercing sound and brought Xia ruofei to the nearest Topaz essence.

After Xia ruofei's spiritual power was greatly improved, even the speed at which he excavated the Topaz essence had increased.

The main thing was that he could control his strength and movements more precisely, and he had a better grasp of the position of the yellow jade essence. Every shovel he dug was more efficient than before.

Xia ruofei was racing against time to dig up the Topaz essence. At the same time, he was also paying attention to the mission progress through the perceptual mirror.

Even though the mission was completed, the progress would still be updated with every piece of Topaz essence that Xia ruofei excavated.

Because of this, every time Xia ruofei dug up a piece of Topaz essence, he would habitually look at the mission prompt bar.

With about an hour left, Xia ruofei finished excavating a piece of Topaz essence. He looked at his mission panel and immediately realized that the number had changed.

He remembered clearly that the mission progress was 2312/500. Now that he had found a piece of Topaz essence, it should be 2313/500. However, when he reached out and took out the Topaz essence, he glanced at the position of the mission progress prompt and found that the number was just jumping. When it stabilized, it became 2314/500.

Xia ruofei was slightly stunned. Then, he immediately realized that Jian Jia must be the companion who had been sent to this trial space. She must have found a Topaz essence.

Xia ruofei did not know whether to laugh or cry.

He didn't know who this companion was, but this was a little too tragic! It took nearly 11 hours to find a piece of Topaz. He didn't know if he or she had been teleported to some barren land. Through the map of the perceptual mirror, he could see that there was an area with a radius of tens of kilometers in this wasteland, but there was not a single Topaz in the entire area.

If his companion had been transported to such an area when he entered the space, it was possible that he would not even find a single Topaz after many hours.

After all, his companion must be like Xia ruofei. He did not know what a yellow jade essence was. Since there was no yellow jade essence in that area, he could only look for it slowly. Most importantly, there was a high probability that other cultivators would not be able to ride their flying swords in this small space of the trial. Thus, their speed of advancement would be even slower.

Xia ruofei couldn't help but laugh.

However, his smile immediately froze. At this moment, an idea suddenly flashed in his mind. He quickly turned his eyes to the map presented in the field of vision of the perceptual mirror.

On the perceptual mirror map, the golden light spots that represented the yellow jade essence had become much sparser.

However, compared to the vast map, these light spots that represented the location of the yellow jade essence were still like the stars in the sky. Although they were far apart, they were still distributed in most areas.

As an early – Stage golden elixir realm cultivator, Xia ruofei's memory was naturally very good after his spiritual power had increased sharply.

In addition, he had already used the perceptual mirror map more than 2000 times to determine the location and find the yellow jade Spirit.

Hence, Xia ruofei had pretty much memorized the perceptual map, including the thousands of golden light spots that represented the location of the Topaz essence.

Then ... As long as he saw the missing light spot, he would be able to determine where his companion, who had been teleported to this small space with him, had just appeared.

When Xia ruofei thought of this, he was a little excited.

He was still secretly hoping that Ling Qingxue was the one who had been teleported to this small space at the same time as him. Therefore, he suddenly wanted to look for her in that location.

Of course, there was another important reason. Whether this companion was Ling Qingxue or not, Xia ruofei wanted to confirm who she was.

At the very least, he needed to know the identity and strength of his companion. Only then could he judge whether he was a threat to him.

After all, he did not know if his companion would be directly teleported to the same location as him in the next few levels of the trial space. If not, it would naturally be beneficial for Xia ruofei to know the other party's identity in advance.

Now, Xia ruofei could go and search quietly. It was possible that he could confirm the other party's identity without them knowing. It was indeed a great opportunity.

And if this companion was Ling Qingxue, then it would naturally be even more perfect.

Chapter 3358 Reuniting (1)

Xia ruofei quickly looked at the map and compared it with the map in his memory.

The sensory mirror provided the map of the entire fourth floor of the Tower of Trials. The area was very wide, and there were at least a few thousand Topaz essence light spots. Fortunately, Xia ruofei's memory was far better than ordinary people, even better than most golden core stage cultivators. So, after carefully recalling, he quickly found the Topaz essence light spot that had disappeared into thin air.

As expected, he was in an empty area. There was only one golden spot in the area, and there was no other yellow jade essence within a few dozen kilometers.

In terms of probability, it was already very lucky for the companion to find the Topaz in about ten hours. After all, he or she did not have a perceptual mirror and did not know that the Topaz was buried underground.

It was also impossible for him to turn over the entire area, so it should be a coincidence.

It had only been a few minutes since the golden light disappeared. During these few minutes, Xia ruofei was busy digging for the Topaz essence and did not check the perceptual mirror map.

That companion couldn't ride a flying sword in the Tower of Trials, so it was very likely that he was still nearby.

With that thought in mind, Xia ruofei no longer hesitated. He carried the backpack that contained the yellow jade essence on his back and threw the shovel into the spirit map space. Then, he stepped on the qushuang flying sword and quickly flew toward the place where the golden light had disappeared.

The dot of light was about 50 kilometers away from Xia ruofei. With Xia ruofei's current speed of sword Kinesis flight, it would take him about seven to eight minutes to get there.

However, Xia ruofei felt that it was worth it to spend the seven to eight minutes.

Moreover, he didn't need to fly near the spot of light because he could release his mental power to investigate. After his mental power increased, the range of his mental Power's investigation also increased a lot.

Hence, Xia ruofei had only wasted five to six minutes at most.

As Xia ruofei flew, he kept his spiritual power on full alert, constantly searching for his surroundings.

After all, he didn't know if his companion had been absorbing the energy of the yellow jade essence in the same place or if he had gone in another direction after digging it out.

There were all kinds of possibilities. Just like Xia ruofei, he only tried to use his spiritual power to check at the beginning but ended up directly absorbing the energy of the Topaz essence. As long as his companion was curious, he would most likely check it out.

If he took the yellow jade essence and left immediately, it was possible to go in any direction.

Fortunately, the other party most likely couldn't ride a flying sword, so he shouldn't have gone far in such a short time.

Xia ruofei stood on the qushuang flying sword, maintaining his highest speed.

Suddenly, his body trembled slightly and he couldn't help but lose his focus. The qushuang flying sword almost lost control. Fortunately, Xia ruofei immediately came back to his senses and controlled the flying sword after flying unsteadily for a while.

At this moment, Xia ruofei's face was filled with uncontrollable joy.

Just now, Ling Qingxue's figure had suddenly appeared in his spiritual power domain. It was about one or two kilometers away from where the golden light had disappeared.

Ling Qingxue should be running forward quickly.

Xia ruofei couldn't help but feel a little dazed. Was it really Ling Qingxue who had been randomly sent to this trial space?

Before entering the Tower of Trials, Xia ruofei had been praying that his companion would be Ling Qingxue. However, the probability was too low. Even after Shen tianfang died, the probability was only one in seven.

Xia ruofei had been digging for the Topaz all this time. In fact, he was secretly looking forward to the identity of his companion, but he did not dare to think too much.

Now, when he used his spiritual power to detect Ling Qingxue's figure running across the wasteland, he felt as if it had been a lifetime ago, as if he was still in a dream.

However, Xia ruofei was very clear that this was not the third level of the trial Pagoda, and it was basically impossible for an illusion to appear here. This time, he had really met up with Ling Qingxue.

Furthermore, because this was the second time he had received the reward of being randomly sent to the same space as his companion, there was also an additional reward of not being separated in the next few levels of the trial space. Therefore, he no longer needed to be separated from Ling Qingxue and could always be by her side to protect her.

At the thought of this, Xia ruofei's mood was filled with joy. He could not wait to reunite with Ling Qingxue.

For the first time, Xia ruofei felt that the flying sword beneath his feet was too slow. He didn't want to waste another second and wanted to teleport in front of Ling Qingxue.

Fortunately, Ling Qingxue was also running in Xia ruofei's direction, and the distance between them was only about ten kilometers. So, Xia ruofei could see the slender figure in the distance very quickly.

Xia ruofei couldn't help but feel excited. The speed of the qushuang flying sword increased.

After a few breaths, Xia ruofei had already arrived in front of Ling Qingxue. He jumped off the qushuang flying sword and shouted excitedly, ""Qingxue! I've finally found you!"

Ling Qingxue looked travel – worn, and her clothes were covered in dust. Her hair looked like it was about to harden, and even her face was grey and white. She didn't know what it was.

Chapter 3359 Reuniting (2)

When Ling Qingxue saw Xia ruofei descending from the sky on his flying sword, she was stunned for a moment. Then, not only did she not look happy, but she also took a step back warily and stared at Xia ruofei with a slight frown.

Xia ruofei was slightly stunned. He walked towards Ling Qingxue and said, ""Qingxue, what's wrong? Don't be afraid, it's fine! I'll be by your side to protect you from now on, so you're safe!"

Ling Qingxue looked at Xia ruofei. Suddenly, without a word, she summoned her flying sword and stabbed it towards Xia ruofei.

Naturally, Xia ruofei was not on guard. Fortunately, Ling Qingxue was only a Qi refining cultivator. Although she could use her flying sword to attack, she could only use her spiritual power to draw the flying sword and stab it at Xia ruofei. Moreover, her spiritual power was very weak, so the speed of the flying sword was very slow to Xia ruofei.

He dodged it with ease and used his mental power to bind the flying sword and throw it to the ground.

Xia ruofei's expression changed and he called out in concern, ""Qingxue, what's wrong? What had happened? Why are you attacking me?"

Ling Qingxue snorted and said, ""Don't waste your time! You can't fool me with this trick! In this Tower of Trials, everyone had to deal with all the quests alone. How could RUO Fei be here? Don't think that you can confuse me by changing to a different illusionary realm and creating a ruofei flying here!"

Xia ruofei didn't know whether to laugh or cry. "Qingxue, you're not thinking of me as your inner demon, are you? This ... How could there be such a realistic illusion!"

Ling Qingxue pouted and said, "continue making up stories!" You've already used RUO Fei's image once! How can I fall for it again if you use it again?"

Xia ruofei thought for a moment and asked, "Qingxue, you can't be thinking that you're still on the third level of the Tower of Trials, right?" Eh? So you were already on the third floor of the Tower of Trials before you were sent here? That's pretty fast!"

Xia ruofei had been breaking all the records and completing all the missions. It could be said that his speed was very fast. Looking at Ling Qingxue's performance, she should have already experienced the illusion on the third level of the Tower of Trials. That was why she was suspicious of Xia ruofei's appearance.

With Ling Qingxue's cultivation level, it was already considered very fast for her to reach the third level so quickly.

Of course, Xia ruofei also knew that Ling Qingxue was in the Qi refining stage, which meant that the difficulty of the mission would be reduced. However, the fact that she was able to reach the third level so quickly showed that Ling Qingxue's performance was outstanding.

Ling Qingxue frowned slightly and looked at Xia ruofei. ""What do you mean? Don't try to fool me! What teleportation? Didn't he just change the illusion? Don't think that I don't understand!"

Xia ruofei smiled bitterly. "Qingxue, stop fooling around ... You're no longer on the third level of the Tower of Trials. This is the training space on the fourth level."

"This is impossible!" Ling Qingxue said firmly.

"Was your previous mission to kill the Mirage beast?" Xia ruofei said, "if I'm not wrong, it should be a beginner – Level Mirage beast, right?"

"So what?" Ling Qingxue nodded.

Xia ruofei said, "you must have been teleported here for more than ten hours, right?" Have you met a Mirage beast before?"

Ling Qingxue also showed a trace of hesitation. It was just as Xia ruofei had said. She had been searching non – stop for more than ten hours, but all she could see was the monotonous wilderness. She did not even meet a Mirage beast, let alone a Mirage beast. She did not even meet a living ant. It was as if she was the only one left in the world.

Xia ruofei understood what was going on the moment he saw Ling Qingxue's expression. He smiled and said, ""Also, didn't you notice that you didn't encounter any danger in the past ten hours?"

Ling Qingxue did not say anything. However, after Xia ruofei's reminder, she did notice that she had not encountered any danger or attack in the past ten hours. She had just been walking alone in the vast wilderness.

Xia ruofei continued, "also, do you know why I found you?"

At this point, he took out a piece of yellow jade essence from his bag and showed it to Ling Qingxue. He then said, "Did you just find this kind of crystal?"

Ling Qingxue took a look and said in surprise, "How did you know?"

Xia ruofei smiled. "This thing is called the yellow jade essence. It's because you excavated this yellow jade essence that I was able to determine your location. Then, I immediately rushed over to meet you."

Ling Qingxue saw that Xia ruofei's words were logical and could not help but waver.

Xia ruofei continued, "Qingxue, you're actually already on the fourth level of the Tower of Trials ..."

"This is impossible! I didn't even complete the third level of the Tower of Trials, and I didn't find the entrance to the fourth level, so how could I suddenly go to the fourth level?" Ling Qingxue immediately shouted.

Xia ruofei said, "it's a long story, but time is of the essence. I'll make it short!" When I was on the third floor of the Tower of Trials, because I broke the record of the mission, I received an additional reward, which is to teleport one of my companions to the same small trial space as me. I've always wanted to meet you as soon as possible, so I gave up on other more attractive conditions and chose this reward. It looks like my luck is pretty good. I actually ran into one with a one in eight chance!"

Xia ruofei did not mention that he had already chosen this reward on the second level of the Tower of Trials and was sent to the same trial space as Shen tianfang. Later on, because Shen tianfang was tempted by the money, Xia ruofei even planned to kill him before he could do anything.

The reason why he didn't say anything wasn't because he didn't trust Ling Qingxue. It was just that the fewer people who knew about this, the better. Otherwise, if one day someone accidentally let it slip, it would be a big deal.

"Really?" Ling Qingxue asked.

Xia ruofei said, "why Would I Lie to You?" Besides, how could you mistake me for your inner demon? How can the inner demon be as handsome as me?"

Ling Qingxue couldn't help but burst out laughing. "I didn't expect you to be so smug!"

Xia ruofei said, "Qingxue, we have more than an hour left before we'll be transported out of the trial space on the fourth level. In this one hour, we need to collect as much of this Topaz essence as possible ..."

"Are you really RUO Fei?" Ling Qingxue asked suspiciously.

Xia ruofei smiled bitterly and said, "if you don't believe me ... How about this?" Use your spiritual power to investigate the interior of the yellow jade essence. "

"What do you do with this?" Ling Qingxue nodded.

"You don't have to worry about that, just do as I say!" Xia ruofei said.

"Alright, I'll try it!" As Ling Qingxue spoke, she picked up the yellow jade essence and used her mental power to probe inside.

As expected, Ling Qingxue's spiritual power also began to increase significantly, and the speed of increase was even faster than Xia ruofei's.

Ling Qingxue was so shocked that she almost threw out the yellow jade Spirit.

Fortunately, she managed to control herself at the first moment. She clenched the yellow jade essence tightly in her hand and continued to absorb the energy inside. She only stopped when the yellow jade essence had been completely absorbed and turned into fragments, her face full of surprise.

"How is it?" Xia ruofei asked with a smile.

"What is this?" Ling Qingxue was shocked. "Why is my spiritual power growing so fast?"

"This is the yellow jade essence that is unique to the trial Pagoda's fourth floor." Xia ruofei laughed and said, "I'm guessing that the trial Pagoda's fourth level doesn't have any real stages. This level is a reward for cultivators who have passed the first three stages, so there shouldn't be any danger at all."

Xia ruofei paused and continued, "Qingxue, we only have about an hour left. I must collect as much Topaz essence as possible! Because it'll be too difficult to find a treasure that can increase one's spiritual power so quickly in the future!"

Chapter 3360 Race against time (1)

Ling Qingxue nodded and said, "Oh!" I know ..."

Suddenly, she was stunned. She stared at Xia ruofei with wide eyes and said in a trembling voice, "So, you ... You're really RUO Fei?"

Xia ruofei didn't know whether to laugh or cry as he said, "silly girl, are you still doubting my identity?" Please, is there such a realistic inner demon? Let's hurry up and find the yellow jade essence, we shouldn't waste any more time!"

Ling Qingxue's delicate body trembled slightly, as if she had just confirmed that the person in front of her was indeed her boyfriend and not the demon in her heart that had appeared in the illusion.

She looked at Xia ruofei with her eyes wide open and threw herself into his arms. After feeling his familiar breath and warm embrace, she sobbed, "RUO Fei, I ... I'm really scared. I'm suddenly the only one left after entering the secret realm. I've been looking for you everywhere, but I couldn't find you ..."

Xia ruofei gently patted Ling Qingxue's back and said, "It's fine now! He was fine now! Now that we've finally met up, I'll be behind you, so you won't be in any danger!"

Xia ruofei continued, "Qingxue, Speaking of which, you were able to enter the third level of the trial Pagoda in such a short time. Your performance is already very outstanding!" I was worried that you

would encounter danger in the Tower of Trials! Finally, the heavens have blessed you. Not only are you not in danger, but your results are also so good!”

Ling Qingxue snuggled into Xia ruofei’s arms and said, “I don’t know either. I was muddleheaded until I reached the third level of the Tower of Trials. However, just as I entered the third floor, I encountered a very realistic illusion. I almost fell into it and couldn’t get out. Later, I received a mission to kill a beginner – Level Mirage beast, but I only killed one. When I met the second one, I suddenly changed my environment and came to this wasteland. I thought I had fallen into the Mirage beast’s illusion! I couldn’t find the way out in this wasteland at all, and I searched for more than ten hours. Just now, I saw that piece of Topaz lying on the ground, so I dug it out out out of curiosity. I didn’t expect you to appear so soon ...”

Xia ruofei nodded. “No wonder ... It’s a good thing you picked up that piece of Topaz. Otherwise, it would be difficult for me to locate you accurately!”

Xia ruofei had found more than 2000 pieces of yellow jade essence on the fourth level of the trial Pagoda. Naturally, he knew that most of them were buried underground. There were a few pieces of yellow jade essence that were half – exposed above the ground, but they were rare.

There was only one yellow jade essence in the area where Ling Qingxue was located. The probability of finding the yellow jade essence by chance was very low, and it just so happened that the yellow jade essence was half – exposed to the ground, so the probability was even slimmer.

However, Ling Qingxue had encountered it and had even picked up the yellow jade essence.

It had to be said that there seemed to be a mysterious force that determined that Xia ruofei and Ling Qingxue would meet here today.

Ling Qingxue asked curiously, “RUO Fei, what’s going on?” Why was I teleported to the fourth floor before I even completed the mission on the third floor? Why is it that I’m still in the same training space as you?”

Xia ruofei laughed and said, “it’s a long story!” We don’t have much time, so let’s talk while we walk!”

“En!” Ling Qingxue nodded her head.

After regrouping with Xia ruofei, Ling Qingxue felt at ease. Ever since she had entered the secret realm and parted ways with Xia ruofei, she had a strong sense of danger. Her heart had been hanging in the air, but now she could finally relax.

Xia ruofei reached out and grabbed Ling Qingxue’s flying sword. He smiled and said, “Put away the flying sword first, we’ll set off now!”

After Ling Qingxue put away her flying sword, Xia ruofei immediately summoned the bent Frost Flying sword. Then, he gently put his arm around Ling Qingxue’s slender waist and the two of them stepped onto the bent Frost Flying sword.

He silently activated his sword technique. The qushuang flying sword instantly rose into the air. However, it was not flying at a high altitude. It was basically sticking to the ground and adjusting its

altitude according to the ups and downs of the terrain. The two of them rode their flying swords and flew towards the direction that Xia ruofei had chosen.

Ling Qingxue was only in the Qi refining stage and did not know how to fly on a sword. She also did not know that in the Tower of Trials, the original sword technique for sword flight would be ineffective and there was no way to fly on a sword. So when she saw Xia ruofei carrying her on a sword to fly, she was not too surprised.

After all, it was not her first time flying on a sword. Xia ruofei had carried her on a flying sword several times.

On the way, Xia ruofei briefly explained to Ling Qingxue how he had broken the record and completed the trial mission. He had also received the reward of being able to be teleported to the same trial space as his companions.

Of course, Xia ruofei did not mention that it was his second time choosing this reward, nor did he mention that he had killed Shen tianfang, who had been sent to the same trial space on the third level of the Tower of Trials.

Xia ruofei did not want Ling Qingxue to worry. At the same time, he did not want her to come into contact with the dark side of the cultivation world.

When the two of them were flying together, their speed would be somewhat affected.

About ten minutes later, Xia ruofei flew to a place where the Topaz was buried.

He lowered his flying sword but did not rush to dig. Instead, he took out the time array flag from the spirit map space and skillfully set up a time array around the position.
