

## God tier Farm 3361

### Chapter 3361 Every second counts (2)

In fact, he had done the same when he was excavating the yellow jade essence.

It was very easy to set up a time array with array flags. It could be completed in a few breaths. After setting up the time array, the process of digging out the yellow jade essence was very time – saving.

Xia ruofei said to Ling Qingxue and pulled her into the effective range of the time array flag. Then, he took out a shovel from the spirit map space and started digging without a word.

Xia ruofei was already very familiar with digging for the yellow jade essence. After a minute or two, he had successfully retrieved a piece of yellow jade essence.

Xia ruofei immediately threw the yellow jade essence into the bag hanging in front of his chest.

However, he didn't take back the time array flag. Instead, he took off his backpack and put it on the ground. Then he said to Ling Qingxue, ""Qingxue! Sit down now and absorb the Topaz essence in the time formation. If you absorb all the Topaz essence in your backpack, you should have more than enough time!"

Ling Qingxue nodded and sat cross – legged on the ground. She then asked, ""RUO Fei, what about you?"

"There's still about an hour left. I'll continue to look for the yellow jade essence. It's good stuff, the more the better!" Xia ruofei said, "I will set up some alarm and protection arrays around the time array. You don't have to go anywhere. Just pay attention to your safety. I've been to many places on the 4th level of the trial Pagoda and I've never encountered any danger, so you don't have to worry!"

"It's better for you to keep it!" Ling Qingxue said, "the increase in your spiritual power will be of even greater help!"

Xia ruofei smiled and shook his head. ""I've already absorbed more than two thousand pieces of yellow jade essence. This thing doesn't have much effect on me. Time is precious, so I won't talk to you any longer. I have to hurry to the next location!"

Xia ruofei told a white lie. In fact, after using the Topaz multiple times, the effect did not decrease. At least until now, Xia ruofei did not feel that the Topaz Essence's effect of improving mental strength had significantly decreased.

However, if he did not say so, Ling Qingxue would definitely not be willing to absorb the yellow jade essence.

As expected, Ling Qingxue immediately nodded and said, ""Alright then! You be careful!"

"Don't worry! There's no danger here, but after we enter the Tower of Trials "fifth level, we have to be careful. If my guess is correct, I'm afraid that the difficulty of the mission will increase again from the fifth level onwards. If we're not careful, we might even lose our lives!" Xia ruofei said seriously, "that's why we have to improve our strength as much as possible! Therefore, you're absorbing the yellow jade essence not only to help yourself, but also to relieve the pressure on me, do you understand?"

Ling Qingxue would never go against Xia ruofei on such an important matter. She nodded obediently and said, "Mm! Don't worry! I will work hard to absorb it!"

Xia ruofei caressed Ling Qingxue's hair gently and stepped out of the time formation. Then, he set up a warning and protection formation around the time formation as quickly as he could.

He looked at Ling Qingxue, who was absorbing the yellow jade Essence's energy, and took out his curved Frost Flying sword. He stepped on the flying sword and quickly flew toward the next location where the yellow jade essence was.

Xia ruofei still had a few hundred pieces of Topaz essence in his bag. He decided to let Ling Qingxue absorb them in the shortest time possible.

After all, it was unlikely that they would be able to find the yellow jade essence again in the future. Ling Qingxue's cultivation level was still relatively low, including her spiritual power cultivation. In theory, the lower the cultivation base, the more obvious the yellow jade Essence's improvement effect would be.

Therefore, if Ling Qingxue absorbed a few hundred pieces of yellow jade essence, she would be able to increase her spiritual power by a large amount, and it would be almost certain for her to break through to the next realm. If Xia ruofei were to absorb it, it would have very limited effect on his improvement. As for breaking through to the spiritualisation boundary directly, it was impossible. He would probably only have a slight chance if the Topaz essence was multiplied by ten times.

However, there was not enough time. Hence, Xia ruofei felt that letting Ling Qingxue absorb the Topaz essence was the most cost – effective choice.

After all, if one's mental strength was a lot higher than one's true Qi cultivation while in the Qi refining stage, it would be very beneficial for later cultivation and the stability of one's Foundation.

This benefit would run through the entire cultivation process. The stronger one's mental power, the stronger one's brain function would be. One's understanding of cultivation would be much stronger than that of ordinary cultivators of the same level.

Xia ruofei naturally wanted to help Ling Qingxue grasp this opportunity that would bring her long – term benefits.

His only thought now was to dig up more yellow jade essence. Even one more would be of great help to Ling Qingxue.

Without the help of the time array flag, Xia ruofei's digging speed of the yellow jade essence would be slower. However, he could not care less. There was only one set of time array flag. If he used it, Ling Qingxue would not be able to use it. With so much yellow jade essence, even he would not be able to absorb it all in the remaining time without the help of the time array, let alone Ling Qingxue.

Xia ruofei's figure flew across the fourth level of the trial Pagoda. He could be seen waving his shovel everywhere where the Topaz essence was.

Other than seizing every second to dig out the yellow jade essence, he had also been paying attention to the countdown on the Tower of Trials.

This was because not only did he have to dig out as much yellow jade essence as possible, but he also had to calculate the time and distance. He had to return to Ling Qingxue's side before the countdown ended. Otherwise, no matter how much yellow jade essence he dug out, he would not be able to take it with him, and the effect would be equivalent to zero.

As time passed, Xia ruofei was working at a high intensity. His forehead was even starting to sweat. Normally, this kind of low – intensity work would not make him sweat.

When Xia ruofei grabbed the last Topaz essence, there were only five minutes and fifty – eight seconds left on the mission timer in his perceptual vision.

Xia ruofei stuffed the yellow jade essence into the bag hanging in front of his chest and stepped onto the qushuang flying sword. At the same time, he put away the shovel on the ground and flew towards Ling Qingxue's position on his flying sword.

Xia ruofei used his sword to fly as fast as he could while staring at the countdown in the perceptual mirror.

Five minutes ... Four minutes ... Three minutes ... Two minutes ...

When there was only one minute and twenty – seven seconds left, Xia ruofei finally arrived at Ling Qingxue's position.

He jumped off the qushuang flying sword and stepped into the time array.

Xia ruofei threw his backpack on the ground and panted as he said to Ling Qingxue, ""Qingxue, quickly absorb the remaining Topaz essence. We're running out of time."

In reality, Ling Qingxue had already finished absorbing the Topaz essence that Xia ruofei had left behind when time was flowing at a rate that was about 90 times faster than normal. However, she did not leave the time formation. Instead, she cultivated in the time formation while adapting to her condition after her spiritual power had increased tremendously.

Ling Qingxue knew that time was of the essence. Even with the effects of the array, she only had two hours left.

On this trip, Xia ruofei had dug up more than 100 Topaz essence, close to 200. If Xia ruofei were to absorb it himself, two hours would definitely be enough. However, since Ling Qingxue was the one absorbing it, he would have to put in more effort.

Therefore, Ling Qingxue nodded and sat down cross – legged without a word. She took out a piece of Topaz essence from her backpack and began to absorb it.

Xia ruofei had been paying attention to the mission time countdown in the perceptual mirror.

As Xia ruofei was also within the range of the time array flag, the mission time countdown in the perceptual mirror's field of view was very slow. It would jump by one second every one and a half minutes to two minutes.

The remaining time was about two hours.

Ling Qingxue's face was solemn as she continuously took out yellow jade essence from her bag to absorb it. Every time she finished absorbing it, she would not say a word and immediately take out a new piece.

When the mission time in the perceptual mirror's field of view reached the last ten seconds, Ling Qingxue had just finished absorbing a piece of Topaz essence. When she reached into her bag to take it, she realized that her bag was empty.

Chapter 3362 Tower of Trials "fifth floor\_

"Ruofei, I've finished absorbing it!" Ling Qingxue shouted.

Xia ruofei heaved a sigh of relief and said, "That's great! Let's take the items and leave the formation immediately!"

Xia ruofei and Ling Qingxue packed their things and stepped out of the time formation.

After stepping out of the time formation's range, the mission time in Xia ruofei's perception mirror immediately returned to its normal speed. It was already ten seconds.

Xia ruofei's speed was extremely fast. He grabbed Ling Qingxue's soft hand with one hand and waved his hand at the same time to put the time array flag, alarm, and defense array materials into the spirit map space.

Then, the two of them stood there quietly, waiting for the last few seconds to pass.

Xia ruofei looked at the quiet wilderness in front of him. At the same time, there was a ticking countdown in his field of vision. He suddenly had mixed feelings.

The fourth level of the trial Pagoda had really given him a lot of benefits.

That much yellow jade essence had already benefited him greatly, and his mental strength had doubled. More importantly, he had really gambled on a one in seven chance of successfully meeting up with Ling Qingxue. This result couldn't have been better.

Furthermore, Xia ruofei had also helped Ling Qingxue absorb hundreds of Topaz essence. Without a doubt, the huge increase in her spiritual power would play a vital role in Ling Qingxue's future cultivation path.

The ten – second countdown passed quickly. Xia ruofei suddenly felt his vision blur and a pulling force made him lose control of himself.

He subconsciously held Ling Qingxue's hand tightly, and Ling Qingxue also held his arm tightly. The two of them felt like the stars were moving, and the scenery in front of them was also distorted.

When everything returned to normal, Xia ruofei and Ling Qingxue immediately turned to look at each other. They realized that they had not been separated and were still holding each other's hands tightly. They both heaved a sigh of relief.

The two of them looked at each other and smiled, feeling at ease.

Then, Xia ruofei quickly observed the surrounding environment. With one look, he could not help but reveal a trace of doubt. The environment that he and Ling Qingxue were in was almost the same as the wilderness they had been in earlier. It was desolate and there were only a few sparse crops that looked like camel's thorns lying quietly on the ground.

"RUO Fei, could it be that we didn't leave the fourth level of the trial Pagoda?" Ling Qingxue asked, puzzled.

Xia ruofei looked around with a serious expression, then shook his head and said, ""We can't be careless. This shouldn't be the trial Pagoda's 4th level anymore!"

He said this because he had some confidence.

The reason was very simple. In the vision of the perceptual mirror, the mission time countdown had disappeared. At the same time, the clear map of the trial tower's fourth floor had also disappeared. In its place was still a map, but the display range was very small, only about a few dozen meters around him. The golden light spot representing the yellow jade essence had also disappeared.

All of these signs pointed to the fact that, although their current environment was very similar to the trial Pagoda's 4th level, they should have already left the space of the 4th level.

The fourth floor of the Tower of Trials was obviously a reward for the cultivators who completed the first three floors. That was why it was given in the form of a mission to increase the cultivator's mental strength without any danger.

And this was no longer the 4th level of the Tower of Trials, and it was very likely that they were directly on the 5th level. As such, they couldn't be careless, as danger could appear at any moment.

"I see ..." Ling Qingxue nodded and said, "ruofei, where are we now?"

Xia ruofei shook his head. "I'm not too sure. Maybe it's the fifth level of the trial Pagoda, or maybe it's a special small space. No matter what, we'll find out soon."

Xia ruofei did not know how other cultivators received all kinds of information and tips when they were doing the Tower of Trials mission. He had a sensory mirror and basically, the key tips were directly displayed in the field of vision of the sensory mirror.

Therefore, he had enough patience. All he needed to do was to stay alert.

Xia ruofei did not bring Ling Qingxue to explore the place rashly. Instead, he asked, ""Qingxue, I didn't have time to ask you just now. How do you feel after absorbing the yellow jade essence? How much did your spiritual power increase?"

Ling Qingxue said happily, "I feel like my spiritual power has gotten much stronger!" Especially after absorbing more than 100, I feel like my spiritual power has broken through a barrier. If I'm not wrong, I should have reached the spirit gathering realm!"

Xia ruofei was surprised and said, ""You've broken through to the spirit gathering stage? I didn't expect the yellow jade essence to have such a good effect on you!"

The spirit gathering realm was equivalent to the mental power of a cultivator in the Golden core stage. Ling Qingxue was actually quite far from the Golden core stage, but her mental power had already reached the level of a cultivator in the Golden core stage. It had to be said that the yellow jade essence was really effective.

Xia ruofei felt that the opportunity on the fourth level of the trial Pagoda was extremely rare for any cultivator. It could be considered a great opportunity in the entire process of exploring the secret realm.

Of course, Xia ruofei had swept up almost half of the Topaz essence on the fourth floor of the trial Pagoda. To other cultivators, it was almost impossible to replicate. Even the powerful person who designed the mission did not expect it.

Chapter 3363 Tower of Trials “5th floor -It was like a bug in a game. Of course, it was a very good feeling.

Ling Qingxue said, “I feel like my mind has become much clearer, and my control of true Qi seems to have become more refined!” It’s also much easier for me to store and retrieve items from my storage ring and control my flying sword with my mental power! Ruofei, this yellow jade Spirit is too powerful!”

Xia ruofei didn’t know whether to laugh or cry, “aren’t I amazing?” How did the yellow jade Spirit become the powerful one?”

“You’re also very powerful! How did you manage to find such a powerful yellow jade Spirit?” Ling Qingxue said with a smile. Then, she said dejectedly, “look at me ... It took me more than ten hours to find a piece of yellow jade essence. It’s so embarrassing!”

Xia ruofei couldn’t help but laugh. Ling Qingxue’s luck was extremely bad. She didn’t have a cheat – like device like the sensory mirror, and she was sent to a barren area where there was almost no Topaz essence. It could be said that she was already very lucky to have found the only Topaz essence in that area within the mission time.

Ling Qingxue pouted and said, “you’re not allowed to tell Weiwei about this when you get back!” Otherwise, I won’t let you off!”

Xia ruofei laughed and said, “I understand, I understand!” I promise I won’t tell!”

Then, Xia ruofei said seriously, “Qingxue, when we move around in this small space, you must remember not to leave my side. If there is any danger, you must not take care of it on your own. However, you must call for help and remind me immediately!”

Ling Qingxue nodded and said, “I know!”

“Also, when I remind you, you must remember one thing. You must never resist!” Xia ruofei said, “I will use a special Dharma Treasure to protect you. Just don’t resist the force of the Dharma Treasure!”

Xia ruofei had made it clear to Ling Qingxue in advance that if there was any danger that could not be resisted, he would ensure Ling Qingxue’s safety first and put her into the spirit map space.

Xia ruofei’s control of the spirit map space had reached a very high level, so he could easily open up an independent small space in the space. Even if Ling Qingxue entered the spirit map space, she would only be in this small space and could not see the whole space.

That way, Ling Qingxue would only know that Xia ruofei had a special protective magical equipment and would not see the other secrets of the spirit map space.

To Xia ruofei, the spirit map space was the foundation of his life. Hence, he did not want to expose her even if she was his closest girlfriend.

Although Ling Qingxue did not know what was going on, she had always trusted Xia ruofei. Hence, she nodded without hesitation and said, "I understand! Don't worry! I'll listen to you!"

Xia ruofei nodded and said, "that's good!" Let's start exploring and see what secrets this wasteland has!" "En!" Ling Qingxue nodded her head.

Xia ruofei and Ling Qingxue held hands. They randomly chose a direction and carefully walked forward.

The two of them walked for about 20 meters. When they passed by a pile of camel thorns, Xia ruofei suddenly felt a sense of danger. He pulled Ling Qingxue's hand and retreated a few steps.

Almost at the same time, the pile of camel's thorns suddenly exploded. Countless tiny thorns flew towards Xia ruofei and Ling Qingxue.

As Xia ruofei retreated, he had already summoned the qushuang flying sword and the traveling Jade immortal sword. He pulled Ling Qingxue and jumped on the qushuang flying sword, speeding up their retreat.

Under the control of Xia ruofei's spiritual energy, the blue travel immortal sword formed a protective light screen. The camel thorns bounced off it.

Xia ruofei and Ling Qingxue were unscathed, but they broke out in cold sweat.

Especially when he saw that the camel's thorn was not cut into pieces when it touched the blue travel immortal sword, but merely bounced off, his heart sank.

This seemingly ordinary plant's hardness had already exceeded his imagination.

Ling Qingxue was also a little shocked. "RUO Fei, why is this thing so strange? I've seen quite a few of them before and even walked past them many times, but nothing like this has ever happened!"

Xia ruofei said seriously, "Qingxue, you must remember that although the environment here is very similar to the trial Pagoda's fourth level, you can't treat it as the same as the trial Pagoda's fourth level! Otherwise, it's very likely that an unremarkable little thing will be able to take your life!"

At this moment, Xia ruofei saw new content on the mission bar in his perceptual mirror. He immediately looked at it with a serious expression.

Lines of text appeared in the quest prompt.

Congratulations, you've broken the record for the trial Pagoda's fourth level mission. You'll receive an additional reward, and the reward content can be chosen from one of the two ...

When Xia ruofei saw the familiar words, he felt as if he had returned to the third level of the Tower of Trials. The additional reward he received was almost the same as the one he received on the third level. He could also choose to upgrade the elemental storage Pearl or randomly send a companion over.

Now that Xia ruofei had successfully met up with Ling Qingxue, he naturally would not choose to teleport another companion. After all, he had already learned from Shen tianfang's experience and had some psychological trauma. This kind of environment tested human nature. Moreover, Ling Qingxue's presence had made him more apprehensive. It was obviously not a wise choice to teleport another companion over under such circumstances.

Furthermore, the upgrade of the energy storage Pearl was extremely attractive to Xia ruofei. The first two times, he had given up on this reward option because he was obsessed with bringing Ling Qingxue to his side as soon as possible.

Now that Ling Qingxue was by his side, Xia ruofei did not hesitate any longer. He immediately chose to upgrade the energy storage Pearl.

In the reward options provided this time, when upgrading the energy storage Pearl, he could also get an additional 1000 origin crystals. To Xia ruofei, this was a small surprise. Origin crystals were still quite precious, especially to golden core cultivators.

After Xia ruofei made his choice, the reward for completing the fourth floor's regular mission appeared in the mission bar.

The contents of the reward also made Xia ruofei a little surprised. It was five hundred pieces of Topaz essence.

There was no doubt about the value of the Topaz essence. It could be said that if it was brought to the cultivation world on earth, any piece of Topaz essence would cause everyone to fight crazily for it, let alone 500 pieces.

However, the mission prompt bar also stated that the Topaz essence could only be used in the secret realm and could not be taken out of the secret realm.

This meant that it was impossible to use the yellow jade essence to exchange for spiritual stones in the cultivation world on earth.

Of course, no one would exchange the yellow jade essence for spiritual stones unless they were out of their minds.

It was even more impossible for a 'nouveau riche' like Xia ruofei, who had no lack of spiritual stones.

Therefore, this restriction had no effect on him.

After the announcement of the reward, a dot of light appeared in the field of vision of the perceptual mirror, along with a guiding arrow.

Clearly, that should be the place to receive the reward.

Ling Qingxue saw that Xia ruofei suddenly stopped talking and stood on the qushuang flying sword in a daze. She couldn't help but ask, ""RUO Fei, what's wrong?"

“Oh!” Xia ruofei said. It was nothing! The reward for completing the mission should be ready. Let’s go and get it!”

“Mission reward?” Ling Qingxue asked curiously, “the fourth level of the trial Pagoda has already given us so many benefits. Are there more rewards?”

“Of course, since it’s a mission and we’ve completed it, and we’ve even broken the record, of course we’ll be rewarded!” Xia ruofei acted as if it was a matter of course. He smiled and said, “let’s go! Let’s go receive the award! Don’t leave my side on the way, it seems that this wasteland has become dangerous!”

“Yes, yes!” Ling Qingxue nodded.

Xia ruofei pulled Ling Qingxue along as they rode on the qushuang flying sword. They followed the direction of the arrow on the perceptual mirror’s map and carefully flew towards the location of the marked light spot.

Chapter 3364 Camel’s back hoop\_

With the sudden attack of the camel’s thorns, Xia ruofei became very careful. He did not fly according to the direction of the arrow. Instead, he tried to stay as far away from the camel’s thorns that were scattered everywhere in the wilderness as possible.

At the same time, Xia ruofei was on high alert to prevent any other dangerous situations from happening.

In fact, Xia ruofei could have avoided the attack of the camel’s thorn by increasing the altitude of his sword Kinesis flight. However, he still had a fresh memory of his experience on the second level of the Tower of Trials. There seemed to be a voice reminding him not to fly too high. Hence, he would rather take a detour than fly too high.

Especially now that he had Ling Qingxue by his side, he had to be even more careful.

The location of the marked light spot was not far. Even though Xia ruofei had taken a detour, it only took him about 20 minutes to reach the marked light spot.

When they arrived, Xia ruofei could not help but be a little dumbfounded. He and Ling Qingxue looked at each other in a daze. In front of them, there was a circular area completely surrounded by camel thorns. The marked light spot was in the center of the circular area.

In other words, if they wanted to reach the marked light spot, they had to pass through the blocking area formed by the camel’s thorns.

Xia ruofei had two choices. One was to fly over from a high altitude. The other was to fight him head – on.

For the same reason, Xia ruofei quickly passed on the first option.

After all, these camel’s thorns were plants. Even if they could suddenly burst out with dense thorns, their attack range was limited, and they could not move flexibly. Relatively speaking, as long as one was on guard, they were not a big threat.

Xia ruofei was now sure that this was the fifth level of the trial Pagoda.

He could even guess why the Almighty who set up the mission had arranged the trial space on the fifth level to be exactly the same as the fourth level.

If he didn't guess wrong, this should be a deliberate setting.

Cultivators who could pass the tests of the first three levels and obtain such great benefits after reaching the fourth level of the trial Pagoda would definitely be in a very good mood, and might even be somewhat complacent.

After arriving at the trial Pagoda's 5th level, seeing the familiar environment, some people couldn't help but relax.

It seemed that this setting was a test for the cultivators.

Since they were on the fifth level of the Tower of Trials, these camel's thorns were part of the test. No matter what, they could not avoid it. Hence, Xia ruofei felt that it might not be a bad thing to come into contact with these camel's thorns earlier and understand their characteristics and habits.

"Ruofei, what should we do?" Ling Qingxue asked.

Xia ruofei smiled and asked, "Qingxue, how do you think we should pass?" The reward for the trial mission on the next level is very likely to be inside. "

Ling Qingxue thought for a moment and said, "I think this ring is quite big. Why don't we go around it and see if there are any gaps?"

After Ling Qingxue said that, she immediately rejected her own suggestion. She shook her head. "Forget it! The attack range of this camel's thorn is quite large. Even if there's a small gap, I'm afraid we can't pass through it quietly ..."

Xia ruofei looked at Ling Qingxue with a smile and pretended to be listening attentively.

Ling Qingxue would have to face her cultivation problems alone sooner or later, so Xia ruofei could not take charge of everything. Otherwise, he would only be harming her.

Right now, Xia ruofei was also trying to train Ling Qingxue.

Ling Qingxue furrowed her brows and said, "actually, it's not a bad idea to fly through the sky. After all, you can ride a flying sword!" But I see that when you fly with me, you try to stay as close to the ground as possible. Is there any danger in the sky? In addition, we don't know the attack range of the camel's thorns above us, so it's hard to grasp the height. Then ..."

Ling Qingxue paused for a moment and looked at Xia ruofei before she continued, ""If all these plans don't work, then it seems like ... I can only attack!"

Xia ruofei chuckled and nodded. ""Great minds think alike! Since these camel's thorns are blocking our way, we'll just get rid of them!"

Ling Qingxue was a little embarrassed as she said, ""I'm just blindly analyzing. If I were to deal with these camel's thorns, I wouldn't have any good ideas!"

Ling Qingxue's face showed a trace of fear, perhaps because she had just recalled the scene of being attacked by the camel's thorn.

Xia ruofei chuckled, "if you were the one challenging the trial Pagoda's fifth level, I'm afraid the difficulty wouldn't be so high." The current difficulty level is completely tailored to my cultivation level. Speaking of which, I'm the one who implicated you!"

Xia ruofei then said to Ling Qingxue, ""Qingxue, stay where you are and don't move. I'll go and check out the situation!"

The two of them were still a few dozen meters away from the ring formed by the camel's thorns. There were no other camel's thorns around them, so they were relatively safe.

Ling Qingxue nodded and said, "ruofei, you must be careful!" If it really doesn't work, then we won't ask for any reward!"

Xia ruofei smiled and said, "why not?" Besides ... If we can't even break through this level, I'm afraid we won't even be able to get the mission on the fifth level. That's equivalent to being trapped here forever! Don't worry! I will put safety first!"

#### Chapter 3365 Camel's thorn ring (2)

After he finished speaking, Xia ruofei patted Ling Qingxue's shoulder and stepped onto the qushuang flying sword again. He carefully advanced in the direction of the camel's thorn.

According to his previous experience, this camel's thorn would suddenly attack when the cultivator was close to it, and the attack covered at least a range of ten to twenty meters, so it was very likely to be hit if caught off guard.

Moreover, the attack range of camel's thorn was so wide, which meant that within a range of 10 to 20 meters, it could launch an attack at any time.

Xia ruofei didn't think that the camel's thorn was an inanimate object and that it would only attack when it was very close to him. Therefore, he was already on high alert for the attack of the camel's thorn when he was slightly closer.

Sure enough, before he could get within ten meters of the camel's thorns, the one closest to him suddenly contracted. Xia ruofei knew at a glance that the camel's thorns were about to attack.

Without any hesitation, he controlled the flying sword to fly in an arc, flying behind him.

The attack speed of the camel's thorn was also very fast. After a sudden contraction, it immediately spurted out a large number of jujube thorns. Its speed was not much slower than ordinary cultivators riding on flying swords. Moreover, its coverage was very wide, just like a large shotgun.

Fortunately, Xia ruofei's speed was still faster. The thorns were almost chasing after his back. They all hit the ground and stirred up a cloud of dust.

When Ling Qingxue saw this scene from afar, she could not help but cover her mouth and show a worried expression. However, she still did not make a sound for fear of disturbing Xia ruofei.

Xia ruofei's expression was very calm. Everything was within his expectations. He had already experienced the attack of a camel's back once and had some confidence.

After this wave of attack, Xia ruofei immediately steered the flying sword back to its original path carefully. Very quickly, he came to the place where he had triggered the attack of the camel's thorn.

Xia ruofei stood on the qushuang flying sword and stared at the nearest camel's thorn with full concentration. When he flew forward another one or two meters, it was still the same camel's thorn that started to shrink violently.

Xia ruofei didn't hesitate to change his direction. He used the speed of the qushuang sword to the maximum and retreated in the same direction as before.

When Xia ruofei's speed was at its peak, the attacks from the camel's thorns could not do anything to him. Hence, this wave of thorns still missed, not even touching the corner of Xia ruofei's clothes.

Xia ruofei adjusted himself and started a new round of testing.

His goal was simple. He wanted to see how many waves of attack this camel's thorn could last. He felt that it was impossible for this camel's thorn to shoot out thorns without limit. Those thorns would eventually run out, so he stared at this camel's thorn and repeatedly tested it.

Xia ruofei was very careful. He did not get close to the other camel thorns to avoid triggering a chain reaction.

Just like that, after four consecutive rounds, the thorns from the camel's back could not do anything to Xia ruofei. However, on the fifth round, something strange happened!

Everything was normal in front of him. The camel's thorn suddenly contracted and attacked when Xia ruofei was about ten meters away from it. Xia ruofei was already confident. He stepped on the qushuang flying sword and made a beautiful turn. He flew in the same direction and route as before.

Based on the previous situations, the thorns would not be able to catch up to Xia ruofei. However, this time was different. Xia ruofei could clearly feel that the thorns were faster than before.

Xia ruofei was not shocked. Instead, he was happy. Could this be the last wave of attacks from the camel's back?

He still had some energy left, so he immediately urged the flying sword to speed up once more.

However, what caught him even more off guard was what followed.

Suddenly, a dense cluster of thorns flew out from the wilderness and covered the space in front of Xia ruofei like a dark cloud. They were so fast that Xia ruofei had no time to Dodge.

Ling Qingxue, who was far away, couldn't help but cry out, ""RUO Fei, be careful! Quickly Dodge!"

Xia ruofei's attention was originally on the back. When he saw the thorns in front of him and under him from the corner of his eye, he couldn't help but curse. This was too much!

These thorns were obviously from the previous attacks of the camel's back. They had all fallen into the dust. Xia ruofei did not expect these thorns to attack so he was not prepared.

Now that Xia ruofei was flying close to the ground, the thorns suddenly flew out from the ground and attacked from the bottom up. The ones in the distance also swept over. Not only were they fast, but they also sealed off all angles, making Xia ruofei very passive.

In that split second, Xia ruofei did not have time to think too much. He only knew that he could not Dodge backward in a panic because he would trigger more attacks from the camel's thorn. By then, he would have no way to avoid it.

Xia ruofei made the most reasonable choice in the shortest time possible. He summoned the spirit map scroll to his hand and the blue immortal sword flew out at the same time. It struck the ground violently and immediately plowed a long pit in the ground as if he was plowing a field.

### Chapter 3366 Camel's thorn ring (3)

At the same time, Xia ruofei flicked his hand and threw the spirit map into the space accurately. Then, with a thought, he directly hid in the space of the spirit map.

All of this happened in a short moment. Xia ruofei did not have the time to think too much. However, at least he knew that he had entered the Archean realm.

Time here flowed 30 times faster than the outside world. Hence, looking at the outside world from the Archean realm was like slow – Motion.

At the same time, Xia ruofei tried his best to control the blue travel immortal sword and the qushuang flying sword to resist the attack of the thorns.

Of course, this process was very short. It could be in the blink of an eye.

Xia ruofei's spiritual energy detected that the jujube thorn covered the place where he had just disappeared at a thirty times slower speed. Although he could control the blue immortal sword and the qushuang flying sword to block it, it would not increase the speed of the flying sword because of the change in the flow of time. This was because his spiritual energy was not enough.

Therefore, even though the qushuang flying sword and the blue immortal sword had blocked many thorns, a large number of them still flew past the flying sword's protective line.

The target of the spirit painting was smaller but two thorns still hit it. Xia ruofei's heart could not help but tremble.

If the spirit painting was damaged, the consequences would be extremely serious.

Xia ruofei's origin was this spirit map. His entire fortune was in this spirit map space. Once the spirit map was destroyed, he would be completely broke.

This wasn't the most serious thing. The important thing was that he was now inside the spirit map space. Once the space collapsed, he would also fall into the spatial turbulence and might be lost forever.

Fortunately, the spirit painting was not so easily destroyed. The two thorns did not leave any marks on the spirit painting. Xia ruofei, who was in the spirit painting space, did not feel any vibration in the space.

His anxious heart was finally at ease.

In fact, in a split second, Xia ruofei chose to use the spirit map scroll to Dodge. He had already foreseen that it was impossible for him to block all the attacks with the blue immortal sword and the qushuang flying sword. Therefore, he was mentally prepared for the spirit map scroll to be attacked.

He was still confident in the spirit map. However, when the thorn attack really landed on the spirit map, he couldn't help but tremble.

Those thorns, whether it was the ones that missed, the two that hit the spirit map scroll, or the ones that were blocked by the blue immortal sword and the qushuang flying sword, all flew up from the dust after this wave of attack and flew towards the camel thorn.

Xia ruofei didn't know whether to laugh or cry as he watched the thorns return to the mother plant at a speed 30 times slower. He knew that his attempt had failed. So these thorns could be retrieved. It was impossible to exhaust all the thorns of camel's thorn by continuously testing them.

When Xia ruofei saw that the thorns had started to withdraw, he left the spirit map space with a thought.

Although Xia ruofei had stayed in the spirit map space for a few minutes, it was only the blink of an eye in the outside world. To Ling Qingxue, the thorns basically covered the sky and covered the earth as they enveloped Xia ruofei. Seeing that Xia ruofei could not avoid them, his figure suddenly disappeared. Immediately after, the thorns retracted and Xia ruofei's figure flashed and reappeared on the spot.

If one did not stare intently, one would not even notice that Xia ruofei had disappeared.

After Xia ruofei left the spirit map space, the first thing he did was to look at the spirit map. Although he had already checked it with his spiritual power, he was still worried. He had to see it for himself.

When he saw that there wasn't a single mark on the painting, he was completely relieved. At the same time, he put the painting back into his palm.

At this moment, Ling Qingxue finally reacted. She sobbed and shouted, "Ruofei, are you alright?"

Ling Qingxue ran towards Xia ruofei.

Xia ruofei quickly waved his hand and said, "Qingxue!" Don't come over! This place is not safe! I'm fine, I'm fine!"

"You're really fine?" Ling Qingxue stopped obediently and asked worriedly.

Xia ruofei smiled and said, "I'm really fine!" I have a lot of defensive magic treasures on me! The attack of mere thorns can't do anything to me! Don't worry!"

"Oh! Then you have to be careful!" Ling Qingxue said.

Xia ruofei laughed and said, "I know!" You stand there and don't come over!"

With that, Xia ruofei turned around and looked at the ring formed by the densely packed camel thorns. He felt a little helpless.

This camel's back could actually retrieve the thorns that were shot out, which was a little tricky.

In the field of vision of the perceptual mirror, the spot of light was in the center of the ring.

As the distance was very close, Xia ruofei could see the ring formed by the entire camel's thorn through the map of the perceptual mirror. It could be said to be airtight. In addition, the attack range of the camel's thorn was up to 10 to 20 meters. It was completely impossible to bypass the camel's thorn and sneak into the area where the light spot was.

Xia ruofei took out a picnic chair from the spirit map space and sat down on it, staring at the camel's thorn bushes in a daze.

If he couldn't use trickery, he could only attack.

Xia ruofei sat on the chair, took out the qushuang flying sword and the blue immortal sword, and slashed at the nearest camel thorn.

The range of Xia ruofei's flying sword was more than 20 meters, so he could attack the camel's thorn from a safe position.

Of course, this kind of attack was also a probing attack. He did not expect to use such a simple method to break the circular defensive zone formed by the camel's thorns.

Sure enough, when the flying sword and the blue immortal sword hit the camel's thorn, they were bounced off without even leaving a trace. However, the camel's thorn's counterattack made the flying sword and the blue immortal sword crooked and almost fell to the ground.

#### Chapter 3367 Chain mission (1)

Xia ruofei tried his best to control the qushuang flying sword and the blue immortal sword and continued to attack the camel thorn.

His control of spiritual power was very precise, and camel thorn couldn't Dodge, so he could accurately make the blue immortal sword and the qushuang flying sword strike the same position.

However, even so, two consecutive attacks at the same spot only left a white mark on camel's thorn. It was unknown how many more times it would take to cut it.

Moreover, after being attacked twice, the camel's thorn would automatically release its thorns to interfere with the flying sword on Xia ruofei's third attack. This made it difficult for Xia ruofei to control the flying sword to slash at the same spot.

The thorns of the camel's back could also be retracted, so its attack was almost infinite.

After a few attempts, Xia ruofei recalled the qushuang flying sword and the blue immortal sword because he knew that such an attack was meaningless.

If his cultivation had reached the Yuanying stage and the grade of his flying sword was higher, he might have been able to directly sweep through this thicket of camel thorns with a powerful attack.

However, under the current circumstances, it would take him a long time to deal with this one camel's thorn. If he wanted to reach the spot where the light spot was, he had to at least get rid of all the other camel's thorns on this side. Otherwise, he would inevitably trigger their attack.

There were at least a few dozen camel thorns within twenty meters of this side. For safety's sake, he would probably have to clear out more.

This way, the time spent would probably be measured in years.

Moreover, Xia ruofei saw that after a while, the White marks on camel's back from the two flying swords had disappeared. In other words, not only did camel's back have an amazing defense, but it also had a very fast recovery speed.

Seeing this, Xia ruofei completely gave up on his plan to attack.

Since he couldn't use his flying sword to attack, he could only find another way.

Xia ruofei frowned. The first thing that came to his mind was arrays.

However, the choice of the formation was very particular. If the right formation was chosen, the effect would naturally be very different, and it was very likely to yield twice the result with half the effort.

Some of the ready-made arrays were useless, including the trap & kill array that had been tried and tested in the first few levels of the trial tower. It would not have any good effect in the face of such a large area of camel's thorn bushes.

Xia ruofei stood up and kept the chair in the spirit map space. Then, he slowly walked back to Ling Qingxue's side.

"RUO Fei, how is it?" "Are you alright?" Ling Qingxue asked with concern.

Xia ruofei shook his head and said, "I'm fine!" However, with these camel's thorns here, it won't be easy to deal with them."

"Yup! Their attacks are very powerful. I saw you attack them with your flying sword just now, but it basically didn't have any effect." Ling Qingxue furrowed her brows.

"It's definitely not possible to attack it with a flying sword. The efficiency is too low. Moreover, its recovery ability is quite strong. The speed of damage dealt to it can't keep up with its recovery speed. It's equivalent to wasting effort." Xia ruofei said, "that's why I'm thinking of using an array to deal with them."

At this point, Xia ruofei looked at Ling Qingxue and asked with a smile, "Qingxue, if it were you, what kind of formation would you choose to deal with this camel's thorn?"

Ling Qingxue tilted her head and thought for a moment before saying, "I don't know anything about formations either! What should I say? But to deal with this kind of plant, fire should be more effective!"

Xia ruofei's eyes lit up. "You really woke me up from my dream with one sentence! I've analyzed the advantages and disadvantages of several formations, but I didn't think of this simple principle! Qingxue, you're right, using fire to attack should be the most effective!"

Ling Qingxue couldn't help but laugh, "RUO Fei, you're not just coaxing me, are you?" It's such a simple logic, how could you not have thought of it and need me to remind you?"

Xia ruofei chuckled and said, "sometimes, it's like this. You think too much and easily complicate simple problems. Of course, whether the fire attack is effective against the camel's thorn still needs to be verified, but this is a good idea!"

"I'll be relying on you then!" Ling Qingxue said happily. She felt that being able to provide Xia ruofei with some ideas would be considered as a help.

Xia ruofei nodded and said, "let me think, what formation should I use?"

Xia ruofei had obtained many ready-made array diagrams from the Jade talisman of inheritance. In addition, his array Dao level was no longer the same as before. He had integrated a lot of array Dao knowledge and could also make adjustments and modifications according to the array diagrams of his predecessors. For example, the previous trap and kill array was modified by him based on a few ready-made array diagrams and the effect was surprisingly good.

Xia ruofei quickly went through all the formations he knew in his mind. There were many formations for fire attack, but none of them met the requirements.

First of all, the area of the formation had to be large enough.

The diameter of the ring formed by the camel's thorn bushes was at least one kilometer, and the inner diameter was about 950 meters. In other words, the depth of the camel's thorn bushes was about 50 meters.

If Xia ruofei used fire, he must have a formation that covered a large area of at least one kilometer.

There were some formations with large areas recorded in the Jade talisman of inheritance. However, it was rare to see formations with such a large area of effect. There were one or two that Xia ruofei was not particularly satisfied with.

## Chapter 3368 Chain mission (2)

He couldn't help but reveal a bitter smile as he thought to himself, "It seemed like he would have to modify the array himself ...

This was obviously more time-consuming, but it was still faster than using brute force to remove the camel's thorns bit by bit.

Seeing that Xia ruofei was deep in thought, Ling Qingxue did not dare to disturb him. She stood quietly at the side.

It was naturally not easy to modify a new formation.

Xia ruofei took out two chairs from the spirit map space and said, "Qingxue, let's sit down and rest for a while! I need to think about how to set up the formation!"

Ling Qingxue replied obediently, "yes!" There's no hurry, you can think about it slowly. No one's urging us anyway ..."

As soon as she finished speaking, Xia ruofei saw another line of words in his perceptual mirror: [The trial tower's fifth level chain mission has begun. First level, bi an has cracked the star Fern thorn ring and has received the trial tower's fourth level mission reward. The time limit for the mission is eight hours. If the star Fern thorn ring is not cracked by the time limit, the mission will be considered a failure and the trial tower's journey will end. After four hours, the mission reward at the center of the star Fern thorn ring will gradually decrease as time passes. If the time limit is four hours, the first level mission will be considered completed, but the mission reward for the trial tower's fourth level will be canceled.]

Xia ruofei did not know whether to laugh or cry. He looked at Ling Qingxue and smiled bitterly. "Qingxue, your mouth is really blessed! Whatever I say comes ..."

"What's wrong?" Ling Qingxue was confused.

Xia ruofei said, "I just received a mission prompt. This thing that looks like a camel's thorn is called the star Fern thorn. Solving this star Fern thorn loop is the first part of the chain mission on the trial tower's fifth level. We have to complete it within eight hours. Otherwise, we will be judged as failing the trial and will be sent out of the trial tower. Moreover, we'd better complete it within four hours. Otherwise, after four hours, the rewards for the next level will gradually decrease until it's completely canceled."

Ling Qingxue's eyes widened. She already knew that Xia ruofei had received the perceptual mirror as a reward when he had completed the mission and could receive the mission notification immediately. However, she was still very surprised by the mission's restriction.

"It can't be!" Ling Qingxue said, "that's the reward for the trial Pagoda's fourth level. Why should we be restricted by the fifth level's mission? This doesn't make sense!"

Xia ruofei chuckled and said, "the rules are set by others. Whether they're reasonable or not, it's up to them." Besides, you just said that we didn't go through any dangerous tests on the 4th level, so it doesn't matter if we get the reward or not!"

"I was just saying!" Ling Qingxue pouted. "We've all completed the mission, and we've even broken the record. Why shouldn't we be rewarded?"

Xia ruofei laughed and said, "that's right. That's why we should get rid of these star Fern thorns as soon as possible. We just have to complete the mission within the stipulated time. That's all." No one can stop us from taking away the rewards that belong to us!"

Xia ruofei's heroic spirit reached the clouds. Ling Qingxue saw this and could not help but reveal a confused expression. She looked at Xia ruofei and said, "I believe you can do it! Good luck!"

Xia ruofei nodded and said, "sit down and rest. I need to think about the formation ..."

"Let's just use the time array flag!" Ling Qingxue said, "that way, you'll have a lot more time!"

Xia ruofei slapped his forehead and said, "that's true ... My brain seems to have short – circuited today!" I need you to remind me every time. Maybe I'm too excited to see my wife ... Hehe!"

Ling Qingxue couldn't help but roll her eyes at Xia ruofei and said, "The countdown has already started, and you're still in the mood to talk? Hurry up and set up the formation!"

Xia ruofei chuckled and took out the time array flags from the spirit map space. With a wave of his hand, the array flags landed accurately in their respective positions.

Now that Xia ruofei was extremely familiar with the time formation, he could set it up with a wave of his hand.

Xia ruofei grabbed the chair with one hand and smiled at Ling Qingxue. "Qingxue, you can wait outside the formation! This way, we won't have to wait that long!"

Ling Qingxue nodded and clenched her fist to cheer Xia ruofei on.

Xia ruofei took the chair and stepped into the formation. Then, he sat down and started to deduce the transformation plan in his mind.

He then took out a pen and paper from the spirit map space and quickly wrote down some of the thoughts in his mind. He then began to draw and calculate on the paper.

Xia ruofei was completely immersed in the knowledge of arrays and had completely forgotten the passage of time.

By the time he finished his last stroke, there was already a pile of crumpled waste paper around him. At the same time, there were already twenty to thirty pieces of useful manuscript paper.

Xia ruofei's eyes showed a trace of satisfaction. After some complicated calculations, he had finally combined the three formations. This new formation could have a radius of three kilometers and was mainly used for fire attacks.

Xia ruofei had also used the black flames in the trap and kill array as a reference. This new array was extremely powerful in terms of fire attacks.

Xia ruofei picked up all the pieces of paper and looked through them one by one. At the same time, he ran through them in his mind to make sure that there were no obvious mistakes. Then, he flicked the paper in satisfaction, stood up, and walked out of the array.

"RUO Fei, have you thought of what formation to use?" Ling Qingxue came up to him and asked.

Ling Qingxue did not know that Xia ruofei wanted to create a new array. Even though it was not created out of thin air, it was still very impressive to modify and integrate the original array. After all, the array diagrams of the predecessors had been tempered thousands of times. It was easier said than done to change the structure inside, retain the function one wanted, and add the attributes of other arrays.

Ling Qingxue was unaware of all this, but she still admired Xia ruofei.

Xia ruofei smiled. "I've prepared an array. I don't know how powerful it is and whether it can deal with the star Fern thorn ring. But it's worth a try. Oh, right ..."

Xia ruofei glanced at Ling Qingxue and asked, "How long have I been in there?"

"Exactly 30 minutes!" Ling Qingxue replied without hesitation.

Xia ruofei was shocked. The time array flags he had set up could provide a time flow difference of 90 times. That meant that he had been in the time array for 45 hours, which was almost two days and two nights!

Xia ruofei was completely immersed in the ocean of knowledge of arrays and did not feel the passage of time. He thought that he had only been in there for a short while. Compared to the outside world, time did not seem to have passed at all! He didn't expect it to be nearly two days and two nights.

After reaching the Golden core stage, Xia ruofei was close to fasting. Even if he did not eat for a few days, as long as he could replenish his spiritual energy, there would be no problem at all. Therefore, it was equivalent to two days of closed – door cultivation. He did not feel hungry even if he did not eat or drink.

Fortunately, Xia ruofei had the time array flag. Otherwise, four hours wouldn't even be enough to study an array. He might not even be able to design an array before the time was up and he would be teleported away.

It took him half an hour just to study the formation theory. Xia ruofei felt even more pressed for time.

He said, "then I have to hurry and prepare the materials needed to set up the formation!" Qingxue, you should rest for a while more! After I've cleaned up these star Fern thorns, I'll find some time to accompany you properly!"

"En!" Ling Qingxue nodded and said, "there's no need to be anxious. You can't eat hot tofu if you're anxious. There's still enough time now!"

"I got it!" Xia ruofei nodded.

Then, he stepped into the time formation and took out a large number of formation materials from the spirit map space. He began to process them.

After another three hours, which was about two minutes in the outside world, Xia ruofei finally finished preparing the materials for the formation.

With a wave of his hand, he removed the time formation and smiled at Ling Qingxue. "Qingxue! The formation is ready, I'll set it up now, just wait and see these star Fern thorns burn you in flames!"

#### Chapter 3369 Blazing Star Fern thorn (1)

Ling Qingxue looked at Xia ruofei's child – like smile and couldn't help but smile as well. She nodded and said, "Good luck! Let's burn these bad guys to the ground!"

Xia ruofei laughed and started to set up a formation.

Xia ruofei had specially modified this formation that focused on fire attacks. The materials used to set up the formation were all distributed on the periphery. It could be used within a radius of about three kilometers and then attack the interior.

Xia ruofei chose to set up the formation at a distance of more than 20 meters away from the star Fern thorn. After so many attempts, he felt that this distance was relatively safe. It could ensure the

maximum effect of the formation and not attract the star Fern thorn's attack while he was setting up the formation.

This array was basically designed by Xia ruofei himself, but he combined some existing array principles. It was more original than the trap and kill array, so even though it was his first time setting up an array, he did not feel rusty.

This was because he had already simulated this formation in his mind and on paper many times.

Xia ruofei circled around the ring of star Fern thorns and placed the formation materials down one by one. Occasionally, he would stop to check his position before quickly continuing to set up.

After about 20 minutes, Xia ruofei put down the last set of formation materials.

He had already made a full circle around the star Fern thorn ring and returned to the starting point.

Xia ruofei took out ten crystals from the spirit map space.

Then, he placed the ten origin crystals into a hexagonal jade stone that was completely engraved with mysterious formation patterns outside the array.

The biggest feature of this formation was that the control core of the formation, which was the hexagon that the origin crystal had been placed in, was located outside the formation.

Moreover, this formation could use spirit stones, spirit crystals, and even origin crystals of a higher energy level.

Of course, when using different energy sources, the power of the formation would also be completely different.

In order to end the battle as soon as possible, Xia ruofei used the crystals with the highest energy purity. He used ten of them at once and placed crystals in every position of the energy source.

In this way, he could basically squeeze out the greatest power of the array.

Of course, the consumption was also obvious.

Xia ruofei was already at the beginning stage of the Golden elixir realm. The great way of the Dao required a lot of energy. One crystal was enough for him to cultivate for a long time. It was indeed a big deal to use ten crystals at once.

Xia ruofei had also considered that if he successfully completed this mission, he would receive the reward for breaking the record on the fourth floor of the trial Pagoda. Other than the upgrade of the elemental storage Pearl, he would also receive 1000 elemental crystals.

In comparison, ten origin crystals were insignificant.

Besides, Xia ruofei was not sure if the fire attack was effective on the star Fern thorn. He had to try it out as soon as possible. If it was not effective, he would have more time to try other methods.

After Xia ruofei placed the crystals, he used his spiritual power again to check the entire formation. Then, he took a deep breath, made a hand seal, and sent it into the core of the formation.

Ling Qingxue also held her breath. She stood beside Xia ruofei and looked at the star Fern thorn ring in front of her.

One second, two seconds, three seconds ...

The array didn't move at all, and Ling Qingxue couldn't help but show a puzzled expression.

However, at this moment, a ring – shaped flame suddenly appeared twenty to thirty meters away from the star Fern thorn ring. A wave of hot air swept over, causing Ling Qingxue to subconsciously hold Xia ruofei's arm tightly.

Xia ruofei looked very calm. He had a rough idea of the power of this formation.

Hence, Xia ruofei gently patted Ling Qingxue's soft hands to comfort her. As for his eyes, they were fixed in the direction of the array.

After the ring – shaped flame appeared, it immediately began to extend inwards. The intense burning of the flame consumed a lot of air in the vicinity, so it accelerated the movement of the airflow. Xia ruofei and Ling Qingxue could feel the wind blowing around them.

As the saying went, fire borrowed the power of wind, not to mention that this was a flame controlled by a formation, so naturally the smaller the flame, the fiercer it would be.

The ring – shaped flame quickly penetrated inside. In a few breaths, he had already entered the attack range of the star Fern thorn and was less than twenty meters away from it.

In fact, when the array was activated and the flames appeared, the star Fern thorn belt had already begun to move restlessly. The star Fern thorns that looked very similar to camel's thorn began to sway even though there was no wind, as if they were quite uneasy.

The flames of this array were naturally different from ordinary flames in the mortal world. In fact, this inspiration came from the trap and kill array. The flames formed by the black light were almost pure white at the highest temperature. The temperature was so high that even the most difficult ore in the mortal world to melt would not be able to withstand it for a long time.

However, the flames produced by this fire array and the black flames of the confinement killing array could be said to be of the same origin. The star Fern thorns had clearly sensed the danger and began to withdraw in preparation for an attack.

Xia ruofei's star Fern thorn would only attack when he was within ten meters of her. However, this time, as soon as the formation flames entered the twenty – meter range, the star Fern thorn would burst out with a large number of thorns.

A large number of thorns burst out from the ring – shaped star Fern Bush within a radius of one kilometer, like a black shock wave extending from the inside to the outside. It was a spectacular scene.

#### Chapter 3370 Blazing Star Fern thorn (2)

Xia ruofei and Ling Qingxue were standing at a safe distance, so they did not move an inch. They just stood there and watched the show.

Of course, Xia ruofei was also constantly forming hand seals to control the formation carefully. At the same time, he was paying close attention to the operation of the formation and the consumption of energy.

In this situation where the power of the formation was squeezed to the extreme, the consumption was quite large. The energy in the ten crystals was rapidly flowing away. It was a few times faster than when Xia ruofei was cultivating.

Xia ruofei was not stingy with his crystals and kept the array running at its highest intensity.

The thorns that burst out could not do anything to the invisible and shapeless flames.

Moreover, after those thorns shot into the ring of flames, the star Fern thorn immediately retracted them. However, there were already a portion of thorns that had failed to be retracted, most likely burned by the ring of flames.

Xia ruofei was relieved to see this.

It seemed that he had made the right choice. These star Fern thorns had not broken away from their nature as plants, and fire was clearly their natural enemy.

Xia ruofei formed a hand seal, and the ring of flames compressed further.

The star Fern spikes all burst out madly, but other than attacking with spikes, they could only dance on the spot, but they couldn't form an effective way to deal with the flames.

Finally, the ring – shaped flame extended to the outermost ring of the star Fern thorn ring.

The outermost ring of star Fern thorns and the flames began to come into direct contact.

The star Fern's thorns danced even more wildly, and the thorns completely burst out, but they still couldn't stop the flames.

When the flame touched the outermost star Fern thorn, a burst of crackling sounds came, and the vines of these star Fern thorns were ignited at once.

With a boom, the star Fern thorn itself seemed to be the best ignition agent, and after it was ignited, the flame was almost twice as fierce as before.

Xia ruofei was overjoyed. He further urged the formation to compress.

Perhaps the ordinary flames of the secular world would not cause any harm to the star Fern thorn, but the flames produced by this fire array had become a talisman that urged them to die.

The ring – shaped flame did not meet any resistance in front of the star Fern thorn. It pushed forward like crushing dry weeds and smashing rotten wood. More and more star Fern thorns were set on fire. Crackling sounds could be heard without end, and thick smoke kept rising. It was to the point that Xia ruofei and Ling Qingxue could no longer see the situation inside clearly. They could only release their spiritual power to investigate.

To Xia ruofei, he didn't need to do anything after the formation was set up. But to the star Fern thorn ring, this was a disaster.

The ring – shaped flame burned for about 15 minutes. Xia ruofei's spiritual power could sense that the inside was empty. Obviously, the ring – shaped flame had burned to the innermost layer of the star Fern thorn ring.

Xia ruofei immediately changed his hand seal and controlled the ring of flames to stop extending further. At the same time, he continued to burn with the highest power and launched a destructive attack on the star Fern thorn ring that was already completely covered in the ring of flames.

Ling Qingxue was stunned by the spectacular scene in front of her. She held Xia ruofei's hand tightly and could not believe her eyes.

When Xia ruofei was setting up the array, she had seen it with her own eyes. There were only some simple jade stones, array talismans, and a few array flags. The most valuable thing was ten origin crystals. But once the array was formed, it could explode with such a great power. It was simply too terrifying.

The ring – shaped flame continued to burn for another ten minutes. Xia ruofei's spiritual power detected that the star Fern thorn that was completely submerged in the flames had been burned to death. There was not a single trace of life left.

Xia ruofei then changed his hand seal. Instantly, the ring of flame started to become smaller and eventually extinguished.

The thick smoke gradually dispersed, and the situation in the bonfire was finally revealed to Xia ruofei and Ling Qingxue.

The two of them looked at everything in front of them, their hearts incomparably shocked.

All the star Fern thorns remained the same as when they were shooting out the thorns, but they had completely turned white. There were many more thorns on the ground that were also white.

After the flames were extinguished, there was not even a trace of smoke in the entire fire field. It could be seen how thoroughly the fire had burned.

Xia ruofei waved his hand and a wave of vital Qi was released from his hand, bringing with it a strong wind.

Following that, the star Fern thorn belt that was still in an attacking position in the fire field was turned into ashes when the strong wind blew past. The entire star Fern thorn belt collapsed like dominoes, extending to the ring at the far end.

Similarly, the thorns on the ground were also burned to white.

A white ring with a diameter of about one kilometer appeared on the ground.

This was really burned to the point where not even a single residue was left!

Xia ruofei waved his palm again, and the white ring in front of them suddenly opened up a path.

Xia ruofei smiled as he held Ling Qingxue's hand and said, ""Done! Wife, let's go and receive our reward!"

The ground that had been scorched by the Super flames was still very hot. Even though Xia ruofei had flown over with Ling Qingxue on his flying sword, he could still feel the waves of heat from the ground.

However, Xia ruofei only needed to release a little of his vital Qi to easily isolate the heat waves.

Without the obstruction of the star Fern thorn ring, Xia ruofei easily brought Ling Qingxue to the spot of light on the perceptual mirror map on his flying sword.

Actually, this spot of light was located in the center of the star Fern thorny ring belt. After Xia ruofei and Ling Qingxue entered the star Fern thorny ring belt, they found the place immediately.

Because it was very conspicuous.

Xia ruofei and Ling Qingxue had just entered the inner part of the star Fern thorn ring when four stone pillars slowly rose from this place. It was hard for them not to notice.

Xia ruofei jumped off the qushuang flying sword with Ling Qingxue and walked to the stone pillar that was about four feet tall.

At the top of the first stone pillar, there was a groove that was exactly the same size as the energy storage Pearl.

Clearly, this was used to upgrade the elemental storage Pearl.

At the top of the second stone pillar was an ancient – looking storage ring. Xia ruofei picked up the storage ring and used his spiritual power to check it. He realized that it was ownerless.

To be more precise, the owner of the storage ring must have erased his spiritual force imprint after storing the items.

Xia ruofei easily recognized the storage ring as his master and checked through it. There were indeed 1000 crystals in it and nothing else.

Xia ruofei couldn't help but feel speechless. This was a bit too generous. Just to give out a reward, they gave him a storage ring.

In the cultivation world on earth where resources were scarce, a storage ring was extremely precious. Even the poorer golden core cultivators might not even have one. As for Qi condensation cultivators, it could be said that there were very few who had storage rings like Ling Qingxue and Song Wei.

Xia ruofei took out all the crystals in the ring and transferred them into the spirit map space. Then, he wiped away his spiritual imprint and handed the storage ring to Ling Qingxue. He smiled and said, "This is an extra gift, you can keep it!"

Ling Qingxue quickly declined, "I don't want to!" I don't want to! I already have a storage ring, there's no point in me keeping it! And if Wei Wei finds out ..."

"Wei Wei wouldn't be so petty!" Xia ruofei said with a smile.

"That won't do either! Weiwei ..." Ling Qingxue's eyes suddenly lit up as she took the storage ring from Xia ruofei's hands. She smiled and said, "I know what to do! I'll give this storage ring to uncle song when I get back! Didn't he already start cultivating? He'll be able to use it!"

...

Xia ruofei was slightly stunned, then he smiled and said, ""That's a good idea! But I've already given you the storage ring, so you can do whatever you want with it!"

Ling Qingxue chuckled and said, "I didn't expect you to be so meticulous!" You're deliberately leaving me to be the good guy, right?"

Xia ruofei laughed and said, "there's no need for us to separate!" It's the same even if you give it to me, right?"
