

## God tier Farm 3391

### Chapter 3391: Unexpected reward (1)

As Ling Qingxue's cultivation level was still relatively low and her spiritual power was far inferior to Xia ruofei's, she did not feel it very clearly.

Even so, she still felt that cultivating in this stone pillar array was much more efficient than usual. She couldn't even sense the effect of the array, but she felt that her mind was more clear than before, and her cultivation was so smooth.

As for Xia ruofei, he had analyzed the formation himself and his cultivation was close to the intermediate stage of the Golden elixir realm. His spiritual power had also improved by leaps and bounds, so he could feel it more clearly.

When he was cultivating, he felt as if there was a warm stream of air that was constantly nourishing his physical and spiritual body. His mind was much clearer than usual, and his cultivation of the 'great Dao Sutra' was also much smoother than usual.

The spiritual Qi in the space of the trial Pagoda was already very rich. When he reached the fifth floor of the trial Pagoda, the concentration of spiritual Qi here was no less than that of the Peach Blossom Island. The stone pillar array also had the function of gathering spiritual Qi, so the concentration of spiritual Qi here was even higher very soon.

Xia ruofei and Ling Qingxue naturally did not hold back. They started to absorb and cultivate.

Xia ruofei also took the opportunity to pour his energy into the energy storage Pearl. After all, this was free spiritual energy. With the help of the stone pillar array, the spiritual energy seemed to have been purified and it was easier to absorb. Naturally, Xia ruofei was more motivated to absorb it.

All in all, Xia ruofei had a simple experience and realized that the stone pillar formation was a comprehensive aid to cultivation.

It was conceivable that if such an array could be set up in a sect, it would greatly improve the overall strength of the sect!

However, Xia ruofei knew that this was just a thought. In the trial Pagoda, not even a puppet's corpse could be stored in the storage space. The precious topaz essence could only be absorbed on the spot. Once the time for the mission was up, it would be transported away immediately. If it was not absorbed completely, it would be a waste no matter how much Topaz essence it had.

In this way, this stone pillar array was countless times more precious than the yellow jade essence. Moreover, the range was so wide, so it was even more impossible to secretly bring it out.

Hence, Xia ruofei was thinking of taking advantage of the situation. While he was still on the fifth level of the trial Pagoda, he should quickly use the formation to cultivate. Otherwise, he would not be able to enjoy such thoughtful auxiliary services after he left.

In the hidden space enshrouded in purple mist, the green – robed elder in the towering Hall saw the scene in the mirror and couldn't help but laugh. He muttered to himself, ""This little boy has really lived a lot of hard days, he doesn't even let go of such a small advantage ... But this old man's time can't be wasted by you guys!"

The green – robed old man waved his hand as he spoke.

On the fifth floor of the trial Pagoda, Xia ruofei and Ling Qingxue were cultivating to their heart's content, absorbing the spiritual Qi from the stone pillar array.

The stone pillar formation shook slightly. Xia ruofei could clearly feel that the operation of the formation had slowed down.

He immediately sensed it and opened his eyes in surprise.

The scene in front of him made Xia ruofei's eyes widen involuntarily. At this time, Ling Qingxue had also noticed the abnormality. She stopped cultivating and opened her eyes. At first glance, she could not help but exclaim softly. She looked at Xia ruofei and asked, "RUO Fei, what's going on? Could this formation be..."

Even though the spiritual crystals that Xia ruofei had inserted into the array were not used up yet, the stone pillar array had stopped working.

This was equivalent to the array losing control!

Furthermore, the entire stone pillar array started to tremble slightly.

Then, under Xia ruofei and Ling Qingxue's astonished gazes, the stone pillars slowly rose from the ground.

Xia ruofei grabbed Ling Qingxue's hand and was ready to take out the spirit map scroll at any time. If there was any danger, he would immediately hide in the spirit map space with Ling Qingxue.

However, even though the rise of the stone pillars caused the entire wasteland to shake, there was no danger.

In a short while, all the stone pillars had risen.

They seemed to be lifted by an invisible force, quietly floating in the air, still maintaining the original form of the array.

Seeing this, Xia ruofei couldn't help but Mutter to himself, ""Could it be that the senior who built this Tower of Trials was so stingy that he didn't even give the junior A chance to use the array after the task was over and took it back in a hurry... But my spiritual crystals are still inside! It's confiscated just like that? That's too ruthless!"

In the space filled with purple Qi, the purple – robed elder was so angry that he glared at Xia ruofei and scolded, ""Bullshit! Do 1 look like such a petty person?"

After saying that, the purple – robed old man snorted coldly again. He waved his wide sleeves and cast a mysterious magic art.

If one were to observe carefully, one would notice that although the purple – robed elder looked displeased, there was actually a hint of a smile in his eyes.

Obviously, he was not really angry with Xia ruofei. On the contrary, he admired Xia ruofei more.

When the elder in the green Taoist robe waved his sleeves and cast a new technique, Xia ruofei and Ling Qingxue, who were on the fifth floor of the trial Pagoda, suddenly realized that the stone pillar array had suddenly burst out with a strong light. The two of them subconsciously closed their eyes..

## Chapter 32: Unexpected reward (2)

However, Xia ruofei quickly released his spiritual power to investigate and opened his eyes.

His spiritual power was like a clay ox entering the sea, unable to find anything at all.

To the naked eye, it was just a white light, which was very dazzling.

Xia ruofei could even see that there seemed to be stone pillars moving within the white light.

He was simply dazed, and couldn't help but mumble to himself, ""Could it be that these stone pillars have gained sentience?"

Ling Qingxue couldn't help but laugh."What nonsense are you talking about?"

Xia ruofei said seriously,"listen to my analysis!" "I'm the one controlling the stone pillar array. I put in spirit crystals to make the array work, but I didn't do anything else. However, the stone pillar array stopped on its own and now it's making such a big movement. If this isn't the array becoming sentient, what is it? I've heard that those very high – Level arrays can produce an array spirit. Isn't that a spirit? It's just a different way of saying it!"

"Really? You're not lying to me, right?" Ling Qingxue asked, her face full of doubt.

Xia ruofei laughed and said,"I don't even know what's going on. Why Would I Lie to You?" The existence of a formation spirit in high – Level formations is the so – called great formation having a spirit. This is recorded in many ancient books, I'm not speaking nonsense!"

At this moment, the white light that wrapped around the stone pillar array began to weaken, as if it was about to disappear.

Seeing this, Xia ruofei and Ling Qingxue naturally stopped bickering. The two of them looked in the direction of the stone pillar array in unison.

Ling Qingxue held Xia ruofei's hand tightly and said, ""RUO Fei, no matter what happens, you have to stay calm. After all, it's our biggest victory to pass this round!"

"En!"

Xia ruofei nodded and stared unblinkingly in the direction of the stone pillar array. The white light had weakened by quite a bit and was naturally not as glaring.

Through the white light, Xia ruofei was surprised to find that the stone pillars that formed the formation had all disappeared. Only nine small flags stood quietly on the ground.

What was this?

This was beyond Xia ruofei's knowledge. He was very clear that the stone pillars that formed the formation were real stone pillars. One to two thousand stone pillars had disappeared after a few flashes of white light?

Also, what's with this small flag? There were no flags in the formation just now.

Just as Xia ruofei was about to release his spiritual power to investigate, a line of words popped up in his perceptual mirror.

Congratulations, you have received the highest reward from the trial Pagoda's fifth level, a set of flags of the Suan ni heaven formation!

Xia ruofei was stunned. He looked at the nine flags on the ground.

Sure enough, when his eyes fell on the nine flags, their information immediately appeared in the field of vision of the perceptual mirror: The allheaven formation flag could be used to set up an earth grade formation, the allheaven formation. The highest heaven formation was a supplementary formation for cultivation, and its main function was...

The perceptual mirror gave a very detailed introduction, and it even included the usage of nine array flags.

This time, Xia ruofei's array skills had improved greatly. Moreover, this was only an array method, so it was not difficult for Xia ruofei to master it. He had only taken a little look and had already mastered it.

What surprised Xia ruofei was that as long as the nine array flags were placed in the right positions, they would immediately form the stone pillar array. To be more precise, it was called the heavenly Luo array.

Xia ruofei thought to himself, "the name sounds domineering. It must be the meaning of the overarching heavenly Supreme celestial. Does it mean that with the help of this formation, 1 can become an overarching heavenly Supreme celestial smoothly?" This tone was a little too arrogant.

The stone pillars could not have appeared out of thin air. Hence, the nine array flags actually had a spatial storage effect. The stone pillars that formed the array formation were stored separately in the space of the array flags. As long as they were placed in the designated positions, a spell could be activated and the stone pillars would be released to a fixed position, forming the stone pillar array that Xia ruofei had just seen.

In addition, the array must also need energy to power, and the spatial storage function of the nine array flags included the storage of energy such as spirit crystals and origin crystals.

The user could store some spirit crystals or origin crystals in advance, so that when they needed to use the array, they could just throw out the array flag. As long as the spirit crystals or origin crystals were not exhausted, the array could continue to operate. It was indeed very convenient.

Just as Xia ruofei was about to try out the array flags, the perceptual mirror seemed to be able to guess what he was thinking. A line of words popped up almost at the same time. Please collect the reward and quickly head to the passageway entrance without delay! The highest heaven formation was not allowed to be used on the fifth level of the Tower of Trials, or it would be taken back!

Xia ruofei couldn't help but be dumbfounded. Why was this request so weird? What was this about?

However, the perceptual mirror would not lie. The information it released was timely and accurate. Hence, Xia ruofei naturally would not try to break the rules. He made a decision after a little thought.

Thus, he waved his hand and directly used his mental power to retrieve the nine array flags.

Then, with a thought, Xia ruofei kept the nine array flags into the spirit map space.

Xia ruofei was overjoyed!

Anything that could be stored in the space could be taken out directly. In other words, Xia ruofei could bring this super awesome auxiliary cultivation formation back to Earth.

The value of this formation alone was already difficult to estimate.

Even if it was a thousand or ten thousand origin crystals, it would not be as useful as the highest heaven formation.

With thousands of origin crystals, one could indeed create one or even more experts. However, the influence of the Luotian formation on a sect was more positive, and it could continuously strengthen the foundation.

These were two completely different realms.

Thinking of this, Xia ruofei's mood became even better.

Ling Qingxue saw that Xia ruofei had put away the array flag and was surprised and happy. She held Xia ruofei's arm and shouted happily, "RUO Fei, it's done! You put away all those flags!"

Xia ruofei smiled and nodded. "Yup! This is the reward for our trial Pagoda's fifth level. Those array flags can be used to set up the stone pillar array just now, which is extremely helpful for cultivation! We've really picked up a treasure this time..."

Xia ruofei suddenly stopped. He had a strange look on his face. "Qingxue, do you think... If I didn't stop and study this array thoroughly and activate it with spiritual crystals, I wouldn't have been able to get this reward?"

Ling Qingxue was also stunned when she heard this. After a long while, she said in an uncertain tone, "It should ... Be... Like this?"

Xia ruofei immediately shouted, "this is too much!" If I were to rush to the sixth floor as soon as I completed the mission, wouldn't I be missing out on such a powerful array? This scheme is too deep!"

"Who said it wasn't?" Ling Qingxue felt the same way. "It's the same for the fourth level of the trial Pagoda. You've passed, but you can only get the reward on the fifth level. There are so many obstacles too. It's really a trap with every step!"

Xia ruofei smiled bitterly and said, ""The seniors who designed these levels are really..."

In the hidden space enshrouded in purple mist, the old man in the green Daoist robe was overjoyed. He laughed and pointed at the mirror in front of him, saying to himself, ""Little doll! How can my reward be so easy to get? Forget about the other elemental crystals and elemental storage pearls, but this highest heaven formation is an earth grade formation. Not to mention you, a little Jindan – Stage kid, even this old man would feel a bit of heartache if I were to give it away!"

On the fifth level of the trial Pagoda, Xia ruofei smiled bitterly and said, ""It's a good thing I have a strong desire for knowledge... Qingxue, let's not talk about this. Let's hurry to the entrance of the sixth floor! I've already received a notification that we must hurry to the sixth floor's passageway without delay.. It seems that it's impossible to cultivate on the fifth level of the trial Pagoda!"

Chapter 33: The Tower of Trials "sixth floor\_I

"Then let's find the exit first!" Ling Qingxue said.

"Mm! This time coming to the 5th level of the trial Pagoda, the harvest can be considered not small!" Xia ruofei smiled and said, "this set of highest heaven formation flags is more precious than all the previous gains combined!"

Xia ruofei carried Ling Qingxue and jumped onto the qushuang flying sword. Then, they followed the instructions on the perceptual mirror map and flew in the direction of the passage to the sixth floor.

Along the way, the two of them would occasionally come across star Fern thorns. Xia ruofei would habitually check them first, but they were all ordinary star Fern thorns, so he would go around them and continue moving forward.

After flying for about an hour, Xia ruofei and Ling Qingxue arrived at the spot of light indicated on the perceptual map.

Actually, Xia ruofei could see from afar that there were many star Fern thorns growing here. These star Fern thorns were no longer growing close to the ground. Instead, they were wrapped around like vines, forming the shape of an arch.

Xia ruofei and Ling Qingxue were both very familiar with the light screen at the entrance of the tunnel. It was inside this "arched door".

Seeing this, Ling Qingxue couldn't help but frown and ask, ""RUO Fei, could this be the entrance to the sixth floor? There are so many star Fern thorns, why don't we go over?"

Xia ruofei pondered for a moment. 'These star Fern thorns form an arched door. We really can't use an array to burn it. What if the star Fern thorns are burned out and the passageway is gone?"

"Yup!" Ling Qingxue said, frowning.

Xia ruofei landed his flying sword at a safe distance and said to Ling Qingxue, ""I'll go check out the situation first. You stay here and be careful!"

"It's too dangerous for you to go there like this!" Ling Qingxue said as she grabbed Xia ruofei's hand.

Xia ruofei smiled and said, "but we're already at the entrance of the passage. We can't just stop because of a few star Fern thorns, can we?" "I'll go and investigate first! My cultivation level is higher than yours, so if there's any danger, I can handle it!"

Ling Qingxue had seen the power of the star Fern's thorn. She held Xia ruofei's hand and said, "Ruofei, let's think of another way! It's too dangerous for you to go there so rashly!"

Xia ruofei laughed and said, "of course I have a way to save my life. You don't have to worry!" And ... I feel that this star Fern thorn is a little different from the ones we've encountered before. It gives me a peaceful feeling, as if... It has been tamed. As for the specific situation, we still have to try to find out!"

After hearing Xia ruofei's words, Ling Qingxue let go of her hand and said, "Then you must be careful!"

"I know! Don't worry!" Xia ruofei smiled and patted the back of Ling Qingxue's hand.

After Ling Qingxue let go of Xia ruofei, he stepped onto the qushuang flying sword and flew towards the "arched door" with full vigilance.

He also released his mental force, constantly paying attention to the star Fern thorns that formed an arch door.

Before the star Fern thorn launched an attack, there were also signs. For example, most of the star Fern thorns would suddenly contract and then release thorns. If he used his spiritual power to investigate, he would be able to find the signs earlier.

Xia ruofei slowed down and advanced towards the arched door. He was on full alert, but the star Fern thorns were very calm and had no intention of attacking.

If Xia ruofei could not sense the strong life force, he would have thought that these star Fern thorns were fake.

Not only could he sense the life force of the star Fern thorn, but he could also sense a trace of a peaceful aura. This aura was not meant to ease Ling Qingxue's heart.

Just like that, Xia ruofei reached the arch door. He even reached out to touch the familiar screen.

Those star Fern thorns were still obediently standing there, with no intention of launching an attack.

In the distance, Ling Qingxue was also holding her breath. She looked at Xia ruofei without blinking. As Xia ruofei got closer and closer to the arch, she became more and more nervous. Her heart was about to jump out of her throat.

She only felt at ease when Xia ruofei touched the light screen and flew back on his sword.

"Qingxue, it looks like these star Fern thorns aren't aggressive. Let's go over directly!" Xia ruofei said.

Ling Qingxue looked at the dense cluster of star Fern thorns and still felt a little scared. However, she still nodded bravely and said, "Alright!"

With Xia ruofei by her side, she would feel much more at ease.

Xia ruofei held onto Ling Qingxue's soft hands and said, "Don't be afraid. If there's any danger, I'll definitely be able to protect you. As long as you completely relax and don't resist, it'll be fine!"

Xia ruofei would definitely have prepared for the worst. Once the star Fern thorn suddenly attacked, he would definitely not be able to Dodge and protect Ling Qingxue at the same time. Thus, he had to use the spirit map space.

This was not the first time Xia ruofei had reminded Ling Qingxue of this, so she simply nodded and said, "Understood!"

"Then let's go!"

Xia ruofei held Ling Qingxue's hand and stepped onto the qushuang flying sword. Then, they carefully flew in the direction of the arched door.

Soon, the two of them entered the twenty – meter range.

According to Xia ruofei's experience, this range was basically the attack range of the star Fern thorn.

When Xia ruofei had flown over by himself, he was not too worried. Now that he had Ling Qingxue with him, he was honestly under a lot of pressure..

Chapter 34: Tower of Trials "6th floor -2

He didn't dare to relax for even a moment. He pushed his mental power to the maximum and paid attention to the situation of every star Fern thorn.

The moment any of the star Fern thorns showed signs of attacking, he would not hesitate to retreat. At the same time, he would immediately put Ling Qingxue into the spirit map space for protection.

The star Fern thorns had been releasing a peaceful aura the entire time. They swayed gently with the gentle breeze. If Xia ruofei and Ling Qingxue had not experienced the ferocity of the star Fern thorns attacks, they would have been confused by their appearance.

Of course, the star Fern thorn had indeed not launched any attacks so far.

Xia ruofei maintained a moderate speed and slowly approached the arch.

He held onto Ling Qingxue's soft hands, and his palms were already slightly sweaty.

Xia ruofei wasn't afraid. He just felt pressured because he had to protect Ling Qingxue.

It was as if the star Fern thrust had changed its attitude. It completely ignored Xia ruofei and Ling Qingxue, who were already two to three meters away from them. It had no intention of attacking.

Xia ruofei looked at the screen of light that was right in front of him. He made up his mind and activated his flying sword.

The speed of the qushuang flying sword suddenly increased several times, instantly reaching its maximum speed.

In the blink of an eye, Xia ruofei and Ling Qingxue were riding on their flying swords and crashed into the light screen.

A familiar sense of dizziness hit him, and soon Xia ruofei felt his feet on the ground again.

The first thing he did was to turn his head to the side.

When he saw that Ling Qingxue was still by his side, and her soft hands were still tightly held by him, his heart finally relaxed.

At this moment, Xia ruofei finally had the time to observe his surroundings. He immediately released the blue immortal sword and controlled the blue immortal sword and the qushuang flying sword to be on guard.

Ling Qingxue took a deep breath and felt the rich spiritual Qi in the surroundings. She then smiled and said, "RUO Fei, this is the trial Pagoda's 6th level?"

Xia ruofei observed and said, "That should be right. Qingxue, the situation is still unclear, so we must be extremely careful! Don't get too far away from me!" "Mm! I know!" Ling Qingxue said.

Xia ruofei saw that the two of them were at the peak of a tall mountain.

Xia ruofei could not tell how high the mountain was because when he looked down, he could only see the clouds lingering halfway up the mountain. He could not see the foot of the mountain at all.

He tried to use his spiritual power to investigate, but when his spiritual power entered the clouds, it was like a clay ox entering the sea, and he could not get any feedback at all.

There was another strange thing about the mountain. There was no vegetation, not even a blade of grass, let alone trees. It was like a huge, towering rock.

Moreover, this mountain was particularly steep. It was almost vertical, as if it had been cut by a huge sword.

Such a terrain, if it was in the secular world on earth, would definitely be the favorite of rock climbing enthusiasts.

Even the best rock climber would find it difficult to climb up in such terrain.

Xia ruofei couldn't help but say in his heart, "If I didn't have the qushuang flying sword and didn't know how to ride a flying sword, wouldn't I be trapped in this small area on the peak of the mountain the moment I reached the 6th floor?"

He didn't know if any of the other cultivators in the exploration team could make it to this level, but if they didn't get a magic weapon like the bent Frost Flying sword in the Tower of Trials, they would have to spend a lot of effort to leave the mountain.

Of course, if there were no other dangers, such terrain was not difficult for cultivators. Even if they could not ride a flying sword, as long as they were careful, climbing down was not a problem.

Xia ruofei looked into the distance. He realized that the clouds were not only lingering around the mountainside of the precipice mountain he was standing on, but they also extended into the distance like a thick white carpet. They extended to the end of his sight, forming a spectacular sea of clouds.

In the sea of clouds, Xia ruofei could vaguely see other peaks emerging from the sea of clouds.

These mountains were of different heights, as if they were growing on the sea of clouds.

Xia ruofei felt that there should be more mountains, but they were too low and were completely covered by the sea of clouds.

Besides the steep terrain, Xia ruofei did not find any other danger.

"RUO Fei, what do we do now?" Ling Qingxue had also observed the surrounding environment and couldn't help but ask in confusion.

Xia ruofei said calmly, "wait!" Let's see what the mission for the 6th level of the Tower of Trials is"

Xia ruofei was clear that when the situation was unclear, it was better to stay where they were and wait patiently than to risk running around aimlessly.

Once the content of the mission in the perceptual mirror's field of vision was announced, he could have a target in mind.

"En!" Ling Qingxue nodded and looked at the vast sea of clouds."! don't have a good feeling about the clouds. When I look at the sea of clouds, I keep getting a sense of fear."

Xia ruofei nodded and said, "something's not right. If we really want to enter the sea of clouds, we must be very careful." Of course, it's best if we don't go down and stay far away."

Cultivators had an extraordinary sense of danger. Xia ruofei had a stronger sense of danger than Ling Qingxue, so he had long felt that there was something wrong with the sea of clouds.

In the perceptual mirror's field of view, there was still no new content in the mission bar.

Xia ruofei took out the formation flag of the highest heaven formation from the spirit map space and said with a smile, "Since we don't have any missions for now, let's not idle around. Let's cultivate for a while!"

With that, Xia ruofei waved his hand and accurately inserted the array flags into their respective seats.

Although the flagpoles were soft and the stones were hard, Xia ruofei was able to insert the nine array flags into the stones without much effort after he injected his vital Qi.

Then, Xia ruofei casually cast a spell.

Immediately, the formation flag began to tremble slightly. The blinding white light appeared again and surrounded the formation flag. It grew larger and larger, quickly expanding to a radius of about three kilometers.

Xia ruofei had already brought Ling Qingxue back to a certain distance.

In fact, the top of the mountain was not very big. The area of three to four kilometers basically occupied most of the entire top of the mountain.

When the dazzling white light gradually disappeared, the Luotian formation, which was formed by one to two thousand stone pillars, gradually appeared in front of Xia ruofei.

Xia ruofei had already stored a lot of spiritual crystals in the space of the array flag, so the array started to operate immediately.

Xia ruofei smiled at Ling Qingxue and said, ""Go! Qingxue!"

The two of them walked into the formation hand in hand, sat down cross – legged, and began to cultivate their own cultivation techniques.

While Xia ruofei was cultivating the "great Dao scroll", he was also constantly transferring his elemental energy to the elemental storage Pearl. As he was stuck on the fifth level of the Tower of Trials, the elemental storage Pearl had used up a lot of its elemental energy. Xia ruofei had not been able to fill it up.

There was no wind on the top of the mountain, and the surroundings were quiet.

Xia ruofei and Ling Qingxue had been cultivating for almost two hours. Xia ruofei had just filled up the energy storage Pearl and was ready to cultivate for a while more when a line of words appeared in the field of vision of the sensory mirror.

In fact, Xia ruofei really wanted to continue cultivating. With the help of the highest heaven formation, cultivation seemed to have become a very easy thing. With a clear mind, he was much more efficient than usual.

However, Xia ruofei was clear that his main goal was to complete the mission on the 6th level of the trial Pagoda and try to reach the highest level.

He had a faint feeling that if he could reach the top, he would obtain an unexpected and excellent opportunity.

Therefore, he immediately stopped his cultivation and looked at the line of words in the field of vision of the perceptual mirror..

Chapter 35: A difficult mission (1)

[Tower of Trials Level 6 quest: hunt and kill a goldthread nether snake.]

[Mission time: six hours]

Xia ruofei looked at the simple mission description and was a little stunned.

There was no quantity requirement. In other words, he only needed to kill one goldthread nether snake to complete the mission?

Thinking of this, Xia ruofei did not feel relieved. Instead, he felt even more stressed.

The mission had a time limit of six hours. If they couldn't complete the mission within this time, the result was obvious. They would be directly sent out of the Tower of Trials and would never have the chance to enter the higher levels of the training space.

There was no quantity requirement, which meant that the mission was very difficult.

They only needed to kill one goldthread nether snake in six hours. If it was easy, it wouldn't have been a mission for the trial tower's sixth floor.

"RUO Fei, what's wrong?" Ling Qingxue couldn't help but ask when Xia ruofei suddenly stopped talking.

"I've already received the trial Pagoda's sixth level mission. It'll probably be more troublesome," Xia ruofei said in a deep voice.

Then, Xia ruofei explained the mission to Ling Qingxue and said, "I'm afraid this goldthread nether snake won't be easy to deal with. We need to be mentally prepared."

Ling Qingxue nodded and said, "definitely!" RUO Fei, the time for the mission has started! We don't have time to think too much. Waiting here isn't a solution, we have to hurry!"

"En!" Xia ruofei nodded and said, "Qingxue, you must follow me closely. Don't worry, if anything happens, I will ensure your safety first!"

"I'm not as weak as you think!" Ling Qingxue smiled and said, "no matter what, my spiritual power is comparable to that of a golden core cultivator! You still have to focus on completing the mission. I still have the ability to protect myself!"

"I know!"

As soon as Xia ruofei finished speaking, he saw new words appear on the mission bar of the perceptual mirror. He quickly looked at it.

The mission notification bar said, "an adult golden thread nether snake has a Jet – Black body with three one – inch golden threads on its head. Its cultivation is comparable to a cultivator at the peak of the late golden core stage. It is extremely fast, and its scales and fangs are highly poisonous. It can spew out extremely corrosive poisonous mist. It is extremely dangerous."

Xia ruofei told Ling Qingxue what he had seen and mumbled, "At least there are some hints this time, so we won't have to search blindly!"

Ling Qingxue furrowed her brows and said, "this also shows that the goldthread nether snake isn't easy to deal with!" From what we know, peak late golden core cultivators are already much more powerful than us. They're also covered in poison and can spray out poisonous mist..."

Xia ruofei smiled freely and said, "No matter what, it's better to have information than not! Let's go! Let's go and meet this goldthread nether snake!"

With that, Xia ruofei held Ling Qingxue's hand and walked towards the edge of the cliff. The top of the mountain was about three kilometers in radius, and it was bare without any vegetation. One could see it clearly at a glance. Naturally, the goldthread nether snake could not be on the top of the mountain. Xia ruofei and Ling Qingxue could only climb down to find traces of the goldthread nether snake.

The mountain peak was extremely steep, and the cliff seemed to have been cut by a knife or an axe. The section near the top of the mountain was basically 90 degrees vertical.

It was basically impossible for ordinary people to climb down from such a cliff. However, for cultivators, it was just a little troublesome, not that they were helpless.

Of course, Xia ruofei could have brought Ling Qingxue down on his flying sword.

However, it was very dangerous to fly down on the sword when the situation was unclear. Once they were attacked in the air, the space for them to Dodge and move would be limited.

Besides, Xia ruofei had always been traumatized by flying on his sword to too high a height.

Last time, Xia ruofei had only flown to the top of a tree and he already felt his heart palpitate. This mountain was not low at all. The clouds were halfway up the mountain. Naturally, Xia ruofei was not willing to use the sword Kinesis flight method.

Hence, Xia ruofei decided to use a more secure method.

He directly took out a few large rolls of climbing ropes from the spirit map space, and then used a very professional technique to skillfully connect these climbing ropes together.

Xia ruofei did some calculations. These ropes were almost a thousand meters long. Luckily, Xia ruofei had the spirit map space. Otherwise, any mountaineer or rock – climbing enthusiast would not be able to bear the weight of such long ropes.

Then, Xia ruofei took out the largest nail and easily hammered a few large nails deep into the stone ground at the edge of the cliff.

The rocks on the cliff were very hard, but Xia ruofei used his vital Qi and managed to knock the nails deep into the ground.

He threaded the rope through the fixed rings on the top of a few nails and tied a few very professional knots. Then, he reached out and pulled gently to test the strength.

After making sure that there was no problem, Xia ruofei then grabbed the rope and threw it down the cliff.

“Qingxue, I’ll go first! You’re on top of me, so don’t get too far away from me. Keep a distance of two meters!” Xia ruofei said.

“Alright!” Ling Qingxue said.

Xia ruofei lifted the rope slightly and held it in his hand. He jumped out and used his legs to support himself on the cliff. He stabilized his body..

Chapter 36: A difficult mission (2)

Xia ruofei raised his head and shouted, “Qingxue, down!”

Ling Qingxue also squatted down and grabbed the rope with one hand. Then, with a flip of her body, her movements were very elegant as she arrived at the edge of the cliff.

To do such a move without any protection, it would be very dangerous for ordinary people. However, to cultivators, it was not difficult at all.

As the situation below was unclear, Xia ruofei carefully released the qushuang flying sword and the blue immortal sword, one on the left and one on the right, keeping a lookout.

This was also one of the reasons why Xia ruofei didn't choose to use the flying sword. This way, the flying sword could be used as a warning. After all, in the trial Pagoda, the flying sword of the bent frost was the most suitable for him.

The qushuang flying sword was right beside Xia ruofei's feet. If there was an emergency, Xia ruofei could jump on the flying sword at any time and use sword Kinesis to avoid danger.

"Let's go down slowly!" Xia ruofei raised his head and said.

"Alright!" Ling Qingxue replied loudly.

The two of them held the rope with both hands and supported their legs on the cliff wall. They alternated their hands and their bodies descended bit by bit.

From a distance, Xia ruofei and Ling Qingxue looked like two ants in the background of the huge cliff. They were slowly climbing down the cliff.

After the height was lowered by a few dozen meters, the angle of the cliff was no longer so steep. At least, it would not maintain a 90 – degree angle all the time. It was relatively gentler. This way, Xia ruofei and Ling Qingxue's legs were more durable, and the speed of their descent increased.

Just like that, the two of them used about twenty minutes to descend about two hundred meters.

"Qingxue, stop and take a rest!" Xia ruofei raised his head and shouted.

"I'm not tired!" Ling Qingxue said with a smile.

Indeed, for cultivators, this kind of seemingly dangerous rock climbing activity didn't consume much physical strength. Even the delicate Ling Qingxue didn't sweat much, so naturally, she wasn't tired.

Xia ruofei said, "the misty area is right below us. I'm afraid that there might be some unknown danger. Let's rest for a while and adjust our state of mind. Then, I'll go in first to explore the way!"

Ling Qingxue nodded and said, "Oh! Then I'll listen to you!"

Xia ruofei nodded and took out the qushuang flying sword and the blue immortal sword. He slashed at the cliff.

Suddenly, stone fragments flew, and after a while, a small platform that could barely accommodate two people was excavated.

"Come down and take a rest!" Xia ruofei jumped onto the platform and said with a smile.

Ling Qingxue nodded and swung down. Xia ruofei reached out and hugged her. Then, they turned around and retreated back to the small platform.

After Xia ruofei helped Ling Qingxue sit down, he smiled and asked, "You're really not tired?"

"I'm not tired!" Ling Qingxue said, "ruofei, actually, we don't need to rest. Just climbing the mountain took almost half an hour. The mission time is very tight."

Xia ruofei furrowed his brows. "I know we're short on time, but we can't be reckless. It's covered in clouds and we don't know what's going on down there. It's better to be careful!"

"And ..." Xia ruofei said, "I keep feeling that something is wrong! It's too quiet here, so quiet that it's a little strange..."

Ling Qingxue shrank her neck and said, "It's a little scary..."

"Also, I feel that the rope is obviously lighter!" Xia ruofei said with a serious expression.

"What?" Ling Qingxue didn't know how to react.

Xia ruofei reached out and pulled the rope upwards. He felt that it was very light. Indeed, he had only pulled for ten to twenty meters before he reached the end.

Xia ruofei showed the broken end of the rope to Ling Qingxue. Ling Qingxue took a closer look, and her expression became very serious. "It seems to be corroded..."

"If I'm not wrong, there's something wrong with the clouds!" Xia ruofei said in a deep voice.

"En!" Ling Qingxue also came to her senses. "From the remaining length of the rope, the remaining part is above the cloud Mist. Basically, it broke as soon as we entered the cloud Mist area..."

"Or maybe it's been corroded to the point that nothing is left..." Xia ruofei said.

"Ah?" Ling Qingxue couldn't help but look worried. "Then how are we going to get down?" If we can't go down, how are we going to find the goldthread nether snake?"

"There's no hurry. We still need to confirm it first!" Xia ruofei said calmly.

With that, Xia ruofei took out a Stainless Steel Tube and a PvP tube from the spirit map space. Then, he used his spiritual power to lift them and slowly lowered them down the cliff.

The platform that Xia ruofei and Ling Qingxue were resting on was a dozen meters away from the misty area. Xia ruofei used his spiritual power to grab the two tubes and arrived at the misty area.

Xia ruofei was even more careful. He slowly inserted the two tubes into the fog and immediately lifted them up again.

At this time, the part of the pipe that had entered the cloud and mist had completely disappeared.

Xia ruofei and Ling Qingxue looked at each other in shock.

The corrosive nature of the cloud Mist had already exceeded their expectations. It had only been one or two seconds since the tube had entered the cloud area, but as long as it had entered the cloud area, it had been corroded completely without leaving anything behind.

Xia ruofei picked up the two tubes and noticed that the fracture was uneven and there were obvious signs of corrosion.

"This ..." Ling Qingxue couldn't help but reveal a look of fear.

Xia ruofei's expression was also very ugly. He took out different materials from the spirit map space and tried them out.

They discovered that the cloud not only corroded items at a fast speed, but it could also corrode almost all materials. The only difference was the speed.

Xia ruofei even tried to use glassware to test it and found that it would still be corroded by the fog.

There were many living people in the Xuanji spirit map space, but Xia ruofei was not a brutal person. There was no need to test it out. There was a high chance that even a human's bones would not be left if he were to throw them in. Why should he kill more?

Ling Qingxue felt a sense of powerlessness. In such an environment, how was she supposed to enter the misty area? If he couldn't even see the goldthread nether snake, how was he going to complete the mission?

Xia ruofei's brain was working quickly. He said, "There's one more thing I haven't tried..."

Ling Qingxue also thought of it immediately. She hesitated for a moment before saying, "You mean... An EVA suit?"

Xia ruofei nodded and said, "yes!" The spacesuits are designed to deal with the harsh space environment, so they're definitely much more resistant to corrosion than normal materials!"

"But that's too dangerous ..." Ling Qingxue said. "Although we all have a backup set, if it's damaged, the return trip ..."

"Actually, the journey back to Earth from the moon is relatively safe. We didn't use a spare spacesuit on the way here, did we?" Xia ruofei said, "I'll take out a set and try it on! It's decided ..."

Seeing that Xia ruofei had already made up his mind and that they could not afford to waste any more time, Ling Qingxue reluctantly nodded and said, "Alright! It's good to try..."

Xia ruofei took out the spacesuit that he had used on the way here. He used his spiritual power to grab the spacesuit and slowly sent it down.

Ling Qingxue nervously stuck her head out and stared at the slowly descending spacesuit.

Xia ruofei was fully focused. Very quickly, the spacesuit descended to about half a meter above the cloud. Then, Xia ruofei made up his mind and sent the lower half of the spacesuit into the cloud. After a few seconds, he grabbed it.

At first glance, the two of them saw that the spacesuits were still intact, and they couldn't help but feel happy.

Soon, the spacesuit was retrieved by Xia ruofei and placed on the temporary platform. Xia ruofei and Ling Qingxue quickly went over to check.

There were obvious signs of corrosion on the lower half of the spacesuit, but it was still relatively intact. Xia ruofei connected the power source to test the air seal of the spacesuit and found that it was still fine. There were no obvious damages. Although the surface was corroded, it did not penetrate the spacesuit..

Chapter 37: Taking the risk to enter\_i

"It seems like this spacesuit has some resistance to corrosion, but it won't last long in the clouds ..." Xia ruofei frowned.

Xia ruofei had just submerged the spacesuit into the clouds, but it only stayed there for a few seconds before he picked it up.

Looking at it now, the outer appearance of the spacesuit had been damaged to a certain extent, but it had not been completely corroded.

If it had been a little longer, the spacesuit might not have been able to withstand the corrosive power of the cloud and would have been pierced through.

Ling Qingxue had also noticed this problem. She furrowed her brows and said, "Yup! What should he do? We can't go down at all..."

Xia ruofei pondered for a moment and said decisively, "I'll use this spacesuit!"

"Ah?" Ling Qingxue's eyes widened as she said, "ruofei, you can't do this recklessly! I don't think this spacesuit will last more than a minute. Once the clothes are damaged, the corrosive mist will enter the spacesuits and the person will be dead!"

Xia ruofei said calmly, "I didn't expect the spacesuit to be completely resistant to corrosion. It's just an extra layer of protection." I'll try it out first, it should be able to use Yuan Qi to open up the protective cover and isolate the corrosive mist inside. The spacesuits function is double insurance, and the most important thing is that it can ensure that we can breathe in safe oxygen!"

Xia ruofei could indeed use his vital Qi to create a protective shield, but he was not sure if it could completely block out the corrosive mist. Besides, in the mist, if one did not have a spacesuit, they would have to hold their breath. Otherwise, if they accidentally inhaled the corrosive mist, they would not be able to survive.

However, it would be different with the spacesuits. He and Ling Qingxue both had a large number of oxygen supply modules. This was a completely closed circulation system, and they could directly absorb oxygen from the oxygen bags on their backs.

This way, he could at least ensure that he could breathe freely.

Even though cultivators could hold their breath for a long time, it would still affect their movements. Furthermore, if they held their breath for more than half an hour, Ling Qingxue would definitely be the first to collapse.

Therefore, the spacesuits were still very important.

Ling Qingxue's face revealed a worried expression. "'RUO Fei, you must be careful! We'd rather not complete the mission than be in great danger!"

Xia ruofei patted Ling Qingxue's shoulder and said with a smile, "'Definitely! I'm not stupid! He had already gained a lot this time, so it didn't matter if he couldn't complete the mission. But we've already come this far, and I won't be satisfied if I don't try! You just wait here obediently and be careful. I'll go down and try, and I'll be back soon!"

"En!" Ling Qingxue nodded as she helped Xia ruofei put on the spacesuit.

Soon, Xia ruofei put on the spacesuit and looked very bloated.

He checked the oxygen supply module and the seal of the spacesuit. After everything was fine, he gestured to Ling Qingxue, then grabbed the rope and jumped down.

Ling Qingxue took two steps forward and leaned on the edge of the platform. She stared nervously at Xia ruofei who was sliding down.

After putting on the EVA suit, Xia ruofei became a little clumsy.

This EVA suit was designed to be used in space. It had to be airtight and isolated from radiation, high temperatures, and other harsh environments, so it was very complicated. Space was a weightless environment, so the weight of this EVA suit was quite heavy. However, the astronauts would only use this EVA suit in a weightless environment, so the weight basically didn't affect the astronauts.

On the 6th floor of the Tower of Trials, the gravity was the same as on earth. Xia ruofei's spacesuit made him look particularly cumbersome.

Fortunately, Xia ruofei was already a cultivator in the Golden core stage. His physical strength and control were many times better than ordinary people. Hence, even though the spacesuit was very heavy, he could still control his posture very well.

Xia ruofei followed the rope and descended slowly. Soon, he was very close to the cloud.

Ling Qingxue held her breath and looked at Xia ruofei nervously.

Xia ruofei immediately released his vital Qi and formed an invisible protective shield around his body. Then, he exerted force and continued to press down.

In fact, Xia ruofei was a little nervous.

However, he wasn't worried about his own safety. He was worried that the yuan Qi protective shield wouldn't work.

If the yuan Qi Shield could not block the clouds, Xia ruofei could use the protection of the spacesuit to escape from the clouds in a short time and dispel the danger alarm.

However, Xia ruofei was really at his wit's end. He could not think of any other way to enter the clouds if this plan did not work.

His intuition told him that the goldthread nether snake was hiding in the clouds. As long as he was able to survive in the clouds, he would have a high chance of finding the snake.

The bottom part of the spacesuit was the first to enter the cloud.

Xia ruofei saw that the clouds had dispersed when they were one or two meters away from the spacesuit. When Xia ruofei, who was wearing the spacesuit's boots, sank into the clouds, the clouds dispersed..

Chapter 38: Taking the risk to enter\_2

Xia ruofei's vital Qi formed a protective shield and easily dispersed the corrosive mist.

Seeing this, Xia ruofei felt relieved. It seemed like the yuan Qi protection was effective. This way, he would be much safer.

He continued to slide down carefully, and soon most of his body was immersed in the clouds. The clouds were repelled when they were about a meter away from the protective shield. There was no corrosive fog around him.

Xia ruofei also realized that the rope had indeed broken at the edge of the cloud. There was no rope further down.

Fortunately, the terrain here was much gentler than the top of the mountain. Xia ruofei reached out and grabbed the protruding corner of the rock. His entire body was easily pressed against the rock wall.

Xia ruofei stayed in the fog for a minute or two. After he was sure that the yuan Qi protective shield could block the corrosive fog, he pressed down hard and his clumsy – looking body rose into the air. He grabbed the rope accurately and climbed up quickly to the platform where the two of them had been temporarily staying.

Ling Qingxue asked anxiously, "ruofei, what's the situation down there?" "Are you alright?"

Even though Ling Qingxue had seen with her own eyes that Xia ruofei's energy shield had repelled the highly corrosive weapons, she was not sure if some of the mist would enter the shield and corrode the spacesuit or even endanger Xia ruofei's life.

Xia ruofei took off the airtight helmet from the EVA suit and smiled. "I'm fine! I've already verified that the yuan Qi barrier can effectively protect our safety! As for the situation down there ... The visibility is very poor, and my spiritual power can't penetrate the mist, so I'm not too sure ..."

"It's good that you're fine!" Ling Qingxue said, "ruofei, I think it's too dangerous down there. Why don't we ..."

Ling Qingxue did have the thought of giving up, but it was not for her own safety. It was because she was worried about Xia ruofei.

Xia ruofei shook his head. "It's not my style to give up halfway. Besides, since the yuan Qi Shield can repel the poisonous gas and we have the spacesuits that can provide us with the oxygen we need, we should be able to explore slowly!" The only thing we need to pay attention to is the poor visibility down there and the dangers in the fog!"

"I'm just worried about the unknown danger!" Ling Qingxue said.

Xia ruofei laughed and said, "we've been here all this time. Which level of mission is easy?" Wealth comes from danger. Qingxue, we might only encounter such an opportunity once in our lives. If I don't try my best, I won't be satisfied! You don't have to worry too much, I still have some cards up my sleeve. If we really encounter any danger, it shouldn't be a problem to keep our lives!"

Although Xia ruofei said it casually, he knew the danger of this.

If they wanted to find the goldthread nether snake, they would have to explore the cloud area. It would be fine if they moved around the edge of the cloud area. With the protection of the yuan Qi barrier, if there was any real danger, he would be able to escape with Ling Qingxue quickly. However, once they entered the depths of the cloud and mist region, it would not be so easy to escape.

Once the yuan Qi protective shield was destroyed, the spacesuits wouldn't be able to last long.

The only thing that Xia ruofei could rely on was the spirit map.

Along the way, the performance of the spirit painting made Xia ruofei feel at ease. However, he didn't know if the painting could withstand the high – intensity corrosion. If the painting was damaged, it would undoubtedly be a disaster for him. Therefore, he wouldn't use the spirit map painting unless he had no other choice.

Seeing that Xia ruofei had made up his mind, Ling Qingxue could only say helplessly, "Alright then! But I'm going down with you!"

Xia ruofei smiled and said, "even if you didn't ask, I would have brought you along!" I don't feel at ease leaving you up there alone! Qingxue, hurry up and change into your spacesuits. We'll continue down!"

"Alright!"

Ling Qingxue took out the spacesuit that she had used on the way here from her storage ring. With Xia ruofei's help, she quickly put it on.

Xia ruofei carefully tested the airtight seal of Ling Qingxue's spacesuit as well as the condition of the oxygen passage. After making sure that there were no problems, he said, "Go! Let's continue down!"

The two of them grabbed the rope and started to climb down. Xia ruofei opened up his Yuan Qi protective shield and covered both of them.

Very quickly, Xia ruofei's legs had already disappeared into the clouds. He continued to descend until he reached the end of the rope. Xia ruofei jumped lightly and grabbed a bump on the rock beside him. Then he said, "Qingxue, come down!"

Although they were both in spacesuits, it was more convenient to communicate through the intercom system.

Xia ruofei also carefully maintained his Yuan Qi protective shield, especially on Ling Qingxue's side. He left a lot of room for improvement.

Ling Qingxue quickly arrived at the end of the rope. She held the rope with one hand and observed the environment. Then, she nimbly jumped to Xia ruofei's side and grabbed a bump on the cliff. Xia ruofei reached out and grabbed her spacesuit.

"Let's go down slowly!" Xia ruofei said seriously, "you must be careful. Also, be careful of the protruding rocks on the cliff. If your spacesuit is torn, it will be very troublesome."

"Understood!" Ling Qingxue said calmly.

The two of them carefully climbed down the rock wall. At first, the clouds were still a little thin, and they had just entered the cloudy area, so they could still vaguely see the platform above them. As they continued to descend, the clouds became thicker and thicker. Soon, the sky above them was a vast expanse of white. After leaving the yuan Qi barrier, their vision could only extend one or two meters at most.

Naturally, Xia ruofei was even more careful. While maintaining the protective shield, he also released his spiritual power to be on alert.

However, this cloud was very strange. His mental power would be devoured if it went a little deeper, and he could not detect the situation in the distance at all.

At this time, the two of them were surrounded by thick white fog, and they slowly descended in spacesuits.

Xia ruofei didn't know how deep the fog was, but he knew that the only way to find the goldthread nether snake was to keep going down.

Moreover, this cliff was very large, and he might have to explore the fog for a long time before he had a chance to find the goldthread nether snake.

To be honest, with such a large area, and all covered in poisonous fog, six hours was not enough to explore little by little, even if there were no other dangers.

Xia ruofei felt that either there would be obvious clues, or they could only rely on their character.

He felt that the former was more likely. After all, the trial Pagoda was a test of a cultivator's ability. If one had to rely on luck to pass, then there would be no meaning to the trial.

Hence, Xia ruofei had been carefully observing his surroundings, hoping to find some useful clues.

However, the cliff was almost the same. There was no vegetation at all, not even a blade of grass. There was nothing special about it.

Ling Qingxue followed Xia ruofei closely. Even though her cultivation was slightly lower, she was still able to handle the terrain with ease as long as they did not encounter any other dangers.

Before they knew it, the two of them had already climbed more than 300 meters down the cliff after entering the misty area.

There was still a thick white fog below, and it was so thick that it couldn't be dispersed. It was impossible to tell how deep it was.

It could be said that the two of them had been climbing with difficulty for more than an hour without any gains, but one – fifth of the time had already been consumed.

Xia ruofei was still very calm. As he slowly climbed down, he observed his surroundings with all his attention.

After going down another ten meters, Xia ruofei suddenly stopped. Ling Qingxue stopped at the same time. They looked at each other through the airtight helmets on their spacesuits and revealed a look of surprise ....

#### Chapter 3399: Tracking by the incense (1)

Xia ruofei smelled a very special fragrance.

He took one look at Ling Qingxue's expression and knew that she must have smelled the same thing.

The reason for the change in their expressions was that they were both wearing spacesuits that were well – sealed and were using oxygen supply modules to breathe, completely isolated from the outside world. It could be said that this system could ensure complete isolation from the outside world even in space.

Under such circumstances, how could he possibly smell anything?

On top of that, Xia ruofei had to use the bulky spacesuit because the mist was highly toxic. Even though the yuan Qi protective cover could isolate the mist, he still had to use the spacesuit to prevent any mist from leaking in. There was another possibility. If the Yuanqi protective shield had a problem, the EVA suit, which had a certain degree of corrosion resistance and was well – sealed, could protect the spacesuit for a certain period of time. With this short reaction time, Xia ruofei could make a self – Rescue plan. At the very least, he could use the spirit map.

But if it couldn't even isolate the smell, then what was the point of wearing such a heavy EVA suit?

Xia ruofei was very confused and did not know what went wrong.

However, he still held his breath at once and made a hand gesture to Ling Qingxue, telling her to hold her breath immediately.

Cultivators could breathe internally. Even if Ling Qingxue's cultivation was average, she could at least hold on for half an hour.

The safety of this strange fragrance was completely unknown. Of course, Xia ruofei did not dare to let his guard down.

However, what surprised the two of them was that even though they held their breaths, they could still smell the fragrance.

Xia ruofei's expression turned serious. He could feel that the fragrance was very alluring. It was not something that he could smell through his nose. It was as if it had seeped into his soul. The seal of the spacesuit and holding his breath could not isolate the fragrance.

Ling Qingxue also noticed this problem. Her expression changed slightly and she cast a questioning look at Xia ruofei.

Xia ruofei smiled bitterly and said, "Qingxue, just breathe normally! This has nothing to do with the spacesuits' sealability, so there's no point in us holding our breath."

Ling Qingxue let out a breath of air, then said worriedly, "Ruofei, why do I feel that this fragrance is strange? It suddenly appeared, and it seemed to have a very, very special attraction that made people want to get close to it..."

After Xia ruofei heard Ling Qingxue's words, he suddenly had an idea.

"Perhaps... This fragrance is really a kind of guidance?" he muttered to himself.

"What?" Ling Qingxue asked in confusion.

"I mean, maybe this fragrance is really to guide us there?" Xia ruofei said, "the cloud and mist area below the cliff is so big that we don't even know where the golden thread nether snake is. If we search slowly, we won't be able to find it even if we spend ten times the time. There must be some clues. This special scent might be one of them!"

"But I feel that this fragrance is too strange ..." Ling Qingxue frowned.

Xia ruofei said, "I've checked just now. My body is not affected by this fragrance. I also feel that it's not a kind of smell. It's directly affecting my soul... In short, there's no bad reaction so far." And you? Do you feel uncomfortable?"

"Now that you've mentioned it, I don't seem to have done anything wrong!" Ling Qingxue said, "but it could also be a slow – acting poison. Who knows, the effects might appear over time?"

Xia ruofei laughed and said, "let's not think too much!" In my opinion, this is better than nothing. The appearance of a variable might be a turning point? Since we don't have any problems now, let's continue. We'll follow this fragrance and search, maybe there will be a surprise!"

The reason why Xia ruofei dared to take this risk was that the spirit map space had given him a certain amount of confidence. Even if there was really something wrong with the fragrance, he still had the spirit Heart Flower petals. The spirit Heart Flower petals would be able to take effect on most of the negative states.

Of course, the most important thing was that when he used his spiritual power to look inside his body, he didn't find any problems. In other words, this fragrance didn't cause any damage to his body for the time being.

"Alright then!" Ling Qingxue nodded and said, "I support your decision!"

It was strange. Xia ruofei and Ling Qingxue clearly did not smell the fragrance through their noses, but they could accurately determine the source of the fragrance.

Moreover, the two of them had come to the same conclusion. The source of the fragrance came from the bottom left corner of their current position. As for how far it was, they had no idea.

Xia ruofei and Ling Qingxue first moved more than 20 meters to the left. At that moment, they could clearly feel that the source of the fragrance was right below them.

Thus, the two of them began to climb up the protruding part of the cliff wall and went down bit by bit.

Outside the protective shield, white mist was rising. However, as soon as it touched the protective shield, it dispersed. The area within a two – meter radius of Xia ruofei and Ling Qingxue was a refreshing space. It was as if they were carrying a balloon, and the two of them were slowly moving down while hiding inside the balloon.

The slope of the cliff was not as steep as when they first came down, but it was still 60 to 70 degrees. Fortunately, both of them were cultivators, and there were many protrusions on the cliff, so they could basically climb down steadily..

Chapter 3400: Tracking by the incense (2)

Just like that, the two of them slowly climbed down another hundred meters. During this period, Xia ruofei was on high alert. Even though his spiritual power could not extend far, he did not dare to carry it for even a second.

The two flying swords were also by his side at all times, ready to be activated at any time if anything happened.

However, it was strange that apart from this terrifying poisonous fog, the two of them did not encounter any other dangers along the way. Even though this fog was terrifying, any cultivator in the Golden core stage would be able to form a protective Yuan Qi barrier. Therefore, even though the poison seemed dangerous, it could not cause any harm to cultivators in the Golden core stage.

However, after climbing more than 100 meters, the source of the fragrance was still below the two of them, and they didn't know how far it was.

In total, he had spent almost two hours.

A third of the six hours had passed without them realizing it, but the two of them had not even seen the shadow of the goldthread nether snake.

Ling Qingxue couldn't help but feel anxious. Xia ruofei, on the other hand, was very calm. He followed the scent down bit by bit. He believed that this mission wouldn't run out of time without even seeing the goldthread nether snake. This didn't match the original intention of the trial tower.

Xia ruofei had a feeling that the trial Pagoda was mainly used to select talents. He did not know how long the trial Pagoda had existed, but at least it was used to select talents at a certain time.

The two of them continued to descend bit by bit. In such terrain, their speed could not be increased, and no matter how anxious they were, they could only climb down step by step. Moreover, the situation

below was unclear. Even if they could increase their speed, the two of them did not dare to rush into each other.

Just like that, they climbed down another 60 meters or so. Xia ruofei felt that the fragrance was much stronger.

He didn't know if it was his illusion, so he couldn't help but ask, "Qingxue, don't you think the fragrance is getting stronger?"

"Yeah!" Ling Qingxue replied. "I thought I was hallucinating! RUO Fei, do you think... We're very close to the source of the fragrance?"

In fact, this fragrance becoming stronger was a gradual process. However, after arriving at this location, there seemed to be a sudden change, making the two of them clearly feel that the fragrance was stronger.

Xia ruofei thought for a while and said, "it's possible!" Let's keep up the good work! Even if I can't complete the mission, at least let me see a real goldthread nether snake! Otherwise, it would be too cowardly!"

"The golden thread nether snake is a late – Stage golden core cultivator, and it's extremely poisonous," Ling Qingxue said. "If we really meet, if we can't defeat it, it'll be easy to escape!"

Xia ruofei laughed and said, "it's poisonous. I have a formation." Late Jindan ... I might be able to deal with them, but no one knows if I've fought them before!"

Shen tianfang, who was killed by Xia ruofei, was very close to the late – Stage of the Golden core realm. As a human cultivator, he would have more means than a demonic beast. The Dharma Treasures and life – saving cards on Shen tianfang were not something a demonic beast could have.

Of course, according to the perceptual mirror, the snake's cultivation was equivalent to a cultivator at the peak of the advanced stage of the Golden core realm. It was probably more powerful than Shen tianfang.

However, Xia ruofei's strength had improved a lot compared to when he fought Shen tianfang.

There was no need to say anything about the doubling of his mental energy. His improvement in array Dao was also very obvious. He also had several ready – made fire attack array techniques. In addition, his sword control was more flexible and smooth. This was practice makes perfect because he had been using the flying sword of the bent frost this entire time.

There was also the elemental energy. This was one of Xia ruofei's biggest advantages. Because of the elemental storage Pearl, Xia ruofei's elemental energy was very abundant. The elemental storage Pearl alone contained all the elemental energy of an early – Stage nascent soul cultivator. Hence, in terms of the total amount of vital Qi, Xia ruofei's vital Qi was definitely stronger than the golden thread nether snake's. This meant that he did not have to worry too much about the consumption of vital Qi. He could also use some of the more powerful but also more exhausting ultimate moves and techniques as he wished.

In addition, his biggest trump card, the spirit map space, allowed Xia ruofei to more or less have the strength to fight against the golden thread nether snake.

"In any case, you must be careful! Safety first!" Ling Qingxue said.

"No, it should be your safety first!" Xia ruofei laughed and said, "I have to ensure your safety first!"

Ling Qingxue's heart was filled with sweetness. She couldn't help but sigh and say, "Actually, it's not necessarily a good thing for me to be with you. I feel like I've become a burden to you. If it weren't for me, you would still be able to focus on completing the mission ... If only 1 wasn't randomly assigned to you. At most, I'd just be eliminated a few levels earlier!"

Xia ruofei said, "silly girl, what nonsense are you talking about?" When you weren't by my side, 1 was always worried about you, do you know that? That kind of distraction was even more serious! With you by my side, my heart is much calmer, and 1 can display my strength better, right? Besides, who said you were a burden? you reminded me several times and provided me with new ideas. Otherwise, 1 would have walked into a dead end!"

Ling Qingxue knew that Xia ruofei was comforting her. In reality, she had not played a big role in the process of completing the mission. She had also repeatedly become Xia ruofei's burden, making him unable to go all out.

However, Ling Qingxue still smiled sweetly and said, "I'm not as powerful as you say! But now that fate has tied us together, no matter how difficult it is, we can only walk down this path together!"

"That's the right way to think!" Xia ruofei said, "let's go down together and see how powerful that goldthread nether snake is!!"

"We still don't know if that fragrance is guiding us to the goldthread nether snake!!" Ling Qingxue said with a smile.

"I have a feeling that if we follow the scent, we'll definitely find the goldthread nether snake. Let's make a bet if you don't believe me!" Xia ruofei said.

"I'm not betting with you!" Ling Qingxue's face turned red. "Every time you propose a strange bet, it's so embarrassing!"

Xia ruofei couldn't help but burst out laughing.

The two of them rested for a while before continuing to climb down the cliff.

Sure enough, as the altitude decreased, the fragrance became stronger.

This land of fragrance that directly affected the soul was even more intense than the fragrance that one could smell with the nose.

It was just like when Xia ruofei, Ling Qingxue, or Song Wei combined their spirit bodies to cultivate. The feeling was several times more intense than when they had sex in real life.

The fragrance was getting stronger, and the temptation was getting stronger.

Ling Qingxue, whose mental power was slightly weaker, actually couldn't help but increase her climbing speed. This was a sign that she was being attracted by the fragrance.

Fortunately, Xia ruofei was strong enough and was not affected at all. He even used his spiritual power to wake Ling Qingxue up in time.

The two of them climbed another 20 to 30 meters before they stopped at the same time.

Because at the lower left of the two, the cliff was no longer bare. An unknown green plant grew on the cliff, as if it was full of life.

This plant was about two feet tall. It reached out from the cracks in the cliff and then grew upward.

The leaves of this plant were thin and long, and there were sharp teeth on the side. At the top of the plant, there were already two Vermilion fruits.

Xia ruofei and Ling Qingxue's gazes fell on the fruits. It was obvious that the alluring fragrance came from these two fruits. They were the ones who had led Xia ruofei and Ling Qingxue here.

Xia ruofei couldn't help but take a few more looks at the Vermillion fruit. He realized that the fruit seemed to have ripened. On the Vermillion skin, there were some golden stripes. It looked very attractive and made people want to take a bite.

Even Xia ruofei felt that his desire to eat the two fruits was quite strong, and he could barely control it....
