

God tier Farm 641

Chapter 641: The coastline in the space (2)

With Xia ruofei's money – making speed, it was easy for him to support a few researchers.

Moreover, once the heart – nourishing soup was approved for mass production, it would definitely be profitable. Xia ruofei could ignore the huge profits from the heart – nourishing soup project, but he still wanted normal profits. This was also the foundation for the company's sustainable and healthy development.

"Alright, Chairman," Feng Jing said. "I'll be focusing on this for the time being. If there's anything I'm not sure about, I'll report to you at any time."

"It's been hard on you, President Feng!" Xia ruofei said sincerely, "ever since you started work, you've never stopped working. The company is really grateful to you!"

"I'm scheming for politics in my position!" Feng Jing chuckled. "Besides, I like working too. I like the feeling of being fulfilled!"

"I'll give you a big red packet at the end of the year!" Xia ruofei smiled.

"I'll be waiting then ..." Feng Rao chuckled.

Xia ruofei shook his head helplessly after he hung up.

It was really difficult to do anything now, and this was only the normal approval process. After all, the medicine concerned the health and even lives of thousands of patients. The country must be very cautious. Xia ruofei could understand this.

If the approval process went smoothly, it would take several years. If there was a delay in any link, then it would really take a long time.

Xia ruofei sighed for a while and remembered that he had not seen the changes in the new space. He then returned to the spirit map space.

Xia ruofei appeared in the stone room.

He walked out of the cave and first looked at the wordless stone tablet at the entrance of the cave.

.....

This should be the primordial chaos stele, right? Xia ruofei said in his heart.

This stone tablet was too mysterious. It looked ancient and ordinary, but it was the only thing that Xia ruofei could not see through in the entire space.

Xia ruofei could at least get a general idea of the other things, including the protective shield in the stone room that couldn't be opened for the time being and the nameless booklet that had half of its contents yet to be unlocked.

Only this stone tablet gave Xia ruofei the feeling that it was filled with endless fog.

Xia ruofei took a few glances at the stone tablet before walking to the edge of the platform and looking around.

His first thought was that Blackie and the others, who were playing at the foot of the mountain, seemed to have become smaller. The same was true for the all – terrain vehicle that was parked quietly in the space.

Xia ruofei knew that this was because the mountain he was on had grown taller.

Xia ruofei's mind moved. The invisible force of space lifted him up and he quickly floated down the mountain.

Only in this space, when his spiritual power had reached a certain level, could Xia ruofei achieve such a leap. It was similar to flying in the sky and burrowing underground. It was quite a cool feeling!

Xia ruofei landed steadily beside the all – terrain vehicle. With a whistle, xiaohei, Da Mao, er Mao and the rest immediately rushed towards Xia ruofei.

Xia ruofei affectionately picked up Blackie, who was running in front, and ruffled its head. He laughed and said, "Get in the car, I'll bring you guys around!"

He jumped into the car and placed Blackie on the passenger seat. Fluffy one, fluffy two, and the rest also jumped into the car.

Xia ruofei started the engine and stepped on the accelerator. The all – terrain vehicle immediately rushed forward.

The open – Top car drove at high speed, and the wind whistled in his ears. He breathed in the extremely pure air that had a trace of spiritual mist, and he felt a lot more refreshed.

Along the way, Xia ruofei also observed the new space. It had indeed expanded a lot.

The mountain seemed even more majestic, and it began to have a continuous feeling. The river that wound around the mountain had become much wider, and now it was completely a huge River. The river water gushed past, making a splashing sound.

The terrain in the new space also had more ups and downs. The all – terrain vehicle sped nimbly between the small hills and soon arrived at the nearest space membrane.

Xia ruofei would usually make a circle along the space membrane to roughly estimate the area of the current space.

This time, Xia ruofei couldn't help but step on the brakes. He stared at the space membrane with a surprised look.

Most of the land in the new space was covered in green grass. From a distance, it looked like a huge green carpet.

But today, as the space continued to expand, Xia ruofei saw a different scene.

The closer he got to the space membrane, the sparser the green grass became. There was no grass six or seven meters in front of the space membrane, and the ground exposed outside was not soil, but sand.

Moreover, the closer the desert was to the dimensional membrane, the lower it was. Once it reached the dimensional membrane, his vision would not be able to see through it.

Xia ruofei was confused.

He jumped out of the car and sniffed. There seemed to be a hint of saltiness in the air.

Xia ruofei had been living in Taoyuan farm for a long time and was very familiar with this smell. The air at the beach was filled with this smell. As the humidity at the beach was high, there would be some tiny droplets in the air that would dissolve some salt.

Could there be an ocean in this space?

Xia ruofei couldn't help but have this thought.

He stepped on the sand. He squatted down and grabbed a handful of sand.

The color of the sand was almost pure white, and each grain was very fine. When he held it in his hand, it quickly leaked down through the gaps between his fingers. It was a very comfortable feeling.

Xia ruofei walked towards the space membrane step by step. He was listening to Yingying. If there was really an ocean, could he hear the sound of waves?

However, the space membrane seemed to isolate everything. Xia ruofei could not hear anything.

So, he went back to the all-terrain vehicle, found a small camping shovel, ran back to the space membrane, and dug hard.

The sand here was fine and soft. After a while, Xia ruofei had dug a big hole.

When he saw that the sand below was already somewhat moist, he dug hard twice and then stopped.

Xia ruofei squatted down and grabbed a handful of wet sand. He stuck out his tongue to lick it.

A bitter and salty taste immediately came to his taste buds. Xia ruofei vomited a few times but there was still a taste in his mouth.

However, he was overjoyed, thinking that this was the smell of seawater.

Xia ruofei knew that the sea was most likely behind the space membrane.

Xia ruofei could not help but click his tongue at the thought of the boundless sea.

It was just a picture scroll, but it contained such a large space. It could simply be called another world. This was really too magical!

Xia ruofei was sure that once the realm finished its upgrade, he would be able to see the sea. As for how far it would expand, he was not sure.

Xia ruofei was looking forward to the sea.

He jumped into the car and started it impatiently, speeding along the spatial membrane.

On one hand, he had to estimate the area of the space. On the other hand, Xia ruofei also wanted to see if the sea could be seen from other places.

Along the way, Xia ruofei realized that the White beach was about two to three hundred meters long. After that, it was gradually covered by green grass and the color was the same as before.

He continued driving.

When Xia ruofei returned to the hole he had just dug, he knew that he had made one round around the space membrane.

The coastline was indeed only two to three hundred meters long, and for the time being, they could only see the beach, but not the sea.

Xia ruofei roughly estimated that the space was close to 2000 acres.

In other words, after absorbing 50 million Chinese dollars worth of Jade, the area of the new space had nearly doubled. If there were enough Jade to upgrade the space, the area would definitely be even larger.

Xia ruofei looked at the oak tree that he had planted in the new space and the Hornet that was kept in the huge iron cage. He played with Blackie and the rest for a while before leaving the spirit map space with anticipation for the sea.

Chapter 642: advancing side – by – side_1

Most of Feng Jing's energy was invested in the registration of Taoyuan pharmaceutical company.

She knew that Xia ruofei placed great importance on this matter, so she tried to be efficient. She even found her old classmate, Wu Liqian, and used her connections in the city to speed up the approval process.

Tian Huixin was still helping to gather the second batch of children with autism who were receiving treatment.

Besides providing Chengcheng with the heart – nourishing soup on time, Xia ruofei's main energy was focused on the transformation of the farm's fish pond.

Feng Jing already had a lot of things to do, so Xia ruofei didn't let her do it this time. Instead, he did it himself, which was rare.

Xia ruofei went to find his future father – in – Law, Ling Xiaotian.

When Ling Xiaotian heard that Xia ruofei was going to try to cultivate wild pomfrets, he was very happy. He immediately mobilized his connections to help Xia ruofei.

Luo Ming, the executive chef of Ling Ji restaurant, was from Jiangnan. In his hometown, there were people who had tried to artificially cultivate pomfrets, but most of them were fertilised eggs from the United States at a high price, then put the fertilised eggs in oxygen bags and transported back by air.

But no matter what, there were still many people who had experience in raising pomfrets.

In the end, it was Luo Ming who had helped Xia ruofei find a suitable candidate.

The man's name was Jiang Hua, a distant relative of Luo Ming. He used to work at the pomfrets farm for a long time and even became the deputy manager later. He had rich experience in the breeding and management of pomfrets.

However, due to poor management and the boss' other failed investments, the farm didn't manage to operate in the end, and Jiang Hua lost his job.

Xia ruofei immediately asked Luo Ming to call Jiang Hua and ask him to come for an interview at the three mountains.

.....

After Jiang Hua lost his job, he did not have a stable job. He was not very happy working in several places. The salary was not as high as before, and it was even more tiring. So, when he heard that a boss in the southeast province wanted to raise Chinese perch and was willing to hire him, he immediately quit his job and took the train South.

Xia ruofei talked to Jiang Hua for a while and found out that he knew a lot about the pomfrets. He even had management experience. He immediately decided to hire him.

Jiang Hua was on the same level as Cao tieshu in Tao Yuan farm, so their salary and benefits were the same. However, Xia ruofei also promised that as long as the sales of the pomfrets were good, the monthly performance reward would be higher than the salary.

In short, the better the results, the better the treatment.

In fact, the salary in the southeast coastal area was higher than that in the inland cities. Moreover, the farm offered relatively good free accommodation, and a single person could enjoy a single room. The treatment was simply too good.

Jiang Hua naturally agreed with joy.

The baby salamander was in an environment where time was 30 times faster than normal, so it grew very fast.

Hence, once Jiang Hua had completed the employment procedures, Xia ruofei immediately brought him to the fish pond on the farm.

Jiang Hua looked at the environment of the fish pond and immediately frowned. He hesitated for a moment and said, "Boss, you can't keep an ordinary fish pond like the Chinese perch ..."

Xia ruofei laughed and said, "Of course I know. That's why I invited you here!" You have the final say on how to transform this place. I'm only responsible for contacting the construction company and providing the funds."

Jiang Hua nodded. "Boss, pomfrets have very strict requirements for the environment and are very timid, so the breeding place must be closed. In addition, the noise must be very low. Fortunately, this place is not close to the main road of the farm, so it should not be a big problem."

Xia ruofei chuckled. "Take a look at the site first. I'll call the manager of the construction company later. You guys can make a plan together. How much money do you need, what equipment do you need, just give me a list!"

Xia ruofei's words also made Jiang Hua very excited. He looked at the fish pond in front of him and said, "Boss, this ready-made fish pond definitely can't be used. We need to first pump out the water, then use cement to build a few fish ponds. In addition, we need to make a closed greenhouse with a constant temperature device. The water temperature of the fish ponds must be maintained between 15°C and 28°C. In addition, the water quality of the recycled water should meet the standard of straight drinking water, and there should be strict standards for the amount of dissolved oxygen in the water. These were all slowly figured out over the years on the farm where I used to work."

Xia ruofei said happily, "Jiang Hua, it seems that I made the right decision to hire you!" Your experience is very valuable! How about this, I'll call Manager Li from the construction company over right now, and you guys can come up with a plan and budget. You must do it as soon as possible!"

"Alright!" Jiang Hua said excitedly.

Manager Li was at the farm, supervising the work. With a phone call from Xia ruofei, he had rushed over on his motorcycle.

Xia ruofei introduced the two of them, then told them about his plan to transform the fish pond.

When manager Li heard this, he immediately expressed that he would follow the requirements strictly and ensure that the quality was maintained.

Xia ruofei smiled. "Manager Li, the construction of this fish pond is rather tight. Your manpower will be given priority."

"No problem, no problem!" Manager Li said, "boss Xia, I'll talk to the river engineering company first. We'll try to get the budget book out within two days!"

"Alright, thank you for your hard work ..." Xia ruofei said, smiling.

.....

Feng Jing was busy with the registration of the pharmaceutical company, and at the same time, the recruitment work was also in progress.

Chapter 643: advancing side – by – side_2

Moreover, the recruitment process was the first to make progress.

The first employee of the pharmaceutical company's research Institute was a master's student from the southeast Chinese medical University. His name was Xue Jinshan.

His major was acupuncture and massage. As a master, he was involved in clinical Chinese Medicine Research. He met the recruitment requirements of Xia ruofei's company.

What was even rarer was that Xue Jinshan had come into contact with drug approval work in one of his tutor's projects when he was a graduate student, so he could be considered to have relevant experience.

At the moment, Chinese medicine – related majors weren't very popular. Xue Jinshan couldn't stay in school after graduation, and it wasn't easy for him to find a job. He couldn't get into the big hospitals in the provincial city, and he wasn't willing to return to his hometown's Chinese medicine hospital to waste his time. On the other hand, the salary offered by paradise company was quite good, and it was no less than the income of a tertiary Grade A hospital in the provincial city. So, after some hesitation, he finally accepted Feng Jing's recruitment.

After Feng Rao and Xue Jinshan had reached an initial agreement, they reported to Xia ruofei.

She knew that Xia ruofei placed great importance on the release of the new drug, so he would report any progress as soon as possible.

Xia ruofei also knew that his company was not attractive enough at the moment, so he did not have high hopes for recruitment. He knew very well that those industry leaders with academic achievements would not be interested in paradise pharmaceuticals. Hence, Xia ruofei was very satisfied with the fact that he was able to recruit a Graduate student who was specialized in this field so quickly.

He immediately took time out to meet Xue Jinshan. Of course, manager li and Jiang Hua had not come up with the budget yet, so Xia ruofei would not be too busy for the time being.

That afternoon, Xia ruofei saw Xue Jinshan in his office.

This was a young man who looked quite spirited. He wore a pair of gold – rimmed glasses and looked refined.

Xia ruofei's attitude was very gentle. He smiled at Xue Jinshan and said, "Mr. Xue, please sit!"

Xue Jinshan was a little reserved. After the two of them took their seats in the reception area of the office, the General Manager's assistant, Liu Qian, served Xue Jinshan a cup of tea and left.

.....

Xia ruofei laughed and said, "Mr. Xue, did CEO Feng talk to you?" Are you satisfied with the treatment our company is offering?"

"Director Xia, the benefits and benefits of paradise Corporation are very good, even beyond my expectations. I'm sure I'll be very satisfied," Xue Jinshan immediately said.

Xia ruofei nodded and said, "we're thirsty for talents!" Although our paradise pharmaceuticals is a newly established company and the relevant procedures are still under approval, our company is very confident in the development of paradise pharmaceuticals, and this confidence comes from our products. We're about to launch a brand new Chinese medicine preparation. This is a product that will fill in the gaps, so we definitely won't have to worry about sales!"

Xue Jinshan's expression slightly changed as he asked, "President Xia, this is also something that I'm very interested in. May I ask ... What is the main function of the new medicine that the company is preparing to launch on the market?"

Xia ruofei smiled and said, ""A special medicine for autism."

Xue Jinshan couldn't help but take in a breath of cold air. He looked at Xia ruofei with a strange expression and his heart was in turmoil.

Could he have met a scammer? Xue Jinshan said in his heart.

As a medical graduate student, Xue Jinshan was well aware of what kind of disease autism was. He was also well aware that there was no medicine that could effectively treat it.

This was a newly established company, and a completely layman boss actually said that he had developed a special medicine for autism? And he even ambitiously wanted to sell it on the market? Xue Jinshan felt that his brain wasn't enough to process this.

However, he did not think that Xia ruofei was a liar.

The company was right there, and such a big farm couldn't be rented, right? Spending so much money to trick me? What did he have that was worth being lied to? He wouldn't get much money even if he sold himself!

Moreover, Xue Jinshan had done his homework when he received the invitation. He had a certain understanding of paradise Corporation, and Feng Jing's career history could be found online.

How could he be a scammer!

Then there was only one possibility, and that was that the boss had been cheated! He had been bewitched by someone and bought an unreliable prescription, thinking that he could make a fortune from it.

Thinking of this, Xue Jinshan looked at Xia ruofei and said, ""President Xia, with all due respect, where did you buy the formula from? So many years of research have shown that autism can't be cured with medicine. This is the common understanding of the medical world ..."

He had not even been officially hired yet and he was already questioning his boss, suspecting that his boss had been cheated and became a spendthrift. This Xue Jinshan was really stupid. However, Xia ruofei did not take it to heart. Instead, he admired Xue Jinshan.

Xia ruofei chuckled. "Mr. Xue, I didn't buy the formula. It's an ancient formula that was passed down from my family."

"The ancient prescription says it can treat autism?" Xue Jinshan asked with a strange expression.

"Of course not! Its main function is to strengthen the spleen and Qi, improve intelligence, warm the kidney and nourish the brain, nourish the liver and kidney, dispel phlegm and open apertures, and clear meridians. " Xia ruofei said, "however, there is an obvious improvement after the autistic patient takes it. I won't hide it from you. The effect of the drug has been tested by a seriously autistic patient ..."

Chapter 644: advancing side – by – side -3

Xue Jinshan could no longer remain calm. He took a deep breath and his eyes were filled with shock. Xia ruofei would definitely not joke about such things. He had even set up a pharmaceutical company. He would definitely be serious.

That was to say, this CEO Xia had really developed a special medicine for autism? Moreover, it wasn't a team, and they only passed an ancient recipe? Xue Jinshan felt like he was in a dream.

He realized that if Xia ruofei's medicine for autism could really be effective, it would really fill in the gap and even be an epoch – making achievement.

He was a master's graduate, and he was able to participate in such a project as a first – generation entrepreneur ... This was a rare opportunity! Xue Jinshan couldn't help but feel excited.

Xia ruofei smiled."Mr. Xue, I'm currently recruiting 10 people with autism. We're preparing for the second round of testing. As long as you join our company, you can participate. We can even disclose the prescription to you."

In fact, the prescription of the heart – nourishing soup was one thing, but the control of the fire was another. There were many small tricks in this. Even if an ordinary person got the prescription, they might not be able to make the real heart – nourishing soup in their lifetime.

Of course, in the future, when mass production was achieved, the control of the fire could be achieved through automatic settings. It might require repeated debugging in the beginning, but as long as the parameters were determined, the production in the future could be directly fed according to the proportion.

Xue Jinshan no longer hesitated and said,"President Xia, I'm willing to join your company! If it's successful, this will definitely be a great project!"

Xia ruofei smiled and stood up. He extended his hand to Xue Jinshan and said,"Welcome, researcher Xue!"

The researcher that Xia ruofei was talking about was naturally a researcher at Taoyuan pharmaceutical research Institute. It was not a national title. With Xue Jinshan's qualifications, he had to start as an assistant researcher in a research institution within the system. It was unknown how many years he would be promoted to a researcher!

After Xia ruofei shook hands with Xue Jinshan, he said,""Researcher Xue, boss Feng has told you before, right? To join our research Institute, you have to sign a confidentiality agreement and competition terms. "

This was something Xia ruofei had specially requested Feng Jing to prepare. Any information regarding the heart – nourishing soup had to be kept absolutely confidential. Otherwise, not only would they face sky – High compensation, but they might even be imprisoned.

Of course, this was also because if the heart – nourishing soup wanted to be produced, it had to be patented and the ingredients needed to be approved. It was difficult to keep it a secret, and these specific tasks had to be done by the researchers. Xia ruofei could not keep it a secret from them.

.....

Besides, he had no intention of using the formula to make a profit. Since he could not prevent the researchers from getting in touch with the formula, Xia ruofei simply restricted it on the contract.

As for the future mass production of the jade skin cream, since it was not a drug and was a project that would really make huge profits, Xia ruofei would definitely not apply for a patent. He would also have to design a series of confidentiality chains so that he could only control the real key links and avoid the possibility of leaking the secret from the root.

"I understand," Xue Jinshan nodded. President Xia, please rest assured. This is the most basic professional ethics, and I will definitely follow it. "

Xia ruofei chuckled and nodded.

Even if the recipe was leaked, it would be difficult for others to replicate the original version of the heart – nourishing soup. However, he was still very satisfied with Xue jinshan's attitude.

"Researcher Xue, I'll ask chief Feng to arrange the employment procedures for you later," said Xia ruofei. After that, I'll give you a detailed introduction of the prescription and the first preliminary test. Your next step is to first apply for the drug patent, and then prepare for the approval of the new drug. In the next few days, we should be hiring a few more people. I hope that you will work together to push forward our project as soon as possible!"

"Understood!" Xue Jinshan said excitedly,"director Xia, it's my honor to be able to participate in such a great project!"

Xia ruofei smiled and patted Xue Jinshan's shoulder. Then, he called Feng Jing and asked her to personally handle the employment procedures for Xue Jinshan. Of course, the most important part was the confidentiality clause and the non – competition clause. Xia ruofei would only be at ease if Feng Jing personally locked him up.

After Feng Jing left with Xue Jinshan, Xia ruofei sat in his office and lit a cigarette.

Manager li and Jiang Hua hadn't come up with a specific budget yet, but Jiang Hua had reported to him once. Millions of RMB was definitely a must. The requirements of the Bogle fish for water quality and environment were too high, and some of the equipment was very expensive.

In addition, Feng Jing's registration of the pharmaceutical company was also progressing very quickly. The next step was to verify the capital.

Xia ruofei had spent most of his money on buying jadeite.

Hence, Xia ruofei had to hurry up and get some money back.

Of course, Xia ruofei had already thought of a plan, so he was very confident.

Chapter 645: in full swing_1

The iron – Skin Dendrobium in the original space had ripened again.

Xia ruofei was prepared to go into the medium to harvest them today. After a few days, the next batch of iron – Skin dendrobes would be completed, and he would have at least another twenty to thirty million in funds.

In this way, whether it was to transform the fish pond or to set up a pharmaceutical company, he had more than enough funds.

However, Xia ruofei could not leave for the time being.

He had just called his comrade – in – arms, Qian Lijun, from Jiangsu and Zhejiang Province in his office and asked him to arrange for master Luo and a few employees from Taoyuan farm to come back together. When he was packing up and preparing to go home, Xue Jinshan, who had finished the employment procedures quickly, ran over impatiently.

“President Xia, I’ve completed all the procedures and signed the confidentiality agreement and competition agreement!” Xue Jinshan said excitedly, “now can you tell me more about this special medicine for autism?”

Xia ruofei looked at Feng Rao and saw her nod with a smile. He patted Xue Jinshan’s shoulder and said, “Researcher Xue, there’s no hurry ... We’ll talk after you settle down. By the way, are you planning to live on the farm or find a place to live outside? If you want to rent a house in the city, our company will provide transportation and rental subsidies. ”

“It doesn’t matter!” Xue Jinshan said. He could stay anywhere! If you can’t, you can sleep in the office ... By the way, our pharmaceutical company doesn’t seem to have an office yet ...”

At this point, Xue Jinshan scratched his head in embarrassment.

Xia ruofei laughed out loud. He knew that if he didn’t tell him about the heart – nourishing soup today, he wouldn’t be able to sleep well.

Hence, Xia ruofei led Xue Jinshan to the guest sofa and sat down.

Feng Jing tactfully took her leave.

“Researcher Xue, I’ve named this new medicine heart – nourishing soup.” Xia ruofei went straight to the point. “It’s made of foxglove, Chinese yam, polycorum root, peony, Poria Cocos, Cornel ... And more than ten other Chinese medicines.”

.....

As Xia ruofei spoke, he took a piece of paper and wrote down the prescription.

Xue Jinshan impatiently took the piece of paper and began to read it seriously, like a student who was thirsty for knowledge.

Following that, Xue Jinshan couldn’t help but look at the prescription and Mutter to himself, “Strengthening the spleen and Qi, improving intelligence, warming the kidney and nourishing the brain, nourishing the liver and kidney ... From the medicinal properties, it might have these effects, but there are many such prescriptions! There are quite a few classical prescriptions in the pharmacological book, so how could they have any effect on autism?”

Xia ruofei smiled as he leaned back on the sofa. He did not interrupt Xue Jinshan's thoughts.

"Could it be the subtle effect of the interaction between the ruler, subject, and assistant?" Xue Jinshan was still mumbling to himself, "which one is the main medicine?" Yuanzhi? Or is it Cornelian?"

After a long while, Xue Jinshan was still confused, and the confusion on his face became even more apparent.

Xia ruofei couldn't help but find it funny. This Yangyang soup was recorded in a small booklet. Even a strong person like him had obvious effects after drinking it. Besides, Xia ruofei didn't write down the tips of brewing on paper. Even if Xue Jinshan had a PhD or post – doc in Traditional Chinese Medicine, he wouldn't be able to analyze anything useful, let alone a master's degree in traditional Chinese medicine.

After a long while, Xue Jinshan bitterly smiled and said, "Director Xia, I really don't understand this prescription."

Xia ruofei smiled and said, "you don't have to understand and analyze every prescription." Researcher Xue, we're not doing research, you still haven't changed your mind!"

Xue Jinshan was stunned for a moment, then he scratched his head awkwardly and laughed, "Occupational disease, occupational disease ... When I was a master's student, I often helped my mentor analyze various prescriptions ..."

Xia ruofei laughed and said, "actually, I don't know either, but it doesn't matter!" As long as it's effective, isn't it fine?"

Xue Jinshan's eyes brightened, and he hurriedly said, "By the way, director Xia, you said that this prescription has been tested on an autistic child. Where is the patient now? Can I take a look?"

Xia ruofei smiled and said, "don't worry. You'll definitely see the patient, but not now." I'll go to his follow – up in a few days, and you'll come with me. "

Xue Jinshan was a little anxious and couldn't wait to see the patient. However, at least he knew that Xia ruofei was his boss and he had to listen to his boss's arrangements. Therefore, he could only suppress his anticipation and nod.

Xia ruofei said, "researcher Xue, I'll be recruiting about ten more children with autism to carry out the next step of the verification experiment. You can also participate in the entire process. You'll have to record the details of the experiment in detail. We might need it when we apply for a new drug next."

"No problem! Leave it to me!" Xue Jinshan said excitedly.

Xia ruofei smiled and said, "this is not the most urgent thing. Our top priority now is to apply for a patent for this prescription. Researcher Xue, I've written the prescription to you. I'll also provide you with a few portions of the decoction I've made. Do a preliminary drug analysis and then quickly apply for a patent."

"Director Xia, if you want to apply for a patent, you also need to provide the preparation process of the medicine ..." Xue Jinshan said.

Xia ruofei frowned and asked, "do I have to provide the detailed steps?" Can you simplify it a little?"

Xue Jinshan had also guessed that the brewing process of this prescription must be kept absolutely confidential. He muttered to himself for a moment before saying, "As for the Traditional Chinese Medicine preparation ... The requirements in this aspect are not so strict, but it's best to simplify the steps."

Chapter 646: in full swing (2)

Xia ruofei nodded and said, "okay, I'll go back and think about it." Do the rest of the preparation work first, then add in the preparation process. "

Applying for patents was like a double – edged sword.

On the one hand, it could protect the rights of the patent owner, but on the other hand, it increased the risk of disclosing secrets.

Xue Jinshan thought for a while and asked, "President Xia, are you only applying for a domestic patent?" I think ... Since we don't know anything about any medicine for autism, we should try to get all the patents we can, especially from the mainstream countries in Europe and America. "

Xia ruofei smiled and said, "no need." Going overseas to apply for a patent is the same as giving the prescription to those big shots in the manufacturing industry. In a few years, their imitation medicine will be out. "

Xue Jinshan couldn't help but chuckle when he heard this.

As an industry insider, he naturally knew that some large pharmaceutical companies in Europe and the United States were actually a group of predators who ate people without spitting out their bones. The special drug for autism was like an alluring cake. Once they applied for a patent in another country, they could quickly obtain the patent application document through various shady means and immediately organize a team to replicate it.

As for the copyright infringement lawsuit, these rich and powerful pharmaceutical companies were not afraid at all.

They had a budget of hundreds of millions of dollars every year, which was used to fight all kinds of wrangling lawsuits. They had the world's best team of lawyers, and they could even counter – Sue paradise pharmaceuticals for infringement of copyright. Then, they could drag the lawsuit for eight to ten years, using the legal costs to drag down their competitors.

Hence, Xia ruofei had no intention of applying for a patent overseas.

Although it was difficult to avoid the possibility of disclosing the patent in China, it would at least greatly increase the difficulty of plagiarism for pharmaceutical companies.

Moreover, as long as the core secret of the preparation process was not leaked, it would not be easy for those pharmaceutical companies to completely crack the formula.

Xia ruofei didn't want to make huge profits from the heart – nourishing soup, but that didn't mean that he was willing to let his own things be stolen by others, especially by foreign companies, and then become a tool for them to make huge profits.

.....

"I understand, President Xia." Xue Jinshan nodded and said, "then we'll apply for the domestic patent!"

Xia ruofei nodded and said, "yes. Make all the preparations as soon as possible. Also, the prescription must be kept absolutely confidential. I'll give you a new computer specially for you to write all kinds of application materials and application reports. All the work related to the prescription will be completed on this computer. Also, this computer is strictly prohibited from connecting to the internet!"

Xia ruofei had already decided that the computers in the Research Center of the pharmaceutical company would follow the military's security measures and be directly isolated from the internet. The network card module and USB port would be removed, leaving only a CD drive. All the files would be transferred by burning the CD to ensure the safety of the prescription to the greatest extent.

"Understood!" Xue Jinshan replied solemnly.

Xia ruofei said, "you go first!" You'll be working on the farm before the pharmaceutical company is listed. I'll ask director pang to prepare an office for you and get you a new computer."

Xue Jinshan immediately and carefully put the prescription paper into his pocket, then stood up and left.

Xia ruofei raised his hand and looked at the time. It was almost time to get off work. He tidied up his desk and went to the staff cafeteria downstairs to have dinner before strolling back to the small villa.

At night, Xia ruofei transformed into a hardworking farmer uncle and worked tirelessly in the spirit map space to harvest the iron – Skin Dendrobium.

Qian Lijun had already replied to him that master Luo would take the train back to Sanshan with the employees of Taoyuan company who were studying at the Dendrobium fungi base the next morning. They would arrive around noon.

Hence, Xia ruofei had to harvest all the iron – Skin Dendrobium tonight.

Fortunately, after being tempered by the body tempering soup and the metal man body refining technique, Xia ruofei's physical strength was many times stronger than that of ordinary people. In addition, time was 30 times faster than normal, so he had plenty of time.

Xia ruofei kept busy in the medium. When he was tired, he would sit down and drink some spiritual water. After more than ten hours, he finally harvested all the fresh strips.

Despite his amazing physical strength, being so busy without rest and sleep made him feel like he was about to collapse.

Xia ruofei drank a few mouthfuls of the spirit Heart Flower petal solution and recovered some of his strength. He then gathered the fresh strips together and weighed them in batches with the small scale in the space. There were about 2400 pounds.

Xia ruofei looked at the bags filled with the Ironhide vessel strips and could not help but smile bitterly. If he were to calculate the time, he would have been busy for days and nights!

If he had to suffer like this in the future, he really wouldn't be able to take it.

At this moment, Xia ruofei thought of the soul puppet. He did not know if the soul puppet could help him complete this kind of repetitive and mechanical labor.

If the spiritual puppet in the medium could help him harvest the Ironhide Dendrobium strips or even pick tea leaves, it would be much easier for him.

During this period of time, Xia ruofei would enter the medium to process the parts of the array disc when he had the time. However, there were too many parts and every part was required to be very detailed. Hence, Xia ruofei's progress was still a little slow. It would probably take some time before he could finish.

After resting for a while, Xia ruofei left the spirit map space with a thought.

Only two or three hours had passed in the outside world.

Chapter 647: In full swing (3)

Xia ruofei was covered in sweat and dirt. He ran to the bathroom and took a thorough shower.

As soon as he came out, Xia ruofei immediately lay on the bed to take a nap. He was really exhausted this time, especially after not sleeping for dozens of hours. He felt very dispirited.

However, before he could fall asleep, he was woken up by a phone call.

The call was from Ling Xiaotian. It turned out that tomorrow was the "wine" day of the Eight Immortals drunk. Ling Xiaotian had asked Xia ruofei in advance if he was ready.

Xia ruofei quickly said that they had arrived in advance. Tomorrow, the winery would send a car over to bring the new wine and the improved Drunken Eight Immortals back.

After hanging up, Xia ruofei couldn't help but laugh.

These two things had to be done at the same time. He had planned to go to the warehouse the next day to take out the iron – Skin Dendrobium fresh strips from the medium and find a car to transport them back to the farm.

This time, he could do two things at the same time.

That was why Xia ruofei had asked Ling Xiaotian to get another small truck for him.

After hanging up, Xia ruofei set an alarm to turn off his phone. Then, he turned off the power and fell into a deep sleep.

The next morning, Xia ruofei was woken up by the alarm on his phone. He quickly got out of bed and washed up.

After a night's rest, his spirit had almost completely recovered.

Xia ruofei got dressed and went downstairs to get a Knight XV. He first went to the staff cafeteria to have breakfast before driving to the warehouse in the city.

.....

Xia ruofei first took out the one – month wine jar from the medium and arranged it neatly.

Then, he took out a dozen large wine jars that were slightly different from the previous ones and placed them in front of the one month wine jar. These were three month wine jars.

Finally, Xia ruofei took out the iron – Skin Dendrobium strips that he had already packed into the bag from the medium.

He waited in the warehouse for a while before the convoy from the winery arrived.

Xia ruofei asked the small truck to drive to the entrance of the warehouse first and asked the movers to load the Ironhide and vessel – like fresh strips into the truck.

Then, the workers began to move the wine jars skillfully.

Jars of new wine were unloaded from the car and placed on the other side of the warehouse.

Meanwhile, the ‘improved’ jar of wine from the Drunken Eight Immortals was being carried onto the emptied truck.

Soon, the winery’s car left the warehouse with the Drunken Eight Immortals wine. Xia ruofei drove the small truck back to Taoyuan farm.

After returning to the farm, Xia ruofei called the Veterans to unload the truck and move the fresh strips into the small warehouse in the workshop.

After he was done, Lei Hu gave Xia ruofei a call. He had already picked up master Luo and the rest at the train station.

Before Xia ruofei left, he had arranged for Lei Hu to pick him up at the station. He had borrowed a seven – seater business car from lingji restaurant.

After master Luo and the others returned to the farm, they had a simple lunch and immediately began to process the iron – Skin Dendrobium fresh strips.

When master Luo saw that the quality of the fresh noodles was as good as ever, he was full of energy. He led the farm employees who had been learning for more than a month and began to work in full swing.

Xia ruofei was also in a good mood as he watched from the side, occasionally giving a hand.

In the afternoon, Jiang Hua and manager li came to the workshop to find Xia ruofei. The budget for the fish pond transformation had been prepared.

Chapter 648: The completion of the disk array (1)

Looking at the budget that Jiang Hua and manager li had prepared – Xia ruofei could not help but grit his teeth – the total budget was almost eight million Yuan.

However, Xia ruofei understood after looking through it.

The requirements for the environment of the breeding of Chinese perch were too high. High – Quality sound – absorbing materials had to be used in the construction. In addition, the air, water temperature, Ph, and so on of the entire breeding workshop had very strict requirements.

The circulating water in the fish pond had to reach the standard of direct drinking water. A set of large water purification equipment alone would cost about two million Yuan.

Although Xia ruofei knew that the clam fish he provided would be very vigorous and not so delicate, this reason was not enough to be shared with others. There was no way he could ask for a lower standard.

Jiang Hua looked at Xia ruofei nervously. He was afraid that the boss would think that it was too expensive and give up on the project.

It wasn't easy to find such a high – paying job, and it was in charge of a business with a lot of autonomy.

Fortunately, Xia ruofei didn't hesitate. He smiled and said, ""No problem, we'll build it according to this standard!"

Jiang Hua let out a long sigh of relief.

"Manager Li, I'll have the finance department transfer the first payment to your account soon," Xia ruofei said to manager li.

"President Xia, there's no hurry, there's no hurry. We're all old acquaintances!" Manager Li said happily.

The Liang family's jianda group was considered to be of an upper – Middle scale in Sanshan city. They had fixed partners, and some of the building materials and equipment were settled regularly without having to be paid in cash. The workers' salaries were also settled monthly, so it would not affect the project funds if they arrived a few days later.

Xia ruofei was on very good terms with Liang Qichao, the heir of the corporation, and his boss, Liang Weimin, was very friendly to Xia ruofei. Manager li was well aware of this, so he had never urged for payment, including the previous construction projects.

.....

Moreover, almost all of Xia ruofei's construction projects had been handed over to the jianda group in the past year, and manager li was in charge of them. Manager li had earned a lot of money from the Commission alone. Because the boss valued him, the best engineering team had been transferred over. With high efficiency, it was natural to make more money.

Xia ruofei smiled and said, "let's follow the rules!" Friendship was friendship, but business was business! Manager li, please hurry up and report to uncle Liang. We'll be signing the contract in two days, and some equipment needs to be ordered in advance. "

"Alright, alright!" Manager Li said quickly.

"By the way, the renovation and construction of the fish pond are urgent." Xia ruofei said, "if we can't get our hands on it, we can stop other projects for a while and prioritize the fish pond."

“I understand! President Xia, don’t worry!” Manager Li patted his chest and promised, “this project is not a big one. If we concentrate our manpower and resources, it can be completed in 20 days!”

“Then I’ll leave it to you guys!” Xia Ruofei nodded.

Twenty days would be almost two years in the original space. If the first batch of pomfrets stayed in the original space, they wouldn’t be baby pomfrets anymore. Also, the fish pond in the original space was too small. It couldn’t keep more than five hundred pomfrets.

However, Xia Ruofei already had a plan.

Xia Ruofei had done an experiment when he first got the space.

Back then, the stream in the original space extended all the way to the space membrane, and the fish that Xia Ruofei had intentionally placed in the stream was blocked by the space membrane.

In other words, it was impossible for living beings from the outside world to pass through the membrane wall in space.

Hence, Xia Ruofei decided that after these little fish had grown to a certain extent in the original space, he would move them to the river in the new space.

The river in the new space was wide and long. Even if there were a hundred times more fish, it could still be kept. All Xia Ruofei needed to do was to move some of the mud from the fish pond into the river so that the river could form a complete microbial chain and the rays would have an endless supply of food.

In addition, a portion of pomfrets were left in the original space to continue breeding young fish.

There was another benefit to this. Xia Ruofei could have an endless supply of fish. When the farm needed them, they could just choose the right size fish from the river in the new space.

As for the farm fish pond, it was a good ‘cover’ for Xia Ruofei to sell the precious Chinese perch.

After getting Xia Ruofei’s approval, Manager Li and Jiang Hua did not even wait for a minute and immediately started the fish pond’s transformation work.

Although the official contract had not been signed yet, Manager Li had immediately transferred the construction machinery and the construction team to the fish pond to start the construction. He had also arranged for special people to order all kinds of special equipment and building materials.

Now, the registration of the pharmaceutical company, the recruitment, the production of the iron maps, the transformation of the farm and fish pond, and other work were all progressing at the same time. The whole company was a busy scene.

After Xia Ruofei was done with the arrangements, he had a lot of free time.

He took some time to brew two portions of heart – nourishing soup and gave them to Xue Jinshan. As the heart – nourishing soup had an obvious calming effect after an hour of consumption, it could increase one’s concentration and comprehension. Hence, Xia Ruofei had specially diluted it to one ratio. Otherwise, the effect would be too heaven – defying.

The truth proved that Xia Ruofei’s actions were necessary.

Xue Jinshan's professionalism was beyond Xia ruofei's imagination. He had really taken a portion of the heart – nourishing soup to experience the medicinal effects.

Chapter 649: The completion of the array disc (2)

Even though it had already been diluted, Xue Jinshan was still amazed by the miraculous effects of the heart nourishing soup.

He took the remaining one back to the school and borrowed the equipment in the school's laboratory for a preliminary test analysis. He then began to write the patent application materials.

Xia ruofei also wrote down the preparation process for the heart – nourishing soup. Naturally, it was an abridged version. Xia ruofei had deliberately omitted some key parts.

In fact, the heat control of Chinese medicine was controlled by experience most of the time. There were no standard procedures like Western medicine preparation, which was to control the temperature at 90 degrees. Was 89 and 91 degrees not enough? This might not be the case. Western medicine was the synthesis and extraction of compounds. Of course, it had to be carried out in strict accordance with the standard, but this was not the case for Chinese medicine.

Therefore, when Xue Jinshan saw Xia ruofei's vague preparation process, he didn't raise any objections and directly included it in the patent application report.

Xue Jinshan spent a few days writing the report, then flew to Beijing to settle the patent.

Xia ruofei originally wanted to find an acquaintance in Beijing through song Rui, but Xue Jinshan had contacted a senior in advance and even used some of his mentor's connections. According to his feedback in Beijing, the patent application was quite smooth. However, the patent application also had a cycle, especially the invention patent, which would take about two years to be officially approved.

Xue Jinshan's people were quite good. They sped up some of the procedures and didn't wait until 18 months later to make it public. In fact, if the applicant had made a request, it could have been made public in advance.

Of course, the patent application document did not mention the treatment of autism. It only applied for a new compound medicine for the purpose of strengthening the spleen and Qi, nourishing the heart and intelligence, warming the kidney and nourishing the brain, nourishing the liver and kidney, and so on.

The patent soon entered the trial stage. Xue Jinshan flew back to San Shan after dealing with it.

All that was left was to wait. While waiting, he might have to answer questions from the examiner and cooperate with the patent review work.

However, they had seized the first opportunity in China.

The next step was to further test the efficacy of the medicine. At the same time, the approval of the new medicine was not necessarily related to the patent, so it could be carried out at the same time.

.....

Feng Jing had recruited four more Chinese medicine undergraduate students, and they were all working at the farm for the time being. Xue Jinshan had become the temporary leader of the small team. He led the four undergraduate students to prepare the materials for the new medicine application.

Xia ruofei didn't have much hope of recruiting an academic expert, so he was mentally prepared for the current team composition and wasn't too disappointed. Besides, young people had their own strengths. They were full of energy and worked with great enthusiasm.

What was more valuable was that Xue Jinshan had participated in a new drug project when he was a graduate student, so he was quite familiar with the application process. With him as the team leader, work efficiency was much higher.

Of course, Xue Jinshan was more interested in testing the effects of the medicine.

When Xia ruofei went to do a follow – up for Chengcheng, he did not go back on his word and brought Xue Jinshan along.

Xue Jinshan asked his family, Xue bi Yun, about Huanhuan's condition in detail, especially about her condition before Xia ruofei's treatment. He asked about every detail.

Comparing the two, Xue Jinshan was amazed by the efficacy of the heart – nourishing soup. He was extremely excited that he had actually participated in the approval of such a magical medicine. When he thought about how the company would still produce and sell the heart – nourishing soup in the future, Xue Jinshan felt as if he had been injected with chicken blood.

One of the most direct benefits of Xia ruofei bringing Xue Jinshan along to do Chengcheng's follow – up was that Xue Jinshan was more motivated to work. After returning to the farm, he pulled a few undergraduate students to work overtime every day.

He didn't want to wait a moment longer. He was determined to get this good medicine approved as soon as possible.

Tian Huixin's recruitment of children with autism was also going very smoothly.

In the name of the Hengfeng group's Charity Foundation, she recruited children with autism to carry out a new experimental treatment.

The Hengfeng group was a world – Class Financial Group, and Tian Huixin knew many parents with autism. With Huanhuan as an example, and the fact that children with autism had no way of seeking treatment, the Hengfeng group was providing free food and transportation, as well as free treatment, so the number of applicants was naturally very high.

Tian Huixin carefully selected ten children, all of whom were relatively representative. They were of different age groups, different pedigree, and different degrees of severity ...

Among the ten children, some were from Hong Kong, some were from the mainland, and two were from the three mountains.

Soon, they had gathered at the Hengfeng hotel in San Shan from all over the country.

Xia ruofei had prepared hundreds of heart – nourishing soup in advance and placed them in vacuum – sealed bags in the space.

So, he went to Hengfeng hotel to meet the children and check on each child's condition. Then, he distributed the medicine to each family for three days.

The rest was simple. Xia ruofei only needed to send over 90 Servings of heart – nourishing soup every three days and come back for a follow – up once in a while.

Of course, Xue Jinshan went to Hengfeng hotel more frequently than Xia ruofei.

He would go there almost every one or two days to record each child's situation in detail, including some of their behavioral characteristics, reactions after taking the medicine, and so on.

He also planned to ask the child's parents to fill out the loneliness scale once a week to compare the changes in their children after taking the medicine.

Feng Jing's application for a pharmaceutical company had also made progress, and the capital verification would soon be completed.

Fortunately, master Luo had brought Qin Xiaojun and the others to work overtime, and they had already finished making the iron – Skin maples.

He won a total of 148.5 kg.

The quality was still as good as ever, and it could definitely be called the best.

Xia ruofei immediately contacted Mr. Lin of Tongren Hall in Qiantang city and told him that the new batch of iron – hide maples had been completed.

It was as if CEO Lin had found a treasure. The iron – skinned maples that Xia ruofei had sold to Tongren Hall were of excellent quality and were sold out very quickly. Nowadays, there were many rich people who were willing to spend money for the sake of health.

Moreover, Qiantang Tongren Hall's top – grade iron – skinned fengdou had also made a name for itself. Some branch stores in other regions also came to President Lin to ask for goods. Even the main store came forward to coordinate and transfer some goods to the main store in the capital to sell. Unfortunately, President Lin could not make a meal without rice.

Xia ruofei's call came at the right time. CEO Lin quickly told him that the money was ready and asked Xia ruofei to arrange for the delivery as soon as possible.

Xia ruofei was prepared to provide Mr. Lin with 140 kilograms of iron maples. He wanted to keep the remaining 8.5 kilograms for himself. An iron maples of such quality would be a good gift to an elder or a friend.

He arranged for Lei Hu to bring two skilled veterans to drive a pickup truck with a sealed 140 – kilogram tin bucket to Qiantang city overnight.

According to the agreement, starting from this batch of goods, when Tongren Tang sold the iron – skinned fengdou again, they would use a brand new package with the peach blossom company's LOGO.

However, the peach blossom company had already transported the various specifications of the packaging to Qiantang through logistics, so Lei Hu and the others only needed to send the large bags of iron – skinned fengdou over.

President Lin was also very quick to make the payment. After inspecting the goods that night, the bank opened early the next morning and sent the finance staff to the bank to make the transfer. He then sent a copy of the receipt to Lei Hu and brought it back to the three mountains.

According to the previous agreement, each kilogram of iron Kaede bucket was 170000 Huaxia dollars, so this batch of goods brought paradise Corporation an income of 23.8 million Yuan.

When pang Hao reported to Xia ruofei that the payment from Tongren Hall had been received, Xia ruofei immediately asked pang Hao to transfer 10 million Yuan to the company account of Taoyuan pharmaceuticals. At the same time, he also asked him to transfer 2 million Yuan in advance for the first batch of construction funds for the fish pond transformation to jianda group's account.

After solving the problem of funding, there were professionals in charge of all aspects of the work, and the progress was very fast. Xia ruofei also had more thoughts and energy to process the parts needed for the array disc.

After more than ten days of hard work, Xia ruofei finally finished the last component.

With a hint of excitement, he took out the small book and prepared to assemble the formation plate according to the blueprint.

Xia ruofei couldn't wait to see what this soul puppet that he had put in so much effort for was ...

Chapter 650: Soul puppet Xia Qing (1)

The formation plate components were rather time – consuming, but assembling them wasn't difficult.

Many of the parts were similar to mortises and tenons found in ancient buildings, but they were all miniature.

Xia ruofei followed the order and position marked in the booklet and quickly put the parts together.

These parts, which were made in strict accordance with the size specified in the booklet, were put together to form an octagonal metal plate.

There were also veined patterns on the metal plate.

The lines on each part were connected together after they were pieced together.

In the middle of the metal plate, there was a circular groove.

Xia ruofei took out the Supreme – grade sheep – Fat white jade that was previously engraved with the core rune. With a clatter, the sheep – Fat white jade was just right on top.

Xia ruofei's heart was filled with anticipation. He picked up the completed array board and appeared in front of the wordless stone tablet in the new space.

Was this the primordial chaos stone tablet mentioned in the booklet? Xia ruofei was also a little nervous.

He carefully held the formation plate with both hands and slowly approached the stone tablet.

At this moment, a suction force suddenly came from the stone tablet, and the entire formation plate was sucked in.

At the same time, an octagonal groove as big as the array disc appeared on the stone tablet's surface. The array disc was directly inserted into the groove by suction.

.....

Before Xia ruofei could react, light spots started to appear on the array board. These light spots moved along the lines on the array board at high speed and formed streams of light.

More and more light spots appeared, and they slowly gathered together. The flowing light also became more and more dazzling.

The streams of light shuttled back and forth in the patterns of the array disc, and the dazzling brilliance enveloped the entire array disc in white light.

These streams of light eventually gathered at the sheep – Fat white jade in the center.

The light from the center of the suet white jade was getting brighter and brighter. Xia ruofei could not even open his eyes.

However, he didn't dare to close his eyes. He kept squinting at the formation plate nervously.

This process lasted for about half a minute, and the white light on the sheep – Fat white jade reached its peak.

Then, something seemed to have exploded. The whole process was very quiet, but Xia ruofei seemed to have heard a "Chi" sound. There was an invisible fluctuation, and white fog appeared in front of the stone tablet.

The White mist did not dissipate, but instead gathered together.

The White mist grew more and more, and finally formed a ball of mist. There were vague shadows inside, and it was very unreal.

Xia ruofei was confused. 'A cloud of white mist?'

Could this guy be a spiritual puppet?

Wasn't this a far cry from the image he had imagined?

Moreover, how was he supposed to use this thing?

From the time he had obtained the spirit painting scroll until now, Xia ruofei had spent the most effort on the spiritual puppet. His anticipation was the strongest, so he was a little worried about his gains and losses.

The cloud of white mist was extremely condensed. It hovered steadily above the stone tablet and then stopped moving.

Xia ruofei looked at it suspiciously for a long time. Then, he tried to release his spiritual power to approach the White mist.

He felt that the White mist had a strong penetrative ability, and his spiritual power entered the White mist without any effort.

Then, Xia ruofei “saw” the scene inside the White fog. Of course, it was not very real, as if it was covered by a veil.

The interior of the White mist seemed to be an independent space, and in this space, there was a human – shaped object that was motionless.

Xia ruofei suddenly had an epiphany because this was very similar to the situation when he was exploring the spirit map space in the outside world.

He quickly extended his mental power and wrapped it around the human – shaped object. Then, with a thought, he took things out of the space like he usually did.

As expected, the next moment, a person appeared in front of Xia ruofei.

Yes, it was a person!

The man was wearing a long green robe. He had a thin face and high cheekbones. His hair was in an ancient bun and he had a small mustache.

Xia ruofei was shocked and took a step back subconsciously.

He didn’t even notice that the White mist was quickly dissipating.

It had been a long time since he had obtained the spirit map space, but there had never been a human other than Xia ruofei in it.

Sometimes, Xia ruofei would wonder how he would deal with the situation if there was a new owner of the realm after the realm was upgraded.

Ever since he had the spirit map, Xia ruofei had unknowingly gained countless benefits. There was no doubt that he was very dependent on the spirit map space. Subconsciously, he had already regarded the space as his private property and regarded the existence of the spirit map as his top secret. He did not even tell his closest people about it.

Now that the middle – aged man in green had suddenly appeared in the space, Xia ruofei could not help but be shocked.

However, he soon realized that the man was like a puppet. Although his eyes were open, he stood still next to the stone tablet.

Xia ruofei waved his hand in front of the man in green and said, “Hello ...”

“Hello.....”

“Hi.....”

The man in Green’s eyes were listless as he stared straight ahead. No matter how Xia ruofei waved his hand, he did not even blink.

Xia ruofei said to himself, “is this a soul puppet?” Isn’t this too real? It’ll scare me to death ...”

He mustered his courage and took a closer look. He couldn’t tell that it was a lifeless dummy. Its hair, eyes, beard, and even every pore looked like a real person.
