

God tier Farm 841

Chapter 841: Perfect transport_1

Xia ruofei was stunned.

What did the heat from the Jade Leaf mean? This meant that there were world stones nearby! In terms of space upgrade, this magical thing was much better than ordinary Jade!

Now that the spirit map space had been upgraded to a certain level, every upgrade became very difficult. If he only relied on buying Jade, he might not be able to upgrade one or two levels even if he used all his assets.

However, obtaining a partial world stone was entirely dependent on luck. The sensory Jade Leaf that Xia Qing had created could only detect world stones within a range of twenty li, which was ten kilometers.

Compared to the vast heaven and earth, a range of ten kilometers was really too small. If one specifically relied on the sensing Jade Leaf to search, it would be like looking for a needle in a haystack.

Being able to sense the existence of the world stone in Nagqu was definitely a pleasant surprise for Xia ruofei.

Xia ruofei took two deep breaths to calm himself down. He was not in a hurry to find the world stone.

Because they were in the wilderness, there was no one within a ten li radius. This world stone was definitely not kept at home by someone, but in the wilderness. Thus, there was no need to rush.

As for the aweto, Xia ruofei had basically arrived at his destination and could start implementing it.

He tried to climb a little higher, and then felt the temperature of the Jade Leaf. He was very happy to find that the temperature of the Jade Leaf had increased by a small margin.

This meant that he was a little closer to the Jade Leaf.

Then, there would be no delay.

Xia ruofei continued to climb up. At the same time, he paid some attention to the temperature change of the Jade Leaf.

When Xia ruofei's watch showed that he was close to 5800 meters above sea level, he gradually slowed down.

Under the strong light of the flashlight, Xia ruofei found a bat moth hanging upside down on a small branch. When the flashlight shone on it, the bat moth immediately flapped its wings and flew towards the light source.

With a thought, Xia ruofei used his spiritual power to drag the bat and moth into the spirit map space.

In the mountain and sea realm of the spirit map space, there was a huge gauze cage that Xia ruofei had prepared a long time ago. The bats and moths appeared out of thin air in the gauze cage. Now, Xia

ruofei's control of his spiritual power had improved. He could accurately control items to appear at any location in the space without any errors.

There were already more than a dozen bats and moths flying around in the cage.

These were the bats and moths that Xia ruofei had captured when he was climbing up the mountain.

After Xia ruofei captured the bat moth, he stopped and used his flashlight to look closely. He found that there were many bat moth eggs on the grass and soil in the area.

With a thought, a shovel appeared in Xia ruofei's hand out of thin air. He first marked out an area of about two meters by two meters, then began to dig carefully with the shovel. He tried not to damage the vegetation on the surface of the ground. He dug up the soil and the vegetation on the surface of the ground, which was about 10 to 15 centimeters thick.

It might not be easy for an ordinary person to control their strength, but Xia ruofei did it with ease.

He quickly dug up a 20 – centimeter piece of soil and sent it into the spirit map space with a thought.

In the mountain and sea realm of the spirit map space, there was a piece of land that was about two mu in size that had already been turned over by Xia Qing. The soil of the quxue region's high mountains that contained the eggs of bats, moths, worms, and fungi had been sent to the surface of this piece of land.

Xia ruofei was very fast. The soil and vegetation in the area he had marked out were quickly dug up and sent into the spirit map space.

After doing all this, Xia ruofei carefully dug up some soil nearby to fill up the area he had dug up.

Although the color of this area was obviously different from the other areas, it was already past the Cordyceps's growing season. No Tibetan people would come to this mountain. When they started to dig for the Cordyceps in the next year, it would definitely be unnoticeable.

After Xia ruofei was done, he continued to search the area.

According to gersun's introduction, the soil in the nearby mountains contained almost all wormgrass and fungi. However, there were many accidental factors such as whether the eggs of bats and moths could hatch larvae, whether the larvae could drill into the soil, and whether the mycelium in the soil could infect the larvae. That was why the production of wormgrass was so low.

Hence, Xia ruofei's main goal was to find an area where the eggs were concentrated. He would collect the vegetation and soil in the area and move them into the spirit map space.

The eggs of bats and moths were very small. If they were attached to grass, it would be difficult to find them even during the day, let alone in the night.

However, Xia ruofei's eyesight was amazing. With the help of the strong flashlight, he could easily find the eggs that were small targets.

Just like that, Xia ruofei continued to search for the eggs in the nearby mountains at this altitude and moved them into the spirit map space.

Of course, this was a stupid method and it was very physically exhausting. If it was anyone else, it would be an impossible task.

However, to Xia ruofei, he only felt a little tired at most. After all, he was at an altitude above sea level. With such a heavy workload, it was impossible for Xia ruofei to not feel anything.

Chapter 842: Perfect transport_2

However, even though he was tired, it did not affect his work speed at all.

When Xia ruofei was looking for the bat moth eggs, he would capture the bats and moths he encountered along the way into the silk cage in the spirit map space and temporarily “imprison” them.

Before he knew it, there were already sixty to seventy bats and moths in the cage. The two acres of land in the space were gradually covered by the vegetation of the qu Xue Yu plateau.

A few hours passed.

Xia ruofei finally heaved a long sigh of relief after dealing with the last patch of vegetation and soil.

Now, the two acres of land in the space were completely covered with the Highland vegetation and soil. In addition, there was also the largest plastic tidying box half – filled with space soil, which was also covered with a layer of Highland vegetation and soil.

Moreover, this small piece of Highland vegetation and soil, which was about one square meter in size, was specially selected by Xia ruofei. It contained the most bat moth eggs.

This plastic box was naturally for Xia ruofei’s cultivation experiment.

Tonight’s operation was no doubt a very heavy physical labor. Even if Xia ruofei’s physical fitness was super strong, he was already covered in sweat.

He sat on a huge rock and took out some water from the spirit pond to drink. Then, he sat down and rested for a while.

While they were resting, Xia ruofei communicated with Xia Qing in the space through divine thoughts and gave him instructions. Xia ruofei had made some preparations before they set off, but there was no guarantee of safety in the wilderness. Xia ruofei could not enter the spirit map space, so he had to leave the rest to Xia Qing.

While Xia ruofei was resting, his mind was constantly communicating with the space, and he could “see” Xia Qing’s every move in the spirit map.

After Xia Qing received Xia ruofei’s order, she immediately began to work on the land covered with bat moth eggs and worm grass fungi.

He set up the zinc – plated pipes that Xia ruofei had prepared earlier and inserted them into the reserved holes on the ground.

The tubes were about two meters long and were connected to the mesh net. When the tubes were all set up, the mesh net would surround the land.

Next, Xia Qing spread out another piece of muslin net that could cover the entire land. Then, this piece of muslin net flew up lightly and accurately covered the top of the entire land. With Xia ruofei's permission, the surrounding muslin net formed a whole. Xia Qing, who was born for the spirit map space, could also use the power of the five elements in space.

Xia Qing quickly reinforced the joint, and the part of the mesh that was in contact with the ground was also covered with a layer of space soil to ensure that there would be no gaps.

Then, Xia Qing carried the gauze cage and walked into the area covered by the gauze through the only door left with a magic switch. She released all the bats and moths in the gauze cage and quickly left the area of the gauze, filling up the only hole.

Very quickly, an "independent kingdom" similar to the living space of Hornets appeared in the mountain and sea realm of the spirit map space.

After completing the first task given by Xia ruofei, Xia Qing carried the largest packing box and shuttled into the Archean realm without stopping.

Xia ruofei's idea was the same as cultivating the abalones. He wanted to use the difference in the flow of time at the Archean realm to experiment and ensure that this method could perfectly simulate the environment that the Cordyceps was produced in.

Otherwise, wouldn't it be a waste of time and expression if they waited a year to find out that this method didn't work?

Xia Qing moved the large sorting box containing the bat moth eggs and worm grass fungi to the side of the space spirit pond, next to the orange plastic box containing the little abalone.

Then, he followed Xia ruofei's instructions and found a small bottle of diluted spirit Heart Flower petal solution. He poured it evenly on the surface of the soil and vegetation in the sorting box.

Then, Xia Qing also wrapped the top of the sorting box with a gauze net to ensure good ventilation and to prevent the hatched bat moth larvae from escaping from the sorting box.

After Xia ruofei confirmed that Xia Qing had completed all the work, he conveyed his approval to Xia Qing through his divine sense.

The reason why Xia ruofei wanted Xia Qing to finish the work as soon as possible was that he hoped to see the results of his efforts as soon as possible.

Otherwise, by the time he returned to the farm, he would have wasted a few days. That would be equivalent to wasting a few months in the Archean realm!

With this arrangement, Xia ruofei only needed to wait for seven or eight days after he returned to the farm. He could basically judge whether his idea could really build an ecosystem in the realm.

After sitting for such a long time, Xia ruofei's energy had mostly recovered. Hence, he stood up and prepared to carry out the more important task of looking for the world stone.

When Xia ruofei was searching for the area where the bat moth eggs were concentrated, he was also very careful to feel the temperature of the Jade Leaf. He carefully controlled the direction he was moving in to ensure that he was getting closer and closer to the boundary stone that the formation had sensed.

Even though he would sometimes deviate slightly from the direction for the nearby bat moth eggs and vegetation, he would quickly return to the right path after collecting the vegetation and soil.

Now that he had completed the first step, Xia ruofei had no more worries. He focused on sensing the slight changes in the Jade Leaf's temperature and constantly adjusted his direction, moving towards the possible location of the realm stone.

If it was on flat ground, with the precise guidance of the "radar" that was the sensory Jade Leaf, it was not a big deal for a special Combat Elite like Xia ruofei to find something within a 10 – kilometer radius.

However, this place was not flat ground, but a continuous mountain range.

Sometimes, Yu Ye could clearly sense that he should be heading in a certain direction, but there was a cliff in front of Xia ruofei. As a result, he had to take a long detour to reach the other side.

And after reaching the other side, according to the temperature of the Jade Leaf, it was likely that he would have to cross the same cliff at another location and return to the other side.

If it was an ordinary person, they would have been tortured to the point of madness.

However, Xia ruofei's mental fortitude was not something that an ordinary person could compare to. Furthermore, the world stone was too important to him. No matter how difficult it was, he had to obtain it.

Moreover, this was just a difficulty caused by natural factors. In Xia ruofei's opinion, it was better than the world stone being kept by someone else.

Xia ruofei was very patient as he climbed up the plateau that was five to six thousand meters above sea level.

After walking for a short distance, he would stop and carefully feel the change in the temperature of the Jade Leaf. Then, he would either continue in the same direction or make slight adjustments to his route.

Just like that, Xia ruofei had been digging in the mountains for three to four hours. It was already the second half of the night, but Xia ruofei did not feel tired at all. Instead, he was getting more and more excited because he could feel the temperature of the Jade Leaf getting higher and higher.

This meant that his efforts in the past few hours had not been in vain. He was getting closer and closer to that world stone.

At this moment, Xia ruofei suddenly stopped.

His keen sense of danger made him alert. The moment he stopped, there was a rustling sound from the grass. Xia ruofei could feel danger approaching him from behind.

He instinctively dodged to the side, and at the same time, the military dagger that had accompanied him for many years appeared in his hand out of thin air.

Xia ruofei saw a black shadow pouncing towards him from the corner of his eye. He didn't have time to think and dodged the fatal blow while waving his dagger.

The black shadow seemed to have felt the killing intent of the military dagger, but it could not Dodge in the air. The huge inertia caused it to crash straight into the dagger.

Xia ruofei didn't do anything but raise the tip of his knife.

With a ripping sound, the sharp dagger made a huge gash on the black Shadow's body. It fell to the ground and struggled for a while before it stopped moving.

Xia ruofei shone his flashlight on it. It was a Wolf that lived on the plateau.

It had happened in a flash. If Xia ruofei had reacted a little slower, even if he didn't lose his life, he would have suffered a great loss under the sharp claws of the wolf.

However, Xia ruofei did not feel relieved after killing Cang lang because he had sensed that the danger had not been eliminated.

He suddenly turned around and used the strong light of the flashlight to sweep the distance.

One pair, two pairs, three pairs ... More than ten pairs of green eyes were staring at Xia ruofei with ferocity and greed.

Xia ruofei smiled bitterly. He had encountered a pack of wolves ...

Chapter 843: Reobtaining the world stone (1)

"Aowu ..."

On the highest rock, the largest Wolf raised its head and let out a fierce roar.

The alpha Wolf's cry was like a charging horn. In an instant, more than ten wolves pounced on Xia ruofei.

Xia ruofei's expression was serious, but he was not flustered at all. He held the military dagger tightly and advanced instead of retreating, facing the ferocious wolves.

Xia ruofei turned his body slightly. His body was like a strong bow that was pulled to the maximum. No one knew the strength that was contained in his seemingly thin body.

Although wolves were cunning animals, they were not humans. When they saw that Xia ruofei had revealed an opening, they immediately pounced on him without hesitation.

Xia ruofei sneered. He turned around and kicked a strong Wolf in the air, sending it flying a few meters away.

After the wolf landed on the ground, it was already motionless. Xia ruofei did not hold back at all in his kick. The Wolf's internal organs were all crushed. While it was in mid – Air, the wolf was already dead.

This kick was the prologue to Xia ruofei's attack.

At this moment, two more wolves had pounced on Xia ruofei at the same time.

He strode forward as if he was taking a stroll in a courtyard and easily avoided one of the wolves. At the same time, he gently waved the military dagger in his hand, and the dagger flashed in the dark night, directly cutting off the head of the wolf.

Cang Lang's body continued to fly forward due to inertia. As it flew, a large amount of blood spurted out from the wound on Cang Lang's neck. The warm wolf blood splattered on Xia ruofei's body and completely aroused his murderous intent.

At this moment, a few wolves had arrived at the same time. The wolf that had dodged earlier also turned around and pincered Xia ruofei.

Xia ruofei sprinted forward a few steps, then stomped on the ground and leaped into the air. In the air, Xia ruofei aimed for a position and stomped on the head of a Wolf. His body overcame gravity and flew into the air again.

Just like that, Xia ruofei stepped on the heads of three wolves in a row. They all fell to the ground and died after letting out a miserable howl. Xia ruofei only had to step on them lightly and their heads were all crushed.

Xia ruofei did not linger in the battle. He chose to attack from the air. His actual target was the alpha Wolf, who had been standing quietly on the rock.

After a few tricks, Xia ruofei's feet never touched the ground. He was already in front of the alpha Wolf.

The alpha Wolf had obviously realized the danger that Xia ruofei was in. It howled even more ferociously and crazily. The wolves' attack speed increased as well, surrounding Xia ruofei from all directions.

Xia ruofei's body was obviously exhausted in mid – Air, but he still turned his body fiercely and used the strength of his waist and abdomen to change his direction. He kicked out with both legs and kicked away three or four wolves. At the same time, he finally stood on the rock that was occupied by the alpha.

It was as if Xia ruofei had eyes on the back of his head. He turned his hand and accurately grabbed the front paw of a Wolf. Then, he threw the wolf, which weighed more than a hundred pounds, with a back throw. It hit the rock wall heavily.

At the same time, the military dagger in Xia ruofei's right hand drew a cold arc in the air and quickly slashed at the head Wolf's neck.

The alpha Wolf howled and nimbly avoided its vital parts. Its huge body was extremely agile. In the blink of an eye, it opened its bloody mouth and bit towards Xia ruofei's neck.

At the same time, at least five other wolves had already pounced on Xia ruofei.

Due to inertia, Xia ruofei's right hand that was holding the knife was still slashing at the Alpha's position. However, he did not panic at all. He used the momentum to turn his body and avoided the Alpha's fatal blow. At the same time, he leaned his shoulder heavily against the alpha.

The alpha Wolf whimpered and staggered a few steps back from Xia ruofei's collision.

Xia ruofei also took the opportunity to swing his hand back and took the lives of two more wolves in an instant. At the same time, he did not linger in the battle. With a kick of his feet, he rushed towards the direction of the head Wolf.

He swung his blade as fast as lightning.

The alpha subconsciously dodged to the right, but it did not know how cunning humans could be. Xia ruofei's attack was a feint, and its center of gravity did not move with the attack.

The alpha dodged to the right, which was also within Xia ruofei's calculations. He had already prepared his left fist and struck out heavily.

This was completely out of the Alpha's expectations. In a flash, it had no time to react and Xia ruofei's Iron Fist had hit its head.

The alpha Wolf howled and fell to the ground, blood flowing out of its mouth and nose. It kicked a few times with its four legs and died ...

Xia ruofei had used all his strength in this punch. Its power was no different from a heavy truck. Moreover, the area affected was so small that the explosive force instantly turned the head of the alpha into a paste.

After taking care of the alpha, Xia ruofei turned around. His body was covered in warm wolf blood. His right hand was holding the military dagger in reverse. He stood on the high Rock like a god of death. Under the moonlight, he looked murderous.

There were only five wolves left in the pack. At first, they were all aggressive and unreserved as they pounced on Xia ruofei. However, once the alpha Wolf died, the five wolves seemed to have lost their momentum. They subconsciously stopped and looked at Xia ruofei with vigilance.

Chapter 844: Obtaining another world stone (2)

Xia ruofei laughed coldly and took a step forward with his dagger.

The wolves' eyes seemed to reveal a trace of fear, and they actually took a step back in unison.

Xia ruofei walked forward step by step while the five wolves retreated slowly.

Finally, the wolves seemed to be unable to withstand the invisible pressure. One of the wolves howled, and then they all turned around and ran away in unison.

Xia ruofei pouted. He had no interest in chasing after them and just let them go. He was still concerned about the realm stone. These wolves lived in the Highlands and mountains all year round, and there was no end to them. Since they had taken the initiative to escape, Xia ruofei naturally would not care.

There were six or seven Wolf corpses on the ground. Some of them had been cut open, while others had no wounds on their bodies but were already dead. Under the moonlight, the scattered Wolf corpses were telling the story of the tragic battle just now.

Xia ruofei didn't want to waste anything and simply cleaned up the wolf carcasses.

Xia ruofei, who had gone through countless combat and survival training in the forest, was very familiar with handling the wolves' corpses. It did not take long for him to remove all their internal organs and dig out their fangs for storage.

Xia ruofei threw away the Wolf's internal organs and kept the rest of the useful things in the spirit map space.

Some people who had eaten wolf meat before didn't like the taste, but Xia ruofei had eaten it once during a tropical jungle survival training. At that time, squad leader Luo had used a cooking method and the taste was quite good. This time, he had just killed a few wolves, so Xia ruofei naturally wanted to try it.

In addition, wolf fangs could also be made into good accessories. There were also several wolves, including the alpha Wolf, which had no wounds on its body. The alpha Wolf was particularly large, so the wolf skin was very suitable for personal use or to give away.

After cleaning up the scene, Xia ruofei was not in the mood to wash off the wolf blood on his body. He continued his search in the direction of the realm stone.

Three or four o'clock in the morning was the darkest time of the day. Even though the moon was pretty bright tonight, it was almost setting. Most of the time, Xia ruofei could only rely on the strong light of the flashlight to find a way forward in the wilderness.

However, after dealing with Cang lang, Xia ruofei did not encounter any more danger. It was just that the terrain caused him to take a lot of unnecessary steps.

But in general, Xia ruofei was getting closer and closer to his goal.

As the sky started to brighten, Xia ruofei finally felt that he should be able to find the world stone soon.

That was because the Jade Leaf on his chest was almost boiling hot.

This was a small valley. The distance to the place where Xia ruofei first found the Jade Leaf was about six to seven kilometers in a straight line. However, Xia ruofei had to walk 30 to 40 kilometers to find this place. Moreover, it was a high altitude mountain with no roads at all.

Although the valley was low – lying, Xia ruofei's watch still showed that it was more than 4500 meters above sea level.

At this time, the sky was gradually turning bright. Although no one would come here during this season, Xia ruofei had to speed up.

There were some shrubs that were not very tall in the valley, and there was even a small stream winding through. The sound of flowing water could be heard faintly from the depths of the forest.

Xia ruofei carefully felt the change in the temperature of the Jade Leaf as he carefully moved his feet.

Now that the Jade Leaf was very hot, Xia ruofei had to keep moving and feel the slight changes in it to find a more accurate position.

This was a delicate and cumbersome task.

After another half an hour, Xia ruofei finally arrived at a patch of grass. After repeated experiments, Xia ruofei was almost certain that the world stone was within a two to three meter radius in front of him.

Xia ruofei first removed the Jade Leaf and kept it in the spirit map space. The Jade Leaf was too hot. If he kept it on his chest, he felt that he would be burned.

After keeping the Jade Leaf, Xia ruofei flipped his hand and took out the shovel from the space. He cleared all the weeds in the vicinity.

The situation on the ground could be seen clearly. There was no black boundary stone that Xia ruofei was familiar with.

He expanded his search area a little, but still found nothing.

Then there was only one possibility, and that was the world stone being buried underground.

Xia ruofei did not hesitate. He immediately took out a hoe and started to dig.

Xia ruofei would carefully rummage through the soil he dug out. After making sure that there were no world stones, he would then place them aside.

In the past, when he was training in the jungle, Xia ruofei often needed to dig some individual fortifications. He was very familiar with digging and had dug nearly two meters deep in a short time.

However, he still couldn't find the world stone.

Xia ruofei was helpless about this. The induction array could detect the realm stone within a ten – kilometer radius. In theory, the realm stone could be buried very deep. It could be found by the induction array even if it was dozens of meters or even hundreds of meters deep.

However, for Xia ruofei, if it was really that deep, it would be very difficult to dig it out.

The deeper they dug, the larger the area would naturally be. This was not something that could be completed by human strength.

Xia ruofei smiled bitterly and mumbled to himself, ""We're in the wilderness, even if we rent an excavator, we can't drive it in ..."

At this point, Xia ruofei suddenly froze. He slapped his head and said, ""He really has a pig's brain ..."

Wasn't there a small excavator for farming in the spirit map space?

Xia ruofei threw the hoe Down and sent his thoughts into the spirit map space to check. After confirming that Xia Qing was not using the excavator, he immediately took it out.

Xia ruofei jumped onto the excavator. After starting it up, the excavator emitted black smoke. He operated the mechanical arm very nimbly and began to work.

Although this little fellow could not be compared to those large construction machines, it could at least dig several times more than Xia ruofei's manual work.

Xia ruofei's efficiency increased.

The mini excavator worked for another half an hour and the soil it excavated formed a small mountain. Xia ruofei had checked the soil and found no boundary stones.

Xia ruofei was not in a hurry. He was very confident in the accuracy of the Jade Leaf. Since the world stone was here, it would not be able to escape.

After a few minutes, the small excavator had dug out a small piece of soil. Xia ruofei controlled the mechanical arm to raise it high and lift the soil up.

Through the windshield of the excavator, Xia ruofei's Eagle – like vision immediately noticed a small black stone in the soil that was falling from a high place.

He immediately turned off the small excavator and then quickly moved to the top of the mound.

Xia ruofei had already found the location and quickly found the small black stone from the pile of soil.

The moment he saw this black stone, Xia ruofei was overjoyed. He was almost certain that this was the world stone that he had spent so much effort to find.

Xia ruofei took out the sensing Jade Leaf. As expected, when he got close to the black stone, the temperature of the Jade Leaf reached its peak. Xia ruofei almost couldn't hold it.

He quickly put the sensing Jade Leaf into the spatial space and communicated with Xia Qing using his divine sense to confirm that absorbing the world stone at this time would not affect the experiments that were being carried out in the spatial space.

Hence, Xia ruofei did not hesitate to summon the spirit map scroll from his palm. Then, he held the realm stone and approached the scroll.

There was a huge suction force from the spirit map. Xia ruofei did not hold the realm stone tightly, so it was immediately sucked in and turned into a black light. The moment it came into contact with the spirit map, it disappeared into thin air ...

Chapter 845: growing well (1)

It took time for the spirit map space to absorb the world stone. Xia ruofei kept the small excavator into the space and left it alone for the time being. After all, Xia Qing would tell him when he was done absorbing the world stone.

Xia ruofei followed the sound of the water and found the stream. Then, he took off his coat that was stained with wolf blood and washed up. He took out a spare coat from his backpack and put it on.

If he returned to Nagqu County covered in blood, wouldn't the hotel staff be so scared that they would call the police?

Xia ruofei cleaned himself up and left the valley.

The sky was already bright. Xia ruofei had been exploring the area for the whole night and was quite familiar with the terrain. He quickly planned the most reasonable route and started to retreat down the mountain.

Xia ruofei had spent most of his time walking around the area last night. It took him less than an hour to go down the mountain and he was already back at his car.

Xia ruofei drove the off – Road vehicle back to Nagqu County. After checking out of the car, he went online to buy a train ticket back to Lhasa. Then, he rested in the hotel room for a while. When it was almost time, he checked out and rushed to the train station.

On Xia ruofei's way to the train station, Xia Qing had already informed him through spiritual will that the spirit map space had already absorbed the entire world stone.

However, with Xia ruofei's current condition, it was obviously not suitable for him to enter the space to check it out. He also did not want Xia Qing to tell him what changes the space had undergone after absorbing the world stone. At this time, he still had to maintain a sense of mystery. Otherwise, when he went in to check it out again, he would not have that pleasant feeling.

Xia ruofei had already booked a direct flight from Lhasa to Sanshan city. However, there was only one flight per day. By the time the train arrived at Lhasa, it would not be able to catch the day's flight. Hence, Xia ruofei had booked a ticket for the next day. He had no choice but to stay in Lhasa for another night.

In the hotel in Lhasa, Xia ruofei suppressed his curiosity and did not enter the spirit map space for the sake of safety.

The next afternoon, Xia ruofei's flight landed smoothly at the Changping International Airport in Sanshan city.

This trip could be said to be a long one, but the result was still not bad. It could be said that the harvest was quite rich.

Lin Yue 'E's family had agreed to come to the three mountains, and the journey to the song had gone very smoothly. Xia ruofei had completely achieved his expectations. More importantly, Xia ruofei had even obtained a pleasant surprise by finding a world stone.

If it wasn't for the aweto, Xia ruofei might not have been able to go to Nagqu in his entire life. He would have missed the opportunity to obtain the realm stone.

Perhaps it was the will of the heavens. The realm stone that had been buried in the frozen soil of the plateau for God knows how long had finally reached Xia ruofei and was put to use.

Xia ruofei had already informed the company in advance. Hence, when he walked out of the airport terminal, Lei Hu was already waiting at the entrance to pick him up.

Lei Hu came forward and greeted Xia ruofei respectfully. Then, he took his luggage, which was not much to begin with.

On the way back to the farm, Xia ruofei briefly understood the company's situation. After knowing that everything was normal, Xia ruofei nodded and leaned back in his chair, closing his eyes to rest.

Back at Taoyuan farm, Xia ruofei did not go to the office building. Instead, he went straight to the small villa.

Lin Qiao was still interning in the company, so the Tibetan – style gifts that Xia ruofei had prepared for her had not been used yet.

Hu Zi's mother was preparing lunch at home. When she saw Xia ruofei return, she was very happy.

"RUO Fei, why didn't you tell us you were coming back?" Hu 'Zi's mother reproached, "I should've prepared a few more dishes!"

Xia ruofei laughed and said, "godmother!" I'm not an outsider, do I need to prepare anything? Besides, as long as it's godmother's cooking, I love it!"

"You're such a sweet talker ..." Hu Zi's mother said with a smile.

"Godmother, don't be busy!" Xia ruofei took out a packet of Cordyceps from his backpack as he spoke. "These are some Cordyceps that I bought from Nagqu. It's good for your body to eat a little every day. Just soak it in water and drink it."

These were the level 1 wormgrass that Xia ruofei had bought at Gesang's house two days ago. He had spent more than 100000 Yuan on them. In the eyes of ordinary people, they were extremely valuable. However, Xia ruofei had only bought them casually to confirm the quality of the wormgrass in Gesang's house. Hence, he had taken them as a gift for Hu Zi's mother when he returned.

"This is aweto? This thing must be very expensive, right?" Hu Zi's mother reproached, "you child ... Why are you wasting money again? Godmother's health is great now, she doesn't need any supplements!"

Xia ruofei chuckled as he stuffed the packet of worm grass into Hu Zi's mother's hands and said, ""Godmother, I bought this from the wormgrass production area. It's not expensive at all. This is my filial piety!"

"Alright, alright! You're not allowed to waste money like this next time!" Hu Zi's mother said.

Even though she said that, she still felt very happy that Xia ruofei was so filial.

"I know! Godmother, I'll go up and take a shower first!" Xia ruofei said with a smile.

"Mm! I'll call you when it's time to eat!"

Xia ruofei carried his backpack and quickly went upstairs to his room.

Chapter 846: growing well (2)

After locking the door and windows, Xia ruofei immediately summoned the spirit painting scroll and entered the medium.

Although Xia ruofei had long gotten used to the rich spiritual Qi in the space, he still felt extremely comfortable the moment he entered the space. It was as if every pore in his body was cheering.

Xia ruofei had appeared in an Archean realm. Xia Qing, who was in the mountain and sea realm, immediately felt it. The moment Xia ruofei entered the spatial zone, she also appeared in the Archean realm.

“Master!” Xia Qing respectfully bowed and greeted him.

Xia ruofei nodded and asked, “Xia Qing, after the spirit map world absorbed the world stone, did it level up?”

“Master, the spirit map world has not been upgraded yet ...” Xia Qing said with her head lowered.

Xia Qing had gotten used to Xia ruofei’s words. For example, he knew that “upgrade” meant a breakthrough.

Xia ruofei was a little disappointed, but he quickly understood that after Yingying absorbed the world stone, the spirit map space had only leveled up once. Although the effects of the world stone were much better than jades, it was impossible for it to level up every time it absorbed a piece of the world stone. Wouldn’t it be like cabbages?

Xia ruofei smiled. “This is within my expectations. However, I believe that after absorbing an entire realm stone, the spirit map world should have evolved quite a bit, right?”

“Yes, master!” Xia Qing quickly said.

Xia ruofei nodded and began to patrol the space. Xia Qing also followed Xia ruofei.

The spiritual Qi in the space condensed even more. Xia ruofei could clearly feel that the humidity in the air had increased by quite a bit. In some places, the spiritual Qi had started to liquify, especially in the area where the Phoebe zhennan forest was. The spiritual Qi had already formed dewdrops on the leaves.

This would undoubtedly further promote the growth of the crops in the entire space.

Xia ruofei’s eyes fell on the two plastic boxes beside the pond.

One of them was a big orange box. Xia Qing saw it and immediately said, “Master, I change the seawater four times a day and pour in the petal water of the spirit Heart Flower every once in a while. The abalones in here grow very fast!”

“Oh?” Xia ruofei raised his eyebrows and quickly walked over.

It had been 11 to 12 days since he had placed the 30 net abalone seedlings in orange plastic boxes and placed them in the care of Archean realm cultivators. In other words, these net abalones had actually been in this environment for nearly a year.

They had been living in an environment rich in spirit Qi for a year, and the seawater they had been living in was also the space seawater. Xia Qing had also been regularly injected with the petal solution of the spirit Heart Flower. With all these factors combined, how far would these net abalone seedlings grow? Xia ruofei was also full of anticipation.

He reached the orange plastic box in a few steps. The seawater inside was very clear, and he could clearly see the small rocks and some seaweed at the bottom of the box.

When Xia ruofei saw a few abalones leisurely crawling on the reef, he couldn't help but gasp in surprise.

When the net abalone seedlings were first bought, they were only about the size of a one – Yuan coin.

But now, among the few that Xia ruofei had seen, the smallest one was about 12 or 13 centimeters in diameter, and the biggest one was even 15 centimeters in diameter.

This was basically the size of an average three – headed or four – headed abalone that was sold on the market.

One had to know that even if the flow of time was taken into account, these abalone sprouts had only been around for less than a year! The breeding cycle of abalones was about three years.

If the time was doubled, or even less, the net abalones would undoubtedly grow to an incredible level. By then, two – headed abalones and one – headed abalones would no longer be a dream!

Xia ruofei was overjoyed. It was not because the abalones were growing fast, but because this phenomenon had proven that it was completely possible to raise abalones in a spatial environment!

Xia ruofei knew that these 30 abalones were just preliminary experiments. The real big ones were in the mountain sea realm, where there were more than 10000 abalones!

Moreover, looking at the current situation, there was no need to wait for three years. At most, in a year to a year and a half, the abalones in the mountain sea realm could be sold in batches.

“Very good!” Xia ruofei said happily, “Xia Qing, continue to take good care of these abalones. Add some spirit Heart Flower petal solution regularly and try to change the water as often as possible to ensure their living environment.”

“Yes, master!” Xia Qing immediately responded.

Xia ruofei had a large stock of the solution from the spirit Heart Flower petals. He could only use one or two petals to cultivate these abalones, so he was not too worried.

He was doing this to cultivate the abalones as much as he could. It wouldn't take long for him to harvest 30 one – Head abalones.

One – headed abalones were legendary existences. Every single one of them was an incomparably precious treasure!

If Xia ruofei released the news that he was going to sell 30 one – headed abalones, the rich people in Hong Kong would probably take action immediately. It would definitely cause an uproar.

Of course, most people wouldn't believe that the one – headed abalone was not as common as Chinese cabbage. One might not even appear in several years, let alone 30 one – headed abalones.

However, if Xia ruofei released the news through authoritative channels, there would surely be a large number of rich people waving their checkbooks to buy it.

After looking at the abalones, Xia ruofei took a look at the large plastic tidying box beside him. It contained the whole piece of vegetation and soil that he had transported from the caterpillar fungus – producing area in Nagqu two days ago.

Xia Qing followed Xia ruofei and introduced, "Master, these bat moth larvae have been in the Archean realm for more than two months. I followed your request and watered them with some petal water of the spirit Heart Flower. The larvae are growing very quickly. Dozens of them have already come down from the grass and burrowed into the soil."

Xia ruofei looked through the veil. There were many bat moth larvae on the leaves. Some of them had just hatched from their eggs and were slowly crawling on the leaves.

Just as Xia ruofei was observing, a bat moth larva on the surface of the soil began to drill into the ground.

Xia ruofei knew that as long as these larvae burrowed into the loose soil, they would instinctively absorb the nutrients from the plant roots. At this time, their bodies would gradually become white and fat. At that time, the spherical spore would take the opportunity to drill into the insect's body, absorb its nutrients, and germinate its mycelium.

The fungus's sphere of influence was growing. The larvae that were infected by the fungus gradually wriggled to a spot two to three centimeters above the ground and died from head to tail.

Although he could not see the changes in the soil and the insides of the larvae, Xia ruofei was full of anticipation.

It would take about a year for *Cordyceps sinensis* to form. Xia ruofei estimated that in an environment with such rich spiritual Qi, the time needed might be even shorter.

Hence, Xia ruofei thought for a while and said, "Xia Qing, in the next six to seven days, you have to pay attention and observe at all times. If there are purplish – Red grass growing in the soil, you have to report to me immediately."

The grass had broken through the soil layer, which meant that the aweto had already taken shape and could be harvested.

Xia Qing's knowledge of aweto was much deeper than Xia ruofei's. He nodded and said, "I understand, master. I'll keep an eye on you!"

Xia ruofei nodded and walked towards the spirit heart tree.

If the spirit map space was the foundation of Xia ruofei's life, then the spirit heart tree was undoubtedly the key. The continuous production of spirit Heart Flower petals from the spirit heart tree had become an indispensable help to Xia ruofei's career.

The space had absorbed an entire world stone. Although it had not completely upgraded, the spirit heart tree had grown a section as a result. Although it was still very small compared to the gold Phoebe nanmu in the distance, it was completely different from the small sapling it had been before.

Xia ruofei could not help but imagine the day when the spirit heart tree would grow into a towering tree.

His gaze quickly fell on the spirit Heart Flower that seemed to have a soul – stirring magic ...

Chapter 847: Tri – elements jade talisman (1)

“Eight slices?” Xia ruofei couldn’t help but look back at Xia Qing in surprise.

After the last upgrade, the number of petals of the spirit Heart Flower had increased to seven. Xia ruofei did not have much hope at first, and he knew that the number of petals had reached a bottleneck. Even if the space was upgraded, the number would not increase. He did not expect to be surprised.

Xia Qing smiled and said, “master, the spirit gathering array I’ve set up around the spirit heart tree has been constantly improving the quality of the spirit heart tree. This time, when it absorbed the world stone, a large amount of spirit Qi instantly surged in. Therefore, the number of spirit Heart Flower petals has also broken through again.”

Xia ruofei was overjoyed, “well done!” It seemed that the spirit Heart Flower was getting closer and closer to its ultimate form of nine petals! Xia Qing, keep it up!”

“Yes! Master!” Xia Qing said immediately.

Xia ruofei then took a tour around the Archean realm. He inspected the tea garden, Phoebe zhennan forest, iron – Skin Dendrobium, Red Arowana, and many other valuable plants. He was very satisfied when he saw that these valuable plants and animals were growing well.

Xia ruofei had to admit that with Xia Qing as a soul puppet, he had saved a lot of trouble.

Otherwise, with the expansion of the space and the increase in the variety of animals and plants in the space, it would take a lot of energy for Xia ruofei to take care of them.

Now that Xia Qing had managed everything in the space in an orderly manner, Xia ruofei only needed to assign tasks and Xia Qing would complete them to the letter. He was much more relaxed.

After a round of inspection, Xia ruofei brought Xia Qing to the mountain and sea realm, where time flowed at the same rate as the outside world.

The concentration of spirit Qi in the mountain and sea realm was about the same as that in the primal realm. After absorbing the world stone this time, the overall environment of the mountain and sea realm had also improved greatly.

He first took Xia Qing and drove the all – terrain vehicle around the edge of the spatial barrier. Of course, he had to avoid the sea.

Xia ruofei made a rough estimate. The mountain and sea realm had expanded to more than 5000 acres, and the space ocean, which had appeared for the first time since the last upgrade, had expanded by about 100 meters.

The coastline in the dimension was two kilometers long. From the beach to the outermost space barrier, the range of the sea had reached more than two hundred meters.

The expansion of the ocean meant that Xia ruofei would have more choices to breed more precious seafood in the sea.

Xia ruofei wondered if he should get a small yacht. However, considering that the ocean was still very small, even if he got a speedboat, there would not be much space for him to ride. Hence, this thought only flashed through his mind and he did not put it into action immediately.

When he patrolled the beach, Xia ruofei used his spiritual force to sense that the net abalone seedlings in the sea were growing very well. Each of them was quite healthy and had generally grown a circle. The largest one had a diameter of four to five centimeters. Compared to the outside world, this growth rate was absolutely shocking.

In addition, in addition to abalones, there were also many pomfrets in this Sea area. They originally lived in the sea, and in the unique environment of the space ocean, they were naturally like fish in water and grew well.

"It's time to provide another batch of Chinese perch seedlings to Jianghua!" Xia ruofei said in his heart.

After a round of inspection, Xia ruofei drove the all – terrain vehicle to the herb garden that Xia Qing had opened for inspection.

Next to the medicine garden, Xia Qing had opened up more than ten mu of land, all of which were planted with the medicinal herbs needed to produce the heart – nourishing soup. In more than ten days, Xia Qing had already taken care of the medicine garden in an orderly manner, and the herbs were neatly planted on the ground. They all grew very well and looked quite energetic.

Xia ruofei's gaze turned to the side of the herb garden.

Next to the medicinal garden, Xia Qing had also opened up a plot of land, which was also full of green crops.

Xia ruofei recognized it at first glance and said in surprise, ""Iron – Skin Dendrobium?"

"Yes, master!" Xia Qing said respectfully, "after your instructions last time, I began cutting the iron – Skin dendrobies in the Archean realm. When they grew to a certain extent, I would transplant them into the mountain and sea realm. Now, they have a scale of about 10 mu!"

"Not bad, not bad!" Xia ruofei nodded his head in satisfaction and said, "Xia Qing, continue to transplant. Anyway, there is a lot of land in the mountain sea realm, and there is nothing that needs to be planted for the time being. Just open up more land to grow iron – Skin Dendrobium!"

"Yes, master!" Xia Qing replied.

In addition to the iron – Skin dendrobes, many of the third – generation Da Hong Pao tea trees had also been transplanted to the mountain sea realm, forming a small tea forest.

Xia ruofei couldn't help but give a thumbs up to Xia Qing's work efficiency. However, after thinking about it, he realized that Xia Qing was not a real human being. He didn't need to rest at all. He could work 24 hours a day. No wonder he could finish so much work in just 11 or 12 days.

If it was someone else, even someone as strong as Xia ruofei, it would be impossible for him to work without eating or sleeping for more than ten days.

After he was done with the outside, Xia ruofei came to the stone room in the cave.

During this period of time, Xia ruofei had been taking the spirit nourishment soup and body tempering soup regularly. While his physical fitness was constantly strengthened, his spiritual power was also increasing.

He wanted to see if he could open the next transparent cover to get the item inside, or if he could decipher the next page of the booklet.

Chapter 848: Tri – elements jade talisman (2)

In the stone chamber.

There were four green halos on the stone platform.

Originally, there were five halos here. Each Halo was an extremely tough protective shield. The first Halo on the left contained that booklet. This had already given Xia ruofei a lot of surprises.

The elixirs such as the nourishing spirit soup, the body tempering soup, and the Jade skin cream all came from that mysterious booklet. More importantly, Xia ruofei also obtained the spiritual puppet Xia Qing through the booklet, which gave him the best assistant to manage the spirit map space.

Xia ruofei stood in front of the stone platform and looked at the four remaining halos. His eyes could not help but reveal a look of anticipation.

He regularly took the body tempering soup and the spirit nourishing soup, and his physical quality and mental power were improving day by day. He would come to the stone room every once in a while and try to break the Halo protective shield, but he had not succeeded even once so far.

This time, the spirit map space had absorbed a new world stone. Xia ruofei could clearly feel that his compatibility with the space had increased. In addition, he had been out for a while and had not tried to break the protective Halo for a long time. Hence, he was full of anticipation and was ready to try again.

From left to right, the first three of the four light barriers each contained a Jade tablet, while the last one contained a Jade box.

The first three Jade tokens looked almost the same, but Xia ruofei could not see the details because of the layer of green protection.

He stood in front of the stone platform and took a deep breath. After adjusting his state, he slowly reached out to the leftmost halo shield. He knew that the energy of the shield was getting stronger and stronger from left to right. Now, even the weakest one had not been able to open it, so he didn't even need to try to open the remaining three.

As soon as Xia ruofei's hand touched the surface of the protective shield, a soft but extremely tenacious repulsive force appeared out of thin air, as if it wanted to bounce his hand away.

He would come over to test it once in a while, so he was no stranger to this kind of rejection force.

Xia ruofei used his spiritual power and directed the invisible force of the space to gather in his palm. Then, he slowly but firmly pushed forward.

The protective Shield's Halo started to shake slightly, and the repulsive force grew stronger as Xia ruofei increased his strength.

Xia ruofei's physical fitness had reached an unimaginable level. However, in the face of this protective shield that could not be broken by brute force, he had no choice but to rely on his strong spiritual power.

The stronger one's spiritual power was, the higher one's compatibility with space would be, and the stronger the invisible spatial power one could use.

As the force increased, the force of rejection became more and more terrifying. Xia ruofei felt that his palm was being pushed out by a huge force while the spatial five elements force was pressing in. His palm bone seemed to be about to crack under such a terrifying force.

His body trembled slightly, and he gritted his teeth. His eyes revealed a determined look as he continued to increase his strength.

The shaking of the protective Halo was also becoming more and more intense.

The Halo also began to fade slowly, like a lonely boat in the wind and rain, about to capsize at any time.

Beads of sweat started to form on Xia ruofei's forehead as he poured out his spiritual energy like it was free.

In the end, Xia ruofei shouted and used all his strength to push the door. The invisible spatial force exploded with a huge force.

A "Weng" sound was heard!

The extremely flexible ball of light finally cracked, turning into spots of light and disappearing into the stone room.

Xia ruofei was stunned for a moment, then he was overjoyed.

He had finally cracked it!

It had been more than half a year since he took out the booklet to crack the protective shield. During this period, Xia ruofei had tried countless times but to no avail. This time, his efforts paid off and he successfully cracked the second protective Halo!

Xia ruofei impatiently picked up the Jade token that was placed on the stone platform.

This Jade token looked unremarkable and very simple. Even the quality of the Jade could not be compared to the best mutton – Fat white jade that Xia ruofei had used to inscribe array disks. However, Xia ruofei knew that this item's value could not be measured by its appearance.

How could something that the previous owner of the spirit map space so carefully protected in the Halo be an ordinary item?

Even the booklet on the far left had given Xia ruofei so many surprises. This Jade token was placed in the second Halo, so it should be more valuable than the booklet.

Xia ruofei carefully examined the Jade token in his hand.

It was warm to the touch, and there were engravings on both sides, with the word “human” engraved on one side.

Xia ruofei looked at it for a long time and tried to use his spiritual power to investigate, but he found nothing.

After a long time, Xia ruofei patted his head and muttered to himself, “I’ve really been muddleheaded recently, and have abandoned what’s near and sought what’s far away!”

After he finished speaking, Xia ruofei immediately used his spiritual will to inform Xia Qing to come over immediately.

Xia ruofei knew that Xia Qing was very familiar with this Jade tablet, the remaining two Jade tablets, and even the items in the last Jade box.

He had once asked Xia Qing about this information, but unfortunately, Xia Qing had told him that before his strength was enough to open the Halo protective shield, he could not tell him.

It was like a program built into a robot, and the priority of this rule was even higher than the command of the master.

Xia Qing was only a spiritual puppet, not a real life. Thus, he would only strictly follow the rules that had been pre – Set in his body. Xia ruofei had no way to deal with him.

Now that Xia ruofei had successfully opened the protective Halo, he could naturally ask Xia Qing about the information of this Jade card.

The moment Xia ruofei sent out his divine sense, Xia Qing's figure flashed and appeared in the stone chamber.

He saw the Jade token in Xia ruofei's hand at first glance and cried out in surprise, “Master, you’ve already taken out the tripartite jade talisman?”

Xia ruofei smiled and said, “so it’s called the Tri – elements jade talisman!” So you can tell me about it now?”

“Master’s strength has already met the requirements, so I will naturally tell you everything I know,” said Xia Qing with a serious nod.

Xia ruofei nodded and waited for him to continue.

“Master,” Xia Qing said, “actually, the Tri – elements jade talisman is a set. There are three pieces in total.”

Xia ruofei’s eyes immediately fell on the remaining three halos. They were the two Jade tokens on the far left. He asked, “The remaining two pieces are in there?”

“Yes!” Xia Qing nodded. Master, the Tri – elements jade talisman is divided into three parts, heaven, earth, and human. The one you took out is the human character.”

Xia ruofei nodded and said, “Let’s talk about the Tri – elements jade talisman!”

“Yes, master!” Xia Qing said respectfully, “there is a cultivation technique recorded in the Tri – elements jade talisman. It is called the ‘great Dao formula’...”

“Great Dao Arts?” Xia ruofei couldn’t help but interrupt Xia Qing’s words and asked, “it sounds like a cultivation technique? Is there any difference between this and the strange posture of the little golden men I cultivated before?”

Xia ruofei had not stopped practicing the postures demonstrated by the Golden midgets during this period of time. Now, he was able to successfully perform the fourth set of movements.

Xia Qing smiled and said, “master, you used to cultivate a body – tempering technique, while the ‘great Dao Arts’ is a Qi – cultivating technique. One focuses on the internal and the other on the external. Only by cultivating both the internal and the external can they complement each other and bring out the best in each other!” Congratulations, master!”

Before Xia ruofei obtained the spirit map space, he felt that lone Wolf’s assault team members were already close to the strongest individual combat power. However, after obtaining the spirit map space, his strength had broken through the limits that he had previously thought were impossible to reach.

Therefore, he already had enough expectations for the cultivation techniques that only existed in legends. It was not like he had heard a fantasy.

After Xia ruofei heard Xia Qing’s explanation, he quickly threw out his question, “You said that this jade talisman contains this cultivation technique, but I looked at it for a long time just now and couldn’t see anything special about it! I can’t find anything with my spiritual power. Is there something else?”

Chapter 849: The invisible key (1)

“Master, the key to opening the Tri – elements jade talisman is precisely the spiritual power,” Xia Qing said respectfully.

“It can’t be?” Xia ruofei was shocked. “Did I use the wrong method?”

Xia Qing pointed at the Jade talisman in Xia ruofei’s hand and said, “Master, the key is the pattern on the Jade talisman. It’s actually a talisman. You need to use your spiritual power to draw an identical

talisman in the air and then print it on it. The cultivation technique stored in the Jade talisman will naturally appear.”

“Using spiritual energy to simulate runes?” This was the first time Xia ruofei had heard of such a method of unlocking, so he was very surprised.

“Yes! The rune simulated by spiritual energy is like a key.” Xia Qing said with absolute certainty, “master, you must have tried it just now. There is no effect when you pour your spiritual power into the pattern. You must simulate the exact same rune out of thin air and then print it on it. As long as there is a slight deviation, it will have no effect.”

Xia ruofei couldn’t help but take a deep breath and said, “This is too difficult ...”

Xia Qing smiled and said, “master, when your spiritual power has been condensed to a certain extent, it can be almost tangible. It is nothing more than repeated attempts. Practice makes perfect. Since you have the strength to take out the ‘man’ character, you will definitely be able to open it successfully!”

Xia ruofei nodded and said, “it seems like we can only try a few more times ...”

Xia Qing continued, “if master can successfully simulate this talisman, not only will you be able to obtain the first three levels of the ‘great Dao Arts,’ but this talisman itself will also have a very wonderful use.” After the human rune was activated, it could instantly draw on the surrounding spiritual Qi to form a protective shield on the body. The defensive power was very strong. Of course, this requires master to be extremely familiar with runes and be able to simulate them in an instant. Otherwise, it won’t be of much use in actual combat.”

Xia ruofei agreed, “yeah!” You have to take things one step at a time. I’ll think of a way to simulate the runes first!”

“I believe that with master’s aptitude, you should be able to do it very soon,” said Xia Qing with a smile. That’s right, after master practices the “great Dao Arts,” he should be able to engrave this rune on a jade pendant or similar carrier. This way, you can give this defensive rune to the person close to you. If she is attacked or encounters any accident, the rune will be activated, which is equivalent to having an additional layer of protection!”

Xia ruofei was even more motivated after hearing that.

To him, a defensive rune wasn’t very attractive. After all, with his current combat strength, there shouldn’t be many people who could threaten his safety.

However, if he could carve it on a Jade carrier and give it to someone else, it would be much more useful to Xia ruofei.

People had their ups and downs, and no one could guarantee that they would not encounter any accidents. Even if they were walking on the road, they could be hit by drunk and unscrupulous drivers.

If he could give Ling Qingxue, Hu Zi’s mother, Qiao’ er, and the others he cared about a piece of Jade with defensive runes engraved on it, his safety would be even more guaranteed.

Therefore, after listening to Xia Qing’s words, Xia ruofei had made up his mind to practice well and grasp this rune firmly.

“Master,” Xia Qing continued, “the Tri – elements jade talisman’s benefits don’t stop here. The talismans on each piece of jade talisman have their own magical effects. And if you can gather all three pieces of jade talismans, there will be a surprise!”

“Oh, really? What surprise?” Xia ruofei asked with a smile.

Xia Qing revealed a mysterious smile and said, “I’m sorry, master. I can only disclose this part of the information to you after you have obtained all three Jade talismans.”

Xia ruofei smiled bitterly and shrugged his shoulders. It’s the damn authority again ...

“Alright then!” Xia ruofei said, “is there anything else you haven’t told me about the tripartite jade talisman?” If you don’t, you can go back to your work! I’m going to start learning that rune!”

“Alright, master!” Xia Qing immediately said, “I’ll take my leave now!”

After Xia Qing left, Xia ruofei took the human – shaped rune and looked at it carefully.

According to what Xia Qing had said, the pattern on the side of the Jade talisman with the character ‘Ren’ engraved on it was the talisman that he needed to completely simulate with his spiritual power.

He first spent about half an hour to memorize the shape of the Rune’s veined pattern.

The spirit nourishment soup and body tempering soup had a comprehensive effect on Xia ruofei’s body and mind. Now, Xia ruofei’s memory was quite amazing. It was not an exaggeration to say that he had a photographic memory. Under such circumstances, he still spent half an hour to firmly memorize the runes. It was clear how complicated the rune patterns were.

After Xia ruofei memorized the lines, he tried to concentrate his spiritual energy.

The first was naturally the release of his spiritual power.

It was not difficult for Xia ruofei as he used it almost every day.

Then, it was the process of condensation.

Xia ruofei was extremely focused. He controlled the spiritual power that had left his body to a very small area in front of him, and then continued to output the spiritual power.

In this way, the spiritual power that was confined in a small area naturally became more and more condensed and dense.

Finally, Xia ruofei continued to compress the space of his spiritual power. This was originally an invisible wave, but after compressing it to the extreme, the space in front of Xia ruofei actually had a faint golden light.

Chapter 850: The invisible key (2)

Xia ruofei knew that the time was right. He carefully opened a small gap in the space that he had confined and guided the spiritual power that had almost been condensed to the extreme to leak out from the small gap.

Just like that, his spiritual power was pulled into a thin line.

Although it was almost invisible to the naked eye, Xia ruofei could clearly sense the existence of this thin thread of spiritual power.

He immediately followed the shape of the rune in his mind, guiding the thin thread of spiritual force to extend, turn, transform, and shuttle ...

Xia ruofei could feel an invisible rune slowly forming in front of him.

This process was very slow. Under his careful control, it took him more than ten minutes to complete less than thirty percent.

Besides, the runes were too complicated. Xia ruofei felt that there was only a slight deviation in the control and the runes he drew were already wrong.

Although this mistake was very small, it already meant that this attempt had failed.

This was because the rune had to be drawn in one stroke to be an effective rune, and there was no chance to go back and modify it.

Xia ruofei sighed. He released his control of his spiritual power and kept them back into his body.

Xia ruofei did not expect to succeed on his first try. However, after trying, he felt that the difficulty was beyond his expectations.

“Looks like I’ll have to work hard to succeed!” Xia ruofei muttered to himself.

He didn’t try again. It was almost noon when he got home. He spent a lot of time patrolling the space, activating the Halo shield, and trying to draw the human rune. It was time for lunch.

If he wanted to successfully draw out a complete rune, he still needed a lot of time to practice. This was not something that could be done overnight.

Hence, Xia ruofei left the medium.

He didn’t bring the human – shaped jade talisman with him. Instead, he left it on the stone platform. There was no place safer than the spirit map space. It was simply a super safe.

Xia ruofei quickly took a shower, changed into clean clothes, and went downstairs. Hu Zi’s mother had indeed prepared lunch. Lin Qiao had also returned from the office building.

Lin Qiao already knew that Xia ruofei had returned home. When she saw him coming downstairs, she immediately asked for a gift. Xia ruofei was already prepared for this. He took out some silver ornaments and beautiful crafts that he had bought in the Tibetan area.

These Tibetan – style gifts were very beautiful and were perfect for the little girl. Lin Qiao accepted them with joy.

After having lunch at home, Xia ruofei chatted with Lin Qiao and Hu Zi’s mother for a while before going back to his room.

Xia ruofei had been away for a few days. He should have gone to understand the company's operations first, but he had a break in the afternoon and did not want to disturb Feng Jing and the other executives.

Besides, Xia ruofei had more important things to do.

After he returned to his room, he used his phone to give Lin Yue 'e a call. Yingying, now that the matter of the aweto had been settled, he had returned to the three mountains. It was time to bring Lin Yue 'e and her family over.

"RUO Fei." Lin Yue 'E's gentle voice came from the phone.

"Sister – in – Law! I've already finished my business and returned to the three mountains. " Xia ruofei smiled and said,"how are the preparations on your side? Can you come over now?"

Lin Yue 'e clearly didn't have much confidence in her heart. She hesitated for a moment before saying,""Ruofei, I've settled everything at home ... But, what can sister – in – Law do at your company? I ... I've never worked in a big company before!"

Xia ruofei laughed and said,"sister – in – Law, we've already agreed on this. Why are you backing out?" Besides, it's not a big company, just a small one. More than half of our employees are ordinary villagers from nearby. They can do the job, so how can you not do it?"

Lin Yue 'e said with some embarrassment,""Alright...Ruofei, what do you want me to do?"

Xia ruofei thought for a while and said,"sister – in – Law, I have a few positions here. What do you like to do?" The first is to be the Deputy Director of our company's logistics department. You just have to manage the company's warehouse, cold storage, and some things like the purchase of office supplies. The specific things will be done by the people below, and you will be in charge of commanding. "

Lin Yue 'e thought for a moment before asking,"are there any other positions?"

Actually, the job that Xia ruofei had offered was very easy. It did not require much exposure to the elements. However, Lin Yue 'e felt that Xia ruofei was obviously taking care of her. Otherwise, why would he leave such a good position for her to take?

"There's also the orchard manager,"Xia ruofei said. Sister – in – Law, didn't you say last time that you used to take care of the small orchard in your house? This was the right specialization, right? There are also specialized workers in the orchard. You're mainly in charge of the management. "

As the business continued to expand, Xia ruofei had long wanted to separate the orchard from the rest of the business. This way, Cao tieshu could also focus on the vegetable greenhouse.

Old Cao was indeed a hardworking old cow who did his job with all his heart and soul, but he couldn't always be the only one using him!

"Sister – in – Law, if you don't like this position, I still have ..." Xia ruofei continued.

"No need. Ruofei, let's take the one in the orchard! This is suitable for me. " Lin Yue 'e hurriedly said.
