

## THE GOD VIRUS

Volume 1 - 20 Bella

After than Ella and Virus went inside the car after having one hell of a day and now sky had now become dark, it was night time.

As Virus was going to drive her to her house and drop her there before going back.

On the way to Ella's house when both of them were silent Virus suddenly broke the silence and said "I need to go somewhere soon and I don't know how long it would take me to come back, but if everything goes well, I'll come back soon."

Hearing this Ella was worried a little as if he didn't know when he will be back it must be something serious, so out of worry she asked "Where? is it going to be dangerous?"

Looking into her eyes for a moment Virus replied "You don't need to know, and about it being safe, I'm not sure but it will probably be okay."

Ella didn't probed any further seeing he didn't seem like he wanted to answer so she just said "Okay, but please be careful and come back to me safely, without one hair less, okay?"

"That's my goal too." Virus replied.

And then she said with a smile "And it's not like I can't contact you now with this Communication Device ... right?"

But against the answer she expected Virus said "Actually... You won't be able to call me... as I'll be out of reach when I'm gone, so don't worry too much and just wait for me as it's natural, okay?"

Hearing this her smile froze and disappeared but after a while she smiled again saying "Okay, I'll wait for you to come back, but please come back to me safely."

After dropping her in her house Virus went back to his building straightly.

---

## TWO WEEKS LATER

Two weeks more passed as Virus waited for the person he was waiting to arrive, in the past two weeks other than waiting and talking to Ella and the golden beauty, he also gave the blue prints of Samsung Galaxy S3, LG Nexus 4, Samsung Galaxy Note 2, HTC DROID DNA, HTC ONE X, Motorola DROID RAZR M, Motorola DROID RAZR MAXX HD, LG Optimus G, HTC One S to the CEO ugly who was now known by the name of Steven Greg and named them respectfully Virus Galaxy S2{it's S3}, Virus Nexus 1{4}, Virus Galaxy Note 1{Note 2}, Virus DROID DNA, Virus ONE X, Virus DROID RAZR M, Virus DROID RAZR MAXX HD, Virus Optimus G, Virus One S.

They were going to be manufactured and made ready and released when he came back.

He also ordered the CEO ugly to open a Car Company Branch for his company [Virus] and gave the blueprints for all the nice cars that was introduced in 2011 like Mercedes-Benz F125, Ferrari FF, Audi Q3, Lamborghini Aventador, Aston Martin V12 Zagato, Infiniti Etherea, McLaren 12C, DS 4, Saab PhoeniX, Koenigsegg Agera, Volvo Concept You, Volkswagen Passat (NMS), Hyundai Veloster, Mahindra XUV500, Mosler GT600, Jaguar B99, and some others and ordered them all to be ready by at most two months, also like always he took the company names from in front of them and put a [Virus] before all the models.{You can check out the car pictures by searching 'cars introduced in 2011' in google.}

And it was finally today that the ugly in charge of the Island came back saying that everything was ready.

Hearing that Virus didn't want to delay any longer so he told them for his private jet which the island ugly had made ready to be ready and together with the golden beauty and the island ugly they flew towards the The Aldabra atoll.

After they arrived Virus saw the Island from above without any emotions, but the golden beauty was impressed by the island's beauty which was like a ring, happily and excitedly she said " Wuuh! it's so beautiful and different seeing it from closeby by my own eyes."

There were only Virus and Ella in the cabin while the island ugly was one of the pilots.

Seeing the from from above virus saw that a huge factory was built while an airport was build beside it, all which were newly built.

After finally landing in his own airport Virus, the golden beauty and the island ugly aka pilot ugly got off the jet and while they were walking towards the factory to check something Virus asked the Island ugly "So tell me about the main blueprint I gave you and said it was of utmost importance how did everything go?"

"It's one hundred percent complete master, everything's ready, even though we had to make some make some modifications to somethings but it's over all the same as the blueprint you gave me." the ugly answered.

"Were there any curious people around?" Virus asked again. freewebovel.com  
"Yes, but the security ugly handled them all very professionally." The pilot ugly said, they even called each other uglies.

"That's good then." Virus nodded his head satisfied.

After that the golden beauty said she wanted to see the beach from nearby so Virus agreed to go to the sea shore with her.

On the way as they were walking the golden beauty suddenly asked finally unable to endure any longer "So master the other uglies have notified me of what that blueprints of yours was about... you could imagine the shock I received when I heard what it was just as the other four uglies were shocked. Are we going somewhere faraway?"

Smiling Virus didn't answer her question and just said "you will naturally know soon enough, lil beauty."

After that they walked beside the sea shore where the golden beauty happily went around to the sea or playing with the sand while finding some shell from the beach too.

As Virus was watching the happy playing lil beauty he suddenly thought of something and said with a smile "Come here for a second my lil beauty."

Hearing him call her the golden beauty came to him immediately stopping playing around.

"What is it master?" she asked smiling while her hands were behind her back.

"There is name I wanted to give you since the day I created you, If you want I'll give you a name, of course if you want that is and if you like the name you can accept it but if you don't you we can choose something else. What do you say lil beauty?"

Hearing this the golden beauty's eyes shined he wanted to name her and excitedly said "it's my honor and also one of mt dreams master to be named by you! what is it you're gonna name me with master?"

Seeing her happiness Virus said "Bella."

Hearing this even though the golden beauty was extremely happy inside she still asked doubtfully with a little sadness in her heart "Is it because your girl friends name is Ella so you're naming me that master?"

"OF COURSE NOT! What kind of person do you see me as ... you're my lil beauty and no one's gonna interfere in how I see you! I wanted to name you Bella the first day I created you as you where so beautiful and elegant as Bella means beautiful and I think only that world should be used for your name, Ella came later and it was just a coincidence her name resembles what I had in mind, so if anything... it's her name that resembles Bella not the other way around... and I also... master really loves this name." Virus said loudly at first but then explained calmly like always.

"Of course if you don't..." As Virus was talking again the golden beauty interrupted probably for the first time.

"I love it master, I believe you and please let me be named Bella." the golden beauty smiling happily while some tears fell of her face, she was too happy to be name by him, hearing she loved the name nothing else mattered to her anymore and she accepted by tears of happiness and joy.

"Then that's your name from now... Bella." Virus smiled too as he called her by name for the first time.
