

Godly Choice 1581

Chapter 1581: Bomb a volcano

Xia Ming, who was talking with Li Yun, did not change his face, and his voice did rise louder: "Li Yun, don't you really want to explode a volcano?! And it's still an active volcano!"

"you guessed right."

The leaders in the conference room looked at each other.

Blasting an ordinary mountain to mine stone still requires repeated certifications. It has been reviewed and approved by various departments, and safety work has been done in advance. After confirming that there is no one in the radius of a few kilometers, it dared to detonate cautiously.

During the period, many holes were drilled so that the explosives were completely buried into the mountain, and a timing device was also set up to let the explosives detonate in batches, so as not to cause ground shocks, earthquakes, etc.!

It's so troublesome to bomb ordinary mountains, let alone bomb an active volcano!

What should I do if the magma erupts?

Will the earth's crust shake because of this?

Are the surrounding residents alienated?

"Give me a reason!"

Xia Xia Ming's wording was rigorous and did not object to it, but of course he did not immediately agree.

The explosion of a volcano caused more trouble than you imagined!

Even if it is Li Yun, it is impossible for him to agree to it immediately, but fortunately, the leaders in the conference room are heavyweights. If the results of the discussion are reached, they only need to report to the general leader, and they will soon be allowed.

Even under the circumstances of unavoidable circumstances, Xia Ming, who is fully responsible for dealing with the group leader of the Six Demon Gates, can make a decision!

"Ding."

Li Yun didn't say anything, just passed him a set of photos.

Xia Ming finished watching in silence, and was silent for a long time.

"Team Leader Xia, you are saying something!" An old leader spread his hands, "It's a donkey or a horse. Take a look at whether it is good or bad. Let's demonstrate whether we agree with or disagree with Li Yun's bastard. Request to explode the volcano!"

Xia Ming shook his head and smiled bitterly, without saying anything, and directly handed the phone to the staff next to him, and asked him to project the photo onto the screen.

"hiss!"

The staff took a breath after seeing the photo, which caused other leaders in the conference room to look at him.

"Xiao Zhang, what is in it that deserves your fuss? Get it out and let's see!"

"Yes Yes!"

Xiao Zhang didn't dare to neglect. Every leader here is a big man who can cause Huang Xuanguo earthquake by stomping his feet. He is fortunate to serve as the meeting recorder. In the future, as long as he doesn't make mistakes, his progress is certain.

Soon, the photos sent back by Li Yun were displayed on a huge white curtain three meters long and wide.

The red light instantly reflected a strange color in the meeting room. Everyone squinted, and after seeing what was emitting the red light, they took a breath.

——Exactly the same as Xiao Zhang's previous performance!

"how is this possible!"

The old leader who had urged before shouted out in silence.

In the screen displayed on the screen, among a large area of fiery red lava, a magnificent palace stands in the flames, just like the palace of the gods in charge of the flames in myths and legends!

"This won't be movie special effects, right?" A leader asked subconsciously, but quickly laughed bitterly, "Well, I'm gaffe, Li Yun can't fool us with movie special effects."

Everyone didn't laugh at him, because the thoughts that flashed in their minds just now also doubted whether the vast and magnificent flame palace in front of them was not a movie special effect!

"There are other photos."

Xia Ming said that Xiao Zhang hurriedly manipulated the computer and showed the other photos one by one.

Flaming magma, huge palaces, floating boards floating on magma, fire channels, underground caves...

Chapter 1582: It's time

The photos beyond the common sense of science shocked all the leaders present.

They have seen the strange scene of the Mist Locking Tall Buildings with their own eyes, but the Mist is still in common sense, and there are surprises, but it will not be too shocking.

However, now this huge palace standing on the fiery red ground and sitting on the hot lava is completely beyond their imagination!

"How much refrigeration equipment is needed, and how much electricity is needed every day to maintain a life under the volcano!?"

A leader muttered to himself in shock, and couldn't help but reckon with an account, but the more he calculated, the more he felt outrageous.

After all, who can eat and support ordinary people without having to live under the volcano?

The deep-sea submarine will be melted by the high temperature when thrown in, and even the best heat insulation equipment will not work!

"The methods of the cultivator are beyond our imagination!"

Xia Ming took a deep breath, calmed his mood, scanned the crowd, and asked: "Everyone, please give your opinion, can you blow up the building in this volcano? I need to reply as soon as possible. Li Yun said about us. There is less than half a day to prepare."

"Does this still need to be discussed?" An old leader joked, "I'm sure, this palace must have not been judged!"

Everyone laughed.

"Building against regulations, blow it up!"

"It really should be demolished!"

"One ton of TNT, it's accurate! Wait, is one ton enough? Did Li Yun send back specific data? We will immediately ask some experts to demonstrate that one ton of explosives is enough!"

"The underground volcanic lake is conservatively estimated to be two kilometers. One ton may not be enough. The trigger can detonate the volcano and make it erupt!"

There was a lot of discussion, but no one opposed the bombing of the volcano.

This is very understandable. The Six Demon Gates spent great effort to build the cave mansion inside the volcano. There must be some plan.

Instead of letting them engage in a conspiracy to make the volcano a hidden danger that does not know when it will erupt, it is better to detonate it now!

"it is good!"

Xia Ming nodded and suppressed their discussion: "I will ask someone to prepare five tons of explosives, and then contact a transport plane to urgently transport it to the vicinity of A Duo Mountain, and transport it to Li Yun as soon as possible.

Although there are still many problems to be solved, such as blocking roads, evacuating people, alerting, and confirming with Li Yun how to explode, the most important thing is to transport the explosives first!

There was no objection. Xia Ming was the leader of the full command, and he made the decision.

Not long afterwards, the entire Huang Xuanguo moved into motion, like an efficient and precise instrument, and all the ministries and commissions were swiftly implementing the various orders that were communicated.

In less than five hours, Li Yun was on the national highway outside the volcano and saw General Xia Ming who had personally delivered explosives.

In this world, only Huang Xuanguo can have such a quick response speed!

"Hello, Brother Xia."

Li Yun yawned, and after waiting for a few hours, Zhao Tianfeng and Fox Xiaomeng had already entered the Lotus Immortal Mansion and slumbered and enjoyed it.

But he is not so cool, he can only wait for the call outside.

"Li Yun!"

Xia Ming came up and patted him on the shoulder. For a while, he didn't know what to say. After a while, he laughed dumbfounded and said, "Thank you!"

"good."

Li Yun shrugged, "Did you bring explosives?"

After a glance, there was a thick explosion-proof armored vehicle parked on the road, six large wheels pressed on the road, revealing a mighty domineering!

Chapter 1583: Three tons CL18

There are already dozens of armed fighters on guard around the armored explosion-proof vehicles and in the nearby areas. They were escorted along the way, and they were not afraid of fear.

—This armored vehicle is full of three tons of explosives. Once it explodes due to some kind of accident, a few kilometers will be razed to the ground, and the deaths and injuries are countless!

Because of this, when Li Yun looked at them, all these soldiers looked at him with weird eyes with vigilance.

Be vigilant, because they are afraid that Li Yun, a suspicious character, will do things, weird, because they know that this car of explosives seems to be given to him by General Xia? !

Sending a car of explosives all the way to the hot spring holy land of Mount Adu, no wonder they will be full of doubts in their hearts.

"I can't tell." Xia Ming spread his hands together, "I'm not good at explosives, I brought you an expert!"

He pointed to a man in his fifties who was standing next to the car and was still fiddling with the equipment. "Wen Shaohui, Professor Wen, a senior military expert in explosives, has improved many explosive ingredients and increased the power of our army's shells by 50%. Belongs to the national treasure level expert!"

Li Yun respected him. This proper person was also a national pillar, but why did he personally **** explosives?

"What I brought you this time is a new type of explosive, which was newly developed by Professor Wen and has not undergone actual combat."

Xia Ming saw Li Yun's doubts and explained: "Professor Wen came here personally this time, first to debug the final results, and second to see with his own eyes how powerful this explosive is and how effective it is in actual combat!"

While talking, Professor Wen finally stood up and walked over with a serious expression. After taking a look at Li Yun, he asked, "You are Li Yun? That amazing kid?"

"Wonder kid?"

The second monk Li Yunzhang couldn't figure it out. Why did he have another nickname?

Moreover, this title is too earthy!

"Hahaha!"

Xia Ming couldn't help laughing, and formally introduced both parties, and said with a smile: "Li Yun, you have all sorts of deeds spread, some people who don't know you, of course, call you Wonder Boy."

"...Okay." Li Yun couldn't laugh or cry, "I don't like this nickname very much, just call me Li Yun!"

In terms of expression and temperament, Professor Wen is a rather serious expert and scholar, with few smiles on his face, and very strict work.

He glanced up and down at Li Yun a few times before slowly speaking: "I really don't know how amazing you are, but this time I brought three tons of CL18, but General Xia didn't let me prepare to drop bombers at the same time. , To be honest, I still don't know how you are going to detonate it!"

"CL18?"

Li Yun did not answer his question, but became interested in this kind of explosive that he had never heard of.

"An explosive that is five times more powerful than TNT, weaker than CL20, but at a lower cost."

Professor Wen briefly explained, still staring at Li Yun: "How on earth are you going to detonate it? I want to see with my own eyes what exactly is the explosive effect of this new explosive!"

"I'm afraid you can't see it anymore." Li Yun smiled, "I guess no one can see it, because I plan to throw it into the volcano and blow it up."

"Inside the volcano?!"

Professor Wen was stunned, but quickly shook his head to deny: "Don't tell me how to transport it in, just carry the explosives close to the volcano, the explosives will explode and blow you up first!"

Chapter 1584: This car is great, give it to me

"Shanren has a clever plan!"

Facing Professor Wen's questioning, Li Yun smiled and asked about the specific effect of this explosive. After learning that the tipping point was 252 degrees Celsius, Li Yun frowned slightly.

The temperature of the initiation point is very high, and it is also resistant to impact and low temperature. There will be no problems in research and transportation under normal conditions.

Unfortunately, Li Yun wanted to throw it into an abnormal environment—a volcano. The high temperature resistance of 252 degrees is not enough.

"Because there were no bombers and no missiles, I temporarily added a detonating device to it."

Professor Wen lit a control button in his hand in front of Li Yun, but he held it tightly and did not hand it to him.

"If you need this detonation button, you must let me see how you can safely drop explosives!"

Professor Wen's attitude is very resolute, and he has the meaning of not seeing his ability and not letting go!

Xia Ming was a little embarrassed, but he couldn't speak up.

One of these two is an extremely powerful young man with various magical powers in his hand, and the other is an improved explosive, a knowledgeable professor. Offending anyone is a problem.

"Ding, trigger the option event, please choose from the host:

Choice 1: Don't talk nonsense, grab the detonation button directly, reward evil value +2000, purple gift bag*1, get BOSS domineering value, Huang Xuanguo's prestige is reduced, and Huang Xuanguo's deterrence is increased.

Option 2: Patiently explain, reward justice value +10, experience value +100,000, white gift bag*3.

Choice 3: Laugh without speaking, hit Professor Wen in the face, reward: experience value +500,000, free attribute points +500, purple gift bag*1, extra reward: explosives (intermediate). "

The system prompt sounded, and Li Yun's mouth was slapped, all these are garbage rewards, it is meaningless to choose.

Looking at the six-wheeled armored explosion-proof vehicle, Li Yun suddenly asked: "Professor Wen, you said that this vehicle was thrown into the volcanic lava. How long will it take for your CL18 to detonate?"

Xia Xia looked at Li Yun in amazement, as if saying: You want to abduct me an armored explosion-proof vehicle! ?

Professor Wen guessed something vaguely, and was silent for a while, and said: "The body of the explosion-proof car is still solid, and the lava will flow in within ten seconds. Coupled with the temperature insulation effect of the body, I guess it will detonate in 10 to 30 seconds. ."

After a pause, he said rigorously: "The premise is that this car enters the magma at a peaceful speed. If you throw it in directly from high altitude, under the action of gravity and the tension of the magma, the pressure will instantly detonate the inside of the car. Dynamite!"

"Very good! Enough!"

Li Yun turned his head and smiled at Xia Ming, the high-ranking General Xia was a little hairy in his heart, and asked with a stiff smile: "Li, Li Yun, just say it, what are you going to do?"

"Give me this car."

".....it is good!"

For a long time, Xia Ming still popped a word from his teeth. He mentioned the explosion-proof car from Li Yun, and he knew that this **** kid had this idea!

"Haha, thanks."

Li Yun patted Xia's shoulder with satisfaction, and then waved his right hand at the explosion-proof car.

"!!!"

Professor Wen, as well as dozens of armed soldiers on alert around him, all stared.

Where's the car?

What about explosion-proof armored vehicles?

An explosion-proof armored vehicle with six big wheels and a load of at least 15 tons was parked on the side of the road just now. Why did it disappear? !

Chapter 1585: The era creates heroes, but also needs heroes

Numerous soldiers who had been on guard all around now all looked at the place where the car was originally parked. They blinked and blinked again, rubbing and rubbing their eyes, but they still didn't see the load. Where did the armored vehicle with three tons of CL18 explosive disappear?

"This....."

The serious Professor Wen showed a shocked expression for the first time, stepped forward involuntarily, and walked a few steps back and forth where the armored vehicle had disappeared.

Sure enough, it wasn't some optical stealth technology, but a car really disappeared alive!

In fact, there is no need to confirm this. After all, this car loaded with CL18 is surrounded by soldiers armed to the teeth. How could it suddenly run away!

The only possibility is that Li Yun used an unknown means to forcibly shrink the car, or get a different space!

Either way, it is enough to shock the knowledgeable Professor Wen who is in the modern science atmosphere!

He walked back and forth, his tone excited:

"In science fiction, people can expand and shrink objects in equal proportions, and they can also teleport objects and people to extreme distances in an instant, and can even break the speed of light!"

"I always thought it was just a fantasy of science fiction. The black technology of mankind needs to go through at least three scientific revolutions, so that human civilization can reach Type II, that is,

the energy of the entire star system can be used freely and an extraterrestrial base can be created. Some may be done!"

"but now....."

Professor Wen looked at Li Yun with complicated eyes, "From Li Yun yours, I see the possibility of human science and technology advancing by leaps and bounds!"

"Ding, the host made a choice to convince Professor Wen, experience value +500,000, free attribute points +500, purple gift bag*1, extra reward: Explosives (Intermediate)."

"..."

Li Yun couldn't laugh or cry, but he couldn't help but sigh with emotion. Professor Wen deserves to be a top scientist. Most people see him in this way, most of them are in awe, or simply yelling at monsters.

Only scientists like Professor Wen can see the level of human civilization.

He didn't shout that it was unscientific, but quickly accepted it, and even began to analyze what the principles are behind it, whether it can be done with scientific and technological means, etc.

"Li Yun." Xia Ming looked at him with a weird face: "My explosion-proof armored vehicle has exceeded 10 cubic meters, right?"

"Hey, can't you allow me to keep a little hole card?"

Of course Li Yun knew the meaning of Xia Ming's words.

10 cubic meters is the storage space of the space ring he revealed to Xia Ming, but now he has installed the armored vehicle together with the CL18, which shows that Li Yun has more than one storage method in his hands!

At least larger than 10 cubic meters!

Xia Ming shook his head and smiled bitterly, "Well, I won't ask anymore. Use it as you like." After a pause, he said again: "But I hope you can help if you can. In this era of surging trends, the country needs A hero like you stand up!

In the era, in creating heroes, heroes are also needed! "

The general looked at him with scorching eyes!

"Uh."

Li Yun shrank, quite a little afraid to let the word hero press on top of his head, these two words were too heavy.

"It's good to keep it like this, it's enough." Xia Ming didn't seem to be too pressing, and took the initiative to skip this topic.

—After all, there are many beautiful women who are all over the country, obviously a young man who is enjoying life. You suddenly let him be a hero, work hard, and shine for the country. This is a bit too embarrassing.

"Ahem!"

Li Yun covered his mouth with his fist and coughed, "I will show you another magical thing!"

Chapter 1586: Release

"Something magical?"

Everyone looked at Li Yun. Compared with before, their eyes were full of awe this time, and they didn't dare to look suspicious again.

"That's it."

Li Yun waved his hand at the ground where the armored vehicle was originally parked, and suddenly, seven or eight blindfolded people appeared in front of them.

Xia Ming's pupils shrank, but he was not too surprised.

After all, Li Yun already has the ability to ingest objects, and now he reveals a treasure that carries a person in his hand? Or spell? It can't cause Xia Ming to be too shocked.

As if it was reasonable, he felt that even if he saw Li Yun fly out of the earth and run to the moon in the next moment, it wouldn't be too strange!

Of course, the soldiers Xia Ming brought with him were not so calm. They all exclaimed, and subconsciously clenched their weapons. Fortunately, they saw all the people released by Li Yun lying on the ground, seeming to be sleeping. The soldiers just relaxed.

"Is this an advanced application of compressed space technology?!"

Professor Wen looked over with fiery eyes. Needless to say, Li Yun probably guessed what he wanted to do.

"Dont look at me!"

Li Yun spread his hands together, "This is a treasure handed down from ancient times. I don't know if this is the only treasure in the world, but there is only one on my body. It is impossible to leave it to Professor Wen for your research!"

Professor Wen laughed, "Li Yun, you can misunderstand me, I don't have this idea, really! Now the domestic scientific community knows too little about spells, even if they get this kind of space technology, they can't study it. I still understand what you can't eat to be fat in one go."

The underlying meaning is that if the research reaches a certain level in the future, he still hopes to borrow Li Yun's things to research.

Li Yun smiled and said nothing.

In the future, when scientists are really able to study the Nasumi mustard seeds in the spell, his strength is estimated to be invincible in the world, and it is not impossible that he has a few lotus fairy houses in his hands.

As for why he revealed that he could carry a living person, it was because Li Yun felt that although the Lotus Immortal Mansion was precious, it was not to the point where it must be kept secret.

For example, when Li Yun brought the Sage Fanqing into the Immortal Mansion for the first time, she was not too surprised. It can be seen that there are similar Immortal Mansion existences in the Hidden Sacred Valley.

Of course, Li Yun also believed that the Dongtianfudi in the Hidden Sacred Valley could not be compared with the Lotus Immortal Mansion in his hands!

"Li Yun..."

Professor Wen wanted to say something, but at this time the hostages woke up one after another, Li Yun motioned to the soldiers around to loosen their blindfolds.

The hostages were terrified, but after seeing soldiers with live ammunition all around, they all burst into tears with surprise.

"Uuuuu, it's finally out!"

"Oh my God, I'm finally saved!"

"It's great, it's great to see you guys!"

"Ouuuu, you guys are too late!"

The hostages cried and screamed, venting their dissatisfaction.

Although most of them are locals, they have a strong trust in the fighters of their country. There are so many fighters around, which is enough to quickly calm their fearful hearts.

Of course, some people are complaining about why it took so long to save them, causing them to live in a cell with ***** for a month!

"Thank you again, Mr. Li Yun!"

Among these people, only the couple Shi Liangcai and Tana knew the truth!

Chapter 1587: Grace and revenge

The two bowed deeply to Li Yun, and thanked Li Yun for his life-saving in unison, and made the hostages look over.

"It's him!"

Now the hostages recognized it, and Li Yun just appeared at the door of the cell and led them to a strange and fragrant place!

"So you're a policeman. Detective!"

A full-faced hostage glanced at Li Yun weirdly, and said very uncomfortably: "You guys can do this, let us do this and that, and also blindfold our eyes, like playing a monkey to us. Grass!"

Hearing what he said, the hostages were irritated one after another. In other words, after they were detained for more than a month, they have accumulated a lot of grievances, and now they just have a vent.

"You bastard, are you like a human being?!"

"It's fun to play us?"

"Hehe, I felt something was wrong at the time, so why should the gangster take us away and blindfold us!"

Five or six hostages screamed, and they looked like they could not wait for Li Yun to apologize. They were very confident.

Sheng Mien, Dou Miqiu, these words were vividly interpreted in their bodies.

"Ding, trigger the selection event..."

"enough!!"

Shi Liangcai yelled and stood up, looking at the group of people indifferently with his eyes: "You are really wolf-hearted, do you know where we were at that time?!"

His hand pointed to the towering volcano in the distance, "We are locked under the volcano, don't you know!? A group of **** actually blames the benefactor in turn, it's really a beast!"

A group of hostages dumbfounded, in the volcano?

Shi Liangcai shouted angrily again: "Without Mr. Li Yun, we would all be thrown into the lava to fill the volcano. How can you be arrogant now!"

"Are you a fool?" His face was full of flesh--of course, the now hungry and thin big man looked at Shi Liangcai as if looking at an idiot: "We were locked in the bottom of a volcano? Hehe, I see. You are locked in your mind..."

"Snapped!!"

A crisp slap sounded, and everyone looked at Tana in surprise, but saw that the woman born on the grassland slapped her with another slap. The big man didn't react at all and was just ashamed.

"First, I don't allow you to insult Mr. Li Yun!"

"Secondly, I don't allow you to insult my husband!"

"third!"

It was another slap.

"I want to take revenge for what happened before!"

Tana yelled at them righteously, with the style of a prairie woman, which was eye-catching.

"You, your stinky watch is looking for death!"

The big man jumped like thunder and wanted to rush over to fight, but unfortunately, he was knocked to the ground by the soldiers standing next to him as soon as he wanted to do it.

Li Yun shook his head and smiled. He looked at Xia Ming and said, "These people are all hostages who were taken to the bottom of the volcano, but when they were in custody, they tried to use force against Tana. I think this is a crime, right?"

"definitely!"

Xia Ming nodded, "Even if someone is kidnapped, you can't do harm to other people, unless it's under the order of the gangster."

"No, no, these people want to be strong against me!" Tana denied this statement, but she said it boldly.

"Then it's okay."

Xia Xia Ming smiled, and said to her: "Wait later, you will stand up and testify that anyone who has attempted unruly behavior against you will be dealt with as a strong* attempt, and the sentence will be...five years."

After taking a look at Li Yun, Xia Ming made a decision.

Chapter 1588: consultant

"It's great!" Tana immediately became happy, "Evil is rewarded, all of you bad guys go to jail!"

"In a cell again...?"

Just now he spoke insults at Li Yun and tried to take Tana's hostage, but now they are all dumbfounded!

They have just escaped from the stinking gangster cell, and they are going to enter another cell, and they have been locked for five years!

"No, no, I was wrong, brother, no!"

The hostages who were in the yin and yang before, are now completely panicked and begged for mercy, but unfortunately, Li Yun didn't even bother to give them one.

"Take them away first!"

With a wave of Xia Xia Ming's hand, several soldiers immediately stepped forward and took the hostages aside for detention.

For those who are trying to make a strong fight, the soldiers around do not have the slightest affection for them, even if these people have been imprisoned for a month!

"Five years, almost."

Professor Wen nodded slightly, approving Li Yun and Xia Ming's approach to the Fa.

Of course, he also knew that the penalty might be too heavy, but firstly it was for keeping secret so that Li Yun's saving lives would not be leaked out, and secondly it was these hostages who had committed crimes. When the two were added together, the outcome would naturally be predictable.

These hostages will be held for five years. At that time, it doesn't matter whether they are confidential or not. There will be a conclusion about the matter with the Six Demon Gates.

As for the absence of Shi Liangcai and Tana, there will be additional confidentiality measures afterwards.

Taking a look at them, Xia Xia was very thoughtful and thought of how to arrange the follow-up of the two.

"Ding, the host made a choice and punished the hostage and the villain. Reward: Justice value +5000, blue gift bag*5, extra reward: increased prestige in Huang Xuan country."

The justice value has increased a lot, and it has already been rewarded once when saving the hostages.

Without paying attention to this little farce, Li Yun looked at Xia Ming: "Brother Xia, I'll go now? You guys should leave here too. Just stay as close as possible."

Xia Xia Ming wanted to say something and stopped, but at last he could only sigh and exhorted: "Be careful yourself!"

"Don't worry, I can still run if I can't fight."

Li Yun waved at him, and was about to leave, Xia Ming stopped him again: "Wait!"

"?"

"By the way, Li Yun, now the country has set up a special laboratory called the Cloud Gods Research Institute. Professor Wen and I have also joined it. I have recommended you to serve as a special consultant for the research institute. You will come and visit when the time comes. And make guiding opinions!"

Guiding opinions...

Li Yun was unable to make complaints. He thought of the banner that the principal had put up when the superiors came to the school before. There must be a few keywords in it: warm welcome, visit and guidance, and so on.

Unexpectedly, he has this kind of treatment now?

"I....."

"Ding, trigger the option event, please choose from the host:

Option 1: Yes, reward justice value +20000, golden gift bag*1, Huang Xuan's domestic prestige is greatly improved, epoch-making reward: a book "Science Cultivating Immortals·Primary School".

Option 2: Reject, no reward. "

"Science Cultivation"? Or elementary school? What the hell! !

However, it looks pretty awesome, epoch-making rewards, and it sounds awesome.

"Don't rush to refuse." Xia Xia saw that Li Yun meant to refuse, and quickly persuaded: "The research institute is located near Zhonghai City. When you go to university, you can easily walk around. By the way Give me some guidance."

Chapter 1589: The wind is sluggish and easy to be cold

Li Yun couldn't laugh or cry. I haven't had the college entrance examination yet, so you have booked the school for me.

what is this? Personal care from the big leader?

"Okay, let's talk about it then."

Li Yun didn't refuse, and it wouldn't be a bad thing to name a special adviser anyway. In his impression, the so-called adviser was the one who only took money and didn't work, and all of them lived very smartly.

"That's it!" Xia Ming laughed very satisfied. "I won't stop you. Be careful. If you can't hold it, we will retreat. We Huang Xuanguo's heroic warrior--"

He circled the soldiers with live ammunition around him with his fingers, and these lovely people suddenly held their heads up, expressing that they are very powerful!

"It's your strongest backing!"

Looking at the soldiers around, Li Yun was moved in his heart, nodded solemnly, and then turned and left.

Everyone looked up at the hero and watched him step by step towards the volcano group. Finally, under the leadership of Xia Ming, everyone slowly raised their right hand and paid a military salute to Li Yun's back.

What is a hero?

This is!

"Ding, the host makes a choice, rewards justice value +20000, golden gift bag*1, Huang Xuan's domestic prestige is greatly improved, epoch-making reward: "Science Cultivation · Elementary School Chapter 1" book."

Out of the corner of Li Yun's eyes, seeing the soldiers saluting him behind him, he almost staggered.

"I'm going, how come there is a tragic picture of 'the wind is slack and the water is cold, and the strong man goes away and never returns'? Is this the so-called flag?"

Feeling more awkward, Li Yun twitched the corners of his mouth, quickened his pace decisively, and a few longitudinal jumps disappeared in front of them.

Lest they be killed by their milk!

"This coming era is a crisis as well as an opportunity!"

After Li Yun disappeared, Xia Ming stood still a little, and said to Professor Wen with emotion.

The latter nodded slowly, "Fortunately, we have Huang Xuan and Li Yun, at least we are ahead of other countries."

Xia Xia Ming smiled, and turned to the soldiers and ordered: "The Haraha volcano area is sealed off, no one is allowed to enter! You are a group of five, scatter and inspect the surrounding area, and force everyone out of this area. !"

"Yes!"

The soldiers yelled in the loudest voice, clenched their weapons firmly, and launched their actions.

...

Li Yun returned to the bottom of the volcano, and the journey went smoothly, with no abnormalities.

Once again, he used the Psycho-Throughout Technique, and returned to the palace of the Spirit Fire Cave where a large hole had been broken.

"Still practicing!"

Li Yun looked in from a distance, and found that the Spirit Fire Master and Baihe Taoist were still sitting in front of the forge meditating, a faint blue flame was still burning in the furnace, and nothing had changed.

But it cannot be said that there is no change.

The expressions on their faces became a little haggard because they spent a long time refining the magical artifacts. Although they did not show a pale look, just looking at their complexions, there was a sense of weakness.

"Take advantage of your illness and kill you, and when you succeed in refining, I will do it again!"

Making plans, a smile appeared on the corner of Li Yun's mouth, and he turned and walked towards the side door of the palace.

Before he approached, he smelled a faint smell of blood. Li Yun thought for a while and walked to the servant's room.

Looking inside, there really is a problem!

"In order to survive, Wei Jingli is also ruthless."

Li Yun shook his head and stopped paying attention to his actions. With a light leap, he jumped onto the top of the palace, and sat down cross-legged, waiting for the time to come.

Chapter 1590: wait

Taking advantage of his free time, Li Yun checked his current strength.

The visual attribute points have reached 240,000. When converted into martial arts cultivation, it is the level of congenital perfection.

However, Li Yun estimates that the average innate consummation is only about 150,000 to 200,000 attribute points. For example, Zhao Tianfeng is far inferior to him now.

"The total attribute of 240,000 has not reached the innate limit. It is conservatively estimated that it can reach more than 300,000, which is really an exaggeration!"

"My current physical fitness is a thousand times stronger than ordinary people!"

"In addition to the absorption of the terrible fire, I can now display all kinds of wonderful special effects in the movie, so that ordinary people will be dumbfounded when they see it!"

The power of strength gave Li Yun an illusion of being detached from the world, as if he was traveling around the world, unfettered, and able to act recklessly!

Of course, just think about it.

Compared with the old immortals of the Hidden Sacred Valley and the Six Demon Gates, his current strength is not enough to be overbearing, and it takes some time to strengthen himself!

"Qing Sheng, college entrance examination, getting stronger, traveling, Fang Xue's first time, Qingyu and Lianyi, Xiaojiao, Yaoer... By the way, there are hot springs."

"Ding!"

Li Yun closed his eyes and waited. Various thoughts flashed in his mind. After some time, Li Yun heard a clear and melodious metal chirping. At first he thought it was a system reminder, but he quickly reacted.

"The artifact is out!"

Li Yun opened his eyes in surprise and finally waited here.

Once again, he fully used the Tongyou ability, Li Yun's figure turned into nothingness, and quietly came to the beam of the front hall.

"Brother Dao, how?"

Taoist Baihe stood up and looked at the burning forge with scorching eyes.

The stove kept beating, and the earth flame inside burned fiercely, and the blue flames sprayed out, forming a series of strange patterns!

"This is a magic weapon of the spirit weapon level?"

Li Yun admired secretly, but unfortunately he knew half of the spell training. If the Sage Fanqing is here, he can see something from the pattern on the forge, just like she observed the copying of the Nine Heavens Thunder Talisman last time. .

"Very good, very successful refining!"

The spiritual fire master sat cross-legged on the ground, his eyes also looked at the forge with a frenzied look: "Brother Dao's strength is stronger than I expected. Not only does he melt and polish all the materials faster, he can also burn all The materials are all refined to the best, I can guarantee that this refining tool is at least a top-quality magic tool!"

The Taoist Baihe's face was slightly pale, and he smiled satisfied when he heard the words, "What about the spirit tool? Is there any way to raise this embryo to the level of the magic tool?"

He is also a character in the Hidden Sacred Valley. He has a strong cultivation base and has lived long enough, but he has never heard of anyone who can refine any magic weapon in the last thousand years.

Only 1,500 years ago, I heard that a person nicknamed Qi Lao refined a spiritual weapon.

It's a pity that no one can confirm it, it's just spread.

Because of the difficulty of refining spiritual weapons, Taoist Baihe did not focus on this aspect from the very beginning, and could refine the best. If not, he would only ask for a superb magic weapon.

After all, looking at the entire world of practice, there are only a handful of experts in the Void Returning Realm who can have tailor-made top-quality magical artifacts!

"Brother Dao, don't worry."

With a smile on his face, Master Linghuo made several magic decisions one after another, pressing the fierce flames back into the furnace, allowing the initially purified material to slowly form a fist-sized fiery red embryo.
