

Godly Choice 1761

Chapter 1761: Stressful executives

In this way, Li Yun took Fan Qingsheng for dinner in the company cafeteria. As a result, because the QQ crowd spread the picture of Fan Qingsheng and his photo, Gong Qingyu, who is a shareholder of the company, also knew about Li Yunhe. Fan Qingsheng came out together to "date" this matter.

"Will this guy really give the saint of the Hidden Sacred Valley..."

Gong Qingyu, who was lying comfortably on the sofa and doing anime, saw the pictures in the company group, and was shocked to sit up, zoomed in on the pictures, and came to the conclusion after careful observation:

It must be so!

Because in the photo, Li Yun and the saint were sitting very close, there was no dissatisfaction on the saint's face, but an inexplicable sense of intimacy.

Moreover, in one photo, Li Yun gave the saint woman some food, smiling softly!

"Li Yun, this **** really...can't underestimate him!"

Gong Qingyu's mood is a bit complicated. She can be said to be quite respectful of the Sage Fanqing. For her, the saint of the Hidden Sacred Valley not only looks not inferior to her, but also has her IQ, strength, and temperament steadily overwhelming her. She is convinced of the Sage of Fan Qing.

I just didn't expect to be "sisters" with the saint one day.

"Could it be that... I want to be a kid?"

Gong Qingyu's eyes widened, thinking of a fact that is difficult to accept!

"Damn, Li Yun, you bastard!!!"

...

After eating, Li Yun walked to the office floor and sneezed. He always felt that someone was talking about himself behind his back.

"Chairman, let me introduce to you. This is the company's game zone. The team of "Xiao Ming's World" has expanded to 500 people. You should know many of them."

Wu Ke arranged for Li Yun to be the Minister of the Personnel Department, accompanied by a 40-year-old woman named Xu Chunxue. This Minister of Personnel Department has experience studying abroad and an executive in a multinational company. He wears a professional skirt and high heels. Dress up as a standard superwoman.

But her temperament seemed weak in front of Li Yun, not to mention that in front of Sage Fan Qing, Li Yun could almost see the cold sweat on her forehead, enough to see how much pressure the Minister of Human Resources was under.

Xu Chunxue is indeed Alexander now.

The chairman is fortunate to say that he has a sunny and cheerful atmosphere on his body, and he is very comfortable with him, which makes her vaguely feel the personality charm of the chairman. It is no wonder that top information technology scientists like Wu Ke have joined his company to work for him.

But this cold fairy who has always been expressionless, Xu Chunxue felt her scalp numb and her heartbeat speeded up even when she approached her.

It's like going back to the school days, being called out to talk alone by the teacher after making a mistake, and it seems that it is the first time to participate in a job interview, and I am careful not to make any mistakes!

"Oh my God, it's terrible! What is the origin of this woman named Fan Qingsheng?"

Xu Chunxue, the head of the personnel department who manages a company with a market value of 500 billion and 5,000 employees, just wants to end this visit soon.

She would rather go back and work overtime until late at night, and then make a personnel report in front of all the shareholders the next day, rather than face this woman who is so beautiful that she is not in the world.

"Old Feng, are you still in the company?"

Of course, Li Yun didn't know the current psychological activities of his employee Xu Chunxue. He smiled and greeted a supervisor who stood up.

This is Feng Rongchen, the original author of "Xiao Ming's World", and now probably has become a multi-millionaire by dividends.

"Boss, good evening!"

Seeing the boss again, Feng Rongchen's expression was quite agitated, and tears were almost in his eyes.

After all, looking back on the experience of the past few months, it can be described as a dream like a dream.

From a middle-aged programmer who can barely get a loan to a billionaire holding a 2.5% stake in a global pandemic game with a valuation of 50 billion, this gap can no longer be described by a big one.

Chapter 1762: Why am i going to be laid off

Li Yun smiled and greeted these old acquaintances. He really only knows this group of gamers at Baiyun Technology now.

Other departments, such as the finance department, the propaganda department, the marketing department, the Xuanyuan Zhidun branch, and an entire automobile subsidiary, etc., none of those employees Li Yun knew!

"What version of the game "Xiao Ming's World" has been developed? It has sold 50 million copies now? Haha, that's great, do you have plans to release the second one? Oh, yes, rest assured, you, as the veterans of Baiyun Technology, the game The department will never be laid off!"

Feng Rongchen and others: "..."

Faced with the chairman who comforted them, the employees of the game department were all dumbfounded!

I used to think that the chairman of the board relied on his magical vision to make tens of billions of games by buying Boss Feng. They all found it incredible, and they thought they were great, and they made such a super popular game.

But now?

"Xiao Ming's World" continues to sell well, and its influence is getting more and more popular. This kind of outstanding achievement is worthy of great attention in any company, even the top multinational group. In the eyes of the chairman, how did their game department become the only seed that needs to be protected?

"..."

Xu Chunxue took a deep breath to calm herself down.

She has experienced ups and downs. She used to work from scratch in a company until she went through a complete financing and listing and got millions of dividends before leaving. In this way, she moved to a multinational company as the manager of the personnel department, which was later called As the head of the personnel department, he officially entered the ranks of top corporate executives.

But, the previous work experience is totally unworkable in Baiyun Technology!

"Xiao Ming's World" is clearly still selling, sweeping the global game market, and bringing in billions of profits for the company every month. This is a cash cow and laying hens project for any company, but the chairman wants to sell it?

Yes, the chairman is saying that the game department should be protected, but the reverse is understood. Doesn't it prove that the game department is not very important in the chairman's heart and is a department that needs to be protected?

For a while, there was silence all around.

They were all taken aback by Li Yun's words!

"What happen to you guys?"

Li Yun said strangely: "Didn't I say it? The game department shed blood for the company and carried guns. It has done a lot of credit and will never be abolished!"

".....boss."

Feng Rongchen, the original author of "Xiao Ming's World", wiped the scared sweat on his forehead, and asked cautiously: "Can you ask about the future development of the company? Boss, do you want to move the company towards high-intelligence technology and weaken the game aspect? ?"

The hundreds of people in the game department shuddered, feeling that their work was not guaranteed.

Baiyun Technology has changed too much in the past few months!

"It doesn't mean to weaken."

Seeing Van Qingsheng's gaze, Li Yun smiled and said: "The money you earn will continue to invest in games and ensure that you have sufficient funds for you to enjoy it. It's just that the company's strategic goals will not be set for the time being. On the game."

Everyone was silent, waiting quietly for the person in charge of Baiyun Technology to speak.

Every word Li Yun said now is related to the jobs of thousands of people at Baiyun Technology, and there must be no ignorance.

"In the future," Li Yun paused, and said vigorously: "You will see Baiyun Technology launch more epoch-making technologies, not only autonomous driving, but also some... you can't even think of technologies."

Technology not within the scope of modern technology! "

Chapter 1763: what happened

Technology that is not within the scope of modern technology?

Everyone can't figure it out. It's not modern technology, or ancient technology?

This is not nonsense!

But Li Yun is the chairman of the board. He just said that **** is fragrant. As his employees, he can only agree with Shi Zhenxiang!

"Haha, okay, you can go back after get off work. The company does not require compulsory overtime."

It is already seven o'clock in the evening, and Li Yun estimated that it was Wu Ke and the management to facilitate him to take people to visit, so they asked some employees to stay in the company temporarily without urgent matter.

Li Yun didn't blame Wu Ke or feel embarrassed. After all, his current chairman still has this privilege.

Leaving the game area, Fan Qingsheng said softly: "Li Yun, are the things your company has made changing the world?"

"?"

Li Yun felt a little difficult to understand the words of the Sage Fanqing. After thinking for a while, he nodded: "It can be said that there is! In the future, there may be products that combine spells and technology. The technology comes from the last time you saw the magic fairy. The country is organizing people to study the suspended tower. If it succeeds, it may be launched by Baiyun Technology."

This was something that Xia Ming had roughly discussed with him, although he was not sure about it.

"Yeah." Fan Qingsheng said again: "I will sort out some of the learning experience of spells and let you decide."

It means that Li Yun can use it, give it to the country or leave it to study by himself.

"Okay, will it take too much time?"

"No, I will write after the college entrance examination."

"Hahaha, good!"

Xu Chunxue, the head of the personnel department who led the way, kept a smile on her face, but was full of doubts in her heart.

What spells, what hanging towers, and how can spells be combined with technology? Is the country already studying?

Baiyun Technology...what kind of company is it! !

Xu Chunxue has a very strong hunch that the self-driving technology developed by the company has reached the stage of monetization. She recently recruited many business negotiation talents as required, all of whom are elites from all over the world who are proficient in multiple languages and business laws.

In addition, the company's patent network has begun to be registered globally, and the patent network has been built layer by layer to prevent the possibility of theft by other companies!

"Forget it, I'll be a small executive honestly, and leave these big things to the chairman...In short, Baiyun Technology is not easy."

Xu Chunxue, who couldn't understand, decided not to ask anything and honestly took the chairman to visit the company.

On the 25th floor, this is the Foreign Exchange and Cooperation Department, which is responsible for receiving visitors and communicating with companies that are interested in cooperating around the world before transferring it to other departments.

The multi-language version of "Xiao Ming's World" is the result of the work of the Ministry of Foreign Exchange and Cooperation.

As soon as Li Yun and Fanqing Sheng stepped onto this floor, they heard a fierce quarrel.

More than a dozen foreigners with blond hair and blue eyes are doing all kinds of jerking, making people unable to understand what language they are using.

Fortunately, Baiyun Technology's foreign communication department has many capable employees, and they have specialized personnel responsible for each country's language, so that they don't understand what they say.

"How is this going?"

Li Yun asked in a deep voice. The person who accompanied him on the tour was shocked and was obviously frightened.

The mysterious high school student chairman with a strong background brought someone to visit the company for the first time, but he encountered someone who made trouble. If this is investigated, I don't know how many people will be punished and demoted!

Chapter 1764: Goodbye Qianhu

"Security!" Xu Chunxue turned to the security guard standing at the door and shouted with dignity: "Don't hurry in and control the scene, let these foreigners shut their mouths and stand aside, waiting for the chairman's question!"

This is the skill of executives to please leaders!

Don't care about anything else, as long as the leader is there, then he is the biggest one. The leader does not speak, and everyone else has to shut up and wait.

The leader has spoken, and everyone else has to shut up and listen!

Two security guards came in, but faced with more than a dozen foreigners with blond hair, blue eyes, and tall horses, they didn't have any effect at all.

And these foreigners are probably too excited, yelling something, and their actions are very rude.

Li Yun could probably know what happened in English, and when he was about to say something, the system prompt came.

"Ding, trigger the option event, please choose from the host:

Option 1: Do it yourself, beat these foreigners violently, and make our country famous! Reward justice value +3000, purple gift bag*1, a small probability to cause international disputes.

Option 2: Take control of the situation, reward blue gift bags*3, and increase employee loyalty.

Option three: furious, leave with one's sleeves, no reward. "

Li Yun raised his eyebrows, this is also a selective event? The rewards are really shabby.

"Be quiet!"

When the group of foreigners in suits and leather shoes was making a lot of noise, Li Yun's roar sounded with the green dragon, and it was clearly transmitted to everyone's ears. The irritability and irritation were replaced by fear, one by one. All looked over in shock.

"Sitdown!"

Li Yun stretched out his hand and pointed at the sofa that was used by the guests, and commanded indifferently.

Sitdown is often seen in Huang Xuanguo's English class. In fact, it is a kind of command tone used by superiors to subordinates. In this situation, Li Yun's sitdown is more appropriate.

This group of foreigners really sat down obediently and made the surrounding Baiyun Technology employees look at the chairman with admiring eyes.

Worthy of being the chairman, even if he is very young, his momentum is first-class!

"Ding, the host makes a choice, takes control of the situation, rewards blue gift bags*3, and increases employee loyalty."

When the reward came, Li Yun heard a fierce voice:

"What's going on? What's going on? Who is going to dare to be in the boss's company... Uh, boss?!"

This arrogant and overbearing voice is incompatible with the atmosphere of the surrounding commercial offices, but it is a bit familiar to Li Yun.

"Qianhu?"

Turning around, it was really him, the small boss of Longyang County who was the first to follow Li Yun!

"Boss, why are you here!"

Qian Hu looked very excited. He was wearing a suit and holding an electric baton. A dozen security guards trot over behind him. Halfway through, he hurriedly hid the electric baton behind him and smiled awkwardly at Li Yun.

He is now the Deputy Minister of the Security Department of Baiyun Technology. There is a Minister of Innate Realm on it, and all of them at the same level are in the Acquired Realm. Only Qian Hu followed Li Yun at the earliest and also mixed with a deputy minister-level leader.

However.

The difference between Qian Hu and Li Yun is really not one or two points. As the earliest veteran, Qian Hu's current direct leader is the minister of the security department, and there is also the head of the logistics department, and the vice president in charge of logistics. Above is the president Wu Ke, and finally the chairman Li Yun!

In other words, there is a difference of four levels!

Chapter 1765: Come to negotiate, not fight

"What do you call me?" Li Yun raised his eyebrows, and Qian Hu quickly changed his words: "Boss!!"

Li Yun nodded in satisfaction and motioned for him to control the scene.

Xu Chunxue glanced at this Qian Hu. How could she as the head of the personnel department not understand this person's caution?

Calling the chairman of the board of directors is nothing more than trying to clarify the "special" relationship between him and the chairman of the board, so that he can get more involved in the company.

It's true... the entire Baiyun Technology is the lowest level of Qianhu, and it is completely a small bastard!

But others are also envious, just as Qian Hu often brags, Baiyun Technology is what he looks at bit by bit.

Li Yun knew that Qian Hu could only do this in his life.

For one thing, he didn't have a good talent for martial arts, and he didn't have a good education level, and his ability to do things was average. Apart from being able to slacken his hands and have a good interpersonal relationship, he basically couldn't do anything else.

If there is no accident in this life, being a security leader is the limit.

"Okay, go and stand on the side."

Li Yun motioned Qian Hu to step aside, looked at the group of blond and blue-eyed foreigners, and asked directly in English: "What are you here for?"

At the same time, in order for Qing Sheng to understand, Li Yun also translated her own words so that she would not stand stupidly.

Sage Fanqing glanced at him and nodded slightly, not knowing what he was thinking.

"Are you the chairman of Baiyun Technology?" A man of at least 1.5 meters tall, wearing a suit and tie, with a beard, and a very foreign-looking man stood up and looked at Li Yun with suspicious eyes.

"Correct."

"No, it's impossible, you are still a highschool student, how could it be..."

"Enough, no need to go on."

Li Yun waved his hand, pretending to pick up the phone and glanced at the plan inside, "I'm very short of time, I don't have time to talk nonsense with you too much. You are only limited to three sentences. Explain your purpose in English. If nothing else Things, you can leave my company after you have said it!"

Everyone around the staff looked weird, and the chairman really acted vigorously!

This group of foreigners is aggrieved. Their company can be said to be an existence in the field abroad. Every time they come to Huang Xuanguo for business negotiations, Huang Xuanguo's company sends special people to serve.

Thousands of Marriott car pick-ups, five-star hotel executive suites, plus a few beautiful female college students to accompany, all kinds of wonderful treatment, so that every time you come to Huangxuan country on business, countless people rush to come, just to taste the compliment taste.

But now, everything is reversed!

"No, no, no!"

A foreigner waved his hand as if refusing, and said in blunt Chinese: "Negotiations, there is no such thing, we are here to negotiate, not to fight!"

"Not a quarrel? What was it just now?" Li Yun asked, he had received a prompt to choose an event.

"Ding, trigger the option event, please choose from the host:

Option 1: Drive away these foreigners, refuse to cooperate, and let Huang Xuanguo enjoy autonomous driving technology exclusively! Reward golden gift bag*3, a random technological technology that can be realized, greatly increasing the prestige in Huangxuan's domestic.

Option 2: Knock the mountain to shake the tiger, drive away the arrogant foreigners, sincerely cooperate with a win-win attitude, reward experience value +10 million, intelligence +10000, golden gift bag*1, you can get a generous return (more than 500 billion profit), Bonus: All-solid-state ultra-density lithium battery technology.

Option 3: Let Wu Ke decide, not to come forward, and reward business management skills to be promoted to master level. "

Chapter 1766: Qian Hu, ready to see off the guests

Li Yun's spirit was lifted, and finally came another choice about commercial rewards!

In the previous system business selection events, Li Yun was prompted to buy the copyright of "Xiao Ming's World". The game has made more than 5 billion global profits, and he is still making money continuously.

The other time was Xuanyuan Zhishi, letting Li Yun cooperate with the country to develop an enterprise-level firewall to provide a secure firewall for computers in the scientific and military fields across the country.

Once again, it is autonomous driving technology, which is still incubating.

"All solid-state, ultra-density, lithium battery technology? It seems pretty good."

Battery technology has always been the frontier of the scientific community, even ordinary people know the importance of battery technology.

It can be said that once the battery technology breaks through, many electrical appliances in the world will be redesigned, and the innovation is no less than the emergence of touch-screen mobile phones!

"Do you know this?"

A smile appeared at the corner of Li Yun's mouth, and he reached out and pointed at the foreigner who made the most quarrel just now, "Since it is a negotiation, what are the conditions for the negotiation?"

"Chairman." Before the foreigner could speak, a beautiful woman in a professional skirt stood up. She was a manager of the Foreign Exchange Department. The badge on her chest showed that her surname was Zhang and her name was Zhang. Hai Ning.

"I don't think there is any need to talk to this Mr. Alves." Zhang Haining glanced at the foreigner indifferently, and said in a non-irritating tone: "The conditions for the negotiation he brought were: letting out the Chase. A production line to produce our cars, but we need to exchange all of our company's autonomous driving technology, and take up 30% of the shares."

"Then there is nothing to talk about." Li Yun laughed, "Okay, you can go."

"The chairman of Huang Xuanguo!"

Alves spoke in Chinese, his face full of arrogance.

Li Yun glanced at him. It turns out that these guys can speak Chinese. The nonsense talking in front of them seems to not give them a little pressure. These people don't bother to speak in Chinese at all, but wait for an interpreter to serve them!

"Something?"

"What I want to say is!"

Alves aggressively said: "Perhaps because of your age, you don't understand Chase at all. I suggest you find some professional foreigners to evaluate the value of one of our company's production lines!"

"I also have a suggestion."

Li Yun said lightly: "Maybe your attitude is too arrogant, so you don't understand Baiyun Technology at all. I suggest you find a professional Huang Xuan countryman to find out how much my company has invested in the field of autonomous driving. Let's talk again."

Everyone had weird faces and used the other's words to refute each other. The chairman's words are so handsome!

"Mr. Li Yun."

Another foreigner with an indifferent expression said: "Do I think we are fools? The 300 billion investment in PPT can't deceive insiders!"

"You think so, that is." Li Yun waved his hand, "You can also leave, Qian Hu, ready to see off the guests."

"Yes, boss!"

Holding an electric baton, Qian Hu stared at the group of foreigners with a dozen of his subordinates. He wanted to win glory for the country a long time ago!

"You...vulgar and barbaric!!"

Alves walked straight out, and when he reached the door, he turned his head and said to Li Yun in a warning tone: "I can guarantee that in the sales range of Chase Automobile, it will never be possible to see a car from Baiyun Technology!"

Chapter 1767: The gentleman decides and then moves

Li Yun also smiled and said: "I can also guarantee that unless you take the initiative to give me 90% of the shares of Chase Motors and ask the board of directors to come and apologize to me in person, you will never want to cooperate with Baiyun Technology!"

Alves is so angry that he has a 90% stake and asks the big bosses on the board to apologize?

You know that Chase Automobile has been established for a hundred years and has produced military jeeps for the Second War. Behind every member of the board of directors is a financial crocodile, asking them to apologize to a small company of Huang Xuanguo?

dream!

"Young man Huang Xuanguo, you are crazy! You will regret today's rejection!"

Alves threw a word viciously, and quickly left this savage place.

He vowed that he must find foreign media to report on this matter, so that people all over the world will know how backward and ignorant Huang Xuanguo is, and what a savage and dirty place!

With his departure, more than 80% of foreigners also left. They didn't even say goodbye and left with cold faces. It is probably the same as Alves thought. After they went out, they would seek media exposure!

Xu Chunxue was taken aback, looked at Li Yun, and saw that the latter didn't raise his eyelids, and knew that the overly young chairman had no intention of retaining customers.

"Hey, the chairman has the strength, but he is too young to offend people easily."

Xu Chunxue shook her head inwardly and sighed.

Originally, President Wu Ke didn't see these people doing cold treatment, but the chairman ran into this incident and asked the security to drive them out...

"what about you?"

Li Yun looked at the last two people left with a smile, "I believe that you are still here because of your sincerity. If you want to cooperate, please show your utmost sincerity to persuade you. I!"

Fan Qingsheng hadn't spoken all the time. She had no idea about business, but it did not prevent her from observing the whole incident seriously.

The two foreigners glanced at each other. One of the foreigners with some light blue eyes stood up and asked Li Yun respectfully: "Mr. Li, I wonder if I can ask you a question."

"Can."

"Your Baiyun Technology really invested 300 billion in the field of autonomous driving?"

"I don't need to lie, and I don't bother to lie!"

The two foreigners were silent, and they still couldn't believe such a thing.

If the company hadn't sent them to inquire about the news, they would ignore such ridiculous news at all and would just look at it as a joke after afternoon tea.

In foreign countries, even Tesla, which is the most aggressive in autonomous driving, spends all its investments in this field in just over 5 billion M yuan.

But Baiyun Technology has a total of 300 billion, which is 50 billion when converted to M yuan!

This is crazy!

No, this is not even crazy to describe, you have to know that the market value of a medium-sized car company is only 50 billion M yuan!

"Can I ask one more question?" Another foreigner looked at Li Yun, "You are fully confident that you have created an autonomous driving technology that can be certified by the laws of various countries. That's why you are so bold in accepting Huang Xuanguo's state-owned business. Bank financing?"

It was then that Li Yun suddenly realized that the two of them had been investigated, so they chose to stay.

"There is a saying in "The Art of War" that a gentleman decides and then moves. It means that everything must be planned before starting to act. Can you understand?" Li Yun smiled slightly.

The two foreigners looked at each other again, saying that they would continue to consider cooperation after seeing the exact results.

"That's it, then you can go, too."

Chapter 1768: Survive or die

Li Yun's words left his employees speechless for a while, screaming in their hearts: Boss, business negotiations are not like you! !

If it wasn't for the chairman's personality, they would all want to roll up their sleeves and go to battle in person.

"Mr. Lee!"

The faces of the two foreigners changed instantly.

"It's not I begging you to cooperate, but you."

Faced with the anger of the two foreigners, Li Yun was indifferent and glanced at them indifferently: "Wait for Baiyun Technology to launch mature autonomous driving technology, I think you can imagine what kind of disasters car companies around the world will face, leaving it to You have only two options: bankruptcy, or be acquired by Baiyun Technology!"

Everyone was shocked!

The employees of Baiyun Technology seem to have seen a new round of sun rise slowly on the chairman of the board, and the violent rays of sunlight will soon cover the global auto companies, so they have to make a choice:

Survive or die!

"Mr. Lee."

This time I called Li Yun again, the two foreigners' aura was half short, and their tone of voice was completely lower, making the people of the foreign exchange department stare at each other.

Look, this is really high-level negotiation!

The momentum is like a rainbow, overwhelming the Quartet, and you can get complete initiative!

This terribly young chairman is not easy!

"I have said everything that should be said."

Li Yun waved his hand, "You can call back now to ask for opinions. I don't understand the others, but if the contract value is less than 100 billion yuan-don't worry, it's not M, then you stay and talk to my employees. I'm very busy now and I'm not free for the time being."

The two foreigners were dumbfounded.

"You can call now. Now I'm going to take my friends to visit the company." Li Yun smiled slightly, "I don't have much time for you."

No longer paying attention to them, Li Yun took the Saint Fan Qing to visit the Foreign Exchange Department and asked some questions at random, mainly to let Saint Fan Qing know what their daily work was.

Although Li Yun estimated that most of the saints did not understand.

When the two of them had finished the tour, before the two foreigners had finished making the phone call, Li Yun was also very straightforward and took Qing Sheng directly and went out.

As he said, it is not Baiyun Technology that needs cooperation now, but the global auto companies!

It's just that most of those car companies are still ignorant, and I don't know that Li Yun has already wielded the autopilot butcher knife and chopped at their necks.

When the butcher knife really shows its edge, the whole world will be shocked by Baiyun Technology!

"Etc., etc!"

Li Yun, Qingsheng and others walked to the elevator, and the blue-eyed foreign talent ran out panting with a mobile phone, followed by another one, both of whom looked very helpless.

"From your eyes, your respective bosses are very sincere."

Li Yun smiled and said, "That way, I'm not an aggressive man, Li Yun, you can follow me through the company, take a good tour, and then make a decision!"

"...Thank you Mr. Li Yun for your concession."

The two foreigners wanted to cry without tears.

Obviously Baiyun Technology is arrogant and rude, but now they have to apologize!

"Which car company do you belong to? Maybe I know... Oh, by the way, I don't know your names yet."

After entering the elevator, Li Yun found a topic, and the two foreigners were speechless again.

After negotiating for so long, I don't even know the name of the other party...

"My name is Ge Jier, and I am the vice president of BMW in Huang Xuanguo."

Chapter 1769: Ching Sheng's curiosity

vice president!

Li Yun could probably guess that Xu Chunxue had worked in Zhongwei, and the two happened to know each other.

"Mr. Ren, hello, I am glad to see you here!"

The two foreigners also lost their temper. If they were angry at Wu Ke's ignorance before, then after seeing Ren Huafei in Wu Ke's office, all their dissatisfaction could only be swallowed!

Who is Ren Huafei?

He is the chairman of Zhongwei Technology Co., Ltd. Although Zhongwei is not listed, its influence cannot be ignored by people all over the world.

It is conservatively estimated that the market value of Zhongwei Technology started at 5 trillion yuan, which is tied with Huang Xuanguo's A and T two giants. In Nantian Technology Group, some people even dare to push Zhongwei's valuation to more than 10 trillion yuan, reaching the top five in the global information technology field!

There are only five companies that can compete with Zhongwei, including Gugou, Giant Hard, Rainforest, Facebook, and Fruit. Other companies are completely unworthy to participate in this confrontation!

As for the comparison with BMW and Rolls-Royce car companies... it's totally ten times the kill, it's impossible to compare.

"I am also very happy to see you at Baiyun Technology."

Ren Huafei said something meaningful, and Ge Jier suddenly understood something, and his attitude towards Li Yun became more and more respectful.

"Mr. Ren, Wu Ke, what are you talking about?"

Li Yun also called the other party President Ren. After all, he was a patriotic senior in his sixties, who deserved to be called President Ren.

Ren Huafei started from scratch and created a giant company like Zhongwei in thirty years, which has profoundly affected the lives of Huang Xuan people. He is definitely a respectable person!

"I'm talking about cooperation with you Baiyun Technology." Ren Huafei said with a smile on his face, and glanced at the cold and fair Saint Vatican, a trace of surprise flashed in his eyes, and she was surprised by her beauty.

But Ren Huafei was a big man after all, and soon recovered. Seeing that Li Yun didn't introduce her, he didn't ask much.

"Cooperation? In what way?"

"Smartphone assistant."

Ren Huafei suddenly said with emotion: "Wu Ke sent me a piece of software yesterday. I only saw it at noon today. After trying it out, I rushed back from abroad immediately, for fear of missing this cooperation with you."

The lower the waists of Gergil and Todd were, they couldn't lift their heads in front of Li Yun.

Even the chairman of the top ten companies in the world came to discuss cooperation in person. It is a great honor for Li Yun to be personally interviewed by Li Yun for a small car company who is only sending the president of the branch.

"Those fools who walked away before, they certainly don't know what's going on here now!"

Ge Gil secretly rejoiced, but fortunately he didn't leave immediately, otherwise he would definitely miss this cooperation!
