

## Godly Choice 1771

Chapter 1771: Smartphone assistant

He decided to call the boss at the headquarters when he was free, so that the boss could make up his mind to cooperate with Baiyun Technology as soon as possible.

"Smartphone assistant?" Li Yun felt very puzzled and looked at Wu Ke: "Why didn't I remember that our company had this project?"

Wu Ke will never do it himself, it can't be so fast!

"Haha, don't blame the chairman, you don't know, this is one of the by-products of autonomous driving!"

Wu Ke explained with a smile-mainly to Ren Huafei and ignored the two foreigners.

Li Yun probably understood the real meaning of Wu Ke's words.

The system's reward "intelligent automatic driving" technology includes an auxiliary technology that can receive the driver's voice input instructions to achieve the goal of completely freeing both hands.

Transplanting this technology is a smart phone assistant, which can take control of the phone.

Nowadays, mobile phones are also commonly installed with this kind of assistant program, such as the intelligent voice assistant siri of the fruit company, Xiaomi's Xiaoai, and Zhongwei have also launched the same function.

But without exception, users seldom turn on these functions actively, except in certain special occasions, such as when it is inconvenient to answer the phone while driving, the rest of the time is rarely used.

After all, everyone who has used it knows that these voice assistants have one problem, that is: they can't hear correctly.

Yes, I just can't hear you!

If the user's accent is slightly non-standard, or vague, the voice assistant can be crooked thousands of miles away. For example, if I want to eat watermelon, the voice assistant can understand it as: I want to open the phone, and it will persuade me in reverse You don't want to make people laugh or cry.

"In other words, do you have mature products that you can display now?!"

Gergil and Todd were excited. They said a lot, but if they didn't see the real product with their own eyes, any cooperation would be nonsense!

"have."

Wu Ke smiled faintly, took out a tablet and handed it to him, "You don't need to open it, you can talk to it directly."

The representative of BMW, the blue-eyed Gergil rubbed his hands in excitement, and tentatively asked: "Excuse me, Mr. Wu, can I install it on my phone by myself?"

"It's okay, but you have to know that if an intelligent assistant needs to control your software, it must obtain the lowest level of authority. Do you know what that means?"

"I know, but there is nothing in my phone that needs to be kept secret, please rest assured!"

Ge Geer quickly assured that Ren Huafei on the side smiled meaningfully and pointed to the monitor above his head, "Please rest assured to use it, everything here is monitored and there will be no problems."

Gergil and Todd froze for a moment and nodded quickly.

Li Yun laughed dumbly, and Mr. Ren was actually warning them not to engage in any conspiracy.

For example, when he went outside, he falsely accused Baiyun Technology and stole the secrets in his mobile phone. By then, Baiyun Technology would have a hundred mouths and couldn't tell.

"Thank you, Mr. Ren."

Wu Ke reacted and thanked Ren Huafei sincerely.

He used to think that he was just a technical expert. Although he was not unfamiliar with the president, he still lacked a sense of vigilance in this regard.

And Ren Huafei has dealt with foreign companies, knowing that these foreigners are gentlemen and personable on the surface, but in fact they are still barbaric and cunning, and they will suffer if they are not careful.

Chapter 1772: artificial intelligence

"Then I will start the voice test."

After installing the voice assistant program, the foreigner Ge Gil said in blunt Chinese. Ren Huafei frowned and said a good thing to Baiyun Technology: "The software is still in the testing stage. I think your Chinese is not standard. Foreign English It also didn't join the voice library, and the effect may not be satisfactory."

The two foreigners were stunned, and both felt that this was the case.

After all, the software has not been officially released, and it is only natural that there is no English option.

"Do not."

Wu Ke shook his head, "Our technicians have prepared as many as 300 languages in the world for its database, including various dialects and slang, covering more than 99.99% of the world's population. The accuracy rate is close to 100. Percent!"

Ren Huafei did not speak any more, even Xu Chunxue of the personnel department felt that President Wu was bragging.

How can so much data be collected in just a few months?

Not to mention covering 99.99% of the world's people, are the primitive chief tribes of Heizhou also included?

This is not bragging!

Li Yun smiled mysteriously, "Please try it, Baiyun Technology has never boasted!"

"Yes."

With a suspicious expression on his face, Ge Geer picked up the phone and clicked on the software, and dozens of authorization requests popped up instantly.

Ge Geer was not surprised, after all, this software itself is the hub for controlling other software. Without the built-in system, authorization requirements are mostly normal.

"Agree and agree, both agree!"

Tired of tapping, Ge Jier finally opened the software. In an instant, a girl with three heads in ancient Chinese clothes stepped on a fairy sword and flew to the screen, showing a big smile at Ge Jier:

"Iamcomingoncegetyrcall.AreyoumyMaster?"

"Wow!!!"

Ge Jier was instantly conquered by this cute girl of the ancient style. Her expression was extremely vivid, the fairy sword under her feet shimmered, and she blinked hello to him playfully and cutely on the screen. It was completely 1080p HD images playing, and those stiff voice Comparing the assistants, they are totally different in one world!

"Master, what's your name? By the way, I don't have a name either~, Master can give me a name, and I will be with you forever."

"Alice? Okay, I will be called Alice from now on, I will always be with you, master~!"

"Master, what do you want Alice to do? Call? Send an email? Chat with friends online? Send a tweet, or suggest some videos you like? Hey~, master, your favorite Yes... please rest assured master, when there are people around, I will not tell the privacy of the master!"

"Master, it is detected that you have an unread email. Do you need me to read it aloud for you, or do you want me to summarize the content?"

Gergil, and the people around him were all stupid.

Let's not talk about the cute images of this voice assistant that are lively and interesting, and they are cute and playful with every smile, which makes people wonder how much original painting Baiyun Technology has invested in this. It is said that the human-computer communication is silky smooth. Without the slightest amount of stagnation, it was enough to make Gergil and Todd, and Xu Chunxue who didn't know it, opened their mouths in shock.

Chapter 1773: Ding, lithium battery technology

Gergil often only uttered half of the sentence. The name he named Alice, a common name in the West, represents the image of a dream princess. It can guess what the owner said and prepare accordingly.

Gergil couldn't feel the slightest uncomfortable place at all, so he chatted and talked like his secretary, no, even smarter and reacted faster than his secretary!

He used his hometown accent, used blunt Chinese, and used the language of a certain small country. Alice was able to change language to communicate with him in time. He even imitated Gergil's voice with great interest, and spoke in blunt Chinese, with all expressions and tone. Very cute.

"Ohmygod! Ohmygod!"

The more you try, the more shock, excitement, excitement, and fear of Alice are born to Gergil!

This is no longer a voice assistant, but a living artificial intelligence, a terrible technology that can change the world's technology circle, no, change all mankind!

It can be said that anyone who is sensitive to technology can feel the horror of "Alice"!

The scene is audible, and everyone is silently thinking about what this voice assistant really represents.

Money, wealth, power, change, waves, new age, productivity revolution, and war and death!

Ge Geir glanced at Ren Huafei. He knew that the boss had a cooperation with Huang Xuanguo's military department, and this artificial intelligence technology was likely to provide support for Huang Xuanguo's drone.

future.....

"not bad."

Li Yun broke the silence and smiled slightly: "This voice assistant is better than I expected. Wu Ke, you guys did a good job!"

Wu Ke smiled and did not speak.

This technology is completely provided by Li Yun, he just commercialized it.

"Mr. Li Yun." Todd did not try any more. He was completely convinced and gave a gentleman's gift to Li Yun. He said with humility: "I think the cooperation between Baiyun Technology and Rolls Royce will definitely change the whole world. I can't wait to see that scene!"

"The cooperation between Baiyun Technology and BMW is the same!" Ge Geer said strongly.

The two were friends at first, but at this moment, the two for the benefit of the two turned their faces in an instant.

As long as they reach a cooperation intention with Baiyun Technology, their status in their respective companies will inevitably rise a lot, and it is not impossible to become a member of the board of directors!

After all... the technology of Baiyun Technology is too exaggerated!

"Ding, the host makes a choice, knocks on the mountain and shakes the tiger, drives away the arrogant foreigners, sincerely cooperates with a win-win attitude, rewards experience value +10

million, intelligence +10000, golden gift bag\*1, and can get a generous return (5,000 100 million or more profit), additional reward: all-solid-state ultra-density lithium battery technology."

Although the contract has not been formally concluded, the system has directly issued rewards. Li Yun saw an extra hard drive in his inventory, which should contain a brand-new lithium battery technology.

"Don't worry, there are both, and both, as long as they cooperate sincerely, Baiyun Technology will always come!"

Li Yun, who had obtained another big money-making technology, smiled and assured the two of them that he didn't mean to refuse to cooperate in the slightest.

If Li Yun has only one autonomous driving technology, then monopoly is the best choice, so that he can earn the most benefits.

However, Li Yun has a steady stream of system reward technology in his hands. Through cooperation with companies in other countries, he can break down the possible obstacles of other countries, quickly open the markets of other countries, and harvest money in the shortest time in exchange for other necessary resources.

Chapter 1774: Husband is so handsome

When other countries did not react, they continued to roll out the second technology to harvest wealth quickly again.

By the time they realize that they will resist, Baiyun Technology has grown into a giant, and the products produced have become necessities of the people. At that time, even if the state level intervenes, Baiyun Technology will have the confidence to withdraw directly.

Foreigners who have enjoyed high technology can tolerate other backward technology products?

Obviously impossible.

At nine o'clock in the evening, a special meeting was held in the Baiyun Technology Conference Room.

In addition to a bunch of senior executives of Baiyun Technology, several shareholders, Li Yun, Fang Xue, Gong Qingyu, Su Muxin, and heads from state-owned banks all participated in the meeting by telephoning.

Specially invited guests include the Sage Fanqing, and two foreigners also attended the audience.

"Huh, bad guy Li Yun."

In the villa community of Longyang County, Fang Xue, who is wearing a formal suit on the upper body and home hot pants on the west body, revealing his big white legs, is full of resentment, and at the same time looks at Li in the video with deep admiration. cloud.

She was a little surprised when she was invited to the video conference. After all, Li Yun rarely went to the company, and even less attended corporate meetings.

Even Fang Xue knows that Gong Qingyu drew a picture of the intelligent voice assistant, that is, the three-headed girl who is stepping on a flying sword and wearing an ancient style.

But Li Yun didn't know at all, running around outside all day.

"Obviously, the market value of the company is ten times higher than ours!"

Fang Xue murmured, making Fang's mother who was bystander dumbfounded.

"Xiaoxue, your husband, how much is the market value of my good son-in-law's company?" Fang's mother asked in disbelief.

"Three or four thousand, right?"

Fang Xue's unsure answer made Fang's mother speechless again.

Half a year ago, Li Yun was still an indeterminate kid, and the gap between him and their Fang family was completely different.

But after only one semester, the situation was completely reversed, and Li Yun stood in the sky, and the Fang family had to look up at him!

"Xiaoxue." Mother Fang's eyes were complicated, "I remember that you also have shares in Baiyun Technology? Is it 3%?"

"It used to be, now it's only 1.5% after financing"

"1.5... Then there are billions of assets."

Mother Fang made a rough calculation and found that the world had become unreal.

If you tell his husband that the assets of the two good daughters, Xiaoxue, are now close to the total assets of the Fang family, his husband and those relatives of the Fang family shouldn't be crazy?

I'm afraid it's not going to come over frantically to curry favor with Xiaoxue and get a piece of the pie. After all, Li Yun's company is still on the rise, and there is a return on investment, which is far from what Fang's stagnant water can compare.

"Hehe, mom, don't think about it, I don't care about money at all now!"

Fang Xue smiled secretly in her heart. If her mother knew that Li Yun had a fairy mansion and there were countless elixir and elixir, she wouldn't know how she would be surprised.

"The meeting has started. Mom, you can also listen to it. Today's meeting is not confidential."

Outsiders of the company's meeting are certainly not allowed to attend, but since there are two foreigners who have participated in the meeting today, it doesn't matter.

The mother and daughter sat in front of the computer, watching the meeting convened by Li Yun.

Fang Xue's big beautiful eyes stared at Li Yun in the video Li Yun. At that huge conference table, there were dozens of executives participating in a meeting. Every executive was worth more than 10 million yuan. A business elite who can assume leadership positions in any company.

But now, they are sitting in the lower position, respectfully waiting for her boyfriend to start talking.

"My husband is so handsome~~~"

Fang Xue put her hands on her chin and looked at Li Yun in the picture with a smile.

## Chapter 1775: The only chairman in the world

At this moment, Li Yun, accompanied by the cold saint, did have a kind of reprimand, the excitement that the world is only in his grasp, his heart is full of pride, and he wants to make the world tremble under his feet, and countless people sing praises to him .

"I am very happy and ashamed to meet with you tonight."

Li Yun smiled and apologized to his employees first, saying that it was a shame that he had convened an executive meeting just after nine o'clock.

"No no, you don't know the chairman, we haven't got off work yet!"

"Hahaha, it's okay. As the leaders of Internet companies, it's normal to get off work at 11pm."

"After knowing that the chairman is coming this afternoon, we have been waiting for your call!"

A group of executives accompany the smiling faces, which is actually true.

Not to mention the 996 normality of Internet companies, but the chairman's call, they have to climb over to the meeting at 3 o'clock in the evening.

After all, the Internet is changing rapidly, and it is normal for a meeting late at night to make a decision and make an announcement the next day.

"The main reason is that our chairman is too busy." Wu Ke teased and said with a teasing smile: "After all, our chairman is going to take the college entrance examination and is taking the time to review it. You have to understand!"

"Ha ha ha ha!"

A group of people couldn't help laughing crazy.

Not to mention that they have never experienced it, even in the field of millions of companies around the world, there are not many examples of the chairman taking the college entrance examination. If you add a limit, a company with a market value of more than 500 billion, then a finger is It can be counted.

Well, yes, only the chairman of Baiyun Technology is the only one who has to take the college entrance examination!

"It's nothing for me to take the college entrance examination." Li Yun said with a smile: "It's mainly this saint from the Hidden Sacred Valley, Miss Fanqing Sheng. She also wants to take the college entrance examination. That's truly shocking!"

"...?"

Many executives looked at Fan Qingsheng with doubts. To be honest, apart from the shocking beauty, they didn't even understand what the chairman said.

What is the Hidden Sacred Valley? What is the saint? Why is she shocked by taking the college entrance examination?

"what?!"

Fang Xue, Su Muxin, Gong Qingyu and others were really shocked.

Fan Qingsheng also participates in the college entrance examination?

A cultivator from the Hidden Sacred Valley, a genius in Taoism, a peerless powerhouse in the Return to Void Realm, and a saint at the top of the world, she actually wants to take the college entrance examination? !

For a while, no one spoke.

Sage Fanqing glanced at Li Yun, but didn't say a word.

"...Well, just kidding."

Li Yun smiled slightly, skipped the incident, and signaled that Xu Chunxue, the head of the personnel department, could start speaking.

His intention just now was simple, he just wanted to know if Fan Qingsheng would like to make more friends.

Before, Li Yun had never introduced others to Qingsheng, and she had no intention of knowing more people, and she remained silent most of the time.

But Li Yun didn't know if she really didn't want to know others, or said she was embarrassed to meet, so he brought the topic to her.

The result is obvious, Fan Qingsheng's personality is very cold, even if Li Yun let her know other people, she is unwilling.

"Forget it, I won't force her, Qingsheng's character is like this."

Forcing an introvert to become cheerful is likely to make him depressed. Naturally, Li Yun would not do that.

"Everyone."

Xu Chunxue stood up, holding a document in her hand, and said to everyone: "Before the chairman has appointed a secretary, I will temporarily serve as the secretary of the chairman. Next, I will announce the two members from the chairman and the president. Decide."

Chapter 1776: Two decisions

Xu Chunxue's temporary secretary position was proposed by Wu Ke. Li Yun felt that it was not good to trouble him all the time. In addition, Xu Chunxue was accompanied all the way just now. She also knew what had happened, so she decided to follow the boat.

A group of executives' eyes flashed with surprise.

As the head of the personnel department, Xu Chunxue's position is not high or low. Under several presidents, but also lower than the heads of some important departments, he belongs to the department doing chores.

After all, senior executives are interviewed by Wu Ke personally. The personnel department is only involved in the appointment of middle-level leaders. In addition, Baiyun Technology is a technology-driven company, and the personnel department is even more marginal.

But now Xu Chunxue has become Li Yun's secretary, plus her position as the head of the personnel department, the future development prospects suddenly become different!

"Tsk tsk, I just took the chairman to visit the company once, and I got such a big benefit... I have to say, luck can't stop it!"

Many executives expressed their envy.

"The first decision:"

Xu Chunxue suppressed her inner excitement and spoke at the first meeting of all executives with the participation of the chairman, which gave her a sense of complacency and excitement. Although she is in her thirties, her career has just started!

"The company will establish a comprehensive strategic partnership with the BMW Group."

Many executives are refreshed!

Comprehensive strategic cooperation, the meaning contained in this sentence is too great!

It is not a simple authorization and cooperative development, but a comprehensive community of interests relationship, so that the two companies become partners working side by side!

For the newly established Baiyun Technology, which has not yet come up with any product, strategic cooperation with a world-renowned car company such as the BMW Group is completely sky-rocketing, and all the investment money can be turned into actual influence. Let the market fully recognize the value of Baiyun Technology!

Moreover, the market value of the BMW Group is more than 100 billion M yuan, which is about one trillion yuan in market value. Baiyun Technology has completely climbed BMW.

"The second decision:"

What? !

All the executives who were ready to listen to the details of the cooperation with BMW were all dumbfounded.

Why did you skip a sentence?

Shouldn't it take at least a whole night to discuss such a major event as the establishment of a comprehensive strategic cooperation with a well-known multinational car company like the BMW Group! ?

The executives have even made preparations all night, and must come up with a contract of intent as soon as possible and sign it with the BMW Group.

But now, the new secretary to the chairman of the board, just skipped it in one sentence?

"The company will establish a comprehensive strategic partnership with Volkswagen Group!"

The executives were dumbfounded.

First BMW, then Volkswagen, these two are the top ten top car companies in the world, and they are actually cooperating fully with Baiyun Technology at the same time? (After checking the information, Rolls-Royce is owned by the BMW Group, so the other company was changed to Volkswagen.)

Could it be that... the company's autonomous driving has really achieved results! ?

In a high-end apartment in Zhonghai City, Su Muxin in front of the computer smiled crookedly. The speed of Baiyun Technology's growth is incredible. She is not ready to become president before graduating. Brother Li Yun and her company have already cooperated with BMW. The cooperation with top car companies like Volkswagen is really fast.

"Brother Li Yun is the most handsome~~~!"

Looking at Li Yun at the abbot meeting on the screen, Su Muxin had the same feelings as Fang Xue from Longyang County, and her beautiful eyes kept staring at him gleamingly: "Wait for a nice dress and watch the video with Brother Li Yun. Hehehe~"

Chapter 1777: Trifle

After the two decisions were announced, the conference room was quiet, and the executives of Baiyun Technology were obviously shocked by the two news.

Gergill from BMW Group and Todd from Volkswagen (renamed Rolls-Royce to Volkswagen), the two showed their faces.

They were hit by the new technology exposed by Li Yunzhan before, and now I think about it, the companies behind them are all top auto companies, so why do they bend their knees to a new company?

Hmph, when it's their turn to speak next, you must take a high posture, lest Baiyun Technology thinks they are here to beg!

"Okay, Director Xu, you can sit down."

Li Yun pressed the palm of his hand and motioned to Xu Chunxue to sit down.

When everyone turned their gazes, Li Yun said: "Next, let's move on to the next topic, about the relationship between..."

"Wait, wait!!!"

Gergil yelled, with a dumbfounded + unbelievable expression, and stared at Li Yun: "I haven't spoken yet, and, Mr. Li Yun, did you forget to introduce your company and the BMW Group? Details of cooperation..."

The more he talked, the quieter his voice became. The inexplicable aura from the chairman of Baiyun Technology, as well as the autopilot technology and smartphone technology in his hand, made Gergil feel guilty again.

"Do you want to introduce this little thing?" Li Yun looked at him "surprisedly": "I thought I just need to announce it, and then let someone talk to you tomorrow, and then find a time to develop the conference and sign the contract. "

The executives looked at each other.

Establishing a comprehensive strategic partnership with the BMW Group is just a small matter in the eyes of the chairman?

Ge Gil didn't dare to speak with an expression on his face, but he couldn't help muttering, "I won't give an introduction, so why am I here to attend this meeting?"

Li Yun heard what he said and smiled and said, "Okay, it's my first abbot meeting that was not thoughtful enough. Mr. Gergill, you can talk about cooperation in a few minutes."

He doesn't love mother-in-law meetings. When Li Yun wants to come to a meeting that can end in ten minutes, it's best to end it in eight minutes, so that he can continue to date with Fan Qingsheng.

"cough!"

Gergil stood up, cleared his throat, and restored his momentum as the president of BMW's Huangxuanguo branch. With a smile on his face, he said in passionate, looking forward to the future, but blunt Chinese:

"The BMW Group is a great company with a history of more than 100 years. We have been from..."

It's silly, I've spoken a lot of Chinese mixed with English, and Li Yun's brain hurts. Are you here to show off BMW's glorious history or to talk about cooperation?

Sure enough, this foreigner should not be allowed to speak at the meeting!

"I believe that the cooperation between Baiyun Technology and BMW Group will definitely bring both parties...BMW is definitely the best partner of Baiyun Technology!"

After talking eloquently, without waiting for Ge Geer to sit down, another foreigner, Todd from Volkswagen, stood up and said: "The Volkswagen Group had 250 billion euros in revenue last year. It was BMW's. three times!"

Many executives glanced at each other, their faces full of shock.

250 billion euros, the currency of Huang Xuanguo is nearly two trillion yuan, which is ten times the current market value of Baiyun Technology!

If Baiyun Technology's cooperation with BMW is already a high climb, then cooperation with the Volkswagen Group is nothing more than a sparrow climbing the phoenix.

Chapter 1778: One more cooperation

"Huh! Revenue? Someone is embarrassed to talk about revenue."

Gegel is not to be outdone. "Your Volkswagen's revenue is high, but your market value is only half of your revenue. It can be seen that capital is generally not optimistic about Volkswagen, so Volkswagen can't wait to find a new way to reverse revenue and revenue. The situation where the market value gap is too large."

"Sh\*T! Gergil, your BMW company is not much better than ours. Your profit in last year's financial report fell wildly..."

The two were originally friends, but also a business competition partnership. Knowing the roots and knowing the bottom line, the quarrel is really full of inside stories, making the executives and Fang Xue and others call it exciting.

"All right."

Li Yun smiled slightly and stopped the quarrel between the two of them, and said: "My vision in terms of cars is: in the future, every car worth more than 50,000 on the road will be equipped with an automatic driving system from Baiyun Technology. Do you understand what it means?"

"understand!"

"not understand."

Gergil and Todd nodded in surprise. The one who didn't understand was...

"Uh, Qingsheng, let me explain to you."

Li Yun's expression turned awkward, and he didn't expect that the Fanqing Sage would take the initiative to ask.

Li Yun's meaning is also very simple. It is to let the two companies stop quarreling. In the future, each car produced in the world is a potential resource. It needs two companies to open up the relationship between countries and let Baiyun Technology's autonomous driving. The system occupies more markets, and strives to turn the cars running on the global roads into Baiyun technology related!

If BMW and Volkswagen can't do it, Li Yun doesn't mind looking for other companies to cooperate.

Fang Xue looked at Saint Fan Qing with a weird expression. She really didn't expect that the Saint would appear in the company's meeting room. What is the relationship between Li Yun and her?

"Chairman Li, what do you mean...?" Gergil asked cautiously.

"Eat the cake together, and make money together, except for those companies that went out before."

Li Yun knew that what he wanted was exclusive agency rights abroad, at most, to eat with the public, but Li Yun did not want to be restricted. What he wanted to do now was to roll out the market as soon as possible. Both of these companies are one company. For countries, entering other countries to open the market will inevitably encounter the problem of bad soil and water.

However, Li Yun didn't bother to deal with these trivial matters, and asked the executives to discuss the details of the contract. Isn't that their job?

"The second thing is also about cooperation."

Li Yun turned his head and signaled Xu Chunxue to invite someone to the president's office. The large conference room was connected to the president's office and Wu Ke was inside.

"It's cooperation again!"

The executives have raised the spirit of 120,000 points one by one, and they have reached initial cooperation intentions with two large companies tonight, which has shocked them.

It is foreseeable that they will work overtime in the next half month, discuss various details of cooperation with the two companies, and then finalize the detailed contract.

Another company talks about cooperation with Baiyun Technology... They will be exhausted!

However, when the executives saw Xu Chunxue leading the two people out, they were still scared when they were mentally prepared.

"President Ren!"

"It's President Ren!"

"It's actually President Ren!"

An exclamation sounded, and I have to say that Ren Huafei's reputation is too great.

It can be said that as long as they are mixed in Huang Xuanguo's business circle, they have heard of his name, and are as famous as Xiaojiao's father Su Tengyun, and another Baowutong chairman Zhou Fuma.

Chapter 1779: Su Tengyun's sense of urgency

"Good evening everyone."

Ren Huafei smiled and greeted the shocked Baiyun Technology executives, and said: "I only arrived at Baiyun Technology this afternoon. I talked a lot with your president and chairman without stopping, and I also felt a lot.

The feeling that Baiyun Technology gives me... is that a company has already been on a great road, and it will definitely lead to a greater company! "

Everyone was fooled by this flattery.

Dignified as the chairman of the technology group, Ren Huafei is the general manager, and they actually flattered Baiyun Technology?

Li Yun smiled and said: "I don't know if it's great or not. I just hope that Baiyun Technology will become a technology-led company that will bring changes to Huang Xuanguo and the world, just like Mr. Ren's company in the future!"

Yes, both sides flattered each other!

Su Muxin puffed up her small mouth. It was obvious that her father was also very good, so why didn't Li Yun flatter his father-in-law?

"However, Brother Li Yun actually brought Ren Huafei to discuss cooperation... No, I want to tell my father."

The science and technology circles are changing rapidly. Knowing the news one day earlier and one day later are completely different.

So Su Muxin decided to call her dad Su Tengyun and tell him this information!

"...Why did you call me so late? Missing your mother and me?"

It was Mother Su who answered the phone. Su Muxin couldn't care about acting like a baby with her mother, and quickly said: "Mom, Mom, I and Brother Li Yun's company has something big!"  
"?"

"It's Baiyun Technology. Brother Li Yun invited Mr. Ren. They are now discussing cooperation. Oh, Mr. Ren has announced that Zhongwei has launched a new generation of mobile phone models and reached a comprehensive cooperation with Brother Li Yun's company. The two parties will jointly develop a new era of artificial intelligence mobile phones!"

Su Muxin spoke without beginning and ending, but Mama Su could probably understand her words. She was shocked and she picked up her mobile phone and went to the study to find her husband.

"...Artificial intelligence?" Su Tengyun frowned deeply after listening, with a sense of urgency that a great era was approaching.

Just like the mobile phone era in the past, when he was fidgeting and eager to launch a new product to occupy the mobile terminal.

Fortunately, Nantian Technology seized the opportunity, launched the Q letter, and once again mastered the social circle.

And Qianqun in another BAT is not so lucky. They are lagging behind in the field of mobile phones, so that the current market value is only less than one-tenth of the Nantian Group!

Therefore, any turmoil in the technology circle, Su Tengyun, the chairman of the Nantian Group, must seize it. If he falls behind, the market value of the entire group will shrink substantially.

Su Tengyun immediately came to Su Muxin's study with his wife to attend this special public meeting of Baiyun Technology.

"...Baiyun Technology has unimaginable artificial intelligence technology, and Zhongwei is willing to cooperate with such a company!"

In the video, Su Tengyun saw Ren Huafei's familiar face, and his red-faced speech fully expressed his confidence in the next cooperation.

Finally, President Ren announced: "The Honor mobile phone series is about to end, and the new glory is set sail. The next generation of the Honor series will be equipped with artificial intelligence from Baiyun Technology. I believe that the new Honor AI series will become The first choice for many people for work and study!"

Happiness!

Many executives of Baiyun Technology clapped, Li Yun couldn't laugh or cry. A good-looking Baiyun Technology conference was turned into a Zhongwei company mobilization meeting by Ren Huafei, which is enough to see the general reputation.

Chapter 1780: Sister Qingyu

Su Tengyun frowned and looked at Ren Huafei in the video, and said to himself: "Allowing Mr. Ren to visit in the middle of the night, and decide to open the new generation of Honor mobile phone

series without a board vote. It shows that Baiyun Technology has a high level of technology. Enough to let him put down his identity and make a decision on the spot!"

Seeing her husband thinking hard, Mother Su whispered: "Should I ask Muxin's girl to give us some information? Anyway, she is now a shareholder of Baiyun Technology, and Xinxin and Li Yun are also boyfriend and girlfriend...I Meaning, this meeting is not confidential either."

Thinking that Li Yun hadn't been recognized by her husband, Su's mother changed her words, but Su Teng Yunquan didn't hear it.

"Do not."

Su Tengyun shook his head and smiled bitterly: "If it's a general company, Xinxin might know something inside, but Baiyun Technology...this company is not that simple!"

Su Tengyun sighed with emotion, so that his wife rolled his eyes and groaned: "Somehow, I don't know what you said... Forget it, you don't fight, I fight!"

Su Muxin is not at home, she bought an apartment near China Overseas University, which is convenient for school, and she can go back to the apartment for a nap at noon.

The video that Su's mother and Su Tengyun were watching was shared. After the phone call, Su Muxin quickly connected.

"Hehe, that's it, it's not easy! Brother Li Yun is the son-in-law of your two elders, so let him tell some business secrets~!"

Su Muxin patted her chest and agreed with pride. Li Yun has not yet been recognized by her parents, but she can say with certainty that Li Yun will surpass her father's company soon, and even if her parents object to it, there is no reason to object. NS!

As for the confidantes of Brother Li Yun... Anyway, Su Muxin felt that she would not lose!

"You don't even know?" Mother Su was a little surprised. Didn't this girl say that she has been participating in Baiyun Technology's affairs and is preparing to become a female president in the future?

"Woo~"

Su Muxin's cute little face collapsed, "I can't blame my mother, people only know that they are in the group saying that they are planning to build a mobile phone smart voice program. Sister Qingyu drew a very cute Q version of the program for the program. More I don't know anymore. I have been studying recently, preparing to go abroad next year..."

Speaking of this, Su Muxin was a little bit disappointed. Originally, if Brother Yun came to Zhonghai University next semester, she would be able to love him, sweet and sweet.

Unfortunately, she decided very early to study abroad in the next semester or third year of her sophomore year to increase her overseas knowledge.

Although Su Muxin also wanted to go to university with Li Yun's brother, in order to successfully become the female president of Baiyun Technology in the future, she could only reluctantly separate from Li Yun's brother.

"Mobile phone smart program...wait, sister Qingyu?!" Mama Su keenly caught a trace of abnormality. When did her daughter recognize a sister?

"La la la, nothing~~ I don't know anything! Alright, alright mother, let me ask your good son-in-law and see if he can give me a message, hehe~!"

Su Muxin hung up the phone quickly. At the last press conference, she added Gong Qingyu's friend Q letter. After learning that Gong Qingyu, who has a high IQ, had no intention of being a female president, Su Muxin became active and planned to cooperate. She lays a good relationship for the future...

"Next, I will announce the last decision!"
