

# GODLY CHOICE SYSTEM

## Chapter 2: Ding, get two newbie gift packs

Li Yun opened his mouth wide in shock, his heart beating wildly.

There is really a system in the world, and it is bound to him!

In this way, he will soon become the CEO, marry Bai Fumei, let his sister and twin sisters live a happy life and reach the pinnacle of life?

"Student Li Yun, concentrate on doing the problem!" The physics teacher frowned slightly. Is this student stupid?

"Yes!"

Li Yun replied in a loud voice, making the boring classmates in the classroom look sideways.

"What is he doing?"

"I think it's crazy, right?"

"Hehe, I'm absolutely confused, this trash family is very poor."

Li Yun ignores these bad relations with him, and despise the discussions of his classmates. With the god-level selection system, he wants these people to look at him with admiration!

"A, B!"

Li Yun carefully wrote down the answers on the test papers and made the choices given by the system.

"Ding, the host has made a choice, and the reward (novice gift package\*2) has been issued, please check it."

Suddenly, two packages appeared in Li Yun's mind, and the two newbie gift bags had been stored in his inventory.

"Open the newbie gift package!" Li Yun chose to open it decisively. Whether he was visualizing or not, it depends on what the system rewarded him at this moment.

"Ding, the opening is successful. Congratulations to the host for acquiring all the subject knowledge from elementary school to high school."

In an instant, countless knowledge poured into Li Yun's brain.

From junior high school functions, to high school collections, numbers, and derivation, from junior high school biological producers, consumers, etc., to high school biological cloning, platelets, hematopoietic stem cells, and so on.

Including all the knowledge of high school physics, Li Yun grasped everything in an instant.

Li Yun looked at the test paper in his hand again, and almost came up with the answer to a fill-in-the-blank question in the blink of an eye.

"I'm Cao, the system really breaks!"

Li Yun was so excited that he temporarily put down the second novice gift package and tried his best to do the problem!

The three subjects of physics, biology, chemistry, and science and synthesis are assembled in one test paper. Li Yun had a headache before, and now he can get the answer with a glance and a little calculation.

Only the final finale made Li Yun think for a while.

"My Cao? Really?"

The students around saw that Li Yun's whole spirit was refreshed, and he wrote on the test papers and drafts, just like those rich second-generation + schoolmasters in the experimental class are so awesome!

"I think it's fake. Li Yun's poor family is going to jingle, and he still has to work at night, so how come he has time to study?"

"Hehe, I can roll the dice too."

"Brother is awesome, move the test paper aside and show me to grandpa too?"

Everyone was whispering because of Li Yun's performance. The teacher frowned and glanced at Li Yun, drinking to stop the commotion in the classroom.

After the classroom was quiet, the physics teacher walked up to Li Yun. He didn't believe that this student who could sleep in the examination room would write a comprehensive question!

"what?!"

Just one glance, the physics teacher's eyes are almost staring, and they are all right?

When he was boring during the proctoring test, he roughly did a question in his mind and compared it with Li Yun's answer. The other party's answer turned out to be exactly the same as his mental arithmetic answer! ?

"How is it possible..." The physics teacher looked shocked, "Is this student a genius, so he only got up for the exam after a nap?"

Seeing the teacher's expression, the students were dumbfounded. Will Li Yun really do this topic?

Some people who want to cheat are ready to move.

"Hey, show me the test paper!"

Li Yun's chair was kicked behind him, and he turned a deaf ear to it, and finished answering in a fluent manner, and passed away in advance.

"You are paralyzed, I dare not listen to what I said, I think you are impatient!"

Sitting behind Li Yun, the menacing-looking students also turned in their papers, and the two walked out of the school one after another.
