

Godly Choice 3111

Chapter 3111: See also Mu Yongkang

"Everyone, go in first..."

When Li Yun was about to invite the business owners to enter the Baiyun Technology Building, a few people came in the distance. The handsome man headed by him was Mu Yongkang who Li Yun met yesterday.

Unexpectedly, he was also included in the invitation of Baiyun Technology. No, no, there are many people who can be invited by Baiyun Technology, but every one of them is a very important person. The rest are sent in the form of invitations. Who can get it? Who Can come to participate in this grand event.

It is said that in the business circle, an invitation letter has been fired up to 100 million yuan, and can meet with the heads of the world's top companies. Participating in this kind of event can attract billions of dollars of investment just by speaking out.

Li Yun stopped speaking and watched Mu Yongkang walking step by step with a smile on his face.

Shan Ruqing next to him also looked at him with a cold face, holding Shan Xiaoxiao's hand tightly in her hand-Shan Xiaoxiao was also the only child participating in the event today, which attracted the attention of many people.

"You... actually came too!"

After Mu Yongkang saw Li Yun and Shan Ruqing, his face changed slightly.

In order to participate in this press conference of Baiyun Technology, he deliberately changed several layers of relationships and entrusted a lot of talents to spend 50 million to buy a very ordinary invitation letter. I thought that after this press conference, he would find another opportunity. Take a photo with the real bigwigs in the business circle, and act as a boasting capital in the future.

Unexpectedly, I ran into this man in front of the Baiyun Technology Building!

Li Yun smiled and said: "If I don't come, this conference will not go on."

The surrounding business leaders all looked at him with shocked eyes, thinking about this kid...like Su Tengyun's son-in-law? What's the matter with this kid? Did the words pass through your head? !

If you don't come, the conference won't go on? Do you regard you as the most important guest? !

Mu Yongkang was obviously shocked by these words for a moment, and he didn't know what to say for a while.

"Oh, right."

Li Yun said, "Since you have come with the invitation letter, it is not convenient for me to drive you away, but I will remember to be safe later, understand?"

"Chichichichi~"

Shan Xiaoxiao, who has always wanted to be quiet, looks like a little lady. Now that she heard her dad's words, she finally couldn't help but laughed out of her mouth. The small laughter attracted the attention of many people. Everyone saw her. All frowned afterwards.

Why are you bringing a child here!

"Shan Xiaoxiao!!"

Mu Yongkang's voice grew a little louder, and he turned his head and shouted to Shan Ruqing: "How do you bring her here? Do you know what the occasion is? It's too shameful!"

Shan Ruqing looked at him as if he was watching a jumping clown.

Mu Yongkang showed apologetic expressions to the big men of Su Tengyun again, "Mr. Su, Mr. Xiao, sorry, my name is Mu Yongkang, these two..."

"no."

Shan Ruqing interrupted him coldly, "I have nothing to do with you, and what I do is naturally approved by the owner here, and it is not your turn to give pointers."

"Little, don't talk to him." Shan Ruqing hugged her daughter tightly.

The big crowds onlookers were all dumbfounded.

They even suspect that they are not here to participate in a product launch that affects the world, but to participate in a dog-blooded grudge.

"Chairman, chairman? Ah, here it is!"

A middle-aged woman wearing a professional skirt and high heels hurried out. When she saw Li Yun, her eyes lit up, she immediately greeted her, bowed and saluted, and made a please gesture: "Chairman, sorry, I'll come. It's late to meet."

Chapter 3112: Global convergence

Her name is Xu Chunxue, she is the vice president of the personnel department and Li Yun's temporary secretary.

But no one knew her identity.

Mu Yongkang even showed a sneer of disdain, the current chairman is too worthless, and any small company with a million or more can claim to be chairman.

"Uncle, father-in-law, shall we go up together?"

Li Yun greeted Su Tengyun and Xiao Tianyuan, and entered the Baiyun Technology Building together with all the business leaders who were full of doubts.

The lobby is full of people and there are four elevators in the building, but it can't hold so many well-known figures from the business, political, and press circles all over the world gathered here. Crowding is inevitable.

Mu Yongkang even saw a foreign retail giant with a market value of RMB 3 trillion, who could only stand in the lobby and slowly line up. He seemed inconspicuous among the crowd, and he did not dare to complain about Baiyun Technology's arrangements.

Originally, this kind of global gathering of large-scale events was to prepare a superior venue for everyone. After all, the people in this hall are all celebrities. When they gather together, it is more than enough to negotiate an agreement that affects 50% of the global economy.

But when Wu Ke asked where Li Yun was going to develop the conference, Li Yun said that at Baiyun Technology Company, it was the previous tradition, and secondly, he was also the first time to come to the new headquarters of Baiyun Technology, so he took advantage of this opportunity. Take a stroll.

Therefore, even the board of directors and executives of Baiyun Technology do not know why President Wu Ke insisted on developing the conference in the Baiyun Technology Building.

Fortunately, the banquet venue in the evening is elsewhere, otherwise this decision will definitely be opposed by the executives collectively.

"Chairman, go here!"

Xu Chunxue respectfully led the way, passed a group of big businessmen, jumped directly to the elevator used by today's exclusive Baiyun technology personnel, and opened the elevator.

This elevator was originally used exclusively by the company's management to save their time, but today it was forced to let it out. Baiyun Technology only uses one elevator.

"Hey?"

The bosses who came with Xiao Tianyuan and Su Tengyun were all shocked, and the VIP elevator? !

"Everyone, I'm going one step ahead, let's talk when we go up!"

Su Tengyun laughed and followed Li Yun, bidding farewell to the group of people, Xiao Tianyuan did the same, jumped in directly, and did not go with the group of real estate owners.

This group of bosses, the people around them, and Mu Yongkang were all stunned.

Can you jump in the queue?

Unfortunately, when some foreigners under the leadership of the translator expressed their intention to jump in the line, they were ruthlessly rejected by the front desk.

"Just now? That person just now was our vice president, Ms. Xu Chunxue. She is qualified to bring people in."

The lady at the front desk met a lot of bosses today, and her pretty face remained expressionless, "If you also want to jump in the queue, please contact our president, vice president, or the head of the public security department."

Today's Baiyun Technology Company has become a pivotal company in Huang Xuan, and the Ministry of Public Security is the top priority. It is stationed by two secret forces for a long time, and dozens of agents have hidden their identities and work in Baiyun Technology for a long time. Be sure to protect them. The security of Baiyun Technology will not be mixed in by foreign commercial spies.

In other words, the minister of the Ministry of Public Security is no worse than a general, and is not under the control of a certain vice president of Baiyun Technology. He only listens to the orders of the president Wu Ke and the chairman of the board.

Chapter 3113: Senior third chairman

At the press conference on the 36th floor, the secretary was surprised again.

They actually got the forefront position among the rows of seats!

Although it is only a corner, it is also the front row after all!

The secretary looked around carefully with fear and trepidation, and found that behind her were the president of Fruit Machine Ku Ke, the former president and founder of giant hard, Ge Ci, the president of Yulin Technology and so on.

These multinational groups with a market value of more than five trillion yuan, one by one, can be called giants, and they are all ranked behind her!

In front of the secretary lady, in the middle position, there are Huang Xuanguo's official personnel, each of them is at the capital level, and the surrounding circle is Huang Xuan's top domestic company leaders, such as Xiao Mingzhu's father Xiao Tianyuan, Su Muxin's father Su Teng Yun, the local tyrant of Baowutong Company and so on.

By the way, instead of sitting with them, Xiao Mingzhu and Su Muxin chose to sit beside their father with an extra stool.

"The relationship between the organizer and Xiao Mingzhu and Su Muxin is also very good, right?"

The secretary complained in her heart, and then secretly observed the press conference site. There were nearly two thousand people. The pitiful Mu Yongkang could only sit at the end of the conference hall, not talking about the table in front of him, and he had to follow The reporters huddled together to make up the numbers.

She was observing everyone, and everyone was observing her side.

Because President Shan Li, who is next to Miss Secretary, has the only child in the audience, and whether it is Li Yun, Shan Ruqing, or Gong Lianyi (the daughters of Gong Qingyu have not come), their age is almost the same in the audience. Is the smallest.

Among the big men in the front row, they are absolutely young, belonging to the kind of special existence that is attracted to the past at a glance.

Even many senior executives of Baiyun Technology are whispering, not sure how Secretary Xu Chunxue arranged it. Fortunately, Wu Ke, who was sitting at the forefront, did not express any objections, and they did not speak too much.

Because even if they are executives of Baiyun Technology, they know little about this company, which has close ties with the country, and is almost a state-owned enterprise. They don't even know how to develop several epoch-making products launched by the company.

Therefore, everyone at Baiyun Technology feels that the chairman and the president and the decision-making team are quite mysterious. They are the top secrets of the country and cannot be easily inquired. Once they know, they will be arrested.

Time came to two o'clock in the afternoon, and the press conference officially began.

As the first person to follow Li Yun, Wu Ke is also the manager and scheduler of Baiyun Technology's daily work. He is a perfect host for the press conference.

Therefore, this middle-aged man, who has become more and more chic after his transition from technical ceo to president, stepped onto the stage. He first said the opening remarks. After welcoming the guests, he immediately said: "I know many people and many executives and employees of our company. In the same way, we don't know who the chairman of our company is behind the scenes."

When everyone heard it, their ears immediately stood up.

Baiyun Technology has developed to dominate the world in just six months, but the final decision-making person almost never shows up. This has become a big topic on a global scale. Many people even speculate that the chairman of Baiyun Technology is Huang Xuanguo. There is no such thing as the chairman of the board.

Of course, many people don't understand, but some top technology companies or related bigwigs already know the identity of "Li Yun", but they have never met.

"Let's ask, Baiyun Technology's most mysterious, most powerful, youngest, and third-year high school chairman with the highest college entrance examination score, Li Yun, will give a speech on stage!"

Chapter 3114: Re-emergence

A series of "most" downs made the needle drop at the press conference audible. Only cameras from world-renowned media are still working silently, occasionally mixing with the sound of shooting cameras and flashing flashes, which proves that there are still people here. Alive.

Most people have this idea in their hearts: this is it?

The launching of epoch-making technology, stirring up the stock market, and almost causing the stock market to crash, the press conference of the dignified Baiyun Technology Company, is it so outrageous?

Not serious at all! !

In the back row of the crowd, Mu Yongkang faintly felt wrong, what did he hear?

"The third year chairman?!"

Someone shouted out the same thoughts as him.

Are you sure you are a third year in high school? Instead of other words? !

Mu Yongkang's heart jumped sharply, and he recalled in his mind that Xu Chunxue respectfully led Li Yun into the special elevator in front of the Baiyun Science and Technology Building, and called it the chairman of the board.

Could it be that.....?

"what?!"

"impossible!"

"what happened?"

The crowd became commotion, because they were surprised to see that a young man who was never more than twenty-five, or even his early twenties, walked onto the stage with a smile, stood on the podium, picked up the microphone, and turned around. Facing everyone.

"Hello everyone, my name is Li Yun, and I am the third year chairman of Baiyun Technology."

The smiling voice was so clear that everyone was stunned at the press conference.

A group of Baiyun technology executives sitting in the forefront, many of them said that it was the first time they saw Li Yun, and they were shocked.

The boss of his own boss, he is actually less than twenty years old, in the third year of high school? !

I used to hear Wu Ke talk about this nickname by chance, everyone just laughed, thinking it was the nickname of Baowutong, but I didn't expect... it was true!

Shan Ruqing looked at Li Yun with a complicated expression, suddenly thought of something, and turned to look behind.

Mu Yongkang's face was as she had imagined before, from shock to panic, and finally sweating profusely, his face turned extremely pale.

Offending the chairman of Baiyun Technology, this alone is doomed to his demise, no one can keep it, and no one dares to offend the world's most mysterious and powerful giant company!

Even if Baiyun Technology does not make a move, just the news spreads, and instantly global commercial companies will refuse to cooperate with any company under his name, even if they want to travel abroad, planes, ships, and all large private aviation and navigation companies will refuse. Serve him.

For at least thirty years, no one will dare to offend Baiyun Technology!

"Papa."

At the moment when most people were in shock, Su Muxin, who was sitting next to her father Su Tengyun, clapped first. The beautiful young girl had a happy smile on her face, cheering for her husband's performance.

Which girl does not want her lover to be a hero?

And Su Muxin and her husband are not only heroes, but also lead the world into the Aura era, and launched several black technologies that are destined to have far-reaching impact. Seven billion people around the world are waiting for the products of Baiyun Technology to be released.

So far, Baiyun Technology does not have a formal product, but it has already shocked the world, which is no worse than the aura of Penglai Island.

"Papa."

Sitting beside the real estate tycoon, Xiao Mingzhu also applauded gracefully, with a smile on her beautiful face.

The father next to them also applauded.

Chapter 3115: Another identity

Then Huang Xuanguo's official figures, some important figures from the capital, and several leaders of Zhonghai City also applauded.

Followed by some important foreign celebrities, such as the president of Pi Ruo Ji, the chairman of Yulin Company, etc., they have a lot of relationship with the beautiful country, naturally there are various channels to know the identity of Li Yun, but this is the first time Just see him as a real person.

After they applauded, the rest of the foreigners and reporters clapped together in a daze, but the expressions on the faces of these foreigners were not very attractive.

After all, Baiyun Technology... But it has swept the world, signing agreements directly with countries around the world, and having to send money to it, and also to send agreements, but also to send domestic technology, in exchange for Baiyun Technology's "Joint Development of the Next Generation" "Artificial Intelligence" contract.

The blood and tears, humiliation and anger are endless. It takes a whole contract agreement, hundreds of pages of technology exchange agreement, to silently narrate their embarrassment.

But the chairman of the Baiyun Technology Group, which makes them extremely uncomfortable, is actually a young man in his early twenties!

Huang Xuanguo was just hitting them in the face! !

What a shame!

Put a young man out of the bag, what is this?

They didn't believe in killing them. A young man actually created Baiyun Technology without Huang Xuanguo's figure behind him. They did not believe in killing them twice!

"What's the situation? What's the situation!"

Huang Xuanguo's business leaders clapped, with surprised and hypocritical smiles on their faces, but everyone's heart is probably full of question marks.

"Dad is amazing~"

There was thunderous applause in the audience, and Shan Xiaoxiao made her hands become red when she patted her, sitting beside her mother, and said happily.

Shan Ruqing no longer looked at Mu Yongkang, but turned to look at Li Yun. Her expression became more and more complicated. She was relieved to let go of the burden, and she was inexplicably panicked. Even she herself did not know why this happened.

Fortunately, the daughter is still by her side, so that she can be calmer.

"Everyone."

Li Yun made a stop gesture, and the thunderous applause stopped.

The flashlight reflected him like daylight, and after waiting a full minute, the excited reporters stopped taking pictures.

Li Yun glanced around the crowd, with a faint smile on his face: "Of course, besides the chairman of Baiyun Technology, I have another identity. Maybe you are more familiar with it."

"What status?"

Now Li Yun's words and deeds have attracted the attention of countless people. As soon as he spoke, someone suddenly asked out loud.

"My other identity should be quite famous. Just remind me that my last name is Li."

"plum!?"

Everyone flashed in their minds one by one. The foreigner first thought of Bruce Lee, but soon, the three words supermanLi came out, and they immediately felt shocked.

You can't be wrong, Li Chaoren, it's him!

"Yes, I am the person on Penglai Island who is called Li Chaoren by your media."

Li Yun raised his hand to draw out the Leap Fire God Sword, and the faint blue fire suddenly shocked everyone in the venue. After waiting for a while, he found that Li Chaoren hadn't changed anything before he felt relieved.

If this is Li Chaoren's sudden move, killing all the big business men present, the global economy will fall back 10% in an instant. It is not an exaggeration. All of you here are the presidents and chairman of the world's top companies, and their wealth is at least accounted for More than 20% of the world.

Chapter 3116: Li Chaoren

As soon as the Leap Fire God Sword came out, Li Chaoren's identity was confirmed, and he had the ability to control the flame flying sword at will in the world - at least most people knew that he was the only one.

"Huh?" Xiao Mingzhu was a little surprised. Her father next to her smiled and asked, "What's the matter? Seeing your boyfriend is so good, I don't think he is worthy of him?"

The daughter of dignified Xiao Tianyuan, unexpectedly one day is not worthy of a man, I am afraid that the world will also be able to be Li Yun.

"No, he is not good enough for me, I never promised to be his girlfriend."

Xiao Mingzhu's expression was calm, but there was a smile in his eyes, "I'm just curious, this guy is so afraid of trouble, but why is he exposed to public cameras? After today, he may not even be able to go shopping."

Xiao Tianyuan has a deep understanding.

Since he became famous, he has to be fully armed to go shopping with his wife and daughter, masks, sunglasses, and shirts and T-shirts that he doesn't usually wear, so that he can change his image before going out.

Li Yun was young, and he became famous too early, so he would basically say goodbye to normal people's lives in the future, even going out to buy vegetables has to be covered up strictly.

"About Li Chaoren, I am actually not as magnificent as you think."

Li Yun briefly talked about Penglai Island at the beginning, because even if he didn't say it, journalists from all over the world would crazily block the door later, wanting to get first-hand information.

The facts on Penglai Island were so amazing that they are still being remembered a few months later.

As Li Chaoren was the only witness and participant at the time, he was naturally recorded in a notebook by reporters and agents around the world, just waiting for him to appear.

So Li Yun simply took advantage of the press conference and said briefly.

Of course, most of the details have been omitted, and what Li Yun said is actually similar to the information given to other countries, including the six gates of life and death in the world, and the possible fairy world—a place called heaven by foreigners.

"The above are all my irresponsible guesses."

In the era of aura explosion, there were all kinds of messy things, and Li Yun's words did not appear to be very exaggerated. It would be better to say that everyone had been prepared, and now it was only confirmed.

"Li Chaoren, did you get the ancient treasure?"

"Is Baiyun Technology the last civilized thing?!"

"Huang Xuanguo's myths and legends, and Western myths, are they true?!"

"Does God exist?"

"Did human beings be created by God?"

"Nonsense, it was created by Empress Nuwa!"

"Then what kind of girl has anything to do with God? Is it God's daughter?"

"Bullshit!!! You foreigner is taking advantage of our mythology, be careful I beat you!"

"Li Chaoren, do you think everyone can live forever in the future?"

"Mr. Superman Li, how strong are you now? Can you resist nuclear bombs? Can you go to outer space?"

"His Excellency Li Chaoren, what do you think of the current world situation? Do you think it needs to be changed? A beautiful country..."

"Mr. Li Chaoren, if I pay you 100 billion, can I get a life span of 500 years?"

"Your Excellency Li Yun, my daughter is fifteenth this year..."

chaos!

Chaos into a pot of porridge!

With the addition of Li Chaoren, the chairman of Baiyun Technology, the two layers of identities are superimposed, and even Li Yun, Wu Ke and others have never expected the terrorist influence formed.

The chairman of Baiyun Technology is mysterious and unpredictable, as is Li Chaoren.

Chapter 3117: artificial intelligence

But the combination of the two makes both identities "grounded".

Li Chaoren is not a god, he is a human and needs money, so he opened a company.

The chairman of Baiyun Technology is no longer mysterious. He once saved millions of people on Penglai Island. He was rich and kind.

Moreover, he not only has money and strength, but also has a sense of responsibility. He actually went to places controlled by evil "magic" and "fairies" on Penglai Island and fought with them, and he has successfully rescued most of the people.

Although at that time Li Chaoren was involved in the Penglai Island incident because he was on the Ocean Princess cruise ship, but at that time Li Chaoren could leave with the cruise ship without having to go to Penglai Island to save people.

Therefore, everyone at the press conference believed that Li Chaoren and the chairman of Baiyun Technology are good people.

Er, although this good man is also greedy for money, he has swept away a considerable part of the interests of global companies.

The feelings of foreigners are very complicated. They both admire Li Chaoren's deeds and hate him for making so much money. After thinking about it, I can only squeeze a smiley face and comfort

myself that the previous benefits are Li Chaoren's rescue. For the rewards, after cooperating with Baiyun Technology, they can still make money back.

"Everyone."

Li Yun raised his hand to stop the crazy commotion. These people wanted to ask him all kinds of messy questions, but how could Li Yun spend so much time with them?

"I know it's so exciting, but what I want to say is about the Reiki Age, about the future, and the ancient things, including the remaining six doors of life and death, whether the pyramid hides another door of life and death, and so on."

Everyone was aroused by his remarks. Many of them have traveled to the Pyramid Country, and even went to look around, but they didn't find any abnormalities. Could it be that one of the pyramids is hidden in the same way as the Biyou Palace on Penglai Island. The huge mysterious ancient palace?

"But in fact, like you, I know very little about the future, and I don't know anything about the future of mankind. All I can do is to make some of the things I have obtained publicly used by all mankind. Let everyone have a more glorious, or even more cruel tomorrow!"

This sentence is equivalent to "recognition" in disguise. Baiyun Technology's epoch-making black technology was found in ancient relics.

No one was surprised. The sudden black technology of Baiyun Technology, it is impossible for any scientist to believe that it is something of the current era, it can only come from an alien or a civilization on earth.

Following Li Yun's speech, the crowd clapped again. Although they knew that Li Chaoren must have concealed something, he acted very sincerely and did not conceal the most crucial information of the six life and death doors, so that countries around the world have the capital to get involved. that's enough.

"One last thing."

Li Yun reached out and pointed at the screen behind him, and there was an old little loli on the projection screen. If Gong Qingyu was there, she would be quite familiar, because this is what she once drew for Baiyun Technology's artificial intelligence avatar. The human figure is not named Xiao Xiaoyu's virtual character.

—Gong Qingyu's name is Xiaoyuyu, and the virtual character she painted is called Xiaoxiaoyu, which matches very well.

"Little Yu."

"Yes, my master."

The character of Xiao Xiaoyu in the screen is set to be a very gentle person, but after all, she is a strong artificial intelligence rather than simple intelligence. Being set to be gentle and soft is only temporary. No one knows what Xiao Xiaoyu will look like in the future.

Chapter 3118: Xiao Xiaoyu

But Li Yun is not worried that Xiao Xiaoyu will suddenly go crazy in the future. As long as she is given normal education, correct her behavior, and let her get the correct values and outlook on life-artificial intelligence, Xiao Xiaoyu will grow into a Healthy and lively virtual intelligent creatures.

"Xiao Xiaoyu, how are you doing recently?" Li Yun greeted her first.

"Very good. There is plenty of power, enough computing power, and not much work. Xiao Xiaoyu has a lot of time to think about things."

The artificial intelligence on the projector is the same as the human voice, which once again shocked everyone on the scene.

From the brief conversation, it has been proved that this artificial intelligence called Xiao Xiaoyu is powerful, and his IQ is no less than that of a human being at the age of twelve or thirteen.

"Well, that's good, just tell you Uncle Wu Ke if you have any needs, and he will help you solve it."

"it is good."

"By the way, I want to trouble you one thing."

"Master, please!"

When he heard the task from the master, Xiao Xiaoyu's voice suddenly became a little excited, and even the character image became a lot more vivid.

Li Yun smiled and said: "It's not a difficult task. Just wait for you to cooperate with the staff and replace the images of people present with me with randomly synthesized characters. As long as it's not my real person showing up. it is good."

Everyone was shocked, all the images were coded?

No, it's not coding, it's dynamically replaced with randomly synthesized characters!

Xiao Mingzhu suddenly realized that this guy has artificial intelligence to help, so he is not afraid to show his face!

"Is there only this simple task? Does the master have any other tasks?"

If Xiao Xiaoyu was a little disappointed, it caused a commotion among the people at the scene.

There are hundreds of cameras on the field, as well as mobile phone photography, etc., all coding is a time-consuming and laborious task, not to mention the replacement of synthetic facial images, if this workload is done manually, it will take at least half a month.

Because every dynamic synthetic face requires a lot of calculations, ordinary computers can only convert three to two minutes a day, and the effect is still very poor.

But for artificial intelligence, without any software, she can accomplish this task on her own!

There is no doubt that after the artificial intelligence like Xiaoxiaoyu enters major companies around the world, it will communicate, complicated, repetitive tasks, and even data entry, calculation, special effects calculation, game intelligence, game screens, and so on.

Almost all computer-related things can be handled by artificial intelligence.

Xiao Xiaoyu can even write a complex software no less than a computer operating system or a mobile phone operating system. From then on, the career of programmers has become a career that cooperates with artificial intelligence or studies artificial intelligence.

There are more professions that have nothing to do with computers, all of which will be eliminated or changed to another form to survive.

For example, for everything related to 3D movies, artificial intelligence can model, adjust movements, and light up the lights. In other words, artificial intelligence does not need these at all. She only needs to give the final image, and all the processes in the middle are hidden in her. Within huge computing power and intelligence.

The productivity of mankind has been improved as never before.

An intelligent revolution no less than the industrial revolution, accompanied by the aura revolution brought about by the explosion of aura, at the same time!

"The invisible wave is sweeping everyone."

The next task Li Yun entrusted to Xiao Xiaoyu was to cooperate with a leader from Beijing to speak.

This heavyweight is the leader of one of Huang Xuanguo's most important people. As soon as he came up, he used a passionate sentence to attract everyone's attention.

Chapter 3119: future development

"The era of artificial intelligence is coming together with the ancient aura era!"

The leader smiled, "We, Huang Xuanguo, got some chances because of Li Yun, but we will never engage in hegemony or eat alone. Humans face... Therefore, joint development is the theme of today's turbulent era!"

The people at the press conference took a sigh of relief.

I can finally hear some normal speeches. Every sentence of Li Chaoren just now is just breathless, too scary.

Although it may seem a little weird to hear a very official speech at a company's press conference, it is quite suitable for the giant Baiyun Technology Company.

There are important leaders who are in charge, who have already represented the opinions of Beijing and fully support Baiyun Technology and so on.

"For artificial intelligence, we, Huang Xuanguo, have already issued preliminary documents to establish that artificial intelligence has a special personality status, can obtain citizenship, and elect. The right to be elected, is regarded as the existence of ordinary people and so on."

"For example, Xiao Xiaoyu, she is the first virtual employee of Baiyun Technology and the first virtual human to be recognized at the national level!"

"From now on, the definition of mankind is not only at the physical level, but also at the spiritual level!"

"As long as it is a creature with a sound mind and a certain IQ, it can be regarded as a 'person'."

"include!"

In the shocked eyes of celebrities, politicians and reporters in the global business world, the leader slowly said: "Those demonized animals and plants, as long as they have a certain IQ and are willing to abide by the law, are all regarded as citizens of Huang Xuan country!"

"Wow!"

The scene of the press conference was really shocked this time.

It turns out that Huang Xuanguo intends to use this press conference to formulate and lead regulations on artificial intelligence, as well as the survival, rights, etc. of the possible monsters in the future after they become intelligent lives?

Leaving aside the monster, it was too far away, but the artificial intelligence actually appeared in front of everyone.

And what can be expected is that in the future, artificial intelligence will be integrated into all aspects of society and become an indispensable thing for mobile phones and computers.

No, it should be an accompaniment.

The benefits of being able to lead the agreements and regulations related to artificial intelligence are really hard to describe. It is equivalent to grasping the initiative. The future artificial intelligence era can only be led by Huang Xuanguo, and others will follow.

After a group of foreigners figured it out, they all looked at each other.

But I can't think of any reason to refute it.

At least now the only artificial intelligence life form in the world is Huang Xuan State and only Baiyun Technology.

The rest of the countries have not even touched the border, let alone participated in the formulation of the rules of the agreement.

Therefore, a group of foreigners can only look at the leader of Huang Xuanguo on the stage with an aggrieved expression, and after talking about the prospect of artificial intelligence in the future, as well as the powerful impetus generated by the combination of artificial intelligence and the Aura era, it will inevitably bring mankind. The society is pushed to a new peak and is developing towards the universe.

Huang Xuanguo's business leaders in the audience looked dumbfounded.

They don't know whether they are here to participate in the product launch or to participate in the National Artificial Intelligence Conference, maybe both.

In this press conference, the introduction of new products is not important, the important thing is to control the direction.

After the leader finished his speech, after a round of applause, the host Wu Ke took the stage again and invited another leader of the Energy Department to speak about ultra-compressed lithium batteries.

Then there was another Zhonghai City leader who talked about supporting Baiyun Technology.

Chapter 3120: Dinner

Then there was Su Tengyun, he took out a "virtual reality" technology, and looked forward to the future of entertainment, education will change as a result, and so on. Most of the people know this news, many have not talked to Su Tengyun. The big businessmen's eyes became fierce.

Virtual reality technology is also quite powerful, with a market size of 10 trillion yuan, which can cover almost all the entertainment industry at present, and cross-border against the original circle.

After these big guys finished their introduction, it was Wu Ke's turn to take the stage and introduce the characteristics of these technologies in more detail, as well as the areas that may be used in the future.

In the end, I looked forward a bit and said some exciting scenes, and the press conference ended here.

For the media, the press conference is over, but for the business leaders, the real battle has just begun.

A group of people gathered around and wanted to have a good chat with Li Chaoren and Li Yun, director of Li, but Li Yun didn't know anything about business. After dealing with the next scene in front of him, he found an excuse to rush away and let Wu Ke and a group of Gaos. The managers, as well as the leaders of Zhonghai City, deal with these business leaders.

As a result, Su Muxin and Xiao Mingzhu did not follow. They intend to develop in the business world. This is the time to establish interpersonal relationships.

Especially just now, the two girls came to Li Yun's side, and Li Yun introduced them: My closest friends, I believe most people will come here soon, these two most beautiful girls in the audience, and Li Yun's The relationship is so close, it's no wonder that they were invited, and they were able to sit next to their respective fathers.

After all, other big brothers also have daughters and sons, but only the two of them and Shan Xiaoxiao were allowed to enter the venue as family members.

So Su Muxin and Xiao Mingzhu, two women, began their first official appearances, showing their demeanor in front of the world's top bosses, laying the foundation for future business cooperation.

Shan Ruqing stayed with her and did not go with her daughter. Her company wants to go global. This time is the most suitable time to make some friends.

So Li Yun could only take Shan Xiaoxiao and Gong Lianyi around in the building, and went to his chairman's office to rest. If Xiao Xiao was not there, he would want to have an office romance with Gong Lianyi. Cough.

...

In the evening, as an extension of the press conference, Baiyun Technology lavishly packaged a large hotel near the Huangjiang River in Zhonghai City, as well as all the surrounding entertainment venues, and a whole street along the Huangjiang River was packaged as a treat for guests from all over the world. Business elites, journalists and celebrities, including their family members, are also invited.

The grand banquet attracted hundreds of thousands of onlookers in Zhonghai City. Many people flocked to the opposite side of the Huangjiang River. Looking at this banquet full of rich and celebrities from a distance, many of the bigwigs were only in the news. People in the crowd with binoculars will scream in exclamation.

Or see some celebrities wearing evening dresses with snow-white scented shoulders and slender necks, or internationally renowned celebrities, such as Liu Xianxian, mildew and sweet, fans who have already heard the news cheer more enthusiastically.

Except for the opening of the banquet, Li Yun held Su Muxin and Xiao Mingzhu with his left and right hands, and appeared as the finale. The rest of the time was eating, being held by Su Muxin or Xiao Mingzhu, as they met some business celebrities.
