

Godly Choice 3941

Chapter 3941: Peerless Treasure Gift Bag

Everyone looked at Li Yun, and being able to enter from the middle of the pyramid would definitely be less challenging than going up from the bottom, right?

"No need."

Li Yun shook his head, "First, you can't get to the 30-meter position. The bottom is similar to the upper ones, so just walk up from the bottom. Secondly, Consort Wan Qing should be fine."

"She is very powerful and has a lot of life-saving things."

Li Yun added another sentence.

Alice smiled, "Let's find her soon, since you are so worried."

"...How do you see that I am worried? It's okay, Consort Wan Qing has nothing to do with me, really!"

"Oh? Since it's okay, why do you have to add another sentence? I think you are worried, don't quibble~"

As they laughed and talked, they walked to the door at the bottom of the pyramid. After experiencing the thrill of the top of the tower and feeling the terrifying pressure of the tower, Li Yun no longer placed the bottom of the pyramid in his eyes, and pushed his feet away. door.

"Ding."

The door of the pyramid opened silently, and it was Li Yun's reward that had arrived.

"The host makes a choice, rewards: all attributes +50%, experience value +100%, a peerless treasure gift bag*1."

Li Yun almost fell inside the door, so scared that Alice hurriedly supported him: "What's the matter? Husband, are you okay?"

In an emergency, Alice will directly call Li Yun's husband, which is very cute.

"No, it's okay, I'm just so happy!"

Li Yun hugged Alice's waist and kissed her face with a smile, making a loud snap.

Her Royal Highness's face blushed, and the faces of the people behind her were weird. Is there any mistake in showing affection in such a place?

"Why are you suddenly happy?"

"Haha, I won't tell you for the time being, it's a pleasure anyway."

Can Li Yun be upset?

After "years", I finally got it again...No, no, no!

Li Yun should have never received a Peerless Treasure Gift Bag before, all of which are peerless treasures that are directly rewarded. For example, when the Fanqing Sage's favor is full, the system directly rewards her with a peerless treasure, that is, the Hongmeng Ziqixian. Ling bracelet.

In addition, when he was in the cherry blossom country not long ago, Li Yun also obtained a peerless treasure, the ten-punch sword.

However, these peerless treasures are directly rewarded, not from the peerless treasure gift bag!

There was a reward for a peerless treasure-level gift bag before, but Li Yun didn't choose it.

If you remember correctly, this is his first peerless treasure!

"System, open the gift bag of peerless treasures for me!"

Li Yun currently has few gift bags in his inventory, none of the colorful ones, and very few golden ones, so he just opened it without matting!

Different from the colorful light of the colorful gift bag, the peerless treasure gift bag appeared in a gray world, shrouded in front of Li Yun's eyes. Fortunately, it brought some transparency and did not affect his walking.

From the gray world, the treasures were "born", Li Yun's eyes were straight.

What did he see?

Four murderous swords, a red hydrangea, a chilling golden dragon scissors, a golden lotus with thirty-six white lotus leaves, a scroll, a gun, and an aura of spirit Grass, golden apple trees, **** spears...

Etc., etc.

Many treasures that Li Yun could guess, and treasures that he could not guess at all, all appeared one by one in the gray world, passing by his eyes.

What made Li Yun scratch his head was that he couldn't reach out his hand!

Can only watch these peerless treasures pass by him one by one, ruthless, so ruthless!

"Ding, congratulations to the host for getting..."

Chapter 3942: Banten sign

After a burst of light, Li Yun got his own reward.

However, the expression on his face became quite exciting, just like accidentally picking up a big money bag. He thought it was so developed, but there was only a small bag of money in it.

Although it's cool, but it's not so cool, it's always so bad!

"Fan Tianyin (damaged)

Special effect: suppress all things.

Skills: None.

Explanation: The pillar used to support the earth in the legend, part of the collapsed part was used to refine this peerless treasure, the only one in the world. "

Li Yun's mood was complicated when he saw the bluish-white Fantian seal that looked like a seal and a paperweight.

Fan Tianyin is an innate-level spirit treasure, you have to say that it is not strong. According to the myths and legends, this thing belongs to the kind of martial arts, and has killed several famous gods. It is said to be ruthless and special. A smash on the forehead can smash all the gods into meatloaf.

But you have to say that the Fantian Seal is very strong, and it is far from being called in ancient times. At least the Xiantian Wufangqi can firmly control it and make it immobile. On top of the Xiantianwufangqi, there are Many more powerful Lingbao.

Therefore, Fan Tianyin's position is very embarrassing. It is neither strong nor weak.

Fan Tianyin is definitely not better than Li Yun's current most powerful treasure-Qinglian Immortal Mansion. This thing is a fusion of Chaos Qinglian, and it is said that even the five innate flags are the fifth of Chaos Qinglian. The leaves are transformed, and you can imagine how precious the Educated Youth Lianxian Mansion is.

But Fan Tianyin was definitely much stronger than Li Yun's current weapon, the Dragon Fire Sword.

The Intercalary Fire Sword mainly incorporates some flying swords and spirit fires. The system's rating is Seven Colors, but the Fantian Seal is a peerless treasure, the only one in the world, so it is of course that the Intercalary Fire Sword is not better than the Fantian Seal. of.

But if Fan Tianyin is replaced by another kind of treasure, such as the Four Swords of Zhuxian, or the off-ground flame light flag (the main Southern Suzaku) in the innate five flags, it matches with Li Yun's terrible fire, no, the terrible fire is leaving. There was a scum in front of the flame light banner, Li Yun directly upgraded the flame in his body, and suddenly became a bit more powerful than Fan Linglong!

It's a pity that he was given the Heavenly Seal.

"Forget it, Fan Tianyin, just Fan Tianyin."

Li Yun didn't get entangled anymore. After all, the challenge was to climb the pyramid to get a peerless treasure, and it was also a powerful magic weapon for the ancient times.

There is a saying that people don't have enough hearts to swallow an elephant.

"Li Yun?"

Alice looked over, "Why aren't you leaving?"

"It's okay, just think of something."

Li Yun found an excuse to push him away and walked into the black pyramid with her, followed by everyone behind him.

There are now more than 20 people in the team, but it should be the strongest group among the first more than 400 ability players. Everyone in the outside world is a powerful person with strong influence.

But here, they can only shrink and dare not breathe.

"Boom!"

As the last person walked into the pyramid, the arched gate was closed, and the surrounding was plunged into darkness.

"what happened?"

"Want to illuminate?"

"Be careful."

It was dark all around, but the team wasn't messed up. Those who can live up to now are not stupid, they know what to do when.

A hazy flame ignited on Li Yun, and everyone looked at him. After all, Li Yun now is the only light in the darkness, in all senses.

Chapter 3943: dark

The dim light illuminates the surroundings, but it is still not enough, so Li Yun increased the intensity of the flame on his body, turning himself into a pillar of fire, illuminating a radius of 100 meters.

"The surrounding environment has changed!"

Alice is keenly aware of this change.

When they entered the interior of the black pyramid before, they saw a passage with a mural on the passage, which was connected to a hall.

But after the door was closed, Li Yun illuminated the surroundings again, and Alice saw the passage disappear and replaced by a huge space with no boundary in sight.

Faintly, I heard some kind of roar.

"There seems to be a monster?"

Someone listened carefully and quickly came to the conclusion: "Mr. Li, there are indeed monsters in the surrounding darkness, far away from us, but getting closer and closer. Is the light attracting their attention?"

Everyone became nervous and once again heightened their vigilance.

Li Yun didn't speak, turned his head and looked at the darkness around him.

Compared to the previous Xinghai Universe, here is an endless darkness, and there is no trace of light, there is no starlight or moonlight, this is a kind of extreme darkness.

Only Li Yun still emits a little light, as if a hole was burned in the dark, it is no wonder that some people guess that the monster is attracted by the light.

Moreover, the roars of the monsters are getting closer and louder, and everyone seems to have felt the vibration of the ground. There are definitely countless huge monsters that are roaring and approaching.

"Mr. Li Yun!!"

Wook was anxious, and felt that he had to plunge himself into the darkness now, lest the monsters rushed over.

"If you extinguish the flame, can the monster stop attacking?"

Li Yun said his doubts, but did not arbitrarily continue to maintain the flames, but chose to withdraw the ground and let the light disappear completely.

The world fell into darkness again.

The roar of the monsters really stopped.

"it is as expected!"

Wu Ke was triumphant, and felt that he finally did the right thing, because of his correct proposal, the roar of the monsters disappeared!

Many people breathed a sigh of relief, but the darkness gave them a sense of security, in the absence of those penetrating roars.

"Don't you think it's weird?"

Li Yun said at this time: "If those calls are really monsters, and they are really attracted by the light, then they already know where we are, and they should continue to charge now."

"It's not necessarily." Rena said, "Monsters may only be allergic to light, after all, this is a dark world!"

"Perhaps, but the sense of smell and hearing are degraded? Not to mention that monsters will also degrade these perceptions. Just retaining sensitivity to light is worth studying." Li Yun said again.

"Um... I agree with you." Rena nodded this time.

Along the way, she has always been independent, not completely obeying Li Yun's decision.

"At least we are safe now." Negro West, the wind system superpower, he is very reluctant to fight in the dark, and it is easy to lose his position.

"But how do we find a way out?"

Alice also expressed her opinion, "We are safe now, but all around is dark. Even if Li Yun can roughly perceive the surroundings without catching his eyes, he still has to illuminate the surroundings."

"Then wait for it to light up when needed," West said again.

This time he won the approval of most people, and they don't want to face countless monsters that rushed in.

Chapter 3944: Hand in hand, walk together

Li Yun has no objections. Now that the situation is unclear, he always needs to make tentative behaviors to figure out what the law of this dark world is.

Besides, isn't the role of these people just to find the way? hehe.

In the final analysis, Li Yun can tolerate and protect them until now. The better thing to say is that they are a team. Everyone shares the treasure. It is not sound to say it so that someone can die, so that he can see the hidden danger.

Li Yun didn't force them to die, he even tried his best to save people, but for him, the only effect of these people was to constantly test the surroundings to find the taboos here.

"Ok."

Li Yun nodded in agreement, "If this is the case, let's start to go, everyone hand in hand, try not to disperse, no, not as much as possible, you must not disperse, otherwise once you disperse in this dark world, it will be a dead end."

No one disagrees, this ghost place is so dark and scary, they would definitely not dare to walk without holding hands.

Then, Li Yun felt a warm little hand touch it, and he touched it...cough cough.

Li Yun was taken aback.

In the dark environment, the human perception ability actually rises several steps, because the eyes are the window through which the human body receives the most information. Among all disabilities, only the blind are the most pitiful and need help the most.

Therefore, when Alice's little hand came over, Li Yun was taken aback.

"Pouch."

Alice grinned and said, "Where do you put your hand on me? Badass."

Li Yun said innocently: "It's not me, I haven't reached out yet, is it your maid?"

Joanna hummed, and Alice groaned to forgive him.

Li Yun stretched out his hand and held Alice's smooth little hand together, turning into an intimate state of interlacing ten fingers.

"very nice."

As everyone fumbled and held hands, Alice whispered, with a smile in her voice: "Although the environment here is very strange,...it's great to be able to hold hands with Li Yun."

"After we go back to the hotel, we will hold back enough."

"It's different, the environment is different, and the feeling is different."

Alice feels very good now.

Although the world has become dark, she is holding her lover's hand, feeling the temperature and strength of his big hand, full of security, this is a different place when she is in the hotel.

Holding hands in the hotel is warm and sweet.

"Well, it's really different."

Li Yun scratched the palm of her hand, causing Alice to smile. In the dark world, the crisp laughter was really contagious.

Li Yun leaned over and groped for a kiss on Alice's face.

Alice stood on her toes and took a bite back.

"Is everything all right?"

Li Yun asked loudly, he was holding Alice, and Alice was holding Joanna, and then Abel. If it went on, it should be able to connect everyone.

The darkness around him once again suppressed Li Yun's spirit, and he could only use this stupid method to move forward in the darkness.

"Ok."

"My team members are holding hands."

"Me too."

Everyone answered one by one, and after repeated confirmation, Li Yun nodded and said: "Don't pull too hard. I will choose the direction to avoid chaos."

More than 20 people walk hand in hand in the dark, who is the head? This is very important. Otherwise, if everyone is heading in one direction, it is easy to fall into chaos, or just go around in place.

Chapter 3945: go ahead

Everyone agreed, but Li Yun said again: "Say it first, you can't find the direction in the dark. If you can't find the place, don't blame me. If you haven't found it after three hours, then let it go. Alice chooses the direction."

Li Yun is quite aggrieved now. He has a lot of power, but he can only be trapped by things like secrets. He has the intention to kill him, such as taking out the Fantian Seal and smashing it around.

But considering various factors, I didn't do it in the end.

Everyone agreed again.

"it is good."

Li Yun did one last thing: "Wait I will leave a small piece of oil on the spot, let the smell radiate, as a sign of positioning, and explore around."

"Yes, Mr. Li, your idea is very good!"

Wook immediately flattered, and everyone else agreed.

Li Yun did what he said, a flame suddenly burst out of his body, illuminating the surroundings, and his eyes scanned around, confirming that everyone is holding the corner of other people's clothes with one hand and the weapon with the other before removing the ring. Take out the fuel and pour a small drop on the ground.

Fuel oil is a very ordinary gasoline, originally used as a combustion material, but now it has become an excellent material for positioning.

Because other solid objects may be kicked away or destroyed by monsters, but the fuel is dumped on the ground. As long as there is no accident, the fuel will not disappear, and the smell will not be lost in a short time, so it is easy to find.

"Set off!"

There was darkness all around, and Li Yun didn't need to find any direction, and walked straight ahead.

Everyone followed silently, and Alice also changed to grabbing the corner of his clothes instead of holding hands, so that Li Yun could be ready to attack at any time.

"Did you hear the roar when the light was on just now?"

"no."

"Neither did I. Maybe the time is too short for the monster to react."

"That's good, and we know a rule, so that we can emit light from time to time, so that we won't be invisible all the time!"

Everyone was walking forward in the dark, chatting about the sky, this ghost place was surrounded by darkness, and they would be crazy if they didn't speak.

Li Yun actually had nothing to say. After chatting with Alice for a while, he slumped his head forward. After a period of time, he would pour down a few drops of gasoline, and arrange the drops of gasoline into shapes according to different shapes.

Even if they enter the state of ghost hitting the wall, they can spread out and search in a circle according to the amount of gasoline.

Time passed slowly.

The voices of the people gradually stopped, and staying in the dark environment for a long time still brought them a strong sense of anxiety.

Obviously he was not blind, but he had to become blind.

Fortunately, the ground in this weird place is flat, so you can't walk on top of one foot.

"Is it coming soon?"

Some people can't help but ask questions.

"It's still early, less than an hour has passed."

"how do you know?"

"I took a peek at the phone."

"Go away, what do you do if you attract monsters?"

"Hey, I really don't want this horrible place... Smith, what are you doing?"

Someone was talking, and suddenly questioned: "Why squat down?"

He saw his teammate Smith holding the corner of his clothes, suddenly let go of his hand and squatted down. Although he couldn't see it, he could feel his slumping motion, which was also proved by the people behind him.

"I... have something."

"Shoelaces are loose? Really troublesome!"

The team stopped for a while because of Smith's actions, and then moved on.

Chapter 3946: Suddenly wake up

Time continued to pass, and everyone's patience became less and less.

"Do you smell the previous gasoline?"

"no."

"In that case, we have been walking outside... or it may have been around to the other side. It is difficult for people to locate themselves in the dark."

"I have also heard of it. It is said that no one can walk in a straight line with closed eyes."

"We have abilities, not the same!"

"What about your abilities now?"

"Ahem, uh."

"what happened?"

"No, nothing."

The conversation stopped again, and the team moved forward in silence.

"Smith? Smith? Why are you not talking anymore."

"Prefer not to say."

"Oh, I don't want to say, but I still have to say, this horrible place is really uncomfortable! Wait, why are your hands so cold?"

Li Yun suddenly stopped and stretched out a finger. With a sigh, a flame burst from his finger, illuminating the faces of more than 20 people present.

"So bright!"

Some people covered their eyes, some just squinted without covering them.

Li Yun glanced around the crowd, except for some people who looked ugly and pale, everything was normal.

"Hands are cold?" Alice probably guessed why Li Yun stopped suddenly and asked the humanity. Everyone looked at Smith, his face was a little pale, and he said, "I, I'm afraid..."

Li Yun stared at him for a long while, nodded, and cancelled the flame of his fingers.

"keep walking."

Everyone once again walked hand in hand, this time, everyone's mood was a little heavy, and the atmosphere was more depressing.

If this state continues for another two or three hours, most people will doubt life, doubt everything, and emotions will become extremely unstable.

Li Yun knew that he must be resolute in the future, and should not give those who are shaken a chance to disrupt the "military spirit".

Snapped.

The sound of finger snapping sounded in the dark, and then a faint fire light came on. When everyone looked at it, the man lit a cigarette and put one hand in his mouth.

Behind him, a man poked his head out and reached the shoulder of the man who lighted the cigarette. He moved very strangely. One hand grabbed the waist of the man who lit the cigarette.

"What are you doing?"

The light was weak, and the person who lighted the cigarette said impatiently: "Don't get so close to me! I'm not gay!"

".....Oh."

The man who stretched his neck slowly responded and straightened his movement.

Li Yun retracted his gaze and lowered his head to think. He seemed to have overlooked something, but he couldn't remember what it was.

"What's the matter?" Alice asked him.

"No, go ahead."

Li Yun shook his head, guessing that he was also a little upset by the dark environment. Any normal person will become irritable and restless when he suddenly loses his eyes.

If you can choose, you would rather lose your hands or feet than lose your eyes. Eye exercises are too important.

"Speaking..." Alice found a topic, and she also felt bored.

"how?"

"I haven't heard the roar of the monster. We have emitted light several times just now."

Li Yun smiled: "Maybe we stayed where we were, we just passed through the monster group...no!"

In an instant, a flash of light flashed in Li Yun's mind, which made him understand many things at once.

"come out!!!"

With a loud shout, Li Yun suddenly burst into flames, illuminating a one-kilometer radius, making the surroundings extremely bright, and everything was illuminated.

Chapter 3947: Judge, distinguish

But nothing.

The flames on Li Yun emitted bright light. Alice couldn't help squinting her eyes to ease the sudden change from darkness to light. However, she kept looking at Li Yun with the gap between her eyes, lest she suddenly fell dark and couldn't find it. To his direction.

The flames skyrocketed and lasted for a full ten seconds, enough for Li Yun to see the performance and reactions of more than twenty people one by one!

"Everyone, let go or get rid of the hands of those around you!"

Li Yun ordered: "Immediately! If you don't want to hold a monster's hand by yourself."

"what!?"

Everyone was startled, and they released each other's hands as if they were electrocuted, and looked at each other on alert.

"monster?!"

Wook looked at his teammates with horror, and found that they also looked at them with horror. Are they monsters? It's not like it.

"Monster? Who?" Alice asked nervously with a golden spear in her hand. Suddenly, she turned her head and glanced at Joanna. After seeing that she was still standing humbly, without showing any strange expression. , Just breathed a sigh of relief.

Joanna is a rigorously trained maid, and there will be no other expressions, even in such a dark environment.

"Just now,"

Facing everyone's questioning gazes, Li Yun slowly said: "When I lit the fire twice, your reactions were twofold, one is, squinting your eyes, and the other is, covering your eyes, so please squint. The one with the eyes is standing on my side, the one with the eyes covered, standing on the other side."

Everyone looked dumbfounded, what is this?

"Are you kidding?"

The person who lighted the cigarette just now had not finished smoking the cigarette. After hearing Li Yun's words, he couldn't help but smiled and took a cigarette. He pointed to the man behind him and said, "I remember this guy was covering his eyes. He is a monster? Impossible."

Alice said immediately, "He stretched his head to your neck just now, is he going to... bite you?"

The person who lighted the cigarette was startled, his hands trembled, and he looked at the man in disbelief, "No, brother, are you a monster?"

"no."

The man shook his head, his face pale, "I'm just... a little scared."

"I'll just say it!"

The person who lighted the cigarette happily stepped forward and patted his shoulder vigorously.

Alice clearly saw a flame ignited in his hand, it was obviously guarded to step forward to pat him, not as careless as she indicated.

That's right, people who can live to the present will not be less vigilant.

"Mr. Li, you may have guessed wrong."

The cigarette lighter shook his head.

Most of the others nodded in approval, squinting and covering their eyes to distinguish whether it was a monster or not, which was so strange.

Besides, I don't know if there are any monsters.

Someone sneered and said: "Then I didn't squint or cover my eyes just now. Am I the monster?"

Li Yun also squinted his eyes: "Under normal circumstances, it is of course impossible to distinguish between these two actions, but you forget that we have always been holding hands just now, with one hand holding the corner of the person in front of him or Hand, when the light suddenly lights up, normal people will let go of their hands and cover their eyes with both hands?"

Everyone was silent for a while, and the person who lighted the cigarette was stunned, and subconsciously looked at the man who had just stretched his head to his neck. There was an inexplicable chill on his neck.

Did he almost get bit his neck just now?

Chapter 3948: Light

Indeed, in the dark, holding hands and holding a weapon in the other hand, people suddenly see bright light. It should be instinctive to close your eyes, ease the intensity of the light, and then open your eyes after adjusting to a certain amount. Not holding it with your hands.

"But it's not right!"

Someone put forward an opinion, "Even if you really follow Mr. Li, normal people close their eyes, but those people are really occupied by monsters and become puppets, so why do they cover their eyes? Isn't this unnecessary? Close Just put your eyes on."

Li Yun did not answer, but someone agreed: "It is indeed the case. There is more than a lot of action to cover your eyes, Mr. Li, why?"

Everyone waited for Li Yun to explain.

"I know you want to listen, but I can't give a clear answer. I guess it's because the monsters imitated the actions of humans, and the imitation was not complete enough, so they used the remaining physical instinct, that is, the action of covering their eyes. "

Li Yun shrugged, "My God, Uncle Tom next door told me that not every question has an answer."
"?"

Everyone looked inexplicable, and even Alice didn't understand what he was talking about.

Only a few people from Huang Xuan understand that this is the so-called translation accent...

"Mr. Li, this is too childish!"

The person who lighted the cigarette tested the man just now. He felt that except for a little nervousness, he was no different from a normal person. Cold hands are also normal. Not everyone's hands are warm. People are scared. His hands are cold.

Therefore, the person who lighted the cigarette did not agree with Li Yun's judgment.

In fact, most of them disagreed. The act of covering their eyes only referred to being a monster. This is too much nonsense!

"Alice, what do you think?"

Li Yun looked at his beautiful blonde girlfriend. The relationship between him and Alice must have become very good, and the relationship is good, but in terms of absolute trust, it is definitely not better than Li Yunhe in Zhonghai City. Those girls from here are strong.

So he wanted to hear Alice's opinion.

"Um--"

Alice's voice was dragged long, staring at those people, but she couldn't see anything wrong when she looked left and right. Those people stood where they were, no matter the shadow, face, expression, and tone of voice, they were all normal. Same as people.

"Huh?" Li Yun asked.

"Well~~, that is, if you judge like this, Li Yun, then there must be your reason. There shouldn't be only one evidence, right?"

Alice chooses to believe in Li Yun, but does not believe his view that "covering your eyes when the light is on is a monster".

Li Yun smiled: "In fact, there are already two obvious evidences, at least it proves that this is not normal, can you find it?"

Alice knows that Li Yun is a test of herself. She cannot always rely on Li Yun. To become the queen of the country that does not set sun, she needs to have the ability to deal with abnormal things and be cautious and careful.

There was a lot of discussion among the people around, and Alice tried to calm herself down, looking at the people who stood still and "covered their eyes" who seemed to have been wronged.

If Li Yun's inference is true, why did these monsters choose to cover their eyes? Simply follow the physical instinct? Don't want to be light...

By the way, light!

"what!"

Alice suddenly woke up and looked around in surprise: "The light has been on for so long, but there are no monsters roaring around?!"

Chapter 3949: Identify monsters

At the very beginning, after the gate was closed and everyone entered the dark world, Li Yun used flames to illuminate the surroundings for the first time, and monsters swept from a distance. The terrifying thunderous sound made these people afraid, so let Li Yun hurry up. The lights were extinguished.

Several times later, they also experimented with whether turning on the light would attract the monster's attention. Obviously, yes.

After several times, everyone had no idea of lighting up the lights, and everyone moved forward in the dark.

But now Li Yun's fire illuminates the surrounding area for three to four minutes, but there is no monster roar in the distance.

In this dark world, it seemed that only they were still alive, and the sky of silence came from the darkness.

Just thinking of this possibility makes people shudder.

"The monster is gone?" Wook looked around, and even let his team members launch fireballs in all directions. He glanced at it roughly within ten kilometers, and did not touch any monster.

"Hi! Where did the monster go?"

"Disappeared?"

"Not following?"

"Don't you think this space is weird?"

"Nonsense, I know if you don't talk!"

"But where did the monster go?"

Amidst the people's discussion, Alice said calmly: "There are only two possibilities for the monster to disappear. One, the monster did not follow, we stayed away from them, and two, the monsters have succeeded, they..."

Looking around, Alice said every word: "Has been in our team!"

Monsters have been mixed into the team, so there is no need for roars to intimidate humans.

"really?"

Some people couldn't believe it, but more people began to stare at everyone on guard, and because they believed in Li Yun's side, they stood on his side.

"Are you kidding?"

The person who lighted the cigarette lit up another cigarette and looked around in a daze, as if he hadn't recovered from the surprise.

After a long while, he shook his head and said, "Anyway, I don't believe that any monsters got in. The old man didn't do anything just now. I knew he was nervous, so that's why."

The crowd gradually divided into three groups, with Li Yun on one side, five or six people who "covered their eyes" on the other, and others who were indifferent and chose to stand in the middle.

Alice frowned and thought, is there any evidence or abnormality?

"Didn't you see it?"

Li Yun smiled at her. Alice looked around, and finally shook her head. She only noticed one anomaly.

In fact, it is very rare to be able to quickly detect the changes in the monster's roar after walking in the dark for a long time. Most people have not been connected to the previous events, and they subconsciously think that they have stepped out without hearing the roar. The monster's guard circle is gone.

"Well, let me announce the answer!"

Full of confidence, Li Yun stretched out his hand and pointed at a man standing not far from his side: "You are a monster!"

"what!?"

Everyone was shocked again, and quickly moved away from the man, drew out their weapons and aimed at him. Fortunately, because of Li Yun's previous outrageous judgment, they didn't immediately ***** the guy into the fight.

"how is this possible!?"

The man yelled angrily and said angrily: "Mr. Li, I thank you for saving me before, but please don't be kidding me? How could I be a monster!! How can I look like a monster."

There was a complex expression on everyone's faces that could not be said.

"Oh, you are not a monster."

Chapter 3950: Joanna, you are a monster

Li Yun said straightforwardly: "That's probably my judgment wrong, I apologize to you."

"Humph!"

The talent snorted uncomfortably, and asked Mr. Li to carefully judge what he said. After that, he didn't dare to say more. After all, he still needs to rely on Li Yun to take them out. This ghost place is getting more and more evil and strange.

"However, I am more sure about one thing!"

Li Yun said again, confidently.

"What's up?"

Everyone asked, after all, there is no doubt that the only core here is him. He said that a ***** is a monster, and everyone has to pay attention to double the ***** to see if it is a monster or something.

Nausea is a bit disgusting, but it must not be ignored.

"That is... he is the monster!"

Li Yun made a big deal and pointed his finger at another person.

"how is this possible!!!"

It was Alice who yelled this time, because Li Yun pointed to her maid, Joanna!

And just now Alice has been holding hands with Joanna, and even now it is extremely certain that Joanna is the Joanna for a long time, and it hasn't changed at all!

Personality has not changed, calm and degree; body has not changed, tall and charming; look has not changed, calm and respectful, looks have not changed, still tall nose, white skin, slightly purple eyes.

"How could Joanna be a monster?!"

Alice stared at her maid closely, then looked at Li Yun, trying to find out what was wrong.

Who is wrong?

Li Yun...Is it selling something?

"Don't excuse me?" Li Yun asked Joanna lightly.

"No need to excuse."

Joanna was calm and composed, "I am Joanna, and Joanna is also me. I am the maid of the princess, and always have been. If I become a monster, it is also because of the princess's instructions...Is this answer enough?"

Alice looked at her in shock.

If Joanna turns into a monster, is it because of her instructions?

"Wonderful, worthy of a well-trained maid, this is an absolute answer."

Li Yun clapped his hands and admired, but Joanna's expression remained unchanged, and she retorted: "This is not training, but the essential knowledge that she naturally learns by staying with Her Royal Highness for a long time."

Alice took the initiative to step forward and took her hand. The master and servant looked at each other, and Alice could recognize it almost immediately. This was Joanna!

"That's me wrong again, I apologize again."

Li Yun's words made everyone's expressions a bit weird again. Your apology is very clean and neat, but it is also very simple to say that others are monsters!

"However, I was absolutely right this time!"

Li Yun's finger casually pointed again, and pointed towards the man in the middle position who was smoking and holding the cigarette, his eyes were dumbfounded.

"I?"

The person who lighted the cigarette asked in a daze, he hadn't recovered from some thinking, as if he was thinking about life.

"Yes, it's you, you are a monster."

Li Yun made a vow.

But this time, the fool could see that he was arbitrarily identifying it. It didn't find any evidence at all, it was just a mess!

"Li, Mr. Li."

The corner of Wook's mouth twitched, "Please don't be like this, okay? We should now find a way to leave this dark world, not find monsters. Even if there are monsters, you can kill with a single sword, right? ?"

Had it not been for Li Yun to be Li Chaoren, he would have hit a metal ball and exploded his forehead!

Is it plausible? Just saying that others are monsters, it will waste everyone's time!

Huh, is it reasonable?
