

## Godly Choice 981

Chapter 981: Pixel game

Liu Xianxian was very surprised. It was no surprise that she had a journalist fan. After all, she was well-known all over the world, with fans in all walks of life.

But she was on the scene, and the fan stood up and asked Li Yun to 'help her', which was a bit unkind.

This fan, who is not a black fan, deliberately blacked Li Yun and Liu Xianxian, but is a fanatical fanatic who is willing to do anything for the idol!

Li Yun motioned to Liu Xianxian with his eyes, let her not get excited, he can handle this matter!

"Xianxian, I feel worthless for you!"

Without waiting for Li Yun's answer, the female reporter, no, it should be a female fan. She looked at Liu Xianxian with admiration, and said excitedly: "With your reputation, even endorsing a 3A game is easy. No, it's just in the game circle. There is no game worthy of your endorsement, let alone such a shoddy game!

Even if you do not endorse Xianxian, but to participate in this kind of conference, this behavior itself will drop the price! "

Sure enough, he is a fanatic, and Li Yun has finally seen what a fan of the entertainment industry is like.

"This lady."

Li Yun smiled faintly: "I'm curious how you judged that this game is shoddy? Just based on what I just introduced, or based on the production cycle of the project? In fact, this game was made for more than two months, although there are It's a bit of a rush, but the game itself is based on creativity and belongs to a niche boutique type, which is normal."

"Humph!"

The female fan angrily stretched out her finger to the projection screen, "Look at your game protagonist. You can't even see the person. Modeling is no longer crude, it's just a pile of large squares. This can also be called a game. main character?!"

Li Yun was stunned, and everyone in the game circle also laughed weirdly.

But many reporters from the entertainment circle have echoed, including the non-girl viewers who are watching the live broadcast in the live broadcast room.

"Yes, yes, the modeling of the protagonist in this game is too bad, right?"

"This Xiao Ming was built entirely with building blocks."

"I think the cost is no more than one dollar, which is about the same as the special effects of fifty cents."

"Woo, Xianxian, please, let's go, don't stay at this garbage game conference anymore!"

"Sister reporter, I support you, \*\*\*\* him, that \*\*\*\* who uses immortals!"

To be honest, the modeling of the protagonist Xiao Ming is really bad. His feet are cuboid, his hands are cuboid, his body is square, and his head is the same.

"This is a \*\*\*\* freak!"

A reporter who didn't play games often spit out, and everyone agreed.

Li Yun pondered for a long time, but he didn't know how to explain the style of painting to them. A group of people in the game circle also looked at this group of people in the entertainment circle with contempt. .

"It's difficult to judge whether a game is good or bad." Li Yun shrugged and could only say like this: "But I promise, this game is definitely a boutique, with sales of at least two million!"

"what?"

This time it was the game's turn to be stunned, and they were all shocked by the exaggerated number.

This chairman, who is still a senior in high school, really dare to say!

"Two million sets? Are you kidding?"

"Hehe, I don't think he understands the game circle at all!"

"Five hundred thousand top days, this is a lot. The cost of this game is no more than five million. If the price is 39 yuan per copy, it can earn ten to twenty million, which is enough."

"Naive, thinking that I can make a good game by writing a good game plug-in?"

Chapter 982: Try it out

The entertainment circle and the game circle instantly merged, mocking Li Yun's whimsical together, and wanting to sell a small game for 2 million points, too naive!

But after Li Yun announced the price of the game, everyone was even more stunned.

"98 yuan?"

"Oh my god, this is too expensive!"

"Let me go. Triple A games are only sold for more than 300, but you can sell 100 for a small game?"

"Let's go, I can't watch this game conference."

"Don't rush to leave, it's not too late to leave after watching the play, there will be Liu Xianxian's performance later, I see how Li Yun is making a fool of, huh!"

"Everyone is responsible for boycotting "Xiao Ming"!"

People in the gaming circle all showed angry eyes, believing that Li Yun simply relied on Liu Xianxian's reputation to make a junk game and let Liu Xianxian's fans pay the bill.

This behavior of capital entering the market to make money is most despised by people in the game circle!

"Is the price high?"

Li Yun asked with a smile, but no one answered.

There is no doubt that everyone feels high!

"Ahem, it seems that everyone has no opinion on this game, so let's move on to the next link!"

Li Yun was very calm and smiled: "Please come to the stage to try out the beautiful guests such as Fanqing Sheng, Liu Xianxian, Gong Qingyu, and let the audience take a look at this game. I dare to sell 98!"

A few women got up and walked onto the stage. There were already five or six computers on it, which could project the game screen onto the white cloth. Of course, some invited reporters could also carry the camera to take close-up shots.

"Woo, Brother Li Yun didn't call my name!" Su Muxin pursed her mouth. Liu Xianxian has no objection. She also knows the name of the palace family and has no objection to Gong Qingyu.

But who is the Holy Brahma? Why did Brother Li Yun call her the first name?

Therefore, even though she was not called, Xiao Chili Su Muxin was the first to rush to the stage and take the lead in seizing a computer: "I'm here to try it out, hehe, with my years of gaming experience, it is guaranteed to be easy to pass!"

Reporters have applied for close-up shooting on stage. Apart from anything else, the footage of Liu Xianxian playing the game is worthy of the entire record.

The little maid Qingzhu also followed up on stage, guarding the saintly lady, not allowing these 'mortals' to approach.

Shooting or something, I always feel that I'm tarnishing the Lord Saintess...

"Who is this expressionless beauty? I haven't said a word until now, but she is really beautiful!"

In addition to shooting Liu Xianxian, many reporters gave most of the other shots to Fan Qingsheng. Although she didn't know how to play games, she was serious about learning step by step while holding a mouse under Li Yun's instruction.

All beautiful women can be attractive.

"Qing Sheng, like this, he is swinging his \*\*\*\*\* to knock down the available ore on the ore."

Li Yun taught her hand in hand, and the little maid on the side looked stunned.

The big bad guy is holding the hand of Lord Saintess, and Lord Saintess actually doesn't object at all, as if it were taken for granted!

"Woo, Li Yun, I don't know how to play~"

Little Chili was jealous and looked at him pitifully.

No way, Li Yun had to teach her, then Liu Xianxian, then Gong Qingyu, all the beauties were taught by Li Yun personally, taking advantage of them.

—Of course, this is the opinion of outsiders. In fact, Li Yun has not only held the little hands of these beauties, but also kissed their little mouths.

Even Xiaojiao, Li Yun has seen many 'secret' photos she sent him individually. The subjects include pink pajamas, hot pants and short sleeves, cool home, aprons, black silk stockings and so on.

Chapter 983: Anchor red potatoes

In the audience, a stand-alone game anchor Red Tudou with 500,000 fans on the barrage video website was holding his mobile phone and said to the live audience in his live broadcast room: "Now it's the guests to try it out, please stay calm and wait. After the beauties played, I immediately applied for a trial."

"Relax, I guarantee a fair and just evaluation, and I will never say good things to Baiyun Technology just because I am on the spot."

The audience in the live broadcast room was noisy, clamoring for Red Potato to express their views on the game.

They don't care about the stars and beauties. They are not theirs anyway. Fans of these games only care about whether the games are fun or not.

"If you want me to tell, the price is 98. It's not very expensive, but very, very expensive!"

Red Tudou made a live broadcast while expressing his own opinions, and said in a contemptuous tone: "The gameplay is described as novel, but this kind of money-trapping game usually finds copywriting that can be written, and swindles a wave of money and runs away .

Later, you are optimistic. If I am kicked out of the press conference for telling the truth, you will help me record the video. I will post the video to station B so that more people can realize the true face of Baiyun Technology! "

He said these words in a tone of maintaining the purity of the game circle, which was really righteous and upright, making the game fans in the live broadcast room all applaud.

"2B's best reward for an airplane: Come on, the anchor, reveal the true face of Baiyun Technology!"

"Miko is not a man to give a small TV: I can't understand this kind of spicy chicken company, \*\*\*\* it, shoddy, shoddy small game actually dare to sell 98 yuan?"

"Mali Mario rewarded a rocket: Come on anchor, you are the fattest."

Red Potato became more excited, and he couldn't wait to take the stage.

But gradually, staring at the projection of the group of beauties on the stage, the words of Red Potatoes became less and less.

This game... seems to have something?

The boxy pixel villains walk, run, and slam the ground with a pixel hammer in the same boxy game world, each time they can be destroyed early.

The wonderful sense of refreshment makes Red Potatoes who have not finished the game feel like they have been electrocuted.

It was like seeing a hidden treasure, he wanted to play, he wanted to play very much!

Finally, Li Yun clicked his name, and Red Tudou almost ran to the stage, and couldn't wait to sit down and play!

"Can all the cubes be destroyed?"

"Mining, mining, I need coal..."

"Inventory synthesis torch, prospecting"

Feng Rongchen knew that he was a professional game player when he saw his operation, so he took the initiative to explain to him: "The world in this game is all randomly generated, and the terrain that the player enters is different every time."

Red potatoes are shocked, all random world? Is it a fresh experience every time?

In his live broadcast room, game fans were all dumbfounded. It turned out that it was not a fixed world, but a completely open game!

"The game's tools are diverse, including drafts, axes, hoes, shovel, and swords."

"Some natural mines are regularly generated. As for what's inside, you can go in and explore later."

"Of course, the mines are also random. I don't even know what will happen as a programmer."

Feng Rongchen does not regard himself as the author of the game. Since this game was bought by Li Yun, Xiao Ming's world has become Li Yun's game.

"Underground mines, there must be rare ores?"

The game motherboard Red Tudou is gearing up. He is sure that there will be good things in the mine, and of course, there will be powerful enemies.

High risk and high return.

Chapter 984: Potatoes' really fragrant operation

In the live broadcast room of a video barrage website, more than 50,000 viewers witnessed the changes in Red Tudou's expression.

From the beginning of righteous indignation, contempt and resentment, to suspicion and curiosity, to excitement and joy, and finally gearing up for fun, a costume that can't wait to play all night in the game world.

"My Cao! Really, did the red potatoes collect money?"

"My Red Potatoes just starved to death. I die here, and I won't play your games...Oh, it's so fragrant, so fun!"

"The law of true fragrance is the truth of the universe!"

"Hahaha, potatoes are so fragrant."

"Say good to give the game a thorn in it? 23333"

Red Tudou seemed to forget that he was broadcasting. He was immersed in the game world and was still trying to build his first 'house' when he was stopped.

"Huh? The ten-minute experience is over so soon?" Red Potato's eyes widened, "I haven't played enough yet!"

His incredible appearance made the audience in the live broadcast room laugh. After witnessing the gameplay with their own eyes, many audiences' views on this "Xiao Ming's World" have changed drastically.

The map is completely random in the world, every time you play it is a new experience.

You can destroy the surrounding blocks, flowers, trees, mine caves, etc. at will. You can use pickaxes and other tools to destroy them, and you can even make bombs to blow up the entire mountain!

It can be destroyed, and it can be built naturally. Many viewers are interested in how to place blocks at will, but unfortunately, there is not much involved in the demo just now.

"If you want to play, you can go to the game's official website to download the game right away, and spend 98 yuan to purchase the activation code for unlimited play!"

Li Yun smiled, "98 yuan is a bit expensive, but two follow-up DLCs will be launched in the next six months, including monster invasion gameplay and exploring new worlds. They are all free, and they are definitely not lost in terms of volume. Medium game!"

"Is 98 expensive? No, it's not expensive at all!"

Red Tudou changed his tone and said firmly: "The special gameplay of this game is absolutely groundbreaking. I can't wait to play it. Boss Li Yun, when will you start selling? I promise to be the first one to buy. I want to recommend the viewers in my live broadcast room to buy it!"

"screw you!"

The audience in his live broadcast room swept up a screen full of barrage, expressing contempt for the red potato's really fragrant behavior.

"Don't worry, after watching this video, the official website will be available for download immediately."

Li Yun gave up his position and let the projection screen start playing the video.

Red Tudou pointed the live mobile phone at the screen, and many reporters, including reporters from the entertainment industry, also pointed their cameras at them.

The reporters realized that in addition to the two breaking news of Beauty Gathering and the big star Liu Xianxian, this "Xiao Ming's World" is likely to be a very popular game.

The video soon began to play, and Feng Rongchen began to act as a background sound introduction under Li Yun's indication: "This is a building built by our planning and testing team in two weeks, which is the company's location: Mingyu Building. ."

"My Cao?!"

Red Tudou was shocked again. He had anticipated that he could place blocks at will, and could build a variety of buildings.

But he didn't expect it to be built by multiple people.

In other words...

"It can be like this!"

Red Tudou watched the video, his mouth opened wide.

Chapter 985: Architectural miracle

I saw more than a dozen pixel villains in the division of labor and cooperation, playing the scene of building a building at 5x speed.

Some people take hoes, some take spades, some specialize in digging stones, some specialize in building roads and trees in front of buildings, some make clouds in the sky, and so on.

Bit by bit, from scratch.

In the end, a 100-meter-high building stood above the ground, and more than a dozen small people gathered on the top of the building, looking down at the whole world.

When the camera is raised, the sky is full of white clouds, and the whole world is extremely magnificent, which is full of pride!

"..."

After the video ended, the people who participated in the manufacture of the Mingyue Building just now were played, including Feng Rongchen, Wu Ke, the front desk lady, game programs, planning, testing, and so on.

More than a dozen people, but more than 30 people have participated in this huge project.

The entire conference site was shocked. The live broadcast room of Red Tudou and the live broadcast rooms of other game anchors, the audience were also shocked by this magnificent scene.

After a long while, Red Potato slapped his thigh suddenly: "Boss, give me a hundred copies of the game. I will find a hundred people from my fan team, form a construction team of the same, and build one in my mind. Fantasy world!"

Everyone laughed. Li Yun thought for a while and smiled at him: "Well, let's play a game before starting the sale."

"What game? Not Xiao Ming's world?"

"No, it's a welfare game."

Li Yun smiled to everyone: "After the game is officially open for download and purchase, the sales volume within half an hour, whoever guesses the most accurately, will get 100 copies of the game activation code specially presented by the company! And, The top five also have ten activation codes, so that the winners can give them to their family and friends to play."

Red Potatoes are overjoyed: "Okay, I like this game. The boss is really generous! I guess it can sell for 300,000!"

"300,000? A little bit less." Li Yun nodded, and motioned to the staff (that is, the game planner) to record the number of guesses.

Everyone had weird faces, and they really didn't know whether to say Li Yun was arrogant or too self-confident.

"300,000 or less? One piece sells for 98 yuan. Elementary school mathematics shows that you can earn 30 million in half an hour. Is this less?"

"Too crazy, wait for a face-slap, I guess 80,000!"

"I guess a little more, 100,000 copies."

"From the video point of view, Baiyun Technology is clearly prepared and has a lot of publicity. I guess 150,000 copies."

"Well, pixel wind is not everyone's favorite. It's about 70,000 or so."

Everyone broke out their own guesses, the most accurate one who won the 100 game, if not sent out but sold out, that is 9,800 yuan, the reward is quite generous!

Li Yun returned to the women, chatting with them while waiting for the results to appear.

Soon, Wu Ke announced the official release of the game and projected the number of downloads on the screen in real time, including downloads from the official website and downloads from the steam platform.

"I bought it first!"

Without saying anything, the anchor Red Tudou directly purchased an activation code with his mobile phone, and then downloaded and activated the game after waiting.

Soon, a number was displayed on the screen: 50.

"Surprised!"

Red Potato was startled, "Someone is faster than me?"

The next second, the numbers jumped again.

"120."

"My Cao?"

"350."

"Wait, there are two hundred people buying in one second? I'll go, I'm over a thousand after I finish saying this sentence!"

"1211, 1544, 2307, 3320, 5700, 8840, 12500..."

Chapter 986: Explosion (Part 1)

At the press conference, everyone was stunned.

After the download was released, it broke 50,000 downloads in just three minutes!

Many people who guessed that there were only 50,000 or 60,000 downloads were all dumbfounded. They reached 50,000 in only three minutes. Even if the downloads are not the purchases, they are already quite amazing!

With an idea, Red Potato asked in his live broadcast room: "Which one of you bought this game? Who didn't buy it? All the bullet screens will be posted."

In an instant, the volume of barrage surged.

"Bought it."

"I have already started, wait for the anchor to start online."

"It's fun to watch the multiplayer construction mode, and I can play with my wife and children."

"98 is not expensive, there are adventure, construction, and multiplayer online, and also promised to have two dlc to play, very conscientious price!"

"Wait and see."

"5M internet speed, already in the game..."

"My internet speed is 10M... During the trial, the game first felt surprisingly good. I thought I would not be used to the pixel style."

Barrage screens are flashing up quickly, and a rough count of Red Potatoes shows that 80% of the people who posted the barrage have downloaded the game, and more than 50% have the desire to buy it!

Based on his 50,000 viewers, a single live broadcast room has contributed more than 40,000 downloads!

Red Tudou looked up, and sure enough, the number of downloads has reached 100,000+!

Everyone looked at each other, stunned by the terrifying number.

The game is not comparable to the video. The game is large in size and takes time to download, so the amount of entry is inherently small.

With 100,000 downloads, it is very likely that there will be 50,000 paying users!

"My mother, what kind of fairy data is this? It's amazing!"

Everyone was shocked, Wu Ke smiled and said, "Before the time when the download volume has soared, the publicity now officially begins!"

Following his order, propaganda news about Xiao Ming's world appeared on video platforms, Weibo, Tieba and other places. Liu Xianxian personally reposted Baiyun Technology's official blog with her Weibo large size, and commented:

"A very fun game, I recommend it to everyone~"

In an instant, the number of downloads soared by half a million.

"I'm going, Liu Xianxian has also joined!" Someone patted his head annoyed, "I knew she would repost Weibo personally, so I guessed 200,000 in sales."

The number of downloads is not equal to the sales, but if the number of downloads is large, the sales are definitely high.

Liu Xianxian has 120 million followers on Weibo, and she has never bought a fan, and has many live followers. She usually reposts and comments on Weibo and can break through one million.

Therefore, after she personally posted on Weibo, the downloads skyrocketed.

"Five hundred thousand, seven hundred thousand, one million, one hundred and three hundred thousand!"

In the end, in the incredible eyes of the left and right, the number of downloads in half an hour was fixed at 4.56 million, which is almost close to 5 million!

"My god, this is going against the sky!"

Someone exclaimed, and everyone clamored to see how much the real purchase amount was.

"I estimate there are half a million sales!"

Red Potato said confidently, he guessed 200,000, no one is higher than him, the first is already in his pocket.

Five million downloads and a paid conversion rate of 10% are already quite amazing data.

But when the final result came out, everyone was shocked again.

"1.21 million 1442!"

Millions of sales shocked the audience.

Someone murmured to himself: "It sold millions in half an hour, this year's hot sale must be this one!"

#### Chapter 987: Explosion (Part 1)

The sales of top triple A games can reach 2 million on the first day, but this "Xiao Ming's World" is different from the triple A games. Although it has strong publicity, there is no trailer released after all, which is what most game circles do. No one knows this game.

This also means that "Xiao Ming's World" still has huge potential.

Games that can be accepted by the public will inevitably be liked by people in the gaming circle, but not vice versa.

"Perfect!"

Li Yun stepped onto the stage again and smiled to everyone: "It seems that my estimated 4 million copies are still less. This game is estimated to sell 10 million copies, which is a good popular game."

Ten million!

Everyone was dumbfounded. With a rough calculation, the game sales amount alone can reach 1 billion, but the market value of the game company is definitely more than 1 billion.

In addition to the game itself, it can also sell peripherals, figures, and develop more follow-up IP.

With one billion sales, the company may be worth more than five billion!

"...Here, I am very grateful to all the beautiful guests for their support."

Li Yun made a final summary. After mentioning the beautiful guests, everyone looked at them again.

These beauties are so beautiful no matter how you look at them, three hundred and sixty degrees of beauty without dead ends!

"Especially thanks to our big star, Miss Liu Xianxian!"

Li Yun smiled at her, and Liu Xianxian responded with a smile.

"So I decided to add another 5 yuan to the charity fund of 10 yuan for each game, especially for Xianxian's documentary, to provide her to help families who encounter difficulties during the school leave."

"...Huh?" Liu Xianxian was dumbfounded.

"what?!"

Many reporters were shocked. Is Liu Xianxian actually on a school trip? !

There has been no news of what Liu Xianxian is doing for more than two months, and people in the entertainment circle are speculating whether she has gone abroad to participate in a major movie.

It turns out that these days she is doing school trips and making documentaries?

"Uh?"

Li Yun reacted, he seemed to have exposed Xianxian's 'secret'.

"Sorry, Xianxian, I'm quick to talk."

"It's fine."

Liu Xianxian spit out his little tongue, "Anyway, it won't last long, and it's okay to say it... Li Yun, do you really plan to donate a few million?"

"Don't you want endorsement fees?" Li Yun shrugged and joked: "This money should be regarded as remuneration, and I will give you money under another name."

"Hehe, then I am disrespectful. Thank you for those who have been helped~~"

The two sang and got together, making reporters more and more suspicious of the relationship between Li Yun and Liu Xianxian.

Liu Xianxian never participates in game conferences. The conferences she is invited to participate in are all top in the industry, such as Chanel's new product launch conference, Polygon Dream, or invited to participate in international film festivals.

Liu Xianxian did not tell her whereabouts, but Li Yun knew that she was on a school trip, and even knew that she was making a documentary. He seemed to know what documentary she was making.

All deeds show that the relationship between the two is not normal!

"Surprised! The international actress Liu Xianxian's boyfriend is suspected to be exposed!"

"Liu Xianxian's boyfriend is this man?"

"Liu Xianxian's first lover has so many confidantes beside him!"

Many similar news headlines have appeared in the minds of reporters in the entertainment industry. Therefore, as soon as Li Yun announced the end of the press conference, the reporters quickly exited, and they rushed back to write articles in an effort to create a hit news.

Chapter 988: Ding, golden gift bag X2

At the end of the press conference, after Li Yun and the beauties he brought left, the employees of Baiyun Technology who had left to clean up the scene first glanced at each other and then cheered.

"Thank you boss!"

"Long live the boss!"

"Oh my God, it's another twenty-month bonus, the boss is too generous!"

"Woo, maybe it's not twenty months, it's thirty months, fifty months!"

"It's so bold and bold!"

The employees of Li Yun's company gave high-five cheers. The boss has promised just now that the previous bonus algorithm is still valid, that is, 100,000 games will be given a monthly bonus.

Just buy and eat 1.2 million in half an hour, which is a 12-month bonus!

A conservative estimate, these employees can get at least 20 months of bonus!

In addition, in the previous 150 months, the old employees actually got 200 months of wages madly, and it was spread out that they absolutely envied the death of a large number of hard-working people.

"calm down!"

Feng Rongchen has become more of a leader after being a manager for a month. He smiled to everyone: "We will not consider bonuses for the time being. I believe that with the generous character of the boss, bonuses will never be less. Don't forget, today is When the game is released, there is still a lot of work to be done."

"Boss Feng is right!" One person smiled and said, "Today we all worked overtime, sticking to it until 12 o'clock in the evening, and doing our best to promote, so that the downloads soared to 5 million, hahaha!"

Everyone laughed. The more downloads, the higher their bonus.

Someone looked at Feng Rongchen enviously and said: "Boss Feng, you are now one of the shareholders, with 3% of the shares. That is to say, this game makes you at least 10 million in income. Wow, I am so envious!"

If the game sells 10 million copies, Feng Rongchen, who holds 3% of the shares, can get a dividend of 30 million. If 30 million copies are sold, Feng Rongchen will become a billionaire directly.

"It's all the opportunity the boss gave me!"

Feng Rongchen was very touched. He was still an unemployed middle-aged man with no name and a pen, and his family almost collapsed.

But accidentally made a game, after being acquired by Li Yun, he immediately became a multi-millionaire, the gap and changes are too big!

Even if dividends are not counted, Feng Rongchen has received at least 5 million in bonuses-as a manager, his salary is very high.

"I believe you will also have a chance!"

Feng Rongchen smiled and said: "When the company goes public, we veterans will get the original shares, and then everyone will be millionaires!"

Everyone was very excited, and someone smiled and said, "Boss Feng, you are wrong? Aren't we millionaires now?"

"Hahaha, it should be said that a multi-millionaire is right!"

With the generous bonus from Li Yun's boss, it can be said that even interns have become millionaires!

After the excitement, everyone began to clean up the scene. After lunch, they had to work hard. Everyone was full of confidence in the future of Baiyun Technology.

---

"Ding, the host makes the right choice in life, rewards golden gift bag\*2, experience value +10 million, all attributes +5000, extra reward: high-tech gift bag\*1, host please make persistent efforts to develop Baiyun technology into a world-class Enterprise, embark on the pinnacle of life, marry Bai Fumei!"

After the press conference, Li Yun unexpectedly received a reward from the system, causing him to stop on the spot with a surprised expression on his face.

It is an exaggeration to reward 2 golden gift bags!

Chapter 989: I will protect you

Sure enough, the place involved in life choices is very important, and the rewards are very generous.

Li Yun has not obtained the high-tech gift bag. It is estimated that it contains technology similar to Xuanyuan's shield. The company's next project decided to open the bag.

"Let's go, let's go to dinner, I have already booked a place." Gong Lianyi rarely spoke at the press conference, and did not go up to try the game.

But she arranged everything properly, which moved Li Yun very much.

Lian Yi is like a gentle wife, silently supporting him behind her back.

Everyone went to eat in a high-end restaurant nearby.

During this period, Li Yun briefly mentioned the events of last night's auction, which made Little Pepper who still didn't care about these things stunned.

"Is this true?" Wu Ke was very puzzled. He got news from a friend last night, but he couldn't believe it.

"Brother Li Yun, is there really anyone in the world who knows spells?" Su Muxin asked impatiently, and then looked at Li Yun with shining eyes: "Brother Li Yun knows how to spells? Certainly?"

"This is true, and I believe that the world will change a lot in the near future!"

"It may be a year, or it may be three to five years. The time is uncertain, but it will happen."

Li Yun paused and shrugged helplessly, "I don't know how to do it now, but ordinary monks are not my opponents. If you encounter strange things that can't be solved, you can tell me, I will solve it!"

Su Muxin is the daughter of the chairman of Nantian Technology, with a noble background. Although the assets are not as much as that of Xiao Mingzhu's, Nantian Technology's influence is far better than that of Xiao's company.

Therefore, Xiaojiao Su Muxin's family may become the target of the Six Demon Gates. Li Yun first vaccinated her to prevent her from panic.

"I know that Brother Li Yun is the best!" Little Chili happily took a piece of meat to Li Yun, and personally sent it to him. The actions were so intimate that the little maid's eyes were staring.

Li Yun even felt that Gong Qingyu and Li Feng's eyes were not right, and quickly let Su Muxin stop.

Xiao Mingzhu smiled slightly. She had seen the abnormal relationship between Li Yun and these beautiful women a long time ago, but when they seemed to be willing, she didn't care too much.

However, Xiao Mingzhu would never like him!

This kind of flower-hearted man, no matter how good she is, she won't like it.

"Boss, what will this world look like in the future?"

Wu Ke smiled bitterly. He really couldn't understand. He was just starting a business with Li Yun and wanted to do a big business, but suddenly he was told that there are immortals in this world, and the immortals are also planning to interfere with the common customs and disturb the animation world.

This made Wu Ke, a top Internet technology tycoon, unacceptable for a while, and was extremely confused.

"I don't know what it will be like."

Li Yun looked at the women around him firmly, "But don't worry, I will protect your safety no matter what, I will guarantee my life!"

Gong Qingyu's heart trembled, and he was deeply moved by his words. Li Yun deserves to be the man she likes. Even if there are many girls around him, this proves that he is excellent, doesn't it?

She Gong Qingyu is extremely talented, and she will never allow anyone inferior to her to be her husband. She would rather be alone for a lifetime than ordinary people!

"Ahhh, brother Li Yun is so handsome~!"

The other women also showed touched expressions, only Xiao Chili was the most unrestrained, who wanted to kiss Li Yun directly with his greasy little mouth, and was directly suppressed by Li Yun.

"No nonsense!"

"Ugh~, people really like Brother Li Yun~"

Seeing all this, Xiao Mingzhu thoughtfully, no wonder there are so many confidantes around Li Yun.

Chapter 990: The magic of Yongning Princess

After lunch, Li Yun said goodbye to Liu Xianxian and the others, and took Li Feng and Princess Yongning back to Mansion 3.

In a living room on the second floor, everyone looked at Princess Yongning with solemn expressions.

Sage Fanqing is treating her. Princess Yongning has been diagnosed by countless imperial doctors. Even four hundred years ago, the nine-day fairy personally diagnosed her pulse in a strange way.

It's just like what Fan Qingsheng did to her.

Lines of white silk thread shoot out from the five fingers of the sage Fanqing, piercing her into Princess Yongning's body like acupuncture. The silk thread is completely composed of the mana of the Holy Fanqing. It will not cause a single wound, but it can Princess Yongning has her whole body checked, which is better than Chinese and Western medicine!

After a long time, Fan Qingsheng finally withdrew the white silk thread and began to meditate.

"Sister Qingsheng, can you tell me what's wrong with me? Someone showed it to me before."

Princess Yongning asked in a weak voice.

"Is the Lord Saint of the previous generation?" Qingzhu was puzzled. She didn't know much about the Lord Saint of the previous generation, and rarely saw the face of that adult. The entire Hidden Sacred Valley could see the previous generation of Saints. For adults, there is only the Sanctuary of Vatican.

"What did my master say?" Fan Qingsheng asked her.

"It seems...nothing was said."

Princess Yongning's face blushed, she glanced at Li Yun, and said shyly: "She said she can't cure me, but it can keep me alive. If there is destiny, the first person I meet after waking up is My husband, he will heal me."

"She probably didn't mean me." Li Yun rubbed her little head, and Princess Yongning became more shy. She felt that Fairy Jiutian was talking about Li Yun.

"Can anyone really predict what will happen four hundred years from now?" Gong Qingyu was surprised, and she also felt incredible about Princess Yongning's life experience.

Sage Fanqing shook his head, glanced at Princess Yongning, and said: "Your physique is very special. There is something different from ordinary people in the Sea of Knowledge, but I can't find out exactly what it is. It was born with you. Things cannot be acted rashly."

"Is there something in the sea of knowledge?"

Everyone was shocked, but Li Yun thought of the time he entered the Sea of Knowledge World of Xiaozheng Tai Zhou Mingpeng.

People's knowledge in the sea is very miraculous, possessing all kinds of incredible powers, the soul resides here, and the incomparably powerful divine consciousness is also extended from this.

The sea of consciousness is like a human soul center, and everything related to consciousness unfolds from it.

"Husband, husband, I..."

Princess Yongning was a little frightened, her petite body shrank and her expression was pitiful, which made Gong Qingyu who she saw for the first time unable to help but hug her into her arms.

Strangely speaking, Gong Qingyu had no affection for the women around Li Yun, such as Li Feng, Liu Xianxian, Su Muxin, etc., but only Princess Yongning made her want to hug her.

The little princess is like a cute, well-behaved and docile little loli, who can inspire her as a sister.

"fine!"

Li Yunren rubbed Yongning's little head indulgently, "Don't worry, as long as you take the pill on time, Yongning will not be a problem for your longevity. I will be able to cure it in a few years!"

"Yeah." Zhu Shue nodded vigorously. She believed that her husband could cure her.

In fact, after stepping out of the ancient tomb built for her by the emperor, except for the sleepiness and accident as before, everything else was fine.
