

GOF 1681

Chapter 1681 Return of His Avatar

The most important reason for the White Armor Emperor's death was that this guy thought that he could control everything by sealing Han Fei and Queen Life in his Origin Sea.

However, he didn't expect Han Fei to have the help of the old turtle and the Demon Purification Pot.

From this, it could be seen that the Origin Sea wasn't necessarily safe. For example, the Origin Sea of the divine son was also occupied by Xue Fan.

Of course, the death of the White Armored Emperor was also caused by the dazzling arrow of Queen Life. The corrosive power on the arrow even broke the defense of the White Armored Emperor, which showed how poisonous it was.

The Godfiend Sea was the border between the Origin Sea of the White Armored Emperor and the space valley in the cage.

Therefore, when the White Armored Emperor died, although there were no exaggerated Great Dao cracks in the cage, above the space valley, there was a shadow of a shocking Great Dao crack.

Of course, only the Venerables could see this.

The entire Water-Wood World was in an uproar.

It had only been half a year. Although a Venerable would die almost every month, the shocking Great Dao crack was unprecedented!

Someone exclaimed, "Who died? Why such a huge uproar? It's even louder than the death of a Half-King!"

Someone sneered. "Have you ever seen a Half-King die?"

Someone said, "But this is indeed the greatest Great Dao crack we've ever seen."

Only a few Venerables looked at the void and signed with mixed feelings.

Ning Jing murmured, "This must be the legendary... death of a king."

Li Daxian was chasing a sea demon who was at the peak of the advanced Venerable level. When he saw this scene, he couldn't help but ask in surprise, "A king died? The White Armored Emperor is dead?"

Luo Xiaobai and the others were exploring the old site of the White Shell Royal City. Seeing this scene, they looked at each other in shock. Zhang Xuanyu asked, "Did Feifei just kill a king?"

Le Renkuang asked, "It's been only half a year! How could it be possible?"

Zhang Xuanyu sneered. "How could it be possible? It's entirely possible. I even believe that he can become a king tomorrow, not to mention killing a king."

Luo Xiaobai said indifferently, "Don't worry about him. The ground veins of the White Shell Royal City are still here. This time, we'll intercept the ground veins and improve our strength to that of peak-level explorers. Next, we should hunt sea demons and prepare to advance to the level of a Half-Venerable."

As the Godfiend Sea collapsed, the channel to the Godfiend Sea disappeared.

However, the entrance to the other three forbidden-level trial grounds was still there.

Han Fei looked at the entrance of the Demon Subduing Tower and thought, This entrance was filled with void storms last time. I wonder how it is now?

The corpse of the White Armor Emperor was collected by Han Fei.

At this moment, Han Fei looked at Queen Life and said, "Go back to the Heavenly Palace to deliver the message! Now we're going to greet a golden age that will last for tens of thousands of years. I still have something to do." Faced with Queen Life, Han Fei was no longer as cautious as before. Queen Life was no stronger than the White Armor Emperor, so Han Fei was not afraid of her at all.

This was the confidence of a strong master.

And Han Fei knew that once he became a king, his level would be at least comparable to the old turtle's, much stronger than the White Armored Emperor and Queen Life. Queen Life glanced at the forbidden-level trial grounds but didn't pay much attention.

The White Armored Emperor had died. So what if Han Fei was given these secret realms?

From then on, the entire Water-Wood World would have no enemy... On the Sea Cloud Divine Tree, billions of creatures would quickly rise.

"Okay!"

After Queen Life left, the old turtle said, "That White Armored Emperor is a little weaker than I imagined. However, his strength is not bad. An existence like him is the most common kind of king in the Infinite Ocean. It's not that he's not strong, but he's just ordinary... If they survive the long time, they might have a chance to become an emperor. However, they won't be very strong. And such a person has almost no chance of becoming an emperor."

This time, after the White Armor Emperor died, the old turtle explained the White Armor Emperor's status among the millions of races in the Infinite Ocean to Han Fei, probably to let Han Fei know that the White Armor Emperor was just an ordinary king, and it was not a big deal to kill him.

Han Fei nodded and summoned a peak-level Venerable projection.

The peak-level Venerable projection directly entered the Demon Subduing Tower.

On the seventh floor of the Demon Suppressing Tower, Han Fei's projection looked around and found no suppressed sea demons.

However, in the blink of an eye, a silver light stabbed over.

Clang! Han Fei's projection had independent thoughts!

The projection drew out a saber and blocked it.

The attacker only attacked once and didn't attack again, but Han Fei felt as if he was fighting against himself. It was a very strange feeling

Yes, his projection saw an identical version of Han Fei standing opposite him as if looking at himself.

Han Fei's avatar issued an order in his heart, and the peak-level Venerable projection dissipated. Then, a wisp of soul and surging energy was absorbed by the avatar. With a crack between the eyebrows of his avatar, his avatar's strength suddenly broke through and reached the Half-Venerable realm.

Han Fei grinned. "I didn't expect to complete the last step of the breakthrough in such a way. Hiss... My original body is already a Half-King? F*ck, it's a whole realm higher than half-venerables?"

Han Fei's avatar looked confused at this moment. All these years, he had been fighting, comprehending, and making breakthroughs, but he always lacked some opportunities. Therefore, Han Fei immediately figured out the

key.

After absorbing the projection, Han Fei, who was in the Demon Suppression Tower, understood what had happened over the years.

The big clans were wiped out, there were four major powers in the cage, and the White Shell Royal City was annihilated. Everything seemed so simple and natural. In addition to his experiences of these years, there were also some new great techniques and combat skills, which Han Fei's avatar all obtained by reading his memories.

He learned some knowledge that he didn't know before.

Immediately, an idea popped up in his avatar's mind. His original body was going to explore a new world.

Yes, Han Fei still stayed here after killing the White Armor Emperor just to release his avatar.

Otherwise, even if his avatar could come out in the future, he would have to face the vortex sea area... That wasn't something ordinary Half-Venerables could tackle.

Han Fei waited outside the entrance of the Demon Subduing Tower for about half an hour, waiting for his avatar inside to absorb the memories and power of the projection.

At this point, taking the spot where his projection just landed as the reference point, Han Fei thrust his spear out.

Bang!

At the same time, a void turbulence appeared in the passage of the Demon Subduing Tower. As the turbulence surged out, a figure holding double knives and stepping on a large array struck over with clangs. At Han Fei's current level, with the power of his Great Dao, he could display the power of a king for a short time. So he could clear the passage of the Demon Subduing Tower.

When his avatar appeared in front of Han Fei, strangely, Han Fei's thoughts began to synchronize with his...

The combat experience and combat comprehension of his avatar in the Demon Subduing Tower appeared in Han Fei's mind.

And Han Fei's combat experience and combat talent also appeared in the mind of his avatar.

In fact, when the two of them stood together, they didn't look like two different people at all, but like a man and his mirror image. Almost in a few seconds, the memories of the two were completely synchronized.

At this moment, Han Fei discovered another problem. His avatar couldn't have three Great Daos at the same time but could only choose one.

Han Fei frowned slightly. He had passed on his understanding of the power of the Great Daos to his avatar, but it remained to be seen which Great Dao his avatar would take.

At this moment, the Great Daos that Han Fei could use was the Great Dao of Heaven Enlightenment, the Great Dao of Time, the Yin-Yang Great Dao, the Great Dao of Invincibility, and the Great Dao of Metal Swallowing of Jin Changhai. The Great Dao of the White Emperor Armor had been absorbed by the Demon Purification Pot.

Apart from that, his original body's Great Dao of producing something out of nothing couldn't be inherited by his avatar.

Han Fei thought for a moment. In the end, he decided to let his avatar study the Great Dao of Space based on the Near at Hand Technique.

Han Fei felt that as long as he was given time, he could master this Great Dao.

The problem was that he had so many Great Daos, so he didn't have the time to study the Space Great Dao.

How great would it be to let his avatar master this Great Dao? Then he would just master it by fusing his memory with his avatar's.

His avatar had just broken through to the Half-Venerable realm and needed to consolidate his cultivation.

At the same time, the tremendous resources in Forge the Universe could also provide for his avatar's cultivation. He hadn't left yet, so he wouldn't release his avatar for now, so as to avoid unnecessary suspicion.

Half a month later.

Han Fei and Queen Life summoned most of the people scattered outside the sea.

That was Han Fei's opinion.

Compared with temporary gains and losses, the connection between the two worlds must be put on the agenda immediately. Han Fei was eager to become a king.

At this level, he knew that only when he became a king would he feel safe.

Otherwise, he would forever be a caged bird in the cage of the Yin-Yang World and Water-Wood World.

In the past half month, Han Fei had tried to find a way out of this cage with the Vast Ocean Navigator...

Unfortunately, this time, the Vast Ocean Navigator didn't give an answer.

Han Fei even discovered in shock that he couldn't find the way to the cage from the Water-Wood World!

Earlier, Han Fei and the old turtle had guessed that it would be more difficult to enter the cage as one became stronger. It was almost impossible to enter the cage when one reached the King Realm. Zhao Xianglong could enter it probably because tens of thousands of years ago, the cage was not as powerful as it was now.

The Water-Wood World was already of no use to him anymore, so Han Fei was about to return to the Yin-Yang World. He still had some things to arrange. After finishing those matters, he would have to find his way to become a king!

Chapter 1682 Interconnected of the Two Worlds

The Yin-Yang World was booming now.

The City of Justice had become the second-largest city in the Yin-Yang World. The experts in this city even exceeded the Thousand Star City.

Although Han Fei wasn't around these past few years, Xue Shenqi took Han Fei's place in dealing with the related matters.

For example, independent teleportation arrays were built between the 36 towns and the Scattered Stars Island.

So were between the 36 towns and the Thousand Star City.

There were also as many as 36 long-distance teleportation arrays established between the Thousand Star City and the Scattered Stars Island.

It could be said that Xue Shenqi's main job all these years was to repair roads. Han Fei was the one who proposed that.

When the teleportation arrays were all opened, it was unbelievably convenient to travel among the Thousand Star City, the 36 towns, and the Scattered Stars Island.

Before, the teleportation cost was quite high, but now special subsidies were provided. Therefore, people could travel among these places freely.

Of course, development would also bring some problems. There would also be some special situations, such as the strong bullying the weak...

Although Xue Shenqi had tried his best to register the entrances and exits of various places and reorganized the law enforcement teams in various places, these kinds of problems were still endless.

It could only be said that in a world of cultivators, the strong could always despise the weak. Therefore, this world was still not safe... In terms of the system, there were a lot of loopholes to exploit.

However, this didn't affect the rise of most people in Yin-Yang World.

At least, the rise of fishing masters and great fishing masters was dozens of times easier than before.

On this day.

On the Scattered Stars Island, fishing boats were coming and going in all directions. There were people fighting on the coastline of the Scattered Stars Island. Some needed resources, and some needed to rise. People from the City of Justice came and went, taking missions from the mission hall.

Boom –

Boom –

Boom –

In the sky, there seemed to be a drum beating like thunder.

Countless people on the Scattered Stars Island looked up, only to hear nothing.

However, the drum beats lasted for hundreds of seconds. On the west side of the Scattered Stars Island, countless people who were hunting were horrified.

Someone exclaimed, "What is that? Those flying in the sky... Those are insects... so many insects..."

Someone was horrified. "There are birds! My Sea God! So many birds..."

Buzz!

The sky curtain suddenly opened in the sky.

Seeing the sky curtain, many people were relieved. In recent years, only Marshal Han liked to use the sky curtain.

The appearance of the sky curtain meant that Han Fei was not far away.

Sure enough, in the sky, there were nearly 200,000 human beings who spread their wings and flew in the sky like heavenly soldiers.

Beside the human race, countless big birds were flying, covering the sky.

On the other side, densely packed beetles of various colors were flying with buzzing sounds. On the backs of many beetles, there were some tree demons poking their branches.

Some insects that couldn't fly were marching on the sea.

Someone was hunting on the surface of the sea. Who could have expected so many terrifying insects?

These people looked at the sky in shock.

In the blink of an eye, a dense mass of insects rushed over on the surface of the sea. They bared their fangs, waved their claws, and marched on the waves, looking really scary. When the insects passed by them, they circumvented them and looked at the people blocking their way now and then.

All these people could hear was buzzing sounds, and an insect buzzed. "Is this Yin-Yang World? Sure enough... ugly people everywhere here. The spiritual energy here seems to be scarce."

A bug replied, "Spiritual energy is only one aspect. We haven't met any enemies here. It seems very safe." A bug said, "I heard that there are islands flying in the sky here... Where are they? I don't think I see any!"

There were also insects, who shouted to the passing crowd, "Humans, hello!"

"Humans, have you had your dinner today?"

"Humans, don't look at us with that expression. We don't eat humans."

In the sky curtain, Han Fei and Luo Xiaobai appeared on the back of a big insect. Han Fei shouted, "All compatriots of the human race in the Yin-Yang World, I'm Marshal Han. More than three years ago, I led an army on an expedition. During the three years, under the leadership of Commander Luo Xiaobai, the 250,000 soldiers of the Yin-Yang World fought bravely and killed a king, dozens of sea demon Venerables, and hundreds of thousands of sea demons in the battle. Now we have returned!"

Han Fei said solemnly, "In more than three years, more than 60,000 people were injured or died in our expedition. They created a glorious era for us. They're worth honoring... With their efforts, 32 people in the expeditionary army became Explorers, 13,568 became Law Enforcers, 58,624 became peak-level Hidden Fishers, and the rest were at least intermediate Hidden Fishers... This is a sign of prosperity for our human race..."

"Hiss -"

In City of Justice of the Scattered Stars Island, the moment Han Fei reported the numbers, countless people gasped.

How could they not know what an Explorer meant?

There weren't many explorers on the Scattered Stars Island in the first place. Now there were over 30 more of them? How enviable!

More shockingly, now they had over ten thousand law enforcers more because of this trip? Was it so easy to become a law enforcer now?

Someone exclaimed, "More than ten thousand law enforcers! It's only been more than three years! What kind of godly place is Water-Wood World? Just three years and more than ten thousand law enforcers have been produced?!"

A Hidden Fisher who didn't go was horrified. "Is the probability of a breakthrough so high? It seems that I should have gone there! Otherwise, I might have become a Law Enforcer..."

Chen Sanbai and Xue Shenqi stood in the Transverse Mountain, quietly watching this scene.

Xue Shenqi said, "Elder Chen, the two worlds... are connected."

Chen Sanqian nodded slightly. "This is a good thing. According to history, we once joined forces with that side. However, it's been too long, so long that people have forgotten about it. I never expected to see such a grand occasion again today." Cao Tianzhi watched this scene from a distance. When he saw that Cao Qiu and the others were fine, he breathed a sigh of relief.

However, Cao Tianzhi was shocked by the news that Han Fei had slaughtered a king.

Although most people were surprised at Han Fei's slaughter of a king, they didn't know much about kings.

After all, Old Demon Chu had once claimed to be a king, but ended up being killed by Han Fei. However, Han Fei declared that he had killed a king as if he killed a Venerable.

However, Cao Tianzhi was different from Tang Yan!

He thought this news might be true because it had been admitted by Han Fei.

After all, this kind of thing couldn't be fake. He could just ask someone.

Han Fei continued, "Everyone, the people around me are the allies of the Water-Wood World. They are the Insect Clan from the Water-Wood World, who are very powerful yet friendly to us. Whenever the insect race army marches, all creatures will make way for them..."

When Han Fei introduced them to this point, countless insects couldn't help but raise their horns and flap their wings proudly.

The buzzing sound was even louder!

Countless insects thought to themselves, Han Fei was really good at wording. Whenever the insect race army marches, all creatures will make way for them, which sounded so domineering...

Han Fei said, "And the Sky Clan. They are the overlords of the sky and have unparalleled speed and air combat ability..."

After all, as the first races to come to the Yin-Yang World to communicate, knowing that there were almost no Sky Clan here... the Sky Clan enlarged their bodies.

Each of them was extremely huge, covering the sky and sun. Han Fei continued, "And the demonic plants. They are born manipulators..." The Tree-Men waved their vines and echoed the atmosphere. However, the Tree-Men were more like curious babies, waving their tentacles wildly, unable to show any momentum...

In the end, when the sky curtain fell on the bodies of the humans of the Water-Wood World, including Shu Xiaoman and the others, everyone on the Scattered Stars Island exclaimed.

"Damn, aren't they too beautiful?!"

"F*ck... are they really humans? I think they are... fairies!"

A female cultivator said in shock, "Wow, so handsome. Is that really a man? Why is he more beautiful than a woman?"

Countless people couldn't help but smile stupidly.

Someone licked his lips. "I admit that I'm tempted..."

The people of the Yin-Yang World were excited, while the people from the Water-Wood World were all amazed. They were also curious about human society in the Yin-Yang World...

When they flew past the sky of the Scattered Stars Island, Luo Xiaobai and the others were all puzzled. "Han Fei, why are you still flying?"

Zhang Xuanyu said, "Feifei! You'll be leaving the Scattered Stars Island if you keep going!"

People on the ground and in the sky were all puzzled, wondering where Han Fei was going with these people.

In the sky curtain, Han Fei walked thousands of kilometers with each step. Stepping on the void, Han Fei walked to the south of the Scattered Stars Island and stood on the shallower waters. Han Fei shouted, "Human beings of the Yin-Yang World, I announce that in half a month, I will open a channel between the Yin-Yang World and the Water-Wood World, and the two worlds will be connected. Now, please allow me to waste some time..."

Han Fei stood still in the air, and a white lotus suddenly appeared in his hand.

Everyone was wondering what kind of a treasure it was.

Han Fei waved his hand and threw it into the void. The white lotus slowly grew larger and larger in midair and gradually bloomed. When the white lotus floated thousands of kilometers away and fell on the sea, it shattered with a bang.

Buzz

In the next second, the seabed was shaking slightly. In the void, mist swirled and mountains seemed to appear in the mist...

Everyone's eyes were full of shock, and they saw a large number of mountains emerging.

Bang!

On an extremely tall mountain, there was a storm raging, and nine huge snake heads extended into the sky. On the other mountain, there was a huge vine that reached into the sky, its vines swaying between the clouds.

There were cone-shaped grasses all over the mountain dancing in the sky like hundreds of swords with swishes. It was Sky Survey Sisal.

Han Fei shouted, "From now on, another place will be built outside the Scattered Stars Island, which will be used as the connection area of the two worlds... And this place is called... Grand Myriad Mountains."

Chapter 1683 Han Fei Resigned

There would always be an uproar when something big happened.

The return of the expeditionary army was definitely a big event. In the entire Scattered Stars Island, those who should go out to accept missions were basically not out at this moment.

Many people wanted to go to the Grand Myriad Mountains...

In a moment of impulse, Han Fei released the Thousand Mountain Ancient Realm. However, the problem of the death aura in it hadn't been resolved yet, so people still couldn't live in it for now.

However, this didn't hinder the status of the Thousand Mountain Ancient Realm!

Soon, it would be the place where the major races were most willing to stay.

As for the subsequent matters, they were all left to Luo Xiaobai.

For seven consecutive days, Luo Xiaobai didn't sleep at all.

Luo Xiaobai didn't take a break, neither did Han Fei and the others. They were all helping to plan the new layout for the Scattered Stars Island.

Finally, on the seventh day, Luo Xiaobai asked the people who had been to the Water-Wood World to act as guides, leading the various races of the Water-Wood World to enter the Scattered Stars Island.

As soon as they entered, the Scattered Stars Island immediately became a place where the major races converged.

Although the human beings from the Yin-Yang World and the Water-Wood World were both human, due to the difference in their appearances, they were still considered another race.

Since then, the five major races had gathered, and the whole City of Justice was very lively. And during this period of time, the trading business became prosperous.

Both worlds had their own specialties.

The City of Justice had many combat skills. Although there were not many resources, everyone had different resources, which didn't affect the exchange of resources.

Because there were too many races, the arena naturally grew.

The merchants of the Million Gold Town developed their business onto the Scattered Stars Island. All kinds of living facilities for cultivators were being built. However, the land on the Scattered Stars Island was limited and every inch of it was precious... Even so, the related departments were popping up like mushrooms after a rain.

Seven days passed.

In the Thug Academy.

The four of them, plus Old Jiang, were preparing to cook.

Oh, there was also Li Daxian. At this moment, he was dealing with the death aura of the Grand Myriad Mountains.

There was too much death energy there, suitable for Li Daxian to cultivate. When he finished absorbing the death energy there, the Grand Myriad Mountains would be officially open to the public.

At this time, there were only six people from the Thug Academy in Yin-Yang World, and the others including Old Bai, Xiao Zhan, Wenren Yu, Jiang Qin, Yang Xie, and Su Daiji were all left in the Water-Wood World.

For them, the Water-Wood World brought them an explosive period of cultivation.

In fact, for the expedition army who returned, there weren't many who really wanted to come back. However, under Han Fei's command, they had to come back.

In Han Fei's words, they came back to serve as the bridge between the two worlds.

The 200,000 people were shocked. I've become a bridge? Since they were given such great responsibility... many people thought that they were very important and had even been involved in the course of making history. Therefore, almost all the people who could return had returned.

Those who didn't come back simply couldn't be found... Anyway, Old Bai and the others all used this excuse.

At this moment, Le Renkuang was preparing barbecue and Luo Xiaobai was preparing spiritual fruits and drinks.

Old Jiang was preparing his dumplings.

Zhang Xuanyu didn't want to do anything and said, "Feifei! You must have collected some high-end ingredients, right? Give us some Venerable-level seafood to taste?"

"Cough, cough..."

Old Jiang rolled his eyes. These b * stars. Venerables are not your food!

Han Fei curled his lips and said, "Kuangkuang is roasting one.

Le Renkuang was unhappy to hear that and said, "Feifei! What kind of meat is this? It's so tough. I've already brushed Half Venerablelevel fish oil on it several times."

Han Fei said carelessly, "This is the meat of the White Armored Emperor! It may be tough, but it should still be edible..."

"Puff -"

Clang!

"Shoot ~"

Luo Xiaobai spat out the spiritual fruit in her mouth and stared at Han Fei speechlessly.

Old Jiang was so angry that his beard was raised. He roared, "You spendthrift... How can you just give a king's flesh to this little fatty to roast? Give it to me. I'll do it myself..."

Zhang Xuanyu's eyes widened, and he swallowed. "Can... Can we eat this?"

Han Fei laughed and said, "Alright, I won't tease you anymore... That's the flesh of the Half King-level Sea Controlling White Shell. Each of you can eat about five skewers. Let's eat hot pot as the main food! Make it with a lobster at the junior Venerable level I caught..." "Huff -"

Everybody was relieved to hear that. A king's flesh?! They almost peed in fright. Two hours passed. Next to the hot pot, everybody chewed the clam meat with difficulty.

Zhang Xuanyu said, "If we eat this thing every day, we'll probably become Venerables in a year."

Luo Xiaobai said, "You're exaggerating. It will take three years."

Le Renkuang was speechless. Is there a big difference between one year and three years?

However, he glanced at Han Fei and was immediately discouraged. Okay! The difference seems to be huge.

When they were full, Luo Xiaobai and the others stopped eating. Only Han Fei and Old Jiang were still stuffing themselves.

Luo Xiaobai said, "Han Fei, where are you going next?"

Luo Xiaobai and the others could guess what Han Fei was thinking. Han Fei was never the kind of person who would stay in one place for a long time since he was a child...

Now, the Yin-Yang World was peaceful, the big clans had been cleared, and the Sea Demon Royal City on the Water-Wood World had been destroyed. Now, it had almost become a paradise for adventurers.

With Han Fei's strength, only Queen Life could be his opponent in the two worlds.

Old Jiang said, "Han Fei, when can we go back to the Central Holy City?"

Han Fei said, "The problem of the Yin-Yang Heavenly Palace hasn't been resolved. The Heavenly Dao Dharma Eye is still there. Next, I have to find a way to leave the Water-Yang World and the Water-Wood World."

Zhang Xuanyu asked in surprise, "Are you going to the cage?"

Luo Xiaobai keenly realized something. "Are you going further out of the cage?"

Everyone couldn't help but look at Han Fei. He grinned. "I'll try if I can get there..."

"Hiss"

Everyone gasped. Go out of the cage?

It was a brand-new world!

What awaited him there might be a crueler environment than the Yin-Yang World and the Water-Wood World.

Han Fei said, "I'll stay here for the next few days... From now on, Xiaobai, you'll still be responsible for the Scattered Stars Island." Luo Xiaobai said, "I'll manage it for you temporarily."

Han Fei grinned casually and took out a few Star Beads. "These are Star Beads of the Chu Sect, the Cao Family, and our Thug Academy. Among them, the Chu Sect's Star Beads are the best. This is why the Chu Sect had been able to do whatever they wanted those years."

Luo Xiaobai and the others were surprised. "Nine-star star beads? No matter how good the Star Beads are, we can't use them, right?"

Han Fei took one out and held it up. "This Star Bead is very safe inside. The time ratio inside to outside is ten to one. In other words, ten years pass inside but only a year passes outside."

"Hiss ~"

Old Jiang grabbed the Star Bead and said, "Really? Isn't this something that can only be done by the Great Dao of Time?"

Seeing Old Jiang looking at the Star Bead up and down, Han Fei said with a smile, "Even the Great Dao of Time can't do this. This kind of Great Dao rule has already exceeded the power of ordinary kings. Therefore, let's keep this Star Bead for ourselves."

Old Jiang, Luo Xiaobai, and the others all nodded.

Who in this world was truly selfless?

Of course, Han Fei had his own selfish motives, so did Luo Xiaobai and the others.

Besides, there was only one such Star Bead. Only by holding it in their hands could they help the human race rise!

If he released it now, there might be a big problem...

Three days later.

In the past three days, apart from eating, drinking, and sleeping with Luo Xiaobai and the others, Han Fei only wandered in the City of Justice occasionally.

Even Han Fei couldn't believe that he had created such a prosperous era. It would be a lie...to say that he didn't have a great sense of accomplishment.

On this day, Luo Xiaobai was dealing with the problem of opening a passage between the two worlds when Han Fei suddenly appeared.

Luo Xiaobai was puzzled. "What's wrong?"

Han Fei said, "Look at the sky!"

In the sky, the sky curtain opened again.

Yes, the public didn't know how many times they had seen the sky curtain opened... Basically, whenever the sky curtain opened, something big would happen. When Han Fei was in position, this became a tradition.

Therefore, when the sky curtain opened, people put down what they were doing and looked up.

This time, Han Fei, dressed in green, said unhurriedly, "My fellow soldiers on the Scattered Stars Island, I, Han Fei, have swept through the Ten Thousand Demon Valley, annihilated the army of the Black Evil Conch King, and razed the big clans in the Thousand Star City during my nine-year reign. And I've established a friendly relationship with the neighboring Water-Wood World and slaughtered a sea demon king... Today, I'm very glad to see the City of Justice, the Thirty-Six Towns, and the Thousand Star City... peaceful and prosperous..." The people on the Scattered Stars Island seemed to realize something and became solemn.

Han Fei said, "However, there is one last thing that I need to do for the Yin-Yang World... That is to break the rule that the Yin-Yang World can't have a king... I don't know how many years it will take me, so I'll pass on the position of supreme commander of the Scattered Stars Island to Luo Xiaobai, who was also the commander of the expedition army."

"Hiss ~"

Countless people were shocked.

Someone shouted, "What? Marshal Han wants to quit? It's only been nine years!"

Someone sighed. "What do you know? The position of the supreme commander has clearly limited Marshal Han's development. Marshal Han wants to become a king."

Someone exclaimed, "Although I knew that Marshal Han might retire early, I didn't expect it to be so early!"

Someone asked, "Is it really appropriate to pass on his position to his junior sister?"

Someone sneered. "Do you know who Luo Xiaobai is? She's from the Divine Manipulator family of the Thousand Star City and has mastered the Luo family's Divine Technique. She's a Heavenly Talent of the Thug Academy and has reached the peak of the Explorer realm. It's said that she's about to become a Half-Venerable."

Someone was surprised. "How do you know that?"

The man said with a smile, "The news has spread secretly in the Expeditionary Force. Many people know about it now."

The man was puzzled. "Isn't she still much weaker than Marshal Han?"

The others all looked at the person who spoke as if looking at an idiot. "Marshal Han, how can he be considered a normal person? The former supreme commander, Xue Shenqi was also an Explorer when he took the position. How old is Luo Xiaobai? With her monstrous growth speed, she would become a Venerable soon..."

For a moment, everyone was talking and chattering

Luo Xiaobai looked at Han Fei in surprise. "You..."

Han Fei smiled in the sky curtain. "I didn't practice nepotism. Luo Xiaobai is much better than me in management, strategy, and planning. Her strength has reached the peak of the Explorer level. It will only take a few years for her to become a Venerable... As the saying goes, every generation brings forth a

talent. In the future, if a Heavenly Talent catches Luo Xiaobai's eye, he may become the new supreme commander of Scattered Stars Island..."

With that, Han Fei grabbed the thirteen-star badge and handed it to Luo Xiaobai through the air, saying with a smile, "I'm done being the supreme commander of the Scattered Stars Island. Next, I'm going to become a king..."

Chapter 1684 The Time Dragon Carp Came to Han Fei

He didn't formally bid farewell to Zhang Xuanyu and the others, because these days with them at the Thug Academy were already a kind of farewell.

After Han Fei closed the sky curtain, he chatted with Luo Xiaobai alone.

Giving Luo Xiaobai a Sun-Moon Shell, Han Fei said, "These things are for the Thug Academy. They have nothing to do with the people of Yin-Yang World. We deserve them... Don't donate them!"

Luo Xiaobai glanced at him and her eyelids twitched. "Okay! When will you leave?"

"Now."

Luo Xiaobai said solemnly, "Come back soon."

Han Fei grinned. "I'll try my best. Right, There is one more thing..." Luo Xiaobai: "???"

The void trembled, and another Han Fei appeared. This Han Fei's skin was slightly fair, so he was naturally Han Fei's avatar.

His avatar said, "I'll stay."

Luo Xiaobai couldn't help but say, "This is..."

Han Fei's voice came from his avatar. "I'm the avatar of my original body, and I'm now a Half-Venerable. Avatars have exactly the same souls as the original bodies. You can take this avatar as one of my trump cards."

Luo Xiaobai smiled. "A dummy?"

The avatar immediately said, "What are you talking about? I know everything about you, OK? As I said, avatars are the same as the original bodies."

Luo Xiaobai couldn't help but smile. "Then stay! We happen to need manpower. You are my guard from now on."

Han Fei: "..."

Of course, Luo Xiaobai made a joke, but Han Fei still shattered the void and left.

In the Sun-Moon Shell, Han Fei left behind a Half-King, 10 Sea Demon Venerables, and more than 30 ultra-quality Divine weapons. As for how to deal with them, it was up to them...

Leaving the Scattered Stars Island, Han Fei appeared on the back of the Cloud Whale 30,000 kilometers away.

Han Fei sat cross-legged and grabbed the corpse of a Venerable-level sea demon. "Would you like to eat this?"

Tang Yan said, "Just with a Venerable, you want me to help you guard the Yin-Yang World? Isn't it too cheap?"

Han Fei asked, "It's a peak-level Venerable, and you just need to watch the Yin-Yang World for me for several years. Is it too much?"

Tang Yan simply said, "What if Cao Tianzhi suddenly launches an attack or tries to forcibly transcend the king-level tribulation?"

Han Fei couldn't help but laugh. "Even if I weren't here, would you dare to transcend the king-level tribulation? To be honest, even I wouldn't dare."

Tang Yan paused for a moment. "Are you sure you can leave this cage? Can you enter the Wall of Death now?"

eve

Han Fei said, "I can try, but I didn't lie. Although that cage looks extremely tough and even a king can't break it... maybe it's really about to collapse." "Oh?"

Tang Yan continued, "I know a little bit about the outside world. The Thirty-Six Mystic Worlds is not a simple place. Take care!"

Han Fei smiled and suddenly asked, "Where is Tang Ge? Why isn't he out yet?"

Tang Yan: "Actually, he's already out."

"Huh?"

Han Fei asked in surprise, "When? Why didn't I know?"

Tang Yan said indifferently, "He has experienced some things and is almost a Half-Venerable now. However, his perception of himself has some problems. Perhaps he doesn't know how to face you, so he went to the Thousand Star City."

Han Fei said casually, "Was he torn about...who he really was?"

Tang Yan nodded. "For now. However, he has to get over it. Oh... by the way, he has found his sword Dao."

After a brief stun, Han Fei smiled. "That's good news."

After chatting with Tang Yan, Han Fei was about to leave for the only exit.

Suddenly, the Time Ring in Han Fei's hand flickered for no reason.

The next moment, Han Fei felt that the time around him had changed!

Now, Han Fei appeared in an independent timeline.

“Hiss -“

Han Fei felt that his blood was freezing.

He was already so powerful, yet he was taken to another timeline by Time Dragon Carp’s Time Great Dao before he realized what was going on?

And this space was the coral sea where Little Time was in the Abyssal Chasm.

At this moment, Han Fei saw Xiao Se standing not far away.

Beside Xiao Se, there was a little girl who was only four or five years old, adorable and chubby. There were a few faint blue lines on the girl’s eyebrows, and her eyes were watery as if she had inherited the purity of fish eyes.

“Big Brother!”

Han Fei grinned. “Oh! Little Time... You have grown so big?”

However, Han Fei was shocked. Little Time could already transform into a human shape although she was so young!

Sure enough, the information reading ability of the Demon Purification Pot didn’t work at the moment. Therefore, Han Fei didn’t know... to which extent Little Time had grown up? How did she suddenly transform into a human shape?

Little Time staggered over and said awkwardly, “Big Brother, are you here to bring me food?”.

Han Fei thought to himself, I do have some food... But now that the food you eat has been upgraded, I really don’t have anything suitable for you!

However, Han Fei took out a cup of Spirit Awakening Fluid and said, “Little Time, I’ll take you to eat something good later.”

Buzz!

At this moment, the void trembled, and a big fish emerged from a blue light hole.

Little Time immediately shouted, “Mommy, mommy...”

The Time Dragon Carp turned into a noble woman in a red robe with two horns on her head. The woman gently picked up Little Time into her arms and said softly, “Baby, be good. You can go out now. Follow Big Brother out to take a look at the world... Eat and play to your heart’s content...”

“Really? Can I finally go out?”

The woman said dotingly, “Of course, provided that you don’t abuse your time power. Baby, be good. I have something to say to your big brother. Play by yourself for a while.”

Little Time obediently ran to Xiao Se and looked at Han Fei and his mother who were enveloped by the blue light curiously.

Han Fei asked in surprise, “Senior, is it time?”

The woman said, "At least, you are indeed unparalleled in this savage land. For a long time, I have been paying attention to you. Although your personality isn't very good, at least you aren't bad to the people around you. Little Time will sign an equality contract with you. Promise me to help her become a king, okay?"

Han Fei smiled bitterly. "Senior, I haven't become a king yet."

The Time Dragon Carp said casually, "If everything goes well, it's only a matter of time... As long as you leave this place, it won't be difficult for you to become a king. However, I suggest you become a king here."

Tev

"Huh?"

Han Fei couldn't help but ask, "Senior, what do you mean?"

The Time Dragon Carp said, "Here, all the luck of the world is on you. All the things here are more or less related to you. But if you transcend the tribulation in the outside world, you'll just be an ordinary king. However, if you do it here, you will carry the luck of this world and become a king. Of course, the effect is different."

Han Fei was shocked. Really?

Han Fei didn't intend to transcend the tribulation in the outside world. After all, he hadn't reached the end of his Half-King path yet... Because he had basically reached the upper limit of all kinds of techniques, now his advancement was already relatively slow!

If he could go out this time, finding Yin'er would be the most important thing. However, if possible, he still needed to polish his Half-King realm to the extreme!

For example, the technique of disassembling spiritual energy. Although he had accumulated a lot of power of faith, he didn't know how long it could support him. Because of this, Han Fei knew that this trip was very important. However, hearing what the Time Dragon Carp said, Han Fei had made up his mind. If becoming a king in his own home was better than doing it outside... then why did he become a king outside?

Han Fei immediately cupped his hands and said, "Thank you for your reminder, Senior."

The Time Dragon Carp said, "I won't let you bring my daughter to the King Realm for nothing. You should have walked the Great Dao of Time, right? I can use the Great Dao of Time in exchange and help you improve your Great Dao of Time by two levels. In addition, you can learn all the time techniques my daughter uses. As long as you can comprehend them, you can learn any of them without any limit." Han Fei was secretly shocked. He knew how powerful the Time Great Dao was... Two levels higher than now! Then wouldn't he be able to enter other timelines?

Han Fei couldn't help but look at Little Time. "Senior, is Little Time growing fast?"

The woman smiled. "It will be beyond your imagination. My baby hasn't stayed here for tens of thousands of years for nothing."

Han Fei nodded. "Okay! No problem!"

Han Fei thought to himself, As long as she grew fast, it would be fine.

If she grew fast, he could ask Little Time about the Great Dao of Time in the future.

But if she grew too slowly, the roles might be reversed. He couldn't be a babysitter for hundreds or even tens of thousands of years, could he?

As for the Great Dao of Time... with the ability of his green jade stone bridge, he actually didn't need the Time Dragon Carp to help him improve by two levels.

The woman said, "Besides, you can't use the Great Dao of Time easily. It's the same case for my daughter and you. The stronger the Great Dao of Time is, the less you should use it. Remember my warning. If you have to use it, you must be careful and make sure no one will notice you."

Han Fei couldn't help but ask, "Why?"

Han Fei instinctively felt that this matter was not simple.

And in Han Fei's heart, a voice suddenly said, "Tri-God Palace."

Suddenly, the Time Dragon Carp looked at Han Fei's chest. "It turns out that this is an ancient turtle that knows these secrets."

Han Fei was stunned. He knew about the Tri-God Palace. The old turtle had once explained it to him on the Forbidden Island.

Since the old turtle had mentioned the Tri-God Palace, one of them must be the so-called Time Temple.

The woman said, "This isn't something you should know. The ancient turtle in your heart should know the danger, so I don't need to elaborate."

Han Fei should've considered the pros and cons when it came to the Tri-God Palaces, but according to the old turtle, his Emperor Sparrow was no less dangerous than the Tri-God Palace.

Han Fei thought for a moment. Anyway, he just needed to help Little Time reach the king realm.

The old turtle had once said that being a king was just the beginning of the Great Dao. There were countless kings in the Infinite Ocean. As long as he was careful, there shouldn't be a problem.

The main problem was that when Little Time became a king, it meant that the Time Great Dao he mastered might be beyond his imagination.

After all, Little Time could travel the river of time!

Han Fei cupped his hands. "I know! Senior, don't worry. I will never use the Great Dao of Time easily. Even if I have to, I won't use it in front of many people."

The woman said, "As long as you don't use a heaven-defyingly powerful time technique, it won't be a problem. For example, no one will pay attention to a time reversal that consumes Chaotic Qi... even if it's already very rare."

After confirming that Han Fei understood, the woman waved her hand, and a large amount of blue light emerged around Han Fei. Some insights on the Great Dao of Time poured into Han Fei's mind.

Chapter 1685 Crazy Making Breakthroughs

It was not the first time Han Fei signed a contract.

Besides, this contract was just an equality contract, which was equivalent to Han Fei leading a sister. The relationship was just that of a brother and a sister, without any master-servant relationship.

Xiao Se had no objection. He had already experienced Han Fei's uniqueness.

However, after the contract was completed, Han Fei and Little Time were connected in heart.

For a moment, information popped up in Han Fei's eyes.

< Name > Time Dragon Carp

< Introduction > A mysterious creature living in the river of time, born with the Great Dao of Time. It was born with heaven-defying talent in the Time Great Dao. Time Dragon Carp is extremely rare. Because it's good at fighting with time, it has often been hunted by supreme existences since ancient times.

< Level > 1

< Quality > Mysterious < Great Dao > Time

< Contained Chaotic Qi > 1,000 strands

< Food > Omnivorous

< Battle Technique > Time Reversal, Time Armor, Time Change, Time Travel, Time Displacement, Time Bind, Time Change, Time Steal...

< Remarks > Time Dragon Carps are extremely rare. You'd better not use it easily.

"Oh my god!"

Han Fei was shocked. F*ck... she is only level one! The amount of Chaotic Qi that Little Time contains has reached 1,000 wisps? Is this a joke?

In addition to Chaotic Qi, the combat skills she had were also shocking!

He seemed to only know one of the eight or nine combat skills. Even though Big Time had given him some insights on Time Great Dao, Han Fei had only mastered the Time Steal and Time Displacement and was no match for Little Time in this respect!

Gulp!

Han Fei couldn't help swallowing. If he learned all the time techniques, his strength would probably soar by several levels... His escaping ability would definitely be first-class. Even if he encountered a king, he wouldn't be afraid at all... because the other party couldn't kill him at all!

As if knowing what Han Fei was surprised about, the woman said, "Don't be surprised at the fact that there is so much Chaos Qi in my baby... You'll find out soon. Don't let her use the Chaotic Qi easily..."

After that, the Time Dragon Carp comforted Little Time and said dotingly, “Baby, be good and follow Big Brother from now on. Don’t enter the river of time easily, and don’t use complicated time techniques easily, understood?”

Little Time said cutely, “Okay... Mommy, aren’t you coming with us?”

The Time Dragon Carp sighed. “Baby, I have a lot of things to do... When you become a king, you can find me!”

Little Time immediately clenched her fists. “Then I’ll become a king tomorrow.” The Time Dragon Carp stroked Little Time’s head, chuckled, and looked at Xiao Se. “You’ve accompanied Little Time for a long time. Now you’re free. If you’re willing to follow my baby, you can follow her. If not, you can leave on your own.”

Xiao Se hurriedly said, “I have watched Little Master grow up. It’s been so many years. Please let me follow her!” The Time Dragon Carp nodded slightly. She pointed her finger, and runes-like weird lines that looked like binding ropes appeared on the surface of Xiao Se’s body.

When the binding ropes shattered one after another, in Han Fei’s eyes, Xiao Se’s realm was soaring.

Nas

From a Hanging Fisher to a Hidden Fisher, then to a Law Enforcer, an Explorer, a junior Venerable... Finally, his strength stabilized at the intermediate Venerable realm.

Han Fei was surprised. He didn’t know that Xiao Se was so strong...

Han Fei certainly knew that it was not the Time Dragon Carp that helped him upgrade, but that she removed the restraints on him.

At this moment, the intermediate Venerable realm was nothing to Han Fei.

However, Han Fei suddenly had a thought. Since Xiao Se could serve Little Time, he should also be cultivating the Great Dao of Time, right? Considering the great effect of the Great Dao of Time, he could at least escape from a peak-level advanced Venerable.

So Xiao Se was not weak.

However, Han Fei didn’t take it seriously. Xiao Se would make no difference. Since Xiao Se wanted to follow him, just let him!

Anyway, it was equivalent to having a guard.

It just so happened that he couldn’t fully reveal his strength in the outside world. Otherwise, if a king-level expert went to the Glazed Glass World... would others suspect him?

At that time, he could pretend to be a descendant of a big clan.

Han Fei couldn’t help being secretly delighted. Forget about the Time Temple. It would be worth it if he could learn the Time Great Dao of Little Time.

In the end, the Time Dragon Carp said, “Okay, you can go now.”

Han Fei couldn't help but say, "Senior, well... I still don't know Little Time's name.'

The Time Dragon Carp said indifferently, "Her name is Nian'er, Shi Guang Nian'er. However, you'd better just call her Han Nian'er. That doesn't matter."

"Oh... OK... OK!"

After the Time Dragon Carp left, Han Fei felt that the space around him was dissipating. When he reappeared in the normal timeline, he was still in the place where he disappeared, near the Scattered Stars Island.

However, as soon as he arrived outside, he heard a crack and saw Little Time make a breakthrough

Han Fei was stunned. Why did she suddenly make a breakthrough?

Crack –

Crack ~

"Hiss!"

Han Fei was lost for words. Little Time would make a breakthrough every several seconds! And soon, she became a fishing master.

Han Fei was still surprised when Xiao Se said, "Little Master's body contains too much power. The place where she was before was the place where space and time converge, so her body is neither real nor fake. She can carry more power in this state. Now, once she appears in the outside world, she will make breakthroughs."

Crack... Crack...

Nian'er didn't stop at all. In less than half an hour, she became a great fishing master.

Not only had she become a fishing master, but she had also grown about five centimeters taller.

At this moment, Nian'er looked at Han Fei and said eagerly, "Brother, I'm hungry."

Han Fei realized that she was making breakthroughs! It required a lot of spiritual energy!

Han Fei casually threw out a large mass of spiritual spring, which enveloped Nian'er.

The spiritual spring was being consumed at a visible speed.

The sound of breakthroughs didn't stop at all.

Han Fei finally understood what the Time Dragon Carp said just now. Why did Little Time's body contain so much Chaotic Qi? Nian'er had clearly reached the Venerable realm in some respect! But in reality, she was only at level 1...

Now that she had left the place where time and space converged, she would inevitably make breakthroughs crazily! After another half an hour, Nian'er's strength was crazily increased to that of a Dangling Fisher.

In another half an hour, Nian'er's strength had reached the Hanging Fisher level.

An hour later, Nian'er became a Hidden Fisher.

Han Fei almost had a breakdown. This little thing was even more monstrous than the Emperor Sparrow!

A day later, when Nian'er's strength reached the peak of the law enforcer realm, she finally stopped making breakthroughs. Because at this time, she needed to transcend the heavenly tribulation! Nian'er must have had a premonition, so she stopped here. However, it seemed that she was still comprehending her realm. After all, she had crossed too many realms. One day earlier, she only had the strength of a baby, but a day later, she had extraordinary strength like Superman.

However, after all these breakthroughs, Nian'er didn't look as cute as before.

When Nian'er was only 1 meter tall, she was still a cute little girl. Now, she was more than 1.3 meters tall and looked like a teenage girl.

And this was because she didn't transcend the tribulation or continue to make breakthroughs.

Xiao Se said, "In a short period of time, Little Master's strength should remain in this realm. Next, Little Master has to learn a lot. She needs time... Although I have taught you a lot, she has never interacted with anyone. There are many things that she doesn't understand... Please take her with you and slowly teach her." Han Fei nodded slightly. "OK!"

Sure enough, although it took him one day, it was only one day.

It only took Nian'er an hour to slowly adapt to her current strength. And her voice changed slightly, becoming a little crisp.

After Nian'er adapted to her body, the first thing she did was... look at Han Fei again. "Brother, I'm hungry."

Han Fei grinned. "Don't worry. I'll find you some snacks."

Han Fei took out his fishing pole and cast it away. Swish! Swish! Swish!

Big fish, crabs, lobsters, starfish, sea urchins, lobsters, clams, conchs... Han Fei caught hundreds of them in a row.

Han Fei said, "Nian'er, be good. I need to cross an area, so you need to stay in another space for a few days. When I cross that area, I'll take you out..."

Nian'er: "Will it take long? I want to stay outside."

At this time, Xiao Se said, "Little Master, the place where Master Han Fei is going to cross is very dangerous. Your strength is not enough. Therefore, you do need to wait for a few days." Nian'er immediately said, "Alright! I'll go." Han Fei naturally sent Nian'er and Xiao Se into the Sea Quelling Painting. He also made a lot of crisps for Nian'er to kill time.

When he was prepared, Han Fei quietly appeared on the Scattered Stars Island.

He didn't find a way out in the Water-Wood World.

When he returned to the Yin-Yang World, the first thing Han Fei did was to find the way to enter the cage... However, the Vast Ocean Navigator didn't turn, which made Han Fei's heart sink.

In the Yin-Yang World, Han Fei tried to find a way to the outside world... To his surprise, he found it.

And this road was the bottomless pit in the Transverse Mountain!

Chapter 1686 Great Shift

The bottomless pit of the Transverse Mountain had been studied by countless people throughout history.

Some people even tried it themselves... But none of them came back. Therefore, gradually, this bottomless hole became extremely mysterious. Over time, no one dared to enter it again.

At this moment, Han Fei didn't inform Xue Shenqi. After all, he had said that he was leaving, so there was no need to say anything. With Han Fei's current strength, as long as he didn't deliberately expose himself, no one would discover him.

After confirming that the Vast Ocean Navigator was pointing at this bottomless hole, Han Fei took out the Nine Palace Luck Ruler and found that the marker fell on the "Ominous".

Han Fei took a long breath.

"Let's go!"

Han Fei leaped and let his body fall freely.

His body kept falling for an hour and still didn't reach the bottom.

After only dozens of seconds, Han Fei was surrounded by darkness. At this moment, he could still get out.

After another hundred seconds, Han Fei felt a force spinning out. A few wisps of Spirit Awakening Fluid would float past here, and Han Fei certainly didn't have the time to grab the Spirit Awakening Fluid.

Han Fei was thinking about a question. Did the appearance of the Spirit Awakening Fluid mean that a king had died here?

At first, Han Fei suspected that this bottomless hole was connected to the Sky City, but he later confirmed that it wasn't.

Spirit Awakening Fluid was formed by the Dao runes of kings. It either came from living kings or dead kings. Why was there no king in Yin-Yang World, but Spirit Awakening Fluid was never lacking?

It seemed that many kings had perished in the Yin-Yang World!

When the spinning power appeared, Han Fei still could go back. Although there was only endless darkness around, Han Fei had the Vast Ocean Navigator!

However, Han Fei had already made up his mind. How could he give up halfway? It was just an "Ominous" divination, which was no different from an "Auspicious" divination for him.

After another hour, the spinning power became stronger and stronger, but after thinking about it carefully, Han Fei found that the pressure he felt was even stronger than the spinning power of this void.

At this moment, the pressure coming at him was getting greater and greater. Those below the Venerable realm couldn't resist this pressure at all.

Han Fei had been sensing everything around
him...

An hour seemed to be a time node. After this node, the external power would change slightly.

At this moment, Han Fei felt that the power was no longer spinning outward, but sucking inward.

Besides, in this space, not only spiritual energy was absorbed, but also energy. There seemed to be some death energy, mixed demonic energy, and residual power of the Great Dao...

There were also some energies that even Han Fei couldn't recognize!

This feeling reminded Han Fei of the array eye of the Heaven and Earth Array in the Forest of Terror. He had only seen such chaotic energy there.

Han Fei couldn't help but ask, "Old Yuan, do you feel a sense of deja vu?"

The old turtle said, "Sort of. It might be related to the super array in the cage." As the suction force became stronger and stronger, it gradually reached the point where it was difficult for a beginner, an intermediate, or even an advanced Venerable to escape.

In the end, it was as if he had passed through the void... Under this terrifying suction force, Han Fei didn't resist but let this force suck him in.

Bang!

About half a day later, the suction power around him suddenly disappeared, and Han Fei seemed to have entered a vacuum.

However, Han Fei found that something was obviously wrong. The energy in his body was flowing away. In Han Fei's eyes, a weird huge millstone appeared.

It was like day and night were changing, like black and white swirling around. What else could it be if not the Yin-Yang symbol?

However, it wasn't a natural Yin-Yang symbol. Han Fei could vaguely tell that there were Yin-Yang images that were separated and revolved like two fish.

As for the impurities in the outside world, they were immediately crushed by the millstone when they were sucked into it. The impurities were discharged from the middle, but the essence disappeared.

"Hiss!"

Han Fei couldn't help taking a breath. "Three array eyes? The Yin-Yang array in the cage has three array eyes. And this is the outer eye of the array, the array eye that jumped out of the array and suppressed the entire array. This array eye suppresses the two worlds... Oh, no, it absorbs energy from the Yin-Yang

World, the Water-Wood World, and the outer domain and gathers it here to polish the essence energy. Is this array really made by my mother?"

If this thing was really made by his mother, why didn't she inform him in advance? Even Old Han didn't tell him anything about it.

The old turtle said, "Not necessarily. If your mother reached the Longevity realm and created such a huge and complicated array, it would be reasonable. But if she is just in the Sea Establishment Realm or the Sky Opening Realm, it's extremely difficult to create such a huge array. I don't think I can."

Han Fei curled his lips and said, "It doesn't matter whether my mother can create it or not... Although this array eye has been found, it can't be destroyed. Besides, I'm sure that I can't destroy it now. This place is like a vacuum. What I feel is not the suction force, but the impure energy outside. It seems to have fallen into some sort of spatial depression and flowed over spontaneously..."

This was a bit like... the gravity space of a star... Han Fei thought that an array combined with the Great Dao of Space... was definitely not something he could destroy now!

The old turtle said, "This is the array of your Yin-Yang World, but it might not be created by your mother. However, since she took out the Heaven and Earth Array, this array must have a lot to do with her. If you want to go out, you have to find a way... The energy absorption here is extremely fast. If it weren't for your strength, you might have been exhausted."

Han Fei certainly knew.

With a flip of Han Fei's palm, the Vast Ocean Navigator appeared. As Han Fei issued an order in his heart, the Vast Ocean Navigator pointed at the Yin-Yang Millstone.

Han Fei's face turned green! This was a millstone that could crush countless kinds of impure energy... If he went in, would he be crushed?

This time, Han Fei was still scared although he was guided by the Vast Ocean Navigator.

Han Fei's body trembled, and he activated the Twin Divine Technique. Han Fei rushed in with his white-mist body, but something unexpected happened. As soon as his white-mist body entered, it was crushed into smoke.

His black-mist body wanted to fuse with his white-mist body... But this time, instead of pulling the white-mist body back, the black-mist body was pulled in.

Buzz!

"Damn the space Great Dao..."

Han Fei was crushed directly in this space.

At this moment, Han Fei's consciousness was clear. He wasn't sure if it was his idea or his body's spontaneous choice... The Supreme Yin-Yang Wheel was activated automatically.

Then, Han Fei entered another void.

After a long time, Han Fei felt that his head was dizzy. In the haze, he saw two light spots appear in the void.

This situation was like looking for a way in the endless void, but there were two exits?

One of the paths seemed to have a strong suction force, trying to pull him over. However, Han Fei sensed danger and subconsciously calculated.

Han Fei immediately had a bad feeling. He wondered if it had been a day since the last time he used the Nine Palace Luck Ruler. Without thinking, Han Fei took out the Nine Palace Luck Ruler and began to test his luck...

However, it showed the "Impasse". Han Fei shivered in fright and quickly adjusted his strength to drill into another exit. However, Han Fei didn't know how dangerous this exit was...

Fortunately, he still had a chance to use the Vast Ocean Navigator.

Halfway through, Han Fei issued an order in his heart, "Point to a safer exit."

The Vast Ocean Navigator didn't disappoint Han Fei. The path he chose this time was indeed safer. However, when Han Fei entered the second path...

In the next moment, Han Fei began to bleed from his eyes, nose, and mouth, and his body was unsteady.

At that moment, the terrifying suction force seemed to pull Han Fei from one space-time to another. Han Fei felt that there seemed to be some power acting on him.

Immediately afterward, Han Fei felt excruciating pain all over his body. The power in his body seemed to be restrained by a mysterious power.

With this restriction, Han Fei's realm dropped from the Half-King realm to the junior Venerable realm, the kind that he had just entered.

"Shoot ~"

Before Han Fei could ask what was going on, the old turtle said, "I don't know if you're lucky or unlucky... The moment you left here, a huge power suddenly poured into your body. This power is so much that even you might not be able to withstand it. I had to suppress this power and seal it here temporarily with my soul. The result is that your realm has temporarily fallen." Han Fei was shocked. Could it be the backlash of the Nine Palace Luck Ruler? He couldn't help but ask, "What do you mean? Is this power good or bad?"

The old turtle said leisurely, "It's a good thing in the long run. These powers can slowly improve your body."

Han Fei's face changed slightly. "How long will it take?"

After a moment of silence, the old turtle said, "Not very long. Ten years or so. Do you think it's long?"

Han Fei's face kept changing, but he managed to hold himself back. "Fortunately, it will only take a few months in Forge the Universe."

The old turtle said, "Also, there's bad news."

Han Fei's face changed slightly. "What is it... Is there any news worse than this?"

The old turtle said, "Why don't you feel your own body?"

Only then did Han Fei notice that there seemed to be a huge mountain pressing on him, as if a million times more power was pressing on him. Furthermore, behind him, there was a power trying to suck him back.

Han Fei immediately sprinted towards the periphery, but his strength was no longer at the Half-King level. Therefore, his speed was only equivalent to that of a Hanging Fisher or a junior Hidden Fisher.

Immediately, Han Fei activated the Near at Hand Technique, only to find that the space here was also triggered. Therefore, the Near at Hand Technique was not much faster than normal swimming speed.

Han Fei, who was used to traveling thousands of kilometers in the void, couldn't bear it.

His face changed greatly. "Where are we?"

The old turtle said, "If I've guessed right, we're only outside the cage. You're right. The millstone is indeed absorbing power from the three worlds, but mostly from the outside world. Therefore, this terrifying suction power is caused by the suction force it exerts on the outside world."

PL

Han Fei asked, "Then... how long do I have to swim like this?"

Old Yuan said, "I don't know! The millstone can absorb the power of perception, so I can't extend my perception out. But I think that since the Yin-Yang World and Water-Wood World are so large, the millstone's sucking range in the outside world should be at least ten million kilometers!"

Han Fei: "..."

Han Fei's face turned green.

With his current speed, how long would it take for him to swim tens of millions of kilometers? This was not a simple swim. He had to swim with all his strength, or he might be sucked back.

Even if he used the power of the Great Dao, he would only be as fast as a Hidden Fisher.

Han Fei seemed to be in a vortex. It seemed that this vortex had a great impact on space. Even if Han Fei wanted to enter Forge the Universe, he couldn't.

However, as long as it was a vortex, the further away he was from its center, the less suction force he would be subject to!

Therefore, as long as he persisted, his speed should be faster as time went by!

But at this moment, Old Yuan said, "Well! I have a great technique here. You should be able to learn it."

Han Fei said grumpily, "Why don't you finish it all at once... What's the great technique?"

The old turtle said leisurely, "No hurry. You'll learn this technique sooner or later. You can use this time to practice it. This technique is called... Great Shift."

Chapter 1687 The World Outside

"Great Shift?"

He couldn't enter Forge the Universe, nor could he restore his strength now. Since the old turtle proposed to teach him a great technique, he might as well learn it! The so-called "Great Shift" was supposed to be a great technique that traversed the void in the Sea Establishment Realm.

Everyone knew that cultivators could step into the void when they reached the Explorer realm. However, most people could only enter the void the moment the void cracked. Or, they could use the spatial cracks produced as a special attack method.

However, the real Void Technique involved a certain amount of space techniques.

In this world, there were some abilities related to the void that one could learn without having to dabble in the Great Dao of Space. Just like this Great Shift, which was also known as Void Shift, it was the simplest space teleportation technique. With this technique, one could travel between the heavens and earth even if he didn't master the Great Dao of Space. It was indeed a heaven-defying technique.

The old turtle said, "In the Age of Gods, this technique can actually be used by Venerables. However, it consumes a lot of energy, so Sea Establishers use it more."

After learning about the Great Shift, Han Fei couldn't help asking, "Old Yuan, how far can I teleport with this technique? Is it farther than my teleportation array?"

The old turtle thought for a moment. "It can't be compared with the kind of super long-distance complicated teleportation array you made."

Han Fei asked, "What about ordinary teleportation arrays?"

The old turtle said, "Far better than those. Generally speaking, even the weakest king can teleport a million kilometers away. According to the strength of the king, the distance of teleportation is also different. This technique is said to be able to teleport a Sea Establisher five million kilometers away in one go. Besides, it's within one second. If it's an emperor, you might not believe it, it can even transport him to a star."

Han Fei's eyelids twitched. "What... you mean go to space?" "Space?"

Han Fei explained, "Didn't you say that it could transport an emperor to a star? Have you been there?"

The old turtle said, "Yes, I've been there. However, there's nothing good on the big stars. Besides, once you go deeper, you may get lost... Most importantly, forget it..." "Come on, tell me!"

The old turtle said, "It's not too late to learn some things when you're strong enough. All you need to know is that the Great Shift is one of the most powerful techniques in the Sea Establishment Realm and Sky Opening Realm. So far, I haven't found a better teleportation technique than Great Shift."

Han Fei couldn't help but ask, "What about the Longevity Realm?"

The old turtle thought for a moment and said, "Monarchs have many more methods. They should have stronger techniques! As far as I know, monarchs seem to prefer the method of descent. I haven't seen a monarch rushing on his way."

Han Fei thought to himself, It seems that the old turtle is not particularly powerful in the emperor realm. Otherwise, he should know something about the Longevity realm.

But now, it was obvious that he didn't know much about it.

Three days later.

Han Fei tried the so-called "Great Shift" technique. To test how far he could teleport, Han Fei also used the Twin Divine Technique.

Buzz!

Han Fei felt that this was an advanced flash technique.

However, unlike Flash, with the Flash, one could only teleport hundreds of meters away, but this Great Shift...

Han Fei was amused. "Old Yuan, I only teleport a hundred kilometers?"

The old turtle said leisurely, "It's mainly because of this suction force... Otherwise, you could've teleported a thousand kilometers away at least."

Han Fei was lost for words. "Is a thousand kilometers a long distance? I can cross it in one step with the Near at Hand Technique."

The old turtle sneered. "The Near at Hand Technique is a kind of Great Dao of Space. In reality, there are countless ways to crack it. But the Great Shift is only related to space and doesn't require the power of the Great Dao of Space. Unless someone seals space, makes space collapse, or catches up to you in the void, it's almost impossible to break it... That's the difference."

Han Fei smiled and said, "You've already told me two ways to crack it... There must be many experts who can seal space or cause space to collapse, right?"

The old turtle said, "You're not weak. Besides, this technique is meant to be used for traveling. You'll learn a lot of great techniques in the future. Why are you afraid?"

Han Fei thought for a moment. That's right. It's not a bad start to teleport a hundred kilometers at a time. If he could teleport a thousand kilometers at once, it would be easier for him to leave this sea area.

Han Fei practiced for seven or eight days in a row.

At first, he could only teleport a hundred kilometers at a time, but now, he could move eight hundred kilometers at once.

However, this technique consumed a lot of spiritual energy. It could consume half of Han Fei's spiritual energy just to use it once. Therefore, the number of usage every day was limited.

Such days lasted about half a month.

On a certain day half a month later, Han Fei suddenly said, "Old Yuan, your strength has weakened."

Han Fei was sure that his strength had weakened because his speed had reached the Law Enforcer realm.

Of course, Han Fei's law enforcement realm was about the same as others' explorer realm.

This was indeed good news!

In the first half month, when Han Fei swam out, he would be exhausted, but not now.

The old turtle replied, "You can release your perception now."

Han Fei released his perception. After extending more than 400 kilometers, he finally couldn't hold on anymore. It seemed that it would take him a few days to completely leave this sea area.

Another hour later.

Han Fei suddenly reached out and grabbed at the void. He grabbed a void blade and slashed out, killing a green light. Han Fei turned aside and watched a green light flash past him. Information popped up in his eyes.

< Name > Vortex Sea Emperor

< Introduction > This is an exotic fish in the vortex sea that likes to swim hard. It can avoid water obstruction when swimming, so its speed is extremely fast. The Vortex Sea Emperor likes to use geographical advantages to hunt. Its blade is as swift as light, has the effect of breaking armor, and is poisonous.

< Level > 85

< Quality > Exotic

< Great Dao > Supersonic

< Chaotic Qi Contained > 16 wisps

< Edible Effect > Eating it can strengthen the bloodline.

< Collectible > Sea Emperor's Blade, Royal Scale Armor

<Absorbable>

Han Fei's pupils were constricted slightly. A random fish he encountered was already an intermediate Venerable? Did this mean that he had already come to the outside world?

However, was the outside world really so terrifying? The first creature he met was already so strong? Also, this guy contained 16 wisps of Chaotic Qi?

Han Fei's heart did a flip. Can I absorb this Chaotic Qi?

This tempted Han Fei.

The Demon Purification Pot showed “Absorbable”!

This meant that he could absorb the Chaotic Qi of this fish!

In an instant, three terrifying blades came at him in a row... Han Fei pushed with one hand and destroyed the power of these attacks.

This Vortex Sea Emperor had never seen such a technique!

Seeing that Han Fei’s strength was only at the level of a junior Venerable, it thought that a feast was coming. However, it couldn’t expect that this “feast” was so powerful that it actually broke its Supersonic!

At that moment, the Vortex Sea Emperor still wanted to roll Han Fei away with its body and kill him. However, Han Fei casually drew a knife from the sea and cut it into two pieces.

Immediately afterward, the Vortex Sea Emperor felt that its soul was suppressed, invaded, and controlled, and the chaotic energy in its body was being absorbed uncontrollably.

At this moment, the Vortex Sea Emperor was stunned. It had never encountered such a terrifying enemy since it started cultivating... Who was this guy?

Unfortunately, Han Fei didn’t give it a chance to ask.

After Han Fei absorbed its Chaos Qi, he threw away the corpse of the Vortex Sea Emperor and let it be sucked into the Infinite Abyss and turned into the energy of the Yin-Yang Mill.

For the first time, Han Fei discovered that the Demon Purification Pot’s absorption ability had returned! He was overjoyed.

As for the old turtle, his heart was trembling. This calabash was simply terrifying! He knew that this calabash could cut off other people’s Great Daos and destroy their souls... But now, he found that it could also absorb other people’s Chaotic Qi? What kind of Divine Calabash was this? Rumble! Rumble!

When the thunder rumbled in the sky, Han Fei suddenly realized something and said in surprise, “Old Yuan, after this Venerable-level demon died, no Heavenly Dao cracks appeared. Why?”

The old turtle said, “It’s simple! The space on your side is too small. It’s not easy to give birth to a Venerable, let alone a King. Therefore, when a Venerable dies, there will be a Great Dao crack. But where we are now, this is the outside world... In the Age of Gods, even if a King dies, the sky wouldn’t change much. It’s not strange. This shows that there are many strong masters outside.”

Han Fei: “...”

Half a day later.

Han Fei discovered that he seemed to have swum out of the terrifying suction abyss. The outer sea became clearer and clearer!

Han Fei felt a tremendous amount of spiritual energy, energy, and messy power pouring in.

One day passed.

Han Fei's speed returned to the explorer realm.

It was not until this moment that Han Fei met the second creature, a big fish with a crescent-shaped head and a mouth full of sharp teeth.

This big fish was a Half-Venerable, named Dark Moon Wolf Fish. Its information was shown as followed:

< Name > Dark Moon Wolf Fish

< Introduction > This is a Wolf Fish that can unleash extremely fast attacks. It has the bloodline of an ancient ferocious beast and likes to swim towards the moon. It can swallow the essence of the moon and has powerful spiritual power. It's good at piercing souls and confusing enemies. While it has powerful spiritual power, its teeth are almost indestructible and can bite through high-quality Divine weapons. These teeth can temper Divine weapons. The pearl of the Dark Moon between its eyebrows can enhance the power of the soul.

< Level > 79 (Half-Venerable)

< Quality > Exotic

< Great Dao > Supersonic

< Spiritual Energy > 1,69,808 points

< Edible Effect > It can increase soul power.

< Collectible > Pearl of Dark Moon

<Absorbable>

< Remarks > Eating Pearl of Dark Moon can enhance the power of the soul.

Buzz!

Han Fei activated the Great Shift and appeared in front of the Dark Moon Wolf Fish.

The latter was shocked by Han Fei's sudden appearance. After all, it was a powerful Half-Venerable creature and knew that Han Fei was not simple. Therefore, when Han Fei suddenly appeared, the Dark Moon Wolf Fish knew that something was wrong and immediately tried to escape.

However, how could Han Fei give it a chance to escape?

A moment later, on the turbulent sea, Han Fei put a crescent-shaped crystal into his mouth.

Chapter 1688 Pirates?

After swallowing the Dark Moon Pearl, Han Fei checked his soul power, which increased by about 50 points.

"Hiss!"

Han Fei's eyes widened!

A Half-Venerable could increase the power of his soul by 50 points? That was incredible.

At his current level, Han Fei was already satisfied that the Dark Moon Pearl could provide him with more than 10 points of soul power.

But this thing provided 50 points at once.

This meant that as long as he killed 200 of them, his soul power could be increased by 10,000 points. Han Fei grinned. Although his level had temporarily dropped, there was still a pleasant surprise for him!

There were too many powerful creatures in this world and it was all about hunting and being hunted. At this moment, Han Fei was a hunter.

Two days later, Han Fei hunted about 50 Dark Moon Wolf Fish.

This thing was relatively rare, not as many as he imagined

Besides, Han Fei discovered that not every Dark Moon Wolf Fish could enhance his soul power by 50 points. The lowest was only more than 30 points. In two days, Han Fei's soul power increased by about 2,000 points. This effect couldn't be said to be slow. After all, if Han Fei visualized in Forge the Universe, it might take him a year to increase so much soul power...

Grinding a chopper would not hold up the work of cutting firewood. Han Fei's current soul power had reached more than 190,000. As long as he hunted here for half a month, his soul power would probably be able to touch 200,000 points. Han Fei could afford this little time.

An hour later.

While Han Fei was hunting, suddenly, his soul power exploration encountered a soul collision.

Han Fei was intrigued. "Someone is here?"

The collision of souls exposed him, but he also locked onto his target.

As the saying went, the skilled were bold. Han Fei didn't believe that after he came out, he could easily meet a king... Besides, the soul power of the person just now didn't seem very strong

And Han Fei needed someone to understand the outside world. Therefore, Han Fei didn't retreat but went straight up.

A few seconds later, Han Fei bumped into three women.

One of the three women was holding a Dark Moon Wolf Fish, and the other two were glaring at Han Fei ferociously.

In terms of appearance, these people were much worse than the people of Water-Wood World. They were no different from ordinary humans.

One of the women said, "A junior Venerable? Who are you?"

Han Fei glanced at these three people. The strongest was an intermediate Venerable, and the two others with him were Half-Venerables. Even if Han Fei was only a junior Venerable now, he could easily kill these three people.

To be honest, although Han Fei's level had temporarily dropped, in the Venerable realm, even a Half-King might not be able to catch Han Fei.

However, what puzzled Han Fei was that the people outside were generally so strong. Three random people he met were two junior Venerables and an intermediate Venerable?

A younger woman said, "Hey! I'm asking you a question. Are you dumb?"

Han Fei chuckled. "Little girl, don't be so brutal. Be polite to an old man."

The three of them were stunned. Is this person very old? He looks very young.

Another girl said, "How old are you?"

Han Fei said leisurely, "Well! I'm more than 4,000 years old."

The two girls asked in surprise, "Then are you going to die?"

"Cough, cough -"

Han Fei was embarrassed, and the intermediate Venerable roared, "Shut up! Don't mess around."

The intermediate Venerable leaned forward. "Where are you from? Which route did you take? Where is your boat?"

Han Fei was stunned. It seemed that a boat was needed to get here. Besides, what was the "route"?

Han Fei said unhurriedly, "I can travel anywhere in the world. I don't need boats. Where there is delicious food, where I am."

However, as soon as Han Fei said so, the three girls' faces changed. One of the two Half-Kings shouted, "Liar."

Another person shouted, "Sister Fan, be careful. He must be from another pirate team."

The intermediate Venerable attacked Han Fei.

The power that suddenly erupted was extremely powerful, far exceeding ordinary intermediate Venerables.

Han Fei was surprised. A pirate team? Are there pirates here? Let's capture these people first.

When Han Fei took action, he discovered, to his surprise, that the people outside were stronger than those in the Yin-Yang World and the Water-Wood World... Logically speaking, if their realms were the same, there should be only difference in the polishing degree of strength. It could only be said that the people here had better aptitudes and potential than in the cage.

Han Fei waved his hand and the Great Dao of Gravity descended. The intermediate Venerable undulated up and down.

She still wanted to break it with force...

However, in the next moment, the woman was dumbfounded. This person's Dao was so tough! He could completely crush her although he was only a junior Venerable.

“Pfft!”

In the Great Dao of Gravity, the woman suddenly turned into a shadow, shook the void, left Han Fei’s attacking range, and appeared beside the two Half-Venerables.

Han Fei smiled casually. “Little girl, I’ve told you that you should respect the elderly. Come on, tell me about...”

Swish ~

Just as Han Fei was about to speak, he saw that the woman crushed something in her hand. In the next second, the three people were rolled up by the void and disappeared.

Han Fei moved very quickly and instantly arrived in front of the void with the Near at Hand Technique. However, the other party still ran away.

Han Fei: “...”

The old turtle couldn’t help but secretly smile. “After all, here is not the savage land that you’re from. There are more means outside! The one they used is just a small means, a treasure that can instantly change space. A teleportation can only reach ten thousand kilometers at most. If you look carefully, you should be able to find them.”

Han Fei narrowed his eyes. “Find them?”

Han Fei shook his head. “From the questions they just asked me, I can tell that... there are conditions to appear in this place. First of all, there must be a boat; secondly, there must be a route... Otherwise, if my identity is unknown, I will only be suspected and won’t be accepted. They won’t tell me much about the outside world, but will only doubt my background.”

What Han Fei didn’t say was that the girl asked him if he was from another pirate team...

This meant that they were pirates too.

And pirates had never been kind-hearted. Therefore, Han Fei needed to recover some strength!

With a thought, Gui Sanqing appeared outside.

Han Fei said, “Old Yuan, cultivate outside for a few months. Let me recover some strength first. If the ordinary people outside are all so strong... I’m afraid my strength in the junior Venerable realm isn’t enough. I have to improve a few levels.”

“Okay!”

For the old turtle, a few months was nothing but a drop in the bucket. He happened to need time to polish Gui Sanqing’s Body... Now, he had some time.

Buzz!

The illusion of mountains and rivers appeared, and Han Fei appeared in the Sea Quelling Painting.

In the painting, where Earth Nine was, Nian’er was playing hide-and-seek with a few rabbits, giggling. When Han Fei appeared here, Nian’er immediately shouted, “Brother, you’re here? Let’s play a game...”

Han Fei smiled and said, "No, Nian'er, be good. You may have to stay here for a year. The outside world is a little dangerous. When I settle the matters outside, I'll immediately let you go out."

Nian'er hummed in response, but there was no disappointment in her eyes at all, because two cats were sticking their heads out of a hole in a tree and staring at her with widened eyes.

Although she was talking to Han Fei, her heart had already flown away. Han Fei was lost for words. So, was his worry unnecessary? He thought that Nian'er was desperate to go out. However, she was obviously having a great time here!

Maybe because she hadn't been in contact with the outside world for tens of thousands of years, she was already very happy to have such a fresh world to live in.

Next to him, Xiao Se asked, "Do you need me to go out to help you?"

Han Fei shook his head. "No, not for now. Just take Nian'er to play. This world is not small. It's not bad to walk around and appreciate the scenery of the land."

After talking with Xiao Se, Han Fei went to Forge the Universe.

It would take him ten years to recover in Forge the Universe.

This made Han Fei a little speechless! What he hated most was cultivating in seclusion. If only time could fly.

The old turtle said, "By the way, you can also improve your spiritual energy-disassembling degree. After all, it can change your capacity for the Great Dao. Maybe you can recover a year or two in advance."

Han Fei immediately said, "Why didn't you tell me earlier..."

With the old turtle's reminder, Han Fei directly activated the power of faith to disassemble the spiritual energy.

Three months later.

Han Fei's spiritual energy was disassembled at 92%, only a little bit away from 93%. However, the power of faith had been used up... So, Han Fei could only spend some time disassembling it.

He had no concept of time when he was cultivating in seclusion.

Five years later, Han Fei had returned to the peak of the advanced Venerable level and was about to break through to the peak-level Venerable realm.

Suddenly, Old Yuan shouted, "Han Fei, Han Fei... I'm being watched."

Chapter 1689 Robbing a Pirate Boat

When Old Yuan asked him for help, Han Fei was a little stunned. Wait, you're an emperor. Why are you being targeted?

Han Fei woke up from his cultivation and frowned. "What happened?" The old turtle said, "Someone found me when I was making a breakthrough. Those people have already found me and will arrive in a minute."

Swish!

Han Fei immediately appeared outside Forge the Universe. When he looked at Gui Sanqing, he was surprised. "You broke through to the advanced Venerable realm so quickly?"

The old turtle said, "Although this sea area is dangerous, there are indeed many good things outside. Apart from the Dark Moon Wolf Fish, there are also some extremely rare Dao Querying Fish. I came into contact with those humans when I was catching the Dao Querying Fish... I didn't expect them to find me!" Han Fei couldn't help rolling his eyes. It sounded like... Old Yuan robbed them... Otherwise, why would he be tracked? When he was making a breakthrough.

Han Fei was helpless.

Although his strength hadn't returned to its peak state, it would be restored soon. With this strength and his various means... as long as the other party wasn't a Half-King, it shouldn't be a problem.

A moment later.

Han Fei saw a black shadow appear. However, the black shadow was too big. It was clearly a big ship nearly 100 meters long, and it was a sailing ship that was very fast. On the big sail of the sailing ship, there was a picture of a giant shark. Its mouth was full of sharp teeth and its eyeballs were red. And the bow of the ship was like a shark head.

The big ship braved the wind and broke through the void. In this turbulent sea, it was like walking on flat ground.

Suddenly, the boat disappeared.

Immediately afterward, Han Fei felt the void tremble. In the next moment, a big ship appeared a hundred kilometers away from Han Fei.

When he looked closer, he saw that there were arrays around the hull. The array shape was like a sharp knife... This thing could actually break through the void and travel in the void! Interesting. The old turtle was making a breakthrough and absorbing tremendous spiritual energy. However, the old turtle left a wisp of soul in Han Fei's heart, so they could still talk.

The old turtle said, "Well! There shouldn't be any strong masters on this ship. The strongest one is only an advanced Venerable, and the remaining one is an intermediate peak-level Venerable, an intermediate Venerable, and two junior Venerables. The rest are six Half-Venerables."

"So many Venerables?"

Swish! Swish! Swish!

The void trembled, and three people appeared dozens of kilometers away from Han Fei.

These people were wearing heavy armor with many barbed spikes on it.

Han Fei could keenly see that... there was poison on those saw teeth. The poison that could be smeared on the body by a Venerable was probably not ordinary.

In their hands, they were all holding serrated scimitars, which were drawn by spiritual energy chains and looked like a standard weapon. In Han Fei's eyes, they were not regular weapons but were as strong as high-quality Divine weapons.

A man in the advanced Venerable realm said ruthlessly, "It turns out that this turtle demon has an accomplice... Brat, how dare you snatch our pirate team? You must be tired of living!" Han Fei smiled faintly. "Oh? Resources belong to whoever gets them. Are all the good things in the world yours?"

The Advanced Venerable narrowed his eyes. "You're quite bold. Do you think you, a mere advanced Venerable, can protect the turtle demon? Besides, when did human beings get together with sea demons? Are you... a merman?"

Han Fei's heart did a flip. Did these people know about the Mermen Tribe?

It seemed that after he left the Yin-Yang World and Water-Wood World, even the Mermen Tribe had appeared. This was indeed the outside world!

Han Fei grinned. "It seems that you know a lot."

The three people's faces changed slightly, and the middle-aged man raised his hand. "Retreat!"

However, Han Fei had already come out. How could he let them retreat safely?

Han Fei took a step forward and appeared directly beside the middle-aged man.

"Poison Teeth ~"

The middle-aged man's original intention was to give the other two a chance to escape. He pounced on Han Fei with his soul as a tooth, which was clearly poisonous. Han Fei certainly wouldn't swallow such a weird poison. "Roar!"

At that moment, the Hundred Beast Soul Devouring erupted and shattered the Poison Tooth Soul. Han Fei counterattacked with a S.

"Pfft!"

The middle-aged man vomited a big mouthful of blood, withstanding Han Fei's Soul Stirring Spike, and wanted to retreat... However, Han Fei had already appeared in front of him and pressed a palm on his chest.

Bang!

In an instant, this person's battle suit shattered, and his ribs were all broken.

The middle-aged man was horrified. This guy is so strong! In the same realm, he didn't even have a chance to fight back! This kind of person was definitely not ordinary.

The middle-aged man wanted to secretly crush a pearl, but Han Fei had been tricked once. How could this Flash Stone-like thing work on him again?

As he drew his saber, the man's hand fell.

Han Fei grabbed the pearl easily and looked at it, and information appeared in his eyes.

< Name > Escape Pearl

< Introduction > This is a one-time consumable. It can break through the void and help you escape. As long as you crush this pearl, you can randomly appear somewhere within ten thousand kilometers. The pearl can break through the sealed void. This is its only advantage. < Remarks > A basic escape-type treasure, of ordinary quality.

asu

Han Fei put on a smile. I thought it was something special.

However, while this thing might be useful in a battle of equal strength, it was almost impossible for those who were crushed by the other party in strength to escape.

In the next moment, Han Fei punched the middle-aged man and shattered half of his body. The Void Lines had already attached to him.

Han Fei seemed to have just solved an insignificant opponent.

After solving the middle-aged man, Han Fei said casually, "Well, this person's strength is not bad, his defense is quite strong, and his reaction speed and soul attack are good too. However, he can't be called a Heavenly Talent at all. He must be really old to be so strong."

The old turtle: "The other two escaped."

Han Fei smiled. "It's just an array... Let me see how powerful the boat array outside can be."

Holding the middle-aged man in one hand, Han Fei came to the big ship of the pirates. When Han Fei performed the Star Teleportation Technique, he found that it failed... Was the level of this array very high?

Suddenly, Han Fei felt a sense of crisis. He saw a light surging on the bow of the ship.

Immediately afterward, a spiritual energy shock wave comparable to the Half-King realm spewed out of the shark's mouth, which contained a lot of Great Dao power.

"Sacrificing Punch."

Rumble! Rumble!

A terrifying explosion swept nearly a thousand kilometers.

Han Fei was knocked back nearly a hundred kilometers.

However, in the end, he still stood in front of the old turtle. Even the middle-aged man in his hand was intact.

However, many people on the pirate ship exclaimed.

Someone shouted, "How is it possible? This person, with the strength of an advanced Venerable, actually blocked a Half King-level energy cannon head-on? Is he even human?"

On both sides of Han Fei, the seawater was like a waterfall, and behind him, it was calm.

Han Fei shrugged and stretched his body solemnly.

F*ck, it's just a 100-meter-long ship... How can it be so powerful? How can this ship withstand the attack of a Half-King?

"No! It's because of the array... There's an array that can unleash the power of a Half-King! Interesting. I have to study it..."

With that, Han Fei disappeared again. Although the shark's mouth seemed to be charging, Han Fei had already punched it.

The invincible fist mark bombarded the ship, but the boat array flickered and an energy shield protected the entire hull.

This energy shield armor contained a trace of Great Dao power, so Han Fei's invincible fist mark couldn't shake it at all.

However, how could this be a problem for Han Fei? How could he expect to defeat his opponent with one punch?

Bang! Bang! Bang! With the power of the Great Dao added to his body, Han Fei's strength suddenly soared. He punched dozens of times in a row, causing the ship array to rumble and the entire hull to tremble. Some places had already cracked.

Han Fei thought to himself, If I have this ship... I can form a one-man pirate team. After all, pirates were from the outer sea, and nobody would doubt his identity.

At this moment, someone exclaimed, "Sir, don't go too far. Do you really want to become our enemy? If anything happens to us here, the Fourth King will definitely retaliate against you."

"Fourth King?"

Han Fei thought to himself, I don't care about the Fourth King or what. I'm never threatened by anyone. Knock, knock, knock!

Crack!

Although Han Fei guessed that this was probably just one of the pirates' ships, he had offended these pirates, so he had no scruples anymore.

When the hull was blasted apart, Han Fei performed a Star Teleportation and appeared on the hull.

The scene could be imagined.

Han Fei's strength was comparable to that of a Half-King. He defeated all those Venerables quickly.

The remaining Half-Venerable looked at each other in bewilderment. Is this guy so reckless? The Predators can't even scare him away!

Han Fei reached out and grabbed the middle-aged man back. The old turtle was still making a breakthrough on the sea, so Han Fei wasn't in a hurry.

Han Fei sneered. "Everybody, wait here. If anyone makes any moves, hehe..."

Chapter 1690 Forces in the Raging Sea

As the number one thug on the Avenger, Han Fei was definitely no joke. He certainly wouldn't lose to these people in terms of robbery.

Therefore, those people didn't dare to move at all after Han Fei snatched their ship. After all, the only advanced Venerable on the boat was easily taken down by Han Fei.

Half an hour later, the old turtle broke through to the advanced Venerable realm and came to the ship unhurriedly.

At this moment, the old turtle really wanted to swallow these people. How dare they hunt him?!

Han Fei said, "Help me watch them. I'm going to see this man's memories."

Although Han Fei rarely used the Soul Searching Technique, it was useful at critical moments.

For example, at this moment, Han Fei knew nothing about the outer domain. The only thing he knew was the name of the Thirty-Six Mystic Worlds.

When Han Fei entered the middle-aged man's soul, he found that this person was also from the Thirty-Six Mystic Worlds. Apart from his growing experience, Han Fei quickly found a lot of useful information.

First of all, Han Fei could confirm that the area he was in belonged to the Infinite Ocean.

Yes, it was different from the Infinite Ocean in general. Generally, Infinite Ocean meant infinite ocean without end.

However, the Infinite Ocean here was in a narrower sense. It had a range, space, and routes. For example, the Infinite Ocean was divided into inner and outer waters.

People called this place Raging Sea.

Just like the name of the cage, some people called the cage Raging Sea. Maybe this name was spread by Golden Boy and the others.

was a

le C

What distinguished the inner and outer waters was a vast sea area where one couldn't tell the direction. If one didn't have a precise route, they would be lost if they entered that sea area from the outer waters.

According to the middle-aged man's memory, there were a lot of ferocious beasts living in that sea area. Even if there was a route, they would be vulnerable to attacks, not to mention that there was no route.

The difference between the inner and outer sea areas was that the outer sea area was full of energy, and the spiritual energy there was not as rich as in the inner sea area. Furthermore, terrifying hurricanes often happened there. Once these hurricanes were formed, they would be very unstable and unfavorable to cultivation.

However, in the inner sea, there was rich spiritual energy. Although the energy was violent, humans had their own means to isolate the chaotic energy, just like the islands in the cage.

Apart from that, there were abundant resources in the inner sea. Although there were mermaids and other undersea races living there, human beings were as powerful as those marine races.

Therefore, danger and opportunity coexisted. Although the environment was cruel, it was also very easy for people to grow up.

After knowing this area was named Infinite Ocean, Han Fei clearly knew the human forces in the inner sea.

In the inner sea, there were following human powers: Supreme Clearness, Chaos, Infinity, Golden Crow, Dragon Subduing, Glazed Glass, Immeasurability, Nine Palaces, Sword God, Dream Weaving, Supreme Mystic, Medicine King, and Soul Sealing, which are collectively called 13 worlds in the inner sea.

And the human powers in the outer sea were: Thunder Fire, Ice Snow, Five Elements, Spirit Refining, Nether World, Mad Corpse, Blood Fiend, Wraith, Hundred Flowers, Blue Cloud, Million Poison, Wind Slashing, and Sanskrit Music. They were also the 13 major powers, collectively known as the thirteen worlds in the outer sea.

Yes, in the entire Thirty-Six Mystic Worlds, only 26 worlds remained in the Raging Sea. As for the other 10 worlds, they disappeared without a trace.

These ten worlds were respectively: Yin-Yang, Water Wood, Mindless, Silver Moon, Beast King, Parting Grief, Flying Feather, Ten Color, White Cloud, and Ashless. Han Fei knew about the Yin-Yang World and Water-Wood World. However, the remaining eight weren't with the Yin-Yang World and Water-Wood World.

Of course, apart from the human Heavenly Palaces in the Raging Sea.

There were also a few super forces that couldn't be ignored here. Among them, the Ten Great Pirate Groups were top forces that even human beings and sea demons couldn't ignore.

Why were they called the ten great pirate groups? In fact, this middle-aged man knew that there were more than a hundred pirate groups, and there were thousands of pirate groups in the entire Raging Sea. They had already become a super force.

was

In the Raging Sea, there was a city of pirates that everyone knew, named Martial Emperor City.

It was said that this city was protected by a monarch.

Although there had never been a monarch in the Raging Sea, there was a legend about Martial Emperor City.

It was said that the three kings of the Supreme Clearness, Chaos, and Infinity had tried to subdue the Martial Emperor City. However, after they returned, they each went into seclusion for ten thousand years.

And in Martial Emperor City, pirates were still coming and going.

Besides, it was said that after that battle, the Martial Emperor City not only allowed pirates to come and go, but also expanded its business to the Thirty-Six Mystic Worlds.

In fact, many people knew that the three kings were probably beaten up. Later, the Martial Emperor City became more and more mysterious... And the business of the Martial Emperor City was booming. The Martial Emperor City had no principles. This was a paradise for pirates. They could trade with humans and sea demons. In fact, pirates and sea demons often traded.

The Martial Emperor City was a special existence in the Raging Sea.

Since it was established, no one could shake its status, whether it was the sea demons or the Thirty-Six Mystic Worlds.

Therefore, it was not without reason that pirates abounded here. After all, the Martial Emperor City provided shelter for them. In the Martial Emperor City, the major pirate forces enjoyed absolute safety. No one dared to cause trouble in the Martial Emperor City. Those who dared to cause trouble were basically dead.

After searching the soul of this middle-aged man, Han Fei even saw what the Martial Emperor City was like. It was a huge black city built in mist. Outside the city was a piece of land that stretched for less than a thousand kilometers.

And the most peculiar thing was that this Martial Emperor City was half on the land and half in the sea.

Han Fei quickly remembered the names of the ten pirate teams, because these ten pirate teams had kings guarding them.

These ten pirate groups were respectively: "The Undead Pirates, the Divine Sect Pirates, the Peace Pirates, the Predator Pirates, the Mermen Pirates, the Misfortune Pirates, the Gale Pirates, the Asura Pirates, the Crimson Fire Pirates, and the Devil Girl Pirates."

Han Fei was stunned for a moment. According to the strength of the pirates... the Predators seemed to be ranked fourth among the ten great pirate groups.

Han Fei's eyelids twitched. Fortunately, he didn't kill these people now. Otherwise, if a king came because so many Venerables died here, what could he do?

In the middle-aged man's memory, the captain of the Predators was known as the Mad Fourth King.

Just like his name suggested, this person was quite crazy. Besides, this guy really wanted to enter the top three. Unfortunately, he couldn't get in.

Hearing this name, Han Fei knew that this guy couldn't be a good person.

Undead? He knew that it involved secrets. Han Fei had some impression of the Divine Sect. When he deduced the Fish Transformation Technique, Han Fei knew that this sect was founded by humans who turned themselves into sea demons.

The name of "Peace Pirates" was ridiculous. Peace, how did you get to the top three?

The Mermen Pirates were clearly a pirate team composed of sea demons. It seemed that not only humans wanted to be pirates, but also sea demons...

There was nothing special about the rest. Except for the name of the Devil Girl Pirates, which sounded very feminine, there was nothing creative about their names.

Apart from the Thirty-Six Mystic Heavens, the Martial Emperor City, and the ten great pirate groups, the rest were naturally the sea demons. The sea demons were mainly divided into the merman race, the undersea human race, the hundred demon race, and the giant beast race.

Of course, Han Fei knew about the mermen and undersea human race. If he guessed right, Xia Xiaochan was in the mermen race.

As for the Hundred Demon race, they were a mixed-blood race apart from the merman race, collectively known as the Hundred Demon race. There were also many sea demons who considered themselves talented and refused to submit to other forces, calling themselves the Hundred Demon race. Indeed, in this vast sea, who was willing to submit to other races?

Therefore, the members of this race that was actually not a race differed greatly in strength.

As for the Giant Beasts, they were a special kind of sea demon. They were few in number and didn't have a good relationship with humans, sea demons, and pirates. However, the Giant Beasts had their strong points. They could swim freely in the Raging Sea and often attack human routes.

The giant beasts didn't like to transform into human shapes, but no one knew if they could. They were usually huge and brawny... In fact, they were extremely intelligent. However, this intermediate Venerable didn't know much about them.

There were no conflicts between the mermen, undersea human race, and hundred demon race. They often visited each other, but it was difficult to find their routes.

In name, the Hundred Demons and the undersea human race lived in the outer sea, while the mermen occupied the inner sea, which seemed to show their dominance.

From this information, Han Fei knew that the merman race was indeed very powerful. After all, there were thirteen Mystic Worlds in the inner sea, but so many kings couldn't take down the merman race, which showed how powerful they were.

Humans didn't have many battles with the pirates, the undersea human race, and the hundred demons.

However, it was another story when it came to the mermen and giant beasts...

The most eye-catching part of this complicated network was the Martial Emperor City. This thing was like a bug that no one dared to mess with.

Han Fei sneered. He had confirmed that the bulk of the Predators wasn't here.

The Mad Fourth King might be in the Martial Emperor City...

Therefore, Han Fei was relieved. Without a king, he had no opponents here!

Han Fei didn't panic at all.
