

GOF 1701

### **Chapter 1701 Finally Out of the Wilderness**

Han Fei wanted to escape, but how could Mad Fourth King let him?

After all, when had Mad Fourth King ever encountered such a passive situation?

It had always been him, Mad Fourth King, beating others, but Han Fei had destroyed one of his ships and killed a Half-King right in front of him.

This was a huge grudge!

The two of them broke through the void and left one after the other.

Of course, Han Fei wasn't as fast as a real king. At this moment, the Heavenly Void Divine Movement, the Agility of Wind, and other speed techniques had all been integrated into his movement technique.

Han Fei casually moved, and an afterimage flashed.

At this moment, Han Fei's speed was already his limit.

However, Han Fei didn't panic at all. As long as Mad Fourth King dared to chase him, he would dare to fight him. The two fought and ran for a million kilometers.

At this moment, Mad Fourth King had discovered Han Fei's weakness. This b\*stard could only maintain his strength for about seven or eight seconds... He wouldn't be able to hold on any longer!

But the moment Mad Fourth King pierced Han Fei again, another blue halo flowed.

In the next moment, Mad Fourth King knew that something was wrong and immediately headed towards their pirate ship.

But Han Fei's operation was simple. He spent ten wisps of Chaotic Qi to reverse time and return to his peak state ten seconds ago. He even used time to cross the void.

Moreover, it was a distance of a million kilometers.

The moment Han Fei reappeared, countless people of the Predators exclaimed.

"Where is Fourth King? Where is him?"

"How did this kid come back? Wasn't he being chased by Fourth King?"

"Quick, activate the Fish King Cannon."

However, Han Fei glanced around and chose another big ship. He used the Knock on the Heavenly Gate and charged out. Han Fei only needed to break a needle-sized spatial node.

In the next moment, Han Fei used Star Teleportation and appeared on the big ship.

"All leave the ship."

Two peak-level Venerables were shouting.

But at that moment, Han Fei used the Void Descending Art and projected nine peak-level Venerable projections.

“Puff... Puff... Puff... Puff...”

At that moment, everyone on the ship probably collapsed. What kind of f\*cking combat skill is this? A king’s projections? Is this guy really a king?

In a breath, Han Fei killed nine Venerables, and the others all fled the ship. Of course, Han Fei deliberately let them go. Otherwise, as long as he was willing to spend more time, none of the people on the boat could escape.

After slaughtering nine Venerables in a row, the Void Lines grabbed their bodies and threw them into Forge the Universe. Then, the ship suddenly disappeared. It was also thrown into Forge the Universe by Han Fei.

At this moment, the figures of Mad Fourth King had just appeared.

Mad Fourth King shouted, “Little thief, don’t go!”

Han Fei sneered. “Why should I stay to fight you?”

This time, Han Fei saw that it only took this king two seconds to cross a million kilometers, which was about one second faster than Queen Life and the White Armor Emperor.

Ten thousand kilometers away, Han Fei fled again.

However, this time, Mad Fourth King didn’t dare to chase after him. At the same time, he realized how terrifying the Time Great Dao was.

However, in the 36 Mystic Worlds, only less than five people had mastered the Time Great Dao! This was because everyone in the Thirty-Six Mystic Worlds knew that the Great Dao of Time wouldn’t work.

None of the strong masters who took the Great Dao of Time could survive in the end.

Mad Fourth King stood in the air. In just dozens of seconds, he had lost a Half-King, three peak-level Venerables, six other Venerables, more than 20 Half-Venerables, and two ships.

And Han Fei was only a Half-King.

Mad Fourth King was sure that Han Fei was only a Half-King. Otherwise, if Han Fei was already a king, he wouldn’t only be able to fight for a few seconds.

“Han Fei, the Avengers...”

Mad Fourth King narrowed his eyes. Han Fei, he had remembered this name.

However, this person’s potential and strength were too unbelievable. If he became a king, even if his strength only tripled, he would have a place in the Raging Sea in the future.

This gave Mad Fourth King a headache. He muttered, "How can I kill him? He has mastered the Great Dao of Time! It seems that I can only issue a bounty. The Predators shouldn't be the only pirate team to resist such a strong enemy... If we have to fight him, let's fight him together. Otherwise, that guy will only take revenge on us in the future."

Mad Fourth King immediately shouted, "Turn the rudder and prepare to teleport to Martial Emperor City."

Han Fei successfully escaped the pursuit of Mad Fourth King, mainly because he recognized the power of the Great Dao of Time. This Great Dao might not work well on Old Demon Chu... but on him, it was like adding wings to a tiger. Han Fei wasn't afraid that Mad Fourth King would chase him again. As long as he was willing to give up his pirate ships, he could play with him. At most, he would waste a hundred wisps of Chaotic Qi.

Now, in the Raging Sea, he had seen creatures that contained a large amount of Chaotic Qi more than once. He could absorb it back easily. What was he afraid of?

Of course, since Mad Fourth King didn't chase him, there was no need for Han Fei to fight him now. His top priority was not to fight, nor to reunite with the Grand Yin Academy.

Han Fei needed to find Yin'er quickly.

At that time, he could bring Yin'er back. What was Yin'er's current strength? How old was she? What was her condition? He didn't even know.

Perhaps Yin'er was still very weak and needed time to grow.

Therefore, regardless of whether he had reached the Half-King Realm or not... he had to find Yin'er as soon as possible! Even if it was to develop feelings with her earlier, it was necessary.

When he was about to leave the Wild Abyss, Han Fei grabbed the Vast Ocean Navigator out.

Han Fei's direction was also very clear. He planned to cross the outer sea and find a route to the inner sea first.

As for the Devil Girl Pirates? There was no need for him to worry about them. They had lived for tens of thousands of years without him and had even developed into one of the top ten pirate groups. Now, the status of the Devil Girl Pirates would not change much because of his arrival.

Half a day later.

When Han Fei followed the direction of the Vast Ocean Navigator and completely left the Wild Abyss, the surrounding sea creatures immediately multiplied. Among them, there were basically all the common creatures in the Yin-Yang World and the Water-Wood World, but there were also rare marine creatures here.

Han Fei traveled thousands of kilometers and sensed thousands of kinds of marine creatures, more than 800 of which Han Fei recognized.

Of course, there was no need to identify all kinds of algae, sea anemones, and sea urchins.

Some creatures with special characteristics were rare. Han Fei had never seen them before. He didn't expect such magical creatures to exist in this world...

For example, the information about the creatures in Han Fei's eyes read:

<Name> Stellar Jellyfish

<Introduction> A common marine jellyfish. The Stellar Jellyfish can absorb the essence of the moon and become invisible during the day and flash at night, like the stars in the ocean. The Stellar Jellyfish has ordinary combat power and poisonous tentacles. It's not too dangerous.

<Level> 52

<Quality> Ordinary <Spiritual Energy> 3,270 points

<Edible Effect> One may acquire invisibility ability. <Collectible> Sparkling Star Bead

<Absorbable>

Han Fei didn't even have the desire to catch a creature like the Stellar Jellyfish. However, they were floating in the sea and blinking. They were indeed beautiful, just like the stars in the sea.

Of course, there were also dangerous creatures, such as hunting sharks. At this moment, one of them flew past Han Fei.

Information popped up in Han Fei's eyes.

<Name> Blood Shadow Shark <Introduction> A common shark species. The Blood Shadow Shark is extremely aggressive and sensitive to blood. It can turn into a shadow and quickly approach its target and hunt.

<Level > 66

<Quality > Rare

<Spiritual Energy> 9,327 Points

<Effect> Eating it can strengthen one's Qi and blood.

<Collectible> Teeth, fins

<Absorbable>

There were many creatures like the Blood Shadow Shark.

Moreover, most fish swam in groups. For example, there were hundreds of Blood Shadow Sharks. Han Fei saw that one of them had a red fin, which was obviously a mutated Blood Shadow Shark.

Upon closer inspection, it was an Explorer-level exotic creature, a mutated Blood Shadow Shark.

In this sea, among the billions of fish and all kinds of creatures, exotic creatures and Explorer-level creatures could be found easily. Perhaps this was the real sea.

The Yin-Yang World and the Water-Wood World in the Wild Abyss were just well-protected places. For tens of thousands of years, they might have forgotten the horror of the outside world.

Han Fei didn't pay much attention to these sea creatures, because he knew that there were people from the thirteen worlds in the outer domain in the surrounding area.

In order not to cause too much trouble, Han Fei was not interested in meeting these people. Anyway, when he became a king in the future, he would have plenty of time to meet the forces in the thirteen worlds in the outer domain.

Because the Vast Ocean Navigator could only point accurately for a short time, Han Fei released Little Black and Little White after using the Vast Ocean Navigator.

In comparison, Little White's perception and sense of danger should be able to help him avoid danger in this unfamiliar place.

However, Han Fei soon discovered a problem. Little White said, "Daddy, there are dangers everywhere. We can't avoid them..."

TS

Han Fei: "..."

### **Chapter 1702 Chaotic Raging Sea**

Han Fei froze. Danger was everywhere. What should he do?

Han Fei couldn't help but ask, "Daughter, which place is less dangerous?"

Little White wagged her tail and spun for a long time. Finally, she said leisurely, "Daddy, I can't feel the spatial distance. I feel that the danger is very close, but it also seems very far."

"Hiss ~"

Han Fei took a deep breath. He seemed to understand why Zhenzhu would rather run to the Wild Abyss than take Mad Fourth King to their main route.

Once the king followed the clues and destroyed most of the route, it seemed difficult to open up a new and safe route!

Old Han had told him before that he couldn't tell the direction through the sun, moon, and stars here. All choices might lead him to the east.

At this moment, even Little White couldn't point out the direction clearly. Han Fei couldn't help but smile bitterly and think to himself, That makes sense. If Little White can figure out the direction and easily solve the crisis, then Mother wouldn't have to bother to make the Vast Ocean Navigator.

From this, it could be seen that although Little Black and Little White were powerful, at least before they grew up, they couldn't see through the mysteries.

According to Han Fei's judgment, combined with his experience in the Age of Doom, it seemed that the east had become a forbidden place a long time ago.

At least, in Han Fei's opinion, if he wanted to go to explore the east, he had to at least reach the Emperor Realm. Of course, this was the information he got during the sacrifice offering.

According to the old turtle, the Yin-Yang World was in the Wilderness.

In that case, in a sense, although the Raging Sea was much more advanced than the Yin-Yang World, it seemed that there were only more kings here. Was there an Emperor? At least, according to the memory of the intermediate Venerable, there was no Emperor here.

However, according to the legend of Martial Emperor City, Martial Emperor City seemed to have a monarch who could suppress the entire Raging Sea.

It could be seen that a monarch was the ceiling of the Raging Sea. It could even be said that perhaps the Emperor Realm was the ceiling of the Raging Sea.

These thoughts quickly popped up in Han Fei's mind.

However, Han Fei had to find a way out.

Han Fei didn't believe that there was no safe area in the Raging Sea. If that was not the case, how did the people of the Thirty-Six Mystic Worlds cultivate and grow?

Therefore, Han Fei believed that there were too many unknowns in the Raging Sea that had not been explored, so that people needed to find a route that they thought was relatively safe.

And the route was not absolutely safe. Otherwise, there would be no pirates.

Han Fei didn't take action immediately. Instead, he recalled the memories he read in the Venerable's mind and tried to figure out the location of the thirteen worlds in the outer domain.

However, that person judged the location of the thirteen worlds in the outer domain based on the route. But now, he didn't know where he was and had no reference at all.

Therefore, other than using the Vast Ocean Navigator, there was no other way.

Using the Vast Ocean Navigator was equivalent to opening a new route. He had to find a reliable route to wherever he wanted in the Raging Sea.

Then, the problem was still finding the way.

"Huff!"

Standing on the turbulent sea, Han Fei pondered for a moment and took out the Nine Palace Luck Ruler.

Buzz!

**mo**

The ruler of the Nine Palace Luck Ruler moved quickly and soon stopped at the "Ominous".

Han Fei grinned. If it was just an ominous divination, it wouldn't be a problem.

Buzz!

Han Fei immediately used the Great Shift.

This teleportation was different from the one in the Wild Abyss. This time, there was no spatial obstruction, so Han Fei felt much more relaxed.

While teleporting, Han Fei made a mark on the original place. When Han Fei appeared in the void, he looked back and found that he had only teleported twenty thousand kilometers away.

The old turtle said, "It's not bad. After all, you haven't learned it for long. It shouldn't be too difficult for you to open a sea route here. Otherwise, where were those existing sea routes from?"

Han Fei said casually, "Unfortunately, no matter how I open a route, it has to be connected to someone else's route or a fixed node."

Han Fei narrowed his eyes.

Then he quickly dived into the sea. Under the seabed was an ordinary valley with many creatures. Han Fei could clearly sense that there were no powerful creatures here. Therefore, Han Fei unhurriedly set up a directional teleportation array here.

After setting up this directional teleportation array, Han Fei engraved the number "one" on the side, which meant that this was his No. 1 teleportation array.

After the teleportation arrays were established, they could communicate with each other.

For example, the teleportation arrays of the Water-Wood World could be said to be densely packed, and the directional teleportation arrays he had established could easily teleport each other for about 200,000 kilometers.

Han Fei couldn't help but grin. "Since I want to open up a flight route, let me start now."

Han Fei teleported at least eight or nine times in one direction. During this time, he encountered two Venerables.

However, when the two Venerables sensed Han Fei, they fled immediately.

After all, Han Fei didn't hide his strength as a Half-King.

When Han Fei set up the second directional teleportation array and marked the serial number, he reappeared on the sea. Then he used the Vast Ocean Navigator for the second time today.

However, in the next second, Han Fei felt terrible. This time, the direction of the Vast Ocean Navigator was about 30 degrees away from where he had teleported.

In this vast sea, even a deviation of 3 degrees was a huge deviation.

This meant that Han Fei had to adjust his direction immediately. So, the second time, Han Fei deviated more than 20 degrees again. This made Han Fei speechless. Fortunately, he had the Vast Ocean Navigator. Otherwise, who knew where he would appear? After three times, Han Fei didn't encounter any powerful creatures, but he still hunted a Venerable crab.

Oh, to be precise, it was not hunting, but killing. Because just now, Han Fei had simulated his realm to the junior Venerable realm, so that he could use himself as bait to catch the Venerable sea demon beasts that were ready to ambush and kill him.

After using the Vast Ocean Navigator three times, Han Fei estimated that his actual distance was only about 800,000 kilometers away from the Wild Abyss.

And in these three teleportations, he should have only moved less than half a million kilometers.

Buzz!

Han Fei took out the big ship he had just snatched.

After taking out the hull, Han Fei dropped the anchor. From now on, he wouldn't move until the Vast Ocean Navigator was ready. Otherwise, he wouldn't move.

The phantom of rivers and mountains appeared and Old Yuan, Xiao Se, and Nian'er appeared on the ship together.

As soon as Nian'er came out, she said, "Brother, I just went in for a while. Did you beat the bad guys away?"

The old turtle couldn't help but roll his eyes. Can't this little girl see the situation clearly? Han Fei clearly ran away!

Xiao Se did not want to hurt Nian'er, so she naturally would not tell her.

Han Fei said shamelessly, "Of course. How can those bad guys be my opponent? Nian'er, what do you want to eat?"

"Hot pot ~"

Han Fei grinned. "Then let's have hot pot."

When Han Fei was making hot pot, the old turtle asked, "This sea area should be very big, right?"

Han Fei nodded slightly. "A huge sea that can accommodate 36 Mystic Worlds, merman race, and countless sea demons can't be small. I'm afraid it extends at least billions of kilometers... Damn, isn't it too big?"

When evaluating the size of the sea, even Han Fei himself was a little stunned. Hundreds of millions of kilometers? Although this size might not be big in the starry sky, how could mortals understand this concept? The old turtle said, "It's not a good idea for you to explore like this. We haven't entered the sea that separates the inner and outer domains of the Raging Sea yet... It might be more difficult there."

Han Fei said, "I know, but I need to confirm which world is closest to me."

However, the old turtle said, "In fact, there's no need to make wild guesses. Neither your Vast Ocean Navigator nor the Luck Ruler can help you judge. Why don't you find a ship of the thirteen worlds in the outer domain near the Wild Abyss? Then you can follow them in the form of a shadow. Then you'll be able to get the thirteen worlds in the outer domain." "Hiss ~"

Han Fei's eyes widened. "Wow, Old Yuan, amazing!"

Han Fei's heart did a flip. It would take too much time for him to establish a flight route. The Vast Ocean Navigator could only be used three times a day.

According to the deviation of the route of the Raging Sea, in fact, it would be good enough if he could travel 500,000 kilometers in a day. At this speed, they might not be able to cross the outer sea and reach the inner sea in half a year.

The next day, Han Fei immediately changed his strategy and calculated with the Nine Palace Luck Ruler. It was still the "Ominous" divination result, but Han Fei took it as "Safe".

This time, the Vast Ocean Navigator deviated a lot because Han Fei asked it to take him to the nearest ship from the thirteen worlds in the outer domain...

Therefore, when the Vast Ocean Navigator pointed in a direction for the first time, Han Fei walked 300,000 kilometers.

But after 300,000 kilometers, Han Fei found that the course deviated as much as 38 degrees.

Han Fei smiled bitterly. It seemed that the shorter he moved, the more accurate the route would be.

The second time, Han Fei traveled 200,000 kilometers.

The third time, Han Fei still traveled 200,000 kilometers.

Just at this time, Han Fei happened to see the shadow of a big ship at the end of his vision.

Besides, the big ship wasn't moving.

At this moment, Han Fei suddenly found that the Demon Purification Pot shook.

"Huh?"

### **Chapter 1703 Sea of Greed**

Han Fei looked at his wrist in confusion and found that the Demon Purification Pot was slightly trembling and flashing.

"Why is the calabash flashing... is it about the little vine?"

The old turtle also found that something was wrong and asked, "What happened?"

Han Fei licked his lips. "Nothing."

The boat that Han Fei saw was blue and white with a gem-like light refraction.

Han Fei was about to go to the ship, when the old turtle said, "Something is wrong. The hull doesn't move at all. It seem to be attracted by some force."

Han Fei got closer and looked again, only to find that the ship seemed to have stopped beside an island.

Yes, Han Fei found an island there.

On the island, there was a tall tower.

Han Fei couldn't help but ask, "An island? It seems that the people of this Heavenly Palace are quite lucky. They found an island while opening up their route?"

But when Han Fei looked at the bottom of the sea, he was horrified because he found that there were thousands of wrecked ships here.

However, the schools of fish could still travel back and forth, so there was not much danger.

With caution, he didn't go there rashly. About 30,000 kilometers away, Han Fei activated the Twin Divine Technique and went to investigate with his black-mist body.

The appearance of the ship burial pit was definitely not without reason.

Once, when he was in the level-one fishery, a ship burial pit appeared because of the Mantis Shrimp.

However, this place was different from the level-one fishery. This was the Raging Sea. Therefore, the problems here were definitely not as simple as those in the level-one fishery.

However, when Han Fei approached the island, he scanned it many times with his perception, but he didn't find anyone anchoring the ship.

This was strange. The big ships here had to face the impact of countless sea creatures, so their hulls were absolutely solid. And the anchors were also covered with sophisticated gravity arrays. When they anchored, the anchors must be as heavy as mountains, so that they could stabilize the hull and stay in the Raging Sea.

However, the ship had clearly stopped without anchoring. According to the waterline, the hull should not be much of a problem.

Han Fei couldn't figure it out, so he moved closer.

In the Ice Snow World, on the Snow Wind... A group of Venerables and Half-Venerables in thick fur had extremely ugly expressions.

Han Fei saw a peak-level Venerable on this ship. He must be the captain of this ship.

This person was holding an ultra-quality divine weapon in his hand, and his face was extremely gloomy. Everyone was staring at this peak-level Venerable.

**e**

**w**

This person gently let go and threw the ultra-quality sword into the sea. Han Fei was dumbfounded. What's going on? He just threw away an ultra-quality Divine weapon? Are people in the outside world so extravagant? If you don't want it, you can give it to me...

However, just as the divine weapon was about to fall to the bottom of the sea, a claw stretched out from nowhere and hooked it gently. The divine weapon disappeared, as if it had been sucked into the island.

Han Fei saw that everyone on this ship seemed to be nervous.

After more than ten seconds, the aura of the peak-level Venerable surged, and he said coldly, "It's useless. The sacrifice is not enough."

"Sacrifice?"

Han Fei didn't know why these people were offering a sacrifice.

However, exclamations broke out on the ship.

"Hiss "

Someone said, "Isn't an ultra-quality Divine weapon enough? Does it need our Snow Wind?"

"Silence."

The peak-level Venerable turned around and shouted, "Show respect to the Sea of Greed. Think about it. What else do we have that is worth sacrificing except for the Snow Wind?"

Han Fei's heart did a flip. The Sea of Greed? It seemed that they were offering a sacrifice to this sea area...

Just now, it was an ultra-quality divine weapon. Even such a divine weapon was not enough to be a sacrifice. Other than the Sea Quelling Bizarre Treasure, it might only be their big ship.

There was nothing better than an ultra-quality Divine weapon on the Venerable.

Han Fei couldn't help but look at the sunken ships in the water and sigh. So, these ships didn't sink naturally but were sacrificed. But why? What would happen if they didn't?

While Han Fei was thinking about this, he suddenly saw two beams of light on the island, which fell directly on the place where Han Fei

was.

The old turtle shouted, "Not good! Something is wrong with that island!".

Han Fei was about to fuse his twin bodies into one. Obviously, his black-mist body had been discovered by something.

At this moment, Han Fei heard a voice in his mind. "When humans pass by, they must leave precious resources. Otherwise, you will never escape from the Sea of Greed."

Han Fei sneered. "F\*ck you. Two as one."

Buzz!

Han Fei teleported thirty thousand kilometers away.

Even if a treasure like the little vine appeared here, Han Fei still chose to retreat temporarily. After all, he knew nothing about this place.

Besides, he didn't even find anything wrong with the island just now, not even the old turtle.

However, the old turtle said, "The surrounding space is chaotic."

Buzz!

Han Fei moved a thousand miles with one step, trying to escape.

However, as soon as he took this step, Han Fei experienced the feeling of walking ten thousand kilometers with one step.

However, he was not leaving the island but approaching it.

There was space flowing around. Han Fei always prided a good understanding of space. At least, the Heavenly Void Divine Movement could break through the void.

However, Han Fei tried to fly a thousand kilometers away from the island, only to fly closer to the island again...

At this moment, the peak-level Venerable on the Snow Wind looked at Han Fei and happened to meet his eyes. Fortunately, they were still far away, so Han Fei had enough time to conceal his strength.

Han Fei's heart did a flip. It was impossible for him to survive in this sea area if he was too weak. But if he was too strong and was on par with the peak-level Venerable, the other party would probably be on guard against him.

From the looks of it, it would be best if he were an advanced Venerable.

Han Fei secretly activated the Deceit Technique and simulated his strength to the peak-level advanced Venerable, which was a small realm away from the peak-level Venerable.

This way, the other party would not be afraid of him.

Of course, there was no need for Han Fei to go to that ship immediately, because he was also restricted by this sea area. There was something that was forcing him to sacrifice something...

Han Fei asked, "Old Yuan, can you find anything on that island?"

Old Yuan said, "I can't sense anything. With my current soul power, I can roughly know that there is a strong master there. However, his soul is resisting. With my remnant soul, it's not worth fighting him head-on."

"A strong master? How strong is he? Is he a king?"

Han Fei had now realized the power of the Raging Sea. But no matter how strong it was, a king couldn't be born so easily. Han Fei realized that he had used up the three chances of the Vast Ocean Navigator today. It wasn't appropriate for him to make a move yet.

At this moment, Han Fei wasn't particularly flustered. He didn't seem to have anything on him. Even if he really had to sacrifice something, he couldn't leave much behind.

At this moment, Han Fei looked at the Snow Wind. According to his memory, this should be a big ship from the Ice Snow World in the thirteen worlds in the outer domain.

Han Fei wasn't sure. Was this the route of the Ice Snow World? If it was, why did they come to this Sea of Greed?

Therefore, Han Fei asked straightforwardly, "Fellow Daoists of the Ice Snow World, Han Fei from the Nine Palace World, greets you. I was chasing Dao Querying Fish and unfortunately got lost with the fleet. May I ask where this is?"

The peak-level Venerable said in surprise, "Nine Palace World? Are the thirteen worlds in the inner domain also here to explore the abnormality of the Wild Abyss?"

Han Fei said, "I just came to investigate. Unexpectedly, I got lost in this sea area and couldn't escape."

The peak-level Venerable was puzzled. "The Nine Palace World? Haven't you heard of the Sea of Greed? Speaking of which, this matter was caused by the thirteen worlds in the inner domain."

Han Fei shook his head and said, "I really don't know. I've never been to the thirteen worlds in the outer domain, so I'm not familiar with the outer domain."

"Oh, had you never been to the thirteen worlds in the outer domain?"

The man's heart skipped a beat. It seemed that this guy must be a top Heavenly Talent from the thirteen worlds in the inner domain. It was often said that people from the thirteen worlds in the inner domain, especially Heavenly Talents, rarely came to the outer domain because in the inner domain, the environment was better, the resources were richer, and there were more ways to gain cultivation experiences. Why did they both to come to the outer domain?

It was unknown if the Venerable from the Ice Snow World believed Han Fei, but he just replied, "Fellow Daoist from the Nine Palace World, this is the Sea of Greed. It is said that there used to be a king here, but he was suppressed by Supreme Clearness and Infinity. However, Supreme Clearness and Infinity couldn't kill this king. Later, the king forcibly detained humans and asked for resources..."

Han Fei was lost for words. Is there such a king? Han Fei asked, "What if I have nothing to give?"

The middle-aged man said, "Then you might die."

As he spoke, Han Fei was already approaching the island and the Snow Wind.

In addition to the peak-level Venerable, other Venerables also discovered Han Fei.

Someone was surprised. "Master Liu, who is this person?"

Liu Ran said indifferently, "He's said to be from the Nine Palace World, but his identity can't be confirmed. However, this person must have accidentally fallen into the Sea of Greed. Otherwise, no one would foolishly come here."

### **Chapter 1704 A Crab**

The Venerable on the Snow Wind didn't invite Han Fei to board the Snow Wind.

In the Raging Sea, as long as one was not at home, any danger might happen. Even if they believed that Han Fei was a lost person, the Snow Wind couldn't help him.

Besides, this middle-aged man had doubts about the Nine Palace World. The Nine Palace World had been sealed for tens of thousands of years, and even in the inner sea, it was extremely rare to see people from the Nine Palace World. It was strange for Han Fei to say that he was from the Nine Palace World.

When Han Fei approached, Liu Ran found that Han Fei was an advanced Venerable. This realm could be said to be very strong. He didn't come to the outer sea until he reached this realm, probably to break through to the peak of the Venerable realm.

None of the thirteen worlds in the inner domain was easy to deal with, especially the Nine Palace World. With their amazing divination ability, how could this guy fall into the Sea of Greed?

When he approached the island again, all of a sudden, Han Fei saw a super huge pincer stretching out in the air, trying to catch these people from the Ice Snow World.

At that moment, Liu Ran shouted, "Quick, leave the ship. The Sea of Greed has taken the initiative to attack."

When he saw the tentacle, Han Fei narrowed his eyes and asked in his heart, "Old Yuan, that tentacle should come from that island, right? It looks like a crab's big pincer. However, compared to the length of the island, this pincer is too small."

The pincer in the void gently caught the Snow Wind and dragged it back to the island.

Han Fei simply scanned around with his perception, but his perception was blocked 200 kilometers away from the island, where there seemed to be a barrier. Although Liu Ran's expression was extremely ugly, he still gathered more than 60 people on the Snow Wind.

TAT

Liu Ran cupped his hands at Han Fei. "Fellow Daoist Han, whether it's a voluntary sacrifice or a passive sacrifice, you can only leave the Sea of Greed after offering a sacrifice. Of course, the sacrifice must be recognized. I can't help you... Now, the Snow Wind has been passively sacrificed, but I still have to go back with my men. Goodbye."

Han Fei frowned slightly. "Can you go back without a ship?"

In the Raging Sea, the so-called routes were routes connected by spatial nodes. And those big ships were not ordinary ships, but carefully built ships that could teleport through various spaces.

This was like... the directional teleportation array Han Fei set up. If Han Fei let others pass and gave that person a token, that person could also pass with the token.

The so-called sea route was also slowly developed in this relatively clumsy way. The distance of a large ship's void teleportation could be as long as 500,000 to a million kilometers. Even a king would need two to three seconds to travel so long. If a Venerable wanted to swim all the way there, he might be lost.

In fact, most of the routes were discovered by those who were lost. Some people were lucky enough to find a way out, so they opened the routes. However, most people died in this Raging Sea.

It could be said that in the Raging Sea, people were lost every year and every day.

Liu Ran didn't help Han Fei because he couldn't even protect himself. Without the ship, it would be difficult for him to find the route.

Of course, there were many of them, and there were peak-level Venerables. This force was very powerful, so Liu Ran didn't panic.

Regarding Han Fei's question, Liu Ran said casually, "Try it! Although the Raging Sea is terrifying, it's not absolutely disorienting. By the way, as long as the things you sacrifice are valuable enough, the Sea of Greed will let you

go..."

Then Liu Ran left with the others, showing no intention of helping Han Fei.

Han Fei didn't panic.

Seeing so many shipwrecks, Han Fei guessed that the person on the island might have a penchant for collecting... This person seemed to like boats, and he had a pirate ship. If all else failed, he could just abandon the pirate ship. However, what Han Fei cared about wasn't the pirate ship, but the reaction of the Demon Purification Pot.

Before, Han Fei had been wondering how many small vines the Demon Purification Pot had. Three small vines didn't seem to be the limit of the Demon Purification Pot. After all, after spending so much time together, Han Fei felt that the deduction ability that the three small vines could achieve was only at the divine-quality Venerable-level and could hardly reach the king level. But some of the abilities displayed by the Demon Purification Pot were obviously more than that. Therefore, Han Fei believed that the Demon Purification Pot still had other small vines.

At this moment, the Nine Palace Luck Ruler and the Vast Ocean Navigator had been used up. Since Han Fei couldn't get out, he planned to wait for a day.

At least, the result calculated with the Nine Palace Luck Ruler today was "Ominous". To Han Fei, this was just an ordinary divination result, which he didn't care about.

Two hours later, Han Fei heard the same words again. "Humans must leave precious resources behind. Otherwise, you will never escape the Sea of Greed."

When he heard this, Han Fei pretended not to hear it and continued to sit cross-legged, waiting for the day to pass.

There was no movement on the island.

After another hour, the voice sounded again like a time alarm clock.

Han Fei still ignored it.

However, the moment Han Fei ignored it, space began to flow, and a huge pincer stretched out of the void, trying to grab Han Fei.

At this moment, no one else saw Han Fei, and Han Fei didn't need to maintain his image as a weakling. In an instant, Han Fei's strength soared to the Half-King realm.

With the power of the Great Dao, the Sacrificing Punch rushed out. There was also a gravity array on the punch. Bang! Bang! Bang! As if realizing the power of Han Fei's attack, the void overlapped, trying to restrain Han Fei with a spatial technique. Han Fei stepped out and shouted, "All laws forbidden in this space."

As soon as this Dao appeared, the void collapsed, and the Sacrificing Punch broke out of the void and bombarded at the huge pincer.

Boom!

Crack!

Inevitably, the pincer broke Han Fei's fist mark, but half of the pincer was broken.

Seeing this scene, Han Fei couldn't help but sneer. That's it? I thought he was really a king... It seems that his strength is not much stronger than mine.

Of course, Han Fei knew that his strength didn't last long, and it wasn't suitable for him to fight today. Therefore, after this punch, Han Fei sat cross-legged on the spot and didn't explore the mysteries here or think of a way to leave.

Therefore, every two hours, Han Fei would hear the exact same words, asking him to leave some resources.

The next day.

In Forge the Universe, Han Fei's black-mist body held the Nine Palace Luck Ruler and calculated today's luck. When Han Fei saw the result "Greatly Ominous", his pupils were constricted slightly. It seemed that it was quite dangerous here!

However, fortunately, it still showed "Greatly Ominous" but not "Impasse".

Otherwise, even if Han Fei was fully prepared, he might not dare to fight the other party.

At this moment, Han Fei heard the words again, "Humans must leave precious resources behind. Otherwise, you will never escape the Sea of Greed."

Han Fei suddenly stood up and cursed with a smile, "I can't escape from the Sea of Greed? Fine, I won't escape. I'll see what you're up to today. How dare you play tricks in front of me..."

Han Fei activated the Near at Hand Technique.

However, Han Fei failed to cross the distance of a thousand kilometers this time. The space was twisted, and Han Fei only took two or three more steps than just now.

Han Fei sneered and used the Vast Ocean Navigator.

With a thought from Han Fei, Han Fei broke into the void again and found a way through the chaotic space turbulences.

"Knock on the Heavenly Gate."

Han Fei grabbed the Embroidery Needle and punched a hole in the barrier 200 kilometers away from the island.

Seeing that the hole was about to be repaired, Han Fei activated Star Teleportation and appeared inside the seal.

As soon as Han Fei appeared, he shouted, "Who's playing tricks? Let's talk... If you want me to leave something behind, you have to have the ability to take it."

Buzz!

Han Fei raised his wrist and found that the Demon Purification Pot was burning and hurting his nerves.

Han Fei's eyes were burning. Was the fourth small vine finally going to appear?

Han Fei scanned the island with his perception, only to find that the island was only about 500 kilometers wide. On the island, there was an ancient hexagonal tower. It was seven stories tall and was surrounded by chains.

Ignoring everything else, Han Fei first sneaked above the island.

When he saw the ancient tower, Han Fei thought of the Demon Subduing Tower. However, although this ancient tower was somewhat similar to the Demon Subduing Tower, it was not the Demon Subduing Tower, because there was an empty floor at the top of the tower with an orange square stone hanging on it.

Han Fei was puzzled. "Where is it? It's probably a crab. Why don't I see it?"

Han Fei was very puzzled. His perception had swept through this place several times, but he didn't see anything special here. Han Fei was about to go to the tower to take a look, when the old turtle suddenly said, "Han Fei, can't you see what's wrong with this island?"

Han Fei asked in confusion, "What's wrong with this island? It's just a little black... Well, the shape is a little strange. The part of it that is above the sea is wider than the part under the water..."

Suddenly, Han Fei couldn't help but gasp.

The old turtle reminded him of a common creature he had seen before, the Stone Spirit Crab.

The Stone Spirit Crab was black and looked like a rock.

As for this island... if one looked at it from a third-person perspective, it seemed to be... a crab that curled up!

## **Chapter 1705 King Ba**

Han Fei's eyelids twitched. Standing outside the island, he stared at the huge island and looked around.

At this moment, there were still fish swimming around the island in the sea.

To these creatures, they might not even know that they were living under the body of a super behemoth.

Han Fei had never seen such a big crab in his life.

Apart from the Cloud Sea Divine Tree and the Blood Sea Divine Wood, this big crab was the largest creature Han Fei had ever seen.

Han Fei approached calmly, pretending to be watching the ancient tower on the island, and the crab island didn't do anything.

However, when Han Fei landed on the island, information popped up in his mind.

<Name> King Ba Crab (Dying) <Introduction> King Ba Crab is a species of giant beast left behind in ancient times. The King Ba Crab has been seeking a breakthrough in their bloodline, hoping to improve their bloodline and pass it down as Emperor Ba. King Ba Crab has a gentle personality and is generally friendly to any living creature. King Ba Crab is extremely strong, but his body is heavy. This is a drawback on their path of evolution and also the reason why they try to improve their bloodline. The Ultimate King Ba often can't bear the burden of their bodies.

<Level> 90

<Quality > Ancient Mutant

<Realm> Sea Establishment

<Great Dao> Space

<Chaotic Qi> 1,024 <Battle Techniques> Space Shears, Space Turbulence, Space Barrier, Space Overlapping, Space Folding

<Food> Algae, shellfish

<Collectible > Insect limbs, insect cores, insect eyes, insect carapace, insect origin

<Absorbable>

<Note> King Ba is on the verge of death.

When Han Fei saw the information of the King Ba Crab, he couldn't have felt worse. So this was a dying king! And it was a gentle creature.

However, what amused Han Fei was that since it was a gentle creature that was friendly to all creatures, why did he attack humans and ask them to sacrifice resources?

Han Fei tried to probe the orange stone on the tower with his perception, but the tower was sealed, so Han Fei still couldn't see it.

Han Fei paused for a moment. Seeing that King Ba didn't attack him, he jumped back and appeared at the bottom of the sea.

At this moment, Han Fei thought for a moment, grabbed the Embroidery Needle, and pointed at King Ba. "Stop hiding. You're the island, and the island is you. You're just a big crab. It's easy to invite me here, but not so easy to trap me. If you don't give me a proper explanation today, I won't leave."

Buzz!

At that moment, the void turbulence erupted.

The void around Han Fei began to collapse.

With determination in his eyes, Han Fei immediately shouted, "All laws forbidden in this space."

After the space was stabilized, Han Fei used the Knock on the Heavenly Gate and rushed out. The reason why Han Fei dared to fight today was that this was a dying king. The king was on the verge of death. Han Fei felt that he might have the strength to fight. Even if he didn't, he would still consume him as much as he could... As long as he could get the little vine, he wouldn't hesitate even if all the Chaotic Qi on him was exhausted.

Besides, King Ba also had a thousand wisps of Chaotic Qi on him. If his Chaotic Qi was exhausted, he could still absorb King Ba's Chaotic Qi!

Clang!

Han Fei attacked with "Knock on the Heavenly Gate", and in the next moment, he saw a huge turtle that was more than 200 kilometers long block his attack.

Han Fei was fascinated. How could such a huge monster be so fast?

When Han Fei felt the huge power of the Great Dao of Space attached to the crab's pincers, he immediately understood. So, the King Ba Crab knew that he couldn't move so fast... Therefore, he applied the Great Dao of Space on himself and moved his pincers over. Because he was a king, and the Great Dao of Space was like his instinct, he was not affected by Han Fei's technique forbidding.

Buzz!

Han Fei summoned the Infinity Water.

In an instant, waves surged thousands of kilometers away, and the Blade Inferno was quickly formed.

Although the Infinity Water was not a Sea Quelling Bizarre Treasure yet, to be honest, it was almost the same. It condensed into the Blade Inferno and attacked in all directions indiscriminately.

Its power could not be underestimated.

Of course, against creatures like crabs, the bombardment effect might not be ideal, but it was definitely useful. The king was strong, but not strong enough to ignore such a huge number of attacks. After all, Han Fei had dealt with the White Armor Emperor. Perhaps Han Fei's indiscriminate attack really angered the King Ba Crab...

The void trembled and the seabed shook. Within 500 kilometers of King Ba's body, a spatial storm instantly blew.

"F\*ck..."

A spatial storm was no joke.

This level of power was even stronger than the void storms outside the Divine Son Tree in the current Water-Wood World.

Outside the divine son's body was a void storm formed by the interweaving of spatial cracks, while this spatial storm was really stirring space.

With this disturbance, who knew where he would be swept to?

It could be said that this was a powerful force that even a king did not dare to easily touch. The terrifying aspect of the Great Dao of Space was not inferior to the Great Dao of Time at all.

Han Fei immediately grabbed the Vast Ocean Navigator...

The moment the void storm blew up, Han Fei charged at the King Ba Crab. As long as he caught the King Ba Crab, he wouldn't be swept into the spatial storm.

After all, he could not send himself into the endless void.

However, when the spatial storm was created, it caused the superposition of space, which caused Han Fei's route to change every moment.

At this moment, unless time was still, even with the Vast Ocean Navigator, Han Fei couldn't cross this space storm.

At this moment, Han Fei finally understood why the divination result was "Greatly Ominous". It turned out that... the great ominous part was here. The King Ba Crab made him realize the horror of the Great Dao of Space.

Before, Han Fei thought that the Great Dao of Space was just a way to use space, such as the Near at Hand Technique. However, seeing this spatial storm, Han Fei was almost certain that few people in the entire Raging Sea dared to attack the King Ba Crab. Without a magical skill like Time Stop, it was impossible for them to take down the King Ba Crab.

However, other people didn't have magical skills, but Han Fei did!

The Supreme Yin-Yang Wheel could ignore space and directly appear beside the enemy to suppress and kill them.

At this moment, Han Fei decisively gave up the guidance of the Vast Ocean Navigator and shouted, "Supreme Yin-Yang Wheel!" At this moment, the King Ba Crab's eyes perked up because the Yin-Yang Diagram had inexplicably appeared above his head. At this moment, the King Ba Crab finally said something

"Are you the Yin-Yang Palace Master?"

"Chila..."

Ka ka ka ~

The Supreme Yin-Yang Wheel began to wring at the huge shell of the King Ba Crab.

With Han Fei's current combat power, even the shell of the King Ba Crab as tough as a Sea Quelling Bizarre Treasures, it might not be able to block it.

At this time, Han Fei shouted crazily in his heart, "Master Calabash, come on, suck,

suck...”

In terms of absorbing power, the Demon Purification Pot had never hesitated.

At this moment, the King Ba Crab felt that the Chaotic Qi was disappearing from his body...

Han Fei, on the other hand, was very excited.

This was a king!

Even a dying king was still a king. Was it a joke to have more than a thousand wisps of Chaotic Qi?

One breath.

Two breaths.

Three breaths.

After six seconds, Han Fei had broken a large part of the shell of the King Ba Crab and the Demon Purification Pot had absorbed dozens of wisps of Chaotic Qi from his body.

Buzz!

Just as Han Fei was about to sneak into King Ba’s body, his strength ran out and the Supreme Yin-Yang Diagram collapsed.

However, Han Fei didn’t panic at all. He was going to reverse time and consume the King Ba Crab to death.

However, the shell of the King Ba Crab was quickly recovering, and his voice came into Han Fei’s mind. “Human, stop the battle, stop the battle... I admit defeat.”

Han Fei: “???”

It would be a lie to say that he wasn’t shocked. This was a king! How could he admit defeat to him? It was the biggest joke in the world.

For an Emperor like Old Yuan, he only had a wisp of soul left, so he had no choice but to acknowledge him as his master.

But this King Ba Crab, a king, admitted defeat just like that? How could such a coward become a king?

However, Han Fei did stop.

Although he stopped, Han Fei still put a hand on the King Ba Crab, fearing that he would run away with the power of the Great Dao of Space...

The old turtle said, “Don’t worry. He can’t run. Someone planted a seal on him, which is the tower on his body. The power of this tower prevents him from directly and quickly teleporting away. Besides, he’s too big to move away in a short time. Otherwise, he would have run away long ago.”

Han Fei: “...”

Hearing it, Han Fei didn't know whether to laugh or cry. After Old Yuan explained, Han Fei stood on the body of the King Ba Crab and said proudly, "I know you're a king, but so what? You're weak now..."

The King Ba Crab's body was heaving as if he had asthma. He said, "That's because I'm about to die. Otherwise... I would have run away."

"Uh!

Han Fei was speechless. Why was this King Ba Crab not ashamed at all when he mentioned 'run away'?

However, Han Fei was still surprised that this guy told him that he was about to die.

After all, what he saw was completely different from what the other party told him. Han Fei didn't know whether to praise him for being innocent or stupid.

Han Fei snorted. "All the creatures in the world will eventually die. What does it have to do with me whether you are going to die or not?"

But what the King Ba Crab said next stunned Han Fei.

He said, "I used to fight side by side with Jiang Linxian... Do you know Jiang Linxian?"

### **Chapter 1706 Old Ba's Story**

"Who?"

Han Fei froze. This King Ba Crab knew his mother?

Han Fei asked, "When did you fight side by side?"

The King Ba Crab said, "That was a long time ago... Back then, I watched the Yin-Yang World, the Water-Wood World, the Golden Crow World, and the Nine Palace World open up the Desolate Abyss together. I even helped them open the space of the Desolate Abyss." "You opened the Wild Abyss?"

Han Fei raised his eyebrows. "Continue... You have to at least explain the matter clearly so that I can know if you're lying to me."

The King Ba Crab's body slowly sank.

Finally, with a boom, it hit the bottom of the sea, causing the seabed to shake.

"Phew! I'm too tired. Fighting is too tiring."

The King Ba Crab let out a long sigh, like an old man with a hunchback. He had just gotten up to move around when he couldn't hold on anymore.

The King Ba Crab said slowly, "At that time, it was tens of thousands of years ago. And I think it was probably 70,000 to 80,000 years ago. All of this started from a magical secret realm. There is a mysterious secret realm in the easternmost part of the Raging Sea. Some people want to use this secret realm to reach the Sea Establishment Realm, some want to use it to reach the Sky Opening realm, some want to explore mysteries with it, and some... want to bypass that secret realm and leave the Raging Sea."

Old Ba seemed to be lost in his memories. He said leisurely, "At that time, it was already the second time we went to that secret realm. The second time we went, only the kings went. Not only were there human kings, but there were also the kings of the Merman Race, the Hundred Demons Race, the Giant Beasts Race, the Undersea Human Race... Almost all the kings in the Raging Sea went there." Han Fei's heart did a flip. This secret realm must be the one that Old Han mentioned, the one that created 108 human kings at one time.

In that case, the King Ba Crab didn't seem to be lying. He continued. "At that time, as the Yin-Yang Palace Master, Jiang Linxian's ability to find treasures could be said to be peerless. In that secret realm, she discovered a huge door that connected to somewhere... However, although she discovered it, no one could open that door. Later, the Master of the Nine Palace World called for everyone to help him with luck. In the end, he lived up to everyone's help and used the Nine Palace World's Divination Art to create an unparalleled power array that opened the door a little."

"Hiss!"

Han Fei felt like he was listening to a story. Was this a legend of his parents' generation? At that time, they were already kings...

Old Han actually had such an ability? Gathering the luck of the human kings... What an awesome ability.

So they already had an affair back then? The King Ba Crab continued, "At that time, the crack in the door opened, and divine light shone. Everyone saw that there seemed to be an immortal garden inside the door. We saw a spiritual plant with long swords, ancient sabers, fire seeds, ice beads, and many other things on it... Originally, if everyone could work together to obtain treasures, it might be fine. However, everyone fought over it... In the end, the Nine Palace Master and Jiang Linxian actually dug up the tree." "Pfft!"

Han Fei almost vomited blood. He was really shocked by the last sentence.

However, after Han Fei came back to his senses, he couldn't help but exclaim, "Wonderful! If I were them, my first thought would probably be to dig trees too."

The King Ba Crab nodded. "That's right! I had the same idea at that time. The Golden Crow Palace Master and the Water-Wood Palace Master also had the same idea. We made a move at the first moment... Benefits move people's hearts. Then, the result was obvious... The Nine Palaces, Yin-Yang, Golden Crow, Water-Wood, and some other Heavenly Palaces fought and killed each other..."

Han Fei nodded.

That tree was probably extraordinary. All the kings must have targeted it. Suddenly, Han Fei thought, Is that tree the Demon Purification Pot?

Han Fei couldn't help but ask, "What does that tree look like?"

The King Ba Crab paused for a moment. "Uh, it's quite big. It's emerald green and has long leaves that are hundreds of meters tall... There are hundreds of things hanging on it."

Han Fei was surprised. "They were all taken away by the Yin-Yang World and the Nine Palace World?"

The King Ba Crab said, "A part of it! Well, because I control the Great Dao of Space, I also took a part of it back. This is why I was jointly attacked by the Supreme Clearness, Infinity and some other Heavenly Palaces."

The King Ba Crab said leisurely, "Back then, the Yin-Yang World and the Water-Wood World were too weak to resist, so they chose to escape into the Wild Abyss. I wanted to go there too, but I was stopped by the Dream Master who arrived later and couldn't leave!" "Dream Master?"

The King Ba Crab said, "It's the master of the Dream Weaving World, known as the Dream Master."

Han Fei thought, Something's wrong!

Han Fei's first reaction was that shouldn't the Great Dream Heavenly Book Old Han cultivated be cultivated by the master of the Dream Weaving World!

Han Fei couldn't help but ask, "So, you formed an alliance with Jiang Linxian and the others? But you are an ocean beast. Will the human race accept you?" King Ba said, "I'm just a giant beast, not a sea demon. Our giant beast lineage is different from the sea demons. We are determined to become the overlords of the sea. Besides, at that time, the relationship between the races was chaotic. The hundred demon race and the merman race didn't get along well. The undersea humans also had connections with humans, and the Divine Sect had once allied with the human race. Similarly, some human rebels joined the sea demons."

Han Fei was speechless.

Han Fei felt that his head was about to explode! There were only a few big forces in total. Why was their relationship so complicated?

King Ba said, "Therefore, you have to believe that I helped your Yin-Yang World. Without my Great Dao of Space, no one can open the double space of the Wild Abyss."

"Wait a minute ~"

Han Fei hurriedly asked, "What did you say? Double space?"

The King Ba Crab said, "Did I say that?"

"You did."

The King Ba Crab was stunned for a moment. "Oh... I mean that in the Wild Abyss, there is actually not one space, but triple spaces."

"Pfft!"

Han Fei said gloomily, "Is it a double space or a triple space? Big crab, don't try to fool me... If you want to live, tell me the truth."

King Ba said, "It can be said to be a double space or a triple space. The first space in the Wild Abyss is the most ordinary Desolate Ancient Land. The spiritual energy there is thin. As long as you can cross the entrance of the Wild Abyss, you can usually reach there."

“Another space is the space where the Yin-Yang World and the Water-Wood World are. Although it’s a desolate ancient land, people can still survive there... because from the Raging Sea, there will be power swept into the second space. Of course, most of the power is swept into the third space.”

Han Fei’s heart did a flip. The power of the Yin-Yang World and the Water-Wood World was only a small part?

King Ba said, “I don’t know where the third space is... At that time, we all agreed that that space was very dangerous. Even kings would be unable to survive if they went there. It’s very difficult to find how dangerous it is if you don’t open a space channel from the outside world. More than one person has gone to the Wild Abyss from the Raging Sea. Either they went to the wrong place and came back, or they went to the wrong place and didn’t come back... Well, I don’t think many can come back.”

Han Fei was shocked. When he came out, there was a path leading to an impasse. At that time, he almost took that path. Fortunately, he used the Nine Palace Luck Ruler at that time. Otherwise, he would have gone to the third space. A mere wild abyss actually contained three layers of space? This thing was too terrifying.

Han Fei had another question in his mind. He asked in confusion, “Have you never thought of killing them and keeping the treasures for yourself?”

King Ba said, “Why? They took two worlds with them. Those were billions of lives. How could I just kill them? Besides, I have a good relationship with the Nine Palace Master! We are good friends. He saved me.”

Han Fei: “...”

It turned out that this crab had a friendship with Old Han.

Of course, Han Fei still pretended to be surprised. “Why are you friends with humans?”

King Ba said, “Little Shushu... will give me toys. Sometimes, it’s a big boat. Sometimes, it’s a big bottle. Sometimes, it’s a big fish. Sometimes, it’s a demonic plant. We’ve been friends since we were very young. At that time, I hadn’t become a king yet.”

“Little Shushu?”

Han Fei had a weird look on his face. He wondered what Old Han’s reaction would be if he mentioned this nickname to him.

Han Fei couldn’t have felt worse. Did he have to call the King Ba Crab “Uncle Ba”?

However, Han Fei certainly couldn’t say that now.

Who cared about his relationship with Old Han and his mother in the past? It had already been seventy to eighty thousand years... Who knew who had become what? Therefore, Han Fei simply said casually, “Are you telling me this so that I won’t kill you?”

The King Ba Crab was silent for a moment and suddenly said, “Do you want my treasures?”

Han Fei narrowed his eyes. “So what if I want them? So what if I don’t?”

The King Ba Crab said, "All these years, I've been under too much pressure. The Infinity World has suppressed me with the Infinite Magnetic Seal, and I'm about to die. If you want my things, help me be reborn and sign an equal contract with my reincarnation body."

Han Fei narrowed his eyes. It didn't matter. The contract could be canceled. In the future, when the reincarnation of King Ba reached a high realm, the contract could be canceled.

Han Fei asked, "Why me?"

The King Ba Crab sighed. "Did you just use the Vast Ocean Navigator?"

Han Fei was stunned. The Vast Ocean Navigator hadn't been made yet when my parents were with this big crab, had it?

The King Ba Crab said, "That's the Human Sacred Weapon that Little Shushu planned to forge when he was a Venerable. I didn't expect it to finally be made after so many years... Can I take a look?"

For some reason, Han Fei felt a bit sad. "Okay!"

### **Chapter 1707 Old Ba's Treasures**

Han Fei didn't really believe the King Ba Crab's story, but he believed the information that the Demon Purification Pot read.

Han Fei extended his hand, and the Vast Ocean Navigator appeared in his hand. There were five wheels spinning inside and outside, which looked very technological and extraordinary.

Old Ba couldn't help but sigh when he looked at the Vast Ocean Navigator with his huge eyes. "It seems that you're the one who carries the providence of the Yin-Yang World! Since the Vast Ocean Navigator has appeared, you've waited for a day... Could it be that the Luck Ruler is also with you?"

Han Fei didn't deny or admit. This big crab also knew about the Nine Palace Luck Ruler?

Han Fei shrugged. "Yes."

Han Fei extended his hand and the Nine Palace Luck Ruler appeared.

Seeing this thing, Old Ba seemed to have complicated feelings. After staring at these two things for a long time, Old Ba asked, "Is Little Shushu still alive?"

Han Fei nodded. "Yes."

Old Ba couldn't help but ask, "What's your relationship with him?"

"He is my father."

Old Ba couldn't help but look at Han Fei for a long time. "Really... but you two don't look alike!"

Han Fei was lost for words. What do you mean? You mean I'm not as handsome as Old Han?

Han Fei asked, "What about you? Why are you here? Aren't you afraid of being discovered since you are so close to the Wild Abyss?"

Old Ba said leisurely, "So what if they discover me? I walk the Great Dao of Space. If someone really comes by force, I will collapse the void. At that time, no one can take anything from me. The result will be the same even if all the kings of the 36 Heavenly Palaces come."

Han Fei had to admit that if the King Ba Crab really died, he would be in a dangerous situation. If a king died and caused the void to collapse, he might be sucked into the void vortex and fall into the endless void.

Thinking about it carefully, he was a little afraid.

At this time, Han Fei raised his question. "You just said that the four Heavenly Palaces joined forces... The Yin-Yang World and the Water-Wood World escaped, but why didn't the Nine Palace World and the Golden Crow World escape? Besides, after so many years, these two Heavenly Palaces are still in the inner sea." Old Ba said, "The Golden Crow World has rebelled! The current Golden Crow Heaven is in cahoots with the Supreme-Clearness Palace and the others. The Nine Palace Heaven has been sealed itself. The Nine Palace Heaven was jointly attacked, and most of its floating islands have been destroyed. On the remaining main islands, the Nine Palace Seventy-Two Ultimate Arrays have been set up. Whoever goes there will die... Besides, the people of the Nine Palace World are good at divination and are hiding in the Thirty-Six Mystic Worlds. Who dares to attack the Nine Palace World? They will take revenge with any means."

Han Fei's eyes narrowed slightly. Has the Golden Crow World rebelled? It must have been subdued by someone else after the Golden Crow Palace Master left.

As for the Nine Palace World, it seemed to be very powerful! Through divination, it actually sealed itself off? However, under such circumstances, there must be very few people in the Nine Palace World.

Han Fei asked again, "Old Ba! Do you know which Heavenly Palaces attacked the Yin-Yang World?"

The King Ba Crab said leisurely, "That's a lot. Because of Supreme Clearness and Infinity, even if the other Heavenly Palaces don't want to be enemies with Nine Palace and Yin Yang, they have to consider their own strength. Therefore, many Heavenly Palaces participated in the battle. But in terms of real enemies, seven Heavenly Palaces played a leading role." "Oh? So many?"

Han Fei was a little surprised. He had thought that only Supreme Clearness and Infinity forced other heavenly palaces to attack the Yin-Yang World, but it seemed that there were more enemies than he had imagined!

The King Ba Crab said, "The main enemies are Supreme Clearness, Infinity, Dream Weaving, Five Elements, Mad Corpse, Soul Sealing, and Medicine King. As for the other Heavenly Palaces, Chaos is neither good nor bad. Dragon Subduing is in internal strife and is busy enough with their own affairs. Glazed Glass, Immeasurability, Sword God, and Supreme Mystic are allies and are not under the control of Supreme Clearness. As for the thirteen worlds in the outer domain, except for Five Elements and Mad Corpse who are enemies, the rest are all neutral. Generally speaking, whoever is stronger has a greater say..."

Han Fei listened.

Therefore, in the thirteen worlds in the outer domain, except for Mad Corpse and Five Elements, the rest were basically fence sitters. In the inner sea, almost half of the forces supported Supreme Clearness and Infinity.

Glazed Glass and the others were independent, and their strength could not be underestimated. Supreme Clearness probably wouldn't forcefully suppress them.

After getting to know about the general situation, Han Fei knew better about the Heavenly Palaces.

He hadn't become a king yet, so it was hard for him to do anything. When he became a king, he certainly would do something.

Seeing that Han Fei was lost in thought, the King Ba Crab said, "Although you are very strong now, I find that you are only strong for a few seconds, which is far from enough. Supreme Clearness and Infinity are stronger than you think. Your strength is now about the same as the weakest Wind Master in the thirteen worlds in the outer domain..."

"Wind Master?"

**wn a**

The King Ba Crab said, "He's the master of the Wind Slashing World, known as the Wind Master. His strength is average, but he's very fast."

Han Fei nodded slightly. "After all, I'm only a Half-King. Before I become stronger, I won't cause too much trouble. By the way, Old Ba, you're going to die... What exactly happened? Is it caused by the Infinite Magnetic Seal of the Infinity World?"

The King Ba Crab sighed. "It's a long story... Not only because of the Infinite Magnetic Seal, but also because of a strange vine that is absorbing my vitality and power. Now, my vitality is almost exhausted... Only by being reborn can I survive."

"A strange vine?"

Han Fei's heart did a flip. A strange vine that could suck a king into such a horrible state? It must be the vine of the Demon Purification Pot! Only this thing could be so terrifying.

The King Ba Crab said, "Oh! This strange vine is in the tower on my back. The old guy from Supreme Clearness planted it in my shell. Infinity used the Infinite Magnetic Seal to suppress the tower so that I couldn't get rid of it. If I weren't a giant beast, I would have been sucked to death tens of thousands of years ago."

Han Fei immediately smiled. No wonder the King Ba Crab created the Sea of Greed. He probably had no choice.

Han Fei said, "I'm going to...take down the Infinite Magnetic Seal."

The King Ba Crab hummed. "It can't be taken down... It pierced into my Sea of Origin. Unless I die, it can't be taken down. Otherwise, I will die immediately."

Han Fei was horrified. So dangerous?

In Han Fei's heart, the old turtle said, "I wonder what the big magnetic seal he said is, but if it's that thing I know, it's an ultra-quality divine weapon material with impermanent changes."

Han Fei's heart did a flip. But this thing was going to kill the King Ba Crab.

The King Ba Crab said, "You're the son of an old friend and came at the right time. I've exhausted my resources over the years, so I don't have much good for you... But I have some collections. Let me show you around."

Han Fei: "???"

A king was showing him around his treasury? Han Fei, who was used to robbing, was not used to this style.

The surrounding void trembled.

The place that seemed to be full of shipwrecks changed, and large boats of all colors appeared. Half of these big boats were about the same quality as the one sacrificed by the people from the Ice Snow World.

"Hiss"

Han Fei couldn't help but gasp. There were a total of 1,206 big ships arranged neatly around him.

From the looks of these big ships, there were all kinds of different icons.

Han Fei thought to himself, including the 36 Mystic Heavens and the ten pirate groups, all the forces that had appeared in the Raging Sea... as long as they used boats, must have been robbed by King Ba.

However, Han Fei keenly noticed that on these big ships, although some of them looked intact, they seemed to be missing something. As for what was missing... Han Fei couldn't tell. He just felt that something was missing.

Apart from these large ships, there were also a vast number of top-grade and high-grade divine weapons around King Ba.

There were all kinds of ultra-quality weapons. Han Fei had never seen some of them before. There were at least 8,212 of them.

It had to be known that it took time to forge an ultra-quality divine weapon.

Among these weapons, there was actually a Sea Quelling Bizarre Treasure: a spear.

Han Fei couldn't help but sigh. If Zhang Xuanyu saw this, he would drool. As far as Han Fei knew, if he really took their essence and reforged them... these ultra-quality divine weapons could be forged into at least ten Sea Quelling Bizarre Treasures.

Unfortunately, the cost of recasting was too high. After all, Han Fei didn't have resources to burn.

Han Fei didn't lack Sea Quelling Bizarre Treasures now.

The King Ba Crab said excitedly, "Let me give you... my favorite collection. Come to the bottom of the sea."

Han Fei raised his eyebrows. Is it not enough?

Han Fei was not bragging. If he traded these resources in Martial Emperor City, he would instantly become one of the richest people in the Raging Sea.

When Han Fei landed on the seabed, he saw King Ba slowly prop himself up with two giant pincers.

The void twisted, and under the body of King Ba, a large black ship covered in green light appeared in Han Fei's vision, which seemed to be cobbled together.

"Hiss!"

Han Fei exclaimed, "Wow... Is this ship pieced together with the parts of the ships outside?" King Ba was surprised. "You can tell?"

Han Fei thought to himself, I noticed that something was wrong just now... So, those ships were dismantled and assembled into this thing.

### **Chapter 1708 Gravity Origin Magnet**

Han Fei looked carefully at the big ship that was assembled by King Ba. This ship was about 300 meters tall, almost negligible compared to the huge body of King Ba.

Han Fei didn't expect that King Ba had a hobby of collecting... And he liked playing lego? This was probably one of King Ba's hobbies to kill time.

When Han Fei scanned around with his perception, he was shocked to find that these materials were probably the best materials on every big ship. The keel was made of king bones. Had King Ba robbed a king?

Every piece of wood on the deck was pieced together.

Even the lowest level was at the Venerable level.

The sail was made of an entire piece of fish skin. The fish skin flickered with seven-colored light. If he guessed right, it was the skin of a merman.

"Gulp ~"

"Good lord!"

Han Fei couldn't help but take a breath. King Ba had built a super ship in the Sea Establishment Realm! Even a king couldn't penetrate such a hull.

If he set up an array on it and modified it, it would be a perfect ship. It would probably not be much different from the king ships of the top ten pirate groups.

Seeing that Han Fei was amazed by the ship, King Ba said happily, "How is it? Isn't it awesome? This is the best ship I've ever seen. It's my friend."

Han Fei nodded heavily. "This ship is indeed extraordinary."

Knock, knock, knock!

King Ba couldn't help but raise his pincers happily and smash them on the seabed many times.

For Han Fei, it should be smashing, but for King Ba, he was just dancing and tapping his fingers happily.

King Ba spat bubbles. "I knew it. Little Shushu once said that he would build the most powerful pirate ship for me... He broke his promise, but I made it myself. Now I gave it to his son..."

Han Fei was speechless.

Han Fei's expression was complicated. F\*ck, I was almost touched by a giant beast!

Han Fei smiled. "You can still be reborn, right? This ship will still be yours."

King Ba squeezed his pincers twice. "It can't hold me. Alright, let's sign an equal contract!"

Han Fei asked in surprise, "Don't you need me to sign a contract with your reincarnation?"

"No! I'll just shed my shell. Take off my Great Dao, my power, my shell, my... memory..." Han Fei was surprised. Crab molting... This rebirth method is really special!

Han Fei didn't know if he was lucky or unlucky to leave the outer sea this time. Was it a coincidence or luck? He thought he was in danger, but he met King Ba.

Signing an equality contract was very simple. Then, King Ba spat bubbles and pushed his assembled ship to Han Fei.

King Ba said, "You have to put these things away quickly... Once I die, a king will definitely sense it. Although it may take months for them to come, they can find me in the end."

Han Fei nodded slightly. "Got it."

However, at this moment, Han Fei found that all the remaining resources in Forge the Universe were consumed crazily.

After all, Han Fei hadn't come out for nothing. He had looted... 20 Venerable-level Sun-Moon Shells from the Predators! There were a lot of resources inside.

Forge the Universe only had a radius of 30 kilometers.

Now, it was time for it to expand.

However, 30 kilometers was still too small for King Ba's huge body.

It was because of King Ba's size that Han Fei thought it was time for Forge the Universe... to expand.

In fact, to take away King Ba, Han Fei could also use the Sea Quelling Painting. One had to know how meaningful a king's corpse was. It was very likely to create another king. If he used the body of King Ba to forge a divine weapon or a Sea Quelling Bizarre Treasure, how many pieces could he forge?

Therefore, Han Fei would never leave the corpse of King Ba to anyone.

Rumble! Rumble!

King Ba's molting process lasted for half a day.

His body trembled and his soul struggled, as if he was gathering his strength to forge a legacy.

Han Fei said, "Old Yuan, the moment King Ba successfully molts, seal this place with the Turtle Shell Sky Sealing Technique."

The old turtle asked in surprise, "Are you afraid that a king will come?"

Han Fei looked at the tower behind King Ba and said, "In those three days, I have to put away the Infinite Magnetic Seal! What if the king of the Infinite World is related to that thing? Then the location of King Ba will be exposed."

The old turtle said, "Okay! However, I think if Infinity is related to this seal, they might have come long ago. However, just in case."

Half a day later.

Old Ba's aura was almost gone... Han Fei saw that the big crab was still trying to straighten his body with his pincers.

Under the body of King Ba, a small white ball slowly floated out.

When the white light floated in front of Han Fei, in the end, King Ba's body couldn't hold on anymore and smashed on the seabed with a bang.

"Turtle Shell Sky Sealing Technique."

At this moment, Old Yuan used the Turtle Shell Sky Sealing Technique to block the sky, temporarily isolating this place from the outside world.

Han Fei took the glowing ball left by King Ba with both hands and looked closer, only to see that there was a little crab moving gently in the ball.

With a thought, Water Luster appeared beside him.

"Master."

"Hiss "

Water Luster looked at the scene in front of her in shock. That huge super crab really shocked her. What creature was this? How could it be so huge?

Han Fei handed "Little Ba" to Water Luster and said, "Take Little Ba into the Sea Quelling Painting and wait for him to break out of his shell."

Then, Han Fei threw out a Sun-Moon Shell, which was full of Spirit Awakening Fluid and spiritual spring. Han Fei said, "Take good care of him."

Water Luster took a breath. "Yes, Master."

Han Fei didn't talk to Water Luster for long before putting her back into Forge the Universe.

After a while, Han Fei put all the big ships and weapons into Forge the Universe.

After that, Han Fei extended the Void Lines to see if he could absorb the soul power of the remnant body of King Ba.

However, Han Fei was surprised to find that King Ba only had more than 3,000 points of ownerless souls left. The rest of his soul had probably been used for molting and rebirth. This was probably an inheriting way of the King Ba Crab. Only in this way could the King Ba Crab become stronger and stronger. Apart from the soul power that had basically been shed, there were only more than 400 wisps of Chaotic Qi left in King Ba's body. The old turtle said, "He used the Chaotic Qi to nurture his reborn body. If I'm reborn, I'll leave my Chaotic Qi to my reborn body until it reaches the body's limit. In this way, my reborn body can be terrifyingly strong the moment it was born."

Han Fei nodded slightly. He wasn't in a hurry to collect the Chaotic Qi. What he needed to collect was the vine of the Demon Purification

Pot.

However, before collecting the vine, Han Fei still needed to get the so-called Infinite Magnetic Seal out.

On the huge body of King Ba, the Infinite Magnetic Seal that was emitting an orange light was constantly dimming.

IS

or

Because of King Ba's death, this Infinite Magnetic Seal was no longer effective...

Han Fei came to the tower, outside which there was an invisible barrier.

Han Fei reached out and hit it, but his entire hand sank into it.

Han Fei staggered and almost fell. There was terrifying gravity in the invisible barrier.

The old turtle said, "This is the power of that stone. Try walking in first."

Han Fei finally knew how much gravity King Ba was under. The Infinite Magnetic Seal was specially used to suppress him.

What he felt might just be the power that came with the stone.

When Han Fei stood in the gravity domain, his body sank, and his knees bent slightly. It felt as if he was walking down the stairs on the jade stone bridge...

Fortunately, he could still withstand this force. The force on him might be equivalent to 10,000 times gravity.

The old turtle said, "I guessed right. This should be the Gravity Origin Magnet, which is a rare thing. However, it's obviously an Origin Magnet that hasn't been purified although its level is extremely high. I'm afraid you can only use it to smash people now." Han Fei was puzzled. "Isn't this supposed to be divine weapon material?"

The old turtle said, "The material is indeed a divine artifact, but you can't forge it now! A material of this level can't be calcined by spiritual fire at all. Even the Sun Essence Fire may take thousands of years to calcine it. Do you have the time to calcine this thing?"

Han Fei bared his teeth. "No, let's talk about... what fire can burn it"

The old turtle said, "Only the spiritual fire of heaven and earth. This kind of spiritual fire is about the same level as the Blue Sea Ice Sand. A flame of that level may be able to forge this thing. Of course, this also requires forging skills. In short, this is a material for forging divine weapons, but it's not something you can use now."

Han Fei shrugged. "It's a pity. I'll keep it for now."

Han Fei felt that the gravity was slowly decreasing. King Ba died, so the power of the Gravity Origin Magnet was weakening.

When Han Fei walked under the tower, he felt that the gravity increased again. After all, he was too close.

Buzz!

Han Fei was about to take a step to the top of the tower, but after this step, he only reached the seven floor of the tower. The gravity of this damn thing could even suppress space... "Heh -"

Han Fei climbed to the top of the tower and found a huge thick stele-like stone that was less than three meters tall. Han Fei spread his arms, grabbed the Gravity Origin Magnet, and prepared to carry it.

Bang!

Han Fei's strength burst out. As soon as he carried the Gravity Origin Magnet, the tower collapsed.

Han Fei and the Gravity Origin Magnet fell on the shell of King Ba at the same time. Han Fei immediately flashed and dodged the Gravity Origin Magnet.

Dong!

Rolling ripples smashed in all directions.

Han Fei was lost for words. "I'm afraid only a king can move this thing!"

### **Chapter 1709 The Fourth Vine**

Han Fei finally knew why the king of Infinity threw this Gravity Origin Magnet to suppress old Ba. Indeed, it was because this thing was too heavy for ordinary kings to use.

tas

SC

Moreover, the King of Infinity had also done something with the Gravity Origin Magnet, making the gravity of the stone cover the entire crab shell.

At this moment, the stone was lifted by him, so the ancient tower collapsed.

But now, Han Fei had no time to care about this thing, because in the ruins, a small vine was trembling slightly, and the Demon Purification Pot drilled out of Han Fei's forehead.

"Hiss!"

Han Fei held his breath.

The old turtle was stunned. This was the first time he saw the Demon Purification Pot leave Han Fei's body.

The Demon Purification Pot was already very terrifying, but who would have thought that the Demon Purification Pot still had vines?

Once this vine was attached to it, who knew what the Demon Purification Pot would become?

Han Fei had seen such a scene several times. The Demon Purification Pot was spinning and trembling, and the little vine seemed to be frozen in the void, preparing to be coupled to the Demon Purification Pot.

After only a few seconds, Han Fei's Demon Purification Pot was stabilized, and the vine flew over and hung on the Demon Purification Pot.

Han Fei was about to happily check...if any change happened to the Demon Purification Pot

However, to Han Fei's shock, four small vines gathered and a main vine appeared. On the main vine, a sprout slowly extended.

Han Fei saw that the bud was growing at a visible speed. A moment later, it turned into a light yellow flower.

"Hiss!"

Han Fei's eyelids twitched crazily. Can the Demon Purification Pot bloom?

But this matter was not over yet!

The flower of the Demon Purification Pot slowly bloomed. After it bloomed, a fruit appeared.

Gulp! Han Fei's eyes widened. A fruit? That's awesome! How can the fruit of the Demon Purification Pot be ordinary?

But after it was growing for about thirty seconds, Han Fei found that the nail-sized thing didn't seem to be a fruit, but a jade slip.

Yes, Han Fei didn't see it wrong. It was a jade slip that was growing. Han Fei couldn't help but ask, "Old Yuan! Is this a spiritual treasure of heaven and earth?"

The old turtle was so shocked that he couldn't speak. It was normal for demon plants to grow fruits, but a jade slip? Who had seen this?

The old turtle was dumbfounded. "Well, I really don't know."

Han Fei just asked Old Yuan symbolically.

This kind of thing probably had a very small probability even in the entire sea.

However, this was definitely related to the secret realm that King Ba mentioned.

After all, his mother and the others dug out a demonic plant full of all kinds of strange treasures from that secret realm. Han Fei even suspected that it was the Demon Purification Pot...

Also, Han Fei felt that he must go to Supreme Clearness when he had the chance in the future...

After about 300 breaths, the jade slip gradually grew and took shape.

Crack!

Han Fei was shocked. He thought the jade slip was broken, but when he looked at it, he found that the root of the jade slip was withering, and the jade slip fell.

Han Fei immediately reached out and grabbed

it.

On the Demon Purification Pot, on the place where it bloomed, a small piece of leaf dried up and fell off naturally. At this point, no other strange phenomena appeared.

The Demon Purification Pot finally welcomed its fourth vine.

Then, the Demon Purification Pot drilled back into Han Fei's glabella and disappeared.

Han Fei had no time to see what had happened to the Demon Purification Pot exactly.

His gaze fell directly on the jade slip. When his soul power penetrated into it, information appeared.

Bloodline Devouring (Divine Technique)

Introduction: A special bloodline enhancement method born from heaven and earth. It can increase one's life level by devouring the bloodline of different races. The ability to devour bloodlines has nothing to do with one's strength and realm. It's only related to one's bloodline. If you encounter a special bloodline, you can devour as much as you want without worrying about any side effects.

Deduced Art: Unable to be deduced

Note: After devouring the bloodline of other races, a Life Embryo will be condensed in the dantian. After the Life Embryo matures, the bloodline will be replaced, creating a stronger life level.

"A divine technique?" After seeing its information, Han Fei froze on the spot. Before, the old turtle had told him that the life level of his human race wasn't high and could only be ranked in the middle among the tens of thousands of races in the Infinite Ocean. At that time, he had reminded him that he had to find a way to improve his life level in the 36 Mystic Heavens...

Now, the technique had grown out on its own! Moreover, the effect was awesome. At this moment, the old turtle asked, "What jade slip is this?"

Han Fei didn't speak. After a pause, he looked at the Demon Purification Pot.

Han Fei discovered that there were no new functions in the Demon Purification Pot... However, this Bloodline Devouring was called a divine technique, and its functions were simply heaven-defying.

Han Fei immediately responded, "Old Yuan, have you ever seen a Divine Technique?"

Old Yuan asked, "Are you talking about a real divine technique or a self-proclaimed divine technique?"

Without waiting for Han Fei to speak, Old Yuan said, "To be honest, if it's the latter, my Turtle Shell Sky Sealing Technique and your Twin Divine Technique can both be called divine techniques. But in the legends, true divine techniques are super powerful and unique. In the Age of Gods, only gods could master divine techniques."

"Um!"

Han Fei simply replied casually.

Han Fei felt that this one was probably a peerless technique that only gods could have! He wished he could start practicing this technique now.

However, Old Yuan's Turtle Shell Sky Sealing Technique had a time limit.

Old Ba's corpse was still here. He had to clear the mess here and leave first.

As for bloodline devouring? He would slowly practice it after he left this sea area.

Anyway, what he had now was only the blood essence of the Azure Dragon... And he could get some of Old Ba's blood essence. As for the other creatures? Han Fei still hadn't eaten the Dao Querying Fish... It could even be said that this entire ocean was the source of power for him to improve his life level.

Therefore, although Han Fei was very anxious, his rationality told him that he had to improve his life level first.

The old turtle asked tentatively, "What? Don't tell me you've got a Divine Technique!"

Han Fei said casually, "You'll know when I cultivate."

With that, Han Fei rushed to the Gravity Origin Magnet, touched it, and put it into Forge the Universe.

At this moment, Forge the Universe was still expanding

Han Fei planned to expand Forge the Universe larger this time.

After all, the place he was in was different. Forge the Universe, which was originally only 30 square kilometers, was too small.

Putting away the Gravity Origin Magnet, Han Fei asked the Demon Purification Pot to absorb the remaining Chaotic Qi in Old Ba's body.

Three days later.

In Forge the Universe.

Han Fei was slowly recovering from the modified hull.

The old turtle said, "Are you done? The Heaven Sealing Technique is about to be unsealed."

In front of Han Fei was a pure black ship. This ship was the strongest main ship that Old Ba had left for him.

This main ship was pieced together from the essence of thousands of ships... Although the parts were extremely gorgeous, the overall connection was still not good enough.

Moreover, the colors did not match the low-profile style of the Avenger. If he drove this colorful Avenger out, the Avenger would immediately become the world's enemy.

This was because the 36 Mystic Worlds and the top ten pirate teams could basically find the parts of their ships on the Avenger... who else would they hit if not you?

In order to carry out this modification, Han Fei had spent more than a month in Forge the Universe, and the ship was barely completed. After all, it took a lot of resources to modify this ship.

Although Old Ba's ship was already very good, the levels of the materials were uneven...

Han Fei happened to know how to refine weapons and had a lot of materials and resources that he couldn't use in Forge the Universe... If they were all used on the same ship, how powerful would the Avenger be?

However, such modification consumed a lot of energy in addition to materials and resources. When Forge the Universe was expanded to about a hundred kilometers wide, and Han Fei finished his crazy modification of the super ship, his spiritual stones, spiritual energy, and other resources were almost exhausted.

As for the hull, only two-thirds of it had been modified. The ship array had not been modified yet, and the energy cannon was also under research.

It seemed that Han Fei was a step closer to being a mature pirate. Now he needed a perfect pirate ship...

The old turtle roared, and Han Fei immediately left the Forge the Universe. "Okay, there's nothing left here. Open it! It's time for us to leave."

Han Fei issued an order in his heart, and the Vast Ocean Navigator appeared in his hand. The moment the Turtle Shell Sky Sealing Technique was unsealed, there was a rumble in the sky. A Great Dao crack appeared, and a rain of blood poured down.

At that moment, countless people looked up at the sky near the Wild Abyss.

Someone exclaimed, "What's going on? Did a king die?"

Someone was shocked. "Which king died?"

Someone sighed. "Did a king battle happen nearby?"

In the distant inner domain, in a magnificent palace, a cold-looking man suddenly opened his eyes. "The Infinite Origin Magnet has disappeared? King Ba has died?"

Buzz!

As soon as he finished speaking, his figure disappeared into the void.

The moment the weather phenomena broke out, the Vast Ocean Navigator in Han Fei's hand began to spin, pointing to the nearest ship in the thirteen worlds in the outer domain.

Whether to go to the thirteen worlds in the outer domain? Not important.

Han Fei just needed to find a place to settle down first. Now that he had the Divine Technique, he had to find a safe place and cultivate in seclusion for a while.

Of course, he could no longer pretend to be from the Nine Palace World..

The Nine Palace World had been sealed for tens of thousands of years. Previously, the person on the Snow Wind probably didn't want to fight him, so he pretended to believe him.

### **Chapter 1710 Stowaway**

After more than half a month, Han Fei finally found a big ship of the other Heavenly Palaces.

When Han Fei saw the blue flame symbol on the big ship, he was greatly relieved. Sure enough, it was more comfortable to use other people's routes.

It took them tens of thousands of years to slowly open up a route... It was a little unrealistic for him to use a few days or months to open up and subvert it.

At this moment, the big ship that Han Fei was targeting hadn't activated its ship array yet.

When ships sailed normally, they usually wouldn't activate the array. After all, the array also consumed a lot of resources.

The most basic ship array was automatically activated when it was attacked. Therefore, under normal circumstances, the ship array would not erupt.

As for Han Fei, he only needed to simulate a Dao Querying Fish with the Chaotic Qi ten thousand kilometers away from the boat. As soon as the fish appeared, a strong master flew over.

Han Fei grinned. "That's the opportunity I am waiting for."

A moment later, an advanced Venerable descended, but the Dao Querying Fish had already disappeared.

The man couldn't help muttering, "Are the Dao Querying Fish nowadays so smart? I'm still so far away from it."

What he didn't know was that the moment he appeared, a black shadow had hidden on his body...

Han Fei successfully boarded the big ship silently as if entering an uninhabited place.

There were a total of 47 people on this ship, including 11 Venerables, and most of the rest were Half-Venerables. In addition, there were a few advanced and peak-level Explorers.

This must be a scouting ship of a Heavenly Palace that came to the Desolate Abyss to investigate the situation. The mission was not particularly important. Originally, they did not expect to find anything, so not many Venerables came. However, even so, the strongest was still in the advanced Venerable realm.

On this ship, there was something that surprised Han Fei. This ship could refine weapons? There were as many as four refining cabins.

Han Fei was interested. What would the refining in the outside world be like?

In a certain refining room. When a black shadow quietly entered, he saw a junior Venerable and seven or eight Half-Venerables observing an intermediate Venerable refining

Clang! The man was holding a silver hammer. Lightning flashed on his body, and lightning covered the silver hammer. With one hammer strike, the spiritual spring in the cabin gathered and struck down like waves.

Through the power of the hammer, Han Fei could conclude that this intermediate Venerable was also a body refiner. However, the strength of this person's refining was not enough... Obviously, this person hadn't reached the peak of every realm. Of course, this didn't affect the other party from continuing to improve himself. It was just that as his strength grew, he would eventually disappear from the crowd, and there was almost no hope of him reaching the Sea Establishment Realm.

In the next moment, there was a clanging sound.

The arms of the intermediate Venerable waved like lightning. He shouted, "Lightning Hammer, transfer the accumulated power of thunder to the meridians. In one breath, hit the materials with a thousand strikes..."

Obviously, the intermediate Venerable was teaching, and Han Fei watched with interest. This person's hammering speed was so fast, and this technique was quite powerful. Although the power of the thousand strikes was not very strong, it was much weaker than the Hundred War Divine Hammer.

However, the Hundred War Divine Hammer was more of a combat technique than a refining technique. In essence, it was used for combat. As for this Lightning Hammer... it should be purely used for refining. Therefore, the two combat techniques were different.

This person's lightning hammer hammered for more than 80 seconds and hit a Venerable bone hammer tens of thousands of times, forcefully hammering the Venerable bone from the size of a boulder to the size of a fist.

"Thunder Fire!"

Lightning surged on the hands of the intermediate Venerable.

When the lightning surged into the Venerable Bone, dozens of other resources that had been prepared turned into liquid and fused into it.

In just a moment, a broadsword appeared with blue lightning flashing on it.

Han Fei's pupils were constricted slightly. This person had forged an ultra-quality Divine weapon so easily?

Fortunately, what the person next to him said made Han Fei relieved.

A junior Venerable couldn't help but clap his hands and say, "Old Zhang, you're really awesome! It only took you a month to forge an ultra-quality Divine weapon. With such means, you can open a custom-made Divine weapon shop in our Thunder Fire World in the future."

The intermediate Venerable laughed. "But I can't stay idle! Besides, I have to come out to find some refining materials from time to time."

With that, the intermediate Venerable looked at the Half-Venerables and said, "Have you seen it clearly? In the past month, I've mainly used the Lightning Hammer, the Lightning Fire Force, the Lightning Penetration, and the Lightning Vein to forge this ultra-quality divine weapon. These forging methods are not profound techniques in the Thunder Fire World. As long as you become Venerables, you can learn them all. Now, go back and comprehend them..."

"Yes! Master Zhang..."

Han Fei watched in the dark for a moment. Thunder Fire World? Old Han once explained that it was a Heavenly Palace famous for refining weapons.

According to Old Han, most of the famous Sea Quelling Bizarre Treasures in the Thirty-Six Mystic Worlds came from the Thunder Fire World.

As the saying went, refiners and alchemists had friends all over the world.

Whether it was the Thirty-Six Mystic Worlds or the top ten pirate groups, they would not directly kill those who refined weapons or pills.

After all, those who could refine weapons and pills were all talents.

Han Fei wondered if the Thunder Fire World had a way to refine the Gravity Origin Magnet.

However, then he thought about the fact that the Gravity Origin Magnet, which was originally a treasure of Infinity, was used to suppress King Ba... It must be because the king of Infinity really couldn't find a way to use it...

Perhaps he had already seen the king of the Thunder Fire World for this?

After the Half-Venerables left, the junior Venerable said, "Old Zhang, I think you can really consider it. You're extremely talented in refining weapons. Besides, you're already a peak-level intermediate Venerable. Once you break through to the advanced Venerable realm, you might have a chance to learn the Heaven-Seeking Lightning Drawing Technique. Once you master this technique, you might have a chance to try refining a Sea Quelling Bizarre Treasure."

Old Zhang's expression froze, and there was a trace of yearning in his eyes. However, he still shook his head with a bitter smile. "How can it be that simple? That's a Sea Quelling Bizarre Treasure! The Heaven-Seeking Lightning Drawing Technique isn't enough. When the time comes, the fire seeds needed will be different. At the very least, it has to be Sun Essence Fire, and there are many strange materials required... I also have to cultivate a hammer technique stronger than the Lightning Hammer."

Han Fei heard it clearly. Forging a Sea Quelling Bizarre Treasure?

This made Han Fei's heart skip a beat. Forging ultra-quality divine weapons and forging Sea Quelling Bizarre Treasures were two completely different concepts. There weren't many Sea Quelling Bizarre Treasures in the entire Thirty-Six Mystic Worlds, because it was too difficult.

In the Raging Sea, only the Thunder Fire World was famous for its refining techniques. Even the people of the Thunder Fire World found it extremely difficult, it could be seen how difficult it was.

After listening to the two of them chatting, Han Fei walked around the ship and then found an empty warehouse.

With Han Fei being a Half-King, even if he appeared, no one would be able to find him.

Han Fei said, "Old Yuan, let's follow this big ship to the Thunder Fire World first. Call me when we arrive. I'll go into seclusion first."

The old turtle asked in confusion, "You don't seem to dislike seclusion anymore."

Han Fei sneered. What a joke. If you get the Bloodline Devouring Divine Technique, you probably can't wait to practice it too.

In Forge the Universe, Han Fei sat cross-legged, closed his eyes, and studied and practiced the Bloodline Devouring Technique.

After Han Fei finished reading the whole book, he found that practicing this technique would also bring about various problems.

For example, after his bloodline devoured a new bloodline, his life level would increase, and his potential would naturally increase. Then, the limit he had to reach in the same realm would be different.

However, Han Fei was already a Half-King now. In the past, although he had reached the limit of each realm, it was only relative to the human bloodline. Although Han Fei's bloodline was much higher than that of ordinary people, the human bloodline was not particularly high among the tens of thousands of races in the Infinite Ocean.

Therefore, if Han Fei swallowed the bloodline of other races, it might lead to a decline in his realm. This was to make up for his previous deficiency of bloodline and avoid the lack of potential.

In other words, Han Fei could use this bloodline devouring method to purify his bloodline.

Moreover, there was another problem here. If the bloodline of other races he devoured was too much more advanced than his own bloodline, it might lead to a mutation in his bloodline. Would it mutate and in which direction would it mutate? This depended on the Devourer's willpower and bloodline strength.

At this moment, Han Fei had the corpse of the Azure Dragon, but he couldn't confirm the level of the dragon bloodline... Therefore, he couldn't take it rashly.

Han Fei was lost for words. How do I know what level the human bloodline is at? Besides, different people have different bloodlines.

While Han Fei was thinking about this, the gray mist space of the Demon Purification Pot suddenly appeared in his mind.

“Huh?”

Han Fei was surprised to find that at some point, a big gray word called the Manual of Ten Thousand Clans appeared in the Demon Purification Pot.

Seeing these words, Han Fei knew that the Demon Purification Pot had indeed gained a new ability.

This might be a chance for him to understand the ten thousand clans in the Infinite Ocean.

Han Fei wanted to light up this icon, but it required a hundred wisps of Chaotic Qi. Now, Han Fei had 1,583 wisps of Chaotic Qi.

Therefore, Han Fei didn't care about a hundred wisps.

However, for a moment, the old turtle was stunned. What deal did Han Fei make with the little calabash again?
