

GOF 2013

Chapter 2013 The Limit of Speed, Ultimate Blade

“Fuse!”

When Hong Yue was cut a second time, Han Fei immediately fused with Little Black and Little White.

Not only Han Fei, but everyone else also took action. They put on their battle suits, activated their Great Daos, fused with their spiritual beasts, and began to pay attention to the changes around them.

Perhaps because Ji Xuan was alone, he was targeted. Although he had also fused with his spiritual beast, the moment the tail of the three-tailed crab appeared, it was cut into pieces like a piece of paper.

Ji Xuan shouted in a low voice, “Great Scissors, separate. Heavenly Flood Dragon, rotate.”

Ji Xuan’s Heavenly Dragon Scissors split into two and quickly rotated, trying to protect Ji Xuan. But even so, they couldn’t protect his entire body!

Besides, he was facing a mysterious creature that was extremely fast, so he couldn’t resist it at all.

“Pu! Pu! Pu! Pu!”

A series of piercing sounds sounded, and the kings saw that Ji Xuan’s body was shattering. From beginning to end, he might not even see his enemy clearly.

Ji Xuan, who had always prided himself on being strong enough to enter the top ten of the Raging Sea Sea. At this moment, he was cut crazily like a target. Without Han Fei’s help, in the blink of an eye, there was only a pile of meat pieces left.

However, a soul fire appeared, and Ji Xuan tried to shake the surroundings with his soul. However, in the eyes of everyone, the soul fire was riddled with holes in the blink of an eye. Like a broad leaf showered by a storm of needles, Ji Xuan’s soul was still killed.

Hong Yue was horrified. If Han Fei had saved him a second later, wouldn’t he have died?

.....

At this moment, Ji Xuan’s voice echoed, “Han Fei, this is only the third Great Dao. If I can’t block it, can you? I just left one step earlier than you. Your Yin-Yang World is not invincible after all.”

However, as soon as Ji Xuan said so, Han Fei said, “At least, this thing can’t hurt me. Besides, I can reverse time! Do you think Xuan Qingzi and He Daoyuan can find me? Heh, byebye...”

“Ah! Han Fei “

Ji Xuan was furious! It was Han Fei who suddenly attacked him and Zhou Fu. It was Han Fei who forced him to escape into the Eternal Thunder Prison, and it was Han Fei who forced him to enter this place. He hated that he didn’t kill Han Fei when he was weak. He hated that the Patriarch paid too much attention to the four palaces of the Sword God and ignored Han Fei.

At the moment Ji Xuan died, when he heard Han Fei’s mockery, his feelings were indescribably complicated.

At this moment, Han Fei and the others had no time to pay attention to the conflict between Ji Xuan and Han Fei. Most of the layers of ice barriers set up by the Snow Lady had been shattered. Fortunately, there were still many kings on the human side. Although they were defeated in an instant, they weren't dead yet because the ice barriers and the sound barrier were still protecting them. Han Fei also cast the Heaven Enlightenment Divine Technique on them.

As for Han Fei, he naturally encountered this thing too that came in a hurry. Even though Han Fei had already fused with Little Black and Little White, he could only see a foot-long black shadow.

At first, when Han Fei didn't use the power of time to block it, the thing slowed down and revealed its original body.

Only then did Han Fei see what this thing looked like. It turned out to be a knife as thin as a cicada's wing and as thin as a chopstick.

Information popped up in his eyes.

< Name > Ultimate Blade

< Introduction > A magical blade made of pure Great Dao of Speed and the Heaven Spirit Treasure, the Barrierless Mystic Crystal. It can avoid all barriers in the void and achieve extreme speed in the main space. With its speed, the Ultimate Blade is extremely sharp. No weapon under the level of Godly weapon can resist it.

< Quality > Low-quality Godly Weapon

< Attached Soul > Light Sparrow

< Effect > Unobstructed

< Recastable >

< Unrefined >

< Remarks > It's a low-quality godly weapon. Don't make it recognize you as its master easily.

In fact, Han Fei only glanced at the information, because before he could stop, the Ultimate Blade had penetrated his body.

Yes, since he became a king, no one had been able to break through his flesh and blood. Only this blade had pierced through him. Although it took about a second, he had been pierced through by it.

se

If the Ultimate Blade could penetrate him, it meant that even he couldn't withstand it. However, with the speed of the Ultimate Blade, it was easy for it to hit him, but it was impossible for it to cut him.

When the Ultimate Blade tried to cut him for the second time, Han Fei twisted the time in front of him, covered his palm with the Infinity Water, and instantly grabbed the Ultimate Blade. "Puff."

However, in the time barrier, the Ultimate Blade was like a fish, suddenly accelerating in the distorted time, breaking through time in one fell swoop, and cutting off half of Han Fei's palm. Even the Infinity Water was cut open by this thing.

Han Fei couldn't help being shocked. Although the Infinity Water was water, it was an ultra-quality Sea Quelling Bizarre Treasure after all. It was only one step away from becoming a Godly weapon!

However, judging from the way the Ultimate Blade was dancing in the distorted time he created just now, it was obvious that it could cut through time.

Han Fei suddenly realized something. Since the Ultimate Blade had reached the limit of speed, it should have reached the speed of light. At that point, it could jump into the river of time by itself.

Besides, the Ultimate Blade was made of the Great Dao of Speed. Perhaps it could be unaffected by time. At most, the time could block it for a short while.

The second time it slipped away from Han Fei's hands, the Ultimate Blade stopped coming because it had a soul attached to it, so it could tell who was strong and who was weak. Han Fei was very strong and might even kill it.

Therefore, the Ultimate Blade ignored Han Fei and this group of people and went straight to Pang Jia from the Hundred Demon Race and Zhou Bai from the Undersea Human Race. They had the least people here, so it should be able to kill them.

Han Fei looked at the Ultimate Blade that slipped away. His hand was full of healing divine brilliance, and his broken hand was quickly reconnected.

Seeing Han Fei grab the Ultimate Blade with his bare hands, Liang Yin and the others were all speechless. How could Han Fei grab such an invisible thing?

And he had almost caught it. Now all of them saw that it was a slender blade like a chopstick.

Clank ~

However, on Pang Jia's side, unexpectedly, Pang Jia used some kind of secret technique to transform into his original body. A halo circulated on his carapace, like a spinning nebula, and the Ultimate Blade failed to cut him.

With only one ally now, Pang Jia protected Zhou Bai, so this time, the two of them were fine.

With a series of clanging sounds, the Ultimate Blade failed to cut through Pang Jia's shell after thousands of attempts, so it immediately gave up.

At this moment, Liang Yin, who had come back to her senses, suddenly shouted, "Han Fei, it's looking for someone who suits it, subdue it or resonate with it. Perhaps you can obtain the Great Dao of Speed from it."

"Huh?"

Han Fei was stunned. So that was it?

Now, the thing had already darted at the toad and the Single-Horned Flood Dragon. The toad shouted crazily, "Return to your original body. Hurry up. It will take a long time for this little thing to cut us to death. We can buy some time to recover!"

As soon as the toad said so, he quickly expanded, as did the Single-Horned Flood Dragon and the squid lady.

The Ultimate Blade seemed to know how difficult these giant beasts were to deal with, so it only left a small hole in the toad before slashing at the people from the Martial Emperor City.

Han Fei saw Bai Yue take out a jade slip, thinking that the Martial Emperor had many treasures and he couldn't let this knife be subdued by Bai Yue. This Ultimate Blade was very strong. If he could inherit the pure Great Dao of speed of the Ultimate Blade, it would be equivalent to obtaining a divine technique similar to the golden light technique.

How could Han Fei give up?

With a swish, he activated the Golden Light Leap, showing the characteristics of the Golden Light Leap. When Han Fei broke into the camp of the Martial Emperor City, hundreds of his afterimages appeared in the void in an instant. This was an unhindered flash. After Han Fei fused the Phantom Glass Wings into his body, he had already learned this ability.

Sure enough, the Ultimate Blade was immediately attracted by Han Fei.

Although the Ultimate Blade was a weapon, it was made of the pure Great Dao of Speed, so there seemed to be nothing wrong with calling it the Great Dao of Speed.

Now he realized that the reason why people died here was that these Great Daos were simply invincible, so most of the people who came before had died.

As for the Snow Lady and the others, when they first entered the Monarch Palace, they had just become kings, so of course they wouldn't be able to win. They had just become kings. How could they deal with something like the Ultimate Blade?

Later, although the Monarch Palace also allowed kings to enter, still very few of them could block these Great Daos. This also caused this place to become a so-called forbidden place.

In fact, these Great Daos were just looking for an inheritor.

Before, Han Fei only wanted to catch the Ultimate Blade and didn't show his talent on speed, so the Ultimate Blade wasn't interested in him at all. Now that Han Fei showed his golden light technique, it was as if the Ultimate Blade had suddenly found a good friend. How could it not come?

Chapter 2014 Transform into the Dao

Liang Yin obtained the Heavenly Dao Demonic Sound, and the person from the Martial Emperor City obtained the power of purple lightning, which might be the Great Dao of Lightning or something. Although the two of them didn't reveal it, Liang Yin said that her strength had roughly increased by 50%. Of course, Liang Yin said that her strength had increased by 50%, which might be because her previous strength was relatively weak. But in any case, Han Fei felt that if he could get this Ultimate Blade, it would be like adding wings to a tiger.

It could be said that with the Ultimate Blade in hand, he would be invincible in the same realm.

Perhaps some people could barely defend against it when they were prepared, but what if they were unprepared? Who could defend against the Ultimate Blade?

Swish! Swish! Swish!

Swish! Swish! Swish!

Since it was to lure the Ultimate Blade, Han Fei didn't intend to take it down by fighting. Instead, he flashed crazily and almost used his fastest speed.

However, although the ability of the Phantom Glass Wings was used almost infinitely, as long as he disappeared and reappeared, he couldn't avoid the Ultimate Blade.

While Han Fei was flashing, his body had been pierced by the Ultimate Blade seven or eight times.

venor

It seemed that this flashing ability couldn't attract the Ultimate Blade. The latter was about to go elsewhere to find its inheritor, but Han Fei used the golden light technique and the Ultimate Blade was immediately attracted.

When Han Fei performed the golden light leap, the Ultimate Blade chased into the void. This kind of leap was not as simple as escaping into the void, but jumping forward via spatial nodes that light could reach.

The Ultimate Blade seemed to be quite curious about Han Fei's speed. It chased him directly and flew all the way here without reducing the distance it should have covered. As for Han Fei, he jumped over. Because the Ultimate Blade didn't know the direction Han Fei was going, it could only chase him after he appeared, which made it slow.

.....

Perhaps because of this, the Ultimate Blade was extremely curious about Han Fei.

"Puff ~"

As soon as Han Fei appeared, he was pierced through. This time, a large amount of his essence blood was taken away.

Han Fei was shocked. According to the absorption frequency, his essence blood would be drained after 20 times. The Ultimate Blade was so fast that 20 times was very fast for it.

Therefore, Han Fei activated the Great Dao and the Heaven Enlightenment Divine Technique. The invincible will gathered around him and forcibly slowed down the frequency at which the Ultimate Blade pierced him.

Unlike just now when it sucked his essence blood 20 times in an instant, it could only do it at most three times a second now.

But even so, even with the Heaven Enlightenment Divine Technique, his Qi and blood supply was not enough!

Han Fei only held on for five seconds before he really began to run, because he had to run. The Ultimate Blade seemed to be acknowledging him as its master. Only 30% of his essence blood had been left. If he wanted to recover, he had to buy some time! Therefore, Han Fei immediately activated the Twin Divine Technique and his white-mist body continued to run.

However, the white-mist body would definitely be quickly killed, and his black-mist body directly waved his fishing pole and fish for Ultimate Blade in the void. This was because the Ultimate Blade only appeared for an extremely short time, which was dozens of seconds ago. Therefore, it wasn't difficult to fish for the Ultimate Blade.

After only two tries, a fake Ultimate Blade appeared. With a thought from Han Fei, the two Ultimate Blades began to fight.

As for Han Fei, he entered reality, fused his twin bodies, and immediately used the Heaven Enlightenment Divine Technique. At the same time, tens of thousands of spiritual fruits around him shattered at the same time, producing blood for him.

But the crowd couldn't understand. Had Han Fei already subdued the knife?

Clank, Clank, Clank ~

Then, they saw two things that seemed to be passing by fighting in midair and colliding.

Beside Han Fei, an invisible battle seemed to have broken out, and Han Fei was standing among them, crazily swallowing spiritual fruits. Blood and Qi grew on his body, and after only twenty seconds, blood and Qi overflowed from the surface of his body and soared into the sky.

At this moment, Han Fei smiled and activated the Ultimate Blade he could control to stab at him.

"Pu! Pu! Pu! Pu!"

His Qi and blood were rapidly decreasing. In less than three seconds, the overflowing Qi and blood were gone. After another three seconds, Han Fei felt that the Ultimate Blade had established a connection with him.

Han Fei was a king who walked the path of body refinement in the first place. His blood and Qi were so thick and intense that ordinary kings couldn't compare to him. Han Fei's bloodline level was extremely high, so it wasn't difficult for him to make it recognize him as its master.

Therefore, when the Ultimate Blade pierced Han Fei's body one last time, it couldn't come out again because it belonged to Han Fei now.

Han Fei felt that he had grasped many truths in his mind. He felt that he was like a ray of light, walking in reality. The essence of reality and the void was that the void was dependent on reality. One was the outer skin, and the other was the inner skin. The void was part of reality.

What didn't belong to reality was the endless void. The endless void broke through the outer and inner layers and went to an unexplorable place. After entering it, there was only endless void and darkness left.

Therefore, Han Fei's previous understanding that reality and the void were one world transitioning to another dark world was wrong. The relationship between reality and the void was like there was a thick green sac under the watermelon skin. Therefore, the so-called tearing the void was actually just opening up a layer of skin.

However, it was much more difficult to open the endless void. Ordinary power couldn't open the endless void. Just like how the green sac of a watermelon was very thick, to open the endless void, one had to break both the inner and outer skin, so the power needed was even greater and one had to cut the void deeper.

And this only strengthened Han Fei's understanding of reality and the void.

If he wanted to run so fast to the Ultimate Blade, through his own comprehension, he had to transform into the Dao. Making himself a part of speed was a way to transform into the Dao.

Han Fei was even amazed. If this could be done, it would almost open a new door for him. He didn't know how many of his Great Daos he could transform into.

This reminded Han Fei of when he was on the Scattered Stars Island in the Yin-Yang World. He heard that the Sea King transformed into the Great Dao and used his body as the Dao to bless the billions of creatures in the sea.

But from the looks of it, it was bullshit. It might be what was recorded in the books. However, there was clearly a problem with how many creatures he could bless. This was because he could only transform into the Great Dao he had, and not every Great Dao.

The so-called transforming into a Great Dao was actually transforming into a Great Dao when one was conscious. For example, for the Yin-Yang Dao, the Supreme Yin-Yang Wheel was a form of transformation into the Dao.

For example, for the path of invincibility, the invincible golden body was equivalent to a form of Dao Transformation.

Of course, if he wanted to completely transform into the Dao, Han Fei needed to transform his own body into Dao runes.

At this moment, Han Fei seemed to understand that transforming into a Dao didn't mean death. It was possible to transform back after that.

Unfortunately, he didn't have the time to test it at this moment. Anyway, he had obtained another low-quality godly weapon. This was already the second one, and it had even given him an additional Great Dao. If it weren't for the fact that the Infinity Water didn't seem to have enough water essence, it might have upgraded to a low-quality godly weapon.

"Huff-"

When Han Fei opened his eyes with a smile, everyone was relieved. It seemed that Han Fei had taken this Great Dao.

At this time, they would rather Han Fei inherit this Great Dao. Otherwise, it would be really terrifying. It would be a slaughter. Even if they could block it for one or two breaths, could they block it for ten or eight breaths?

Look at Ji Xuan, he was in the top ten of the Raging Sea's Sea Establishment List, wasn't he? Even if he was still a little bit lacking, he was almost there, but in front of that small knife just now, he was nothing and easily killed.

The luckiest one was none other than Hong Yue. He exchanged 500 million resources for his life! If Han Fei didn't use the Heaven Enlightenment Divine Technique on him, he would be the first to die.

However, no one dared to relax, because this was only the third Great Dao. The Monarch would pass on five Great Daos. If this third Great Dao was already so dangerous, how dangerous would the next two be?

After Han Fei obtained this Dao, no one dared to relax for a moment. They still maintained the state of spiritual beast fusion and even activated their secret techniques.

After only ten seconds, everyone suddenly felt their bodies go limp, as if infinite gravity was applied to them.

Even Han Fei felt that his body was tense as if the sky had collapsed.

This time, the toad had just returned to its beast form. Although it wasn't in its complete state, it was big enough.

However, the toad fell to the ground, bleeding all over, its flesh and blood shattering.

At that moment, he chose to return to his human form, but even so, when he recovered, he was already a bloody mess. Fortunately, kings had the power of regeneration. As long as he wasn't dead, it was very easy for him to recover.

With the toad as an example, the single-horned flood dragon lady and the squid lady also transformed into humans. Only then did everyone see that above their heads, a huge palm almost covered the entire space as it slapped down.

Therefore, everyone felt that the pressure on them was increasing crazily.

Huang Jie cursed, "Are they trying to kill us? They won't even let go of those who have already inherited the Great Daos?"

However, Liang Yin suddenly said, "No, the knife didn't attack me just now. Among all of you, I'm the only one who didn't get stabbed."

The young man from the Martial Emperor City also said, "Although the Heavenly Dao Demonic Sound is strong, it doesn't seem to have a deep impact on my soul. I didn't go mad."

Everyone immediately understood. So, those who had inherited Great Daos could actually avoid the attack of other Great Daos?

Didn't this mean that the latter two more difficult Great Daos needed people like them who hadn't obtained the Great Dao inheritance to take?
