

GOF 2021

Chapter 2021 Search for Resources

In the Origin Sea of the squid lady, the Demon Purification Pot swallowed more than 6,000 wisps of Chaotic Qi, which was a lot.

The ultra-quality spiritual stones and various resources that Han Fei found added up to about 1.1 billion. This number couldn't be said to be small. After all, a king was completely worth carrying so many resources. But compared to his, these resources were not much.

Compared to the part of his Origin Sea that was swallowed by the Demon Purification Pot, the harvest from the squid lady was not even one-tenth of those resources.

However, Han Fei was not greedy. If one was not enough, there was a second one! Just now, four blue light balls disappeared.

Half an hour later, when Han Fei completely looted the squid lady's Origin Sea, he was slowly relieved. In any case, he had made up for some of the resources.

As the Vast Ocean Navigator turned again, its target was still the bronze tree. It seemed that someone had died.

When Han Fei broke through the void again and his black-mist body entered, he found that there were some ownerless souls here. After searching for a while, Han Fei found the Heavenly Palace Array Map of the Spirit Refining World. Only then did he know that Xu Lian had already died.

"Alas..."

Han Fei sighed slightly. He had helped Xu Lian several times, but he still died in the end. It could be said that the thirteen worlds in the outer domain were relatively weak indeed.

...

Now that Xu Lian died, the Spirit Refining World lost its leader. He didn't know if Xu Lian had left any backup means before coming here.

Han Fei collected the ownerless souls here and collected about 800 million resources, which was a lot. After all, these kings would stay in the Monarch Palace for three years, so they must have taken a lot of resources with them.

The Demon Purification Pot collected more than 5,600 wisps of Chaotic Qi. Fortunately, the 10,000 wisps of Chaotic Qi that were swallowed in his Origin Sea were finally replenished.

But a lot of other resources were still missing.

When Han Fei tried to find someone's Origin Sea with the Vast Ocean Navigator for the third time, although he still found it, it was not on the bronze tree this time, but in the void outside the bronze tree.

Han Fei found that the Nine Poison Treasure Silkworm in the depths of his soul moved, which meant that there were traces of poison here.

Han Fei's heart did a flip. Huang Jie is dead?

When Han Fei entered the third Origin Sea, his heart did a flip. This was actually an ocean. He perceived everything around him. This couldn't be Huang Jie's Origin Sea, or there would definitely be many poisons here.

Since it was not Huang Jie's Origin Sea, it meant that Huang Jie had fought this person and won. This person was dead.

This person's Origin Sea was more than 26,000 kilometers long. This was the largest Origin Sea he had seen so far.

Besides, this person also knew how to set up the Origin Sea. The mist was very light in color, and he had clearly grasped some knacks.

non

The moment the Demon Purification Pot came out, it didn't swallow the Chaotic Qi, but extended a small vine to an undersea algae.

"Huh?"

Han Fei's heart did a flip and he immediately realized that something was wrong. A golden light flashed and he jumped over, and the Ultimate Blade in his hand left his hand in an instant, slashing at the algae. "Pu! Pu! Pu! Pu!"

Seeing that the algae was cut into pieces, Han Fei fused with Little Black and Little White and keenly noticed that a wisp of soul body drilled into the ground veins.

Han Fei immediately used the Void Lines to seal the ground veins.

After finding this person's location, the Ultimate Blade stabbed at him.

In just two seconds, this person's remnant soul was riddled with holes, and he finally revealed his true appearance.

When Han Fei took a closer look, he was surprised. "Oh, it's you!"

Han Fei couldn't help but laugh. This person was none other than Zhou Bai from the undersea human race, who was said to be in the top ten of the Raging Sea Sea.

Now it seemed that this guy was defeated by Old Huang Jie.

Either Zhou Bai was already seriously injured when he came out, and Huang Jie took advantage of it.

Either Huang Jie was very strong in the first place, stronger than Zhou Bai.

Han Fei was more inclined to the second. Although Old Huang Jie looked like he was about to die, the great poisons that he could use could even injure Sky Openers.

Han Fei wasn't surprised that Zhou Bai was defeated by Huang Jie. Anyway, it was like pennies from heaven for him.

Zhou Bai was shocked. "Han Fei, how can you enter my Origin Sea?"

Han Fei grinned. "You ask too many questions. Do you think I'll tell you?"

Zhou Bai was terrified, but there was nothing he could do. He was being ravaged by the great poison, or he wouldn't have existed in the form of a soul body. At this moment, no matter what, he had to restore his body.

However, just as Zhou Bai was about to mobilize the Chaotic Qi and the energy here, he discovered that the Chaotic Qi was no longer under his control.

A calabash was absorbing the energy here crazily.

Han Fei grinned. "What a pity. You can only blame your bad luck for meeting me."

With that, with a thought from Han Fei, the Ultimate Blade began to kill crazily. Zhou Bai didn't even have a chance to dodge before his soul was destroyed.

To ensure that nothing went wrong, Han Fei searched around with the Void Lines. After confirming that Zhou Bai was dead, he began to plunder resources.

Han Fei curled his lips. He had thought that a strong master like Zhou Bai would have more resources, but he realized that he was wrong.

Since Zhou Bai had figured out the layout of the Origin Sea, a large number of resources must have been arranged in the Origin Sea. The usable resources were about the same amount of the ones he got from Wan Qingling, only 500 million.

Of course, the digging of the Origin Sea was relatively more troublesome.

However, Han Fei was short of resources now. No matter how difficult it was to dig the Origin Sea, he had to dig it! There were at least billions of resources in the Origin Sea. Wouldn't it be a loss if he didn't dig it?

This digging lasted more than three hours, and Han Fei dug up two billion resources from Zhou Bai's Origin Sea.

When Han Fei dug into an undersea fire mountain, he found a Demon Essence Red Bead. This thing seemed to be the one hanging on the bronze tree. Zhou Bai's first goal was this thing. He didn't expect that Zhou Bai didn't use it but left it in the Origin Sea.

< Name > Demon Emperor's Inner Core

< Introduction > The inner core of a sea demon emperor. Absorbing its energy can promote the soul, increase strength, comprehend the Great Dao, and inherit the demon emperor's techniques.

< Level > Emperor-level

< Quality > Ultra-Quality

< Contained Immortal Qi > 392 wisps

< Effect > Refining and absorbing it can obtain inheritance, increase the soul, comprehend the Great Dao, and obtain power.

Han Fei curled his lips slightly. This thing was good, but it was not that useful to him. One was that he didn't actually need the inheritance this thing contained, because it wasn't suitable for his path.

Among the people he knew, it might be most useful for Xia Xiaochan. But Xia Xiaochan actually didn't need it, because Xia Xiaochan's future path might not be worse than this Demon Emperor's. Looking at its Great Dao, it could only play a learning role at most. Xia Xiaochan definitely wouldn't want to become this Demon Emperor's inheritor.

Therefore, Han Fei threw the inner core into the Origin Sea and planned to give it to Xia Xiaochan when she appeared.

In addition to the Demon Emperor's inner core, Han Fei only obtained about 2.5 billion resources in total. The Demon Purification Pot absorbed 8,000 wisps of Chaotic Qi, which increased Han Fei's Chaotic Qi to 62,396 wisps.

Unfortunately, the three chances of the Vast Ocean Navigator today had been used up, which greatly made up for the resources swallowed by the Demon Purification Pot.

Fortunately, many kings had died here. Otherwise, he wouldn't know how many places he would have to rob to get so many resources.

Han Fei glanced at the Bronze Divine Tree. Seeing that no one had come out yet, he didn't rush to continue to snatch the treasures.

Originally, in the Monarch Palace, Han Fei thought that he had no chance to enter the Origin Sea, but here, it seemed different. No rules could affect this place, and even perception wouldn't be limited.

Therefore, Han Fei's black-mist body immediately entered his Origin Sea and quickly replaced a large number of abandoned resources with the more than 4 billion resources he just snatched.

The Earth Vein Essence he had obtained before was controlled by Han Fei to be channeled into the entire Origin Sea.

Because he had obtained a large number of marine resources from Zhou Bai and the squid lady, Han Fei directly turned the terrain about 60,000 kilometers away into an ocean, so there was a place for these resources.

After about an hour, most of the mist in Han Fei's Origin Sea finally dissipated, and the resource layout in his Origin Sea finally returned to about 40% of the past.

Although Han Fei still didn't have any extra resources to use, there were still many resources hanging on the bronze tree!

Han Fei waited until the next day.

He waited for the ability of the Vast Ocean Navigator to be reset. One reason was to continue to find other dead kings' Origin Seas, and the other was to find treasures on the bronze tree that were more suitable for him.

Although there were many treasures on the tree, he should find those most suitable for him.

Of course, he had to find resources, but he also had to find a way out.

Chapter 2022 Punishment for Greed

Han Fei was used to resources and treasures. He used to treat a high-quality pearl as a treasure, but now, billions were not enough.

Han Fei needed resources, but he knew that a way out was the greatest opportunity.

Therefore, after consolidating his Origin Sea, Han Fei looked around. In the void, stars flickered in the distance, and there was even a red moon in the sky.

According to normal thinking, Han Fei could easily guess that the red moon might be the exit.

Therefore, after a preliminary judgment, Han Fei immediately used the Vast Ocean Navigator. Sure enough, the Vast Ocean Navigator pointed at the red moon in the sky without hesitation.

Han Fei couldn't help but grin. Now that he had found the exit, he could continue to search for resources without worry.

At this moment, the Vast Ocean Navigator could still be used twice today.

With a thought, Han Fei asked the Vast Ocean Navigator to continue to search for the Origin Seas of the other dead kings.

However, to Han Fei's surprise, there was

none.

...

"That's not right!"

Han Fei couldn't help frowning. There were four blue light balls missing, but there were only three Origin Seas here. This meant that one person hadn't died, and he wasn't here, so he must have left the Bronze Tree.

In other words, one of the kings had left the Red Moon.

Han Fei's first thought was to leave Bai Yue, because the blue ball of light where Bai Yue was had disappeared. Maybe he went to compete for another target, or maybe he went out.

Continue reading on MYBOXNOVEL.COM

As Bai Yue said, the Martial Emperor City didn't lack treasures. Compared to Huang Jie, he was more likely to go out.

Of course, it could be someone else, but Han Fei thought Bai Yue was more likely.

However, these were all his guesses. To be honest, among this group of kings, Han Fei suspected that there was no one who could resist the temptation of the bronze tree, because even he couldn't resist the temptation of the bronze tree.

Since the Vast Ocean Navigator couldn't lead him, Han Fei didn't bother to find it. He wasn't worried that the person who left would enter the bronze door in advance of him.

If it was so easy to enter the Void Temple, he wouldn't have to go through the Void Temple's test again and again.

Han Fei said silently, "Point to the resources most suitable for the expansion of my Origin Sea."

This time, to Han Fei's surprise, the Vast Ocean Navigator pointed east and west. In the end, Han Fei found that the Vast Ocean Navigator pointed in dozens of directions.

Han Fei was stunned. Which one should he choose?

While Han Fei was hesitating, the old turtle said, "Why don't we choose the Mystic Yellow Soil?"

Han Fei was surprised. "The Mystic Yellow Soil? The Mystic Yellow Soil that can make the Origin Sea more natural?"

The old turtle said, "That's right. Look at the yellow brick that looks like a brick three hundred kilometers above you. That's it."

Han Fei's eyelids twitched. "Isn't that a brick?"

The old turtle said, "Believe me, I'm a person who has obtained the Mystic Yellow Soil."

Han Fei couldn't help but say, "There's no rush. We can get the resources one by one. But Old Yuan, do you only know the Mystic Yellow Soil here? Is there anything more powerful here? Let's make a mark first and take them one by one later."

The old turtle pondered for a moment. "I know a lot of them, but if you want to take them one by one, why don't you uproot the entire tree? Didn't someone uproot it before?"

"F*ck!"

Han Fei almost forgot about it. He didn't think of pulling the tree out because this bronze tree was too big. It might be more than 300,000 kilometers high. It was too big. Even if he pulled it out, he had no place to put

it.

Therefore, he felt that it was impossible to pull out such a big tree!

However, who said that such a big tree couldn't be uprooted? Even if it couldn't be uprooted, he could cut it into pieces!

Seeing that there was no one around, Han Fei might as well try pulling it out first. If this tree was pulled out by him and all the treasures fell, wouldn't he be rich? Old Han and his mother had done this before. And it was probably them who got the Demon Purification Pot out.

Since someone had succeeded before, Han Fei immediately rushed under the bronze tree. In Han Fei's perception, the bronze tree was rooted in the void. Although he didn't know how it was rooted, it didn't stop Han Fei from trying to cut through the void.

Therefore, without hesitation, Han Fei activated his Great Dao, prepared the Immortal Fiend Saber, and slashed at the roots of the bronze tree.

Han Fei's purpose was to break the void.

The Immortal Fiend Saber slashed a huge crack in the void with terrifying power, but something strange happened. The power of the Immortal Fiend Saber gradually disappeared in the void, but the bronze tree was fine. Han Fei didn't even see its roots. So the place where the bronze tree took root shouldn't be the void of this world.

Han Fei didn't find the roots of the bronze tree. Seeing that his strongest move was useless, he immediately thought of the simplest and most ordinary move, which was to cut the tree.

Just like when he cut the Big Red Trunk, he could cut this ancient bronze tree into dozens of pieces. The Origin Sea should be able to accommodate it.

The Infinity Water turned into a huge wheel and attacked the bronze tree.

Buzz

Clang! Clang! Clang!

Ka ka ka ~

Han Fei really admired the hardness of the bronze tree. The Infinity Water cut so violently, but the bronze tree was not damaged at all. Instead, the wheel formed by the Infinity Water was full of cracks.

Just as Han Fei felt that cutting the trees wouldn't work, he might as well get the treasures one by one, only to see a layer of light blue airwaves erupting from the bronze tree. This terrifying wave instantly shattered the Infinity Water and sent Han Fei and the Infinity Water flying hundreds of thousands of kilometers away. Han Fei felt that his whole body was sore and his bones were about to break as if his body was run over by a giant wheel.

At that moment, Han Fei was about to rush back when a blast of air swept over, forcing him to retreat tens of thousands of kilometers again.

At this time, perhaps because Han Fei was far enough away from the bronze tree, he could see the true appearance of the bronze tree.

Han Fei was surprised to find that it was not a bronze tree, but a large complicated network of veins, like the meridians of the human body.

However, before Han Fei took a second look, the blue light curtain in front of him disappeared, and then Han Fei found that he had left the starry sky and appeared under it, on the ground. The bronze tree had disappeared without a trace.

"F*ck! Don't!"

Han Fei was so shocked that his face turned pale. What the f*ck is going on? I only cut the tree twice. How did you beat me out of the starry sky?

The old turtle was also dumbfounded and shut up, thinking that Han Fei might vent on him.

Sure enough, Han Fei roared, "Old Yuan, this is just one of the countless shitty ideas you've come up with. If I f*cking go to get the treasures one by one, wouldn't it be better for me? Huh? Such a big piece of Mystic Yellow Soil is gone. Shouldn't you advise me to get the treasures first?"

Feeling Han Fei's anger, the old turtle couldn't help shivering. "Well, this is just my suggestion. After all, someone succeeded before!"

Han Fei said angrily, "But I failed! Now I lost a whole tree of treasures! A whole tree!"

Han Fei felt that his heart was trembling and bleeding. He had already planned to get the treasures one by one. How much treasure would he get?

The old turtle said, "In fact, I think that although there are many treasures on this Bronze Divine Tree, not all of them can be taken by one person. Otherwise, once one is strong enough, all the treasures will be taken away by him. The Monarch will definitely restrict this."

Han Fei said, "That's bulls * it. This Monarch is clearly looking for a successor. If he doesn't give those treasures to his successor, who can he give them to? Do you think he's stupid?"

The old turtle felt a little guilty. It seemed that his words were indeed not convincing.

But the old turtle immediately said, "There are still a group of them who survived. When you go out, go find them one by one and snatch the resources they got..."

Han Fei grabbed the Vast Ocean Navigator. "Wait my ass. I have to find a way to go in again."

The Vast Ocean Navigator immediately turned, and Han Fei followed the needle to break through the void at his fastest speed. Soon, he landed in a place that looked like an ancient jungle.

"Huh?"

21

Han Fei wanted to scan around with his perception, only to find that his perception was gone. This made Han Fei speechless. Where should he go in this dense forest?

Having no choice, Han Fei could only use the Vast Ocean Navigator again. In seven or eight seconds, Han Fei arrived under a huge tree.

But the moment Han Fei saw the giant tree, his heart did a flip. Why did it look like the Cloud Sea Divine Tree?

At this moment, Han Fei felt that the tree was shaking slightly, and the aftershock of the battle seemed to be transmitted down through the tree.

A moment later.

Han Fei saw that on this huge ancient tree, many Venerables were fighting for a yellow fruit wrapped in thin gauze.

Han Fei looked at the fruit in his hand, and information popped up in his eyes.

< Name > Cloud Dream Fruit

< Introduction > The fruit that grows on the Cloud Dream Divine Tree. It can increase the power of the soul and strengthen the bloodline. Taking it, there is a chance for one to comprehend the Dao, or even obtain the Cloud Dream Divine Technique. This fruit is divided into seven levels by the number of leaves. The more leaves there are, the stronger the effect. The higher the place where this fruit grows, the better the effect. However, this fruit is often guarded by exotic beasts. You have to pick it carefully.

<Level> Venerable

< Quality > Ultra-Quality

< Chaotic Qi Contained > 7 Points

< Effect > Increase the power of the soul, strengthen the bloodline, and comprehend the Dao.
