

God of Fishing - Chapter 2501 - 2501 Hong Yue Is Sick

Han Fei had a lot of resources now. Even if he covered all the surface areas of his Origin Star with resources, he wouldn't be able to use them up. He could even cover the surface by multiple layers.

Some of them were obtained from casinos, some from killing enemies, and some were exchanged with points. Anyway, he got a lot. In the end, he didn't calculate it carefully. Anyway, it was enough for seven or eight of him to enter the Star Transformation Realm.

After speaking to Zhou Jingjing and the others, Han Fei disappeared from the spot with a swish. Before Zhou Jingjing and the others could recover from their shock, he appeared again, and at the same time, a star core with a radius of more than 300 kilometers appeared. Endless energy erupted from the star core, making Li Tong and the others gape.

Han Fei said, "Zhou Jingjing, put this Star Core into your Origin Sea."

!!

At this moment, Zhou Jingjing felt as if a pie had fallen from the sky. She just did whatever Han Fei told her to.

When the Star Core was absorbed into the Origin Sea by Zhou Jingjing, only a moment later, Zhou Jingjing said in shock, "The resource consumption speed is drastically decreasing."

Han Fei nodded slightly, not surprised at all. It was only natural. You were short of energy in the first place, so it was certainly difficult for you to enter the Star Transformation Realm!

At this moment, Han Fei said, "I remember there are still two Sky Openers. Where are they?"

Hearing this, Zhou Jingjing immediately lowered her head in pity. Li Tong and Wang Xu also sighed.

Zhou Jingjing said, "Uncle Ma and Uncle Liu sacrificed themselves in an encounter war to give us a chance to escape."

Han Fei frowned in confusion. “Is there any power nearby that can crush you?”

Zhou Jingjing shook her head. “Not here. It’s on our way here from the central area.”

Han Fei nodded slightly. “The path of cultivation is paved with mountains of corpses and seas of blood. It’s a pity that they died.”

With that, Han Fei looked at Li Tong and Wang Xu and said, “The two of you, try to see if you can have a heavenly-number star transformation. But don’t be deliberate. Once you feel that you are about to enter the Star Transformation Realm, it will be time for you to do it. Don’t deliberately pursue a heavenly-number star transformation, or it will backfire.”

At this time, Han Fei, who had given them a lot of resources, became their real master in their hearts. The two hurriedly said, “Master, don’t worry. We will try our best.”

Han Fei nodded. “During this period of time, don’t dig for resources. That’s not how resources are obtained. You can use the resources I gave you at will. It doesn’t matter even if they’re used up. I came to you this time not to take you away. I still need to go to the Chaotic Wasteland. You don’t have to go with me. I should be back in seven or eight years. You just need to cultivate well.”

Zhou Jingjing was surprised. “You’re leaving so soon? By the way, Master, what’s the result of your competition this time?”

Han Fei didn’t know what to say. Would they be scared to death if he said he was first place? Forget it, if he guessed right, they would hear it sooner or later, so there was no need to tell them now.

Han Fei just smiled casually. “Not bad.”

With that, Han Fei waved his hand, and a Blood Fiend appeared. Han Fei said, “During this period of time, just let the people in the Giant Whale Fortress come out to cultivate. You have seen this Blood Fiend before, but you might not know its realm back then. It’s in the perfected Star Transformation Realm, which is enough to ensure your safety.”

“Hiss!”

For a moment, Zhou Jingjing and the others all looked at Han Fei in shock, and then looked at the Blood Fiend. Perfected Star Transformation Realm? What did that mean? Didn't it mean that the Blood Fiend was a legendary super powerhouse on the verge of proving Dao?

Such a strong person had actually been refined into a puppet?

For a moment, Zhou Jingjing and the others all guessed that Han Fei's real identity must be very high, so his family had given him such a terrifying weapon.

Yes, their horizons limited their imagination. However, this wasn't important. Although during the 10,000-year competition of the Divine Capital Dynasty, there were a lot of late-stage Star Transformation Realm, peak-level late-stage Star Transformation Realm, and perfected Star Transformation Realm cultivators, they were from the entire wilderness. In fact, in most places, there were very few such experts.

Han Fei didn't think that Zhou Jingjing and the others were weak. They were already stronger than many people. He didn't know if Hong Yue had opened the sky or not. Anyway, his subordinates in the Chaotic Wasteland probably hadn't.

Besides, for the people in the Raging Sea, Venerables were already strong enough. Were they weak? No, actually not. It was just that they were in a different environment.

In the future, if the countless humans in the Raging Sea went to the outside world, they would need people to help them integrate into the Sea Realm, right? They couldn't completely count on the enslaved humans in the City of Scavengers to help them integrate into the Sea Realm. They also needed these people in the wilderness to help them integrate into the real Sea Realm.

Therefore, Han Fei ignored their shock and asked, "By the way, how many people are in the Giant Whale Fortress now?"

Zhou Jingjing quickly came back to herself and said, "At present, there are as many as 150,000 people of all the races."

Han Fei nodded slightly. "I'll give you resources to help you become stronger, but I also need you to do a few things."

Zhou Jingjing's heart did a flip. Here it comes.

Han Fei said, "Firstly, make them take the human race as their leaders. No matter what race they belong to, it's necessary for them to transform into human beings. Let them adapt to the combat style of human beings."

"Secondly, let them have more children and reward them with resources for having more children. Use the resources you have to implement this plan first. Ask me for resources whenever you need. When I come out of the Chaotic Wasteland, I will lead you for a while."

"Ah! That's it?"

Zhou Jingjing was at a loss, and so were Li Tong and Wang Xu. They had thought that Han Fei wanted them to do something very dangerous. So, it was just to make them take the human race as the leader and take pride in being a human?

They had no faith in the first place. Perhaps everyone in the Giant Whale Fortress believed in Zhou Jingjing! They all knew that it was Zhou Jingjing who protected their safety and their growth.

So it was very simple to make them believe in the human race. The simplest way was to say that Han Fei was the boss behind Zhou Jingjing, erect a statue for Han Fei and publicize the human race.

Also, wasn't encouraging fertility a consistent plan of the Sea Monster Fortresses?

All the Sea Monster Fortresses knew that only with many people could strong masters be born. The method they pursued was to cast a wide net and fish for opportunities.

Compared to the resources and the Blood Fiend that was in the perfected Star Transformation Realm that Han Fei gave them, Han Fei's requirements for them were almost nothing.

Zhou Jingjing hurriedly said, "You can rest assured, Master. I'll handle this matter well. It will only take a short time."

Han Fei waved his hand. "No hurry. There's plenty of time. Alright, you guys stay here. I'm going to the Chaotic Wasteland."

...

Han Fei appeared and disappeared quickly as if he were extremely busy.

Li Tong couldn't come back to his senses for a long time, and Wang Xu and Zhou Jingjing were both staring at the Blood Fiend Puppet, which was standing on the giant whale's head like a statue, motionless.

Gulp!

Li Tong suddenly swallowed and then sighed. "Jingjing! You have a good eye! People like Han Fei are definitely extraordinary!"

Immediately, Zhou Jingjing and Wang Xu rolled their eyes. Come on, you complained so much before. Now that Han Fei gave you resources, you began to praise him as a good master.

Zhou Jingjing said, "Uncle Li, Uncle Wang, for the next period of time, let's just cultivate outside wholeheartedly. From the looks of it, Master doesn't seem to care about these resources at all. Therefore, in fact, for us, the greatest opportunity might not be about resources at all, but about Master personally taking us to walk in the wilderness. That is the real opportunity."

...

One month Later.

Farm No. 68.

A group of young and beautiful female cultivators gathered in a seal below the City Lord's Mansion.

In the seal, Hong Yue was dying. His body was collapsing everywhere, and occasionally some power of lightning emerged from his blood.

Beside Hong Yue, the human female cultivators that Han Fei saved in the past were all extremely anxious.

"Sister Yingyue, what should we do? It's been a month. Isn't it said that after opening the sky, one's strength will soar? Why is Senior Hong in this state?"

Someone said, "Recently, because we have been secretly searching for precious medicines, the people of the Ten Thousand Scale Race have begun to notice us."

A girl said, "Then kill these people from the Ten Thousand Scale Race. Don't worry. With some people missing, the main city won't find anything."

But Hong Yue said weakly, "It's okay. I just underestimated the difficulty of transcending the tribulation in the Sea of Stars. No wonder few people said that they were going to transcend the tribulation in the Sea of Stars. My vitality was almost exhausted, and almost all my puppets were burnt to ashes. If I hadn't accumulated a lot of resources over the years, I'm afraid I wouldn't have been able to survive this tribulation."

Yingyue said, "Senior Hong Yue, why don't we use energy crystals? In any case, there is still some vitality in them."

Hong Yue shook his head. "No, you can't! All of you, listen carefully. You can't use energy crystals randomly. The reason why you can use them all the time before is that you obtained too few energy crystals, and you experienced too many battles, so the side effects of the energy crystals are offset. Otherwise, your foundations will be unstable now, and it will be impossible for you to survive the Sky Opening-Realm Heavenly Tribulation."

"Hey, Old Hong! You're quite insightful now!"

Suddenly, a voice suddenly sounded behind everyone.

At first, everyone's hair stood on end, and then they looked overjoyed.

The group of female cultivators all turned around and exclaimed, "Master Human Emperor?"

Even though Hong Yue was seriously injured, he couldn't help getting up with a look of ecstasy. "Master Human Emperor, you're back?"

God of Fishing - Chapter 2502 - 2502 A Gift from the Human Emperor

When everyone saw Han Fei, they were all overjoyed, because Han Fei was back and they had a mainstay. Han Fei was called the Human Emperor and

was stronger than Hong Yue. He was also the only faith of these female cultivators.

Yingyue: "Master Human Emperor, please save Senior Hong! Senior Hong forcibly entered the Sea of Stars to transcend the tribulation and almost died. But now he has clearly transcended the tribulation, but for some reason, he has been so badly injured that he can't recover."

Jiang Ya nodded. "Yes! Master Human Emperor, Senior Hong Yue has already become an emperor, but why..."

Chu Lingyu said, "Master Human Emperor, Senior Hong Yue is so nice. He can't die!"

!!

Immediately, chattering sounds rang in Han Fei's ears.

Han Fei looked at Hong Yue with a faint smile. "Old Hong, you're quite prestigious now. How does it feel to have so many girls care about you? Does it feel good?"

"Cough, cough~ Master Human Emperor, you're teasing me."

Han Fei shook his head with a smile. "I thought it's about time for you to transcend the tribulation, but I didn't expect you to go to the Sea of Stars to transcend the tribulation and survive."

Hearing Han Fei teasing Hong Yue, these female cultivators were relieved. Since the Human Emperor had teased Senior Hong, he would definitely be able to cure him, right?

Seeing that the girls were looking at him eagerly, Han Fei said casually, "Fine, there's something I need to take you to the Sea of Stars to tell you. Everybody, open your minds and don't resist."

Everybody's heart stirred, and in the next moment, they all disappeared from the seal. In the next moment, they appeared on a star, where spiritual energy was abundant and energy was surging like a tidal wave. They felt that if they lived here for a few years, they would be able to transcend the tribulation.

At that moment, the hearts of Yingyue and the others trembled. Is this the Origin Sea of Master Human Emperor?

Unfortunately, they couldn't see how big Master Human Emperor's Origin Sea was.

In the next moment, Han Fei waved his hand and everyone stepped into the Sea of Stars.

Buzz!

When they stepped into the Sea of Stars, they couldn't help exclaiming, "So, so rich Chaotic Qi."

Wen Ruqing exclaimed, "What violent energy!"

Ling Ran exclaimed, "Look."

At that moment, as Ling Ran exclaimed, everyone turned around, only to be dumbfounded. Even Hong Yue was dumbfounded. What the hell is that? What a huge star!

They felt that the limit of the Origin Sea was 100,000 kilometers, but this one had exceeded their imagination.

"Ah~"

Suddenly, Jiang Liuyu covered her head slightly and said via voice transmission, "For some reason, absorbing the Chaotic Qi here makes me want to sleep."

The next moment, the others were the same. All of them seemed to be unable to stand steadily.

Han Fei deliberately didn't remind them just now. Now that they had reacted, he said indifferently, "Who asked you to absorb the Chaotic Qi here? This is the Sea of Stars. You can treat this place as the Endless Void. With your current strength, you will fall into an eternal slumber and drift freely in the Sea of Stars in at most a day."

Scared by Han Fei, everyone hurriedly stopped absorbing the Chaotic Qi here.

“Cough, cough!”

Hong Yue coughed up blood again. Energy surged in his body and lightning flashed. Yingyue hurriedly supported him and looked at Han Fei.

However, Han Fei was not in a hurry. Instead, he said leisurely, “Old Hong, do you know why you were so seriously injured?”

Hong Yue shook his head. He didn’t know at all. He thought that he would be fine after transcending the tribulation.

Han Fei said, “There are several reasons. You know the first reason, because your vitality was almost burnt up. You should have burned your vitality crazily when you transcended the tribulation, right? Did you think that as long as you succeeded in transcending the tribulation, you would have a lot of vitality, so you burned it crazily?”

Hong Yue nodded. That was what he thought. If he didn’t burn his life, he probably wouldn’t be able to survive the tribulation.

Han Fei said, “Today, I want to tell you that when transcending the heavenly tribulation, you can burn a small amount of your vitality, but not much. This is because vitality is closely related to your body’s potential. For example, when you were at the peak of the Sea Establishment realm, you had ten drops of blood. After the tribulation, your vitality soared, and ten drops of blood can be used as a hundred drops of blood. However, when you were transcending the tribulation, you used nine drops of blood and only had one drop of blood left. Then, even if your vitality increases tenfold, you will still have ten drops of blood. However, your body and soul are no longer the same as before. Can these ten drops of blood still support your body and soul?”

Han Fei’s words were easy to understand. The group of female cultivators looked at Han Fei with shining eyes, thinking that the Human Emperor was indeed knowledgeable.

Han Fei continued, “Secondly, Old Hong, you’ve accumulated a lot of hidden injuries in your body. After you transcended the tribulation, these injuries were stimulated all at once. If you were full of vitality, even if these injuries were stimulated, you could slowly heal, but your vitality was insufficient, causing various hidden injuries in your body forming a Qi and blood conflict. This is the second reason.”

“Thirdly, and most importantly, it’s the fundamental reason why you seem to be dying.”

Everyone looked at Han Fei curiously, and Han Fei said, “Old Hong, the power of your soul far exceeds that of your physical power, and the strength of your flesh and bones are also insufficient. The imbalance between your soul and your body leads to a serious disharmony between your body and your soul. Your flesh and bones produced a repulsive force because you have mainly used the body-refining technique I gave you on your bones. If you can completely master this technique before making a breakthrough, your situation will be much better than now.”

Han Fei smiled. “In summary, Old Hong, you’re too rash. If you cleanse your internal injuries with resources, practice my body refining technique to the highest level, and replenish your Qi and blood with sufficient resources, you will definitely be safe and sound now.”

Hong Yue blushed and hurriedly said, “Master Human Emperor, I was too hasty.”

Han Fei said indifferently, “Well, Old Hong! If it were others, I’d just let them fend for themselves. Considering your situation, if I want to save you, I’ll have to pay at least a thousand years of vitality and many resources.”

Hong Yue’s heart stirred, and his eyes turned red. “Master Human Emperor, I, Hong Yue, will dedicate myself to the human race and am willing to die a thousand times for the human race.”

This was exactly the effect Han Fei wanted. He took Yingyue and the others with him to show them that he, the Human Emperor, would not give up on any of them. But at the same time, he also warned them to cultivate steadily.

Han Fei waved his hand, and a pillar of divine light descended, bathing Hong Yue. A large amount of impurities were discharged from Hong Yue’s body, and his hidden injuries quickly recovered.

After a while, Han Fei grabbed a mass of vitality and injected it into Hong Yue’s body with a flick of his finger. Hong Yue’s state was recovering at a visible speed. His momentum also quickly became stronger, and in the blink of an eye, he had the momentum and pressure of the Sky Opening Realm.

Then, Han Fei waved his hand gently, and more than 300,000 spiritual fruits surrounded Hong Yue. These spiritual fruits exploded one after another, turning into infinite vitality and Qi and blood that fused into Hong Yue's body.

Yingyue and the others were all dumbfounded. When had they ever seen so many resources? Such magnificent vitality shocked them. Was this the power of the Human Emperor?

That was not all. Han Fei casually threw a hundred pieces of Mystic Yellow Soil to Hong Yue.

Next to him, Chu Lingyu exclaimed, "Is this the legendary Mystic Yellow Soil? So much?"

Yingyue, Jiang Ya, and the others were also dumbfounded. This was a treasure that even lords might not have! But the Human Emperor had casually given Hong Yue so many?

Even Hong Yue himself was shocked. After staying in the Chaotic Wasteland for so long, how could he not know what the Mystic Yellow Soil was? Every piece of it was a treasure. Han Fei threw out a hundred pieces at once, which almost made him cry.

After that, Han Fei pointed at the void and said, "Old Hong, I'll teach you a legendary divine technique. Its value is even higher than this city. Treasure it."

"Hiss!"

Before Hong Yue had the time to say anything, Han Fei had already pointed a finger between his eyebrows.

What he taught was the Bloodline Devouring Technique. Its effect was the best for the first few times one used this technique.

After about half an hour, Hong Yue finally recovered and his strength soared. This was because Hong Yue was a veteran Sea Establisher. After so many years of accumulation, he wouldn't be weak after he opened the sky.

As soon as Hong Yue sobered up, he knelt down. "Thank you for saving my life, Master Human Emperor. I will definitely work hard for the rise of the human race."

Yingyue and the others also jumped up in excitement. Great, Hong Yue recovered. He was the second Sky Opener of the human race. What could make them more excited than this news?

At this moment, Han Fei casually threw out a drop of essence blood and said, "This is the blood of the divine beast, Green Water Kylin. This thing can greatly improve your bloodline. If you swallow and fuse with this drop of essence blood, I dare not say anything else, but you'll have a chance to prove Dao in this life."

"Gulp ~"

There was a series of gulping sounds. The essence blood of a divine beast? Proving Dao? Did the Human Emperor kill a divine beast this time?

At this moment, everyone looked at Han Fei with admiration and respect. He was their god.

As for Hong Yue, tears welled up in his eyes. He thought that he was going to die. Who would have expected that Han Fei would give him a new life, a divine technique, the legendary treasure, the Mystic Yellow Soil, a noble bloodline, and the hope to prove Dao...

It was also at this moment that Hong Yue completely submitted, completely recognizing Han Fei as the only sovereign of the human race.

God of Fishing - Chapter 2503 - 2503 Zhang Daqian's Tribulation

Chapter 2503 - 2503 Zhang Daqian's Tribulation

2503 Zhang Daqian's Tribulation

Han Fei was not stingy. With his current strength, as for a great technique like the bloodline devouring, it would take tens of thousands of years for him to upgrade once.

Fortunately, he could accelerate time. Otherwise, if he spent tens of thousands of years improving his bloodline, how slow would his growth be?

Furthermore, Han Fei didn't spread the original bloodline devouring technique, but slightly modified it. Hong Yue had advanced to the Sky Opening Realm, but his bloodline had actually been strengthened during his breakthroughs.

The Green Water Kylin Blood was the bloodline of a fake divine beast, which was suitable for the current Hong Yue to swallow. As for Yingyue and the others, they were not strong enough to swallow even the Green Water Kylin Blood. They could only swallow the bloodline of some legendary or legend creatures to strengthen their bloodline.

!!

However, Han Fei was not in the mood to teach them one by one.

Han Fei said, "Old Hong! Your hidden illness has been cured, your soul has been solidified, your vitality has recovered, and your bones are quite strong now. The only thing you lack is the level of your bloodline. Originally, with your conditions, it would take at least a thousand years for you to swallow the bloodline of a divine beast. However, this time I went out and obtained a treasure that can temporarily accelerate time by a hundred times. From today onwards, all of you, enter my Origin Star and improve your bloodline. I want all of you to have the potential to prove Dao."

"The potential to prove Dao?"

To prove Dao?! In the City of Scavengers, humans weren't even qualified to open the sky, let alone prove Dao.

Hearing this, Hong Yue said sincerely. "Hong Yue is willing to follow Master Human Emperor forever."

Yingyue and the others fell to their knees. "We are willing to follow you forever, Master Human Emperor."

The corners of Han Fei's mouth curled up slightly. Everything was difficult at the beginning. In the past, he didn't have the time to help others. Now, he had the conditions to cultivate a batch of seeded players. However, these few people weren't enough. He needed more people.

...

Just when Han Fei returned to Farm No. 68, the City of Scavengers was partying.

For ordinary people, they only knew that the City of Scavengers occupied two of the top ten places in the 100,000-year competition.

The East Sea Divine Realm was so big, but their City of Scavengers alone occupied two seats. What did this mean? It showed the potential of their City of Scavengers.

What surprised them most was that Ye Fengliu, who rose at the speed of light, had won the first place in the 100,000-year competition and was even stronger than Bai Ranran.

In the city, someone sighed. "I knew that Ye Fengliu was extraordinary. Look, it's only been a short while. He won first place in the 100,000-year competition! It's said that the participants are all peak-level Sea Establishers, with as many as 8 million people. God, how many strong masters there were?"

Someone sighed. "I knew that Ye Fengliu was very powerful when I saw him draw his saber, but I didn't expect him to be so powerful. It's said that he didn't really start drawing his saber until he entered the finals of this hundred-thousand-year competition."

Someone sighed. "I heard that the rewards of the 100,000-year competition are extremely generous. It's said that the reward is more than a million kilometers of resources. Gosh, how many peak-level Sea Establishment Realm cultivators can be produced with such a huge amount of resources? I'm afraid even a Sky Opener doesn't need so many resources!"

Someone said, "I'm told that there are also godly weapons, divine techniques, and a lot of other kinds of rewards. I can almost foresee Ye Fengliu's explosive growth."

Someone said quietly, "Alas! Let me tell you secretly, Bai Ranran has already opened the sky on her way back, and Ye Fengliu seems to be opening the sky in these two days."

...

While the city was celebrating, in Zhao Honghuang's residence in the Law Enforcement Battalion, Pan Litian was sitting opposite Zhao Honghuang, not looking too good.

Pan Litian shouted in a low voice, "That's outrageous! The City of Origin is accusing me of something I didn't do! It was An Taiping who launched a sneak attack on me with some perfected Star Transformation Realm cultivators. They started it. Besides, I did kill two people, but when did I kill An Taiping?"

Zhao Honghuang frowned slightly. "According to my intelligence, An Taiping is indeed dead. Even the seedlings of the City of Origin he brought with him have all disappeared. If those people were in An Taiping's Origin Star, I'm afraid they won't be able to return to the An family for the rest of their lives."

Pan Litian frowned. "It's possible that the people who ambushed you had an internal strife and killed each other... Huh? Maybe..."

"Maybe what?"

Seeing that Pan Litian was hesitating, Zhao Honghuang couldn't help but say, "At this moment, any answer needs to be considered."

Pan Litian paused and said, "When I fought An Taiping and the others, I felt that something was wrong. It was as if someone was spying on me. This feeling didn't disappear until I entered the Chaotic Wasteland. Even when Ye Fengliu wanted to open the sky, I didn't dare to stop. If a Monarch was spying on me, I definitely wouldn't be able to find him! But if it was only a perfected Star Transformation Realm cultivator, who could escape my perception?"

Zhao Honghuang narrowed his eyes slightly and said, "Me!"

Pan Litian suddenly looked at Zhao Honghuang. "Are you saying that an expert as strong as you was spying on me?"

Zhao Honghuang nodded slightly. "It's not impossible. Perhaps the news of An Taiping's death I received is fake. Perhaps it's the City of Wanderers that meddled in it. Perhaps some unknown expert wants to observe the situation in the Chaotic Wasteland. It's hard to say."

Zhao Honghuang said solemnly, "It's a pity that Qi Tonghai was killed as soon as he reached the perfected Star Transformation Realm. Now that An Taiping

and the others have disappeared, we can't prove our innocence. Let's divert the trouble and say that the City of Wanderers is the mastermind... By the way, how did Ye Fengliu grow so fast?"

Pan Litian said, "He must've gotten an opportunity in the wilderness. His knife skills have almost reached perfection, but I don't think he has any ulterior motives. The Gate of Heaven invited him to join them, but he rejected it. Instead, Nezha from the City of Wanderers joined the Gate of Heaven."

After a moment of deliberation, Zhao Honghuang said, "Well, he's about to open the sky, but his identity is different from Bai Ranran's. After he opened the sky and consolidated his foundation, let him go to the Infinite Mining Area! Let Zhang Beihai lead him and see if he can make contributions to the City of Scavengers in the Infinite Mining Area."

Pan Litian asked, "Should we restrain him? For example, extract his soul and essence blood?"

Zhao Honghuang shook his head slightly. "No. Extracting his soul and essence blood will easily make him rebel. But he is not strong enough now. Even if he wants to rebel, he isn't strong enough now. Besides, he needs to rely on the City of Scavengers to give him room to grow. Tell him that if he performs well in the Infinite Mining Area, he can be given the antidote to the Blood Swallowing Pill."

Pan Litian asked, "Really?"

Zhao Honghuang sneered. "No one below the Monarch level can overturn the sky. If this guy performs well, we can send him to that place in the future... When he gets there, no matter how powerful he is, he can only submit obediently."

Pan Litian's heart stirred. Then, he nodded and said, "Okay!"

...

One day later.

Boom!

A purple lightning bolt struck down, and Zhang Daqian was embracing the lightning bolt fearlessly.

Above the Sea of Stars, more than 8,000 people observed Han Fei opening the sky.

At this moment, everyone exclaimed.

Someone was shocked. "This guy is already so powerful after only one trip? He resisted six lightning strikes with his physical strength?"

Someone sighed. "He's too strong! I think this guy can still hold on."

Someone secretly looked at Bai Ranran and said via voice transmission, "I wonder if Captain Bai's tribulation was as terrifying as this one."

Rumble!

Han Fei took another lightning bolt, his body cracked, and Bai Ranran frowned. Under the huge armor, Tian Hong clenched his fists and suddenly said, "I've found the way to open the sky. I can open the sky at any time."

For a moment, even Pan Litian looked at Tian Hong. This guy was also a body refiner and was very strong. Although he didn't make it to the finals, he had entered the top 10,000. He was just not good at attacking. In terms of physique, he might not be much weaker than Ye Fengliu.

Bai Ranran: "Then wait for two days and transcend the tribulation."

"Ahhh!"

At this moment, many people exclaimed. Zhang Daqian turned into a huge beast, spanning dozens of kilometers.

A huge octopus clone swallowed the lightning.

The strong masters of the Ten Thousand Scale Race were all trembling. Strong, too strong! I've never seen anyone swallow lightning tribulation in my life.

In the end, when a lightning field descended, the big octopus was hacked into a human shape. He held a saber in one hand and slashed out. The saber beam shot into the endless sky, cutting apart a huge black shadow.

When the power of the heavenly tribulation dissipated, Zhang Daqian returned from the void. The blood and Qi in his body surged, and his momentum kept rising. He had opened the sky.

Han Fei cupped his hands. “Master Chen Yan, Master Li Tian, I’m glad that I didn’t fail you.”

Chen Yan had mixed feelings. The phantom of the giant beast just now had already taken shape. He and Pan Litian looked at each other. This guy was definitely not transformed from a human.

In their opinion, that human must have been possessed by this octopus. Therefore, he couldn’t be counted as a human at all.

In fact, no one who was watching the tribulation treated Zhang Daqian as a human. If anyone said that the huge beast just now was a human, they would tear off that person’s head!

Pan Litian nodded slightly. “Yes! Not bad! Go consolidate your foundation and cultivate in seclusion for a few years. After you consolidate your foundation, go to the Infinite Mining Area! You can improve quickly there.”

God of Fishing - Chapter 2504 - 2504 Unintentional Shock

The appearance of the Undying Demon Octopus was intentional. At least it could increase their trust in him.

However, to Han Fei’s surprise, Pan Litian actually asked him to go to the Infinite Mining Area. This must be Zhao Honghuang’s idea.

He had heard that many people in the City of Scavengers would go to the Infinite Mining Area to gain experience. Besides, one of the two strong masters in the City of Scavengers was Zhao Honghuang, who presided over the City of Scavengers. The other was Zhang Beihai, who was in the mysterious Infinite Mining Area.

Han Fei had planned to stay in the Chaotic Wasteland to investigate the secrets of this place. Feng Yu had already made it clear that the Ten Thousand Scale Monarch was fake, so there must be a big secret here.

!!

However, on second thought, if he wanted to investigate these secrets, he could do it in the Infinite Mining Area too.

There were Monarchs in the City of Scavengers, but there might not be any Monarchs in the Infinite Mining Area.

And the best way to discover secrets was to hunt a person like Pan Litan and Zhao Honghuang. Ordinary lord-level figures probably didn't know much.

More importantly, it was not easy for him to kill a top ten lords-level powerhouse in the City of Scavengers. They were too close to the main city.

Besides, even if the Ten Thousand Scale Monarch in the City of Scavengers was fake, he was still a real Monarch. If he found that someone among the top ten lords was dead, he would definitely come in an instant. Then how could he fight him?

Han Fei was not in a hurry. He planned to take it slowly. Now was not the time to attack. His strength was not enough.

After Zhang Daqian opened the sky, he didn't go to Mo Qi immediately. Firstly, it was because his relationship with the Time Temple wasn't good, and secondly, it wasn't the right time.

The most suitable time was when he was about to set off for the Infinite Mining Area. At that time, he would go to Mo Qi on the pretext of asking her to tell his fortune. Even Zhao Honghuang wouldn't say anything.

...

On the other side.

Han Fei collected Hong Yue, Yingyue, and the others into his Origin Star and set up a special space for them. Then he accelerated time a hundred times so that they could quickly improve their bloodline. In this way, their upper limit of cultivation and potential could be increased. In addition, he could also create some Sky Opening Realm experts.

As for himself, after thinking for a long time, he didn't choose to go back to see Teacher Beast King and the Raging Sea. He felt that now was still not the time.

Since it was not the right time, he'd better not even look at them. Otherwise, if he triggered something, it wouldn't be good.

However, Han Fei found a random mist ruin and pierced through the ice here under the cover of the mist.

Then he used the Twin Divine Technique to bring the Extreme Cold Pearl to the ice.

Back in the Demon Domain, the Monarch Strike in the Extreme Cold Pearl had been used up and needed to be replenished with the power of extreme cold. Where could it be colder than the ice on the Chaotic Wasteland?

This time, when Han Fei appeared in a place of extreme cold with his white-mist body, he still felt an extremely terrifying coldness sweeping over him.

However, Han Fei was no longer the weak little Sky Opener he used to be.

This time, his white-mist body alone endured more than 50 seconds here. Unfortunately, when he tried to spread out his perception, his perception still couldn't withstand it. Once he released his perception, it would shatter and his soul would be frozen.

Han Fei thought that if he entered with his original body, he could definitely endure more than a hundred seconds, or even two hundred seconds.

Han Fei even guessed that the secrets of the Chaotic Wasteland might be related to the ice layer. This was because it was too cold here. Even though Han Fei was comparable to a perfected Star Transformation Realm cultivator now, he couldn't stay here for long. If it were someone else, the situation might be even worse.

Then, whose domain was above the ice?

Han Fei wondered if this was the domain of a Monarch.

Because there was too much extreme cold power above the ice, the Extreme Cold Pearl recovered very quickly. After only three hundred seconds, the Monarch Strike in the Extreme Cold Pearl had been replenished.

Han Fei felt that if he could fight on the ice, the Extreme Cold Pearl would definitely be a very powerful weapon. It could launch a Monarch strike every

three hundred seconds. How many people below the Monarch level could resist it?

Unfortunately, the time he could last on the ice was too short, and he couldn't release his perception, so his exploration ability was infinitely close to zero, so there was no need to explore.

Therefore, he came back after a short test.

...

Five years later.

In Han Fei's Origin Star.

His Star Core had finally become 8,100 kilometers large again. In fact, it could be bigger, but Han Fei felt that he had to make the Star Core fit the size of his Origin Star.

However, the density this time was different from the previous 8,100 kilometers. Han Fei's Origin Star was a thousand times denser than before.

In Han Fei's eyes, information emerged:

Owner: Han Fei

Level: 108 (Sky Opening·Extreme Dao)

Bloodline Ranking among the Clans in the Infinite Ocean: the 200016th (Evolving: 5831/13064 Years)

Immortal Qi: 660,000

Soul: 14.51 Origins (14,512,567 points)

Perception Range: 14 million kilometers

Strength: 14.51 star powers (14,512,560 waves)

First Spiritual Heritage: Origin Spiritual Heritage

Second Spiritual Heritage: Eternal Darkness Spiritual Heritage

First spiritual beast: Twin Yin-Yang Sky Swallowing Fish (Level 108)

Second spiritual beast: The Emperor Sparrow (Level 103)

Main Art: Void Fishing Level 9, Void Stealing Technique (Monarch-level, Ultra-Quality)

When Han Fei saw this message, he sighed inwardly.

He had already tried very hard not to cultivate the Star Devouring Technique. He never used arrays to accelerate the power absorption of his Origin Star now. In fact, in the past eight years, he had been cultivating the Heavenly Dao visualization technique. However, his physique and strength were still frantically becoming stronger.

Because of the previous soul and power conversion, coupled with the fact that he had been cultivating the Heavenly Dao Visualization Art, on this day, for the first time in his life, Han Fei's strength and soul power were so close, only 7 points apart.

With a thought, Han Fei appeared in the Sea of Stars. At that moment, Han Fei reached out and grabbed, feeling that his strength had increased by 80%.

"Huff~"

Han Fei was slightly shocked. It turned out that when the soul and physique were highly unified, so much power could be snatched from the world.

However, Han Fei still wanted to try the situation where the two values were exactly the same.

Therefore, he took the initiative to transform 3 points of soul into strength and then waited for only half an hour.

Buzz!

When his soul power and strength were completely the same, Han Fei suddenly felt that the power of heaven and earth seemed to be drilling into his body. At that moment, he casually punched out and immediately had an epiphany. His combat power doubled when he completely borrowed the power of the Heavenly Dao.

It was also at the moment when his soul power and physical power were completely the same that Han Fei felt his Star Core tremble. In his Origin Star, he seemed to be able to completely feel every blade of grass and tree on his Origin Star as if he were that grass, tree, river, and world.

At this moment, Han Fei seemed to grasp something. He seemed to see a new power, a new cultivation state. He seemed to have become the world and all things.

However, before he could properly comprehend it, this state instantly disappeared. The reason was that he had been immersed in this state and lost track of time, causing his physical power to be one point more than his soul power.

Immediately, the power that Han Fei could borrow reduced to 80%.

Han Fei didn't know whether to laugh or cry. The Star Devouring Technique was too powerful. It was strengthening him all the time, forcing him to cultivate his soul.

Han Fei didn't turn the extra point of physical power into soul power again. He had already experienced the state just now. It was wonderful and powerful.

There would be plenty of time to feel it in the future.

Looking at his information, he had reached level 108, but unfortunately, limited by his level, Little Black and Little White were also stuck at level 108.

Otherwise, with their star devouring power, their growth would be extremely fast. For them, in the Sky Opening realm, all they needed to do was to eat.

If Little Black and Little White were wild, then if they wanted to devour stars, they would have to search in the vast Sea of Stars.

However, they weren't wild. Up to now, there were still more than a dozen Origin Stars of peak-level late-stage Star Transformation Realm cultivators that hadn't been used.

Because it had returned to the Chaotic Wasteland, the Emperor Sparrow occasionally hunted some ominous creatures, so it had been upgraded by one level. This was not surprising.

In the next few days, Han Fei tried a few more times to enter the state of a complete balance of his soul and strength. It was wonderful. Han Fei even felt that this was the perfect state of cultivation.

Unfortunately, it was really difficult to maintain this state. Since he had practiced the Star Devouring Technique, it was even more difficult for him to maintain this state, which made Han Fei feel it a pity.

Several days later, Han Fei finally discovered the specialness of this state. This absolutely balanced power improved not additional strength, but his basic combat power.

Even a one-point difference would cause an imbalance between the power of the soul and the power of the body. Once the imbalance occurred, it would become purely borrowing power, and the borrowed power was an external force.

However, when Han Fei felt this state many times, he discovered that when the power of the soul and the power of his physique were absolutely the same, the increased strength became his own and became his basic strength.

For example, his current strength was 14.51 Star Powers. Once in this state, it would become 29.02 Star Powers. When he activated the Great Dao with all his strength, it would become 145.1 stars, which had reached the Monarch realm.

This was discovered by him after he accidentally activated his Great Dao in this state.

However, if it wasn't this absolute balance, his basic strength would be 14.51 without any change.

This shocked and amazed Han Fei. He seemed to have found a way to have his strength soar.

God of Fishing - Chapter 2505 - 2505 Ultimate Balance Equals to Demonic Dao

During the five years of Han Fei's seclusion, he came out three times because Yingyue, Jiang Ya, and Wen Ruqing had transcended the heavenly tribulation and opened the sky one after another. They had all been given resources and

weapons by Han Fei, which increased their odds of survival by thirty to forty percent.

There were still three people left. Although they hadn't reached the Sky Opening Realm, they weren't far away. Han Fei estimated that if they cultivated on his Origin Star for another four or five years, they would be able to open the sky.

After all, those who could walk from the human camp to the City of Scavengers were all Heavenly Talents. What they lacked was some resources, some techniques, and a guide.

More than a month after Han Fei came out of seclusion, Eldest Senior Brother sent a message in his mind that the small gathering that would be held once every ten years had begun.

!!

Void Temple.

When Han Fei came, Senior Sister Green Lotus and Senior Sister Red Lotus World warmly greeted him.

Senior Sister Green Lotus said, "Little Junior Brother, I heard that you even eclipsed Little Eleven in the limelight when you participated in the so-called 100,000-year competition?"

Senior Sister Red Lotus also said, "I heard that you can be ranked on the God Roll of the Sky Opening realm now? That's great. Little Junior Brother, how long has it been since you opened the sky? If you're given another five hundred years, won't you be able to prove Dao?"

Han Fei smiled modestly. "Senior Sisters, Senior Sister Feng Yu is going to prove Dao in less than a thousand years. I'm just lucky. Otherwise, I wouldn't have been able to improve so quickly."

At this time, Fifth Senior Brother came. He laughed and said, "Alas! Young people nowadays are too modest. Little Junior Brother, I heard that you asked Fourth Brother to help you? How do you feel?"

Han Fei sighed. "Strong, ridiculously strong."

Han Fei wasn't bragging. Senior Brother Azure Dragon took him to the Gate of Heaven and even rushed in to fight the old monster of the Heavenly Race. Unfortunately, he didn't see the details of that battle, but it couldn't be simple.

While Han Fei was talking, Feng Yu appeared.

As soon as Feng Yu appeared, everyone focused their gazes on her. After all, she was about to transcend the tribulation.

Before they could ask anything, Senior Brother Six God, Senior Brother Lei Heng, Senior Sister Shen Le, and Senior Brother Undead arrived almost at the same time. But this time, Senior Brother Azure Dragon didn't come.

Han Fei estimated that the crisis of the black dragon had just been resolved. Perhaps Senior Brother Azure Dragon had something to do and couldn't leave.

When Senior Sister Shen Le saw Feng Yu, she immediately said, "Eleven, when will you prove Dao?"

Feng Yu said, "Senior Sister Shen Le, it should be in ten years."

Han Fei was also a little surprised. So fast? She had just obtained an Origin Ground, right?

However, this seemed to be normal. From the looks of it, there were many things that could accelerate time. Besides, Feng Yu was talented in the first place, so she should be able to prove Dao very soon.

"Alright, Azure Dragon and Dark Shadow are not coming. Let's begin!"

This time, it was another lecture for Feng Yu. But this time, Han Fei had some understanding.

Eldest Senior Brother seemed to be talking about the usage of the law of the heavens, but unfortunately, this was targeted at Feng Yu who was about to prove Dao, so Han Fei didn't hear it clearly. He only vaguely felt that it seemed to be related to the absorption of the rules of the Heavenly Dao in the Origin Ground.

If it were before, he wouldn't even know what Eldest Senior Brother had said, but now he could at least understand some of it.

It was a small gathering. If there was nothing special, they would gather for a while and then disperse.

However, Han Fei had a lot of things to do now.

As soon as the Eldest Senior Brother finished his class, Han Fei quickly asked, "Senior Brothers and Senior Sisters, there's something I don't understand. I would like to ask for your advice."

Fifth Senior Brother laughed and said, "Little Junior Brother, what are you waiting for? Just tell us."

Without hiding anything, Han Fei said, "Senior Brothers and Senior Sisters, I want to know, when the power of the soul and the power of the physique are completely the same, which is the extreme balance, is this a brand-new power? My soul power soared by chance. Recently, there happened to be an extremely short period of extreme balance between the power of the soul and the power of the physique. As a result, I attracted the power of the heavens and the earth, but after the enhancement, my basic strength doubled. Unfortunately, this state only lasted for a few hours before it disappeared... I have many questions. I wonder if this is the enhancement of the power of the heavens and the earth, or if the power of the heavens and the earth has given birth to some new power?"

"Huh ~"

At this moment, the senior brothers and sisters were all a little surprised.

Feng Yu exclaimed, "You said that the power of your soul and the power of your body are the same? Is there really an extreme balance?"

Han Fei felt that the term extreme balance might be incorrect, because he felt that it was a new power.

This time, Fifth Senior Brother said, "Little Junior Brother, after you reach that state, do you feel uncomfortable? Or do you have a strong desire to maintain this state?"

Han Fei shook his head. "No!"

"No?"

Fifth Senior Brother fell silent, but Senior Sister Shen Le immediately added, "In the end, this is still the Dao of Extreme Balance. Because the power of the body and the soul present a perfect ratio, the soul and the physique form a short-term fusion. To you, it's like your power suddenly eating the power of heaven and earth, so you will find that your basic power suddenly becomes stronger. But..."

"But what?"

Senior Sister Shen Le suddenly said, "I told you about the Dao of Extreme Balance before because very few people can really achieve this state. Without a specific cultivation method, it's very difficult to completely balance the two. This kind of unintentional extreme balance usually doesn't mean much, because once it's not extreme balance, you won't be able to feel this power. However, there's a certain type of person who created a way to forcibly fuse their soul and body..."

Han Fei's eyes glittered. "Someone created such a path of cultivation?"

Senior Sister Shen Le said, "Little Junior Brother, don't be happy too early. Just now, Old Five asked you if you felt anything wrong with your body or if you had any special desires. That's because those who embark on this path of cultivation have basically all embarked on the Demonic Dao."

"Demonic Dao?"

Han Fei was shocked and asked in surprise, "Why?"

Senior Sister Shen Le: "The cultivation process of the human body is monotonous. As for the soul and the physique, you can understand them as two completely different powers. Logically speaking, you need two cultivation techniques to operate the two powers. If you operate two completely different cultivation techniques simultaneously in the same spiritual heritage system in your body, the first result will be conflict. Only by forcibly smoothing out this conflict can you achieve an extreme balance. But in fact, since conflicts exist, how can they be forcibly smoothed out? Therefore, if you keep walking this path, there will always be conflicts in your body. These conflicts give birth to many unknown outcomes..."

"What kind of unknown result?"

This time, it was Feng Yu who asked. Lei Heng and Senior Brother Six God couldn't help but look at Senior Sister Shen Le too. They seemed to have heard of this, but they didn't know much about it.

Senior Sister Shen Le continued, "For example, some cultivators have physical changes because they take this path. Because their bodies need to adapt to this conflict, they have to change and become unrecognizable. Some cultivators can barely maintain an extreme balance, but due to the conflicts, they have too many hidden injuries all over their bodies and will never be able to prove Dao for the rest of their lives. Furthermore, their lifespans are far shorter than ordinary cultivators. Most of them have such situations. Some people's temperaments have changed drastically because of these conflicts. As their souls mutate time and time again, some unknown mutation occurs in their consciousness, causing them to become temperamental..."

"In short, because there are too many changes on this path, most people who embark on this path either die in advance, forcibly cultivate until their bodies explode, completely lose their humanity, or have their bodies mutate... Therefore, this path is called a Demonic Dao. As long as you are not in this extreme balance, you will be fine."

This was the first time Han Fei knew that behind the Dao of Extreme Balance was actually a Demonic Dao. At the same time, it refreshed Han Fei's understanding of the Demonic Dao.

However, what Senior Sister Shen Le mentioned was the conflict between the soul and the physique. The cause of the conflict was that most people only had one spiritual heritage but carried out two completely different cultivations at the same time.

But he happened to have two Spiritual Heritages! Before, Han Fei had never felt that the Origin Spiritual Heritage and Eternal Darkness Spiritual Heritage had any use. It seemed that they could only make him recover faster, cultivate faster, and have better cultivation effects. But now it seemed that maybe the heavens had opened another cultivation path for him.

Han Fei naturally didn't say this out loud, but he raised a question. "Senior Sister Shen Le, is there a race or something in this world that has double spiritual heritages? If they have double spiritual heritages, wouldn't there be no conflict?"

Senior Sister Shen Le: “Little Junior Brother, what do you think spiritual heritage is?”

“Uh ~”

Han Fei was stumped. He had never thought of this question.

He couldn’t help but ask, “Isn’t Spiritual Heritage just meridians?”

Suddenly, Senior Brother Undead said, “Little Junior Brother, I don’t have meridians, but I do have spiritual heritage.”

Han Fei: “...”

Senior Sister Shen Le: “Actually, Spiritual Heritage is like the Dao Patterns of Heaven and Earth, a unique pattern bestowed by the heavens and earth. These patterns are usually hidden in the meridians, but they aren’t meridians. If you lose your meridians, they’re still there. They’re like an array carved in advance. The essential difference between mortal spiritual heritage, heavenly spiritual heritage, or divine spiritual heritage is some slight changes in the structure of this kind of array. Such changes will also happen as your strength grows, changes, and your realm improves. It’s difficult to understand. Therefore, dual Spiritual Heritage can exist, but it will only be born under extremely special circumstances. For example, twins.”

“Huh?”

As soon as she said this, everyone looked at Senior Sister Red Lotus and Senior Sister Green Lotus.

Senior Sister Red Lotus said, “Alas! You got us. However, twins have independent consciousnesses. We have to cooperate with each other to cultivate this Dao together.”

God of Fishing - Chapter 2506 - 2506 Energy With No Outlet

Han Fei was quite shocked when he came out of the Void Temple. It turned out that Senior Sister Green Lotus and Senior Sister Red Lotus walked the Dao of Extreme Balance, or to be exact, a Demonic Dao.

However, because they met these cultivation conditions, they could embark on this path. Ordinary people would have a very small probability of survival on this path and might easily fall into the demonic Dao.

However, Han Fei was a little excited. In this world, in addition to twins, there were also people with two spiritual heritages like him. Others might not be able to embark on this path, but he could!

But the problem was that he had already cultivated the Supreme God Technique. God!

!!

However, he couldn't be sure if this would work. Besides, he didn't have a cultivation method for the Dao of Extreme Balance.

However, he immediately thought of the old turtle.

Although the old turtle was weak and had been sleeping for a long time, don't forget that the old turtle was essentially a demon, a ferocious demon.

Then, did it mean that there might be a cultivation path for the Dao of Extreme Balance in the Godfiend Sea?

Han Fei licked the corner of his mouth. To go to the Infinite Mining Area, he needed to cross the Godfiend Sea. Perhaps he could make a trip to the Godfiend Sea and find the old turtle's original body.

However, he couldn't rush this matter. He still had a long way to go on the path of the Sky Opening Realm. He had to take this path well first.

It was his top priority! Han Fei felt that it was time for him to consult the God of War.

...

Above the Sea of Stars.

The altar was placed, and a curtain of fire rose.

The God of War immediately sent a message. Boy, you haven't been here for a long time! Years have passed, and you haven't offered any sacrifices.

Han Fei responded. “Too many people are chasing me. I’ve been running and didn’t dare to show up.”

Han Fei thought to himself, As for the resources in my hands, Little Black and Little White want to eat, I need to use them to practice the Star Devouring Technique, and also need to use those Origin Stars to condense vitality. They are barely enough for me. How can I give you a share?

As for the God of War, he didn’t doubt it at all. When Han Fei was in the Divine Capital Dynasty, he had killed a lot of people. It was almost a matter of course for him to escape In the past few years.

Han Fei said, “Senior God of War, my Star Core has been big enough recently and has returned to its original size. I feel that I’ve reached the limit of the late-stage of the Star Transformation Realm. I should be able to start compressing it and advance to the perfected Star Transformation Realm. But according to the Star Devouring Technique, in addition to devouring stars, I should refine a Star Core Seed and turn it for my own use. Also, in the specific technique, it seems to be mentioned that I have to envelop my Origin Star. What does this mean?”

God of War: “It means what it means on the surface! Let me ask you, what is the Origin Star?”

Han Fei said, “It’s the foundation of a cultivator’s cultivation. It carries his path of cultivation, his Great Dao.”

The God of War continued, “And the law of the heavens and earth. Every Origin Star is a place where the laws of the heavens and earth gather. The growth of your plants and the convergence of resources are in line with the laws of the world. It’s just that you don’t need to understand it for the time being. Break these Origin Stars and envelop your Origin Star, expanding and absorbing layer by layer. To the outside world, your Origin Star seems to be a dead star, but in fact, inside this dead star is where your true Origin Star is. This can prevent others from discovering your Origin Star through the Sea of Stars, conceal your strength, and allow you to grow rapidly. The only thing you have to do is to kill.”

Han Fei: “...”

Han Fei was lost for words. It was easier said than done. To shatter others' Origin Stars, envelop my own Origin Star, and use them as nutrients? Han Fei felt that this was the Demonic Dao!

But Han Fei wasn't surprised, because it was already mentioned in the Star Devouring Technique.

Han Fei couldn't help but ask again, "Senior God of War, I understand now. Will it be even more than now? I'm referring to my Star Core's demand for energy."

Han Fei discovered that since he began to practice the Star Devouring Technique, the compression of the Star Core couldn't be stopped. He needed to compress it continuously because the Star Devouring Technique had swallowed too much energy from Star Core Seeds. The Star Core Seeds were equivalent to others' Dao Seeds, which were absorbed into his own Star Core and constantly obliterated and devoured. However, the huge energy contained in the Star Core Seed was very violent and had to be suppressed with external forces. Otherwise, it inevitably expanded. When it expanded to a certain level, his Origin Star would explode.

As the Star Core was continuously compressed, the density of the Star Core would only increase, and his spiritual heritage, together with his Origin Star and the ground veins, would have more nourishment power.

God of War: "That's right! Weren't you quite powerful before? You quickly compressed your Star Core a thousand times. Then it'll be simple for you. When you reach the peak-level late-stage Star Transformation Realm, try compressing your Star Core another thousand times."

Han Fei couldn't have felt worse. Do you want my Star Core to explode?

Seeing that Han Fei didn't reply for a long time, the God of War sent another message. "Have you disassembled spiritual energy? Have you compressed spiritual energy? Have you refined a Great Dao Crystal? Perhaps you think your Star Core is already quite sturdy and condensed. However, slowly peel off some useless ones and condense the remaining useful ones.

Han Fei wasn't too surprised. He just replied, "Senior God of War, I've always been puzzled. If it's just a simple compression of the Star Core, I don't think no one else has thought of it, right?"

The God of War's words made Han Fei understand the way to compress his Star Core again. This was indeed feasible. However, if he compressed it a thousand times more, it was still a little short of turning it into a Great Dao crystal.

Han Fei had refined Great Dao crystals. With the current state of his Star Core, even if it was compressed ten thousand times, it might not necessarily become a large mass of Great Dao crystals.

He just felt that this kind of operation didn't require much skill.

The God of War said, "Yes! Too many people have thought of this method. However, who would keep crazily compressing the Star Core? Don't tell me you have never worried that it may explode when you can't compress it anymore?"

Han Fei said, "Yes! I have! What if I can't compress it anymore?"

God of War: "Just wait for it to blow up. What else can you do? Others don't dare to take this path because they know that once they take it, they'll be dead meat. There's no room for maneuver. So although this path seems simple, few people dare to take it."

Han Fei: "..."

Han Fei was speechless. I'm here to ask questions, and this is your attitude?

Before Han Fei retorted, the God of War suddenly said, "OK, no kidding. Have you forgotten that when you condensed your Star Core, the Star Core contained many Great Daos? And have you forgotten the characteristics of the Star Devouring Technique? Star Devouring can devour the Dao of others. By borrowing the power of others, the power of the Heavenly Dao, the power of all things, and the myriad laws, you can help yourself cultivate. On the surface, the Star Devouring Technique requires you to continuously compress the Star Core. In fact, when you compress it to a certain level, you will find that what you compress into is infinite Great Daos."

Suddenly, Han Fei was shocked. "The Star Core of an ordinary person should be able to give birth to a Great Dao too, right?"

The God of War responded. "It's different. A Star Core containing a single Dao is completely different from your Star Core that contains countless Daos."

Han Fei wanted to ask what other bigger surprises there were, but the God of War didn't say anything, so Han Fei had no choice. Anyway, he already knew the answer he wanted to know. He had confirmed that this path would continue as he thought.

...

On his Origin Star, Han Fei had a total of 13 remnant bodies, representing 13 Origin Stars.

Among them, there was one of Zhao Qinglong, one of An Taiping, and two of the experts behind Shui Dongze. These four people were all super strong masters in the perfected Star Transformation Realm.

As for the other eight bodies, they were left behind by the peak-level late-stage Star Transformation Realm experts he had killed in the Divine Capital Dynasty. This time, Han Fei wanted to refine these stars into Star Core Seeds before shattering them one by one. Then, he would wrap his Origin Star with them and break through to the peak-level late-stage Star Transformation Realm in one go.

In the Sea of Stars, on an unknown star.

Because he didn't dare to completely detonate the Star Core, Han Fei could only bombard it with punches. If others saw this, they would be horrified. In the distant starry sky, someone waved a golden fist mark, broke through the starry sky, and smashed half of the star with a punch. As a round of golden fist marks rumbled past, this star had been shattered, and only the Star Core was scorching hot as the Great Dao poured down.

After only a few days, this star was broken by Han Fei and brought back to his Origin Star.

...

In the six hundredth year that Hong Yue and the others cultivated in Han Fei's Origin Star, the sixth year in the outside world, they clearly felt different.

On this day, Jiang Liuyu, Chu Lingyu, and Ling Ran, who had been cultivating in seclusion, were breathing heavily almost at the same time. They even seemed to have gained some weight.

Suddenly, Yingyue said, “Master Hong Yue, for some reason, recently, the source sea of the Human Emperor is getting more and more full of energy. It’s so full that even if I don’t absorb it, it will take the initiative to drill into my body.”

Wen Ruqing nodded. “Yes! I feel so too. If this goes on, I think it won’t be long before I explode.”

Hong Yue also nodded and said, “There are also Dao runes. I feel that some mysterious power is voluntarily entering my body.”

“Ahhh~”

Suddenly, Jiang Liuyu cried out and opened her eyes. “Master Human Emperor, I’m going to transcend the tribulation.”

Almost at the same time, Chu Lingyu and Ling Ran opened their eyes at the same time. “Master Human Emperor, we are going to transcend the tribulation too.”

As for Han Fei, he had been extremely busy in the past six months. This was because when he refined five Star Core Seeds in a row and fused them into his Star Core, he felt that he was about to explode.

Fortunately, his Dao Seed was quite stable. He firmly sucked the Star Core Seeds to his side, and infinite energy kept the Star Cores from exploding.

At the same time, he had Little Black and Little White continue to polish and compress his Star Core.

But even so, Han Fei still felt that the compressed power couldn’t suppress the energy riot of the Star Core. In the past six months, Han Fei didn’t dare to shatter other people’s Origin Stars and bring them back.

At this moment, hearing that Chu Lingyu and the other two were going to transcend the tribulation at the same time, Han Fei had a bad feeling. He forgot that they were still cultivating on his Origin Star. Under such violent energy, their growth speed had soared. If they stayed any longer, they would probably explode and die!

Swish ~

In the next second, Han Fei appeared in front of them and grabbed them out, immediately bringing them to the Sea of Stars.

Han Fei said, “Transcend your tribulations, transcend your tribulations together here.”

God of Fishing - Chapter 2507 - 2507 Prologue to the Rise

As it turned out, with the guidance of a strong master, the success rate of the tribulation transcending was shockingly high.

In the past, Han Fei’s clones, his Companion Spirits, and his contractual spiritual beasts had all successfully transcended the tribulation because of their talent, foundation, and strength.

But now, when Han Fei guided outsiders to transcend the tribulation, they also succeeded. Han Fei immediately understood why there were so many Sky Opening Realm powerhouses in the Sea Realm.

As long as your family background was slightly better, you had a Sky Opener to guide you, and your foundation wasn’t too bad, your success rate of transcending the tribulation might be at least above 50%.

!!

This success rate was already terrifyingly high. It meant that if the conditions were right, in ten million people, five million people would be able to open the sky.

It was this discovery that made Han Fei realize that there was a big problem in the Chaotic Wasteland. There were actually many Sea Establishment Realm powerhouses in the City of Scavengers, amounting to more than 30,000. With this foundation of the City of Scavengers, coupled with the protection of a Monarch, even if there were only 30,000 Sea Establishers, they could at least nurture nearly 20,000 Sky Opening Realm powerhouses.

So, where were they?

At this moment, although Chu Lingyu and the other two had successfully transcended the tribulation, Han Fei frowned. He still didn’t know anything about the Chaotic Wasteland.

He suddenly understood why the City of Wanderers could rise so quickly. Now that he thought about it, maybe they didn't rise quickly, but they should have risen so quickly in the first place.

As for the City of Scavengers and the City of Origin, there was no reason for them to stagnate and wait for the rise of the City of Wanderers. Their new blood should be much stronger than the City of Wanderers.

However, why didn't these people who had been refined by him into puppets know? He hadn't learned any secrets about the Chaotic Wasteland from their memories.

Logically speaking, since he had discovered the problem now, these natives should have discovered the problem earlier! No matter how perfect this lie was, they weren't fools.

Suddenly, Han Fei said, "Yingyue, come here."

"Master Human Emperor."

The girls immediately came to Han Fei respectfully. This was the god in their hearts.

Han Fei said, "I have something to ask you. When you were in the City of Scavengers, did you notice that the Ten Thousand Scale Race lost a lot of Sea Establishers?"

When Han Fei asked this question, Yingyue immediately gave a clear response. "Master Human Emperor, yes, there are a lot. Because it's relatively easy for Venerables to advance to the Sea Establishment realm, the City of Scavengers usually sends Sea Establishers to four places. One is the graveyard battlefield, one is the Revival Trial Field, one is the Infinite Mining Area, and the other is the wasteland exploration. Among them, the death rate in the graveyard within a hundred years is as high as 30%, which is even higher in the Revival Trial Field. In order to nurture elites, the death rate may be as high as 50%. The Sea Establishers sent to the Infinite Mining Area are said to be only half of the city's regular Sea Establishers, but we don't know the exact number. And most scavengers are not from the Ten Thousand Scale Race. The death rate in a hundred years is about 30%."

"Huff~"

Han Fei's eyes lit up. Sure enough, there was a problem. Putting aside how to send Sea Establishers to the Infinite Mining Area, the mortality rate was too high. Assuming that the mortality rate wasn't that high, the number of Sea Establishers in the City of Scavengers might suddenly increase by many times. This was because the probability of death was calculated by a hundred years.

Plus the powerhouses sent to the Infinite Mining Area every hundred years, God knew how much strength the City of Scavengers hid.

Wait, perhaps it wasn't that they were hiding their strength, but that most ordinary people were kept from the truth. Any Sea Establiher who learned of this would be taken away or even leave the City of Scavengers forever.

This was the reason why the City of Scavengers looked so weak.

Han Fei nodded slightly. Did Gu Tingnan understand this? Han Fei guessed that as a Monarch, he must have found out about the secret behind this.

Besides, the City of Wanderers had existed for tens of thousands of years. Why were there so few strong masters?

Could it be that Gu Tingnan was also involved?

However, Gu Tingnan's current realm shouldn't be high, right? What right did he have to participate in such a secret matter? Unless he was certain that the secrets of the Chaotic Wasteland wouldn't threaten him and the City of Wanderers.

All in all, Han Fei was now certain that Gu Tingnan must have known that something was wrong. But Han Fei didn't think that Gu Tingnan would risk the lives of so many people in the City of Wanderers, and he had already told him that the Ten Thousand Scale Monarch was fake. If there was really a big problem, he would have reacted long ago.

However, he had no reaction in the past few years.

Since they weren't worried, what was he worried about? With his current strength, he wasn't qualified to get involved in these things yet.

Han Fei asked, "Do you know if there are many humans in the so-called Revival Trial Field?"

Yingyue shook her head. "There aren't many human beings. We've only seen about a hundred thousand human trial-takers in the past thousands of years! They're far less than people of the Ten Thousand Scale Race and other subsidiary races."

Han Fei asked, "Are you so sure?"

Yingyue nodded. "Master Human Emperor, as you know, the humans under the jurisdiction of the City of Scavengers can't even easily reach the Sea Establishment Realm, and there are even fewer people who can reach the City of Scavengers. Because there are few people, we often participate in the trial together and return together. Because of the unity of the human race, the probability of our deaths is relatively low, only about 20%."

Hearing this, Han Fei's eyes lit up. "You said you were acting together?"

Yingyue nodded. "We were once separated and sent to take trials with the people of the Ten Thousand Scale Race. In the end, because the Ten Thousand Scale Race and its affiliated races were hostile to the human race, our probability of death was too high, even as high as 80%. Therefore, in order to prevent these people from wantonly slaughtering the human race, we took action together."

Han Fei's eyes flashed. "Where is the Revival Trial Field you were in?"

Yingyue realized Han Fei's purpose, but then her eyes dimmed and she shook her head awkwardly. "We trial-takers can't find a trial field. We were directly teleported to trial fields, or directly went there from the Origin Sea of a Sky Opener."

Han Fei's lips curled into a cold smile. Having seen the boundless wilderness, the Chaotic Wasteland seemed to be only so big now. How could it be difficult to find the trial fields?

Before Han Fei could speak, Yingyue added, "Master Human Emperor, although we have been cultivating these years, we have secretly visited some villages and found some seedlings, but the number is not very large."

Han Fei frowned slightly, but then asked, "How many?"

Hong Yue hurriedly said, "There are a total of 802 people, all of whom are very forbearing and have great potential. It wasn't easy for us to find them over the years. Unfortunately, there are too few of them."

Han Fei's heart stirred. After so many years, they had only found a total of 802 people. It seemed that they were a group of good seedlings.

Han Fei said, "Hong Yue, can you take them away now?"

Hong Yue nodded. "I've arranged a retreat for them. They can be taken away at any time."

Han Fei nodded. "Then take them away. You'll handle this matter personally. Yingyue and the others, enter my Origin Sea. Let's go to the human race's Revival Trial Field."

"Huh?"

Seeing that Yingyue and the others were looking at him in shock, Han Fei said casually, "It's just a trial field. If I can't find it, how can I be called the Human Emperor?"

While the others were stunned, Hong Yue's eyes lit up. He had long guessed that Han Fei was unwilling to lay low. However, he had never known when Han Fei would take action.

However, it seemed that Han Fei had already begun to boldly gather human beings. This was a signal, indicating that Han Fei was prepared for the upcoming battle.

Hong Yue accepted the order and hurriedly said, "Master Human Emperor, I can bring them all back in half a month."

Han Fei nodded slightly. It was time to nurture a batch of strong masters in large numbers. With the resources he had, it shouldn't be a problem to nurture nearly a hundred Sky Openers.

The rise of the human race required some strong masters to lead the way. These people didn't need to become very strong all of a sudden. It was fine as long as there were many people in the Sky Opening realm. Even if they had just entered the Sky Opening realm, they were still in the Sky Opening realm.

Even a perfected Star Transformation Realm cultivator couldn't withstand the siege of thousands of early-stage Sky Opening Realm powerhouses.

No matter what secrets there were in the Chaotic Wasteland, Han Fei didn't intend to use the human race as cannon fodder. What the human race needed to do now was to lay low and accumulate strength.

...

Half a month later.

Han Fei crossed a very far distance. This place was not close to the three main cities or the graveyard battlefield. Here, hidden in glacier and fog, this was actually a very secret Revived Place. It seemed that the nature of this Revived Place was not inferior to the No. 3 Revived Place they had experienced back then.

Outside the Revived Place, there were seven Sky Openers guarding it. Almost every few days, hundreds of Sea Establishers would appear here through a large teleportation array.

At this moment, a group of strong masters from the Ten Thousand Scale Race and the Blade Clan, a total of more than 800 people, appeared outside the Revived Place.

The leader of the team was a Ten Thousand Scale Race cultivator who had just opened the sky.

He said to the Sky Opener guarding here, "I heard that recently, the resources in the Soldier Realm have been over harvested?"

The guardians of the Sky Opening realm sighed slightly. "What can we do? Groups of people came one after another and fought one round after another. Only the Soldiers in the Soldier Realm have the technique to be reborn. Otherwise, the Soldier Realm would have been abandoned long ago."

Another person said, "Just tell the higher-ups not to send soldiers wave after wave to the Soldier Realm. Eighty percent of this place has already been explored. It can no longer withstand several large-scale trials."

"The Soldier Realm?"

Upon hearing this, Han Fei turned into a black fog and quietly attached to one of these trial-takers.

Although he could kill these Sky Openers in an instant, it was unnecessary. It would only alert the enemy instead. Since this was a large cultivation ground... Hehe...

God of Fishing - Chapter 2508 - 2508 Ancient Ruins

Half a day later.

While all the trial-takers were carrying out the trial, Han Fei had already quietly strolled casually in this so-called "Soldier Realm".

Anyway, no one here had a higher realm than him. Even if their realm was higher than his, they wouldn't be able to discover him.

Han Fei scanned around with his perception and immediately discovered that a thin native of the Blade Clan had appeared.

!!

Swish!

Han Fei stepped in front of this creature. This creature's head was relatively small, its facial features were sword-shaped, one arm grew into a long sword, and the other arm was normal.

In Han Fei's eyes, information emerged:

<Name > Speed Reincarnation Soldier

<Introduction > This is a low-intelligent race created by humans. They are reincarnated soldiers who only know how to fight and kill enemies. They are born with a sword body and can unleash the ultimate power of a sword at any time. The speed-type reincarnated soldiers are very fast and have a speed that is one level or more higher than their own realm. It's best not to get close to them, or you will be easily pierced by them.

<Level > 98

<Realm > Sea Establishment

<Great Dao> Rebirth

<Battle Technique> Sword Shadow, Extreme Explosion Piercing, Shadowing.

<Collectible > Sword Arm

<Absorbable >

<Note > A weapon no better than a puppet.

Swish ~

This Reincarnation Soldier was taken aback. When it came back to its senses, it immediately tried to stab Han Fei. Its speed was indeed very fast. It was probably in the peak-level Sea Establishment Realm.

Han Fei didn't dodge but let the Reincarnation Soldier stab his chest. He felt that this soldier's strength was far inferior to that of a sword cultivator, but it was not bad.

However, in the next moment, Han Fei felt an instant burst of sword Dao. This time, it was comparable to a blow from a peak-level Sea Establisher, and a relatively powerful one.

Because this Reincarnation Soldier had the power of rebirth, Han Fei extended his hand and pointed, and this Reincarnation Soldier was immediately pierced and minced.

But then, Han Fei saw an unknown substance that looked like a ghost fire appear in the void. The information showed that it was a Speed Reincarnation Soldier that was being reborn.

The Reincarnation Soldier had died, but his body could instantly recombine all the scattered body and soul fragments.

The Reincarnation Soldier that was floating like a sword looked rather stupid, but it had to run as soon as it realized that it couldn't beat Han Fei. As it ran, it exerted its extraordinary speed, which seemed to be 30% faster than its full form.

How could a mere Sea Establishment Realm Reincarnation Soldier outrun Han Fei? After he ran for about ten seconds, the sword shadow-like Reincarnation Soldier seemed to be full of power and suddenly burst out a ball

of light. Then Han Fei discovered that this thing actually came to life, exactly the same as before.

This time, Han Fei attacked again without hesitation and killed it from a distance. This time, there were no sword shadows left, and the Reincarnation Soldier died.

“He can be reborn, but the sword shadow can be shattered. In other words, if the sword shadow is shattered, he probably won’t be able to be reborn.”

After a while, Han Fei found another Reincarnation Soldier to test it out. Just as he expected, the sword shadow might be their fast way of rebirth. Even if their soul was shattered, they could be reborn. But they only had one chance.

After learning more about the Reincarnation Soldiers in the Soldier Realm, Han Fei didn’t hunt or look for anyone, but wandered in the Soldier Realm.

He strolled for about three days. During this period, he encountered less than a hundred humans and nearly ten thousand people of the Ten Thousand Scale Race and other races.

Apart from this, he encountered hundreds of ruins. He went in to explore these ruins and found that this primitive graveyard was actually a place to cultivate puppets in ancient times.

There were many kinds of Reincarnation Soldiers. Some were speed-type, some were strength-type, some were soul-type, some were combat-type, some were strengthening-type, and some were healing-type. There were quite a lot of them.

As for the City of Scavengers, they used this place to conduct trials for Sea Establishers. The effect was remarkable, because compared to Sea Establishers, Reincarnation Soldiers were very strong.

In addition to gaining combat experience, the Soldier Realm could also help the trial-takers comprehend various kinds of fighting intent.

However, the above two points were not the fundamental reason why many people led teams to participate in the armor trials. What was most attractive here was the ruins.

There was information indicating that there were still ruins here that hadn't been excavated. There were also powerful Reincarnation Soldiers that hadn't appeared.

Han Fei casually killed two strong masters of the Ten Thousand Scale Race. After reading their memories, he found that in the ruins here, there were especially many weapons to be unearthed. In addition to weapons, there were puppets, the kind of puppets that could be controlled as long as they were refined.

For the Sky Opening Realm powerhouses, this was nothing, but for Sea Establishers, this could be a trump card. If caught off guard, even Sky Openers might be killed.

Apart from weapons and puppets, there might be some other treasures in the ruins.

Immediately, Han Fei had an idea.

...

Half a month later.

Somewhere in the Soldier Realm, there was an inexplicable turbulence. Then, a mist spread out from here, and soon it covered nearly a million kilometers.

This phenomenon immediately attracted countless Sea Establishers in the Soldier Realm. They thought that someone had touched the ruins and triggered the appearance of a super-large-scale ruin.

Almost in two days, more than 30,000 people had gathered here. Among them, there were as many as 20,000 strong masters of the Ten Thousand Scale Race, 10,000 from other races, and only about 50 human beings had come.

With more than 30,000 people here, the trial-takers spontaneously formed a thousand teams to explore the fog together.

Xu Meng, a pure human being, served as the captain of a five-person team and took on exploration missions. As the saying went, wealth came from danger. If he wanted to obtain the resources in the ruins, he had to risk his life.

Traveling with Xu Meng's team were five teams led by the Ten Thousand Scale Race, and the Blade Clan, like the human race, played supporting roles.

At this moment, three men and a woman followed Xu Meng closely.

As soon as the teams entered, they encountered a sword killing array.

"Pu! Pu! Pu!"

Before the five squads responded, hundreds of swords swept across three of the squads.

After only one sweep of the sword light, three people from each of the three teams had died.

Everybody was panicked, including Xu Meng and the other uninjured squad, because one of the array foundations in the place where they were was broken.

Everyone was horrified, and Xu Meng roared, "Break this array foundation with me, all the way to the two sides."

Swish! Swish! Swish!

Bang! Bang! Bang!

In the blink of an eye, when three array foundations were shattered, no sword light appeared here anymore. Instantly, everyone gasped.

It was just an ordinary killing array, but it almost destroyed three teams in one clash. Who the f*ck could withstand it?

At this moment, there was an intact Ten Thousand Scale Race squad, two remnant squads of the Ten Thousand Scale Race, and a remnant squad of the Blade Clan.

The powerhouses of the Ten Thousand Scale Race seemed to communicate with each other, and the four teams immediately gathered together and became eleven people. One of the captains of the Ten Thousand Scale Race said, "Xu Meng, you go in front."

Xu Meng frowned. "Don't forget who saved you just now."

“Humph! You call that saving us? You’re the closest to the damaged array foundation. Did you pretend not to see it? I told you to lead the charge. Don’t you hear me?”

Behind Xu Meng, a man immediately said angrily, “Who would have foreseen this ancient killing array? This is the first time we’ve been here. Yang Wan, don’t slander us.”

Yang Wan, the captain of the Ten Thousand Scale Race, said coldly, “I’ll say it one last time. You lead the charge. Do you hear me?”

Xu Meng hurriedly stopped the people behind him and took a deep look at Yang Wan. “Don’t be angry. Nine of their people died at once. They’ve teamed up now and want us to be cannon fodder. Let’s walk in front. If there’s a chance, shake them off.”

However, after walking only dozens of kilometers, a stream of swords suddenly appeared and cut off Xu Meng’s shoulder. The speed was too fast for him to react.

“Captain.”

“Not good, retreat!”

“Don’t move yet. Look, what is this?”

Xu Meng and the others retreated quickly, but the white mist here seemed to be dispersed by this sword light. Immediately, they saw a shocking sword mark spanning the north and south. This sword mark spanned an unknown distance. Yang Wan and the others were behind, but when they saw Xu Meng suddenly lose an arm, they couldn’t help but swallow.

Fortunately, they had the human race as cannon fodder. Otherwise, they would have been killed.

Xu Meng shouted, “It’s a sword mark. The abyss on the ground is a sword mark. It’s too long to see the end.”

Seeing this sword abyss, Xu Meng, Yang Wan, and the others all took a deep breath. These sword runes from ancient times could easily kill a Sea Establisher. How terrifying was this powerhouse?

Clang!

While Xu Meng and the others retreated, several more sword streams stabbed at them, but they were all blocked by Xu Meng and the others who were already prepared.

Seeing this scene, the eyes of Yang Wan lit up. He said, "After all, it has been too long. The sword runes might have been very strong back then, but now, it's enough for us to contend with it. It seems that we have a chance to enter this ruin."

Then, Xu Meng and the others saw more and more sword marks appear on the ground. They searched for survival at the verge of death. Several times, Xu Meng's team was pierced by sword light, but fortunately, the sword light didn't have the power to kill their souls. Only then did everyone heave a sigh of relief.

However, no one dared to be careless. This was not a reason for them to approach the sword abyss. If they dared to approach it, they would almost certainly die.

This was because along the way, there were all such sword abysses. It seemed extremely dangerous, but in fact, the danger was not high. Along the way, they also saw many broken arrays, but they had all been cut open by the sword abysses and the ancient arrays had long been shattered.

Yang Wan sighed. "It seems that we are very lucky. This road seems dangerous, but all the real dangers along the way have been resolved. It seems that there was a big battle here in the past."

Suddenly, Xu Meng and the others saw a towering building in the mist. Outside the building, there were a lot of broken weapons scattered.

However, when Yang Wan and the others picked them up and took a look, they immediately exclaimed.

"Wow, a Sea Quelling Bizarre Treasure! I found a Sea Quelling Bizarre Treasure!"

"This isâ€¦ this is the Mystic Yellow Soil."

"Oh my god, there is a pool of blood there. What a horrible energy fluctuation."

“Look, there are three Star Shells scattered there.”

Someone tried to rush over and grab the Star Shells.

As a result, he bumped into this invisible barrier.

“It’s a barrier.”

Xu Meng and the others looked solemn. He said, “Most of the treasures are scattered in the barrier. We should go out first and inform the others.”

Yang Wan roared, “Xu Meng, are you going to give the treasure to someone else?”

Xu Meng said, “Yang Wan, do you think you can get these treasures? This is an ancient ruin. We can’t let too many people die now. Otherwise, if Sky Openers forcefully intervene, we won’t have anything to do with the ruin. We have to gather everyone immediately. If all Sea Establishers intervene, this will become a large-scale trial. Only by maintaining a low casualty rate can the ruins belong to us.”

God of Fishing - Chapter 2509 - 2509 I've Opened the Sky

Chapter 2509 - 2509 I've Opened the Sky

2509 I've Opened the Sky

As a human being, Xu Meng lived under the oppression of the Ten Thousand Scale Race. His words were insignificant, so it was useless for him to say anything now.

As the saying went, treasures were tempting. The people of the Ten Thousand Scale Race began to walk around the edge, trying to find a breakthrough.

As an advance exploration team, how could they let go of the benefits? Yang Wan sneered in his heart. Gather everyone? Ridiculous. With everyone here, what can I get?

Therefore, Yang Wan shouted, “Xu Meng, a wise man knows when to submit to circumstances. There are so many treasures here, and the ruins have obviously been through fierce battles. Perhaps the spiritual barrier is also damaged. If we find it, it will be enough resources for you to accumulate for years! Maybe it can help you directly open the sky. If you give it to others, what do you think you can get?”

!!

When Xu Meng heard this, he was actually a little tempted. He guessed that the guardian lords had probably already known that something had happened. It was impossible for only their squads of the thousands of squads to have casualties. Many squads must have had casualties too.

Therefore, the ruins would be taken over sooner or later. If there were only five of them here, he might have explored it.

However, at this moment, the five of them were in a disadvantageous position. He didn’t believe Yang Wan at all. If there was really a treasure, they would only be killed.

Therefore, Xu Meng said to everybody via voice transmission, “Be prepared. Don’t speak out if you find anything unusual.”

His teammates all got his meaning. This was not the first time such a thing had happened. Human beings had been scammed to death many times, but this time it might be their turn.

While Xu Meng was guarding against Yang Wan, Yang Wan also said to the others via voice transmission, “Once Xu Meng and the others make a move, just kill them. Don’t hold back.”

After a while, Xu Meng, who was walking in front, suddenly stopped. Not far ahead of them, there was a mist of colorful light. When they took a closer look, it turned out to be a black long saber stabbed into the ground. A domain seemed to have formed around it, causing this strange colorful light to appear.

“Get out of the way.”

Yang Wan and the others strode forward. They naturally realized that something was wrong. At this moment, they followed Xu Meng’s gaze and their eyes widened.

Instantly, their breathing became rapid.

Someone said, "What a terrifying saber power. I can feel its sharpness even from so far away. Is this a legendary godly weapon?"

"A godly weapon?"

"Gulp ~"

Even Yang Wan couldn't help swallowing. They didn't even have high-quality Sea Quelling Bizarre Treasures, let alone godly weapons. Ordinary people could only get low-quality and mid-quality Sea Quelling Bizarre Treasures.

At this moment, with a godly weapon in front of him, how could he not be tempted?

However, Yang Wan was not an idiot. This domain was clearly extremely dangerous. If he attacked rashly, he might be in danger.

Immediately, Yang Wan drew his saber to block the way and sneered. "Xu Meng, it's a pity that there are only five of you this time. I'll give you a chance. Bring this saber over here and I'll let you go."

Xu Meng said angrily, "Yang Wan, do you really think we dare not fight you?"

Yang Wan snorted coldly. "Fight us? What will you use to fight us? As I said, if you can't bring that saber over here, you'll have to die."

The people behind Xu Meng were about to get into combat mode, but Xu Meng stopped them. "Yang Wan, I can take the saber for you. Let my brothers go first. Anyway, I'm the strongest here. I'm already a peak-level Sea Establisher. If I can't get it, they certainly can't."

"Brother Meng."

"Ah Meng."

"Brother Meng, let's fight them to the death. It's not easy to get this knife. The sword stream just now killed nine Sea Establishers. How can you get the knife alone?"

They were all anxious, but Xu Meng shouted, “Go! Our human powerhouses are already few, so we can’t die so easily. If you live, you may have a chance to avenge me. But if you all die, I’ll die in vain.”

Yang Wan didn’t really care. He replied without hesitation, “OK. Anyway, they’ll only get themselves killed if they go up. It’s meaningless.”

After that, Yang Wan raised his hand and made way for these people. “Xu Meng saved you. You should cherish your lives. It’s not easy to reach the Sea Establishment Realm. Don’t be in a hurry to die.”

“Brother Meng.”

“Go!”

Xu Meng roared and pushed them out. Then, he said to them via voice transmission, “I won’t dare to fight all out until you’re gone. Maybe I can drag Yang Wan and the others down with me. I can’t use my killer move while you’re here.”

Hearing this, everyone gritted their teeth. “Let’s go.”

After his teammates walked away and couldn’t be detected, Xu Meng breathed a sigh of relief and said with a straight face, “Yang Wan, I hope you can keep your word.”

Yang Wan smiled casually. “As long as you can get it, I promise you won’t die.”

Xu Meng didn’t believe his bullshit at all. He was betting that if he had a chance to get the knife or trigger some attack of the knife, he might be able to kill Yang Wan and the others.

In the next moment, Xu Meng took a deep breath and stepped into the domain.

“Puff! Puff! Puff!”

In an instant, dozens of knife marks appeared on Xu Meng’s body.

“Sh*t!”

Outside, Yang Wan and the others were shocked to see this. It was indeed terrifying. Xu Meng was a body refiner. If he was injured like this, others wouldn't be better either.

Xu Meng was only a thousand meters away from the knife.

The first three hundred meters were still manageable. Even though Xu Meng was covered in wounds, he suffered only superficial wounds.

However, the further he went, the sharper the knife light became.

“Pfft!”

Walking five hundred meters more, Xu Meng was pierced through, and a hole appeared on his body. The blood that spurted out was in the shape of a knife light, which shocked Yang Wan and the others outside.

Yang Wan was excited. It was definitely a godly weapon, and probably not weak at all. If he had a godly weapon, wouldn't his combat power increase by fifty percent? At that time, how many people in the Sea Establishment realm could be his match?

In everyone's eyes, when Xu Meng touched the long saber, he only had a broken skeleton left.

When Xu Meng reached out to grab the long saber, Yang Wan and the others all held their breath. An excited smile appeared on Yang Wan's face. He felt that he was going to acquire a godly weapon and rise to great heights.

Clang!!!

However, the moment Xu Meng's fingers touched the long saber, ten thousand saber beams instantly slashed past and spurted out.

In the eyes of Yang Wan and the others, Xu Meng disappeared in an instant. They didn't see how Xu Meng disappeared. But in the next moment, Yang Wan roared, “Not good, retreat!”

Swish! Swish! Swish!

“Puff! Puff! Puff!”

Yang Wan retreated extremely fast. He flashed behind a strong master of the Blade Clan and pushed him out.

But even so, he only saw a burst of knife light, and then he felt that he was pierced through.

When the knife light dissipated, Yang Wan was horrified and his body was shaking. There was no one left around him. They had all died.

At this moment, he saw a figure, a figure that shouldn't have been here at all, walking towards him from where the black saber was.

"Human, Yingyue?"

Yingyue walked to Yang Wan with light steps. In the next moment, the pressure of the Sky Opening Realm pressed down.

"Sky Opening Realm, you, why are you here? Who are you?"

Yingyue raised her hand, pressed it on his head, and said softly, "I'm back for revenge. The Ten Thousand Scale Race must be wiped out..."

Bang!

...

Xu Meng thought that he was dead. The moment the knife light burst out, he knew that he was doomed.

In this chaotic darkness, a voice suddenly sounded in Xu Meng's ears. "If there's a one in a thousand chance that you can destroy the Ten Thousand Scale Race, are you willing to take it?"

Xu Meng laughed subconsciously. "A thousandth? Not to mention a thousandth, even a hundred thousandth, or a millionth, I'm willing to take it as long as there is a trace of chance."

The voice continued, "If you have this intention, why don't you explore the wasteland, find opportunities, and try to walk out of the Chaotic Wasteland? Why did you go to the City of Scavengers?"

Xu Meng thought that at this moment, he was asking his heart and it was a question from the depths of his consciousness.

He sighed. "It's very difficult for a Sea Establisher to cross the wasteland. It's even harder to find a primitive graveyard than to find ruins. Without a Sea Establishment cultivation technique, the road of the Sea Establishment has been cut off. Apart from the City of Scavengers, where can I go?"

Suddenly, Xu Meng felt a warm current circulating in his body. It was so comfortable that he even wanted to sleep forever.

However, for some reason, a chill came along with it. Xu Meng subconsciously came back to his senses and suddenly saw a mysterious young man standing in front of him who looked dignified and exuded an intimidating suppressing pressure.

Behind this mysterious young man stood six women.

"Yingyue?"

Xu Meng finally realized that something was wrong. He sensed that his body was circulating with some technique without any delay. Not only that, but he also found that the many hidden injuries on his body had disappeared, and his defense seemed to have been completely healed.

Xu Meng was appalled. Wasn't he on his way to draw his knife? How did he see Yingyue?

He subconsciously said, "You... Yingyue, Wen Ruqing? Haven't you already been..."

Yingyue said, "Xu Meng, you should feel lucky that you met Master Human Emperor."

"Master Human Emperor?"

Xu Meng looked at Han Fei again. Although he was still confused, he felt that the pressure on his body was getting heavier and heavier.

Han Fei asked, "How many Sea Establishment Realm human beings do you know in the City of Scavengers?"

Xu Meng responded subconsciously, "Ninety percent."

Han Fei asked, "Do you want to save them?"

“Save?”

Xu Meng suddenly raised his head, and Han Fei said leisurely, “If you stay in the City of Scavengers, you will be crippled. Yingyue, tell him your current strength.”

Yingyue’s heart was pounding. She said proudly, “Xu Meng, I’ve already opened the sky.”

Wen Ruqing took a step forward. “Xu Meng, I’ve also opened the sky.”

Jiang Ya, Jiang Liuyu, Chu Lingyu, Ling Ran: “Xu Meng, we have all opened the sky.”

Xu Meng: “???”

God of Fishing - Chapter 2510 - 2510 The Tragic Li Dacai

Xu Meng was dumbfounded. He had never seen a living Human Emperor in his entire life. When Yingyue, Wen Ruqing and the others were taken away, countless people cursed Xue Fei for a long time. How long had it been since then? None of them had died, and they had all opened the sky?

Xu Meng looked at Han Fei in shock and then at Yingyue and the others, dumbfounded. “Master Human Emperor, are you a human?”

Han Fei grinned.

Yingyue said, “Master Human Emperor is naturally a human. The Human Emperor is not just a human powerhouse, but the king of the human race, the symbol of the human race, the strongest existence of the human race.”

!!

“The strongest?”

With his hands behind his back, Han Fei said indifferently, “Do you know Qiu Shoucang?”

Xu Meng nodded. Of course he knew that. He was the former second lord and was extremely powerful. It was said that he was on the verge of proving Dao and was an existence that he could only look up to.

Han Fei said casually, "I killed him."

"Hiss!"

Xu Meng froze and looked at Han Fei in shock. What level was Qiu Shoucang at? Was there such a strong master in the human race?

Han Fei said, "I'm not showing off to you. The reason why I asked you to stay and talk with you alone is that there's something extremely important that I need you to do. I know that human beings have always been united, and I also know that the Ten Thousand Scale Race has always treated you as cannon fodder. Therefore, when you go out this time, you have to take the initiative to apply for all human beings to come and explore the ruins. After all, the Ten Thousand Scale Race needs cannon fodder to open the way for them."

...

The members of Xu Meng's squad were still carefully retreating.

One of them shouted, "Damn it, damn the Ten Thousand Scale Race. I must have been blind to come to the City of Scavengers. Brothers, one by one, too many of our humans have been tricked to death."

A woman said angrily, "It's our weakness and the suppression of the Ten Thousand Scale Race to blame. They don't want us to open the sky at all and don't want the rise of the human race. In the City of Scavengers, the human race has the lowest status."

They walked carefully in the cracks of the Sword Abyss and cursed as they walked. Yes, they couldn't beat the Ten Thousand Scale Race, so they could only curse them. They didn't dare to curse them in person, so they could only vent their emotions behind their backs.

Suddenly, a voice sounded from behind, "Ah Shuang, don't give up on yourself. It's time for our human race to rise..."

...

Apart from Xu Meng and the others, many teams had already explored the center of this ancient ruin. As Sea Establishers, no matter how powerful this ancient ruin used to be, it was only a Sea Establishment Realm ruin now.

However, the sudden appearance of such a ruin still needed to be reported.

It was not impossible to break in alone, but anyone with a brain knew that this ruin was definitely not something a few ordinary Sea Establishment Realm teams could take.

There were 5,000 people in the thousand teams, and 2,000 of them had died. In fact, there was no need to report it. Some Sky Openers had already come.

There were only about 30,000 people in this ruin trial, but nearly 2,000 people had died at once. If the people guarding here didn't even notice this, they would be slaughtered by the higher-ups!

When the three Sky Opening Realm powerhouses appeared here, the exploration teams came out of the fog with their faces covered in dust.

Needless to say, this was a new ruin.

A Sky Opening Realm powerhouse asked, "Is there any danger in this ruin?"

For a moment, there were all kinds of voices, and everyone was talking.

Some teams encountered many killing arrays, and only two or three people returned. Some teams didn't encounter much danger but obtained many opportunities.

Someone said, "My lord, this ruin was destroyed by powerhouses in the past. The mist is full of killing arrays and sword Qi. Some ancient killing arrays are too terrifying. In one round of clashes, three teams of ours died!"

Someone said, "These killing arrays are not indestructible. We need people who know arrays. In fact, they're easy to deal with. Only two members of our five teams died."

There were still a few places where no one came back. There was no telling if they had all been wiped out.

On Xu Meng's side, only one person returned. He said frankly, "My lord, after passing through the killing arrays, the Sword Abyss, and the Mystifying Array, our five teams came to the periphery of a ruin and saw some Sea Quelling Bizarre Treasures with our own eyes. However, there was big trouble at a

barrier. After eight people died, the team Yang Wan led found the entrance of the barrier and entered the ruins.”

“Hiss!”

Immediately, many people looked at Xu Meng. Entered the ruins? What a great opportunity!

The guardian asked, “Why didn’t you go in?”

Xu Meng smiled bitterly. “My lord, I did want to go in...”

Hearing this, many people were intrigued. With Yang Wan’s personality, of course, he wouldn’t allow a human to enter and compete with him for treasures!

Someone asked, “What about the other members of your team?”

Xu Meng said with a painful look, “When we tried to break through the barrier, the five of us managed to break through a bit of the barrier, but unfortunately, we were swept by a stream of blades. Except for me who is the strongest, all my brothers died.”

Seeing Xu Meng’s sad expression, no one was surprised. 5,000 people entered, but nearly 2,000 died. Everyone knew how dangerous it was.

Xu Meng suddenly raised his head and said firmly, “My lord, I think this is a huge ruin enough for all Sea Establishers to explore. I’m afraid we don’t have enough people. Why don’t we gather some people? I’m willing to persuade all human beings to come explore it.”

Hearing this, many people laughed in their hearts. He wanted all the humans to come, which means that he had taken a fancy to the resources here and intended to use the resources here to make the human powerhouses rise.

However, many people didn’t care. Some people even said bluntly, “My lord, I agree. The human race is united, has good tolerance, and strong resistance and adaptability. With them joining us in our exploration, it will definitely be like adding wings to a tiger.”

Someone echoed, “My lord, the human race has been idle for a long time. It’s been a long time since they sent all their members out for trials. This secret

realm is too big. We should gather enough people. It would be better if we also called over the Blade Clan or the frogmen who are good at scavenging.”

At this moment, the people of the Ten Thousand Scale Race were all talking. How could they not have cannon fodder in such a dangerous ruin? For example, this time, 5,000 people entered, but 2,000 died.

The Ten Thousand Scale Race couldn't afford such a casualty rate. However, the human race, the frogman race, and the Blade Clan didn't matter. Especially the frogman race, they were very exploratory. The human race was extremely resistant and especially united. They could probably conquer this place if there were enough of them.

Just now, Xu Meng said that the five of them had almost broken through the barrier. If there were more people, would there be better cannon fodder than them?

The three Sky Opening Realm powerhouses looked at each other and communicated, and one of them quickly flew towards the exit.

The other two stayed here. One of them said, “The probability of death in this ruin is too high. It needs to be carefully examined before it can be used as a trial. From this moment on, no one is allowed to step into this ruin. Those who disobey will be executed.”

...

Because there was a teleportation array over there, the report came very quickly. In just an hour, the City of Scavengers sent a total of eight Sky Opening Realm powerhouses over. One of them was the lord of the 18th farm, Li Dacai. Han Fei had met this person once, but he was very familiar with his son. This was Li Shenhao's father!

He had heard Li Shenhao mention that Li Dacai was good at treasure hunting and exploring ruins.

This surprised Han Fei. This place was fake. If a shrewd person came here, the probability of being seen through was not small.

“What a pity. You sent yourself to me.”

After Li Dacai arranged a few strong masters in the Sky Opening Realm to enter from various directions, he stepped into the mist alone.

Li Dacai's lips curled as he muttered to himself, "Alas! What a good place! It's so big. How many treasures must there be? However, I promised Master Honghuang that I wouldn't get too many. Well, 30%. Well, 30% should be enough."

"Huh!"

However, as soon as Li Dacai came to the Sword Abyss, he suddenly stopped moving forward. He reached out and grabbed a sword beam, a little puzzled.

"This sword intent is full of vitality. It looks very new! Is there a vitality-type treasure here?"

After a while, when Li Dacai encountered some incomplete arrays and studied them for a long time, he couldn't help but scratch his head slightly. "Why do I feel that this ancient array has some traces of carving?"

When Li Dacai walked to the depths of the ruins and saw the barrier and some residual treasures inside the barrier, he immediately ran away.

Yes, he found something and was about to leave immediately.

However, when he turned around, he broke into a cold sweat. A young man had unknowingly appeared behind him. He was a super powerhouse in the peak-level late-stage Star Transformation Realm. Who could appear behind him so quietly?

This meant that the comer's strength far exceeded his.

Seeing Li Dacai's shock, confusion, and panic, Han Fei smiled casually. "How did you find that there was something wrong with this place?"

Li Dacai didn't dare to speak. Spiritual energy surged from his body, and he secretly wanted to crush something. But Han Fei issued an order in his heart, and Li Dacai's eyes glazed over, and a piece of ancient jade slipped from his hand.

Han Fei grinned. Unfortunately, in order to prevent you from hindering my grand plan, I can only turn you into a puppet.
