

God of Fishing - Chapter 2511 - 2511 Cooperation Again

Li Dacai was actually very strong, but he didn't expect that he would suffer a setback in the Soldier Realm. Even if he encountered a perfected Star Transformation Realm powerhouse, he could still stall him for a while.

However, the Void Stealing Technique had never been a reasonable technique. Not to mention that Han Fei was infinitely close to the peak-level late-stage Star Transformation Realm, even if Han Fei hadn't entered the Star Transformation Realm yet, Li Dacai would still be doomed this time.

Half a day later.

Li Dacai seemed to come out of the ruin leisurely.

!!

At this moment, several Sky Opening Realm powerhouses gathered around.

"Brother Dacai, how is it going? You've been in there for a long time. You must have investigated the ruins more thoroughly than us, right?"

Li Dacai slightly raised his head and said, "This ruin is indeed a ruin that can be explored by Sea Establishers. There are a lot of resources in it! How about this? You seal this ruin tightly and allow no one to take a step in. When I go back, I'll report the details and bring more people over. If anyone dares to enter to get treasures, including you, don't blame me for being ruthless."

"Yes, yes! Don't worry, Brother Dacai. We won't take another step in it."

Li Dacai nodded slightly. "That's good. Don't worry. I'll take care of you. By the way, choose two people to go back to the City of Scavengers with me."

...

The reason why Han Fei asked the puppet Li Dacai to go to the City of Scavengers was to take a look at this teleportation array. This was because the distance from the City of Scavengers to this Soldier Realm was actually very far. It could be reached by a teleportation array, which made him very curious.

When Li Dacai activated the teleportation array in the mist, Han Fei was surprised to find that the array was engraved with Dao patterns. He also felt a familiar power. A Star Core?

Yes, it was a refined Star Core. This teleportation array was actually driven by a Star Core, so it could launch an ultra-long-distance teleportation.

Han Fei's eyes glittered. He learned it. For the first time, he realized that the Star Core could be so useful.

Due to the power of the Star Core, the puppet Li Dacai returned from the Soldier Realm to a place less than an hour away from the City of Scavengers in one go.

This teleportation array should be able to teleport them directly to the City of Scavengers, but perhaps to prevent any accidents in the Soldier Realm or because the City of Scavengers had many eyes and ears, the teleportation hall was not in the city.

Two hour later.

In the depths of the Law Enforcement Camp, Puppet Li Dacai came straight to Zhao Honghuang.

As a puppet that still had consciousness, Li Dacai flattered him as usual. "Master Honghuang, after careful research, I think that the new ruin in the Soldier Realm might be the best ruin in the Soldier Realm so far. It seems to have been conquered in ancient times, and there are many broken treasures scattered on the periphery. I entered the spiritual barrier and patrolled for a while. It's quite dangerous. I estimate that if it's handled well, the mortality rate can be reduced to 20%. It's still high, but the benefits are quite large. It can probably increase the overall strength of the Sea Establishment realm by a level..."

Zhao Honghuang didn't notice the difference in Li Dacai. He frowned slightly. "Twenty percent mortality rate?"

Li Dacai hurriedly said, "My lord, the first people exploring the ruin were too careless. Now that the situation outside the ruin has been figured out, casualties can basically be ignored. And the important exploration goal is still inside of the ruins. Of course... I think we can let the human race, the frogman

race, and the Blade Clan take the lead. Especially the human race, these people are very united, so their reaction to danger is quite good.”

Zhao Honghuang took a deep look at Li Dacai. “Okay. However, I want you to control the difficulty of the ruins. Including the people sent with you and the guards over there, a total of 15 Sky Openers will be under your command. It’s not difficult to adjust the difficulty, right?”

Li Dacai hurriedly shook his head. “It’s not difficult at all. No matter how good the ruins are, they’re already dilapidated and less than 10% of the power they have left. How can it be difficult for me? However, how much do you want to reduce the difficulty, Master Honghuang?”

Zhao Honghuang: “The Ten Thousand Scale Race must maintain a mortality rate of 10%! This is the bottom line. However, we can’t let the human race, the frogman race, and the Blade Clan all die. This will be detrimental to the rule of the Ten Thousand Scale Race. Therefore, once you exceed this bottom line, take out everything you’ve secretly obtained, understood?”

Li Dacai pretended to sweat and smiled obsequiously. “Master Honghuang, don’t worry. I will definitely keep this bottom line.”

...

Puppet Li Dacai went to the Law Enforcement Camp and then to the Mission Guild, the arena, and almost all the Sea Establishment realm powerhouses in the City of Scavengers were gathered by him.

At the same time, they had to go to another trial field, where there were another 30,000 Sea Establishers.

Just as Li Dacai was about to leave the City of Scavengers, he suddenly saw Mo Qi walking out of the city gate.

Of course, this was not a coincidence, nor could it be. Li Dacai immediately instructed the other two, “Take my token and lead the other Sea Establishers to the Soldier Realm. We’ll meet there.”

“Yes, Brother Dacai.”

“Brother Dacai, don’t worry. We’ll definitely get it done for you.”

After sending away two lackeys, Puppet Li Dacai walked towards Mo Qi with a smile.

Mo Qi frowned slightly. Just as Mo Qi was about to speak, Li Dacai said telepathically, "I'm Han Fei's puppet."

Mo Qi: "..."

Mo Qi couldn't have felt worse. Of course, she knew that Han Fei was back. After all, his avatar, Ye Fengliu, had returned. Ye Fengliu didn't come to her. With her intelligence, she quickly found out the reason.

However, she had predicted that something big would happen today. When she went out and saw Li Dacai, she immediately confirmed that this big event must be related to Li Dacai.

However, who would have thought that Li Dacai would become Han Fei's puppet and walk openly in the City of Scavengers?

Mo Qi already knew Han Fei's identity as a disciple of the Void Temple. This greatly exceeded her expectations. However, when she asked about the cause and effect, while she felt regretful, she didn't feel indignant.

Just because Han Fei didn't join the Time Temple didn't mean that his cooperation with her was terminated.

Therefore, Li Dacai came up to him. "Lord Mo Qi, I have something to tell you."

After that, Li Dacai gave her a Star Shell and followed her back to Mo Qi's residence.

It was also at this moment that Zhao Honghuang received the news that Li Dacai had contacted Mo Qi. Chen Yan, the instructor of the Law Enforcement Camp, smiled and said, "Fatty Li is really good at avoiding danger. He can actually enter Mo Qi's place repeatedly. It seems that he has stuffed a lot of resources into her!"

Zhao Honghuang said indifferently, "He's just used to taking advantage of others. Li Dacai cherishes his life too much. He came to Mo Qi just to ensure that nothing goes wrong. Let him be!"

...

Just as Zhao Honghuang thought that he had seen Li Dacai through, in Mo Qi's room, Li Dacai wiped off the fawning look on his face and said indifferently, "It's me. I plan to get rid of all the Sea Establishers in the City of Scavengers and more than a dozen Sky Openers. It won't be a small matter."

Mo Qi was speechless. "Then why did you follow me all the way here? Once those people die, now that I made a prophecy for you, how can they not suspect me?"

Li Dacai said lightly, "Don't you want to leave the City of Scavengers? Instead of being seen through by you just now, I might as well take you away!"

Mo Qi said in surprise, "Now? With just you, a puppet?"

Li Dacai said, "Don't underestimate puppets. Puppets can also accomplish many things. I'm afraid you don't want to leave, right?"

Since Han Fei learned that there was a great secret in the Chaotic Wasteland and that even the Ten Thousand Scale Monarch was fake, he had doubts about why Mo Qi would appear here.

Previously, he wasn't strong enough, so he couldn't even sense Mo Qi's realm. But now, from Li Dacai's point of view, what Mo Qi said in the past that she hadn't even entered the Star Transformation Realm was definitely not true.

How could a dignified disciple of the Time Temple be a weakling who hadn't even entered the Star Transformation Realm after such a long time? Mo Qi had probably always been very strong, but she had suppressed her strength and didn't show it.

In the past, Han Fei felt that Mo Qi might have been abducted here and she could only escape on her own because she was on trial.

But from the looks of it, the only reason Mo Qi came into contact with him was probably to test him and ask him to join the Time Temple.

As for escaping, that was bulls*it. Mo Qi could stay here for tens of thousands of years not for any trial, but for the secrets of the Chaotic Wasteland.

Mo Qi asked, "What do you mean? I really want to leave."

Li Dacai asked, "Then why are you still here?"

Mo Qi hesitated for a moment and then said, "Then why are you here? Human Emperor, a disciple of the Void Temple, why did you appear in the Chaotic Wasteland? Is it really for the human race?"

Li Dacai grinned. "You'll have to wait two years for Ye Fengliu to come to talk to you. I'm just a puppet. However, if you're willing to do me a favor, we're still allies. I can even help you find out the secrets of the Chaotic Wasteland. For example, the fact that the Ten Thousand Scale Monarch is fake isn't exactly a secret, right?"

Mo Qi couldn't help narrowing her eyes. "What favor?"

...

Puppet Li Dacai didn't talk much to Mo Qi. He just quickly reached a cooperation with her and left.

When Li Dacai left, he grinned and seemed to be in a good mood.

As for Mo Qi, she rubbed her head and muttered to herself, "The disciple of the Void Temple is indeed terrifying! It's only been a few hundred years, but his strength has grown to such a level..."

God of Fishing - Chapter 2512 - 2512 Haul In the Net and Massacre

Five days later.

A total of 80,000 Sea Establishers had gathered in the Soldier Realm.

Yes, this was the first time the City of Scavengers had mobilized so many Sea Establishers. Before, Han Fei had always felt that the City of Scavengers only had less than 20,000 people in the Sea Establishment realm. Including those who were taking trials outside, there were at most 30,000 Sea Establishers. But now it seemed that when something big happened, there could be so many Sea Establishers gathered all at once.

Han Fei had reason to suspect that this wasn't the true number of Sea Establishers in the City of Scavengers at all. This was because Li Dacai was only allowed to gather so many.

!!

Perhaps those who hadn't been summoned were the real elites.

When these people were summoned, they were very surprised. These Sea Establishers secretly sent voice transmissions from time to time.

Someone exclaimed, "How can there be so many Sea Establishers? Most of them are strangers to us. What's going on?"

Someone sighed. "How do I know what's going on? But obviously, our City of Scavengers seems to have a lot of hidden forces."

Someone was puzzled. "Why did so many people come today?"

Someone said, "I heard that a huge ruin appeared in the Soldier Realm. It's very dangerous and has a high casualty rate."

Someone cursed, "Nonsense, the Eighteenth Lord just said that he would keep the mortality rate to less than 20%."

Someone was curious. "What kind of secret realm is this that so many people have to explore together?"

At this moment, the puppet, Li Dacai, had gathered 15 Sky Openers and more than 79,800 Sea Establishes. Among them, there were only 15,000 humans, 15,000 frogmen, 9,000 blade demons, and more than 40,000 members of the Ten Thousand Scale Race.

There shouldn't be so many people on the human side. Xu Meng was obviously a little stunned, because he saw many human powerhouses who were said to have died appear again.

At that moment, everyone was looking forward to entering the ruins to take a look.

Even the Sky Opening Realm powerhouses behind Li Dacai wanted to go in and make a fortune.

At the moment they gathered here, in the so-called ruins, Han Fei was walking slowly through the mist, walking out of the mist.

He had prepared so long to set up this trap, and it was certainly not for letting these people explore the ruins.

He just needed an excuse to gather all the humans together.

Li Dacai said, "Listen to my command. All humans, step out."

For a moment, many people felt that something was wrong. There were so many people. Why did the human race have to come out first?

However, the words of a Sky Opener couldn't be disobeyed. When everyone thought that Li Dacai would make them lead the way and be cannon fodder.

However, at this moment, a few figures appeared in the fog. One of them seemed to have penetrated the fog and appeared in front of the human camp.

When everyone took a closer look, it was a young man. In his hand, he was playing with an aqua blue bead that emitted a chilling aura.

"Who is it?"

The Sky Opening Realm powerhouses all changed their expressions and looked at Li Dacai in shock, wondering if this person knew Li Dacai.

However, Li Dacai had already retreated to Han Fei's side.

At this moment, some other people walked out of the mist. The people took a closer look and found that a few of them were members of Xu Meng's team.

There were also a few people who human Sea Establishers knew. Many people exclaimed, "Is this Yingyue?"

"Huh? Sister Yingyue, Sister Jiang Ya..."

"It's Chu Lingyu and Ling Ran. Why are they here?"

"Huh! It's Wen Ruqing. Wasn't she taken by Xue Fei?"

For a moment, the humans were all dumbfounded. These people who shouldn't have appeared had appeared. Also, who was this young man in front of them? The invisible suppressing pressure on his body was so strong.

At this moment, these Sky Opening Realm powerhouses clearly sensed that something was wrong. Li Dacai, who had been the leader, suddenly fell silent, as if he didn't have any doubts about these people who had just appeared.

“Not good! Something seems to be wrong with Brother Dacai.”

Someone spoke telepathically. However, the few people who came with Li Dacai were not very weak. Four of them had entered the Star Transformation Realm. Among the original guardians here, there was a peak-level late-stage Star Transformation Realm cultivator and two Star Transformation Realm cultivators.

Therefore, they didn't want to run, mainly because they didn't think that they were weak.

Among them, the late-stage Star Transformation powerhouse shouted, “Li Dacai, what's the meaning of this? Who are they?”

“Kekeke~”

At this moment, Han Fei suddenly smiled. While playing with the Extreme Cold Pearl in his hand, he grinned. “At the last moment of your lives, I think I should tell you the truth. As the Human Emperor, the sovereign of the human race, the Ten Thousand Scale Race have enslaved the human race for 100,000 years. I'll take revenge on you starting from today. You're just appetizers.”

“Hiss ~”

On the Ten Thousand Scale Race's side, the emperors had no special reaction. They were just puzzled but not shocked.

However, on the human side, most people gasped. The emperor of the human race? When did the human race have an emperor?

Wait...

Someone understood the difference in this term. Han Fei was talking about the Human Emperor. The meaning of “emperor” was different from a sky opener but more like a leader.

For a moment, the puzzled human powerhouses all looked at Yingyue and the others.

Yingyue shouted, “A hundred thousand years ago, the human race was stranded in the Chaotic Wasteland and imprisoned for a hundred thousand years. Now, the opportunity for the human race has come. Master Human Emperor will rise with the human race to conquer the Ten Thousand Scale Race and destroy the scavengers. Now that the Human Emperor has appeared, the human race shall rise.”

Gulp!

While everyone was dumbfounded and shocked, Xu Meng shouted, “My fellow clansmen, we have been pawns and cannon fodder of the Ten Thousand Scale Race all our lives. Everyone can open the sky, but our human race can’t. In the City of Scavengers, in this territory, we spent 100,000 years like ants and struggled for 100,000 years. Today, Lord Human Emperor has designed and arranged for us to gather together to see the prosperity of the human race and wipe out the power of the Ten Thousand Scale Race.”

“Hmph!”

The peak-level late-stage Star Transformation Realm powerhouse’s heart did a flip as he roared, “What shameless boasting! A guy who hasn’t even entered the peak-level late-stage Star Transformation Realm is worthy of mentioning the rise of the human race? Let me slaughter you and let you have a taste of the true power of a Sky Opener.”

As he spoke, a terrifying spear beam burst out of the peak-level late-stage Star Transformation Realm powerhouse. If Han Fei dodged it, countless people would be annihilated by this spear beam.

The situation changed too quickly. The more than 10,000 human powerhouses were excited, worried, scared and expectant. Their complicated emotions turned into countless gazes at the spear beam.

However, Han Fei raised his hand, and the spear light instantly disappeared from everyone's vision. Then, the peak-level late-stage Star Transformation Realm powerhouse bent his body like a shrimp, and a spear light shot out of his body.

At this moment, everyone was shocked to find that Han Fei had already appeared in front of that person.

Han Fei won this battle so quickly and suddenly that none of the other Sky Opening Realm powerhouses could react in time.

In the end, what appeared in their eyes was a spear beam that pierced them through and a huge golden fist mark.

That punch was like a star exploding. The powerful impact light technique instantly seriously injured two star transformation realm powerhouses.

It had to be known that these human cultivators didn't even know what the perfected Star Transformation Realm was. As far as they knew, there was only the Sky Opening Realm, and no one had told them about the minor realms.

At this moment, although they didn't know how strong Han Fei was, the fist light blinded their eyes. Countless people tried to stare at the light, but their eyes exploded.

When they opened their eyes again, they saw that Han Fei had easily killed three Sky Opening Realm powerhouses who looked extremely powerful in their eyes.

In the blink of an eye, most of the Sky Opening Realm powerhouses here, except for the peak-level late-stage Star Transformation Realm cultivator, could not withstand a single blow of Han Fei.

In order to show his strength, Han Fei instantly completed four kills. In less than a second, the four Sky Opening Realm powerhouses had died. Their flesh and blood were still hanging in the sky.

In an instant, everyone was horrified. Where did this unparalleled monster come from? He had killed four Sky Openers in the blink of an eye after only one clash. Was he serious?

Someone shouted, "Run, run..."

At this moment, Han Fei stepped in the air and casually threw out the Extreme Cold Pearl in his hand. In an instant, the void hundreds of thousands of kilometers ahead was completely frozen, Great Daos were crushed, and only the strongest Dao was left in the void.

The one who ran the furthest only ran less than 100,000 miles, but his body stiffened, his flesh and blood were frozen, and the Great Dao of Ice circulated in his body.

As for the Sea Establishers of the Ten Thousand Scale Race, the Frogmen race, and the Blade Clan, a moment ago, they were still secretly discussing what had happened.

However, at this moment, they had all turned into ice sculptures. Furthermore, these were not ordinary ice sculptures, but ice sculptures that had shattered souls.

In the blink of an eye, Han Fei had killed 15 Sky Openers and nearly 65,000 Sea Establishers.

Rumble!

In this space, there were constant thunders and a rain of blood fell. This was because too many people died in an instant and this was not the Sea Realm.

Before these human Sea Establisher powerhouses came back to themselves, Han Fei shouted, "Everyone, open your minds and enter my Origin Sea..."

God of Fishing - Chapter 2513 - 2513 All Dead

Chapter 2513 - 2513 All Dead

2513 All Dead

After the killing, the first thing Han Fei had to do was to run for his life.

In particular, more than 60,000 Sea Establishers and 15 Sky Openers of the City of Scavengers had died. This kind of thing would be discovered immediately.

Running away was his only choice.

The Sea Establisher powerhouses of the human race hadn't had the time to feel shocked yet, because they could only see the void being frozen with their naked eyes. Then, an overwhelming natural phenomenon and thunder rumbled incessantly.

!!

In the next moment, they felt a suction force, but after hearing Han Fei's words, they didn't dare to be negligent. This person had already revealed his identity. They would be stupid if they still resisted.

For this reason, everyone was absorbed into Han Fei's Origin Stars.

In the end, Han Fei reached out and grabbed the Extreme Cold Pearl. An array appeared under him and he went straight to the exit of the Soldier Realm.

As for Puppet Li Dacai, Han Fei didn't intend to take it from the beginning. Having seen the big world of the Divine Capital Dynasty, Han Fei naturally knew that Li Dacai's strength was nothing.

More importantly, Li Dacai had already been exposed. If anything happened, the City of Scavengers might investigate thoroughly and find that Xue Fei and Feng Tianyi had become puppets, and then the No. 68 and No. 80 farms that he had painstakingly managed would be exposed. That would be a huge loss.

Therefore, Han Fei directly penetrated Li Dacai's Star Bead and threw him into his Origin Star. Then, he immediately burst out at 14 times the speed of light and ran at full speed.

Only by killing Li Dacai could they believe that there was nothing wrong with Li Dacai. He was just tricked.

In addition to Li Dacai's self-detonation, Han Fei also left a trace of An Taiping's Qi and blood far away. Anyway, An Taiping's corpse was in his hands.

In this way, nothing would go wrong.

This series of actions was as smooth as flowing water. It could be said that when Han Fei ran, the people in the City of Scavengers must have just discovered that something was wrong.

...

As Han Fei guessed, Zhao Honghuang was the first to react when something happened in the Soldier Realm.

At the first moment, Zhao Honghuang thought that the exploration had begun, so people died.

However, at the moment when the 15 life tablets of the Sky Opening Realm powerhouses shattered at the same time, Zhao Honghuang suddenly stood up. He was shocked. This was a Sea Establishment Realm operation. How could 15 Sky Opening Realm powerhouses die first? And 15 had died instantly.

And all the Sea Establisher life tablets were managed by Chen Yan.

However, when nearly 65,000 Sea Establishers died at once, Chen Yan didn't notice it.

This was because there was a time film covering this place where the life tablets were stored. In this film, time stopped.

This was naturally Mo Qi's doing. To be honest, there were more than 500,000 life tablets here. It actually gave Mo Qi a fright. However, when Mo Qi saw 65,000 jade slips shatter at once, she felt terrible. What method did Han Fei use to kill so many people at once? Was this guy crazy?

However, since she had promised Han Fei to help him remove the traces, this matter was a favor. It was the foundation of their future cooperation. Han Fei would have to return it sooner or later, so Mo Qi didn't hesitate.

In an instant, Mo Qi shattered more than 500,000 life tablets here. This was because the number of human Sea Establishers wasn't as many as the number that Han Fei had taken away. There were still nearly 30,000 Sea Establishers hidden somewhere.

And Mo Qi didn't have the ability to know which humans Han Fei had taken away, so she naturally shattered all the life tablets.

The moment all the life tablets shattered, Mo Qi immediately withdrew the time film and instantly appeared in her house. And here, time also stopped without the slightest passing.

If Han Fei saw this scene, he could roughly guess Mo Qi's strength. She was at least a perfected Star Transformation Realm cultivator, and not an ordinary one.

"Master Honghuang."

With a scream, Chen Yan appeared in front of Zhao Honghuang without caring about his image.

Chen Yan's voice trembled as he said, "Master... Master Honghuang, they're all broken. All the Sea Establishers' Life Tablets were broken at the same time!"

Zhao Honghuang was stunned. How was this possible? This was impossible.

Yes, in the next second, he sobered up and instantly appeared in the place where the Sea Establishers' life tablets were kept. However, there was nothing left here except for powders.

This had never happened in the history of the City of Scavengers. These Sea Establishers seemed to have died at the same time. What kind of power could cause so many Sea Establishers to die at the same time?

Just as Zhao Honghuang was watching this scene, he suddenly felt Li Dacai's life tablet shatter. Yes, he was f*cking dead too.

His first reaction was that something must have happened to Li Dacai's side, and that Li Dacai's team might have been completely wiped out.

However, how many people were there? Only 80,000, but more than 500,000 life tablets here had been broken. What happened?

"It must be related to the Soldier Realm."

Recently, the only major event that happened was the appearance of ruins in the Soldier Realm. Now, Li Dacai and the 15 Sky Opening Realm

powerhouses had all died, which proved that something had happened in the Soldier Realm.

Although these life tablets were broken, they couldn't all be dead. This was because in some places, it was impossible for the people there to die, let alone die with the people in the Soldier Realm.

This meant that just a moment ago, someone had been lurking here and shattered all the life tablets when he saw some life tablets shatter, so as to hide something.

What was there to hide? To be able to hide here silently and avoid Chen Yan's perception and his gaze, this kind of person was definitely not an ordinary person, and his strength was probably not weaker than his.

Such a person could be counted with one hand in the City of Scavengers. He instantly thought of someone and landed in Mo Qi's hut.

When Li Dacai left the City of Scavengers, the last person he saw was Mo Qi.

He had always suspected that there was something wrong with Mo Qi's strength. He had also always guessed that Mo Qi was hiding in the City of Scavengers not for any trial, but for the secrets behind the Chaotic Wasteland.

Therefore, Mo Qi became Zhao Honghuang's first target.

Bang!

The cottage exploded. However, at this time, there was nothing left in the cottage, including the junk-like mess.

Chen Yan followed Zhao Honghuang closely. Seeing this scene, he was completely dumbfounded. "She, she ran away..."

Chen Yan recalled that Li Dacai was in a very good mood when he left here, but now Mo Qi had run away. He immediately exclaimed, "Master Honghuang, Li Dacai is in danger."

However, Zhao Honghuang looked at Chen Yan as if he were an idiot. "He's already dead."

"Hiss!"

Zhao Honghuang glanced at the depths of the City of Scavengers and disappeared from the city at the speed of light explosion.

The moment Zhao Huang left, Ten Thousand Scale Monarch suddenly appeared beside him.

He said, "Why are you so flustered?"

Zhao Honghuang: "Brother Ning, Mo Qi ran away. Something happened in the Soldier Realm. Li Dacai and all the Sky Openers and Sea Establishers who went there have died."

Zhao Honghuang directly called the Ten Thousand Scale Monarch, Ning Tianlong, "Brother Ning". If anyone else heard this, they would immediately fall into great shock.

However, Ning Tianlong didn't mind at all. He was stunned for a moment before saying, "Mo Qi ran away?"

It could be said that in the City of Scavengers, the person Ning Tianlong cared about the most was Mo Qi. When did Mo Qi run away? Why didn't he notice at all?

Zhao Honghuang added, "I suspected Li Dacai, so I arranged for Zhou Liheng to follow him. Zhou Liheng's Life Tablet hasn't been broken yet. If I'm fast enough, I might be able to save him."

When Ning Tianlong heard this, his eyes flashed and he grabbed Zhao Honghuang. "Let me take you there."

...

Han Fei happened to leave the Soldier Realm at the moment Zhao Honghuang and Ning Tianlong left the city.

However, as soon as Han Fei left the Soldier Realm, a sword light slashed at him.

Han Fei's heart skipped a beat. They came so quickly? That's not right! If it were a Monarch, the power of that strike would be much greater than this.

With a thought from Han Fei, the sword light disappeared out of thin air. Zhou Liheng was shocked. Where is my attack?

In the next moment, Han Fei stepped on the void and slashed the sky. He roared, "Come out."

Zhou Liheng felt that although Han Fei's attack was strong, he hadn't reached the perfected Star Transformation Realm, which made him immediately relieved.

He was responsible for monitoring Li Dacai. The reason why he didn't go in to monitor him was that Li Dacai had just entered, so it was meaningless for him to go in now.

But Han Fei's appearance filled him with doubts. This person was very strong, but he wasn't from the City of Scavengers, so he had to stop him.

At this moment, Zhou Liheng saw that although Han Fei was strong, he seemed to be a little weaker than him, so he naturally stepped forward, preparing to take Han Fei down.

However, the moment he appeared, he lost consciousness.

The corners of Han Fei's mouth curled up slightly. So it was this guy. His son had provoked him before. It seemed that both father and son were unlucky!

Han Fei slashed at the center of Zhou Liheng's eyebrows. A peak-level late-stage Star Transformation Realm cultivator who had lost his mind was simply at Han Fei's mercy.

"Pfft!"

Rumble!

As soon as he shattered Zhou Liheng's Star Bead, the Great Dao crack appeared in the sky. Han Fei grabbed Zhou Liheng's corpse and threw it into his Origin Star.

The next moment, Han Fei put on a smile and stepped to the edge of the speed of light. In the next moment, he stepped into the white hole and disappeared.

On the other side, the Thousand-Scaled Emperor, Ning Tianlong, was running wildly with Zhao Honghuang, also shuttling quickly through the white hole.

It wasn't that they didn't want to use the teleportation array, but that the teleportation array had been destroyed. The power of the Star Core that supported the teleportation array had been stolen by some b*stard.

Even so, Ning Tianlong and the others were not slow.

Unfortunately, they had only set off for about five seconds when Zhao Honghuang's face darkened again and he said coldly, "Zhou Liheng is dead."

God of Fishing - Chapter 2514 - 2514 A Gift from the Human Emperor

When Ning Tianlong and Zhao Honghuang arrived at the Soldier Realm, there were only ruins left.

As for Zhou Liheng's death, they could feel the vibe of the battle, but because the battle ended too quickly, there was nothing special left.

Inside the Soldier Realm, when Ning Tianlong arrived at the place where the people died, he said in shock, "It's an attack at the level of a Monarch, and it's very strong. The power of ice in such a huge area exceeds the Dao Proving Level. With one blow, all the Sky Openers died at the same time. It should be at the Carefree Level."

Zhao Honghuang frowned slightly. "Who could it be? Gu Tingnan, An Bailing, or An Heng? On the surface, only these few people in the Chaotic Wasteland are Monarchs."

!!

Ning Tianlong pondered and said, "Not any of them. This kind of extreme cold power is a little similar to the power above the sea. However, it's even less likely that they came back from that place. How can people who have gone to that place come back so easily? Even if they want to return, they won't be allowed to. Did Pan Litian and the others offend anyone in this 100,000-year competition?"

Zhao Honghuang frowned slightly. He was also thinking about this question. But how big of a grudge did this guy have to scheme like this? If it was really an outsider, how could he have made this plan so perfect? This person should know the Chaotic Wasteland, even the City of Scavengers very well.

Zhao Honghuang said, "It's also possible that the City of Wanderers or the City of Origin found an external Monarch to take action. Coupled with Mo Qi's escape, I'm afraid Mo Qi should have long known of this plan. However, I don't know if it's Mo Qi's idea or the Time Temple's."

Ning Tianlong frowned. "Mo Qi's investigation direction shouldn't conflict with ours. She's exploring the source of the ominous. We... eh, wait, we found something."

Ning Tianlong suddenly flew across the sky and grabbed at something tens of millions of kilometers away.

In the next moment, Ning Tianlong's expression changed slightly. He condensed an almost undetectable soul light spot in his hand and said with an ugly expression, "The City of Origin said that An Taiping is dead?"

Zhao Honghuang was also taken aback for a moment. "Pan Litian didn't kill An Taiping personally, but it's said that he fought with someone and died. From the looks of it, I'm afraid it's not that simple. If the City of Origin wasn't framed, they have gone too far this time."

Zhao Honghuang: "Let me investigate this matter in secret. The top priority now is to check other places besides the Soldier Realm..."

...

The City of Scavengers suffered a huge loss this time.

Including the humans taken away by Han Fei, they lost 80,000 Sea Establishers at once. Was this number small? Definitely not small. There were 80,000 Sea Establishers in the City of Scavengers, and then what about the City of Origin and the City of Wanderers? It was impossible for them to mobilize all their forces. Therefore, Han Fei conservatively estimated that there were at least 500,000 Sea Establishers in the Chaotic Wasteland.

Even the 100,000-year competition only had 8 million Sea Establishment Realm participants. In comparison, the Chaotic Wasteland on the border of the East Sea Divine Realm had more than 500,000 Sea Establishers, which was already very powerful.

On Han Fei's side, he had already run far away. At this time, he had already entered his Origin Star, preparing to stay for half a year. At that time, the probability of being caught was almost zero.

In his Origin Star.

In a certain area, within a radius of 100,000 kilometers, the vegetation was flourishing, the spiritual river flowed, and mountains and waterfalls hung down, and the scenery was very beautiful.

The spiritual energy here was so rich that these human Sea Establishers felt their scalps tingle. They had never felt such rich spiritual energy in their lives, but here, even the air was filled with rich energy.

Han Fei wasn't in a hurry. After all, he had refined several Great Dao Seeds during his breakthrough to the peak-level late-stage Star Transformation Realm. The seeds were so swollen that he needed some help to digest some energy.

At this moment, some people in the crowd slowly came back to their senses.

Yingyue, Jiang Ya, Wen Ruqin, and Xu Meng were immediately surrounded.

"Meng, tell me, what's going on? When did our human race have a human emperor?"

"Yingyue, what have you experienced all these years? Is this lord really our Human Emperor?"

"Jiang Ya, you, you actually opened the sky?!"

Buzz!

In an instant, everyone fell silent and looked at Yingyue, Jiang Ya and the others. If only one person had opened the sky, he might have had a special experience.

However, when they learned that Yingyue, Jiang Ya, and the others had all opened the sky, these over 10,000 people were shocked and excited. It seemed that a ray of hope appeared in front of everyone.

Yingyue said, "The seven of us have indeed opened the sky. We have to thank Master Human Emperor for all this. Master Human Emperor gave us

resources, provided us with the energy for our cultivation, taught us great techniques and combat skills, and protected us to open the sky. Today, in order to save you from the City of Scavengers, Master Human Emperor has painstakingly laid down the trap in the Soldier Realm. This is your opportunity, as well as the opportunity of our human race. Everyone, our human race has its own emperor now. The time for our rise has come...”

Gulp!

“Hiss!”

Some were shocked, some sighed, some cried, and some were excited.

In their minds, they recalled the humiliation they had suffered in the City of Scavengers. Their bodies were branded with too many traces of oppression.

At this moment, Han Fei jumped out like a savior. How could they not be excited?

At this moment, in the void, Han Fei, glowing with golden light and carrying an unparalleled suppressing pressure, stood in the air.

Han Fei said, “My fellow human beings, I am the Human Emperor, Han Fei. Today, in the Soldier Realm, I killed 16 Sky Openers and nearly 65,000 Sea Establishers, heavily injuring the City of Scavengers. This event marks the rise of our human race. We will eventually reach glory. However, glory is not in front of us yet. At this moment, we’re still in the darkness before dawn. This battle seems to be a huge victory, but our human race has been in decline for 100,000 years. It won’t be able to change our fate in a day. Although I’m the Human Emperor, I haven’t proven Dao and become a Monarch. I need you. I need each of you to rise. I need each of you to be able to open the sky and create a golden age for our human race... Our human race shall rise.”

Han Fei’s voice was like thunder, resounding through the clouds and shaking the sea. Upon hearing this, everyone’s blood subconsciously began to diffuse and surge. In utter excitement, they shouted with Han Fei,

“The human race shall rise~”

“The human race shall rise~”

“The human race shall rise~”

Han Fei pressed his hands down and said in a dignified voice, "I know that you lack resources, techniques, combat skills, and weapons... From today on, you don't lack anything."

With that, a long dragon of resources rolled up and poured down overwhelmingly.

At this moment, the ground was shaking, and surging energy tides rose to the sky.

Between the heavens and earth, millions of spiritual fruits and tens of thousands of godly weapons flew over.

The audience was astounded. They had never seen so many resources! They were everywhere as if they were all free.

At this moment, there was no need for them to take the initiative to reach out. Resources, spiritual fruits, Mystic Yellow Soil, godly weapons, and so on fell on everyone's body.

Han Fei sighed in his heart. Unfortunately, the blow of the Extreme Cold Pearl had wiped out all the villains. He didn't have the time to find their Origin Stars, so no matter how many resources there were, he couldn't get them.

He had thought that he had abundant resources.

However, when there were really more than 10,000 Sea Establishers or even peak-level Sea Establishers standing in front of him, the pressure on Han Fei immediately increased.

The resources he had were definitely not enough for them to open the sky.

At most, the resources given out could make up for the loss of their Origin Seas, repair some of the old damage, and consolidate and strengthen themselves.

This amount of resources was not enough to build a team of 10,000 Sky Openers.

However, at this moment, these Sea Establishers went crazy. They had thought that they were about to become cannon fodder, but who would have

expected that they would suddenly become the protagonist? A human emperor fell from the sky and gave them countless rewards.

More importantly, the human race had a real powerhouse who could easily kill 16 Sky Opening Realm powerhouses and more than 60,000 Sea Establishers.

“We pledge our lives to follow Master Human Emperor~”

“For the rise of the human race~”

“...”

Amidst the cheers, Han Fei shouted, “My fellow human beings, overthrowing the Ten Thousand Scale Race is not something that can be done in a day. We must work together at this moment, and I won’t keep my resources to myself. From today on, we will share the ‘Purity Mystic Body’, a body refining technique ranked 998th on the Sea Establishment Realm List. ‘Chaotic Demon Body’, an ultra-quality body refining technique of the Sea Establishment Realm, ‘Sky Opening Sword Manual’, an ultra-quality technique of the Sea Establishment Realm, ‘Blade Inferno’ and ‘Hinayana Saber’, divine-quality knife techniques, and ‘Heavenly God Stab’, a divine-quality soul technique...”

Everyone below was stunned by Han Fei’s words. Divine-quality, ultra-quality, Sea Establishment Realm List? These were f*cking top-notch precious techniques that they had never heard of before. This Human Emperor had only seen them once, right? Did he trust them so much that he wanted to teach them so many precious techniques at once?

Even Yingyue and the others were a little confused. Wasn’t this a little crazy?

As for Han Fei, he walked down from the sky step by step and said in a voice that everyone could hear, “I know that you, who can reach the City of Scavengers, cultivate to this level, and survive, are all outstanding talents. You are all Heavenly Talents. In that case, I won’t be stingy with my precious technique resources. I don’t demand you to quickly open the sky, but I want you to lay a very solid foundation in the Sea Establishment realm and not blindly pursue opening the sky. Yingyue, Jiang Ya, Jiang Liuyu, Wen Ruqing, Chu Lingyu, and Ling Ran have followed me for many years and have all opened the sky. From today onwards, they will be your instructors and give you special training in my Origin Star...”

God of Fishing - Chapter 2515 - 2515 The Palace Locked in the Void

So far, Han Fei was not afraid of betrayal.

However, this didn't mean that Han Fei would really trust everyone here. For the next period of time, Han Fei would see a person every day.

In fact, Han Fei had mentally hypnotized each of them and learned their true selves. Human beings were the most united race, but there were also conflicts wherever there were people. It didn't matter if there were conflicts. The main thing was that they couldn't betray the human race. Spies couldn't be tolerated here.

In the end, Han Fei did find 37 suspicious people. Among them, 26 were possessed by the City of Origin, and 11 were possessed by the frogmen and the Blade Clan.

!!

Han Fei handed these 37 people over to Yingyue, Xu Meng, and the others. In the end, these people were beaten to death by the crowd. Yes, tens of thousands of people beat them up. Han Fei had never asked.

In the past six months, the places where these humans lived had been in a state of ten times speed. Even Zhang Xuanyu and the others had to spend hundreds of years suppressing their cultivation, and Yingyue and the others had to suppress their cultivation for hundreds of years before they could open the sky. It didn't make much sense for these people to open the sky now. Even if they opened the sky, they would be useless.

Han Fei needed to build a team of elites. He couldn't let any of them open the sky now.

Therefore, during this period of time, they cultivated hard every day. To put it bluntly, it would take at least decades for them to recover from their physical injuries and practice new techniques and skills, so Han Fei wasn't worried that they had nothing to do.

Han Fei's main task in the past six months was to compress his Star Core. His Star Core was the same size as when it was first formed, except that its density was a thousand times higher.

And now, he needed to do the final ten times compression. With these more than 10,000 people absorbing the energy he emitted to cultivate at all times, in half a year, Han Fei had barely reached the peak-level late-stage Star Transformation Realm.

Thinking that he had to go back and pick up Hong Yue, Han Fei didn't stay in his Origin Star for long.

When he came out half a year later and was about to return to the No. 68 farm, he suddenly thought of something. "Who is it? Come out."

A voice came from the void, "I've helped you a lot, and I had to leave the City of Scavengers because of you. You won't turn your back on me, will you?"

Mo Qi walked out of the void, looking a little smug. Others couldn't find Han Fei, but she could. After all, she could trace back in time.

Seeing that it was Mo Qi, Han Fei heaved a sigh of relief and smiled faintly. "Although I don't like your Time Temple, we can still cooperate. This time, I owe you a favor and will return it to you. Since we don't have to pretend now, I won't hide it. It's not the time for me to take action. Neither I nor you should be able to unveil the fog of the Chaotic Wasteland independently. You and I need time."

Mo Qi narrowed her eyes. "You want to save time for yourself to grow, right? But like I said before, even if you grow to the perfected Star Transformation Realm, if you don't use the power of the Void Temple, how can you destroy the City of Scavengers and the City of Origin? How can you explore the secrets behind the Chaotic Wasteland?"

Han Fei grinned and said, "Let me ask you something. How long has the City of Wanderers existed?"

Mo Qi asked, "What do you mean?"

Han Fei said, "If the City of Scavengers and the City of Origin have enough time and energy, the City of Wanderers would have been gone long ago. So, no matter what the secret behind this is, it keeps the City of Scavengers and the City of Origin busy. So you and I will have enough time to investigate. Well, you have stayed in the Chaotic Wasteland for so long. What have you found?"

Suddenly, Mo Qi waved her hand and said, "What are you talking about? Do you think I'm investigating the secrets behind the City of Scavengers and the City of Origin?"

Han Fei was puzzled. "Aren't you?"

Mo Qi sneered. "Of course not. Why would I investigate that? Perhaps this secret is not small. It might involve Monarchs or even Great Monarchs. But that's not something I can participate in. What I've been investigating for so many years is the origin of the tidal waves."

"Uh..."

Han Fei was embarrassed. So they were not talking about the same thing at all.

Mo Qi said, "The Time Temple isn't interested in these secrets. There are so many secrets in this world. Isn't it crazy to investigate them all? The ultimate goal of the Time Temple has always been the ominous. This is the reason why I've been in the Chaotic Wasteland for so long."

Han Fei suddenly said, "Then have you ever thought that the secret behind the City of Scavengers might also be related to the ominous?"

Mo Qi shook her head. "No. Over the years, I've crossed the ominous world countless times to search for the ominous origin on the day when the tidal waves come. However, I've returned empty-handed every time. In the end, I found a palace that's hidden in the ominous and locked in the void. However, I haven't been able to break in, so I can't investigate it. This is the favor I want you to repay."

"A palace locked in the void?"

Han Fei's heart skipped a beat. Mo Qi had been investigating this for so many years?

He couldn't help but ask, "Since you've found out, why didn't you turn to the seniors of the Time Temple for help?"

Mo Qi didn't know whether to laugh or cry. "Do you really not know, or are you pretending not to know?"

Han Fei asked, "What?"

Mo Qi said, "This is my true trial. This is my path to prove Dao. Otherwise, why do you think I helped you? Why do you think I wanted you to join the Time Temple?"

Han Fei couldn't help but be stunned. So that was the reason? No wonder Mo Qi had waited here for tens of thousands of years. It turned out that this was her path to prove Dao.

However, Han Fei still felt that tens of thousands of years was still too long. It seemed that Mo Qi's aptitude wasn't as good as he imagined.

At the very least, anyone in the Void Temple had better aptitude than her.

Han Fei said, "The source of the ominous power in the entire Chaotic Wasteland can't be resolved by you, a mere perfected Star Transformation Realm cultivator, alone."

"Huh? You've seen through my realm?"

Han Fei smiled and said, "Do you need to see it through? You said you were going to prove your Dao. Besides, not everyone can shatter those life tablets in the City of Scavengers."

Mo Qi curled her lips. "Alright! That place is related to the Time Temple, so I have a natural advantage. Furthermore, don't underestimate a perfected Star Transformation Realm disciple of the Time Temple. We're not necessarily inferior to your Void Temple. Besides, I said I needed to find out something, but I didn't say I had to eliminate the source of the ominous, which are two different things"

Han Fei smiled and said, "In that case, how about waiting for me to break through to the perfected Star Transformation Realm?"

Mo Qi said, "I think you're very strong now. You can kill a powerhouse on the God Roll alone. With your strength, should you wait for so long?"

Han Fei didn't fall for it. "Do you think the palace locked in the void is ordinary? I had to use all my strength to kill Zhao Qinglong. Besides, although Zhao Qinglong is on the God Roll, his lifespan is less than 30,000 years. If I fight those old monsters who have lived for more than 100,000 years, it's not

certain who will win. Do you still remember the thousand-year agreement between us? It hasn't even been a hundred years. However, you should at least believe that I'm definitely going back to the Chaotic Wasteland."

Mo Qi said in surprise, "You're leaving again? Didn't you just come back?"

Han Fei said, "You have the secrets you investigated, and I have some I need to investigate. Your goal is the source of the ominous, but mine is the secrets behind the City of Scavengers, and the liberation of the entire human race. Do you think I won't return?"

Mo Qi asked, "Where are you going?"

Han Fei said, "Take a guess."

Mo Qi snorted. "I see that your aura is slightly oscillating now. It seems that you can break through to the peak-level late-stage Star Transformation Realm at any time, right?"

Han Fei smiled. "Yes! When I come back, I'll go to the palace locked in the void with you. But not now."

Mo Qi didn't seem to be in a hurry. She said indifferently, "Alright, then I'll live in the City of Wanderers for a while. Remember to come to me when you come back."

"Sure."

...

Han Fei had a different view of Mo Qi's path of trial.

If it were him, he would think of a way to do it with his own strength first.

However, from the looks of it, Mo Qi didn't seem to be able to complete this trial on her own. That was why she called him over.

Therefore, Han Fei thought that even if Mo Qi could prove Dao after she completed this trial, she should have higher achievements if she completed this trial independently.

But it had nothing to do with him. By the time he reached the perfected Star Transformation Realm and returned, he could fight even Monarchs. Why would he be afraid of completing a trial with her?

After bidding farewell to Mo Qi, it only took Han Fei three days to return to the No. 68 farm, where Hong Yue was already waiting.

Seeing Han Fei, Hong Yue hurriedly bowed. "Master Human Emperor, everyone is in my Origin Sea now. The lowest-level spiritual heritage here is level-seven. Ten percent of them have Heavenly Spiritual Heritage, fifty percent have level-nine spiritual heritages, and almost forty percent have level-eight spiritual heritages."

Han Fei's heart did a flip. This potential was a little strong! In this case, if they practiced the Bloodline Devouring Technique, it wouldn't be difficult for all of them to advance to the Heaven Spiritual Heritage.

Han Fei pondered for a moment and said, "Old Hong, it's been hard on you. Take them into my Origin Sea. I've saved more than 10,000 human Sea Establishers. You'll be responsible for training them and teaching them the bloodline devouring technique."

"Hiss!"

Hong Yue said in shock, "Master Human Emperor, you must not do that. How can you teach them the divine technique so easily? If they fall into the hands of the enemy in the future, there is a high chance that the divine technique will be leaked. Besides, the aptitude of these people is much better than people of the Raging Sea. It won't be a problem for them to advance to the Sky Opening Realm. When they really need the bloodline devouring techniques one day, you might have already proven your Dao. Then you might be able to give them a modified version or something. This is already a rare opportunity for them."

However, Han Fei shook his head. "Old Hong, you're too shortsighted. In the Sea Realm, there are actually many people who have the Bloodline Devouring Technique. Otherwise, why does any random person from those big clans or super forces have a Heavenly Spiritual Heritage?"

The corners of Han Fei's mouth curled up slightly. "When the human race is about to rise, we should stake everything on this cause. If I'm strong, the human race is strong. If the human race is strong, I'm strong..."

Hearing this, Hong Yue took a deep breath. He couldn't help but remember how Han Fei swept across the Raging Sea. He felt that Han Fei at that moment was back.

God of Fishing - Chapter 2516 - 2516 A New Journey

Three years later.

It had been eight and a half years since Han Fei returned to the Chaotic Wasteland.

On this day, Zhang Daqian left the City of Scavengers and secretly went to the Infinite Mining Area.

If it were in the past, going to the Infinite Mining Area was actually a form of gilding. Those who returned from the Infinite Mining Area would be much stronger than powerhouses of the same realm.

!!

Originally, many people wanted to go with Zhang Daqian. However, in the battle three years ago, the City of Scavengers suffered a heavy loss. That almost caused the Law Enforcement Camp and Scavengers in the City of Scavengers to be wiped out.

After three years, Chen Yan finally brought back a group of about 20,000 Sea Establishers from some secret places.

Therefore, Zhang Daqian actually only led a hundred-person team to the Infinite Mining Area secretly.

This hundred-person team could be considered a private army. After all, Zhang Daqian had already become a Sky Opener and was quite strong. Because the City of Scavengers had suffered heavy losses in recent years, it was not bad to equip Han Fei with these private soldiers.

After all, how many of the lords under the City of Scavengers had a hundred-Sea Establisher Teams?

Furthermore, Zhang Daqian wasn't the first to go to the mining area because Bai Ranran had set off a year ago.

Han Fei vaguely knew that some people also set off secretly. Perhaps because of the incident three years ago, the City of Scavengers no longer dared to act on a large scale.

The moment Zhang Daqian left the city, Han Fei smiled. "It's time to go."

...

Half a month later.

On the border of the wilderness, the Giant Whale Fortress was slowly walking along the border.

Every day, countless Sea Establisher human beings entered and exited the Giant Whale Fortress.

Among these people, there were Sea Establishers, Venerables, and countless people below the Venerable realm.

In fact, for people below the Venerable realm, they couldn't leave the 300,000-kilometer radius of the Giant Whale Fortress at all. No matter how safe the border was, it was very dangerous for them.

Any ordinary conch, sea urchin, big fish, shellfish, sea shrimp, and so on could kill them.

Therefore, in the past eight years, under the baptism of enough resources, there were only no more than 30% of the people below the Venerable realm, including the children, and Venerables accounted for the 50% of the total population. And the remaining 20% had reached the Sea Establishment realm.

In just the past eight years, more than 14,000 people had tried to establish the sea, and nearly 12,000 of them had succeeded.

Of course, this was only possible if there were sufficient resources. It was actually very difficult for a normal mobile fortress to nurture so many Sea Establishers at once.

At this moment, within 300,000 kilometers of the Giant Whale Fortress, there were about 20,000 battlefields and a few large-scale joint battlefields.

In one of the large joint battlefields, a group of 20 peak-level Explorers was hunting an intermediate Venerable-level lobster.

At this moment, the battle had reached its climax. Almost all the 20 people were injured. The only fortunate thing was that none of them were caught by this big lobster, or they would have been dead.

A crisp woman's voice shouted, "Team One, Team Two, contain its pincers and whiskers. Team Three, attack its tail, and Team Four, attack its lower abdomen..."

Logically speaking, it was extremely difficult for such a small number of explorers to defeat an intermediate Venerable. However, more than a dozen of these twenty people had unstable momentum and seemed to be about to enter the Venerable realm at any time.

In the sky, all kinds of great techniques and laws were thrown out.

At this moment, one of them shouted, "I'm going to make a breakthrough. Help me block it."

Spiritual energy was rolling on this person's body, gathering from all directions and enveloping him. The man was overjoyed, feeling that he would be able to return to his fighting state in three seconds and make a breakthrough in battle, which was the best opportunity to polish himself.

Bang!

Suddenly, the lobster ejected its tail and darted straight at the front. Two of the shield-bearers tried to block the lobster, giving the person behind them enough time to make a breakthrough.

However, for explorers, the shrimp stings were like godly weapons, extremely sharp.

With two pops, the two shields exploded. At this moment, the lobster extended its pincers and pretended to fight the people who restrained it. It turned around, becoming faster.

Zhang Ning roared and tried to compete with the lobster in time.

Next to him, someone shouted, "Retreat! Zhang Ning, do you want to die?"

Someone scolded, “Zhang Ning, No! There are plenty of chances to break through to the Venerable realm. Don’t fight for this moment.”

Although everyone was asking Zhang Ning to retreat, he knew that this was a moment of life and death. Only in this way could he unleash his infinite potential.

“Ahhh~”

Zhang Ning roared. He wanted to bet his life’s luck that he could become a Venerable this time.

Crack!

At that moment, the power in Zhang Ning’s body was violent and his blood was boiling. At this moment, he made a breakthrough. He knew that he would probably be hit head-on, but he probably wouldn’t die.

However, a roar came from his side. Zhang Ning turned his head and saw that a shrimp pincer had been clamped at him at some point. In the next moment, he would probably be crushed.

At this critical moment, when everyone was caught off guard, the big lobster suddenly stopped moving. When they turned their heads and took a closer look, they found that a person had stood on the shell of the big lobster at some point in time. This person looked so familiar.

“Hiss ~”

“It’s the Human Emperor. It’s Master Human Emperor...”

In the next moment, Zhang Ning also looked at Han Fei in shock. About eight years ago, they suddenly had resources. Lord Jingjinge said that a human powerhouse protected them and erected a statue for this human powerhouse to worship, calling him the Human Emperor.

The population of the Giant Whale Fortress was less than 150,000. To be precise, there were only more than 130,000. Because they had obtained a lot of resources and activated a comprehensive cultivation mode, there were actually a lot of casualties. To be precise, there weren’t even 130,000. Therefore, they really admired Han Fei. This was because this person had brought them rapid and continuous growth and taught them some great

techniques. It could be said that in the past few years, the overall strength of the entire Giant Whale Fortress had improved by a level.

At this moment, as Han Fei appeared, an invisible suppressing pressure instantly enveloped everyone here. In fact, Han Fei didn't release any special suppressing pressure, but only slightly revealed a bit of dignity. All of a sudden, the big lobster under his feet trembled nonstop, and the surrounding 20-person team seemed to have fallen into infinite fear.

Almost in a few seconds, everyone's face flushed, their breathing quickened, and their bodies trembled uncontrollably.

Han Fei said casually, "Keep breathing and keep circulating your techniques."

In the next moment, they heard a voice. It seemed to be Master Human Emperor speaking, but they couldn't hear him clearly. But whether they could hear him or not, they felt that the operation of their techniques suddenly became extremely smooth, and dozens of spiritual energy storms were set off around them.

At this time, Zhou Jingjing and the others finally noticed the anomaly here.

When they saw Han Fei, they were first delighted and immediately came to Han Fei's side, but they didn't dare to make a sound because they were shocked to find that they couldn't understand what Han Fei was saying. The voice was mysterious, like the sound of the Heavenly Dao. And these explorers were all making breakthroughs. Yes, they were all about to advance to the Venerable realm.

As Sky Opening Realm powerhouses, Zhou Jingjing, Li Tong, and Wang Xu naturally knew that Han Fei was preaching a mysterious Dao. Even they felt a little puzzled and then suddenly had an epiphany.

The three of them looked at each other in shock. Was this the Han Fei they knew back then?

Some Sea Establishers also noticed this, but they didn't dare to come over.

It wasn't until several hundred seconds later that all of these people had broken through to the Venerable realm that Han Fei put away his dignity. And these 20 people were all sitting cross-legged, absorbing the spiritual energy storm and consolidating their realm.

At this moment, Han Fei issued an order in his heart, and Hong Yue, Yingyue, Jiang Ya, and the others appeared.

Apart from Han Fei, seven Sky Opening Realm powerhouses appeared in a row. Plus Zhou Jingjing and the other two, plus Han Fei, at this moment, the Giant Whale Fortress had eleven Sky Opening Realm powerhouses.

Then, a phantom of a world descended, and 14,562 human powerhouses appeared. Except for the 802 people Hong Yue found, they were all Sea Establisher powerhouses.

Seeing this, Zhou Jingjing and Wang Xu couldn't help but gasp.

They could tell that these ten thousand people were not as simple as ordinary Sea Establishers. Fifty percent of them had reached the peak of the Sea Establishment Realm. What did this mean?

This meant that if they were intentionally nurtured and given enough opportunities, coupled with Han Fei's sermon and the great techniques he gifted them, a group of at least a dozen Sky Openers might appear in the short term.

Such strength was already extremely precious in the wilderness. Even excluding Han Fei, it was already a powerful mobile fortress.

At this moment, the people Han Fei brought had already been reminded by Han Fei that they had come to the outside world.

Outside the Chaotic Wasteland was new to them, but not everyone was looking around. After years of cultivation, they admired and respected Han Fei more and more.

At this moment, they certainly couldn't disgrace Han Fei, so they all stood behind Hong Yue and the others solemnly in a military formation.

Han Fei introduced, "Old Hong, this is Zhou Jingjing, a star transformation powerhouse and a follower of the human race. You can have a good talk with her later."

Hong Yue immediately bowed. "Yes, Master Human Emperor."

Then, Han Fei looked at Zhou Jingjing and said, “This is Hong Yue, a strong master of our human race. They had never left the Chaotic Wasteland before and know nothing about the wilderness. The Giant Whale Fortress lives in the wilderness, so your knowledge of the wilderness far exceeds theirs. Therefore, I’ll leave them to you for the time being.”

Zhou Jingjing was shocked and immediately took a deep breath. “Master, I will make them know everything about the Sea Realm in the shortest time possible.”

Han Fei nodded slightly. “OK! Call everyone back! Since they have chosen to follow me, I’ll preach to them today!”

God of Fishing - Chapter 2517 - 2517 Preaching

Chapter 2517 - 2517 Preaching

2517 Preaching

“Preach?”

Zhou Jingjing and the other two were shocked. Just now, they were still amazed by the results of Han Fei’s sermon. Now, Han Fei was going to preach to everyone. They didn’t know what else would happen.

Wang Xu and Li Tong immediately retreated and summoned everyone back.

Han Fei said, “Jingjing, don’t you usually preach to the people in the Giant Whale Fortress?”

!!

Han Fei had been preaching since a long time ago. Under the guidance of Eldest Senior Brother, Han Fei had some experience in sermons.

Zhou Jingjing said, “There will also be lectures, but the effect of our sermons is actually not very good. Firstly, people are in different realms and vary greatly in strength. The other is that the Daos we have comprehended have

already been explained to them many times. The effect we can achieve has long been achieved. There's no point in explaining further."

"Oh? Really?"

Han Fei was a little puzzled. Wasn't the effect of the sermon continuous?

Zhou Jingjing added, "There's another point. In fact, our understanding of our Dao hearts and the Heavenly Dao is not thorough enough, so there are limitations."

Han Fei nodded slightly. That's right. It seems that this is the main reason.

Another moment later.

In less than an hour, everyone in the Giant Whale Fortress returned. There were a total of 128,221 people. Han Fei glanced around. There were only 20,000 Sea Establishers, and less than 1,000 peak-level ones.

It could be said that although Han Fei had only brought more than 10,000 human beings, in a real battle, they could directly kill everyone in the Giant Whale Fortress if the Sky Openers didn't take action.

Compared to the uniformity of the human camp, the people in the Giant Whale Fortress were obviously less disciplined. Although the human race was oppressed, they were still a power in the City of Scavengers. They had been fighting the most intense fights and risking their lives, so their aura was naturally not something the Giant Whale Fortress could compare to.

Therefore, when the people from the Giant Whale Fortress saw Han Fei and the others, countless people were shocked.

Someone secretly said, "Brother, are these human beings? They look so serious!"

The other person said, "Shut up. Almost all of these people are Sea Establishers, and half of them have reached the peak of the Sea Establishment Realm. Their blood and Qi are surging, and they are definitely not the people we can compare to. They can even hear your voice transmission if they want to."

"Hiss!"

Someone was shocked. "So strong! Which mobile fortress can block them?"

Someone scolded, "Nonsense, they all came from the Chaotic Wasteland. The Chaotic Wasteland is known as one of the most dangerous places in the East Sea Divine Realm."

Someone said respectfully, "I heard that the Human Emperor is here. These are all the Human Emperor's men. Even his ordinary followers are so strong. Will the Human Emperor accept us?"

Someone sighed. "Master Human Emperor has given us countless resources. How can he not accept us?"

A peak-level Sea Establisher warned, "Stop nagging. If Master Human Emperor wants to preach, gather up. Don't disgrace our Giant Whale Fortress. Let's stand in this formation too."

After a while, when the people from the Giant Whale Fortress stood up in a crooked military formation, Zhou Jingjing blushed slightly. But Han Fei didn't care. It wasn't a real army, so there was no need to be so strict.

Under Zhou Jingjing's arrangement, everyone sat cross-legged on the sea. Countless gazes from the Giant Whale Bastion kept sweeping over the human camp.

For the human powerhouses, this was the first time in their lives that they felt someone looking at them with admiration. Before this, they had no idea how it felt to be looked at with envy and admiration.

But now, they felt an inexplicable honor in their hearts at that moment. They stood straighter and looked straight ahead, waiting solemnly. All of them were determined not to disgrace Master Human Emperor.

At this moment, Hong Yue raised his hand and shouted, "Sit."

Boom~

Everybody sat cross-legged on the surface of the sea in the same uniform posture. Seeing this, the people of the Giant Whale Fortress couldn't help but click their tongues.

At this time, Han Fei strolled to a place not far from them, and everyone's eyes fell on Han Fei.

The people of the Giant Whale Fortress envied, admired, and respected these human powerhouses, but they were curious about Han Fei.

They certainly admired Han Fei, but felt more curious about him. In their opinion, someone who could make Lord Jingjing submit must be an extraordinary figure.

Han Fei came a hundred kilometers away from them. They thought that Han Fei would approach closer, but he stopped.

In the next moment, Han Fei looked at Hong Yue and Zhou Jingjing and said casually, "Sit."

At this moment, Zhou Jingjing and the others also sat down cross-legged. At the moment they sat down, they saw a dazzling golden light approaching the sky. At that time, a super giant 330,000 feet tall suddenly appeared in front of them.

"Hiss ~"

Gulp!

"It's so big!"

"Is this the Human Emperor?"

At that moment, not only the people in the Giant Whale Fortress were shocked, but even the human beings, including Hong Yue and Yingyue, were trembling slightly.

At this moment, Han Fei was like a god, sitting between the heavens and earth. His body was golden and dazzling and no one dared to look straight at him. Even before Han Fei began to preach, the Dao runes had already dissipated.

Gulp!

On the human side, it was the first time that they saw Han Fei in such a state. Their eyes were filled with pride.

As for the human powerhouses, some of them even shed tears. Last time, Han Fei easily killed so many Sky Openers and more than 60,000 Sea Establishers with the flip of a hand, which greatly shocked them.

But at that time, they actually couldn't see it clearly, because they weren't qualified to see Han Fei's battle with their strength.

But now, a ten-thousand-foot-tall giant appeared in front of his eyes. What could be more shocking than this?

Han Fei's voice echoed between the heavens and earth. "In the future, the human powerhouses and the people of the Giant Whale Fortress should support and grow up with each other. I will teach you various great techniques. I want all of you to establish the sea... and even open the sky and become the overlords of the Sea Realm in the future, creating a golden age of the human race..."

Han Fei's words were full of mystic Dao runes and refreshed everyone. Many of them even imagined a magnificent scene in their minds.

Hearing this, many people felt that their Dao hearts were loosening and they seemed to be going further.

Everyone in the Sea Realm knew that it was difficult to improve their Dao hearts, but Han Fei's words loosened their Dao hearts. Some people's Dao hearts had even improved.

Before he began to preach, the audience's Dao hearts had taken a step forward. At that moment, Han Fei felt that the power of faith he hadn't felt for a long time was crazily gathering.

After leaving the Raging Sea, Han Fei could no longer feel the power of faith from the Raging Sea. At this moment, he finally had his own source of power of faith in the Sea Realm. Although it was relatively little, this was the first step. Would he still lack this bit of power of faith when he conquered the City of Scavengers in the future?

Ignoring this, Han Fei began to preach. There was a booming sound in the world. "The Great Dao is invisible, the Dao heart is impermanent..."

In this world, there were too many people who could preach, but there were too many people like Zhou Jingjing. If they kept preaching, there would be no

effect. But there were also people whose preaching could take effect continuously, so they would rise quickly.

For example, the Fist Light Mountain, the Ghost Strait, the Gate of Heaven, and other powers.

Therefore, it was impossible to catch up with these superpowers through sermons. But the good thing was that whether it was the Giant Whale Fortress or the human race, they were still too weak compared to those superpowers. Therefore, they had a lot of room for growth. If they were suddenly given a sermon, the effect would far exceed these superpowers.

Just an hour after Han Fei's sermons, someone made a breakthrough, setting off a spiritual energy storm.

Some people comprehended the Dao, and some had their Dao hearts improved greatly.

One day later.

It could be said that everyone had gained something. It couldn't be said that all of them, but it could be said that 80% of them had their Dao hearts improved.

Below the Venerable realm, there were frequent breakthroughs. Some even crossed three levels.

The moment Han Fei stopped sermons, almost at the same time, more than 500 people were about to establish the sea at the same time.

There were still more than 3,000 people who were about to enter the Venerable realm.

There were even five people who wanted to open the sky.

However, Han Fei stopped them. Come on, if they opened the sky so casually, they would be crippled in the later stages.

Han Fei said, "Anyone who can suppress your cultivation must suppress it. The tribulation is right there. You can transcend it sooner or later. But the stronger you are now, the stronger you will be after the tribulation. Don't consume your late-stage potential in advance."

Finally, under Han Fei's suppression, only one human powerhouse couldn't suppress it anymore, so Han Fei took him to open the sky. And there were still more than 100 peak-level Venerables who had to establish the sea. Everyone else forcibly suppressed their cultivation.

However, after today's sermon, Han Fei's image in everyone's eyes soared to an unprecedented height.

God of Fishing - Chapter 2518 - 2518 Godfiend Sea

"The Infinite Mining Area?"

Zhou Jingjing took a deep breath and looked at Han Fei in surprise. "With our current strength, can we establish ourselves in the Infinite Mining Area?"

Han Fei didn't know much about the Infinite Mining Area before, so he asked in confusion, "Are you surprised? Why? What do you know about the Infinite Mining Area?"

Zhou Jingjing said, "I haven't been there, but I've heard many rumors about the Infinite Mining Area in the wilderness. It's said that the Infinite Mining Area has the highest mortality rate in the East Sea Divine Realm except for the Sky Crater World. The Sky Crater World is a battlefield where people fight every day. Naturally, many people die there. But the Infinite Mining Area can't be said to be a battlefield. It's a resource competition place where the various large factions in the East Sea Divine Realm gather. In order to compete for the resources of the mining area, various large factions, races, pirates, adventurers, explorers, and even divine beasts and ferocious beasts fight ceaselessly there. I heard that every hundred years, at least 100,000 Sky Opening Realm powerhouses are sent to the Infinite Mining Area from other places in the East Sea Divine Realm, and there are countless Sea Establishers sent there."

!!

"Huh?"

Hearing Zhou Jingjing's words, Han Fei was interested. He couldn't help but ask in surprise, "What's in the Infinite Mining Area? Why would it attract so many strong masters?"

Zhou Jingjing said firmly, "In the past, perhaps millions of years ago, it was said that a super-large-scale war between gods and demons took place in the Infinite Mining Area. Divine beasts and ferocious beasts participated in the war too. It was said that the bones and blood of gods were sprinkled on the ground and mixed with the ground veins there, giving birth to many rare treasures and precious minerals. Most parts of the Infinite Mining Area are dangerous. Up to now, it's said that only 30% of the Infinite Mining Area has been mined. The other places are all unknown areas."

"All unknown areas?"

Han Fei frowned. "No matter how fierce the war between the gods and demons was, it has been so many years. Can't Monarchs explore the place? Why is it only 30% developed?"

Zhou Jingjing said, "The Monarchs dare not go there. According to history, in the Infinite Mining Area, Monarchs are in even greater danger than Sky Openers. Countless Monarchs have died there. Over time, Monarchs no longer care about the Infinite Mining Area. They will only send Sky Openers there to take trials, and..."

Han Fei frowned. "What? Just say it."

Zhou Jingjing explained, "Those who go to the Infinite Mining Area are said to have been specially selected. It's said that they're especially extreme. For example, some peak-level Sea Establishers who can't open the sky, some extremely strong Sea Establishers, will go to the Infinite Mining Area. Besides, some Sky Openers who don't want to spend a long time cultivating but want to go to the extreme, some Sky Openers who are almost dying of old age, and some lunatics in the Sky Opening Realm will also go to the Infinite Mining Area. I heard that the people in the Infinite Mining Area are ten times crazier and ten times more ruthless than the soldiers in the Sky Crater World. Over time, it has become an extremely dangerous place."

Han Fei asked, "Is it because people can quickly improve their strength there?"

Zhou Jingjing said, "I heard that it's mainly the refined mines in the Infinite Mining Area that can assist cultivation. Occasionally, there will be some divine crystals and some special treasures transformed from the essence blood of gods. We don't know what's there exactly. Those who have been to the Infinite Mining Area don't want to talk about it. It seems to be a world

completely different from the Sea Realm there. Whoever can walk out of there seems to be particularly arrogant.”

“Divine Crystal?”

Han Fei’s heart did a flip and he couldn’t help licking the corner of his mouth. In this case, it was indeed worth many people taking the risk.

However, Han Fei thought that Zhou Jingjing had never been there, so she was too afraid of the Infinite Mining Area. If that place was really as horrible as she said, there would have been no one alive there.

Therefore, it could only be said that that place was relatively dangerous but hadn’t reached the level of a forbidden place.

Han Fei’s heart did a flip. “You mean there are many pirates in the Infinite Mining Area?”

Zhou Jingjing nodded quickly. “Their composition is very complicated. I heard that divine beasts, ferocious beasts, and countless races are mixed together.”

Han Fei grinned. “Isn’t it great to improve strength quickly?”

Seeing the excitement in Han Fei’s eyes, Zhou Jingjing’s expression was complicated. It seemed that Han Fei didn’t listen to her warning at all.

She said, “Master Human Emperor, although we are not a weak force now, we are still too weak compared to the forces in the Infinite Mining Area. The casualty rate of Sea Establishers is especially high over there.”

Zhou Jingjing was implying that our Sea Establisher might all be consumed there.

Han Fei said casually, “Do you know how to grow faster? Killing is the fastest way to grow. This world is like this. On the path to the heavens, billions of people are competing. Countless people strive to be the first. For what? For a chance of survival, and for that one in a billion chance of success.”

Han Fei said resolutely, “I’ve decided to go to the Infinite Mining Area. Also, do you know the Godfiend Sea?”

Zhou Jingjing nodded. “Yes! A place where no one returns. It can be called the first forbidden place in the East Sea Divine Realm. So far, no one has ever entered the Godfiend Sea and made it out alive.”

“So creepy?”

Han Fei had planned to go to the Godfiend Sea to get the old turtle out, but he dropped the idea after hearing what Zhou Jingjing said.

He roughly knew that the Godfiend Sea should be a place where demons were sealed. There might be a peerless seal there that sealed countless demons. From the beginning, Han Fei had felt that the old turtle was not simple.

When the old turtle appeared, if it weren't for the little calabash, he would have been invincible.

Even though he had lost a lot of memories, the old turtle could still unleash the extraordinary power of the Sky Opening Realm with just a wisp of his soul. It could be seen that this old man was definitely not weak.

Although the old turtle couldn't answer a lot of his questions, it was said that this old guy had lived for millions of years. Han Fei thought that he was at least a Star Transformation Realm powerhouse.

When Zhang Daqian set off, Han Fei had synchronized information with him. He had thought that there was a way in the Chaotic Wasteland through the Godfiend Sea to reach the Infinite Mining Area.

However, that wasn't the case. Zhang Daqian's route was along the edge of the Godfiend Sea. Few people paid attention to this route, which could lead him to the border between the Sea of Gods and the Infinite Mining Area.

According to the information of Zhang Daqian, the mining area occupied by the City of Scavengers was relatively close to the Godfiend Sea.

Han Fei's heart did a flip. “Follow me on this road. Let's walk close to the edge of the Godfiend Sea.”

...

One year later.

Because Han Fei and the others were leading the people of the Giant Whale Fortress cultivating along the way, their speed inevitably slowed down, even slower than Zhang Daqian and the others.

Finally, one day a year later.

Suddenly, the old turtle woke up.

The old turtle said, "Han Fei, have you reached the Godfiend Sea? You must have, right?"

Han Fei was surprised. "How do you know?"

Indeed, according to the itinerary, they would reach the Godfiend Sea tomorrow, and it would take about three months to bypass this place.

The old turtle said, "I sensed it. I sensed my body's call to me. Definitely. It can't be wrong."

"Huh?"

Han Fei's heart did a flip. The old turtle was probably separated from his original body by countless seals. How could he sense it?

Han Fei said, "Don't be excited. We are indeed going to the Godfiend Sea indeed, but whether or not to go in depends on the situation."

The old turtle was so excited that he couldn't control himself. "Yes, yes, we can't go in casually. It's very likely that we won't be able to get out. From what I remember, there seem to be many demons sealed inside. Alas, who sealed them? Anyway, there are all kinds of demons suppressed inside. We have to study slowly to see if we can break the seal from the outside."

Han Fei sneered. "You're not the original body. With your current strength, you want to break the seal from the outside? Dream on."

However, the old turtle said, "I can offer sacrifices! Since I can sense my original body, my original body can also sense me. As long as I make a sacrifice, I can be replenished. Not only can I grow quickly, but I can also obtain a lot of memories."

"Huh? You can do that?"

Han Fei's heart stirred. In that case, he could give it a try. If the old turtle's original body could fuse with this remnant soul through sacrifice, he might be able to obtain a lot of information about the Godfiend Sea.

In this way, he would know a lot more about the Godfiend Sea.

Han Fei was in a good mood. "Okay! I'll take you there in three or five days at most."

The next day.

When Han Fei and the others saw black clouds that spread from the sky to the sea, he saw a strange apocalyptic scene where the sea and the sky were connected.

It was like the scene before a super hurricane, when black clouds pressed down on the city and enveloped everything.

Walking here, Han Fei felt that the spiritual energy in his body was flowing away. The seawater here was flowing towards the place enveloped by the black clouds.

All of a sudden, eleven dark chains popped out of the black clouds and whipped Han Fei and the others like divine whips.

Yes, because at that moment, Han Fei and the others did something at the same time, which was to try to investigate the black cloud with their perception.

However, the moment his perception touched the black cloud, dark chains broke through the void and whipped at Han Fei and the others.

Zhou Jingjing suddenly exclaimed, "It's the legendary Divine Chain of Death! Not good! Retreat!"

In the blink of an eye, Han Fei suddenly jumped up and slashed across the sky, instantly severing ten perceptions. At the moment the perceptions shattered, the chains turned into nothingness in midair.

"Pfft!"

Everyone vomited blood and suffered a backlash.

Yingyue shouted, "Be careful, Master Human Emperor."

Zhou Jingjing, Hong Yue, and the others all looked at Han Fei in shock. Yes, Han Fei had severed other people's perceptions, but not his own.

He flew into the air and grabbed the dark chains with one hand. This scene was like a collision between immortals and demons.

God of Fishing - Chapter 2519 - 2519 Old Yuan's Original Body

Chapter 2519 - 2519 Old Yuan's Original Body

2519 Old Yuan's Original Body

At that moment, when he clasped the dark chains with a huge void hand, he felt that his power was flying away as if it was being absorbed by the chain. He felt that he was about to be dragged into the Godfiend Sea.

Buzz!

At that moment, Han Fei activated his Great Dao, stacked five times his comprehensive combat power, and crushed the dark chain.

In the rear, Zhou Jingjing, Hong Yue and the others looked at each other in bewilderment. They knew how terrifying the black chain was. Just now, when they were targeted by the chain, they felt that they were going to die and couldn't escape.

!!

However, Han Fei was able to break the chain barehand, which showed how powerful he was.

However, Han Fei wasn't smug at all, because when the chain was broken, three chains broke through the void in a row. Furthermore, void Dao patterns spread in the void and imprinted on the chains in an instant.

Han Fei punched out. The Star Fist Technique exploded like a star bloomed, extremely violent and powerful.

However, when he punched out, half of his strength was taken away by the chains.

Although the three chains exploded at the same time, in the next second, thousands of black chains swept towards Han Fei through the darkness.

Han Fei roared, "Everybody, retreat!"

Seeing this scene, Zhou Jingjing shouted, "Everyone, return immediately. The trial is terminated."

This was the first time they had seen the horror of the Godfiend Sea. They were only at the periphery, but they would be chased by these strange chains as long as their perception was detected.

More importantly, Zhou Jingjing had heard of the rumor about the Divine Chain of Death, but she didn't expect it to be triggered so easily. I just perceived it with my soul. Is it necessary?

"Master Human Emperor..."

Yingyue and the others tried to come up, but Han Fei stopped them. "Don't come over."

Then, a stone hammer appeared in Han Fei's hand. At that moment, everyone felt that their eyes were dazzled as thousands of human emperor phantoms appeared and the Ultimate Hammer erupted.

Clang, clang, clang, clang... Han Fei fought and retreated at the same time, not daring to be negligent.

Finally, when Han Fei retreated to a certain range, the Divine Chain of Death turned into Dao patterns that filled the sky and was absorbed back into the black cloud.

"Shoot! Old Yuan, you never said that the Godfiend Sea was so dangerous!"

Han Fei was a little frightened. It was just a test of perception, but the Giant Whale Fortress was almost wiped out. Wasn't this ridiculous?

Han Fei immediately shouted, "Everyone, maintain a distance of more than 100,000 kilometers from this black cloud."

At this moment, the sledgehammer in Han Fei's hand disappeared. When he looked at the Godfiend Sea again, his eyes changed.

The old turtle's voice sounded, "Don't be excited. I've never seen what it's like outside the Godfiend Sea, let alone know that there will be these Dao Pattern Chains, but at least we're safe."

The corners of Han Fei's mouth twitched. If it were an ordinary person, he would have been dragged in.

Not that Han Fei was bragging, but he was sure that many people were pulled into the Godfiend Sea by the chains.

Everyone could be curious. When someone saw this magical scene for the first time, they inevitably wanted to see it for themselves. That was why all the Sky Opening Realm powerhouses, including Han Fei, were affected by the chains just now, and no one was spared.

Han Fei's face changed slightly. "Old Yuan, why don't you make a sacrifice here? After the sacrifice, we can quickly cross the Godfiend Sea. It's unrealistic for me to go there now. I haven't even saved the human race. I can't be trapped in this damn place."

The old turtle said, "I know. It's indeed a little scary. However, I don't feel an obvious connection with my body here. We may have to walk around for a while."

Han Fei nodded. "Okay!"

Turning his head, Han Fei said to Zhou Jingjing, "Ask everyone to return to the Giant Whale Fortress, stop the trial, and prepare to go forward at full speed. Bypass the Godfiend Sea as soon as possible."

"Yes, Master Human Emperor."

While everyone was returning in a hurry, some Sea Establishers had already seen the scene of Han Fei's dark chains fighting. Although they had tried their best to remain calm, they were still shocked.

As for the human powerhouses, they were extremely proud. Although they still didn't know Han Fei's true strength, they had more or less estimated it. In their hearts, Han Fei's strength was on the same level as Zhao Honghuang's. They were more willing to believe that Han Fei was even stronger.

After all, Han Fei was the first to lead the human race to fight against the City of Scavengers. Some people even firmly believed that Han Fei was a Monarch.

Han Fei inexplicably collected another wave of power of faith, but he didn't pay much attention to it. This time, he only rushed with Zhou Jingjing.

After walking around the Godfiend Sea, Han Fei found that there were no great dangers here, but there were too many of a kind of algae plant called the Demon Tide. Some of these plants were even enhanced with Dao patterns. The closer the Demon Tide was to the black sea of clouds in the Godfiend Sea, the stronger its power, the higher its level.

However, in terms of danger, it was actually only a little dangerous for Sea Establishers.

As for other dangers, although there were no dangers around the Godfiend Sea, there were no treasures, such as mineral veins, spiritual fruits, ground veins, or spiritual springs. There was nothing here. It was not an exaggeration to say that it was the most barren place in the sea.

Han Fei estimated that even pirates were unwilling to come here to take a look.

Two months later, Han Fei, who was sitting on the giant whale, suddenly opened his eyes.

The old turtle said, "It's here. I feel that the summoning from my original body is the strongest here."

Han Fei's heart did a flip. He suddenly stood up and looked at Zhou Jingjing who was a little puzzled. "Go five million kilometers away and wait for me."

Zhou Jingjing didn't know what was going on. Thinking that Han Fei might have found something wrong, she just glanced at the Godfiend Sea and continued forward without asking much.

After confirming that Zhou Jingjing couldn't see him, Han Fei issued an order in his heart and an old turtle appeared beside Han Fei.

The lifespan of a turtle was beyond imagination. The body that Old Yuan had possessed was still young after being cleansed by Han Fei's Origin Star. When the old turtle's soul entered this body, his strength had even reached the edge of the star transformation.

All these years, the old turtle didn't cultivate, because this body couldn't carry his growth, so he had been sleeping.

At this moment, the old turtle took a deep breath and said, "Han Fei, I'm going to sacrifice my body as a bridge to establish a connection with my original body. Perhaps I'll only have my soul left again."

Han Fei shrugged and said, "Anyway, this body is no longer useful to you. It's already extraordinary that it can help you reach the Sky Opening Realm."

The old turtle nodded. In the next moment, it ignored Han Fei. Countless complicated Dao patterns of Heaven and Earth appeared on his back, and he turned into a giant turtle. 128 Dao patterns appeared on his back, head, limbs, and other corners of his body in a row.

Han Fei saw that the old turtle's soul left his body and then began to distort.

After about three hundred seconds, Han Fei suddenly saw that the old turtle's soul began to become stronger at a visible speed. Endless black fog escaped from the old turtle's soul, and a ferocious aura bloomed here.

Suddenly, the old turtle's soul condensed into a black fog turtle shadow, and his body in the Sky Opening realm was corroded by an invisible force.

At that moment, his soul opened its eyes, and Han Fei seemed to see a ferocious turtle wrapped in black flames in the boundless darkness through a pair of turtle eyes.

"Is this... Old Yuan's original body?"

At that moment, Han Fei felt as if not knowing the old turtle at all.

Fortunately, the unfamiliarity and distance quickly disappeared. Then, Han Fei saw the old turtle wrapped in black smoke tremble. It seemed to open its mouth and say something to him.

However, Han Fei couldn't understand the turtle language at all. Fortunately, there were Dao patterns floating in the air, and Han Fei could vaguely see the words that the old turtles wanted to express.

What was revealed first was the word "Demon".

"Demon? What demon..."

Then, the character "god" appeared.

Han Fei's heart did a flip. "Demon God? Who is the Demon God? What's wrong with the Demon God? Old Yuan, can we finish talking in one breath?"

Then, the Dao Patterns formed another word, "Fights".

At this moment, Han Fei saw that the old turtle's soul eyes were already a little muddy.

The other side seemed to be anxious and trembled crazily. At that moment, Han Fei saw dense black chains appear on the surface of the old turtle in the black flames, binding him.

At the last moment, Han Fei saw the last word he wrote with Dao patterns, "at".

Han Fei still wanted to look, but the old turtle's soul eyes were completely turbid and he couldn't see anything.

"Demon God fights at..."

Han Fei's heart did a flip. This sentence's meaning was actually quite obvious. Behind it should be a place where the Demon God was fighting. However, why should he tell him where the Demon God was fighting?

He might have an answer to this question when he had the time to ask Eldest Senior Brother and the others.

At this moment, the old turtle woke up. Although his body was gone, his soul power had been replenished. It was actually the externalization of a portion of his Yang Soul.

Han Fei's eyelids twitched slightly. A Yang Soul? That was something that could only be cultivated in the late-stage Star Transformation Realm. It meant that the old turtle was at least in the late-stage Star Transformation Realm.

However, the old turtle's original body was still trapped in the Godfiend Sea, and it could transmit information to him with Dao patterns, indicating that the old turtle's Yang Soul was only a part of him. In this case, the old turtle was at least in the peak-level late-stage Star Transformation Realm.

The old turtle suddenly screamed, "No, no! The power of this body is too weak. The replenishment power I can obtain from my original body through the seal of the Godfiend Sea is too little. Han Fei, I gained a lot of memories this time. Hahaha, I'm not an ordinary Sky Opener. I've reached the perfected Star Transformation Realm."

The corner of Han Fei's mouth twitched. Ignoring the old turtle, he asked, "Since you can bring out your memories, why did your original body send me a message just now?"

"Send you a message?"

Han Fei was taken aback for a moment. He suddenly looked at the old turtle and had a suspicion... Old Yuan was probably just a clone!

God of Fishing - Chapter 2520 - 2520 Old Yuan's Identity and the Infinite Mining Area

Chapter 2520 - 2520 Old Yuan's Identity and the Infinite Mining Area

2520 Old Yuan's Identity and the Infinite Mining Area

Seeing that Han Fei was looking at him strangely, the old turtle felt that something was wrong. He asked weakly, "What's wrong?"

Han Fei looked at Old Yuan with a complicated expression and said, “Old Yuan! Do you know about the Demon God?”

The old turtle was stunned for a moment and then widened his eyes. “How do you know of the existence of the Demon God?”

Han Fei was lost for words and had an even stronger premonition. Ignoring the old turtle, he asked, “Old Yuan, do you know where the Demon God fights?”

!!

The old turtle was stunned for a long time. “Where the Demon God fights? Of course it’s... Wait, that’s the Demon God. I haven’t even seen him. How can I know where he fights? Besides, the Demon God is a real god. He has fought many battles in his life. Who knows which battle you are asking about?”

At this time, Han Fei sighed slightly and said, “Old Yuan! You established a connection with your original body. What did you know from it?”

The old turtle smiled. “A lot. I found that there are still many soul remnants in my original body. This part of my soul couldn’t pass through so many space barriers to reach your small world. This time, it can be said that my memories have been replenished a lot. My original body is a strong master in the perfected Star Transformation Realm. The path I took and the technique I practiced turned out to be the Dao of Perfect Balance... And, the most incredible thing is that I found that I didn’t just take a Great Dao, so I took a new one...”

“A new Dao?”

This new Dao seemed to further confirm Han Fei’s guess. Han Fei’s eyelids twitched as he said, “Old Yuan! Then do you know how you were locked into the Godfiend Sea, and which demons are there?”

Old Yuan was about to brag, when he suddenly realized that every time some creatures and familiar faces appeared in front of him, he was suddenly suppressed by a certain force.

It was as if his mind suddenly stopped after he dreamed a blurry picture, and his mind spontaneously resisted the memory.

The old turtle shouted in a low voice, "That's impossible! I remember it clearly. I wanted to tell you just now."

The old turtle tried hard to remember, but he couldn't remember anything. However, he remembered the Sea Realm, cultivation, Monarchs, and many other things very clearly.

The old turtle said in shock, "There must be some strange power in this Godfiend Sea that blocked my memories, making it impossible for me to remember some things."

Han Fei wasn't in a good mood either because the old turtle knew too many things about him. He knew about the Demon Purification Pot, and he was the only person other than Chu Hao who knew about it.

However, if the old turtle was a clone, wouldn't the secret be known by the old turtle's original body?

Clones and the original body were two different concepts. Just recalling the old turtle's ferocious, brutal, and ruthless personality the first time they met, he could imagine the old turtle's original body's personality.

Fortunately, he was now sealed in the Godfiend Sea. Otherwise, God knew what would have happened.

At this moment, Han Fei thought about it again. If even a clone could pass through multiple space barriers, would its original body be weak?

Thinking of the original body just now, Han Fei suddenly said, "Old Yuan! How do you know that you are a perfected Star Transformation Realm cultivator?"

The old turtle happened not to want to recall those memories, so he said, "How can I not know my own strength? Besides, let me tell you, I'm not an ordinary perfected Star Transformation Realm cultivator. My turtle shell is extremely powerful, and you have no idea how strong my path is. It's not that I'm bragging, but I can kill a Dao Prover when I was only a Sea Establisher..."

The old turtle looked proud and complacent, but he found that Han Fei seemed very calm and didn't seem surprised at all. He couldn't help but ask, "Do you doubt what I said?"

Han Fei glanced at the old turtle with a complicated expression and said, “I have no doubt at all. I think you are stronger than you think.”

The old turtle immediately looked smug. However, what Han Fei said next sent a chill down his spine.

Han Fei said, “Old Yuan! Has it ever occurred to you that you might be a clone?”

Han Fei’s words stunned the old turtle. He was shocked at first and then said angrily, “Impossible. I’m so powerful and have the bearing of a Great Monarch. How can I be a clone?”

However, Han Fei casually added, “Old Yuan, do you remember that the first time we met, when I asked you questions, you didn’t know anything, but you felt that you were an ordinary emperor. Also, at that time, you said that you had staked everything and your entire soul had come over. Only your body was still sealed. But now you suddenly have other souls and your Dao has been connected. Don’t you suspect anything?”

The old turtle was stunned and then said, “That’s impossible. I can cultivate. Have you forgotten? I casually possessed a turtle and cultivated all the way to the Sky Opening Realm. Isn’t this talent strong? Can a clone cultivate? A clone is just a clone.”

Han Fei asked, “You may be an avatar.”

The old turtle said, “How is that possible? I could even fuse with my body just now. I remember many techniques and recall many things...”

Han Fei said, “Old Yuan! We’re old acquaintances. Would you believe me if I said that I saw your original body talking to me secretly?”

Swish ~

At that moment, the old turtle began to tremble inexplicably. He was a little frightened and his voice was trembling. “Han Fei, I warn you! Although I can’t beat you now, my soul power is abnormally powerful at this moment. I’ve already reached the peak-level late-stage Star Transformation Realm.”

The old turtle became uneasy and irritable, trying to avoid Han Fei’s question. He was unwilling to believe what Han Fei said.

Han Fei heaved a sigh. “Old Yuan! We’re master and servant. Do you think I’ll lie to you? Just now, your original body said some words to me, which was that ‘the Demon God fights at’... I don’t know where he fights, but someone will definitely know. Therefore, I’ll find out sooner or later. The question is, do you still want to find your original body?”

The old turtle was stunned by Han Fei’s question. If what Han Fei said was true, that would be horrible. He couldn’t believe it himself.

After a moment of silence, the old turtle suddenly asked, “Are you going to the Infinite Mining Area?”

Han Fei nodded. “That’s right! Let’s go to the Infinite Mining Area first! I’m afraid that we won’t be able to get out after entering the Godfiend Sea.”

The old turtle said, “Then let’s go to the Infinite Mining Area first. As far as I remember, the Infinite Mining Area has existed for a long time. Millions of years ago, this place had already been a very dangerous place. But at that time, 70 to 80% of the Infinite Mining Area had definitely been explored. But now, only 30% of the area has been explored. It can only mean that the current Sea Realm is too weak.”

Han Fei raised his eyebrows. “Seventy to eighty percent? Are you sure?”

The old turtle said, “Of course. As I remember, I once found a top mine in the Infinite Mining Area and slept for more than 100,000 years. Then, someone invaded and I was forced to leave. At that time, at least 50% of the Infinite Mining Area had been explored. Although I didn’t go back later, I heard that there were frequent battles there, and sometimes even gods were involved. But I know that they were fighting for the treasures in the mining area. But I can be sure that the Infinite Mining Area doesn’t just have the divine crystals left behind by the gods. There are ultimate treasures that even the gods want to obtain. As for whether they were taken away by the gods, it’s hard to say.”

Han Fei’s eyes glittered. “So, you are actually very familiar with the Infinite Mining Area?”

The old turtle said, “Yes. Although I often sleep for ten thousand years, it’s very important to find a suitable place to sleep. Therefore, I’ve explored at least 50% of the Infinite Mining Area.”

“Huff!”

Han Fei immediately took a deep breath. In this case, no matter what, the old turtle knew more about the Infinite Mining Area than all the existing forces.

Han Fei's eyes glowed. "Old Yuan, were there any restrictions in the Infinite Mining Area back then? After all, it was millions of years ago. It's said that now no Monarchs will explore the Infinite Mining Area. It's said that they might easily die there."

The old turtle said, "It's normal to die there! There are mutated mine demons in the Infinite Mining Area. You might not know what mutated mine demons are. For example, if a Monarch dies in the depths of a mine, the mine there may repair his body and give birth to a new soul body. Then, is this Monarch really dead? No, he just lives in another form. Perhaps his soul is still hidden in his body, waiting to be reborn."

"Really?"

Han Fei was shocked. Didn't this mean that these mutant mine demons could directly become Monarchs?

The old turtle snorted. "Why not? I suspect that there may be a god-level mine demon deep in the Infinite Mining Area. Of course, normal intelligence won't be able to control a god-level mine demon's body. Therefore, even if there is a god-level mine demon there, his spiritual body might not be enough to control a god's body. Of course, this is not the most terrifying thing. What is terrifying is an extreme situation."

Han Fei couldn't help taking a breath. Wasn't this the most terrifying?

Han Fei asked, "What could be more extreme than this?"

The old turtle said, "Of course it's the gods whose souls haven't perished and whose remnant souls are still there. If those mine demons can obtain a god-level body that is compatible with them, it's almost possible for the god to be reborn and return to the position of god. Of course, the probability of this happening is too low. I guess that there shouldn't be any gods in this mining area now, but there might be Great Monarch-level mine demons."

Han Fei didn't think that they should be prepared for the worst. The gods had died? Who had really seen it? If they hadn't seen it with their own eyes, they shouldn't have said that.

Han Fei asked, “Old Yuan, are you very familiar with Monarchs? You said that it was difficult to meet a Monarch before, but now you’re talking about gods? Isn’t this leap a little too big?”

The old turtle found it hard to explain.

However, the old turtle looked at Han Fei. “What are you going to do with your avatars in the future?”

Han Fei smiled and said, “I’m different from you. You should know that my avatars are separated from my main soul. In a sense, they’re not my avatars, but my selves. However, as you know, some avatars are not separated from the main soul. This is what I’m afraid of. Once you’re not separated from the main soul, but a consciousness born in a certain way, or a brand-new soul after the soul mark is obliterated, once you fuse with your original body, I’m afraid you will be gone.”

The old turtle nodded. He didn’t dare to take the risk. This was because if the original body separated some soul and created an avatar, there would be a lot of demand on the original body’s soul, which would definitely cause his strength to be greatly reduced.

This was what Han Fei did back then. When he created Nezha, his original body’s soul power was greatly reduced. He had to rely on many opportunities to replenish the lost soul power.

Han Fei couldn’t help sympathizing with the old turtle. This was because if he was an avatar created by the original body’s soul, his information would be synchronized with the original body. The two could be completely regarded as one.

Unlike now, there was a memory gap between the old turtle and the original body. It seemed that their information couldn’t be completely synchronized.
