

God of Fishing - Chapter 2541 - 2541 The Seven Kill Army

Although Han Fei was going to kill people, he was not stupid. The Bloodthirsty Banner Fish Tribe must have known that the three perfected Star Transformation Realm and eight peak-level late-stage Star Transformation Realm powerhouses were all dead.

Since they knew, would they just sit there and wait for death? Obviously not. Their first thought must be to run!

Therefore, Han Fei directly located the escape route of their strongest with the Vast Ocean Navigator.

Then, he met Zhou Jie.

!!

The God Sealing Spear formed by the Infinity Water gave Zhou Jie no chance to resist at all. He could only watch Han Fei helplessly.

Han Fei said, "Do you think you can run away with your people like this? To my surprise, the strongest person left in the Bloodthirsty Banner Fish Tribe is only a peak-level late-stage Star Transformation Realm cultivator."

At this moment, Zhou Jie felt that he could speak again. He asked quickly, "Who are you?"

Han Fei snorted. "Cut the crap. Of course I'm the one who came to destroy your Bloodthirsty Flag Fish Tribe. I know that you have the second leader and the third leader who are out hunting with a large number of people. Do you have a way to call them back? Or are you looking for them?"

Zhou Jie's heart did a flip. This person didn't know that he had resources. "My lord, if you can spare my life, I can help you call the second and third leaders back. I can do it now."

Han Fei grinned. "Oh! Why didn't you tell me earlier?"

In the next moment, Zhou Jie felt a crisis in his soul and the fear of death welled up in his heart. Then he felt that he was like a puppet being controlled. His consciousness was suppressed in his body, and the power of his soul was

completely suppressed. He had lost control of himself and gradually lost his sense of self.

Another moment later.

“Sh*t!”

Han Fei was dumbfounded. He had only wanted to lure the second and third leaders back through this person, but from this person’s memories, he learned that this guy turned out to be a traitor who had looted the entire treasury of the Bloodthirsty Flag Fish Tribe. As for his clansmen, he didn’t take any of them with him.

Good lord, you’re ruthless. Fortunately, I was smart enough to block his way. Otherwise, wouldn’t I have let go of a treasure house for nothing?

Han Fei was overjoyed. The treasure house was right here and couldn’t run away. Han Fei quickly found some kind of Blood Sacrifice Array in this person’s memory. This Blood Sacrifice Array could make his clansmen sense it from a long distance. It was similar to the Flame Emblem of the Phoenix Divine Race, but definitely not as high-leveled as the Flame Emblem.

After Han Fei set up the Blood Sacrifice Array and conveyed the relevant message, he slaughtered this person’s soul. The Bloodthirsty Flag Fish Tribe was a pirate force that even the master of the camp wanted to eliminate. It was also a race that many pirates and clans wanted to wipe out. Han Fei killed them without any pity.

After throwing Zhou Jie’s body into his Origin Star, Han Fei went straight to the Bloodthirsty Flag Fish Tribe, because in Zhou Jie’s memory, there was still a peak-level late-stage Star Transformation Realm powerhouse there who was preparing to take away the talented clansmen for the future re-rise.

Unfortunately, when Han Fei rushed to the Bloodthirsty Flag Fish Tribe a moment later, there was no peak-level late-stage Star Transformation Realm cultivator here. It seemed that the other one had run away too.

However, Han Fei didn’t plan to chase him. If he ran away, so be it! Anyway, that person didn’t get the treasure house. He probably chose some elite disciples to take away.

Instead of chasing him, there were more than 170,000 people here, more than 30,000 Sea Establishers, and 17 Sky Opening Realm powerhouses. Among them, there were 9 people who hadn't entered the Star Transformation Realm, and 3 of the 8 Star Transformation Realm powerhouses were in the late-stage Star Transformation Realm.

This strength was actually not weak.

With a thought, Han Fei transformed into Zhou Jie's appearance. He found that the Bloodthirsty Banner Fish Tribe was relatively peaceful and didn't seem to know what had happened.

As he released his perception, his voice echoed throughout the entire clan.

He said, "All cultivators above the Sea Establishment realm, put down what you're doing and stop cultivating. Gather in a hundred seconds. I have something important to say..."

Buzz—

Swish! Swish! Swish!

Figures flew over one after another. In the end, a total of 36,325 people came, including 17 Sky Opening Realm powerhouses, nearly half of them were at the peak of the Sea Establishment Realm.

Han Fei nodded in satisfaction. This lineup was just enough for the trial.

One of them said, "Elder Zhou Jie, why have you summoned us?"

Han Fei said leisurely, "Well, I'm just giving you a trial."

Swish! Swish! Swish!

When tens of thousands of God Sealing Spears appeared in the void, everyone felt that their strength was instantly suppressed by nearly 50%.

They were not strong masters, so it was only natural that their strength was suppressed a lot.

As Han Fei issued an order in his heart, the Sea Establishment Realm army of the human race and the Giant Whale Fortress all appeared.

More than 70 other Sky Opening powerhouses, including Zhou Jingjing, Hong Yue, Yingyue, and the others, appeared together.

Before the people of the Bloodthirsty Banner Fish Tribe realized what was going on, Han Fei had changed from Zhou Jie to his original appearance. “Everyone, listen to me. You’ve cultivated for a hundred years. Today is the day to test your results. Kill them all.”

Hong Yue roared, “Sea Establishers, charge... Sky Openers, follow me to kill the enemy’s Sky Openers!”

“Kill ~”

“Charge!”

“Brothers, it’s time to prove our worth. This is a life-and-death battle. Try your best...”

On the Bloodthirsty Flag Fish Tribe’s side, the late-stage Star Transformation Realm powerhouses were horrified and roared, “Not good! Our race is besieged. Everyone, try your best to break through this array.”

However, as Han Fei issued an order in his heart, the surrounding God Sealing Spear Array condensed into a small array and threw the 17 Sky Opening Realm powerhouses away.

At the same time, Han Fei took nearly 60% of the tens of thousands of God Sealing Spear Arrays and sealed the entire Bloodthirsty Banner Fish Tribe. After all, in addition to the Sky Openers and Sea Establishers, there were more than 140,000 Bloodthirsty Banner Fish below the Sea Establishment realm here.

...

One day later.

In the base camp of the Bloodthirsty Flag Fish Tribe, blood rains kept falling because too many people had died. In a day, nearly 30,000 Sea Establishers and 13 Sky Openers perished. Among them, nearly 3,209 Sea Establishers died on Han Fei’s side. No one in the Sky Opening realm died because once a Sky Opener was in danger of dying, Han Fei would take action.

Upon seeing this, Han Fei sighed in his heart. His efforts had paid off. Only with investment could there be gains. Especially for the human race, only less than 600 Sea Establishers had died.

Of course, 600 people was actually not a small number, but this was a battlefield and a trial. Death would happen in trials. To become stronger was to step on corpses to become stronger.

When the old turtle arrived, the battle had almost been over.

Seeing this, another super trial began. It was a trial below the Sea Establishment realm. Because there were too many people in the Bloodthirsty Banner Fish Tribe, the trial was finished in three batches.

Five days later.

This battle of extermination finally came to an end.

Han Fei was not idle either. He set up many large spirit gathering arrays here and also put countless spiritual stones and other resources into the arrays.

Therefore, in the past five days, these people were either fighting or making breakthroughs.

In this trial, Han Fei lost more than 12,000 men.

This price was dearly. However, this price was something that they had to experience. Only after experiencing death could they recognize death and understand their desire for life.

At this moment, there was no living person in the entire Bloodthirsty Banner Fish Tribe. Led by Hong Yue and Zhou Jingjing, everyone came to see Han Fei.

Hong Yue shouted, "Master Human Emperor, I'm glad not to let you down. It took us five days to wipe out the Bloodthirsty Flag Fish Tribe."

Han Fei nodded slightly. "Okay! Next, we'll cultivate and make breakthroughs here until no one makes a breakthrough. In addition, everyone will be rewarded for their contributions. Zhou Jingjing, you'll do this. I'll give you 1 billion ultra-quality spiritual stones, ten million kilograms of Earth Vein Spring Water, 100,000 ultra-quality godly weapons, 500 low-quality Sea Quelling

Bizarre Treasures, 100 mid-quality Sea Quelling Bizarre Treasures, 10 high-quality Sea Quelling Bizarre Treasures, 3 ultra-quality Sea Quelling Bizarre Treasures, and 1 low-quality godly weapon... I want you to distribute them appropriately.”

“Huff~”

At that moment, everyone’s breathing seemed to be a little chaotic. What a huge investment! How much money was this? It was an astronomical figure!

Han Fei, on the other hand, didn’t care. It wasn’t even one-fifth of the resources in the treasury of the Bloodthirsty Flag Fish Tribe. Han Fei could’ve rewarded them all at once.

However, that was beyond the reward they deserved. Besides, if their appetite was already so big, how could he feed them in the future?

Zhou Jingjing immediately cupped her fists and responded firmly, “I’ll definitely distribute them carefully. I won’t be biased at all.”

Han Fei nodded slightly and then said to his less than 120,000 subordinates, “You came from various races and have been suffering since you were born. You have no resources or cultivation techniques. You’ve lived your lives tenaciously until now, fighting against this world. Now, I’ll give you resources, trials, weapons, and cultivation techniques. However, what I’m doing is for the rise of the human race. I know that many of you are not human, but I don’t care. The sea can accommodate all rivers, and my human race can accept all races. Anyone who follows me and my human race will not be abandoned. This is the oath I made today...”

On the field, many people in the Giant Whale Fortresses were excited. Some were in tears, and some felt their blood boil.

The moment they realized how powerful the Human Emperor was, they were actually a little worried, including Zhou Jingjing. This was because Han Fei was the sovereign of the human race, and he was doing this for the rise of the human race. Even Zhou Jingjing had thought that Han Fei might just treat them as pawns or cannon fodder.

But Han Fei treated everyone equally, so these thoughts and emotions were temporarily suppressed in his heart.

Today, Han Fei publicly discussed this matter. Instantly, these people felt confident. Their lives seemed to have a goal and hope.

In an instant, countless people shouted, “We’re willing to sacrifice our lives for the Human Emperor.”

“Master Human Emperor, you treat me sincerely and I will never let you down.”

“From now on, where the Human Emperor points is where our weapons go.”

...

All kinds of declarations came from these hundreds of thousands of people, and the scene was boiling.

The most excited people were the human beings such as Yingyue and Xu Meng. This was the true Human Emperor in their hearts. He was bold, courageous, ambitious, decisive, fearless, and had weathered through everything for the rise of the human race.

At that moment, the human powerhouses were all in tears.

Han Fei said firmly, “Today, I watched the battle and saw that you are all motivated, determined, ambitious, courageous, and ferocious. Therefore, I’ll set up an army called Seven Kill with 100,000 soldiers.”

Han Fei took a deep breath and shouted,

Seven Kill meant

Anyone who becomes our enemy shall be killed.

Anyone who stands in our way shall be killed.

Anyone who betrayed us shall be killed.

Anyone who was possessed by the ominous shall be killed.

Anyone who bullies our human race shall be killed! Kill! Kill!

Han Fei suddenly stood up and said domineeringly, “The size of the Seven Kill Army remains unchanged and will march with me and be my personal guard

army. I want every member of this 100,000-strong army to open the sky. I want to lead this army to sweep through the world and build a peerless legend...”

God of Fishing - Chapter 2542 - 2542 Great Dao Lock

“Kill, kill, kill~”

At this moment, for the first time in their lives, the human powerhouses here understood what the Human Emperor was, what the Emperor of the Human Race was.

Without such boldness, spirit, and pursuit, how could he be called the emperor of a race?

It was also at this moment, after the first large-scale trial, Han Fei completely won over the human race and the Giant Whale Fortress, and established the Seven Kill Army.

!!

At this moment, a powerful enemy returned from afar.

This time, Han Fei didn’t invite them into his trap but stepped out and took the initiative to charge out.

After encountering the boss of the Bloodthirsty Flag Fish Tribe who unsealed the Dao Lock, Han Fei recognized for the first time the strength of a higher level than the perfected Star Transformation Realm.

Han Fei was confident that he wouldn’t be scared even if both of the leaders had Great Dao Lock, because he found that the scorching light on the road on the green jade stone bridge completely countered the power of the Bloodthirsty Banner Fish.

Of course, he estimated that only one of them had a Dao Lock. Even if both of them had a Great Dao Lock, he was not afraid.

After all, when he attacked the boss of the Bloodthirsty Flag Fish Tribe, he didn’t use the Void Stealing Technique.

Sure enough, the two leaders who were rushing back didn't know what exactly happened at home. They only knew that something happened. However, before they reached home, a powerhouse suddenly attacked them on the way.

At this moment, they wouldn't cross Han Fei to attack the old turtle and the others behind, because they didn't hate them to that level.

When the two of them saw someone rushing over, their first reaction was to defend themselves.

But soon, they discovered that Han Fei was only in the peak-level late-stage Star Transformation Realm, which relieved them.

There was a fundamental gap between the peak-level late-stage Star Transformation Realm and the perfected Star Transformation Realm. Even if a peak-level late-stage Star Transformation Realm cultivator could resist a perfected Star Transformation Realm cultivator, he could at most resist one.

But Han Fei was alone, and they were two.

However, in the next moment, the two of them discovered that something was wrong with Han Fei. This was because the fist mark Han Fei unleashed was so powerful that they seemed to see the explosion of a resplendent star. The terrifying impact was millions of kilometers away, but it still shocked them.

"Perfected Star Transformation Realm?"

Both of them changed their expressions, and one of them shouted, "Old Three."

The one called Old Three took out a huge square shield. Han Fei's eyes flashed, and he could tell at a glance that the huge shield was a high-quality godly weapon.

A weapon at the level of a godly weapon couldn't be underestimated. Although Han Fei felt that he was strong, it was still unrealistic for him to penetrate a high-quality godly weapon shield.

There weren't many godly weapons that Sky Openers could have. Han Fei had once tried it. With the strength of the perfected Star Transformation Realm, he could barely penetrate some low-quality mid-quality godly

weapons. And if it was a defense-type or a mid-quality godly weapon with a soul attached to it, he might not be able to penetrate it.

However, just as Old Three blocked with the giant shield and was about to collide with the fist mark, the giant shield in front of him suddenly disappeared.

At that moment, the two of them immediately retreated, but everything happened too fast. And Han Fei burst out at 14 times the speed of light. How could they escape?

Boom!

At that moment, the sky exploded, and the Silencing Fist hit Old Three. This person had no choice but to activate his Star Bead and try to block Han Fei's punch.

However, this time, Han Fei didn't hold back at all. His strength was comparable to that of a Dao-Proving Monarch. Although his Great Dao hadn't reached that realm yet, he couldn't be underestimated.

Old Three's body exploded on the spot, and his soul was instantly heavily injured. Of course, with the explosion of a mirror, Old Three still blocked it.

Han Fei secretly sighed. Sure enough, he wasn't a Monarch yet and didn't have the terrifying combat power of a real Monarch. This person managed to keep his Star Bead indestructible with a low-quality Soul-Subduing godly weapon.

However, Han Fei had already expected this, so he grabbed the Vast Ocean Navigator and slashed out with the Draw Technique. His saber scattered the Star Bead, shattering the soul body that was hidden in the Star Bead in the invisible void.

Rumble!

In the blink of an eye, the perfected Star Transformation Realm cultivator was killed and a rain of blood fell, adding to Han Fei's ferocity.

"Not good!"

Old Two didn't even have time to fight back. Seeing this, he turned around and fled. As he ran, a Great Dao Lock appeared.

Time Confinement.

Han Fei activated the Great Dao of Time and froze time. At the moment when the frozen time was about to shatter, he took out a mirror.

At this time, Old Two was nowhere to be seen.

Han Fei slashed at the Mirror of Infinity without hesitation.

In the mirror, Old Two was hacked to pieces before he realized what was going on. He died before he could unlock the Dao Lock.

Even if he had a Dao Lock, it would be useless if he fell into the Mirror of Infinity.

After all, in the Mirror of Infinity, the Drawing Technique was replicated into countless ones, and no one could stop it.

However, at the moment when this person was killed in battle, with a crack, a crack appeared on the Mirror of Infinity. Seeing this crack, Han Fei couldn't help but frown. It seemed that the level of the Mirror of Infinity was still too low. When it killed a perfected Star Transformation Realm powerhouse, it was shattered by his instant explosive power.

Unfortunately, the Mirror of Infinity was only a replica, and Han Fei didn't know where the real one was. If he could find the real one, he believed that it would be a terrifying weapon that surpassed ultra-quality godly weapons.

However, the Demon Purification Pot could still repair a crack. When he controlled the Star Sea Metal-eating Ants in the Shattered Star Sea, the life metals they produced could give activeness to items that were Sea Quelling Bizarre Treasures or above. There was a certain chance that the weapons could be upgraded.

He would see if he could upgrade the Mirror of Infinity by one level. Even if it became a mid-quality godly weapon, it wouldn't be so easy to break.

It was said that these two leaders were leading five peak-level late-stage Star Transformation Realm cultivators and a dozen other Sky Openers. They should be in the Origin Star of one of them.

This saved him a lot of trouble. As the Vast Ocean Navigator pointed in a direction, Han Fei stepped into the Origin Star of Old Two...

An hour later.

Under everyone's eager gaze, Han Fei walked back from the void.

The moment they saw Han Fei, everyone celebrated. They had seen more than once the phenomenon of the death of a perfected Star Transformation Realm cultivator. Therefore, the two consecutive phenomena meant that Han Fei had killed two more perfected Star Transformation Realm powerhouses.

Han Fei glanced at everyone and shouted, "The bandit leaders have been executed. In the next month, everyone, continue to digest what you've learned in the past few days. Cultivate in peace and make breakthroughs."

This time, many people made a breakthrough, some were going to transcend the tribulation, and there were even more people about to become Venerables. Some even wanted to open the sky.

It was not easy to make such a breakthrough and advancement in Han Fei's Origin Star, so Han Fei left them in the Sea Realm.

As for why it was a month.

It was because although this place was very remote, the abnormal phenomena were so loud that they would be noticed sooner or later and someone would come to investigate. Therefore, Han Fei was in a hurry.

After this training, it would take a period of time to consolidate, learn from experience and lessons, and then in the next big battle, they would be able to show greater comprehensive strength.

As for Han Fei, after arranging Zhou Jingjing and Hong Yue's tasks, he chatted with the old turtle alone.

Han Fei asked, "Old Yuan, tell me about the Great Dao Lock?"

The old turtle said, "I forgot about that too. When I saw this person use it, I remembered to tell you. The so-called Great Dao Lock is a seal that is used to lock the upper limit power of your Dao. If it's not locked, you'll be prepared to withstand the tribulation of Dao Proving at any time. As you know, it's still very

difficult to prove Dao. Everyone wants to become stronger before proving Dao. This is why the Dao Lock exists.”

Han Fei asked, “How many Great Dao Locks generally are there?”

The old turtle said, “Five. As far as I remember, there are usually only five Dao Locks. Once there are more than five, your strength might not be able to be locked. Then you’ll have to prove Dao.”

Han Fei was puzzled. “When there are five, it means that you have to start proving Dao immediately. Is that so?”

The old turtle nodded. “That’s right. When the five Dao Locks can’t suppress your strength, it’s the time to prove Dao. In the Age of Gods, the strong and weak are usually divided according to the number of Dao Locks.”

Han Fei was puzzled. “In other words, this is actually the path that perfected Star Transformation Realm cultivators have to take?”

The old turtle shook his head. “It’s not really a path. It’s just a way to make yourself safer. You can also use the power of a Monarch in advance. Of course, your comprehension of the Great Dao is definitely not enough. Besides, although the upper limit is five Dao Locks, it doesn’t mean that everyone can create five Dao Locks. That’s a Great Dao Lock, the manifestation of when your Dao reaches a higher level. If you walk multiple Daos and reach the extreme, additional Dao Locks can be born, but five is usually the upper limit.”

Han Fei couldn’t help but glance at the old turtle. “Didn’t you say before that a person only needs to walk one path to the extreme?”

The old turtle didn’t care. “That’s because I lost too many memories, so I forgot a lot. In fact, it’s normal to have a main Dao and a few secondary Daos.”

Han Fei asked, “Old Yuan, do you know how to create the lock?”

The old turtle said, “When you reach the limit of a certain Great Dao, you can solidify the Dao runes of this Dao into chains or arrays and seal the Dao you master. As your strength accumulates, the Great Dao lock will be more and more difficult to break. Once it’s broken, the Dao will be fully released and you’ll have to face the tribulation of proving Dao.”

Han Fei nodded. "Okay, I got it. I'm going to cultivate."

Han Fei was about to end the conversation, when the old turtle suddenly said, "Han Fei, if you want to train your soldiers, I think there is a more suitable place."

Han Fei raised his eyebrows. "Where?"

The old turtle said, "The northern mining area near the Godfiend Sea in the Infinite Mining Area."

God of Fishing - Chapter 2543 - 2543 Reverse the Green Jade Stone Bridge

"The northern mining area?"

Han Fei's heart did a flip. After buying information from Old Chen in the camp, Han Fei knew that the northern mining area was dangerous, so he didn't plan to go to the northern mining area.

After all, the comprehensive strength of his subordinates wasn't good enough. Even the top 100 factions who lived in the Infinite Mining Areas didn't dare to easily enter the northern mining area, but the old turtle actually suggested that he take his men to the northern mining area.

Han Fei frowned. "Old Yuan, do you know that the northern mining area is close to the Godfiend Sea and is one of the most dangerous known areas in the Infinite Mining Area?"

!!

The old turtle said indifferently, "Is there a place in the Infinite Mining Area not dangerous? So what if it's close to the Godfiend Sea? It's not in the Godfiend Sea. I'm 100% sure that they will at most be affected by some demonic power. It won't be a big problem. Besides, I know the way! Don't you want to train your soldiers? I know a mine demon stream in the northern mining area. Although I don't know what the situation is now, it's very suitable for training soldiers."

Han Fei frowned. "Are you sure? Old Yuan, I heard that many Monarchs died in the northern mining area."

The old turtle said, "I don't know. Anyway, in my era, the northern mining area was completely developed. There was a special training ground there. After all, not everyone was born strong in the Age of the Gods. And the northern mining area was safe back then. There were many trial grounds. I don't know the specific situation there now, but you will definitely like it."

Hearing the old turtle was so certain about it, Han Fei couldn't help but feel a little curious.

Besides, what the old turtle said was actually right. Although his soldiers had just taken a trial, all their current trials were created by him. If he was careless and missed a strong master of the other party, his subordinates might be wiped out with a single slap.

Although there were many pirates, it was still very troublesome to attack them east and west. If there was a suitable and stable trial place, it would be much better.

He believed that with sufficient resources and trials, it was difficult for all his subordinates to open the sky even with the time acceleration of his Origin Star, but definitely not difficult for all of them to establish the sea.

The Sea Establisher that he used to look up to before could be manufactured by him in bulk now. Han Fei was excited just thinking about it.

Han Fei nodded. "Okay! I'll consider it when I hunt enough resources for a period of time."

Resources were never too much. Although he had just robbed a treasure house of resources, the Seven Kill Army he wanted to nurture was different from others in nature and required completely different resources.

...

Han Fei didn't ask too much. He didn't ask too much either about the northern mining area or the Dao Lock.

This was because he couldn't completely listen to the old turtle. As for the details of the northern mining area, he would find out when he had a try. As for the Dao lock, he would only think about it when he reached the perfected Star Transformation Realm. What he needed to consider now was why he couldn't engrave the Dao patterns. Also, continuing to compress the Star Core

was another problem. Could it be that the engraving of the Dao patterns had something to do with the compression of the Star Core? He had to study these.

Seven days passed.

On his Origin Star.

Han Fei was walking in the opposite direction on the green jade stone bridge. If he walked forward on this bridge, he would face the muddy road and the scorching door. In the past few days, Han Fei had tried many times, but he still couldn't withstand the terrifying heat.

However, Han Fei was not discouraged. There were still many secrets about the green jade stone bridge.

Earlier, in the ten-thousand-year competition, when Dao Domain Sunflower Head helped him absorb a lot of origin power, he had thought that the green jade stone bridge could be walked on reversely.

Later, he didn't have the time to try walking on it reversely because he had too many things to do. But now, the green jade stone bridge showed its mysterious and powerful power. Han Fei decided to try going reversely.

However, when Han Fei walked reversely to the first step he came from, the scene in front of him suddenly changed.

Yes, Han Fei was excited. He guessed right. This green jade stone bridge didn't connect reality and the Great Dao. The front and back of this bridge were integral and a mysterious road. And the green jade stone bridge in the middle was the key to connecting this road.

Just like what he saw after walking down the steps, there was a white mist here that needed to be cleared with Immortal Qi. Of course, it was also possible to clear the way with a large amount of Chaotic Qi.

How could Han Fei be short of this now? Tens of thousands of wisps of Immortal Qi blended into the white mist, and a wide road quickly appeared in front of his eyes.

The difficulty of establishing it was the same as establishing the front path. Therefore, for the current Han Fei, establishing this path was simply too simple.

It only took Han Fei a hundred seconds to open up a wide road ten thousand meters long, but this reverse road was a little different from the forward road.

The muddy road he encountered when he took the forward road was too hot.

But the path in the opposite direction was very cold. Similarly, 10,000 meters away, there was a mirror blocking it.

“Heh! This mirror again? Huh, wait...”

Suddenly, Han Fei felt that something was wrong. He felt that his body and soul seemed to be strengthened.

He suddenly realized that, yes, establishing this path was enhanced by strength. Just like when he established the frontal path, when he activated the Great Dao, his strength could be doubled.

Now, he had established the opposite path. Han Fei vaguely felt that his Great Dao was getting more and more profound. It seemed that when he unleashed his full strength, he could be twice as strong.

This meant that he could unleash six times his combat power without using the Invincible Eyes.

However, Han Fei smiled bitterly in his heart. Even if he could continue to become stronger, so what? He hadn't condensed his Dao Bones yet and could barely withstand six times his combat power. If he continued to become stronger, his physique wouldn't be able to withstand it.

This was already very powerful. In terms of physique, Han Fei was even comparable to a Monarch.

Six hours later, when Han Fei felt that the feeling of becoming stronger gradually disappeared.

Looking at the information, Han Fei couldn't help but grin.

His strength had increased by about 400,000 waves, but Han Fei didn't care about this improvement.

It was already commendable to create a path that would increase his strength by 400,000 waves. It was a pity that there were only two such paths. Otherwise, wouldn't he be invincible if he took ten or eight of such roads?

More importantly, after breaking the mirror, there would be a small growth. Han Fei was very experienced in breaking the mirror now. He didn't need to find Little Fatty at all but only needed to double his strength.

Boom!

After a punch, the mirror broke and couldn't stop Han Fei's fist mark at all. This time was different from last time. Last time, Han Fei felt that a long time had passed. But this time, because his body was intact and his mind was clear, he only felt that some kind of Dao runes, some kind of law of the world, disappeared into his body.

In the silence, it seemed to be years and months. Han Fei suddenly came back to himself. He shivered, felt unusually cold, and subconsciously retreated thousands of meters. Only then did he find, to his surprise, that he had fallen into a certain slumber just now. He was a little scared.

After coming back to his senses, he immediately looked at his personal information.

Owner: Han Fei

Level: 109 (Sky Opening· Extreme Dao Balance)

Bloodline Ranking among the Clans in the Infinite Ocean: the 200,016th (Evolving: 8,926/13,064)

Immortal Qi: 1,480,000

Soul: 34.82 Origins (34,822,985 points)

Perception Range: 33 million kilometers

Strength: 34.82 Star Powers (34,822,985 waves)

First Spiritual Heritage: Origin Spiritual Heritage

Second Spiritual Heritage: Eternal Darkness Spiritual Heritage

First spiritual beast: Twin Yin-Yang Sky Swallowing Fish (Level 108)

Second spiritual beast: The Emperor Sparrow (Level 103)

Main Art: Godfiend Formless Technique

“Huff!”

Han Fei put on a smile. In any case, this wave of growth came too easily. It took less than a day for his soul power to grow from 33.36 Origins to 34.82 Origins.

This speed of growth was terrifying.

However, Han Fei wasn't complacent, because this improvement could only be made once. Compared to figuring out his Original Great Dao, this improvement must only be incidental.

Through this icy road, Han Fei saw a door again. Yes, there was a door. Behind a pale dirt road that seemed to be sprinkled with frost, there was a towering giant door erected there.

Han Fei was a little surprised to see this door.

So, the green jade stone bridge was actually a bridge between the two doors? But the difference between the two doors was too huge, wasn't it? One door was extremely hot and the other was extremely cold, and he was sandwiched between them.

Han Fei tentatively walked down this path, but soon, he was frozen back. It wasn't that his body was frozen, but that his soul couldn't withstand the terrifying cold power. He felt that if he continued to walk forward, his soul would be frozen and shattered.

“Forget it. It seems that I'm still not strong enough to approach these two doors. But in any case, the secret of my Original Great Dao is unfolding step by step as my strength grows. Huh! Can a Great Dao crystal be condensed here?”

Suddenly, Han Fei was overjoyed.

Yes, although he had condensed the Great Dao crystal of his Original Great Dao, it was condensed from the scorching path.

Now, the path of ice was filled with Dao runes. If this was also a part of his Original Great Dao, did it mean that the Great Dao crystal he had condensed previously was incomplete?

With this in mind, Han Fei no longer hesitated. He sat cross-legged and began to condense the Great Dao Crystal.

When a new Great Dao crystal appeared, Han Fei couldn't stop grinning.

Not only that, Han Fei also saw a new way of fighting. The ice on this road was no weaker than the ice on the Chaotic Wasteland and might even surpass it.

In that case, wouldn't the Extreme Cold Pearl be able to be replenished at any time? Did this mean that he could have infinite strikes of Monarch?

"No, I have to get a fire-type ultra-quality godly weapon similar to the Extreme Cold Pearl from Feng Yu. This way, the scorching power on the other path can also be used as a Monarch Strike. In this way, I'll have a double guarantee."

...

At the Star Core, Han Fei didn't even need to stuff this Great Dao crystal into his Star Core. This Great Dao crystal was immediately absorbed into his Star Core.

Buzz!

In the next moment, Han Fei felt that the entire Star Core trembled. He immediately sensed that a large amount of impurities were being discharged, and the strength of his Star Core soared to a higher level.

This meant that the compression of the Star Core would be easier again.

God of Fishing - Chapter 2544 - 2544 Ruthless Human Butcher

One month Later.

When Han Fei walked out of his cultivation, Little Black and Little White woke up.

Different from Han Fei, Little Black and Little White didn't have the so-called perfected Star Transformation Realm. They just needed to eat, and the strength they could unleash might not be much weaker than his.

At this moment, Han Fei didn't even want to fuse with Little Black and Little White. Otherwise, God knew who would control whom.

!!

On this day, Han Fei left his Origin Star.

The spiritual energy around the former Bloodthirsty Banner Fish Tribe's settlement was not great, which meant that everybody's strength had been significantly improved.

As soon as Han Fei came out, Hong Yue, Zhou Jingjing, and the other Sky Opening Realm powerhouses had already surrounded him.

"Greetings, Master Human Emperor."

Han Fei's repeated attacks established his absolute prestige.

At this moment, the Giant Whale Fortress and even the human camp were all guessing if Han Fei had secretly proved Dao and become a real Monarch.

Hong Yue didn't explain to these people. It was a good thing to have such speculations. He would rather everyone believe that Han Fei was a Monarch, which would increase their confidence and create a magnificent image for Han Fei.

Han Fei said casually, "How about the total losses of the battle and the effect of the breakthrough?"

Zhou Jingjing stood up and said respectfully, "Master Human Emperor, in this consecutive battle, a total of 17,209 people died. But there were even more people having breakthroughs. 76 in the Sky Opening Realm realm, 49,321 in the Sea Establishment realm, including 29,989 peak-level Sea Establishers, 49,062 in the Venerable realm, 24,908 peak-level Venerables, and 19,322 in total below the Venerable realm. Among them, 8,856 were peak-level Explorers, including young children... there are a total of 119,875 people."

Han Fei took it for granted that the number of Sea Establishers was about to exceed 50,000. However, the number of casualties was still a little too high. They had only killed one Bloodthirsty Flag Fish Tribe. If such a trial happened again in the future, many more people would probably die.

This couldn't be helped. Some people died from tribulations, so there was nothing Han Fei could do.

Besides, how could they grow quickly without experiencing life-and-death battles? Even if he gave them too many benefits, Han Fei couldn't help them make breakthroughs, comprehend, or experience life-and-death battles for them.

Therefore, from the looks of it, he was short of people.

Han Fei said, "From today on, the Giant Whale Fortress will be disbanded. Let everyone gather and cultivate in my Origin Sea. I want to ensure that everyone except the children is above the Venerable realm. In three years, we will enter the Infinite Mining Area."

Han Fei didn't have the time to wait and slowly nurture and polish talents. These three years were the process of selecting talents. After three years, he might have fewer than 100,000 people, or even less than half of what he had now.

However, this was their path. He had given them the best cultivation conditions and cultivation resources. It was better than them struggling day by day in the wilderness. The strong wouldn't live under the protection of others forever.

Zhou Jingjing had long guessed that the Giant Whale Fortress needed to be disbanded. In fact, it was a little beyond her expectations that it was not officially disbanded until now.

However, when Han Fei said three years, she sighed inwardly. Many people would probably die in the past three years!

...

Three years passed in a flash.

Outside the Infinite Mining Area, countless people were coming and going around the White Sand Camp, one of the eight camps. This was a huge island that could accommodate more than 80 million people. Similar to the White Sand Camp, the other camps had similar populations.

Generally speaking, about 80% of these people were Explorers. These people had been brought here from the wilderness to grow and provide endless labor for the Infinite Mining Areas.

Since the Infinite Mining Area was a mining area, the most basic thing in the Infinite Mining Area was mining.

Under the Sky Opening Realm, no one could escape from the job of mining. And mining was also an opportunity for many people to change their fate.

Once one entered the Venerable realm, they were qualified to enter the Infinite Mining Area to mine. Therefore, the explorers in the eight camps were all reserve miners.

The White Sand Camp was particularly lively recently. The intelligence hall of the White Sand City was trampled by various strong masters every day.

At this moment, in the overcrowded intelligence hall, someone shouted angrily, "B*stard, they attacked from all directions but couldn't even kill the seven-kill bandits of a mere 100,000 people? They were completely wiped out by them so easily?! They're f*cking useless."

Someone shouted angrily, "Are you useful? Why do you put a bounty if you're useful? Didn't your Red Tide Pirates get wiped out too back then?"

Someone scolded, "I heard that the Human Butcher defeated three leaders alone. Three leaders who unsealed the Dao Locks, do you know what this means? It means that there was a slip-up in intelligence. Damn it, even the strong masters who unsealed the Dao Locks couldn't defeat Human Butcher. That guy shouldn't have appeared in the periphery of the Infinite Mining Area."

All kinds of curses, banter, and exclamations rose and fell.

In the past three years, a human Seven Kill Army had appeared out of nowhere. In the past three years, they had attacked 39 large pirate groups. The leader called himself the Human Emperor and had the orthodox bloodline of the human race.

At first, no one took it seriously, because in the Seven Kill Army, there were actually not many human powerhouses, less than one-fifth of them.

However, with the destruction of pirate groups one after another, people's opinion of the Seven Kill Army changed. This Seven Kill Army was too murderous. Wherever they went, there were corpses everywhere. The pirates they targeted would usually be swept away. They would be lucky if even ten percent of them could escape.

It had been a year since the Seven Kill Army was taken seriously.

The various pirate clans had tried to encircle and suppress them more than a dozen times, but their efforts were all in vain. Instead, when they retreated, one or two pirate groups would be destroyed.

From then on, the title of Human Emperor became Human Butcher.

Up to now, no one knew the real name of Human Butcher. He only claimed that he was of the orthodox bloodline of the human race.

This was also the first time that countless races in the Infinite Mining Area felt that the orthodox bloodline of the human race was too f*cking strong. No wonder there were more humanoid races now, but there were few orthodox human races. Perhaps this race was too murderous in the past, so they were besieged?

In the crowd, a young man was flipping through some information. After reading some information, the young man said, "Give me the basic information of the City of Scavengers."

The person at the window numbly took out a jade slip and said, "Basic information, 100,000 kilometers of resources, no discount."

After a while, Han Fei browsed through a jade slip while walking to the intelligence center, where many people were shouting.

"Digging an ultra-quality mining area of the Infinite Mining Area. Advanced Sea Establishers are required. 9 persons needed. Join the team and immediately set off."

“Digging a high-quality mining area of the Infinite Mining Area. Intermediate Sea Establishers needed. There are still 4 places left. If you want to join, hurry up. It’s now or never.”

“Digging a low-quality mining area of the Infinite Mining Area, and 52 places left. To go to the Crab Cave Territory ranked 76th. The returns will be split seventy-thirty. Seize the chance.”

A bald man shouted, “Ordinary supply delivery to the Hundred Alliance City. Eight peak-level Sea Establishers and three Sky Openers needed. Go to the mission hall and take the supplies delivery mission, and then you can join. Set off as soon as the positions are filled...”

Looking at the lively White Sand Camp, Han Fei sneered and walked straight to the supply delivery team.

Han Fei asked, “Bro, what level of supply delivery mission is this? I want to take this mission.”

The bald man looked at Han Fei up and down and his eyes glittered. “You just entered the Star Transformation Realm?”

Han Fei said, “It’s been decades since I entered the Star Transformation Realm.”

The bald man immediately grinned and said, “Good. This is just an ordinary seed delivery mission. It’s also a green safety mission of the Hundred Alliance City. Therefore, you need to make a small advance payment. After arriving in the Hundred Alliance City, the remuneration will be 10% higher than your advance payment. You can go to the Mission Hall to receive the No. 132 seed delivery mission.”

In the past few years, Han Fei had actually learned a lot about the camps outside the Infinite Mining Area. The so-called green safety mission was a mission that even pirates would ignore.

The seed resource delivery was one of the most frequent resource delivery missions from the eight camps to the Hundred Alliance City.

As the name Infinite Mining Area suggested, there were too many mine demons there, so there were very few demon plant stocks. And what these people transported were demon plant seeds.

This was because demon plants could penetrate deep into the ground veins and absorb energy sources. They could even make use of the Infinite Mining Areas to grow rapidly and become a helper to expand the mining areas.

Therefore, what was shipped out of the Infinite Mining Area was usually rare things like weapons, mineral veins, materials, and resources. But what was shipped in from the outside was not so precious.

Even pirates rarely plundered these supplies.

However, although it was relatively safe to go from the outside of Infinite Mining Area to its inside, mine demons were everywhere and there were often mine demons attacking events, so it was common to form teams to deliver supplies.

As for the advance payment, it meant to use the resources one had to buy seeds. Then, when he arrived at the Hundred Alliance City, they would buy the seeds at a price ten percent higher than the advance payment. Transporters would earn a difference in price, which was equivalent to speculation.

In the mission hall, a large number of seeds were sold, totaling up to thousands of species.

However, the number of the best-selling seeds could be counted on two hands.

Among them, the Devil Vine was the only magical seed that Han Fei was familiar with. It grew extremely fast when in water. It could be said that as long as the Devil Vine was given time, it could grow very fast in places where mineral veins were buried in the Infinite Mining Area. It could reach the peak of the Venerable level in about a year and definitely establish the sea in two years. Only after establishing the sea did the Devil Vine develop some simple consciousness, but not much. It was a rare tool seed.

Of course, the price was that they could only reach the Sea Establishment Realm, and a large number of Devil Vines would wither at the moment they reached the Sea Establishment Realm.

In the mission hall, Han Fei found a random window and said, "Hello, I want to take the No. 132 seed transportation mission."

The shop assistant glanced at Han Fei and then pushed out a pamphlet. "This mission requires advance payment. The price list of seeds is here. All seeds will be sold by the minimum of a hundred pieces. How much do you want to buy?"

Han Fei glanced at the price, hesitated for a moment, and then said, "Devil Vines, a hundred thousand."

"Huh?"

The shop assistant was stunned. "A hundred thousand?"

God of Fishing - Chapter 2545 - 2545 First Encounter with A Mine Demon

The shop assistant glanced at Han Fei. A Devil Vine was worth a thousand ultra-quality spiritual stones. If Han Fei asked for a hundred thousand of them, it would be a hundred million ultra-quality spiritual stones.

Yes, in this place, ultra-quality spiritual stones were still one of the main currencies, because too many people needed ultra-quality spiritual stones. And the Infinite Mining Area was abundant with ultra-quality spiritual stones, so many people used it as the currency in the Infinite Mining Area.

In fact, there were not many people in the eight camps. Many people were mining in the Infinite Mining Area. If all of them were gathered, there would be five billion people in the Infinite Mining Area.

In fact, when Han Fei saw the price for the first time, he was also shocked. When he was in the Yin-Yang World, he had never thought that the Devil Vine could be so valuable.

!!

Now, because of the different environment, in the Infinite Mining Area, the Devil Vine had more room to grow, so its effect was greater.

And 100 million ultra-quality spiritual stones could only be exchanged for 10,000 kilometers of resources, which wasn't much.

Han Fei said, “A hundred thousand Devil Vines, a hundred thousand Heritage Searching Roots, a hundred thousand Essence Gathering Grasses, a hundred thousand Mine Swallowing Millstone Flowers, a hundred thousand...”

Han Fei mentioned more than 30 kinds of seeds in one breath, each 100,000 pieces.

However, different seeds had different prices. In the end, the shop assistant was shocked. This person actually exchanged for seeds worth 250,000 kilometers of resources at once. If he went to the Hundred Alliance City once, he would make a huge profit!

The shop assistant’s heart stirred. “Okay, please wait a moment.”

After a while, Han Fei exchanged supplies with the shop assistant in the secret room. When Han Fei left, the shop assistant immediately said to someone via voice transmission, “Boss, someone bought the seeds of 250,000 kilometers of resources in one go...”

...

A mere 250,000 kilometers of resources was not a lot of money for Han Fei at all. Han Fei didn’t really want to sell these seeds in the Hundred Alliance City.

He thought that he might be able to use these seeds in the future.

Because it was a green safety mission, the team was soon full. Among the 20 people in the Sky Opening Realm, the strongest was in the peak-level late-stage Star Transformation Realm. In addition to the Sky Openers, they also brought 2,000 peak-level Sea Establishers.

These Sea Establishment realm cultivators were mostly itinerant cultivators. After paying a certain amount of resources, they would follow the Sky Opening Realm powerhouses to the Hundred Alliance City to find an opportunity to join a powerful force.

These 2,000 people were all led by the peak-level late-stage Star Transformation Realm cultivator. As for why, it was naturally because the peak-level late-stage Star Transformation Realm cultivator didn’t trust them.

Although the seed transportation mission was just the most common transportation mission, the pirates were not picky. They didn't like to loot the seed transportation teams, but it didn't mean that they wouldn't do it.

After all, if they robbed them, they would still make some money. No matter how worthless the seeds were, it would be valuable if there were a lot of them.

Two hour later.

This peak-level late-stage Star Transformation Realm powerhouse summoned Han Fei and the others and said, "My name is Qin Cheng. I initiated this seed transportation mission. There are a lot of mine demons along the way. Let's defend against them together. I won't take a single cent of what we get from the mine demons. However, I need a 1% commission for this mission. This is already the lowest commission now. Does anyone have any objections?"

For a moment, everyone was refreshed.

Someone was surprised. "Only 1%?"

Everybody looked at him speechlessly, wondering if he was out of his mind. Was 1% not good enough? Did he need 2% or 3%, or even 4% or 5%? They could only earn less than 10% in total, and they had made the advance payment.

If Qin Cheng wanted too high a commission, who would be willing to team up with him again? After a few times, Qin Cheng would definitely lose face and no one would cooperate with him.

However, according to Han Fei's understanding, the commission Qin Cheng wanted was indeed not much. Generally speaking, it was normal for a peak-level late-stage Star Transformation Realm cultivator to take a commission of 2% or even 3%.

But if it was a perfected Star Transformation Realm cultivator, the lowest commission would be 3%. This was because a perfected Star Transformation Realm cultivator was very powerful and could almost guarantee your safety. This was the fundamental reason why many people would rather give so much commission, because the mission would be easy to complete.

Of course, it wasn't like that a seed transportation mission could be issued by just anyone. This was a matter of credibility. In the Hundred Alliance City, there was a group of people who specially transported goods.

These people often had one characteristic, which was that they were about to break through from the peak-level late-stage Star Transformation Realm to the perfected Star Transformation Realm.

At such a critical juncture, they hoped to obtain resources more safely to help themselves make a breakthrough, instead of going to fight the mine demons. It was not that they were afraid to fight. Sometimes, a breakthrough required battle, but sometimes not.

Anyway, these people were good at using the rules of the Hundred Alliance City. According to the credibility token they obtained from the Hundred Alliance City, they would issue missions. The more credibility they had, the more popular they would be, and the more people would follow them to transport goods.

At this moment, Qin Cheng glanced at the people he brought and didn't look at Han Fei for long, because at this moment, Han Fei had just entered the Star Transformation Realm in his eyes, which was still far away from the peak-level late-stage Star Transformation Realm.

However, after being glanced at by Qin Cheng, Han Fei realized that something was wrong, because Qin Cheng's eyes were strangely cold.

"Huh?"

Han Fei recalled that when he accepted the mission, he saw that Qin Cheng was the kind of person with excellent credibility! With such credibility, it should be very safe to follow him in transportation.

However, the look in Qin Cheng's eyes was indeed strange. Han Fei glanced at the people around him. They were all in the Star Transformation realm. Yes, all of them were in the Star Transformation realm. Suddenly, he seemed to have guessed something.

He wanted to kill these people and snatch their Origin Stars?

Han Fei remained calm. At this moment, everyone had already stepped on the air and set off.

In everyone's opinion, it was very safe for twenty Sky Openers to carry out a simple transportation mission. No pirate would be stupid to hunt such a team, right?

After three years, Han Fei was ready to enter the Infinite Mining Area.

In the past three years, he had accumulated a lot. There were still 86,684 people left in the Seven Kill Army. Compared to three years ago, more than 30,000 people had died.

However, the Seven Kill Army at this moment was completely different from the Seven Kill Army three years ago. In a place like the Sea Realm, it was very easy for strong masters who had walked out of death to make a breakthrough.

In just three years, because of the time acceleration, they had spent almost 500 years in Han Fei's Origin Star.

There were already no Explorers.

In the Venerable realm, most of the peak-level Venerables had already established the sea. Those who hadn't established the sea mostly died in battle. As for the remaining people, as long as they had resources, corresponding trials, and battles, their growth was fast.

Now there were only twelve thousand Venerables left, and the rest were all at least Sea Establishers, the extremely ferocious kind of Sea Establishers.

As for the Sky Opening Realm, 33 had been born in the past three years. This meant that the Sky Openers among Han Fei's subordinates had officially exceeded a hundred. Including the old turtle, there were a total of 110.

Of course, this was the number of the Sky Openers among his subordinates. The pirates who surrendered to him were not included. Whether these people could survive depended on their luck.

Traveling at the speed of light for less than half a month, Han Fei and the others finally saw mine demons one after another.

What Han Fei saw was a group of stone monsters. Yes, black stone monsters, white stone monsters, red stone monsters, and colorful stone monsters.

Although Han Fei had long known the classification of ordinary mine demons, black, white, and red were the three worst qualities, he was speechless when he saw the stupid and cute appearance of these mine demons.

Their heads were very big. One head could be a hundred meters long, but their bodies were only dozens of meters long, looking like super bobblehead dolls.

Their bodies were full of corresponding mineral deposits. After killing the mine demons, the essence of their mineral deposits could be collected.

For example, even the black stone monsters with the worst quality had enough minerals to forge Sea Quelling Bizarre Treasures.

Of course, that was only if their level was very high. Otherwise, they could only be used as auxiliary materials for Sea Quelling Bizarre Treasures.

At first, these mine demons couldn't catch up with Han Fei and the others. Three days later, when they officially crossed the border of the Infinite Mining Area, some mine demons that were not stone men appeared. For example, at this moment, Han Fei and the others encountered a group of fish mine demons with flat heads and small bodies.

This school of fish was made of mineral essence and was digging a mine to absorb the essence of the mine. But when they saw Han Fei and the others, they immediately rushed over.

Qin Cheng shouted, "It's Black Iron Head. Enter combat. This fish won't retreat until its population is reduced by half. Let's solve it quickly."

"Black Iron Head?"

Han Fei was dumbfounded. Before he had time to think, the two parties had collided.

Information popped up in his eyes:

<Name > Iron-Head Mineral Spirit

<Introduction > A kind of Fish Mine Demon, low quality, low intelligence, but born with the power to control the Great Dao of Strength. The Iron-Head Mine Spirit grows stronger by absorbing the essence of the mine and swallowing

the bones of strong masters. Its soul power is weak, so it uses the Great Dao of Strength to protect its soul. To kill the Iron-Head Mine Spirit, you have to break its armor and destroy its soul first before you can kill it quickly.

<Level > 105

<Quality > Low

<Realm > Star Transformation

<Great Dao> Great Dao of Strength

<Battle Technique> Strength Immunity, Soul Barrier, Explosive Speed Impact

<Collectible > Level-two Mineral, Power Mineral

<Absorbable >

<Note > A rock with low intelligence that can only fight instinctively.

For a moment, a great battle broke out. Han Fei casually clenched his fist and controlled his strength to the level of star transformation.

Boom ~

The Black Iron Head was embedded into the seabed by Han Fei's punch, but with a swing of its tail, it rushed towards Han Fei again.

Han Fei's face slightly changed. What a strong defense! Although he simulated a blow from a regular Star Transformation powerhouse, he didn't expect that this punch couldn't even kill a stone!

Besides, Han Fei felt that even if his strength was doubled, he couldn't break their defense.

Han Fei immediately looked around. These people were all experienced. Han Fei took a look and found that they all practiced some piercing armor-piercing techniques based on the Great Dao.

Seeing that Han Fei's attack failed to penetrate a Black Iron Head, someone shouted at Han Fei, "Is this the first time you've entered a mining area? You can't fight like this. Most mine demons have extraordinary defense power. Their talent is immunity to strength and are very resistant to physical attacks.

You have to break their armor in an instant and then kill them with a soul technique in an instant. Otherwise, even if you are in the late-stage Star Transformation Realm, you dare not say that you can kill a Black Iron Head with strength alone.”

The person who spoke was a hale and hearty old man. Seeing Han Fei fighting with fist techniques, he casually pierced through a Black Iron Head and flew to Han Fei. He pierced through the invisible Dao runes of an Iron-Head Mineral Spirit with a finger. The moment the Dao runes were shattered, the old man activated a Soul Killing Technique and the Black Iron Head exploded into a pile of mineral stones.

Han Fei: “Thank you.”

God of Fishing - Chapter 2546 - 2546 Then You Can All Stay Here Forever

It was not difficult for Han Fei to break armor.

Therefore, in the next moment, Han Fei took the initiative to pierce through a Black Iron Head with his spear. With a casual wave of his hand, the Black Iron Head exploded into a dozen pieces of fine ore.

Han Fei grabbed the stones, and information popped up in his eyes.

<Name > Black Amber Mystic Stone (Power Mineral)

!!

<Introduction > This is the essence produced by ordinary Black Iron Mine Demons. It’s one of the main materials for making Sea Quelling Bizarre Treasures. A large number of Black Amber Mystic Stones can produce level-three Associated Minerals.

<Level > Two

< Quality > Low-Quality

<Effect > One of the common main materials for refining Sea Quelling Bizarre Treasures. It can also be used to refine ultra-quality godly weapons.

Level-two mineral?

Han Fei looked at the other Black Amber Mystic Stones and found that there was a gap between the Black Amber Mystic Stones scattered after the death of the same Black Iron Head.

That was because he saw a level-two high-quality Black Amber Mystic Stone among the dozen or so Black Amber Mystic Stones.

In this way, it could be seen that there was a difference between the same kind of minerals. A level-two high-quality mineral was clearly different from a low-quality mineral in refining a Sea Quelling Bizarre Treasure.

Han Fei couldn't help being surprised. This was only produced by ordinary Iron-Head Mineral Spirit. What if it was a stronger mine demon? Could it produce more high-quality minerals?

What kind of weapons could be made with different levels of minerals?

Han Fei's heart did a flip. If everyone in his Seven Kill Army was equipped with a set of Sea Quelling Bizarre Treasures, their combat power would definitely soar by one or even two levels. In addition to the life metals he had, if he could build a batch of ultra-quality Sea Quelling Bizarre Treasures, they would be almost invincible in the Sea Establishment realm!

Of course, this idea was too beautiful. An ultra-quality Sea Quelling Bizarre Treasure couldn't be forged easily. Han Fei had the ability to forge it, but could only forge eight or ten pieces. Even so, it would take time.

Unless he used the Demon Purification Pot, but the cost of forging a Sea Quelling Bizarre Treasure with the Demon Purification Pot was not something he could afford. But even so, if it was just a low-quality Sea Quelling Bizarre Treasure, Han Fei felt that if he worked hard, he could create a batch of them.

No wonder there were many refining places in the eight camps. At first, Han Fei thought that it was because this place was close to the mining area, so it was easy to obtain mineral resources, so there were naturally many forging masters.

However, he didn't expect that the materials here were so high-leveled that he could obtain materials that could be used to forge Sea Quelling Bizarre Treasures so easily.

From the looks of it, it was no wonder that countless forces, at the expense of countless powerhouses, came to the Infinite Mining Area to compete for territory. If it were him, he would have to fight for it too.

For example, in the Sky Crater World, equipment needed to be supplied continuously for points to exchange. Where did these equipment come from?

Although it was difficult to build a set of Sea Quelling Bizarre Treasures, the refiners of the Sea Realm were different from the Raging Sea.

Han Fei thought that maybe on this trip, he should find a way to refine weapons in the Sea Realm. After all, refiners were professionals and couldn't be found easily.

Even if they were found, the levels of refiners varied greatly. With the refining speed of ordinary refiners, who knew how long it would take for them to arm an army of 100,000 Sea Establishers.

However, fortunately, the Seven Kill Army was still in the training phase and didn't need much equipment.

Bang! Bang! Bang!

While thinking, Han Fei didn't stop. In a moment, he had killed more than a dozen Black Iron Heads.

Even Qin Cheng was a little surprised. The combat power Han Fei showed was a little beyond his expectations. The first time he entered the Infinite Mining Area, he fought such a good battle. If he went all out, his strength might reach the late-stage Star Transformation Realm.

Han Fei didn't know what Qin Cheng thought of him. He felt that he had already hidden his strength well enough.

Although the Hundred Alliance City was the only safe area in the Infinite Mining Area, he was new here and didn't know if there were any unspoken rules here. Even if he wanted to expose his identity as the Human Emperor, he had to learn about the Hundred Alliance City first.

The 20 star transformation realm powerhouses were naturally quite strong. This school of fish had no more than a thousand Black Iron Heads. It only took

them less than an hour to kill them. Although it took them some effort, they still got some compensation.

Encounter battles like this were common in the Infinite Mining Areas. Those who were capable would fight, and those who weren't would avoid the battles. Han Fei and his teammates were the kind of people who were capable and took the initiative to fight.

However, the Black Iron Head was a mine demon that had almost entered the Star Transformation Realm. In this battle, more than 500 of them were killed. Except for a few people, the others were a little tired.

After the shoal of fish escaped, Qin Cheng said to them via voice transmission, "Everyone, it's not the time to rest yet. It will be easier after this section of road."

At this moment, someone said, "I didn't expect to meet Black Iron Head so soon. If we fight a few more battles, it will take at least five or six days for us to finish this journey."

Someone said, "It's okay. If it's just these guys, it'll take us at most two days more."

Three days later.

They encountered another two groups of Black Iron Heads, a group of Floating Stone Demons, a kind of spherical mine demon that liked to float in the sea.

This kind of mine demon was particularly fast and explosive. When they attacked their opponent in an instant, they would burst out with demonic stings. Even a Star Transformation powerhouse might be instantly pierced through.

At this moment.

Han Fei and the others had just pierced through a group of Floating Stone Demons when they heard a buzzing sound in the distant sky.

At that moment, everyone looked surprised, and someone exclaimed, "Not good, it's Six-Winged Mineral Worms. Boss Qin, we have to retreat."

Although hunting mine demons along the way would obtain some additional benefits, different from other mine demons, the Six-Winged Mineral Worms had a much larger population than other mine demons.

There were at least two or three thousand of them in a group. It would be good enough if they could escape. If they coveted the resources from these mine demons, they would be courting death.

However, Qin Cheng suddenly tore open an array map and said indifferently, "Everyone, I'm sorry."

Buzz—

Six-Winged Mineral Worms were flying close from all directions.

For a moment, everyone was shocked.

Someone roared, "Qin Cheng, what did you do?"

Without a word, someone tried to escape at full speed. But before he ran far, suddenly, a finger beam cut across the sky, and this person's body was shattered.

In the next moment, a green light enveloped the man's blood mist.

A young powerhouse walked out with a creepy smile. "None of you can leave today."

Immediately, someone exclaimed, "Not good. It's someone from the Soul Controlling Sect. Brothers, run."

Han Fei's heart did a flip. The Soul Controlling Sect seemed to be a faction that ranked outside the top 100 and cultivated soul manipulation. This faction had once competed with the Ghost Strait and suppressed it in history.

Then, for some reason, they declined and went to the Central Sea Divine Realm. In the Infinite Mining Area, they were ranked 151st and were not famous. Unexpectedly, they had the courage to ambush a mission team in the Infinite Mining Area.

Three people rushed into a pile of Six-Winged Mineral Worms crazily, trying to break through at a high speed.

However, when they were halfway through, an intertwined silk net caught the three of them. In the next moment, the three of them were covered by hundreds of Six-Winged Mineral Worms.

In less than ten seconds, the weather changed, the Great Dao rumbled, and the three people had already died.

Someone was shocked. "Qin Cheng, you colluded with the Soul Controlling Sect to slaughter us and dig out our Origin Stars. This matter can't be hidden forever. You deserve to be executed."

Qin Cheng said leisurely, "Don't worry. I'll only do this once. After I take your Star Beads, I'll be able to advance to the Perfected Star Transformation Realm. At that time, why would I be interested in such a small profit from the seed transportation?"

In the blink of an eye, five Star Transformation Realm powerhouses had died. Everyone was shocked, panicked, and didn't know how to deal with it.

Someone shouted, "Everyone, let's unite and launch a full-strength Star Bead attack. Even if he is a peak-level late-stage Star Transformation Realm cultivator, we can still contend with him."

The strong master from the Soul Controlling Sect sneered. "Contend? Oh, I forgot to tell you. I am... a perfected Star Transformation Realm cultivator."

Buzz!

For a moment, these people were all dumbfounded. A perfected Star Transformation Realm powerhouse? How could they resist him? They might be able to resist a peak-level late-stage Star Transformation Realm cultivator, but it was impossible for them to resist a perfected Star Transformation Realm powerhouse. They were on completely different levels.

At this time, Han Fei suddenly opened his mouth and said in a discordant voice, "May I ask, why would you two, a peak-level late-stage Star Transformation Realm cultivator and a perfected Star Transformation Realm cultivator, be interested in mere twenty Star Transformation Realm cultivators? They have just entered the Star Transformation Realm and haven't embarked on the Star Path yet. They might haven't condensed a Star Core yet. If you kill them, how many benefits can you get? With such efforts,

why don't you scheme against a peak-level late-stage Star Transformation Realm cultivator, and what you can get may be more than hunting all of them."

Qin Cheng frowned slightly, feeling that Han Fei's behavior was a little strange, but the strong master of the Soul Controlling Sect laughed and said in a high-pitched voice, "As the saying goes, a little adds to a mickle. You seem to have underestimated the value of your Origin Stars. If I can get 20 Origin Stars at once and collect 2,000 peak-level Sea Establishment Realm mining slaves, why not? As for why we don't target a peak-level late-stage Star Transformation Realm cultivator, of course it's to prevent the other party from having any trump cards. If the other party escapes, it will bring trouble to our Soul Controlling Sect!"

Han Fei smiled and didn't say anything. It turned out that someone did drain the pond to get all the fish.

When he took down the Black Wind Pirates, Han Fei had obtained more than 20 refined stars, which were very valuable. Now, he didn't expect that someone in the Infinite Mining Area would specialize in killing people and snatching their Origin Stars.

One of them was a peak-level late-stage Star Transformation Realm cultivator, the other was a perfected Star Transformation Realm powerhouse, and there were also nearly 5,000 Six-Winged Mineral Worms. If he hadn't hidden among these people, Han Fei believed that these people would definitely die even if another hundred Star Transformation Realm cultivators came.

However, Han Fei didn't care about the five thousand Six-Winged Mineral Worms at all.

He said leisurely, "I didn't want to be too high-profile, but I happen to run into this matter. In that case, you can all stay here forever!"

God of Fishing - Chapter 2547 - 2547 I Don't Want Just Anybody

Chapter 2547 - 2547 I Don't Want Just Anybody

2547 I Don't Want Just Anybody

“What?”

This strong master from the Soul Controlling Sect and Qin Cheng both suspected that they had an auditory hallucination. A mere Star Transformation-level guy actually asked them to stay here forever?

The other guys who were so nervous that they were about to blow themselves up looked at Han Fei in surprise.

Han Fei slightly raised his chin and said casually, “Time, freeze.”

!!

Even the strong master from the Soul Controlling Sect was suppressed by the Great Dao of Time. Han Fei's projection descended and set up the God Sealing Spear Array.

Less than half a second after the God Sealing Spear Array was set up, the time freeze here was broken. After all, there was a perfected Star Transformation Realm cultivator here who mainly cultivated the soul and wasn't weak at all.

Unfortunately, it was already too late when he broke through the Great Dao of Time. His surroundings had been sealed. He immediately felt that his strength had plummeted.

Upon seeing this, the Soul Controlling Sect powerhouse's expression changed drastically. His first reaction was not to attack Han Fei, but to try to break through the God Sealing Spear Array. Unfortunately, he was only a perfected Star Transformation Realm cultivator and his strength was limited. How could it be so easy to break the array?

He pressed his palm on the invisible barrier of the God Sealing Spear Array. In the next moment, only less than twenty of the tens of thousands of God Sealing Spears shattered.

This blow chilled his heart. He suddenly turned around and looked at Han Fei, who was smiling with his hands behind his back, and he asked solemnly, “Who are you?”

Han Fei smiled. “Does it make sense for a dying person to know who I am?”

This person’s eyes turned cold as the Six-Winged Mineral Worms from all directions rushed over, trying to kill Han Fei with their numbers. And the person from the Soul Controlling Sect also wanted to see how strong Han Fei was? Could he only be good at arrays?

After all, there were still many Six-Winged Mineral Worms on his side, enough to surround and kill a powerhouse in the perfected Star Transformation Realm. Even if Han Fei was in the perfected Star Transformation Realm, he was confident to surround and kill him.

For a moment, the Six-Winged Mineral Worms surrounded up.

Han Fei could tell at a glance that the strength of the Six-Winged Mineral Worm was similar to that of the Star Sea Metal-eating Ants. Their speed was several times slower than the Star Sea Metal-eating Ants, but their defense power should be stronger.

However, under the suppression of the God Sealing Spear Array, the strength of these Six-Winged Mineral Worms should have been reduced. Because they were mine demons, their strength wasn’t limited much, so they still had nearly 80% of their strength left.

Thousands of Six-Winged Mineral Worms were charging at Han Fei. Han Fei grabbed a pearl and pushed it forward. The space here was instantly frozen, and a terrifying chill that was powerful enough to wipe out the soul descended on the God Sealing Spear Array.

Ka ka ka ~

With just one blow, hundreds of the nearest Six-Winged Mineral Worms were frozen and shattered, and their mineral essences scattered on the ground. They were frozen and their defense was broken, and at the moment their defense was broken, how many Six-Winged Mineral Worms could bear such a powerful soul freezing power?

Therefore, in the blink of an eye, one third of the more than 5,000 Six-Winged Mineral Worms were gone.

“Hiss! An ultra-quality godly weapon that contains a Monarch-level strike?”

In the Sea Realm, even high-quality godly weapons were not rare, and many people had them. However, ultra-quality godly weapons were extremely rare. Even in the Infinite Mining Areas, with countless resources, it was difficult to build an ultra-quality godly weapon. Not only were materials rare, but refiners who could forge ultra-quality godly weapons were also very rare.

Even if a divine-quality refiner was willing to refine an ultra-quality godly weapon, it couldn't be done in a year or two. It might take thousands or tens of thousands of years. Therefore, even in the Infinite Mining Areas, there were pitifully few powerhouses who had an ultra-quality divine-quality weapon.

The power of this blow killed nearly 2,000 Six-Winged Mineral Worms.

Han Fei, on the other hand, put away the Extreme Cold Pearl. His fist aura was dazzling like a starburst as he activated the Star Fist Technique. Even without the Silencing Fist, the Starburst Fist was already terrifying.

In an instant, there was fire and ice in this place. Han Fei punched twice in a row, and seven or eight hundred Six-Winged Mineral Worms that were already suppressed and dying under the ice blow were shattered in an instant.

At this moment, be it the late-stage Star Transformation Realm powerhouses who were still alive, Qin Cheng, or the strong master of the Soul Controlling Sect, they were all horrified and felt their scalps tingle.

That was a bunch of mine demons in the Sky Opening realm! It had taken the Soul Controlling Sect a long time to control so many Six-Winged Mineral Worms, but Han Fei had killed half of them with a single attack. Wasn't he terrifying?

Gulp!

"Divine technique, it's a divine technique."

Qin Cheng's eyes widened. He was sure that what Han Fei used was definitely a divine technique. If it weren't a divine technique, he wouldn't have such terrifying combat power.

And how could divine techniques be so easy to obtain? Divine techniques were usually inherited from gods. Relatively speaking, only divine beasts and ferocious beasts would carry divine techniques when they were born.

It was very difficult for ordinary human beings to have a divine technique. Only if there was a god among their ancestors or their ancestors had a great opportunity could they obtain a divine technique.

For a moment, Qin Cheng didn't dare to imagine who this person was. Could it be that the news that he wanted to join the Soul Controlling Sect had been leaked, so this person had deliberately joined this transportation mission for this moment?

At this moment, after Han Fei killed so many Six-Winged Mineral Worms in a row, the strong master of the Soul Controlling Sect finally came back to his senses. He couldn't let Han Fei continue to kill like this. If he continued to kill, his ten thousand years of savings would be wiped out.

The man roared, "Qin Cheng, kill him! If he doesn't die today, we will die. Kill him..."

Han Fei smiled and a giant hammer appeared in his hand. Dao patterns appeared in the sky and fell on the hammer. The Ultimate Hammer struck with all its strength.

At that moment, everyone felt that they were going to die.

As for the Soul Controlling Sect powerhouse, he activated his Star Bead and tried to withstand this blow.

At the same time, the power of his soul transformed into a demonic shadow, trying to attack Han Fei's soul.

However, to his disappointment, the God's Prayer Bead burst out on Han Fei's chest, forming a barrier with the light of purification. It suddenly erupted and directly purified this person's soul attack.

Han Fei couldn't help but feel a little regretful. The effect of the God's Prayer Bead was too strong. Some bad things would be purified before they could approach him.

This person's soul power had been purified by the God's Prayer Bead, so he could only try his best to resist Han Fei's Ultimate Hammer.

However, with a puff, under everyone's shocked gaze, the man's Star Bead was smashed along with the surrounding Dao runes. He was instantly deformed and then exploded.

Unfortunately, although this person's strength was suppressed by 30%, Han Fei still couldn't kill him in one blow. He managed to withstand Han Fei's blow. However, before this person could revive, he was nailed to the bottom of the sea by Han Fei with the Infinity Water.

On the other side, Qin Cheng and the Six-Winged Mineral Worms that had just recovered didn't have time to attack Han Fei before they were suppressed by Han Fei.

No one else could understand what it felt like.

Qin Cheng was dumbfounded. He had burnt his essence blood to activate his secret method and even used a one-time-use godly weapon in an attempt to break through the array of the God Sealing Spear and escape.

In fact, he actually succeeded. When a peak-level late-stage Star Transformation Realm powerhouse recklessly unleashed his strength, he could tear a crack in the God Sealing Spear Array.

However, just as Qin Cheng was about to run, he suddenly forgot how to run. He seemed to have forgotten his understanding and comprehension of speed. His body seemed to be out of control as he stopped in place.

Han Fei said indifferently, "This is how it is in the wilderness. It's either you kill me or I kill you. It's the same in every realm. It's not that you didn't do well, but you're just unlucky. Unfortunately, luck is also a part of strength, right?"

Qin Cheng was horrified and did the most humiliating thing in his life. He knelt down to Han Fei. "My lord, please spare my life. I, Qin Cheng, am willing to follow you with my life and will never betray you."

Without even needing Han Fei to say anything, Qin Cheng took the initiative to resolutely present his heart blood and soul to Han Fei.

He knew that if he wanted to live, he had to put down his dignity. It wasn't that he wasn't strong, but that the person in front of him was too strong, ridiculously strong, so strong that he instinctively feared him.

powerhouses all wanted freedom, but compared to his life, Qin Cheng chose his life. It was better than dying now and disappearing from the world.

“Huh? Interesting...”

Han Fei couldn't help but smile. This person was decisive. He would really do anything to survive!

Han Fei said, “Do you know that by doing this, you've established an absolute barrier for your Dao Proving?”

Qin Cheng said, “My lord, to survive is more important than proving Dao. Besides, I'm convinced by your strength and don't dare to have any thoughts of fighting against you. As long as my heart is clear, even if I prove Dao, it won't produce an inner demon.”

Han Fei put away the smile on his face. Did he want a peak-level late-stage Star Transformation Realm powerhouse who is about to break through to the perfected Star Transformation Realm? Of course, it would be a waste not to!

He only had the old turtle now. The old turtle's body hadn't been molded yet, so his strength was limited. At this time, with a perfected Star Transformation Realm powerhouse following him, it would save him a lot of work.

Han Fei reached out to grab the drop of essence blood and soul and said indifferently, “I like smart people. OK, I'll take you in.”

At this moment, Han Fei glanced at the others, and they were all shocked. Someone hurriedly said, “My lord, we would like...”

Han Fei waved his hand. “Shut up. I don't want just anybody. Erase your memories and enter Qin Cheng's Origin Star. I'll pretend that nothing happened, or...”

God of Fishing - Chapter 2548 - 2548 Bait (2 in 1)

Hearing that Han Fei didn't want to kill them for their treasures, these people didn't dare to play any tricks and immediately cut off part of their memories.

Han Fei secretly tested it with the Vast Ocean Navigator. After confirming that these people had cut off this part of memories, he didn't make things difficult

for them but asked Qin Cheng to take these people to the Hundred Alliance City as usual.

It was as if nothing had happened.

On the way.

!!

Han Fei asked telepathically, "How long has this Soul Controlling Sect been doing this? Has the Hundred Alliance City never noticed it?"

Qin Cheng had already changed his master at this moment, so he naturally told him everything he knew. He said, "My lord, in the Infinite Mining Area, there are almost no safe places except for the Hundred Alliance City. The Soul Controlling Sect is not the only one who intercepts and kills people. However, this matter threatens the safety of everyone in the Infinite Mining Area, so once they are discovered, they will still be blacklisted by the major factions. If anyone encounters them in the future, no one will show mercy to them."

Han Fei thought to himself, The management of the Hundred Alliance City is really lax. Or rather, the Hundred Alliance City basically doesn't take charge. They just set up a safe zone and will only play its role when something big happens in the Infinite Mining Area that involves many forces.

Han Fei said again, "It's said that when outsiders enter the Infinite Mining Area, they can get a token, right? What if I have many people?"

When Qin Cheng heard this, his heart did a flip. What did this mean?

He said, "My lord, in fact, it's not difficult to obtain this token. There are many ways to obtain it. You don't have to go to the Hundred Alliance City. For example, ordinary Sea Establishment Realm tokens can be bought with money. Of course, it's also possible to snatch them, and it's very convenient. The most direct way is to kill mine demons, obtain minerals, and refine them yourself. The main function of the token is to specify levels. Different strength realms correspond to different levels."

Han Fei's heart did a flip. "Oh? There's a level? I see that your token seems no different from others'."

Qin Cheng explained, "My lord, that's because I hid the level of my token for the convenience of business. The tokens in the Infinite Mining Area are mainly refined according to the level of the minerals obtained in the Infinite Mining Area. For example, the Sea Establishment Realm corresponds to level-one minerals, the early-stage Sky Opening Realm corresponds to level-two minerals, the late-stage Star Transformation Realm corresponds to level-three minerals, the peak-level late-stage Star Transformation Realm corresponds to level-four minerals, and the perfected Star Transformation Realm corresponds to level-five minerals... And those who can own level-six mineral tokens can establish a sect in the Infinite Mining Area and become a power... After these minerals are dug out, you can go to the Hundred Alliance City to forge them into tokens yourself, or refine them yourself."

Han Fei's eyes lit up. "Owing a level-six mineral token, one can establish a sect and become a force?"

Qin Cheng nodded. "Actually, above the level-six minerals, there are level-seven minerals. If you can have a level-seven mineral token, it means that you have extraordinary strength, enough to be ranked among the top 100 forces in the Hundred Alliance City. As long as you can beat any power of the Hundred Alliance City, you will be recognized by the Hundred Alliance City."

Han Fei asked, "Anything better?"

Qin Cheng paused and said, "It seems there is, but the minerals above level seven correspond to extremely terrifying mine demons, even comparable to the Monarch level, so it's extremely difficult for even a large faction to obtain them."

Han Fei thought that this was probably all Qin Cheng knew. A better mineral was not something Qin Cheng could get.

Han Fei asked, "How do you differentiate the token levels?"

Qin Cheng explained, "This is one of the hidden rules of the Infinite Mining Area. Those who should be recognized can be recognized. It's just like the difference between a Sea Quelling Bizarre Treasure and a godly weapon. The difference between minerals can be measured by the power they unleash when they're fully unleashed."

Han Fei's heart did a flip. If that was the case, he didn't have to go to the Hundred Alliance City to get tokens. He might as well snatch them. Didn't the

Soul Controlling Sect specialize in scams? With so few people under him, as long as he took down the Soul Controlling Sect, wouldn't everyone have a token? It would save him the trouble of forging them.

...

Several days later.

Han Fei didn't encounter any special mine demons. Most of them were level-two mine demons. He did encounter a level-three mine demon, but it was killed by Qin Cheng without Han Fei doing anything. Qin Cheng said that this was because this was the way to the Hundred Alliance City. These roads had been walked countless times. Even if there was a mine demon, its level wouldn't be too high.

On this day, when Han Fei passed by a huge mining area, he found that this place was guarded by many powerhouses. Han Fei could see that countless Sea Establishers were actually mining in this mining area. All kinds of great techniques emerged endlessly. These Sea Establishers were fighting some Sea Establishment Realm mine demons. It seemed that mining was not a simple task.

Han Fei and the others were monitored by some perceptions along the way. Han Fei even felt the vibe of a perfected Star Transformation Realm powerhouse, and there was more than one. This meant that from now on, they had entered the safe area.

Several hours passed.

Han Fei saw a huge city spanning more than 100,000 kilometers. Of course, this was only an approximate range. It was irregular in shape and faced endless mineral veins on all sides. Countless Sea Establishers were digging in those mining areas at the moment.

Seeing that they had arrived at the Hundred Alliance City, the other people on Han Fei's team were all excited. This meant that this trip was safe, and they had easily earned another errand fee.

Han Fei, on the other hand, was not very excited. He asked, "Are these mining areas worth digging for so long? By rights, the minerals here should have all been excavated long ago, right?"

Qin Cheng replied, "My lord, although these mining areas are nominally mining areas, they are actually just a cultivation place to nurture Sea Establisher-level powerhouses. In these two huge mines, it is said that there is a top-notch mineral hidden. The power leaking from this top-notch mineral can continuously produce the most common associated Black Flame Mine, which is a level-one mineral. At the same time, it is very easy to give birth to corresponding Black Flame Mine Demons, so it can be used as a long-term cultivation field."

Han Fei nodded. This made sense. With a powerful treasure mine, it could indeed mutate the mineral veins in an area.

For example, although most of the Chaotic Spiritual Earth he had obtained in the Demon Domain was of poor quality, it was surprisingly effective on his Origin Star. Because his Origin Star had time acceleration, this spiritual soil would slowly recover. Furthermore, as time passed, some Mystic Yellow Soil had already appeared on his Origin Star. Although the area wasn't very large, it was tens of thousands of cubes in total.

It was a pity that he couldn't obtain a large amount of high-quality Chaotic Spiritual Earth. Otherwise, the effect would be more than ten times better.

...

Hundred Alliance City.

As the name suggested, it was a place where hundreds of factions and tens of millions of races gathered.

The Hundred Alliance City was protected by some kind of barrier. Every ten thousand kilometers, Sky Openers would stand guard, and every hundred thousand kilometers, there would be Star Transformation Realm Guards.

After entering the safe area, there was no need to worry about safety. No one here would attack casually.

After seeing the Divine Capital Dynasty, Han Fei had thought that the huge city built in a place like the Infinite Mining Area must be extraordinary. But when he really entered the Hundred Alliance City, he found that the buildings here were really featureless. Any island in the Divine Capital Dynasty was stronger than this.

Here, there were ordinary ore buildings everywhere. The style was heavy and there was no special aesthetic. There were not many spiritual plants here, so on both sides of the road, there were mostly statues that were of an obscene amount. They were used as decorations. The strangest part was that there was a statue dozens of meters tall every ten meters on average.

The floor under his feet seemed to have been carefully carved with extremely complicated patterns.

Of course, the lack of buildings couldn't hide the lively scene in the Hundred Alliance City. Since it was a city, it would naturally radiate to many areas around. There were hundreds of forces in the Infinite Mining Area, so there were naturally many people who had been in the Hundred Alliance City all year round. Therefore, it was very lively in the city.

Han Fei said, "Take the team to finish the mission. We still have to do what needs to be done."

Qin Cheng nodded, but then he said, "My lord, now that I've appeared in the Hundred Alliance City, we can't hide it from the Soul Controlling Sect anymore. They must know that something has happened now, and since I've appeared here, I'm afraid... we'll be targeted at any time."

Han Fei sneered. "It's not that they'll target us at any time, but that they've already targeted us. It doesn't matter. Do what you need to do. This is the safe area. Even if the Soul Controlling Sect is among the top 100, so what?"

To finish the mission, Qin Chen should take Han Fei and the others to sell the seeds bought outside to the reserved merchants in the Hundred Alliance City. Han Fei bought ten times the amount of each type of seed, so after selling a portion, he could still keep a lot.

After the team was disbanded, Han Fei took out a golden token and put it on his waist. This was the symbol of a perfected Star Transformation Realm powerhouse. It showed his strength to the outside world and secretly warned some people.

As soon as Han Fei and the others finished the mission, two men immediately went to Qin Cheng.

One of them said, "Qin Cheng, what happened to Yang Qian? Why are you in the Hundred Alliance City? You suddenly become an honest businessman?"

Qin Cheng said, "My lords, I'd like to ask you where Master Yang Qian is. I didn't meet Master Yang Qian along the way. That's why I took these people to complete this mission. If I had met Master Yang Qian earlier, why would I have come to the Hundred Alliance City?"

"You didn't meet him?"

The expressions of the two people changed slightly. Could it be that it really had nothing to do with Qin Cheng? But a few days ago, they received news from the sect that Yang Qian had died. And the only person they could associate with this matter was Qin Cheng.

Now, Qin Chengran had appeared, and Yang Qian was carrying more than 10% of the Six-Winged Mineral Worms in the sect. At that time, the power Yang Qian had was comparable to that of a super powerhouse who had unsealed two Great Dao Locks. Who could kill Yang Qian in that state?

The two of them looked at each other and their expressions changed slightly. One of them said, "In that case, Qin Cheng, since you've already joined the Soul Controlling Sect, go with us this time!"

Qin Cheng refused flatly. "No! The one who made an agreement with me is Master Yang Qian. This trip was very strange. Not only did Master Yang Qian not appear, but you also came to ask me. I'm afraid something happened to Master Yang Qian. Under such circumstances, you want me to go with you? Sorry, I, Qin Cheng, still want to live. I don't want to be killed for no reason."

Hearing this, the two of them looked surprised.

One of them said, "Qin Cheng, it seems that you want to betray us before you even join us?"

Qin Cheng said straightforwardly, "You can eat whatever you want, but you can't say whatever you want. Something has clearly happened to the Soul Controlling Sect. Why are you still asking me to join? What can you give me? Can it help me advance to the perfected Star Transformation Realm?"

The person said, "Qin Cheng, with your talent, it's a certainty that you'll advance to the perfected Star Transformation Realm. Since you've already agreed to join the Soul Controlling Sect, do you know the consequences if you go back on your word now?"

Qin Cheng said, "I never said that I would regret it, but it wasn't the two of you who made a deal with me back then. Besides, are you worthy of threatening me? I, Qin Cheng, am in the peak-level late-stage Star Transformation Realm anyway, an existence who can reach the perfected Star Transformation Realm at any time. If it weren't for the benefits you promised, do you think I would have joined you? Instead, I want to persuade your Soul Controlling Sect not to make things difficult for me. Otherwise, you will have one more enemy in the perfected Star Transformation Realm."

Hearing Qin Cheng's words, the two of them were speechless and just looked at Qin Cheng coldly. They weren't sure just now, but now they somewhat believed that Yang Qian's death should be related to Qin Cheng.

After Qin Cheng left with a cold look, after a long time, one of them said, "I'm afraid this Qin Cheng has already betrayed us and killed Yang Qian with others."

The other person frowned. "Can he kill Yang Qian?"

"Of course it's impossible for him to kill Yang Qian, but it's not impossible for him to kill Yang Qian together with a strong master."

"No matter what, there is something wrong with Qin Cheng. Report this matter first. Unless he stays in the Hundred Alliance City forever, there will be plenty of opportunities to take him down later."

After a while, Qin Cheng and Han Fei met up. He said, "My lord, I've deliberately aroused their suspicion. I estimate that in a few days, a team of strong masters from the Soul Controlling Sect will come and set up a trap outside the Hundred Alliance City, ready to ambush me at any time and check my memories."

Han Fei waved his hand casually. "It's fine. Do you know how many Great Dao Locks the strongest person in the Soul Controlling Sect has?"

Qin Cheng said, "This is simple. More than 500 years ago, it was revealed that Yang Kun, the leader of the Soul Controlling Sect in the Infinite Mining Area, already had three Great Dao Locks."

In the Infinite Mining Area, or in the eyes of some of the older generation, the existence of the Great Dao Lock was something that they knew very well.

Although one would become very powerful after opening the Great Dao Lock, it couldn't be opened casually.

The Great Dao Lock was the shackles that bound one's body and soul after they almost couldn't carry his power. Once the shackles were unlocked, it meant that one had to transcend the tribulation to prove Dao. However, ordinary people had little chance of survival. Unless they were confident of transcending the tribulation, no one would easily open the Great Dao Lock.

Of course, nothing was absolute. Han Fei believed that since the Great Dao lock could be unlocked, it could be locked again. It was just a matter of how much it would cost.

During the battle with the Bloodthirsty Flag Fish Tribe, Han Fei had learned the horror of unsealing the Great Dao Lock. His current limit of combat power was probably only enough to withstand the combat power of three Great Dao Locks head-on. If the other party had too many Great Dao Locks and completely unsealed them, he was afraid he wouldn't be a match for them for now.

Of course, if his enemy could be restrained by the God Sealing Spear Array, he might have a chance to win. At least, even if he couldn't beat it, he could escape, unless the other party had the ability to instantly break through the God Sealing Spear Array.

However, so far, Han Fei didn't think anyone could do this. At least, no one had been able to do this during the 100,000-year competition of the Divine Capital Dynasty.

Of course, apart from a head-on clash, he also had the Void Stealing Technique, so the three Great Dao Locks weren't a big problem.

Han Fei didn't care much about the Soul Controlling Sect. Han Fei needed a piece of territory of his own now. At the same time, one of his purposes here was to destroy the power of the City of Scavengers and the City of Origin in the Infinite Mining Area.

At this moment, his footing was not steady yet. If he was too hasty, he might alert the enemy. Therefore, Han Fei asked Qin Cheng, "Where is the intelligence center?"

...

Wherever people cultivated, there would be information. Especially in a place like the Infinite Mining Area, there were secrets everywhere. How could hundreds of factions not have any secrets?

The Hundred Alliance City had many intelligence organizations, but the largest one was in the Capital of Horror. The Capital of Horror had absolute say in the Infinite Mining Area.

Han Fei thought to himself, I'm actually on good terms with the Capital of Horror, but I can't just go up and tell them that I'm Han Fei and give me information... Not to mention anything else, just the information that I'm Han Fei might exceed all the information I want to buy.

Therefore, without any acquaintances, he had to buy intelligence obediently.

Of course, if Zhang Daqian could send back more information from the City of Scavengers, he should be able to save a lot of money. Unfortunately, the place where the City of Scavengers was located in the Infinite Mining Area was a little far from the Hundred Alliance City and the information couldn't be synchronized that far.

Qin Cheng took Han Fei to the intelligence center. It was a grotto-type building. On one cliff, there were more than 3,000 caves. When Han Fei revealed his token, a guide led Han Fei into one of the caves.

When Han Fei entered, a beautiful woman was already waiting here. She said, "May I ask what kind of intelligence you would like to buy, Customer?"

Han Fei's heart skipped a beat. Even the intelligence sellers were all in the peak-level late-stage Star Transformation Realm. Was the Capital of Horror so powerful in the Infinite Mining Area?

Han Fei said indifferently, "I need the information about the specific strength of the City of Scavengers and the City of Origin, in the Infinite Mining Area. For example, how many of their strong masters have Great Dao Locks, and how many Great Dao Locks they have."

The charming woman's beautiful eyes flashed, and then she returned to her normal etiquette smile. "Sir, this kind of privacy is top secret information of all the major factions. The City of Origin ranks tenth among all the factions in the Hundred Alliance City. Sir, are you sure you want to buy this information? The price... will be very high."

Han Fei asked, "How high is it?"

The woman said, "I'm afraid it will take at least a hundred 360,000-kilometer Origin Stars to buy such information about the City of Scavengers. As for the City of Origin... the price will have to double."

"Hiss ~"

Han Fei gasped hard. He had thought that he had some resources. How much could two pieces of intelligence be worth? However, it turned out that the price was more than a hundred times that of the camps.

"Bye-bye! I'm not buying any."

Han Fei immediately turned around and left. This intelligence agency had no conscience at all. Wasn't this robbery?

Han Fei was so scared that he ran away, but the other party didn't make things difficult for Han Fei. She wasn't angry that Han Fei didn't buy it. She just said indifferently, "Go check it. He must be the one who killed Yang Qian of the Soul Controlling Sect. Very few people in the outer camps can kill Yang Qian. Let's see who has been causing trouble outside the Infinite Mining Area recently."

"Yes..."

Seeing Han Fei come out of the intelligence agency speechlessly, Qin Cheng couldn't help but ask, "My lord, have you got the information?"

Han Fei said with a black face, "Ask when you should, and shut up when you shouldn't."

Qin Cheng immediately shut up, wondering if this big shot whose name he didn't know was angry because he couldn't afford the information.

After only two steps, Han Fei suddenly turned around. "Qin Cheng, if you want to completely become mine, you have to swear allegiance. Your soul and essence blood only prove that you are willing to follow me, but whether you are worthy of being my subordinate or not is a problem. So..."

Three days later.

Qin Cheng left the Hundred Alliance City alone.

At this moment, Qin Cheng panicked. He knew that Han Fei wasn't a good person, but he didn't expect Han Fei to be so bad as to use him as bait to lure the Soul Controlling Sect to take action.

Come on, no matter how poor the comprehensive strength of the Soul Controlling Sect was, it was still a terrifying existence on the list of forces in the Infinite Mining Area. Although the death of Yang Qian would be a pity for the Soul Controlling Sect, it wasn't to the point of being a heavy loss. After all, Yang Qian wasn't a perfected Star Transformation cultivator with a Great Dao Lock.

After walking for half a day from the Infinite Mining Area to the northwest, a large number of mine demons had already appeared here.

However, because Qin Cheng's speed was fast, the mine demons couldn't catch up, so it was relatively safe.

Qin Cheng had no choice but to hope that Han Fei was strong enough to easily ambush and kill the people of the Soul Controlling Sect. In Qin Cheng's opinion, this was a low-level trick, but he was certain that the Soul Controlling Sect would definitely be fooled.

Qin Cheng didn't understand. Han Fei didn't have any grudge with the Soul Controlling Sect. Yang Qian had already died by his hand. Why did he still lure the Soul Controlling Sect to take action?

Buzz!

Swish! Swish! Swish!

At this moment, the void trembled, and four strong masters appeared in all directions, blocking Qin Cheng's way.

One of them said, "Qin Cheng, you've betrayed our Soul Controlling Sect, but you still have the courage to walk out of the Hundred Alliance City. I wonder who gave you the confidence?"

Qin Cheng pretended that his expression changed drastically. "I haven't even joined the Soul Controlling Sect. How can you call me a traitor? Something happened to your Soul Controlling Sect and the person who was supposed to meet me was gone. How can I join you?"

“You’re quibbling! Since you refuse to talk, I’ll take you down and search your soul. I don’t believe that what happened to Yang Qian has nothing to do with you.”

Qin Cheng heaved a sigh. “Well, I think you may be too weak to take me down.”

“Heh! How dare you?! Even if you’ve reached the perfected Star Transformation Realm, you won’t be able to escape today. Attack...”

As soon as this person activated his technique, he suddenly felt that something was wrong. His strength seemed to have decreased a lot? It seemed to be suppressed by an invisible power.

At this moment, Han Fei’s voice rang leisurely, “He’s right. You are indeed too weak.”

God of Fishing - Chapter 2549 - 2549 Sneak into the Soul Controlling Sect

Of the four people who came, there were only powerhouses in the perfected Star Transformation Realm, and the other three were only in the peak-level late-stage Star Transformation Realm. With their strength, it might not be difficult for Qin Cheng to survive, but it was impossible for him to escape from Han Fei.

The moment Han Fei appeared, these people from the Soul Controlling Sect knew that they had been tricked. They actually failed to discover such an obvious trap.

Puff! Puff! Puff!

Under the suppression of the God Sealing Spear Array, Han Fei killed three peak-level late-stage Star Transformation Realm powerhouses in a row with only one slash. When the knife light bloomed like the night sky, a touch of shining starlight bloomed to a scorching heat in an instant and disappeared in the next moment.

!!

Having witnessed Senior Brother Azure Dragon’s terrifying combat power and momentum in battle, Han Fei had gained some insights. Senior Brother Azure

Dragon was the Dragon Emperor and he was the Human Emperor. In terms of status, no matter what others thought, Han Fei felt the two of them were the same.

Therefore, Han Fei's sabers had changed a little. The invincibility intent was accidentally revealed, which was the aftereffect of absorbing Zhao Qinglong's invincible path. The temperament of the emperor of a race had quietly become a unique force for Han Fei.

In this case, Han Fei slashed out. If it weren't for a Heavenly Talent of the same level, he wouldn't have been able to block it.

Boom Boom Boom ~

Seeing him kill three people with a single slash, both the powerhouse of the Soul Controlling Sect who had reached the perfected Star Transformation Realm and Qin Cheng took a deep breath in shock.

He killed three peak-level late-stage Star Transformation Realm powerhouses with a casual slash. What kind of terrifying power was this?

Qin Cheng felt that he might have followed the right person. This person was too strong. Even if he could break through to the perfected Star Transformation Realm at any time, he was helpless against Han Fei's attack just now.

Just this slash alone made Qin Cheng awed.

As for the powerhouse in the perfected Star Transformation Realm, he tried to escape. However, how could he escape from the God Sealing Spear Array?

When this person hit the array of the God Sealing Spears hard and failed to break it even after using all his strength, the Infinity Water turned into a God Sealing Spear and shot out, nailing this person to the barrier.

Han Fei said leisurely, "If you hadn't run, you might have been able to fight me for hundreds of rounds. But you chose to run and exposed your back to me, so you didn't lose in vain."

The person looked at Han Fei in shock. "Who are you? The Soul Controlling Sect has no grudge with you. Why did you have to kill us?"

Han Fei chuckled and said, "Hunting! Just like how you hunt ordinary Sky Openers. If you can hunt them, why can't I hunt you?"

Qin Cheng listened from the side and didn't dare to say anything. He had thought that Han Fei was trying to take revenge on the Soul Controlling Sect, but now it seemed that the other party just wanted to play and hunt. As for the Soul Controlling Sect, they just happened to run into the muzzle of his gun.

Hearing Han Fei's casual description, the powerhouse was shocked, but he still wanted to live. He said, "Fellow Daoist, if you let me go, I'm willing to give you ten 360,000-kilometer refined stars as my reward!"

Han Fei's eyes glittered. "Well, it seems that you are quite rich!"

Unfortunately, this price couldn't even buy one-tenth of the information about the City of Scavengers or the City of Origin, so Han Fei certainly wouldn't care.

He said, "If you want to live, you can call for reinforcements! The more people you call over, the greater your chance of survival. If you can call for more strong masters in your race, as long as they are more valuable than you, I can let you go."

This person was horrified when he heard this. Sure enough, they weren't the only bad guys. This person was extremely belligerent and clearly wanted to use him to attract more strong masters from the Soul Controlling Sect to hunt.

However, did he dare to disobey? Although he knew that even if he did, he might die, if he didn't, he would die now.

Instead of dying now, he certainly chose to take the risk. Fortunately, he was a perfected Star Transformation Realm powerhouse. When he contacted his sect, he could send a soul message, which this person might not be able to read.

He said, "I can call more people, but this place is still too far away. The Soul Controlling Sect is in the west, not close to this place..."

Han Fei chuckled. "It's okay. Let's get closer."

Han Fei didn't care at all. He knew that this person wanted to play tricks, but so what? It just so happened that he could get all those identity tokens at once.

Furthermore, the Soul Controlling Sect must be a rich sect since they often robbed people. He had just arrived. Although he had obtained a lot of resources from the Bloodthirsty Banner Fish Tribe, he didn't have many refined stars. After all, most people would use up any refined stars they had immediately.

However, there should be many Star Transformation Realm powerhouses in the Soul Controlling Sect. If he hunted them all, he should be able to gain a lot of Origin Stars.

Besides, he had just entered the Infinite Mining Area and wasn't prepared to have too many interactions with these local forces immediately. After finishing this job, he would have to explore the northern mining area with the old turtle and find a way to rebuild the old turtle's body and train the Seven Kill Army.

Therefore, hunting the Soul Controlling Sect was just a piece of cake.

A day later, when the perfected Star Transformation Realm powerhouse of the Soul Controlling Sect sent his soul information back through a Six-Winged Mineral Worm, Han Fei suddenly grinned. "Qin Cheng, let's go to the Soul Controlling Sect."

The perfected Star Transformation Realm powerhouse's face changed drastically and he looked at Han Fei in shock. Han Fei sneered. "If you want to use such a lousy trick on me, just use it. You guessed that I killed Yang Qian, and you guessed that I have the strength above two Great Dao Locks. Perhaps you would exaggerate it. For example, tell your race that I have the strength of three Great Dao Locks, because the stronger I am, the stronger the master of your Soul Controlling Array will take action, so you will have a chance to be saved. Am I right?"

Qin Cheng looked at the strong master of the Soul Controlling Sect sympathetically, thinking that he was really ignorant! If the real strong masters of the Soul Controlling Sect had come out, the sect would be empty, and wouldn't it be a great opportunity for Han Fei to attack it?

While this powerhouse was stunned, Han Fei's Void Lines had already come at him. With Han Fei's current soul power, it was no weaker than the power of

a cultivator in the perfected Star Transformation Realm, or even much stronger. Therefore, this person was completely controlled by Han Fei before he struggled much.

The location of the Soul Controlling Sect was a place close to the Bug Demon Mountain in the west. This place was rich in Six-Winged Mineral Worms. In the eyes of the Soul Controlling Sect, the Bug Demon Mountain was their sect-protecting barrier.

When Han Fei arrived, he specially used the Nine Palace Luck Ruler and the Vast Ocean Navigator to measure his luck. It turned out that his luck today was “Greatly Auspicious”.

Han Fei was overjoyed. So even the sect master of the Soul Controlling Sect had gone out?

Seeing this luck, Han Fei secretly passed the barrier of the Six-Winged Mineral Worms with his black-mist body.

The Soul Controlling Sect had a huge ore vein, but it had been dug very deeply. Han Fei happened to see some Sea Establishers return from the depths of the ore vein and hand over a large number of minerals.

There were five powerhouses at the early-stage of the Sky Opening Realm presiding over this matter. In a slightly deeper place of the Soul Controlling Sect, there were more vibes of powerhouses here.

Of course, it was more tamed Six-Winged Mineral Worms here. They acted as patrols, flying back and forth in the sky of the Soul Controlling Sect, scanning every corner.

Of course, Han Fei didn't care. His first goal was the Life Tablet management office of the Soul Controlling Sect. Every large faction had such a place, and the Soul Controlling Sect was no exception.

At this moment, two elders were guarding the ancestral hall. In just a few days, they had lost Yang Qian, a perfected Star Transformation Realm powerhouse, three peak-level late-stage Star Transformation Realm cultivators and more than 10% of the Six-Winged Mineral Worms. It was said that the culprit of this matter had already appeared. Since the sect master took action personally, this guy would certainly be doomed.

However, as soon as the elder said so, a pillar of blue water instantly pierced through his body. The other person saw a mirror and in the next second, he fell into a mirror space.

Suddenly, a saber beam swept past and he was cut into pieces.

After taking care of the two peak-level late-stage Star Transformation Realm powerhouses, Han Fei waved his hand and collected all the life tablets here.

From the beginning to the end, it was silent and no one noticed.

On this side, Han Fei didn't kill the two of them completely. Otherwise, if their death caused Great Dao cracks in the sky, everything would be exposed. Sealing the two of them, Han Fei secretly strolled towards the Soul Controlling Sect's treasure house.

Sneaking into the treasure house under the nose of a perfected Star Transformation Realm powerhouse, Han Fei cursed secretly, "Damn, so poor. Is this really a treasure house?"

Han Fei couldn't have felt worse, because he saw a lot of ordinary minerals, spiritual stones, and various crystals, but he didn't even see a single refined star. Even the weapons he saw were only a few Sea Quelling Bizarre Treasures, and most of them were ultra-quality divine weapons. Obviously, they were prepared for Sea Establishers.

Han Fei almost cursed. I came all the way here but got nothing... Huh, wait...

Suddenly, Han Fei found some emerald green pearls. If he didn't take a closer look, he would think that they were a kind of mineral.

When he took a closer look, he took a slight breath.

In his eyes, information emerged:

<Name > Soul Accumulation Pearl

<Introduction > A pure soul bead refined from the bodies of a large number of creatures with a special soul technique. Taking this bead can directly increase the power of the soul without any side effects. It's mostly used for soul cultivation.

< Quality > Ultra-Quality

<Contained Pure Soul Power> 10,000 points

<Effect > This bead is man-made, so the Soul Accumulation Pearl has an upper limit of consumption. If you take a hundred of them, your body can no longer absorb it.

“Huh? There’s such a good thing?”

God of Fishing - Chapter 2550 - 2550 Slaughter

Chapter 2550 - 2550 Slaughter

2550 Slaughter

Although he could only use a hundred of them, there were tens of thousands of them in total. He could use them as a reward and quickly improve the strength of the Seven Kill Army.

After absorbing the Soul Accumulation Pearls, some ordinary weapons, and minerals, Han Fei sighed. Now that people had their Origin Stars, they weren’t used to hiding treasures. Most of the things in the treasure house were mostly basic resources.

If his guess was correct, the Soul Accumulation Pearl was just a basic material of the Soul Controlling Sect, used to reward some outstanding Sea Establishers or early-stage Sky Openers.

What was precious was not the Soul Accumulation Pearl, but the way it was refined.

!!

After Han Fei cleared the treasure house, he leisurely came to the place where the perfected Star Transformation Realm powerhouse guarding the treasure house was with his black-mist body.

This person couldn’t be very strong because Han Fei didn’t feel any threat from him. He thought that the Soul Controlling Sect was really careless. They

thought that with tens of thousands of Six-Winged Mineral Worms, the treasure house was impregnable.

This perfected Star Transformation Realm powerhouse didn't notice anything wrong. He couldn't even sense the warning from his soul. Han Fei didn't look at him, which would be noticed by this person. He was just thinking that there should be more powerhouses in the Soul Controlling Sect. Otherwise, if something really happened, who would control these tens of thousands of Six-Winged Mineral Worms? Was it the person in front of him?

Ignoring the person, Han Fei thought for a while and left the treasure house quietly.

Finding a place, Han Fei activated the Vast Ocean Navigator and quietly came to a cultivation place sealed by a barrier after crossing a mining area.

Cultivators usually set up a cave abode. This person shouldn't be weak. Even in his own house, he had set up a barrier.

But Han Fei didn't care. From the vibe inside the spiritual barrier, it seemed that only one person was cultivating, which made him much relieved.

"Old Yuan, you are a soul body now. Can the Turtle Shell Sky Sealing Technique still work?"

The old turtle said, "Of course it can be used. This is a great technique. I don't have to have a physical body to use it."

Han Fei grinned. "OK, seal this place then."

The elder of the Soul Controlling Sect, Hu Daoyi, had already reached the perfected Star Transformation Realm 100,000 years ago. After cultivating in seclusion for several years, he was now trying to produce the third Great Dao Lock. As long as he obtained some more refined stars, there might be hope in a few years.

Once he made another breakthrough, the Soul Controlling Sect's ranking might go further.

At this moment, in this mine, a huge amount of mineral marrow surrounded the barrier, providing a large amount of energy for the barrier at all times.

Suddenly, Hu Daoyi felt that he had lost contact with his Origin Star. In the next moment, he felt that this place had become an independent space, and the entire void had been sealed.

“Who broke into our Soul Controlling Sect?”

Hu Daoyi suddenly soared into the sky, and the mountains and rivers above his head exploded. At the same time, he held a long stick and struck in the air, trying to penetrate the Turtle Shell Sky Sealing Technique.

However, the old turtle’s soul power wasn’t weak either. If it weren’t for the fact that he didn’t have a body, his strength might have immediately soared to the perfected Star Transformation Realm, so how could this array be broken so easily?

A scorching fist mark appeared on the barrier that Hu Daoyi had set up. The fist light carried an invincible aura and its terrifying power was comparable to a Monarch’s blow. It happened to pierce through the array eye of his barrier.

Hu Daoyi was appalled. His barrier had been broken before he saw the enemy clearly? Was the intruder so strong?

Hualala ~

When the blade tides poured out like raindrops, converging in the void and forming waves that rose and fell, Hu Daoyi roared and pierced through the vast sky with his rod, preventing the Infinity Water from approaching at all.

In the next moment, Hu Daoyi felt that his head was muddled, as if his consciousness had been deprived by some kind of power.

Fortunately, a pearl exploded in his mind, and Hu Daoyi broke free from this muddle-headed state while bleeding from his seven orifices.

At this moment, Hu Daoyi didn’t dare to be negligent. Two thick chains appeared on his body.

Crack ~

Crack!

After two consecutive sounds, the Great Dao chains broke.

Hu Daoyi was furious. When his third chain was about to be condensed, someone came to disturb him, forcing him to break the Great Dao Chains. It would take a lot of resources and at least hundreds of years for him to recover.

Thinking of this, Hu Daoyi's anger filled his soul and blocked the Void Stealing Technique.

"Huh!"

Han Fei's heart did a flip. It seemed that having a strong soul power was indeed beneficial. He could even block the Void Stealing Technique. However, this person didn't completely block it. Although the two Great Dao chains were broken, he was still stunned for a moment.

Without further ado, Han Fei launched the Silencing Fist.

Rumble!

Hu Daoyi struggled to come back to his senses, but then he felt an extreme burning, and the feeling of life withering welled up in his heart.

When the fist mark landed on him, in an instant, Hu Daoyi's Dao bones were shattered, and his flesh and blood splashed across the sky.

However, at this moment, he had completely sobered up. Although this blow was powerful, the power unleashed after he unlocked the Great Dao Locks was also extremely powerful, and his body recovered by half in an instant.

At this moment, Han Fei roared, "Explode!"

Rumble!

The Infinity Water exploded in Hu Daoyi's flesh and blood, blowing him into pieces again. Han Fei didn't give him a chance to use his Star Bead at all. In this state when Hu Daoyi's body was shattered and his soul hadn't gathered, it was a good opportunity for Han Fei to kill him in one fell swoop.

On the second blow, Hu Daoyi was already exhausted. He reluctantly summoned three godly weapons in a row from his flesh and blood, trying to block Han Fei with the explosion of the godly weapons to buy himself some chances.

However, the moment his three godly weapons appeared, they appeared beside Han Fei as if they had been subdued. What greeted him was a dazzling saber beam.

Bang!

A super powerhouse who had unsealed two Great Dao Locks had died.

The old turtle was shocked. He said, "I'll seal this place now. As long as the Turtle Shell Sky Sealing Technique isn't removed, the Great Dao can't perceive it. Take this time to kill the other perfected Star Transformation Realm cultivator."

The old turtle was naturally talking about the perfected Star Transformation Realm powerhouse who guarded the treasure house.

Han Fei had the same plan. If he guessed right, the person he killed now should be one of the strongest in the Soul Controlling Sect. Once this person died, and the perfected Star Transformation Realm cultivator outside died, even if there was still someone who could control the Six-Winged Mineral Worm, it wouldn't be of much use.

When he returned to the treasure house, the perfected Star Transformation Realm cultivator was still cultivating with his eyes closed. Han Fei issued an order in his heart and activated the Silencing Fist again. This person exploded with a bang. Except for a trace of consciousness in his soul, there was nothing left.

When Han Fei slashed out again, this person was completely killed.

Yes, it would only take Han Fei two moves to kill a perfected Star Transformation Realm powerhouse.

Rumble!

When the weather changed, the old turtle also unlocked the Turtle Shell Sky Sealing Technique.

Rumble!

Two perfected Star Transformation Realm powerhouses had died in a row. The weather here changed, and several peak-level late-stage Star

Transformation Realm powerhouses crossed the sky and looked over. When they realized the change, there was no way they could escape.

Han Fei appeared and shouted, "The Seven Kill Army of the human race has arrived. Kill."

In the next moment, Han Fei, the old turtle, Qin Cheng, the Blood Fiend Puppet, and the perfected Star Transformation Realm cultivator controlled by Han Fei attacked one after another. When Qin Cheng saw this scene, he was shocked. Han Fei had really done it. Judging from the weather, the Soul Controlling Sect must have suffered heavy losses this time.

For a moment, the battle was intense. Han Fei, alone, used the Void Stealing Technique to instantly take down three peak-level late-stage Star Transformation Realm powerhouses. The old turtle used the Soul Technique to sneak attack one of them. Qin Cheng and the Blood Fiend Puppet each entangled one of them. The controlled perfected Star Transformation Realm powerhouse attacked bravely in all directions.

In the blink of an eye, the huge Soul Controlling Sect suffered heavy casualties.

When the strong masters of the Sky Opening Realm joined the battle, the Seven Kill Army also joined the battle.

Although the Sky Opening Realm powerhouses on Han Fei's side were generally weak, there were more than a hundred of them, and those who had been captured tried to perform well and prove their loyalty. They couldn't fight a big battle, but they weren't afraid of the junior Sky Opening Realm powerhouses of the Soul Controlling Sect.

The Soul Controlling Sect was completely caught off guard by Han Fei, who killed two perfected Star Transformation Realm powerhouses and five peak-level late-stage Star Transformation Realm cultivators in an instant.

In this state, the reaction of the remaining peak-level late-stage Star Transformation Realm powerhouse was to escape. Almost in a moment, everyone who could escape had escaped. There was no peak-level late-stage Star Transformation Realm cultivator left here.

Han Fei shouted, "Seven Kill Army, listen to me. I only have one request for you: slaughter."

Today's Han Fei no longer showed any mercy. When the Soul Controlling Sect ambushed and hunted others, they should have realized that they would be targeted one day.

Under the avalanche, no snowflake was innocent. Han Fei valued nurturing battle with battle. Ordinary people would take their time if they wanted to take down a sect, but in his opinion, it was too slow. There was plenty of time for his men to cultivate in his Origin Sea. However, battle was the fundamental condition for the rise of the strong.

This battle lasted for more than six hours and was almost one-sided. As for the Six-Winged Mineral Worms, because they were not controlled, very few of them participated in the battle, so Han Fei ignored them.

Six hours later, Han Fei had left.

Half a day later, a powerhouse suddenly appeared in the sky above the Soul Controlling Sect at the speed of a light explosion.

In the mining area, a line of words was imprinted on the cliff. "The Seven Kill Army of the human race has visited here."

Roar!

When this person saw that the Soul Controlling Sect had become a mess, his entire face turned ferocious. "What a human race! What a Human Butcher! The Soul Controlling Sect of the Central Sea Divine Realm will hunt you down forever."
