

GOD OF FISHING

Chapter 3678 The Ultimate Battle (4)

Chapter 3678 The Ultimate Battle (4)

Han Fei's pupils were constricted slightly. Dazzling divine brilliance burst out of his body, and endless Great Dao runes burst out of his body. The entire star rivers where they were began to tremble, the void hummed, and then cracks appeared.

Yes, countless cracks appeared in a star river, as if they were about to split this star river into billions of pieces. In those cracks was the original color of the star rivers. It turned out that what cracked was an ominous mist. Laws filled the sky, and thousands of Great Daos overflowed from these cracks. At the same time, infinite light burst out, instantly enveloping the entire star rivers.

"Ahhh~"

The peak-level dominator-level ominous was roaring, and its body was burning. It was the light of endless laws shining on its body, burning the ominous and cutting off the possibility of it absorbing power from the ominous mist.

Han Fei turned his blade and slashed nearly ten thousand times in an instant, disassembling it into tens of millions. At the same time, the ominous river of life at the peak of the dominator level appeared, and Han Fei cut it with his hand as a knife.

"Boom! Han Fei ~"

The black coffin exploded, and the peak-level dominator-level ominous died under Han Fei's knife at the same time.

It couldn't be helped. The Primordial Star Sea wasn't his floor after all. It wasn't convenient to fight here. Destroying a peak-level dominator-level ominous also wasted some of Han Fei's time.

But even if Han Fei thought things weren't going too smoothly, in the eyes of Shen Le and the Master of Time, it was extremely shocking. Is this what it

means to be above the dominator level? It's simply inhuman. Not only did it forcibly sever the connection between this star river and the other star rivers, but it also commands all the Great Dao laws in this star river in a few seconds. That power is almost equivalent to instantly launching billions of laws at the dominator-level ominous creature.

Therefore, this move directly purified the dominator-level ominous. Except for energy crystals, not even a slag was left.

Of course, Han Fei didn't unleash such a powerful force just for the dominator-level ominous.

At this moment, behind Han Fei, endless Great Dao runes enveloped half of the Star River. Those Great Daos and laws were gathering crazily, as if they wanted to transform into a sword embryo.

On the opposite side, the coffin lid was broken and overturned. Han Fei looked around and only saw Hongjun's ominous body, but he didn't see Senior Brother Undead.

However, Han Fei saw some broken bones with weak will and vitality. Every black and shiny bone had several cracks. If he had come half an hour later, these bones might have been obliterated.

"Old Three!"

Feng Yu's expression changed drastically. Obviously, Senior Brother Undead had paid a huge price to forcibly lock Hongjun's ominous body in the black coffin.

Immediately, Han Fei's heart sank, and he said coldly, "Thank you for your kindness. You sent me to the Path of No Return. Otherwise, I wouldn't have been able to make a breakthrough. What a blessing in disguise!"

Hongjun sneered and took out the broken hand at the same time. He shook his hand and shattered his arm, pressing the broken hand to his broken arm.

Hongjun's ominous body said, "Han Fei, you can't kill me. Why don't we each take a step back? I'll give you the Chaotic Star Sea, and maybe you can take away the remnants of the six lineages of the Primordial Star Sea and the Creation Jade Plate itself. From now on, let's mind our own business, okay?"

Han Fei sneered. "Why? You haven't really entered the realm above the dominator. Do you think you're qualified to contend with me just with that hand?"

Neither Hongjun's ominous body nor the real ominous had stepped into the Immortal Level. This had been known after Han Fei made the breakthrough. Or rather, the two of them were only half Immortals.

Otherwise, regardless of whether the ominous was stronger than the myriad races, it was not something a peak-level dominator of the myriad races could resist.

However, in a real battle, they were indeed very strong, and it was difficult for peak-level dominators to keep them in check. This meant that they had barely reached the Immortal Level.

However, the ominous was different from Han Fei's current situation. Han Fei could control the Heavenly Dao and the Primordial Chaos, but the ominous could only swallow.

In other words, they had used some kind of power to reach the Immortal level, but they lacked a qualitative leap. Therefore, they needed to complete this complete breakthrough by swallowing a Sea of Stars.

However, if they wanted to completely swallow the source of chaos or the source of Primordial Purple Qi, they needed to swallow the Sea of Stars whole before they could go deep into the foundation. Otherwise, the Heavenly Dao itself would resist and resist.

This was also why they had been attacking the Chaotic Star Sea and the Primordial Star Sea for so many years.

Therefore, when Han Chanyi asked Han Fei if it was dangerous, he said that he could fight them.

Han Fei snorted, and the sword body formed by the ten thousand runes behind him that spanned half of the Star River suddenly attacked.

And Han Fei was already standing on the sword.

Hongjun's ominous body grabbed the black coffin and smashed it at Han Fei. But after he threw the black coffin out, the space had collapsed and changed. In the next moment, the black coffin appeared directly in front of Senior Sister Shen Le.

This star river had already been controlled by Han Fei, and the Dao here was Han Fei's Dao. Therefore, it was impossible for Hongjun's ominous body to use the black coffin as a shield.

Seeing this, Shen Le immediately pressed down on the black coffin and examined the broken bones.

Hongjun's ominous body's pupils were constricted. "You can control the Primordial Star Sea?"

Han Fei chuckled. "As long as there is a Great Dao, I can control it. Therefore, it doesn't matter where it is."

Han Fei said, "Senior Sister, Time, stay away."

Upon hearing this, the two of them immediately retreated. They were both in a bad state. They would only become burdens here.

Hongjun's ominous body also snorted coldly. "Human Emperor, do you really think I'm afraid of you? Since you insist on fighting, let's fight. Do you really think you're the only one who can control the Heavenly Dao?"

As he spoke, the unknown arm of Hongjun's ominous body burst out with a strange light. In the sky, the scene when Han Fei shattered the ominous just now appeared again. At this moment, this star river was filled with black cracks.

However, unlike Han Fei who summoned the Great Dao laws, in the next moment, this place collapsed, billions of stars were shattering, and the darkness turned into a hurricane, also intertwined with dense Great Daos, shaking the star rivers here, triggering a monstrous wave of ominous mist.

"Huh?"

Han Fei frowned. Something was wrong. If the other party could completely show the power of the Immortal level, the real ominous could have done it long ago. If that was the case, even Eldest Senior Brother probably wouldn't be able to resist them. Why did he have to fight the strong masters of the myriad races for several eras? Therefore, why didn't the real ominous use this power?

The answer to all this was in that hand.

At this moment, this starry river seemed to have been cut in half. One half was a sword, showing off its sharpness, and the other half was like a tide, surging with furious waves.
