

### **Chapter 781: Fragrance of Peppermint in the Water**

The forest of algae, same as a rainforest, could be divided in three levels: the crowns, the bushes and the ground.

The seaweed stretched very long and had golden leaves. If there were sunlight here, they would've been basked in the golden light.

Han Fei raised his head again and again and wondered if the sea had a surface here. He thought the answer should be yes, but he detected nothing but transparent sea hares up above.

Unlike the regular sea hares, the transparent sea hares were more like jellyfish. However, they were different from the jellyfish that Han Fei knew, in that they had transparent openings that looked like the petals of man-eating flowers that were mysterious and dangerous.

Further up above, it was an area of weird deep-colored algae that blocked all the sunlight like an enormous dome.

That was the most that he could detect.

Seeing Han Fei's expression, Yu Hun explained, "This is a channel that connects two seas anyway. The power of sealing is beyond our anticipation."

Han Fei slightly nodded and swam after everybody in the forest of algae.

They had swum for more than five hundred kilometers since they came in. Han Fei didn't know how big the place was, but he detected a weird green forest of grasses forty kilometers to his left side.

There, the scale of giant algae had dwindled, replaced by a lot of narrow and long seaweeds that had short leaves.

Those leaves were stuck to trees like creepers. After only a quick glance, Han Fei already saw two Hundred-Year Tree Demons.

"No, there are three."

Han Fei frowned and thought of something. "Do you smell anything?"

Han Fei didn't make that up. He had truly sensed the vague change in the smell of the seawater. As a distinguished cook, Han Fei had a more developed sense of smell than those who only ate raw food.

Yu Ji turned her head. "I haven't smelled anything unusual."

Yu Ying asked, "What did you find?"

He also waved his hand and stopped everybody. "Where is it from?"

Han Fei looked at his right side. "The smell comes from that way."

Yu Hun bared his fangs and chuckled. "Let's go there and take a look. It's hard to tell the direction here. Since you detected something over there, we'll go there first."

Yu Ji looked at Han Fei. "Your nose is very keen."

Han Fei said casually, "That's my gift."

Yu Ji and the others were lost for words. Are you implying that our nose is not as gifted as yours?

The moment Han Fei turned aside and swam on, he found that the three Hundred-Year Tree Demons split up and their leaves started growing, allowing them to hide amongst the long seaweeds.

Han Fei's eyelids cramped. He wondered if Yu Hun detected it.

He had a high spiritual power due to his high level, but Yu Hun's strength was suppressed in this place and he probably couldn't detect anything.

Han Fei's lips slightly curved. He might have a chance to kill some of those people this time.

In order to get rid of the team, Han Fei had to kill them. He didn't really care if they were alive or dead.

He believed that it was impossible for them to beat the manipulators in this place. Since they would die sooner or later, he might as well kill them first.

However, after swimming for only a thousand meters, Han Fei saw a glimmering cover that surrounded a red tree in the middle of green vines, and on the top of the red tree was a golden fruit.

Han Fei was instantly intrigued. *A golden fruit?*

*Is it the golden fruit that Chixue Huan mentioned?*

Han Fei moved forward, pretending that he didn't know anything.

They were all very fast. After they moved for another twenty kilometers, Yu Hun was suddenly delighted. "Something feels different up ahead. There must be treasures."

Everybody was so delighted to hear it that they all rushed forward. At this moment, all the eleven explorers were Heavenly Talents, and they didn't think that they would surely be beaten by Yu Fei and Yu Ji.

After another ten kilometers, Yu Ji, Yu Ying and another two people sensed the treasure. They were all excited. Some others didn't sense it until they were eight kilometers from the target.

Han Fei secretly sneered. So, the so-called Heavenly Talents weren't really remarkable. But it did make sense. It was unlikely that all the hundreds of explorers were all very strong. It was rather impressive that they could detect something five thousand meters away.

Few of the Heavenly Talents on the Scattered Stars Island could detect anything five thousand meters away. He was sure that none of them were as farsighted as him.

Yu Hun roared, "The treasure may be precious, but we have to be cautious."

Everybody stood before the tiny vines without rushing into anything. Someone asked, "Are we out of the forest of giant algae? It's nowhere to be seen now."

Yu Hun frowned, "I didn't see anything about this place from the information that the seniors left. The tiny vines don't look very threatening."

Yu Ji exclaimed, "Huh? Have you found that your head seems to be clearer?"

Yu Ying nodded. "Yes, and there's indeed a smell. The smell can enter your body, but it's harmless."

Of course, Han Fei had discovered that too. He was surprised to find that it was the fragrance of peppermint.

"Could it be sea peppermint?"

The leaves on the long vines looked like peppermints and succulents in a way.

A string of data appeared in his eyes.

<Name> Purple Vine Hundred Kilometer Thyme

<Introduction> This is a rare type of thyme that has a strong smell. It's possible to keep your head sharp with the smell, but it may also cause hallucinations.

<Level> 40

<Quality> Rare

<Spiritual Energy> 3,668 Points

<Effect> It can refresh your mind when eaten. If eaten over a long period of time, it can increase spiritual power.

<Collectible> Hundred Kilometer Thyme Leaves

<Absorbable>

"Hallucinations?"

Immediately, Han Fei secretly sealed his acupoints to prevent them from absorbing spiritual energy. Also, he held his breath.

Yu Ji was always paying close attention to Han Fei. She noticed it when Han Fei held his breath. She slightly frowned. *Why would he hold his breath even though the smell was refreshing?*

She had no doubt that Han Fei had a good reason for doing that, so she held her breath along with him.

The rest of the team, including Yu Hun, didn't pay much attention to it.

They all focused their attention on the red tree that was enshrouded by vines. Its golden fruit looked really tempting.

However, Yu Hun managed to hold back his urge and said, "The unusual treasures are often protected by guardian creatures. Don't rush into anything. Are there any Hundred-Year Tree Demons around?"

Han Fei didn't intend to approach the red tree at all, so no information popped up in his eyes. He thought that it wouldn't be too hard for him to run into the golden fruit again if he had met one so easily.

Also, if it were really the one that Chixue Huan wanted, the team would definitely take it back and give it to him. It would be really depressing if he got the fruit without being able to absorb it.

However, he knew very well that three Hundred-Year Tree Demons that could disguise themselves were hiding in the seaweeds.

Everybody was still under the impression that the Hundred-Year Tree Demons couldn't fit in the environment perfectly.

However, the fact was that they could disguise themselves too.

Han Fei didn't think that the place where three Hundred-Year Tree Demons coexisted in peace could be simple.

Yu Hun said, "Take out your Amulets and battle suits and be prepared. We'll go down together. Nobody is to act on their own."

Han Fei put on an ultra-quality battle suit and took out an ultra-quality harpoon. No Semi-Divine Weapons were given to him since he hadn't made enough contributions to the Ten Thousand Demon Valley yet.

Also, Han Fei had claimed that his body was sturdy, so Chixue Huan had more reasons not to give him one. In Ten Thousand Demon Valley, not everybody had the privilege of using Semi-Divine Weapons.

Because the red tree was in the bush of thyme, the eleven of them descended in a circle. Han Fei was confident that he could resist the Hundred-Year Demonic Stings when they appeared.

Someone said, "I didn't find any Hundred-Year Tree Demons here."

Someone was wary. "There must be dangers here, except that we haven't found them yet. Are they hidden deep underground?"

Yu Ying said, "Wait a moment. Let me seal the tree first."

*Hiu! Hiu! Hiu!*

One shadow spear was launched after another, surrounding the red tree.

Three members of the team had Semi-Divine Weapons. Yu Ji had a Divine Weapon. The other five all had ultra-quality weapons and battle suits. They were moving closer to the target.

Distance: 2,000 meters. Depth: 50 meters. Nothing unusual.

Distance: 1,500 meters. Depth: 30 meters. Nothing unusual.

Distance: 1,000 meters. Depth: 20 meters. Still nothing unusual.

After they were only ten meters away from the seabed, everybody landed in the middle of the thyme.

Someone said in relief, "Great. Nothing is wrong. The Hundred-Year Tree Demons would've attacked us when we were drawing close if there were any."

Yu Ji cautioned, "We'd better remain careful. It's too soon to relax yet."

When they were only a hundred meters away from the red tree, information popped up in Han Fei's eyes.

<Name> Thousand-Year Tree Demon

<Introduction> This is an intelligent spiritual plant that grew from the seed of an ancient demon tree. It knows Thousand-Year Battle Stings that can penetrate Semi-Divine Weapons. It can control its roots and vines and travel underneath the soil.

<Level> 49

<Quality> Legendary

<Spiritual Energy> 9,998

<Level> Sea Demon

<Battle Technique> Thousand-Year Demonic Stings

<Absorbable>

<Note> Spiritual plants don't have veins and there's no obstacles in their Demon Heritage.

"Shoot..."

## **Chapter 782: Terrifying Hallucinations**

Han Fei couldn't have felt more awful when he saw the message.

Nobody, not even him, expected that the red tree would be a Ten-Thousand-Year Tree Demon that Yu Hun mentioned.

Han Fei remembered that the Thousand-Year Tree Demon was very smart and knew how to set up traps.

Then, Han Fei's next thought was that he must flee.

Without any hesitation, Han Fei performed the Flying Flower Demon Flash and left the team.

The moment Han Fei escaped from the team, everybody felt shocked.

However, Yu Hun, Yu Ji and Yu Ying were the first to react.

Their reactions weren't the same. Yu Hun established a weird red barrier for himself while his body escaped.

Yu Ying turned into a dozen shadows, and he appeared in the high sky.

Yu Ji was the only person who laid her hands on her harpoon and condensed an enormous water statue, trying to protect others.

Han Fei's first thought when he saw the scene was that she was stupid. You're protecting others when you could've protected yourself? Do you have any idea what you're faced with?

*Pu...*

*Pu...*

*Crack!*

What happened next made Han Fei and Yu Ying's blood freeze. They were both astounded.

Hundreds of demonic stings erupted from the soil. They were all Heavenly Talents. The moment Han Fei reacted, they started rising too. Two of them also used Flying Flower Demon Flash.

However, they were one step slower after all, and they underestimated the Thousand-Year Tree Demon's abilities.

As it turned out, the stings of the Thousand-Year Tree Demon didn't just attack from underground but darted out from the side. Even though Han Fei, Yu Ying and Yu Hun had escaped, a weird red sting still extended out from behind him.

Han Fei's body was in a weird gesture. The red demonic stings had just brushed past his head. If he were slower, he wouldn't be sure that his head would still be intact.

Yu Ying dealt with it more gracefully than Han Fei did. Her shadow was pierced through, but she had assumed another one.

She was slightly surprised at Han Fei's moving technique, which was very neat. The guy's reaction speed was terrifying too.

Yu Hun was an expert sea demon. The moment he ran off, he moved his body horizontally and cut the Thousand-Year Tree Demon with shadow scissors. He reacted even faster than Han Fei did.

Unfortunately, everybody including Yu Ji was pierced except them. The two guys who managed to perform Flying Flower Demon Flash were stabbed too.

The water statue that Yu Ji created couldn't resist the Thousand-Year Demonic Stings at all and was easily broken, and she was heaved to the heights as the stings couldn't break her Divine Battle Suit.

Yu Ji was the only one who had a Divine Battle Suit, so she was the only one who survived the attacks.

However, she vomited a mouthful of blood even though she survived.

One of her teammates had a Semi-Divine golden battle suit, but it didn't help. The golden battle suit was pierced through. However, the guy performed Flying Flower Demon Flash in advance and was able to change his position during the stabbing, so he was wounded in the thigh instead of his chest.

Those who weren't able to run in time were all impaled by the stings.

The stings weren't done after one stabbing. Instead, they stabbed the targets continuously.

Yu Lu and Yu Xian, who had already died once, couldn't be resurrected again now that their Immortal Seals had been used.

Also, unlike last time, they were faced with not one Hundred-Year Tree Demon, but three Hundred-Year Tree Demons and one Thousand-Year Tree Demon.

The Tree Demons could only attack their target by stabbing them when the target was least prepared.

*Clang!*

Yu Hun cut open the barrier that the Thousand-Year Tree Demon set up as a disguise with his scissors. However, the Thousand-Year Tree Demon dove into the soil and disappeared.

Yu Hun roared, "Damn it, it's a Thousand-Year Tree Demon! We ran into a Thousand-Year Tree Demon!"

It was impossible to chase the enemy. If they landed on the seabed, who could resist the unpredictable stings?

Even Han Fei wasn't confident of blocking the Thousand-Year Demonic Stings. After all, they could pierce Semi-Divine equipment. He could only resist ultra-quality demonic weapons at this moment, when they were not wielded by Heavenly Talents.

If his enemy were an Heavenly Talent, he couldn't resist them with his bare hands even though they were only using ultra-quality demonic weapons.

At this moment, Han Fei's team still thought that they ran into a Thousand-Year Tree Demon. They didn't notice the Hundred-Year Tree Demons at all.

At this moment, all the stings disappeared into the ground, and two teammates had really died. Only nine of them were left, and five had lost their Immortal Seals.

Yu Hun was quite chilled. Two of the Heavenly Talents from the Ten Thousand Demon Valley had been killed when the exploration just began?

What should he do if it happened again? Those five guys could be killed any moment.

Yu Ji suddenly grabbed her harpoon and pointed it at Han Fei. "Why did you run alone?"

Everybody looked at Han Fei with an unfriendly expression.

Han Fei remained calm. "There wasn't time. I had to save my own life and tell you that danger was coming with my action."

Nobody could burst into fury after hearing that. After all, the attack was too fast. They would've fled as early as possible without wasting time warning others if they were in Han Fei's shoes.

Yu Hun's face was dark. "You were the one who discovered this place."

Han Fei scoffed. "I didn't discover this place. I simply smelled something."

Yu Hun looked rather gloomy. Logically speaking, Han Fei wasn't to blame for the accident, but he had been behaving too coldly since the beginning.

It never occurred to Yu Hun that he escaped no more slowly than Han Fei did!

Yu Ji put her harpoon down. In any case, after days of observation, she didn't cherish Han Fei as a talent anymore. She found that the guy would not fit in with them.

After that, Yu Ji lowered her head and looked at the seabed. "The Thousand-Year Tree Demon must still be here. We should kill it."

Yu Ying scoffed. "How? Unlike human beings, we cannot control those plants even though we can control some creatures."

Some were shocked. They had already died once. If they went down again, they would probably really be killed.

Some disagreed and found a perfect excuse. "Our purpose is to kill the dry tree, not to fight the Thousand-Year Tree Demon."

Someone thought for a moment. "If there are treasures down there..."

Yu Hun roared, "We won't fight it! Let's get out of here!"

Han Fei sneered. He had been holding his breath since the beginning, but he vaguely sensed something wrong. Where were the hallucinations?

Yu Hun was the captain, and when he said that they should go, everybody swam back to the forest of algae without hesitation.

However, the moment they started moving, they saw an overwhelming number of red stings stabbing from the void.

Yu Hun roared, "Not good! Run!"

Han Fei frowned and mumbled. "Wait! Can the stings of the Thousand-Year Tree Demon be launched from the void? If they can, why would it pretend to be a tiny tree and root in the bush of thyme?"

Han Fei quickly turned around and stepped back while he thought quickly.

He tried blocking the stings with his harpoon, only to find that the stings were fake.

Not just Han Fei, everybody else discovered that too.

Yu Ying roared, "No! They're all fake! Don't move!"

Nobody dared to move, not even Yu Hun. He had fought a lot in the front line, but he had never been to this place. He had books for reference, but the information on the books was completely different from reality. Besides, this situation was never mentioned in the books!

Nobody dared to move at this moment, but the thyme was growing crazily.

Han Fei cut some of the thyme, only to find that they were real and they had the power to pull everybody closer.

What happened next was bloodcurdling even to Han Fei.

He found that the bottom of the sea was twisted and folded like a piece of paper, as if it were going to envelop him.

Immediately, Han Fei activated the Eyes of True Vision, but he didn't see anything.

The situation got more and more dangerous, and Han Fei looked around.

The rest of the team were trying to move towards different directions. When they turned around, they found that their companions were gone.

Han Fei found that his teammates were gone too. Had they all been wiped out, and he was left alone?

Suddenly, Han Fei sensed that something was stabbing at him. He dodged it with his natural instincts, but after that, someone shot something at him.

"Huh? The Hundred-Year Demonic Stings?"

"No, if it were a Hundred-Year Demonic Sting, my ultra-quality battle suit would've been pierced. Then, was it a long spear? Did someone attack me?"

Han Fei discovered, to his surprise, that his head was extremely clear, but he still couldn't see behind the illusions.

He estimated that other people's situation was the same. He couldn't see them as much as they couldn't see him.

"Fuse."

Han Fei chose to fuse without hesitation. He had fused with his spiritual beasts only a few times during his growth, partly because he couldn't contain Little Black's brutality, and partly because the Yin-Yang Divine Eyes were too obvious.

However, he couldn't see anyone at this moment, and dangers were getting strong. He certainly couldn't fight the battle with blind eyes.

The moment he fused, Han Fei felt the strong desire of killing. His eyes became black and white, and his face expressionless.

However, his head was clearer than the previous times when he had fusion. He even wondered if he could master the state of fusion now.

In the next moment, he saw a flashing world where eight people were carefully feeling the environment. Occasionally, someone would attack a shadow.

Apart from the picture, dense vines were slowly approaching them, and a thick red treeman was sneaking upon one of them.

Two creatures were getting close to Han Fei. One of them was a Hundred-Year Tree Demon, and the other was a Half-Merman.

Han Fei remembered the Half-Merman's name to be Yu Qiang, who had just been resurrected from an Immortal Seal.

Han Fei put on a bloodthirsty smile, and his heart was filled by the lust for killing.

### **Chapter 783: Cooperation with the Thousand-Year Tree Demon**

Faced with such a weird scene, Han Fei somehow smiled. The desire for killing was almost taking control of him.

Trying to keep his head clear and suppress the brutality, Han Fei extended his hand and picked a leaf of the Purple Vine Thyme, before he put it in his mouth.

Instantly, Han Fei felt that his head was refreshed and the lust for killing was dispersing.

“Wow! This is good stuff!”

Chewing the leaf which was stickier and more succulent than peppermint, Han Fei felt like it was a gum.

Suddenly, Han Fei sensed that he had just been scanned in a weird way. From the corner of his eyes, he noticed that the Thousand-Year Tree Demon stopped and looked at him.

Although the Thousand-Year Tree Demon didn't have eyes, Han Fei had the feeling that it was looking at him and saw that he was eating the “peppermint”.

As a highly-intelligent creature, it must be wondering why this sea demon was eating the thyme leaf. Had he really turned into an idiot?

Han Fei instantly realized that he couldn't let the Thousand-Year Tree Demon know that he had recovered.

Also, wasn't this the perfect environment? His head was so clear that the first idea that occurred to him was to kill Yu Qiang who wasn't far away.

*Hum!*

Han Fei charged at Yu Qiang in a streak of brilliance.

However, the guy was a Heavenly Talent too and reacted very fast. He had performed the Flying Flower Demon Flash in time and dashed away before he was hit.

Han Fei laughed in the next moment, as the guy had flashed to the wrong place.

Yu Qiang ended up in a bush of Purple Vine Thymes. He was almost instantly tied up by thousands of vines.

Han Fei caught up to him and performed Dance of Light. Seeing that the Thousand-Year Tree Demon was still not moving, he said telepathically, *How about we kill them together?*

“Puchi!”

Han Fei pierced through Yu Qiang with one attack and raised his harpoon, grabbing a Sea Swallowing Seashell.

In the next moment, Han Fei jumped away with a Flying Flower Demon Flash.

Following that, a terrifying power burst out at the vines of the Purple Vine Thymes.

Han Fei sneered. Had the guy launched a random Dying Strike because he couldn't find a target?

Han Fei collected the Sea Swallowing Seashell and continued, "I know you can understand me. You allured them to this trap with yourself as the bait first. When they drop their vigilance, or even if they don't, they will be caught in illusions after staying for too long. Those Purple Vine Thymes are meant to first increase the sense of reality, so that they will be stuck between reality and illusions... What a great method."

Han Fei stood still, because the Purple Vine Thymes didn't approach him anymore.

Suddenly, a message in the pure language of spiritual power reached Han Fei's head. *I understand what you mean, but I don't understand your language. Why are you killing your partners?*

Han Fei sneered. *Don't you see what I look like? What about them? Do you think we are partners?*

After a moment of silence, the Thousand-Year Tree Demon said, *Okay, let's cooperate.*

Han Fei grinned and didn't attack Yu Ji, who wasn't easy to kill with her Divine equipment. However, Han Fei replaced his harpoon with a Semi-Divine Weapon and put on a golden battle suit. He had looted those things to impersonate other Half-Mermen.

Even if Yu Hun and the others broke free from the illusions and found that their partners were killed by a Semi-Divine Weapon, they wouldn't think that Han Fei did it because he didn't have a Semi-Divine Weapon!

Han Fei charged at another Half-Merman, who was frightened and knew that he was in danger. His Companion Spirit appeared, and countless shadows were shivering on his body.

At the same time, he unleashed the most powerful Sea King Strike at the source of danger.

However, the ability to see things was too important.

Besides, Han Fei had the Yin-Yang Divine Eyes, which allowed him to see the trajectory of the guy's attack clearly.

"Puchi!"

After taking him down again, Han Fei stabbed his hand into the target's chest and took the Sea Swallowing Seashell, before he escaped with the Flying Flower Demon Flash.

However, the moment Han Fei flashed away, he was thrown into the dense vines by a terrifying force.

"Pu!"

"Damn it! I underestimated the Dying Strike!"

Han Fei cast the Divine Healing Technique on himself and felt that his hands were shivering. Fortunately, he was wearing a Semi-Divine battle suit and blocked the attack with a Golden Harpoon. He probably would've been heavily wounded if he were wearing the ultra-quality battle suit.

However, Han Fei sensed that a great number of vines were moving to him.

He instantly asked telepathically, *Hey, what's the meaning of this? We're allies right now!*

However, the Tree Demon replied casually, *Those who are not my people are bound to think differently.*

Han Fei was instantly lost for words. *F\*ck off! I'll just kill you along with them then.*

Han Fei bit a "peppermint" and trembled, unleashing magnificent power that shattered the vines.

From his body, a terrifying knife intent swept out and tore the vines apart.

"Nine-Tailed Mantis Shrimp, catch this goddamn Tree Demon!"

Hundreds of Void Chains appeared out of nowhere. The Thousand-Year Tree Demon didn't see them coming at all and wondered why this guy was so strong.

However, it was already too late. Han Fei tore apart the vines and was already coming at a frightening speed.

*Shua! Shua! Shua!*

The Thousand-Year Demonic Stings stabbed Han Fei crazily, but Han Fei dogged every one of them before he was hit.

"Ah!"

When Han Fei went on a rampage with his harpoon, he heard a nasty scream. He wondered who had let out a Demon Shrii.

Han Fei thought to himself, *Just keep shrilling. You'll all be dead before the reinforcements come.*

When the Thousand-Year Tree Demon was in danger, the three Hundred-Year Tree Demons stabbed their stings at Han Fei too, but none of them could hit Han Fei.

*BAM!*

After punching a hole through the Thousand-Year Tree Demon with his harpoon, Han Fei flashed out and cut his harpoon down.

*Wait a moment, let's cooperate.*

*Cooperate? I already gave you a chance!*

*BAM!*

However strong the Thousand-Year Tree Demon was, it couldn't resist the Semi-Divine Harpoon and was shattered into pieces.

At this moment, Han Fei suddenly realized that a red shadow just ran underground.

Han Fei didn't need to say anything. The Void Chains had already blocked the sting and plucked it out.

Han Fei seized the red sting and didn't even bother to look at it. He quickly moved closer to Yu Hun.

"Hey, are you still going to brag? I'll kill you here and now!"

Han Fei's reaction was quite fast. Even if the illusions weren't instantly dismissed after the Thousand-Year Tree Demon's death, they couldn't endure Yu Ji and other people's attack for much longer.

At this moment, Yu Ji was shrouded in a highly-compressed water ball. She seemed to be preparing for a weird attack.

Han Fei simply performed the Sea Racing Art and accelerated himself to the highest speed. His Void Chains had already surrounded Yu Hun.

Yu Hun seemed to know that he was in danger too. His body glowed so brilliantly that the seaweed within a hundred meters was all shattered.

However, Han Fei was enhanced by the Majestic Mystic Spell at this moment, and he couldn't care less about that.

*Hiu! Bam!*

Han Fei grunted and blew up Yu Hun's head with his harpoon. He was going to kill the guy again after his resurrection.

However, in Han Fei's bracelet, Shu Shan suddenly said, "The illusions cannot last any longer."

...

Two seconds later, as Yu Ji's terrifying high-pressure water ball spread out, everybody returned from their illusion.

Then, what they saw first was not Yu Ji who was on a rampage, but Han Fei who was swimming up from the bottom of the sea with blood on his lips.

A pile of red wood was collapsing where Han Fei had left. Everyone could tell that it was the Thousand-Year Tree Demon.

Han Fei was holding the broken ultra-quality harpoon. His eyes were no longer black and white. He even vomited blood and spewed out the sticky peppermint.

"Stop, all of you!"

Yu Ying roared loudly.

Yu Ji breathed heavily.

"Who blew up my head? Get out now!"

Yu Hun looked around after getting out of the void, only to find that the illusions were over.

Han Fei was farthest from him. The shattered Thousand-Year Tree Demon was clearly destroyed by him.

Yu Ji was breathing heavily with weird ripples spreading out. He knew what attack Yu Ji must've launched and ruled her out as a suspect.

Then, it could've only been Yu Ying and Yu Bing, because they were the only two who had Semi-Divine Weapons.

He was absolutely sure that the terrifying attack was launched by a Semi-Divine Weapon just now.

Yu Bing was rather stunned when Yu Hun glared at him angrily. He asked in surprise, "Lord Yu Hun, have... Have you used your Immortal Seal?"

Yu Ying couldn't have looked more awful. He demanded furiously, "Which of you attacked me just now?"

Both of them frowned. Yu Ying said, "I was executing the vines just now."

Yu Hun instantly gazed at Yu Bing, who replied at a loss, "Someone tried to kill me just now, so I defended myself."

Yu Gan trembled with fury, but he couldn't kill them. He could only glare at Yu Bing. "I've survived battles in the front line, but I was almost killed by you just now!"

#### **Chapter 784: Traces of Human Beings**

Yu Ji frowned. "How were three of us killed so quickly?"

Yes, two of them were killed by Han Fei, and he didn't know who killed the last one.

The situation was very chaotic with all the noises and explosions. Nobody could see anything either. Who could tell who killed whom?

The other six teammates were all silent. They would be stupid if they confessed that they accidentally killed their partners, or they would be punished after they returned to the Ten Thousand Demon Valley even if they got out of this place alive.

Suddenly, an indifferent voice said, "Can we stop chit chatting? There are still three Hundred-Year Tree Demons."

It was exactly Han Fei who talked. At this moment, Han Fei seemed absolutely unconcerned about who was alive and who was dead. He looked as if everybody owed him plenty of money.

Everybody shivered. "Where are they?"

Han Fei pointed his harpoon. "There, there and there..."

The Hundred-Year Tree Demons that Han Fei pointed out instantly plucked their roots and started running, having no idea when they were exposed.

However, how could they run faster than Yu Hun and the others who were infuriated?

After only a hundred seconds, the three Hundred-Year Tree Demons were chopped into pieces, although it was quite unfortunate that no demonic stings were found.

Without the Hundred-Year Tree Demons and the Thousand-Year Tree Demon, all the vines retreated, and the place was back to peace.

Han Fei landed on the bottom of the sea. He cut a lot of Purple Vine Thymes with his harpoon and stuffed them in his Sea Swallowing Seashell.

Yu Ji frowned. "Yu Fei, what are you doing?"

Yu Hun also asked, "Why are you cutting those worthless leaves?"

Han Fei replied without raising his head, "They're refreshing and can keep my head clear. Also, they taste good."

Everyone: "???"

They taste good? We've just been through a life-and-death battle, and you're telling me that those leaves taste good?

Yu Ji frowned. "Yu Fei, how did you locate the Thousand-Year Tree Demon and the Hundred-Year Tree Demons?"

Hearing Yu Ji's question, Yu Hun also asked Han Fei, "You weren't caught in illusions just now? What did you see?"

Han Fei shook his head. "I didn't see anything just now."

Yu Ji paused. "Then how did you..."

Han Fei pointed at the Purple Vine Thymes and said, "I was almost tied up by them. Then, I bit off one of them and found that their leaves were refreshing. After that, I found a flaw in the illusions. From where the vines came, the spiritual energy was too concentrated. I tried attacking there and found them."

Yu Ying interjected, "How can you see the density of spiritual energy?"

Han Fei pretended to be surprised. "You can't see it? Isn't it a necessary skill for a sea creature to survive?"

Everyone: "..."

Yu Ying was lost for words. *Who told you that seeing the concentration of spiritual energy is a necessary skill for survival? Why have I never heard about it?*

Yu Ji was silent. "Is this what legendary creatures are like?"

Yu Hun was no longer mad at Han Fei. He even praised him. "Good thing that you executed the Thousand-Year Tree Demon in time, or I may have lost my head."

Han Fei secretly sneered. *If the Thousand-Year Tree Demon hadn't been so treacherous or removed the illusions as fast, I would've cut you into pieces.*

But now that the crisis was over, Han Fei was not anxious. Only six of the eleven explorers were left after only six hours. There was plenty of time. Han Fei loved a chaotic environment best.

Yu Ji sighed. "What happened has already happened. It was quite exhausting. Now that it's over, I suggest that we take a break."

Yu Hun nodded. "You're right. We must reflect on our mistake too and don't be too greedy."

Han Fei ignored them and began to cut the thyme leaves. After he cut a bunch of them, he threw some of them to the spiritual spring in Forge the Universe, planning to nurture them there.

Those thyme leaves were really good stuff! They could even suppress Little Black's aggression. He could keep one of them in his mouth in his battles in the future to keep his head clear.

After cutting the thyme for a while, Han Fei discovered that Yu Da, who was also the only guy that didn't have a Semi-Divine Weapon, was cutting the thyme leaves too.

Han Fei suddenly rose and stopped cutting.

Yu Da grimaced. "I've already used my Immortal Seal. If I die another time, I'll be a goner. I have to keep my head clear too."

Han Fei nodded and thought to himself, *Do you think you're me? If you're caught in another illusion like this one, you'll only die faster if your head is clear, moron.*

Suddenly, Han Fei detected a long bar underneath the bottom of the sea.

Instantly, Han Fei stopped cutting and started digging.

Everyone: "???"

Yu Ying asked, "Yu Fei, why are you digging right now?"

Han Fei said coldly, "Observing the environment all the time and detecting underground treasures is a necessary skill for a sea creature to survive."

Instantly, everybody's face was darkened. Another necessary skill? How many necessary skills do you have?

However, Yu Bing leaned close to him and asked, "Are you saying that there's treasure down below?"

Han Fei said coldly, "It's mine."

Instantly, everybody unleashed their senses, only to detect a long bar some ten meters into the soil at the bottom of the sea.

Unfortunately, there was only one.

They found it inappropriate to compete with Han Fei at this moment. After all, Han Fei just killed the Thousand-Year Tree Demon and saved them.

A moment later, a fruit that was as red as a carrot with six long tails appeared.

Intense spiritual energy was spreading out on the fruit. Everybody's eyes glittered as it was a good treasure.

Information popped up in Han Fei's eyes.

<Name> Six-Tailed Mystic Ginseng

<Introduction> It grows among the Purple Vine Thyme and absorbs the essence of seaweeds. It contains abundant energy and can enhance senses and spiritual power.

<Level> Demon Level

<Quality> Ultra

<Spiritual Energy> 498,000 points

<Effect> It can increase a significant amount of spiritual fruit and ten percent of spiritual power when eaten directly. Doesn't not work for creatures above the Hidden Fisher level. You cannot improve your spiritual power by eating other fruits in another a hundred days. It cannot be eaten repeatedly.

This was a rare treasure!

Han Fei was delighted. It was even better than the Sunflower Fruit that he saw! It had abundant spiritual energy and was perfect for breakthroughs.

Sensing that he used a lot of spiritual energy just now, Han Fei simply tore off a tail and put it in his mouth.

Everyone: "???"

Yu Ji exclaimed, "You're eating it just like that?"

"Are you not afraid it's poisonous?"

Yu Hun added, "Do you even know the effect of that? Even I don't recognize it, and you're eating it?"

Han Fei said casually, "Telling if a spiritual fruit is poisonous is..."

Everybody else said at the same time, "... Is a necessary skill for a sea creature to survive?"

Yu Ying rolled her eyes. "Can you say something else?"

After a brief stun, Han Fei nodded and said, "You're right. You're all fast learners."

Everyone: "..."

Another hour passed. No other sea demons came. Obviously, the previous Demon Shriek didn't attract anyone, which meant that they were the only team, or rather, the only half-team, in a radius of three hundred kilometers.

Yu Hun rose solemnly. "Let's continue the exploration, but we must not be reckless. Yu Fei, if we're ever in a similar situation, you'll—you'll check it first with your necessary skills and confirm that everything it's fine before we do anything."

Yu Hun was good at fighting, but he had no idea about those necessary skills of survival. Well, he did know a thing or two about that, or he would've died long ago. It's just that he had never been to such a weird place before.

Han Fei accepted the request and said to himself, *I'm going to let you die first if we're caught in danger.*

After they rose, everybody proposed that they return to the forest of giant algae, which seemed much safer than the place with the Purple Vine Thyme that had claimed the lives of five of their partners so easily.

After half a day of swimming, Han Fei didn't find any opportunity to attack them, but he did find many spiritual fruits and other treasures. Almost everybody got three spiritual fruits.

They killed twenty Hundred-Year Tree Demons. Han Fei didn't have to do anything at all. Yu Hun and others, who hated the Tree Demons' guts, killed them without showing any mercy.

For some reason, Han Fei seemed to have become the new captain of the team. He seemed even more respected than Yu Hun was.

At this moment, Yu Da mumbled, "How big is this place? We've walked for such a long time, but we haven't met a single human being..."

Suddenly, Han Fei detected a ruined place forty kilometers away where a great battle seemed to have just happened.

Han Fei quietly swam in that direction. When they were twenty kilometers away, Yu Hun roared, "Follow me! I found something!"

A moment later, everybody stood on an area of ruins that was full of severed leaves and marks of knives and swords. There was also a terrifying fist mark, and whatever left of a Thousand-Year Tree Demon lay in the pit that was caused by the punch.

Han Fei found the shape and feeling of the fist mark surprisingly familiar.

*Huh? The fist mark of the Cao family? Is Cao Qiu here?*

### **Chapter 785: Cao Jiaren From the Cao Family**

The person that Han Fei first thought of was Cao Qiu, who was the only one that would smash enemies with fist marks. He probably had a lot more of such fist marks.

Han Fei thought of something. If he could find Cao Qiu, it would be very easy to take down Yu Hun and the others! The man could throw out a couple of fist marks, and Yu Ji and the others would be killed even if they were Heavenly Talents.

Yu Hun said solemnly, "Human beings. They were a team of human beings, including at least three manipulators, an armorist and a soul warrior. It's a full-class team! Human beings always love teamwork in battles."

All of a sudden, everybody including Yu Hun got anxious.

To be more exact, some of them were nervous, and some were excited.

Yu Da, for example, was the only person who had never fought in the front line. He had often heard how strong human beings were and the stories of the experts who returned from the front line. He was both scared and eager at this moment.

Yu Ji said solemnly, "We're outnumbered. Since they're capable of slaying a Thousand-Year Tree Demon, they can't be weak. I suggest we avoid them."

Yu Hun nodded. "Yu Ji is right. Don't underestimate the human experts! If human beings are so easy to deal with, we would've conquered the Scattered Stars Island a long time ago!"

Yu Ying slightly nodded. "So, which direction are we going?"

Everybody looked at Han Fei, as if they were saying, you should lead the way with your necessary skills.

Nobody suspected Han Fei at this moment. After all, if Han Fei hadn't executed the Thousand-Year Tree Demon in the earlier battle, a lot more people would've died.

Han Fei expressionlessly took out a "peppermint" and put it in his mouth, before he observed the situation.

He landed on the bottom of the sea and crouched, pretending to be a professional.

In fact, he was simply running an analysis. There were bound to be manipulators in the human team, who could prevent plants from approaching them in such an environment. So, the direction where there were gaps among the plants must be the direction in which they left.

However, Han Fei wasn't sure if Yu Hun and others were experienced. If they realized that he was leading them to the human team, they would suspect him.

Immediately, to everybody's surprise, he pointed at the direction that was opposite to human beings' retreat. "Something changed the plants in that way."

Yu Hun immediately asked, "How can you tell?"

Yu Ying jumped in, "Don't say that it's another necessary skill for a sea creature to survive..."

Han Fei: "..."

He thought for a moment and said, "This way is wider and has a better view. It's easier to deal with dangers. It must've been expanded on purpose. The opposite way has thick leaves and seems to have been hidden on purpose."

Han Fei didn't give an answer but simply let them choose for themselves.

However, Han Fei tried to manipulate them by implying that human beings covered their traces left in the way of the thick algae.

Yu Hun said, "Let's go. Our purpose is to kill the dry tree, not to fight human beings."

Yu Ji felt that something wasn't right, but it did sound very reasonable. She also nodded. "I'm on board."

Han Fei secretly sneered. He only hoped that Cao Qiu wouldn't move very fast. He could use him to kill Yu Hun and the others and then sneak away.

Whatever caused the anomaly of the Demon Purification Pot in the undersea forest must be extraordinary. He preferred looking for the treasure to killing the tree.

Or, maybe he could turn back into a human being and then openly kill some Half-Mermen. Then, he wouldn't go back to the Ten Thousand Demon Valley at all.

On his wrist, Shu Shan suddenly said, "You're tricking them because you want to kill them all?"

Han Fei said, "What are you talking about? I point out a way for them in the deep sea."

Shu Shan thought to himself, just keep lying. He reminded him, "Kid, don't think that you're smart. You'll be easily exposed if human beings have left traces of fighting up ahead."

Han Fei realized that it did make sense.

Therefore, he instantly said, "Wait a moment."

Yu Hun was getting impatient. "Why? Have you found something else?"

Han Fei suddenly pointed at the direction of lush algae. "I think we should chase the human team."

"Why?"

Everybody else asked in confusion.

Han Fei said casually, "Those humans have been moving openly until they came here. Is it possible that they found anything?"

What Han Fei said enlightened everybody.

Han Fei was quite satisfied. By saying that, he implied that they were going in the way that human beings came, so it wouldn't be surprising if they found traces of fighting.

Han Fei was also certain that Yu Hun didn't want to chase those human beings, because the fist marks of the Cao Family were very powerful even for him, not to mention Yu Hun and the others.

As he expected, Yu Hun waved his hand and said, "No, listen to me on this one. We're outnumbered and they have multiple manipulators. We won't have advantage in a head-on clash. Our top priority is to join another sea demon team."

Yu Bing nodded. "I agree with Lord Yu Hun's suggestion."

Yu Da agreed, "Me too."

Both of them were scared. Yu Bing hadn't used the Immortal Seal yet, but Yu Da and Yu Hun only had one life left and they didn't intend to risk it and die for nothing.

Han Fei sneered. *The more scared of death you are, the sooner you'll die! I'm going to bring you to hell!*

Half an hour later...

Han Fei's team found three places that had battle traces. Everybody thought that it was a safe way that human beings had explored, so they moved very fast.

Han Fei was the only one who was observing the concentration of spiritual energy and smelling the seaweeds that had been torn apart.

A moment later, on the fourth battlefield, Han Fei knew that they were catching up based on the concentration of spiritual energy.

Suddenly, Yu Hun frowned. "Something isn't right. I sense that the human air is getting stronger."

Yu Bing questioned, "Did someone on their team die here?"

Yu Hun considered for a moment. "That's possible. However, it's also possible that we've run into another human team. The areas we're exploring must be overlapping those human beings explore. Let's be careful."

After only a quarter, Han Fei detected that some people were fighting a Hundred-Year Tree Demon up ahead.

*Huh? Cao Qiu isn't among them... Wait, Cao Jiaren?*

Han Fei raised his eyebrows and sent a telepathic message. *End the battle as quickly as possible. Half-Mermen are catching up to you.*

Cao Jiaren, who was commanding the battle, came to a sudden halt, but her expression didn't change.

Cao Jiaren looked back casually, but the guy was beyond her senses. So, she spoke to her team telepathically, *Kill it in three seconds. Hunter, hide. Armorist, be ready to open shields. Manipulators, submerge. Soul warriors, protect the spirit gatherers... Be prepared for battle.*

As she talked, she grabbed the flute that she had been carrying and put on a smile. Whoever had sent the message and whether or not they were malicious, she was confident of dealing with them.

Han Fei continued sending his message, *One of them has a Divine Weapon and battle suit, and the other three have Semi-Divine ones... Please disguise yourselves, or you will be detected in twenty seconds.*

Cao Jiaren frowned, wondering who was talking. Human beings were all in teams. Was it a Thousand-Year Tree Demon that was trying to manipulate her to kill the sea demons?

Cao Jiaren instantly said to everyone, "Nobody is to land on the bottom of the sea."

...

Suddenly, Yu Hun stopped and remarked in surprise, "Not good, we've run into human beings... Wait, there are only five of them?"

Yu Ji's expression quickly changed. "How is it possible? Haven't human beings already explored this way? How can there still be anyone?"

Yu Ji looked at Han Fei, who frowned and said in confusion, "That doesn't make sense! Are they fighting?"

Yu Hun shook his head. "Not exactly... Huh! They're healing their wounds. A human spirit gatherer is healing his two teammates."

Yu Hun was instantly tempted. "This is a great opportunity. They seem to have just been through a great battle with heavy losses. We'll go there and kill them."

Han Fei looked as regular as before, but he couldn't be happier about his senses. Even if Yu Hun used to be a peak-level sea demon, so what? He was not even as strong as Han Fei as he was suppressed. It was only natural that he was fooled.

Seeing that Yu Hun had already dashed out, Yu Da and Yu Bing quickly followed him. They dare not fight a complete human team, but they wouldn't mind dealing with a few individuals.

Because Yu Hun reacted too fast, Yu Ji and Yu Ying could only chase him. Han Fei followed them about half a step behind them.

He dare not keep himself behind too much in case he was suspected. He was sure of every human being's position except the hunter, but it was impossible for the hunter to kill him.

The target was ten kilometers away.

On the human side, several guys rose and began to flee.

Yu Hun roared, "Move at full speed! They're trying to run!"

When Yu Hun was only a thousand meters away, Han Fei suddenly realized that the Heaven Spirit Detoxifying Insect started swallowing things as if it were having a feast.

"Shoot... Poison God?"

Han Fei should've seen it coming that Cao Jiaren, as Cao Qiu's sister, definitely had Poison God, and it was absolutely a strengthened version.

Almost in the blink of an eye, Han Fei was filled with the urge of fighting.

After only one moment, Yu Ji suddenly said, "Wait, this is an ambush."

*Wu... Wu... Wu...*

All of a sudden, a weird and mystical sound echoed, and those who were running dashed back.

Thousands of swords and sabers were sweeping, and a purple streak of light moved at Yu Hun like a flying ribbon.

All the spiritual plants were on a rampage. Infinite leaves of the seaweeds were coming. Some gigantic vines were slapping them like snakes too.

Han Fei quickly had the antidote to the strengthened version of Poison God, fearing that the Heaven Spirit Detoxifying Insect couldn't take care of it.

Then, Han Fei hopped among the vines like an agile monkey. However, he found himself in a weird environment, and his eyes, nose and ears were malfunctioning.

Han Fei instantly said telepathically, *Hey, we're still cooperating. I'm the Inferior Man-Fish who sent you a warning. Why don't you move your illusion away?*

However, the moment he said that, Han Fei sensed soundwaves roaring in every direction. Each of the soundwaves was as powerful as the strike of a peak-level Hanging Fisher.

Han Fei was instantly lost for words. *Hey, Cao Jiaren, I'm an undercover agent that human beings sent to sea demons!*

### **Chapter 786: Professional Teammate Killer**

Instantly, the soundwave attack was gone, and the illusion around Han Fei disappeared. Cao Jiaren appeared a hundred meters away at some point.

Cao Jiaren looked at Han Fei.

She was as gentle as before even in such a situation. She even wore a casual smile. "Who are you?"

"Ah!"

Before Han Fei could reply, he saw that Yu Da had been pierced by a soul warrior inside a mysterious circle that emitted colorful light and was letting out a Demon Shriek.

When the soul warrior minced half of Yu Da's body, several vines seized him and retreated, and an armorist established three shields in front of him.

The terrifying Dying Strike was unleashed, and an Amulet was broken first.

After the Amulet was broken, an ultra-quality spiritual shield was shattered, and the second shield cracked, but the soul warrior and the armorist were both fine.

Han Fei pointed at Yu Hun and said, "He's the captain of the team and used to be a peak-level sea demon. He has already used his Immortal Seal."

Cao Jiaren seemed stunned at first. She nodded her head, and three armorists and two soul warriors attacked Yu Hun at the same time with vines attached to their waist, so that they would be pulled back in case of an accident.

Cao Jiaren looked at the battlefield and glanced at Han Fei again.

Han Fei bared his fangs and said with a smile, "The rest of them all have Immortal Seals and Dying Strikes. That one over there is named Yu Bing. He's the weakest and his Semi-Divine Weapon is damaged. It'll be easy to kill him."

Yu Hun was terrified at this moment. Knowing that he was dead for sure, he suddenly opened his hands and roared, "Esteemed sea king, I'll sacrifice my life for..."

Han Fei took out his ultra-quality demonic weapon and darted it at Yu Hun. The harpoon condensed half of his demonic Qi.

However, an invisible power enshrouded Yu Hun, and Han Fei's harpoon couldn't break in even though it penetrated crazily.

Han Fei put on a crooked smile. "Explode!"

*Boom!*

The ultra-quality demonic weapon exploded and disrupted Yu Hun's sacrifice. Still, the explosion didn't hurt him at all.

One of the soul warriors slashed the giant axe in his hand with an enormous crab surfacing on his body.

An armorist's eyes were bloodshot. "Nine Souls Saber, break armor!"

At the same time, Yu Hun was tied up by a lot of vines.

Knowing that his life was at risk, Yu Hun roared, "Sea God's Arrival!"

A golden illusion appeared, and Yu Hun became more than five times stronger than before. Han Fei felt that his blood was freezing.

However, when the golden illusion appeared, a terrifying fist had already reached Yu Hun.

As it turned out, Cao Jiaren had squeezed and broken a jade slip at some point.

The illusion was shattered into pieces by the attack of a peak-level Hidden Fisher when it just took shape.

Following that, Yu Hun was killed under the crazy barrage of attacks.

When Yu Hun died, Han Fei's lips curled as he looked at Cao Jiaren. "This guy was tough. He was very strong even though he was poisoned. I underestimated him."

Cao Jiaren slightly frowned. "You don't seem to be poisoned."

Han Fei thought to himself, *I can't tell you that I have the antidote, can I?*

Cao Jiaren didn't attack again. In her eyes, the Half-Merman team that had been ambushed was losing.

Han Fei, however, had a weird identity and wasn't poisoned.

He seemed rather at ease too.

Cao Jiaren dare not underestimate such a man and had to stay here to keep an eye on him.

The Dying Strike didn't kill anyone.

Han Fei could tell that the explorers here were all elites. They might not be as strong as the Scattered Stars First Unit, but three armorists could work together to block the Dying Strike.

After Yu Hun died, Yu Bing became the next target to be hunted.

However, to Han Fei's surprise, Yu Ying's body seemed to be thawing. She seemed to be escaping from this place with a weird technique.

Cao Jiaren raised her flute and continued playing.

*Wu... Wu... Wu...*

As the weird and mysterious sound came, Yu Ying vomited blood, and her body dissembled and disappeared in the end.

In the end, Yu Ying stared at Han Fei thoughtfully.

Han Fei quickly sensed the environment. He saw a shadow slowly surfacing some thirty kilometers away.

Han Fei's eyes contracted. What kind of technique was that?

Han Fei had no time to think. There was no telling if it was because of the Sea God's Arrival just now, but Yu Ji's eyes glittered and she was suddenly covered by a golden giant.

She caused a terrifying pressure. It was exactly the same move that Yu Hun just performed.

Cao Jiaren's weird melody was disrupted, but she wasn't panicked at all, and she simply took out an ancient mark.

In the next moment, another terrifying fist mark was launched.

"Another one?"

To be more exact, Han Fei had one of those too. He asked for one from Cao Qiu and never used it.

The golden figure magnificently survived the attack of a peak-level Hidden Fisher. Even though the figure was shivering weakly, it managed to weather through the attack.

"Huh?"

Cao Jiaren was slightly surprised. She unhurriedly took out another piece of jade and squeezed it.

The same attack appeared. This time, the golden figure didn't resist it again but chose to flee.

However, the attack was too terrifying for her to escape.

In the end, the golden illusion was shattered, and then the Amulet was broken. Yu Ji was easily killed.

Seeing how casual Cao Jiaren was, Han Fei was lost for words, wondering if everybody from the Cao family was so rich. She threw out three pieces of ancient jade just to kill two enemies?

Han Fei dashed out and said to Cao Jiaren telepathically, *Spare this one for me. She'll be useful.*

Naturally, Yu Ji hadn't died yet. She must've refilled her Immortal Seal in the Ten Thousand Demon Valley, and the weird golden figure must be a new method she acquired.

However, Cao Jiaren suddenly said, "When did I say you could go?"

Suddenly, hundreds of sabers and swords were launched at him.

Han Fei was lost for words. It seemed that Cao Jiaren didn't trust him.

But why? He had helped her finish off a whole team!

Nevertheless, Han Fei grinned and charged at the torrents of knives and swords with the 64-Dimensional Fish Dragon Dance and the Sea Racing Art.

Instantly, one of the armorists cursed, "How is this son of a b\*tch so fast?"

Hardly had Yu Ji shown up when Han Fei grabbed her and kept rushing out.

Although thousands of vines were flying at him, Han Fei extended his hands and unleashed a terrifying fist mark, blowing up the vines into pieces.

It was not the Sacrificing Punch, but a punch under the cover of the Art of Invincibility.

So, to some extent, it was the Art of Invincibility.

Watching Han Fei rush off, a hunter was about to chase after him, when Cao Jiaren called out to him, "No need to chase him."

At this moment, Yu Bing was still fighting a soul warrior. As they fought on, he found that the illusion was gone and he was surrounded by nine enemies.

Yu Bing: “???”

Having no idea what happened, Yu Bing thought that he had been ambushed. He raised his head and let out a Demon Shriek.

He died in regret! It was all Yu Hun’s fault. Han Fei had proposed to chase after human beings, yet he chose to avoid them! Yu Bing didn’t want to die here!

Cao Jiaren looked quite peaceful. There was no telling what was on her mind.

Someone asked, “Captain, who was the hideous Inferior Man-Fish just now? Why didn’t you attack him?”

Someone was confused. “How can an Inferior Man-Fish be so strong? He’s even stronger than the Half-Merman Heavenly Talents!”

Someone was baffled. “He attacked his own teammates just now. Why?”

Cao Jiaren replied casually, “He isn’t an Inferior Man-Fish, but an Azure Sea Blue Demon. He claimed to be an undercover agent that human beings sent.”

“Huh?”

“An undercover agent?”

“Huh? We can turn a sea demon into an undercover agent for us?”

“Hiss! Is he the one who lured the sea demons to this place?”

“But he saved the Half-Mermaid in the end. Why?”

Someone analyzed the situation. “Whether or not he’s an undercover agent, even though two of the five enemies didn’t have Immortal Seals, the other three were quite strong and we might have been no match for them if caught unprepared.”

Cao Jiaren said casually, “Don’t bother him. If our destination is the same, we’ll run into him again. The noise just now must be the Demon Shriek. We have to get out of here as quickly as possible...”

Cao Jiaren looked at the direction where Han Fei left. She only had one question: how did he know her name?

She only had three days to prepare herself before entering the treasure trove.

If her guess was correct, Han Fei must’ve entered the place from the Ten Thousand Demon Valley, which was a million kilometers away from the Scattered Stars Island. Did someone inform the captains of the human team from a million kilometers away?

That didn’t make sense! Even if he was informed, someone should’ve told her that there were undercover agents for humans in the Ten Thousand Demon Valley...

“An Azure Sea Blue Demon? Interesting...”

...

On the other hand, Han Fei dragged Yu Ji fifty kilometers away before he finally stopped.

Yu Ji looked at Han Fei in shock. “You weren’t affected by the illusion?”

Han Fei looked at her. “You were the one who broke the illusions! Those human beings were tough. Well, really tough.”

Yu Ji frowned and looked at Han Fei in surprise. “Where are the others?”

Han Fei replied expressionlessly, “Yu Ying disappeared into a shadow. I don’t know about the others. When I woke up, I saw that Yu Ying disappeared and you were killed. I broke free when they were all distracted by you and took you away when you reappeared.”

Yu Ji couldn’t have hated illusions more. She also hated the cunningness of human beings. Those human Heavenly Talents were truly terrifying to have broken her Sea God’s Arrival technique.

Han Fei pretended to cough out a mouthful of blood.

Yu Ji asked in shock, “Are you wounded?”

Han Fei grunted and said, “How did you break the illusion? What was that golden giant?”

### **Chapter 787: Hunting**

In fact, back in the place of coral, Han Fei had seen Yu Ji using that move.

However, it was not arrival back then, but attachment.

However, Han Fei saw how powerful the golden figure was this time. If Cao Jiaren hadn’t used the fist marks of the Cao family twice in a row, the human team wouldn’t have had much advancement.

Yu Ji was silent for a while. “It’s a top secret technique.”

Han Fei asked eagerly, “Can you teach me?”

Han Fei was only asking because the technique was indeed powerful. He didn’t know what its side effect was, but it would be a great trump card for him if he got it.

Yu Ji shook her head. “No!”

Han Fei didn’t insist. “I’ve saved you once. I don’t owe you anything now.”

Yu Ji frowned. “Okay, our loss is quite heavy, but it’s fine if Yu Ying is still alive. But I don’t understand how the human beings knew we were coming and prepared an ambush in advance.”

Han Fei shook his head. “I don’t know. One of the human beings was very strong. Perhaps her range of perception is very wide.”

Yu Ji heaved a sigh. "She must've detected us from at least fifty kilometers away to make the arrangements in advance. Even regular peak-level Hidden Fishers might not have such a wide range of perception."

Han Fei asked in surprise, "Hidden Fishers can't sense things fifty kilometers away?"

Yu Ji nodded. "Human beings have techniques to broaden their eyes, but sea demons don't. It's hard for us to train our souls. Under normal circumstances, we train through the 72 demon realms and the bottom level of the Ten Thousand Demon Tower. However, our advantage is our battle technique in mental attacks!"

Han Fei was confused. "Can't we loot those techniques from humans?"

Yu Ji shook her head. "Those techniques are too important. Nobody will carry them during explorations."

Han Fei asked again, "Can't you break the illusion with high spiritual power?"

Yu Ji shook her head. "Not necessarily. Those who set up illusions will only have greater spiritual power. Also, you need to locate the vulnerabilities of an illusion to break it. You have to be very determined, or it won't be easy to break the brilliant illusions."

Han Fei realized that there was still a lot that he needed to learn. However, he wasn't really afraid. He had the Yin-Yang Divine Eyes that could easily nullify regular illusions.

Han Fei suddenly rose. "Okay, let's split up!"

Yu Ji was slightly surprised. "Why?"

"Two people are no different from one. It's even more convenient for us to flee as individuals."

Yu Ji looked at Han Fei thoughtfully. "Okay, but killing the dry tree is still your objective. Don't try to hide and keep a distance from the following operation. Only Lord Yu Hun knows how to get out. Now that he's probably dead, we have to join another team or wait for other people at the dry tree."

Han Fei was briefly stunned. He had forgotten that question! He wasn't informed of the way out when he came in. He couldn't find where he came from. Even if he could, he didn't think that it was an exit.

Han Fei thought for a moment and nodded. "Okay."

After that, Han Fei chose a random direction and dashed out.

A moment later, confirming that Yu Ji didn't follow him, Han Fei grinned. He had finally disassembled his team. Although not everybody was dead, it was still good enough.

Why didn't he kill Yu Ji? Mainly because Han Fei didn't know if Yu Ying witnessed how he and Cao Jiaren observed the battle without joining it.

If she had witnessed it, she would've accused him of betrayal.

However, her accusation wouldn't be as valid now that he had saved Yu Ji.

In any case, he had to kill Yu Ying one way or another.

Searching his memories, Han Fei came to where Yu Ying's shadow appeared and chased after her.

A moment later, Han Fei found that the place was empty. There wasn't anything within forty kilometers.

He didn't spot Yu Ying, but he did find a Hundred-Year Tree Demon.

Han Fei scanned the corner where the Hundred-Year Tree Demon was hiding and didn't find any spiritual fruits, so he wasn't interested in fighting it anymore.

"Where is she? I have to kill her!"

Han Fei unhurriedly took out a peppermint and put it in his mouth. Then, Little Black and Little White appeared out of nowhere.

Han Fei touched Little White's head. "Daughter, there was someone here. Do you smell her? Find her."

...

Yu Ying was in her shadow state. Her face was pale and she was exhausted.

However, she couldn't stay here. She didn't know if the human beings were still around, but she had to tell others that Yu Fei was a traitor, or so many more people would be fooled by him!

A moment earlier, she tried her best to melt her body into the shadow, and the last scene she saw was that Han Fei and Cao Jiaren were standing very close to each other and watching the fierce battle without any intention of fighting.

Then, Yu Ying recalled what happened earlier. Why did human beings set up the ambush? Why did Han Fei choose this way?

Also, even though the Thousand-Year Tree Demon was destroyed by Yu Fei, he was the one who claimed that he smelled something. If he hadn't, Lord Yu Hun wouldn't have searched the seaweeds.

*But why would Yu Fei betray us?*

That was what puzzled Yu Ying the most. Yu Fei was an Azure Sea Blue Demon. How could he win the human beings' trust?

Also, Yu Fei was taken back by Yu Ji, but Yu Ji was clearly fighting too. Or, was it a trick and Yu Ji and Yu Fei were pretending?

At this moment, Yu Ying was quite befuddled, wondering if Yu Ji had betrayed her people too.

Yu Ying couldn't have been more shocked.

It wouldn't be too terrible if Yu Fei were the traitor. Although Yu Fei was well appreciated in the Ten Thousand Demon Valley, it was said that he wouldn't stay there, so he wasn't given a lot of things, not even a Semi-Divine Weapon.

However, it would be horrible if Yu Ji had betrayed them. Yu Ji had learned after Yu Beichen and knew too many secrets about the Ten Thousand Demon Valley.

Suddenly, Yu Ying remembered the robbery of her weapon store.

Six of her weapon stores suffered thefts twice. In the first time, only materials and spiritual spring energy were stolen.

The second time, even the Refining Divine Platforms were stolen. That happened after Yu Fei came! But how did Yu Fei do that? He had an alibi...

Immediately, Yu Ji was panicked and muttered, "Yu Ji has betrayed us too."

Han Fei always thought that he was exposed. He didn't see it coming that Yu Ying's final conclusion would be that Yu Ji was the traitor.

If he had seen it coming, he would've abandoned the pursuit. Why would he care about Yu Ji's betrayal?

At this moment, Han Fei was still chasing her. Little White wasn't slow, and Yu Ying couldn't be far away. As soon as he detected her, it would be impossible for her to flee.

After only half an hour, Han Fei detected a shadow in his senses. He was quite delighted. To prevent himself from alarming the target, he stopped.

Yu Ying was quite good at escaping. What if she ran off again when he approached?

Immediately, Han Fei triggered a thought and activated the Overlord.

He split some of his soul and gave it to the Overlord. Little Black and the Overlord left quietly.

In his bracelet, Shu Shan, who rarely talked, suddenly said, "I've been curious about your secret. It seems that you have a ghost contractual spiritual beast."

Han Fei knew that he couldn't hide Little Black from Shu Shan. He didn't say anything but simply let Little Black swallow the Overlord.

Shu Shan said awkwardly, "However, don't use it in front of an expert. I can vaguely detect it. If I were in my prime state, I would've discovered it sooner."

Han Fei broke a sweat and thought to himself, *That's because Little Black's level isn't high enough, nobody can detect it without careful searching.*

...

Yu Ying was recovering. She had three spiritual fruits in a row. She would be 80% as strong as she used to be a moment later, and her safety would be guaranteed.

She spread out her senses again and was reassured.

"Good thing that nobody is after me. Yu Ji and Yu Fei have to die."

All of a sudden, Yu Ying had a feeling of death. Her heart was filled with a sense of crisis.

"Not good!"

*Crack.*

Yu Ying's neck was bitten apart. Then, a fully-armored brawny man appeared out of nowhere with a rusty rod and smashed Yu Ying's head into pieces.

Even though she had Semi-Divine equipment, she didn't see the attack coming at all.

Now that the ambush worked out, Han Fei's own body started rushing close. He also stepped on Yu Ying's golden battle suit.

It was possible for the Immortal Seal to revive someone, but it couldn't take the Semi-Divine equipment away.

However, if Yu Ying were very close, she could absorb the Semi-Divine equipment into her body. The Overlord simply stood there and waited for Yu Ying.

One second passed.

Two seconds passed.

Yu Ying reappeared in two seconds. She sensed a terrifying crisis again and instantly dispersed into hundreds of shadows.

Han Fei was rather stunned to see the hundreds of shadows. He couldn't tell which one was real from the perspective of the Overlord.

However, Little Black chased after one particular shadow.

Han Fei's eyes glittered. "Hey! I didn't know that Little Black could see through clones! Awesome!"

Yu Ying was stunned. Had she been seen through?

Han Fei dashed close with a Golden Harpoon. He smiled coldly. Everything would be fine after he killed Yu Ying.

Only ten seconds later, a streak of brilliance glowed at the bottom of the sea so terrifyingly that the seaweeds on its way all retreated.

When Yu Ying saw Han Fei, she understood everything.

"Yu Fei, you've been conspiring with human beings!"

"Hiu!"

Seeing that there was no time to dodge, Yu Ying charged at her enemy with white flames burning on her body.

*BAM!*

Yu Ying rolled hundreds of meters on the ground. Fortunately, there were no Hundred-Year Tree Demons around, or they would've stabbed her.

"Pu!"

Yu Ying vomited blood in shock. "You're so strong! Have you been hiding your strength?"

**Chapter 788: Encounter**

After he learned how to split spiritual energy, Han Fei was too strong for Yu Ying, as evidence from how he broke the blockage of the three manipulators with one punch.

Han Fei opened his mouth and bared his fangs. "You know too much."

Little Black had already dashed up, and Yu Ying moved horizontally before she was hit. She had lost her Semi-Divine equipment, which she didn't have the time to recollect a moment earlier.

At this moment, Yu Ying, who had completely turned into a shadow, had flashing eyebrows, and a Shadow Scorpion appeared. Then, the Shadow Scorpion turned into a Half-Mermaid identical to Yu Ying.

Both of them were covered in ultra-quality battle suits and a shadow barrier.

At this moment, the Overlord stood behind Yu Ying, and Han Fei pressed close with his Golden Harpoon as he smiled creepily. "I have only one question for you. If you answer it, you'll live; if you don't, you die."

Yu Ying looked back, and the invisible danger didn't seem to catch up with her again.

Yu Ying took a deep breath. "What is it?"

Han Fei's lips curled. "Chixue Huan asked me to look for a golden fruit. What is the fruit? Don't tell me that you don't know. You only have one chance. If the fruit is so important, a lot of people should know about it, especially the strong and talented ones like you."

Yu Ying's heart trembled in the shadow. "I will die all the same if I tell you the answer!"

Han Fei chuckled. "Since you call me a traitor, then a traitor I'll be. I'm not going back to the Ten Thousand Demon Valley. The case will be the same whether I kill you or not. You can take a chance."

Yu Ying looked at Han Fei in shock. "You're going to take the channel on the human side?"

Han Fei tilted his head. "You have three seconds to consider."

"Three... Two..."

Before Han Fei said one, Yu Ying had replied, "It's a Heritage Dredging Fruit that can improve your Demon Heritage."

"Hiss!"

Han Fei gasped hard. Was there such a thing in this world?

He had a Heritage Stealing Fruit, which had unbelievable effects. It was a shame that he couldn't use it. What about the Heritage Dredging Fruit?

Han Fei narrowed his eyes. "What's its effect?"

Yu Ying shook her head. "It's a legendary fruit. Who knows?"

Han Fei was surprised. "Why do you know about such an important matter? If it can improve your Demon Heritage, what if the person who finds it eats it?"

Yu Ying scoffed. "That won't happen. Lord Blue Feather knows the level of our Demon Heritage perfectly. You may be interested in it, but you don't need it. You have a growing Demon Heritage in the first place. It makes no difference whether you have it or not."

Han Fei remarked in mixed feelings. "That explains a lot."

All of a sudden, Shu Shan said from the bracelet, "It can increase your heritage by a whole level. However, the Heritage Dredging Fruit was already picked in my age. Has it grown back again?"

Han Fei chuckled. "Old man, you know that too?"

Shu Shan said angrily, "Who's an old man? Call me big brother. I'm still young."

Han Fei snorted. "I'm relieved to know that the fruit is a real thing. It must've grown back as countless years have passed since your age. Why else would the people of the Ten Thousand Demon Valley be competing for it?"

Shu Shan asked, "Humph! Are you going to set her free?"

"Set her free?"

Han Fei said to Yu Ying, "Go to the other world!"

All of a sudden, Han Fei activated the Majestic Mystic Spell and initiated the fist marks again. He didn't want Yu Ying to escape as shadows again.

Yu Ying burst into a fury. "Shameless!"

Yu Ying was locked onto by a terrifying power. She instantly roared, "Sea God's Attachment!"

Han Fei laughed. He would've taken it seriously if it were Yu Ji's Sea God Arrival, but he knew that Sea God's Attachment was nothing to be scared of.

*Boom!*

After a punch, Han Fei put a mouthful of Candle Dragon Blood into his mouth without hesitation. The Overlord had already stopped the other clone. Han Fei's fist marks had turned golden. They were less powerful but more enduring. Yu Ying was covered in blood in only ten seconds.

Han Fei slightly raised his eyebrows. "I'm truly curious about the sturdy lives such as yourself. I didn't even notice when you swapped with your Companion Spirit."

"Puchi!"

A great number of Void Chains appeared underneath Yu Ying's feet. After Little Black's bite, the Overlord's smash, and Han Fei's performance of the Art of Invincibility, Yu Ying was penetrated on the spot no matter how sturdy he was.

Suddenly, Han Fei detected that a team of nine sea demons was approaching quickly from forty kilometers away.

"Huh?"

Han Fei frowned. *How could they have come so fast?*

Han Fei stood still. He was still waiting.

One second passed.

Two seconds passed.

When Yu Ying emerged from the void, he launched another Sacrificing Punch. He wasn't panicked as it would take the sea demons at least a minute to arrive.

"Dissemble!"

Han Fei's pupils contracted. She could turn herself into pieces of shadow?

"Freeze!"

A voice came from his bracelet, and Yu Ying's half split shadow was frozen.

*Boom!*

Covering the target with the Sacrificing Punch, Han Fei recalled Little White, Little Black, the Nine-Tailed Mantis Shrimp and the Overlord, ready to go.

"Thank you, old man."

Han Fei was more or less surprised. This old man had been dead for so many years, yet he was able to still freeze a target so easily? That must be a threat. Yes, it had to be a threat.

When Han Fei was about to leave, he found that a glowing stone was drifting away from where Yu Ying perished.

Han Fei quickly grabbed it.

Data popped up in his eyes.

<Name> Bone Transformation Spiritual Lamp

<Introduction> This is a lamp made of the bones of a deep-sea demon. When the lamp shines, creatures under level-50 within its coverage will melt in three seconds, those between level-50 and level-60 will melt in ten seconds, and those between level-60 and 70 will melt in a hundred seconds. It does not work on creatures above level-70.

<Quality> Mid-Quality Divine Weapon

<Maximal Usage> One

<Unreforgeable>

<Unrefined>

Note: All the creatures within the coverage of the lamp will be significantly slowed.

"Hiss!"

Han Fei gasped hard. *What the hell? A mid-quality Divine Weapon?*

Yu Ying was only a peak-level sea demon. Why was she carrying a mid-quality Divine Weapon?

Unfortunately, Han Fei had no time to think and could only flee.

...

Several minutes later, someone found Yu Ying's broken bones, which were still recognizable.

The leader of the team changed his expression. "It's Yu Ying. Something happened to Yu Hun's team."

Someone exclaimed. "How is it possible? That team was very strong. They have Lord Yu Hun, Yu Ji, Yu Ying and even Yu Fei..."

The leader said angrily, "We're only ten seconds later. The water is still rolling. Chase after them!"

Han Fei thought for a moment and decided not to lure the team to Cao Jiaren's side as the team had too many people.

He also studied the Bone Transformation Spiritual Lamp, which was terrifying. He would be killed in three seconds if he were exposed to its light. How terrible was that?

*No, she must've carried the Divine Weapon for something big. Was she meant to kill the Leafless Tree? Definitely. Chixue Huan must've been prepared to kill it.*

Han Fei's eyes flashed. *If Yu Ying carried a Divine Weapon, was it possible that other teams carried Divine Weapons too?*

Sensing that the sea demons moved in a different direction, Han Fei didn't intend to trap them again.

Cao Jiaren clearly had a team of ten men, and this team had the same number of people. Besides, Cao Jiaren's team had just been through a battle, and it was possible that they were still exhausted.

"Forget it. Off you go!"

...

Half a day later, Han Fei punched and shattered a Hundred-Year Tree Demon, retreating the Void Chains.

Han Fei dug out a spiritual fruit that could increase a significant amount of physical strength. He simply swallowed it.

Han Fei pointed to an area of water, "Old man, which sea is this place connected to? And what's that big tree? What will I gain if I kill it or save it?"

The bracelet was silent for a long time. "Would you believe me if I say that I'm not certain?"

Han Fei rolled his eyes. "Of course not! You've lived for such a long time. You didn't come here before?"

Shu Shan said, "You saw me because I came here as reinforcements. I didn't live here, so I'm not sure about the secrets of this place. I do know some of the tales, such as the Heritage Dredging Fruit. but I don't know where this place leads to."

Han Fei asked, "What would your guess be?"

Shu Shan was lost for words. "How could I guess? Well, I think I can make one. First of all, the dry tree can't be a Ten-Thousand-Year Tree Demon. I saw a real Ten-Thousand-Year Tree Demon before, which was as strong as me. Since both parties are fighting for the dry tree, it must be a key to a channel. If I have to guess, the channel may lead to an unknown forest of demonic plants."

"Huh? You saw a Ten-Thousand-Year Tree Demon before? Have you been to the forest of demonic plants?"

Shu Shan replied casually, "In their long history, human beings once fought side by side with the demonic plants, but later they were at war. It was a secret even back in my age. Now that human beings are even weakened, they don't have an opportunity to cooperate with the demonic plants anymore."

Han Fei asked in surprise, "Human beings and demonic plants once cooperated?"

Shu Shan snorted. "Human beings even married sea demons before. Is there a problem that they worked with demonic plants?"

After a long silence, Han Fei asked thoughtfully, "Well, have human beings ever married demonic plants?"

Shu Shan seemed to consider it carefully for a moment, until he said unhurriedly, "How can you sleep with a tree?"

Han Fei giggled. "How can you sleep with a fish?"

Shu Shan fell silent again... "You do have a point."

The two of them stopped talking, and Han Fei pet Little White. "Let's go, daughter. We'll keep hunting for treasures."

...

One day passed.

Han Fei acquired eleven spiritual fruits. He was amazed at this place, which was essentially a garden of spiritual fruits, and wished that he could live here for a year.

Of course, it was impossible for him to do that.

Han Fei ran into two human teams and one sea demon team on his way, but he avoided all of them.

This time, Little White suddenly ran in one direction.

Han Fei chased Little White for a while. Then, his eyes widened, as the destination did look like a garden. He had already detected three spiritual fruits.

Of course, he discovered a few Hundred-Year Tree Demons too. After swimming ten more kilometers, Han Fei stopped as he found that forty people were fighting. There were even Thousand-Year Tree Demons among them.

"So many people?"

Han Fei was delighted after quickly scanning.

“Luo Xiaobai and Le Renkuang?”

However, it wasn't long before Han Fei realized that the human beings were outnumbered.

Human beings had only two teams and seventeen members left, and the sea demons had three teams and 26 members. They had nine more warriors.

Han Fei frowned. “Old man, are you going to take action?”

His bracelet shivered. “I can't. I already used up my strength that I got from the five hundred kilograms of Spirit Awakening Fluid you gave me by freezing the sea demon for you earlier.”

Han Fei rolled his eyes. “You're not helping the disadvantageous human beings?”

Shu Shan scoffed. “You're hiding your strength. You're as good as more than five people in this battle.”

Han Fei: “...”

### **Chapter 789: Han Fei's Intervention**

There was nothing Han Fei could do when Shu Shan refused to take action. If Han Fei were to fight in his current appearance, he might be attacked by both parties.

However, since Luo Xiaobai and Le Renkuang were here, he could completely confess the truth to them.

At this moment, the overwhelming vines had almost turned the place into a seaweed wall.

On the human side, there were also Ye Baiyu and Chu Xun from the Grand Void Academy apart from Luo Xiaobai. It meant that there must be a lot more people that he knew.

Ye Baiyu was so fast that he came and went like a shooting star that glittered at the dark bottom of the sea.

Chu Xun was surrounded by swords.

Han Fei still remembered his Grand Void Sword Technique that could create an ocean of swords. At this moment, he was busy fighting a sea demon.

Two Thousand-Year Tree Demons disappeared underground now and then. When a sea demon was hit to the ground, the stings burst out and riddled them with holes.

Han Fei glanced at Luo Xiaobai, who was protected by Le Renkuang and other armorists and controlling twelve different kinds of sea creatures that resulted in different colors on the chaotic battlefield.

There was pollen that released silver light, seaweeds that looked like water snakes, and flowers that had enormous buds.

There were another five manipulators by Luo Xiaobai's side. The six of them kept half of the sea demons occupied.

Han Fei scratched his head. Although the two parties seemed to be fighting fiercely, nobody had used any ultimate skills yet. Besides, everybody had an Immortal Seal, so eighty people essentially were fighting here.

Han Fei had a toothache. "Old man, the Immortal Seal is really annoying. Can't it be nullified?"

"Yes. When you become a Hidden Fisher, you can launch your attack into the void and kill them, and you won't have to wait for them to come out."

Han Fei said in irritation, "That's not good enough!"

Shu Shan thought for a moment and suddenly said, "I think that some of those people have great bodies. Do you think you can get their bodies back for me after they die?"

Han Fei said gloomily, "Bro, they're still alive. Are you cursing them to die?"

"I've given it some thought. Your puppet won't be useful. Splitting your soul in the battle is no different from suicide. Although you're good at fighting, you're not strong enough to hold back so many people, unless you have trump cards. However, considering your level, you can't kill so many enemies even if you have trump cards. So, some of them will die when they run out of spiritual energy."

Han Fei was alarmed. There were no spirit gatherers among the sea demons. They seemed to be holding themselves back in the battle, but they would go rampant when they were out of energy.

The case was even simpler for human beings, who only had two spirit gatherers. It was impossible that they would run out of spiritual energy first.

Thinking about that, Han Fei had a plan.

Immediately, Han Fei moved ten kilometers ahead. Luo Xiaobai's perception range via the plants used to be twenty kilometers, but that was half a year earlier. It must've reached thirty kilometers at this moment.

However, Luo Xiaobai was devoted to the battle at this moment. Han Fei didn't know how far she could perceive.

Han Fei instantly said telepathically, *Xiaobai, I'm Han Fei.*

...

Luo Xiaobai was absolutely calm at this moment. She didn't expect to run into three teams of demons. Both parties had casualties. As a Divine Manipulator, she could control the Thousand-Year Tree Demons and kill six sea demons at first. But three human beings died too.

The exchange was not worth it in her opinion. At this moment, they had used up half of their spiritual energy, and the spirit gatherers couldn't fill it up in time. It was also the reason why the sea demons weren't attacking with full strength.

They were waiting for human beings to run out of spiritual energy before they launched a full attack.

After all, they had much more fighters than human beings did.

Le Renkuang asked, "Xiaobai, should we go on a rampage? I can absorb three Half-Mermen with the Sky Swallowing Technique. How about we kill some of them first?"

Ye Baiyu marched back and asked Luo Xiaobai, "When are we going to attack? I'm quite exhausted from the running. I have to take care of multiple sides of the battlefield."

Luo Xiaobai replied expressionlessly, "Wait for me a while long. I'm accumulating my strength."

Chu Xun was in trouble too. "I can't hold them much longer. I have enough spiritual energy right now and can kill a couple of them with my ultimate skill."

Someone was lost for words. "You can only kill a couple of Immortal Seals. They'll be back after you kill them, and the result will be the same."

The manipulators were all pale. One of the spirit gatherers, who provided spiritual energy for them, couldn't persist much longer. "Captain, can you take them down after accumulating your strength?"

Luo Xiaobai ordered, "Wait for a while longer. I'll send the two Thousand-Year Tree Demons out to buy us more time."

Exactly at this moment, a voice echoed in Luo Xiaobai's head. *Xiaobai, I'm Han Fei.*

*Hum!*

A large area of vines exploded as Luo Xiaobai lost her cool. They were all collapsing.

On the sea demons' side, someone grinned aloud. "Human beings can't persist much longer! Don't rush into anything! The longer we fight, the more advantage we'll have. We'll take action when the manipulator Heavenly Talent collapses!"

...

*Xiaobai, can you tell where I am? I'm in the appearance of an Inferior Man-Fish about thirty kilometers away from you.*

After the initial excitement, Luo Xiaobai scanned that direction. *I can. How can you prove that you're Han Fei?*

Han Fei replied without hesitation, *The five of us explored the cave on the mountain behind the campus and passed out because of the stench. We also explored Mr. Xiao Zhan's secret, only to be flown by him as kites.*

Luo Xiaobai suddenly blushed, and her body trembled.

Le Renkuang glanced at Luo Xiaobai. "What's wrong? You can't persist anymore? I can go out and fight them for a while."

Luo Xiaobai shook her head. "I'm fine."

Luo Xiaobai saw Han Fei through the spiritual plants and asked, *How did you turn into a sea demon? Where is Xiaochan?*

Han Fei quickly said, *Let's talk about that later. Xia Xiaochan is still alive, and so am I, but my Life Tablet may have broken. I have ten kilograms of strengthened Poison Explosion. I'll give it to you. Release it among the enemies. I'll give you the antidote too. You must persist for twenty seconds and then launch a full attack.*

Han Fei instantly put a bottle of strengthened Poison God and a bottle of antidote on the ground.

Two vines extended from the ground and pulled the bottles down.

After receiving the bottles, Luo Xiaobai spoke to everybody telepathically, *Everybody, attention...*

Han Fei didn't dare to make too much noise.

Yu Hun's perception range after his level was suppressed was twenty kilometers, but someone might be keener than him. Luo Xiaobai, for example, had a perception range of thirty kilometers.

However, their attention wasn't focused on him, and Han Fei had cast Concealment Arrays and Breath Concealing Arrays on him.

It was impossible for him to turn back into a human. He could only show up as an Inferior Man-Fish. He didn't know whether or not he would return to the Ten Thousand Demon Valley. Besides, if he showed up as an Inferior Man-Fish and then went home as Han Fei, he probably would spend the rest of his life in the Scattered Stars Prison. It would be hard for him to explain himself!

It wouldn't be a matter of whether or not he could help, but one about whether or not he could turn into a fish. The Thousand Star City would never allow the Fish Transformation Technique to appear in the world again.

In the bracelet, Shu Shan asked in surprise, "You know someone among them? Let me guess, is it the strongest manipulator girl? Her perception range is greater than thirty kilometers. Not bad!"

Han Fei said gloomily, "Please don't talk just yet and give me a hand later. If I get any Spirit Awakening Fluid from those Half-Mermen, it'll be all yours."

Shu Shan snorted. "Why would they carry Spirit Awakening Fluid on the trip? However, the Longevity Stones work for me. Some of them were peak-level sea demons, weren't they? The three teams probably have three Longevity Stones. If you can get their Longevity Stones, I'll give you a hand."

Han Fei was delighted. "Would you kill all of them?"

"Pu!"

His bracelet shivered. "Are you kidding? I can kill five for you. They'll be gone and their Immortal Seals won't help."

"We have a deal. Please attack first."

"Why?"

"I have other moves. If we hit the same target, wouldn't it be a huge loss?"

"Fine!"

...

Luo Xiaobai instructed, "Everybody, be prepared to unleash all your strength in ten seconds. Remember to cling to my vines and have the antidote."

Le Renkuang asked in surprise, "Xiaobai, wait, why do you have Poison God? I remember that Cao Jiaren took all the Poison God from Cao Qiu. Is Cao Jiaren here?"

"Cut the questions and have the antidote first. I'll explain to you later."

Ten seconds passed in the blink of an eye.

Luo Xiaobai suddenly roared, "Everybody, swallow your spiritual fruit and attack without reserve."

Luo Xiaobai put on a vague smile and pointed at the void. "Deep Blue Vines."

### **Chapter 790: Terrifying Overlord**

After Luo Xiaobai took action, she used up all her spiritual energy, and a tremendous number of blue flowers blossomed within a range of two kilometers.

Ye Baiyu roared, "Use all your secret techniques. Aurora Slash!"

Soundwaves burst out of Chu Xun's mouth, "Fourth of the Six Styles of Grand Void, Sword over the Waterfall."

Le Renkuang unleashed all his ultra-quality spiritual weapons that had sealed spirits. "Torrents of Knives and Swords, Violent War Body, Sky Swallowing Technique..."

Instantly, light was glowing in every direction. Weird blue plants swept across the area, and swords were raining like a storm.

A sword raged in the crowd, and no attack could possibly hit it.

A dark hole froze three enemies, and nobody dared to approach Le Renkuang at all.

Some of the sea demons changed their expression greatly. "Human beings can't wait to attack anymore. Everybody, use the Sea King's Secret Technique..."

White flames were set on the thirty Half-Mermen at the same time. Thirteen golden battle suits and seven water giants appeared in the crowd.

...

After the first round, sixteen sea demons and human beings were killed. They all walked out of the void with their Immortal Seals.

About three seconds later, a Half-Merman quickly changed his expression. "Not good! There's poison! Take antidotes!"

Han Fei frowned. Why did he not know anything about the antidotes? It seemed that the Ten Thousand Demon Valley didn't trust him at all, and he was the only one who didn't have antidotes.

In fact, Han Fei had himself to blame. If he hadn't focused his eyes on the weapon store all the time, he would've found that some grocery stores in the Ten Thousand Demon Valley were selling antidotes.

However, none of those antidotes could resist ten kilograms of Poison God.

Half of the sea demons were greatly weakened except for those who wore golden battle suits.

Han Fei asked quickly, "Old man, when are you going to attack them?"

Shu Shan asked, "Why the rush, young man? Be patient. If you want to finish them off once and for all, you have to intimidate them. You can't show up yet. Send your puppet there and ambush the escapers with your contractual spiritual beast at the edge."

Han Fei gnashed his teeth. "Fine!"

Han Fei summoned the Overlord and put the bracelet on it. With his face slightly twisted in face, a blue soul fire disappeared into the Overlord's eyes.

Little Black opened its mouth, and the Overlord jumped in quickly.

Therefore, at the bottom of the sea that was full of plants, a white Spirit Swallowing Fish was casually swimming to the battlefield.

When Little White was twenty kilometers away from the battlefield, someone noticed it.

A Half-Merman expert was slightly stunned. *A Spirit Swallowing Fish? Why would a Spirit Swallowing Fish be here?*

Someone found the Spirit Swallowing Fish different from usual ones and much more beautiful and elegant. The transparent fins and the long tail made the Spirit Swallowing Fish very sacred looking.

Little White swam very fast. When it was ten kilometers away, many people scanned it crazily as they found it unreasonable to see a Spirit Swallowing Fish here.

However, nobody detected anyone or any creature, so they didn't stop fighting.

When Le Renkuang sensed the fish, his eyes bulged. "Little White?"

That moment, Le Renkuang was almost struck by lightning, and the Sky Swallowing Technique was falling apart.

Luo Xiaobai criticized him telepathically, *Focus. I'll explain to you later.*

"Hoooooo!"

Le Renkuang was so excited as if he had just taken an elixir. Something cracked on the top of his head.

He had advanced to a higher level.

The sea demons were roaring crazily, "It's just the human beings' dying struggle. They can't persist much longer. Their spiritual energy will run out in twenty seconds. Victory and glory will be ours."

Both parties got even more excited.

Five Heavenly Talents who had Semi-Divine equipment were already using Sea King's Attachment. They were as strong as human beings.

However, they were still poisoned, and it was hard for them to persist for twenty seconds.

All of a sudden, a crescent saber appeared in front of a human Heavenly Talent. It shone like the moon and shivered, when it suddenly appeared above a sea demon's head.

"Chila!"

The crescent moon fell and cut the sea demon into pieces.

At the same time, the human beings around him retreated, and an armorist took out a dark red shield in case of the guy's Dying Strike.

*Boom!*

The armorist was knocked hundreds of meters to the bottom of the sea. He vomited blood and grinned. "Hahaha! My Tortoise Shield is truly the best defense."

He was the first sea demon to perish. His Immortal Seal had already been used. However, his Dying Strike still made Luo Xiaobai worried.

Luo Xiaobai suddenly shouted, "Everybody, beat them back..."

"Hoooooo!"

"Get the hell back!"

"I'm going to cut you into pieces!"

The terrifying attacks quickly separated the two parties on the battlefield.

The sea demon expert roared, "Everybody, human beings are trying to buy more time for them. Whoever has Immortal Seals, unleash your greatest strength."

However, a brawny man who was as high as a tower walked out of the void. He wore red armor that was full of complicated arrays. He held a giant shield in his right hand and a blue sword in his left hand. He looked eccentric and creepy.

The sea demons were quite appalled, having no idea where the stranger was from.

The human beings were stunned too, as the guy didn't come in with him. Was he a native of this treasure trove?

However, he did look ferocious. He was like the king of darkness who had just walked out of the abyss.

Someone asked in shock, "Who's he? Have human beings left any reinforcements here?"

Someone's eyes bulged. "He jumped out of the void! Is he a human expert who dug a channel in the void and came in from the outside?"

Le Renkuang looked at the guy who appeared out of nowhere and then at Little White not far away with mixed feelings.

Even Luo Xiaobai was quite shocked too, wondering what Han Fei had been through.

On the sea demons' side, one of their captains roared, "Two Heavenly Talents, use Sea King's Attachment to stop him!"

Immediately, two Heavenly Talents, holding back the Poison God, dashed close and launched a Sea God's Strike. The seawater was torn apart in two terrible sonic explosions. Then, they were covered in golden light and tried to kill the Overlord.

Someone exclaimed, "Go away! That's the sea demons' most powerful attack! You can't clash with it!"

Someone said telepathically, *Bro, come here!*

The Overlord raised his feet and moved forth, and a devastating knife intent burst out of the body of the Half-Merman Heavenly Talent.

*BAM!*

The Half-Merman Heavenly Talent exploded, leaving ragged bones behind.

The other Half-Merman was astounded. What the hell? He didn't even see how the guy attacked!

However, he had already accelerated to the highest speed, and it was impossible for him to retreat anymore. He thought to himself, *I still have the Immortal Seal, I still have a chance.*

The Overlord stepped dozens of meters ahead again and didn't even raise the ice sword in his hand.

However, a devastating sword aura burst out of the Half-Merman Heavenly Talent again.

After a bam, the Heavenly Talent's body exploded too.

"Shoot!"

"Dear Sea God, are my eyes deceiving me?"

"He's so strong! Is he an expert from the Scattered Stars Island?"

"He's so cool! I wish I could be like him!"

Human beings were shocked and excited at the reinforcement from the Scattered Stars Island.

On the sea demons' side, countless people were shocked. Someone roared, "An expert is here! Run for your life!"

However, vines were growing around them.

Besides, they were already very close to the Overlord. How could they escape?

Instantly, devastating knife intent burst towards three Half-Merman Heavenly Talents who wore golden battle suits, and they all exploded.

All the Half-Merman Heavenly Talents were caught in desperation. How were they going to fight? They weren't scared of the human Heavenly Talents at all...

But where was this brutal guy from? He had killed five top Heavenly Talents after he had just shown up!

“Run!”

Luo Xiaobai had already asked the spirit gatherers to provide all spiritual energy to the manipulators since the moment the Overlord appeared.

At this moment, Luo Xiaobai vomited blood and struggled to continue, “Blue Prison.”

An invisible barrier locked down the area.

When the sea demons were about to flee in fright, the Overlord finally waved his sword.

*Shua!*

The seawater was frozen, and sword aura surged more than eight hundred meters. The seven Half-Mermen on the way, including two Heavenly Talents, were frozen into pieces and cracked without anything left.

“Hiss!”

Every sea demon was frightened and devastated. How could they fight the battle? Twelve sea demons had perished, and seven were killed by one attack?

What kind of expert could’ve possibly launched that?

The human beings all swallowed. Nobody could remain calm.

Even Luo Xiaobai subconsciously swallowed in amazement.

Le Renkuang was dumbfounded, wondering if he was dreaming.

“Run! Run! A human expert is here!”

“Break through the barrier and let’s go!”

“Not good! Why are the top five Heavenly Talents still not back to life? Why are their Immortal Seals not working?”

A captain roared loudly, “Wait, that attack isn’t as powerful as we think. Don’t panic. Use Sea God’s Arrival!”

When the sea demons were fleeing in fright, the Overlord grabbed Snowmourne and stabbed it into the ground.

In his eyes, bluish flames were flashing.

“SUPREME YIN YANG WHEEL!”
