

## Got Busted 61

### Chapter 61: Inviting Humiliation

Juliana only took a glance and ignored the maid. She went on playing with her phone with her head down, "The configuration and performance of this phone is good. It's a product of Reyes Technology and its designer is L."

Despite the pink and childish design, the configuration of this phone was the best and it was similar to the one she had in her previous life, tailor-made for the needs of the owner.

Juliana wondered if Wendy had taken the phone that she had been using in her previous life, which held many secrets, including many important documents of Sanchez Group.

Stewart had to see these company secrets if he wanted to take full control of Sanchez Group.

It was not sure if Stewart and Wendy could unlock the phone.

Benson turned his head to look at Juliana and saw that she didn't look up, so he simply grunted.

Although it was only a grunt, Juliana somehow felt that Benson was unhappy and looked up at him in confusion, "What's wrong?"

Benson averted his eyes, "Nothing."

Juliana didn't pay much attention, but took her old phone, replaced the card, and began to play with it.

Benson sat aside and watched Juliana concentrating on her new phone, her head bowed and eyes downcast, the lines of her side face very soft. The sunset cast in from the window, putting a layer of faint light on her body.

Benson felt that the mania that had tormented him for

as if something interesting had happened. He raised

did not shy away,

two came very close and looked at the phone

the surveillance video of

sneaky maid who was just making a phone call and not doing

hack the maid's phone to know who the maid
