

Got Busted 75

Chapter 75: Pathological Change

Zach didn't want to talk to Juliana at all because he was angry at her for being so disruptive tonight.

Old Mr. Leach explained to Juliana, "This is for Benson's blood test. Every time Benson has an attack, there is a value that we use to determine his physical condition and the use of medication..."

This tester had been researched and improved over the past ten years to get the current accurate value.

It was developed for Benson.

Old Mr. Leach explained the values to Juliana.

If the value was between 1-5, it was a mild onset and there was no need to take medicine but only needed to observe.

A value between 5-7 was moderate and 7-9 was severe.

Juliana looked at the blood test degree and asked, "What about if it's over 9?"

Old Mr. Leach's face turned somber and showed sadness, "It means pathological changes or that he's terminally ill or diseased! Possibly..."

Pop.
