

Her Revenge 13

Chapter 13

“Assassination? How is she! Take me to her right away!” said Christian.

Dwayne stood up, supporting him “She got a blue hum, but she’s fine. She just went back. Didn’t she call you!”

Christian was stunned. He couldn’t tell him that his granddaughter had unilaterally declared her severance from the Berry family and had run away from home.

“Assassination, what exactly happened?” said Christian

He couldn’t help but be concerned about such a major incident.

The director recounted the events to him, and at his request, took him to see the bodies of the five assassins. Two of the bodies were severely injured, mangled, and had gunshot wounds, along with the guns collected from the scene.

seeing this made h

him feel dizzy.

He had left the battlefield for decades, and this was the first time he had seen such a gruesome assassination.

“We arrived at the scene after Miss Lea called the police said Dwayne.

He also showed Mr. Berry the video footage collected from around the scene and Lea’s statement.

The video had been edited by her. From the video, only a few men in black were seen entering the villa, and there were some scenes of her fighting

with the assassins.

As for why she could take down five assassins by herself, some of whom were armed, it was because the villa had a defense system. When the assassins broke in, the system activated and released anesthetic gas, significantly reducing the assassins’ combat capabilities,

Additionally, the attack system indiscriminately attacked, causing the assassins to kill each other, which is why they all died.

The testimony and evidence matched perfectly, leaving them no choice but to believe it

“We had professional technicians investigate the identities of the assassins.

They were all foreigners, but there was no information about them online or in the official databases”

Christian was shocked again, his mind racing with many thoughts but no clear answers.

Christian thought. It seemed that these assassins were professionally trained killers. Why would they come to assassinate his granddaughter! Thinking about the place where she was staying, which was Alfred’s territory, he had a rough idea that these people were not targeting her

In that case, thank you, Mr. Brown,” said Christian

“The assassins are dead. We can only close this case,” said Dwayne.

“Yes.” Christian nodded. “Thank you for your hard work.”

As soon as he left the police station, he was anxious. “Find her, find Lea right away. If you can’t find her, you useless people can all go home and feed yourselves!”

Jeffrey turned to the servants beside him, “You take Mr. Berry hack. I’ll go look for her myself.”

Christian felt reassured with Jeffrey handling it and went back home.

At Fraley Hospital, Helen was sent to the super VIP ward right after coming out of the operating room

“Mr. Berry, the young lady’s wounds got infected, causing a high fever. Once the infection is controlled, the fever will gradually subside.”

“But her lower body is severely torn and requires special attention, or it could affect her future fertility..

Hearing this, Matilda’s eyes widened, almost biting her silver teeth to pieces, “Get out-

The doctor shrank back and hurriedly left the room.

She sat by her daughter’s bedside, holding her hand, making a “moo” sound from her throat, her eyes red and tears glistening.

Soon, she suppressed her sobs, her face determined.

She was Matilda, and she wouldn’t cry or be defeated.

What Lea did to her, to her precious daughter, she would destroy her.

buzz!” Her phone vibrated with a new message.

She took out her phone and saw an unmarked number, but she knew who it was [Lea was assassinated. She reported it to the police, and Mr. Berry didn’t get hold of her. They are now adding more people to find her.]

A sharp light flashed in her eyes, and she dialed a number.

“Lea has run a

as run away from home and is still out there. Find her. I want her dead. She must die said Matilda.

Matilda thought, ‘Only her death could ease the pain Helen suffered. Only her death could remove the hatred in her heart. Only then could the shares she transferred return to her hands. Only then could she eliminate future troubles.

After leaving the police station, Lea hailed a taxi on the roadside and went straight to a hospital under the Andrews Group

Charles was already waiting for her by the roadside.

He was wearing a sterile medical research suit and carrying a plastic bag, having rushed over from the laboratory

As soon as she got out of the car, he approached her.

“Miss Berry, why are you here now?” said Charles.

He looked around. The taxi drove away, leaving only her, wearing a black cloak with the hood pulled over her head, deliberately hiding herself.

It was just dawn, and the streets were quiet with few cars and pedestrians.

She didn’t answer his question directly. Do you bring the medicine?”

His eyes lit up, his voice trembling with excitement. “All three kind of medicines are ready. We just finished the experimental tests, and they’re all qualified?”

She was shocked.

she

had given him the drug formulas yesterday morning when she left the hospital.

She knew her drugs were e

Shenghe Medical was already producing these drugs, but they had many flaws, and the side effects were significant, with no solution yet.

The formula she provided was something she had developed in her previous life, a year after joining Mikon’s medical research team, at the age of twenty-two, which was three years later.

She didn’t expect them to produce it in one day and complete the quality check.

Their machinery, technology, and production capacity were no less than the top-ranked Fraley Medical in Vaporleon City.

Thanks to Mr. Alfred. He bought the two strongest pharmaceutical companies in the Asia-Pacific region yesterday morning” said Charles.

Lea was shocked again.

“Miss Berry, this is a blessing for humanity?” said Charles.

Charles trembled with excitement. These drugs can enhance human physical functions, make some incurable diseases treatable, and greatly alleviate the suffering of ordinary patients”

“After these drugs are popularized, they can increase the average human lifespan by half a year to a year!” he said.

Lea nodded

In her previous life, Milton had used these to make the Andrews Group one of the top ten companies in the world.

The effects were even better than what Charles expected.

“Next, the factory can start mass production. How do you plan to introduce these drugs to the market!” said Charles

Charles was a research fanatic, and higher research results were his faith.

He now saw this young girl before him as his faith.

Lea frowned slightly, thinking for a moment

She didn't have her own channels yet, and there were still many issues to resolve, so she couldn't focus on this right now.

“Start production first. Use it where it's needed. I'll discuss the specifics with Mr. Alfred,” said Lea

“Alright!” said Charles

'Til head back now Sering a taxi approaching in the distance. Lea was about to hail it.

“Shall I drive you back” said Charles

ided “Ge

“No need, you're busy.” She added, “Get some rest.”

His eyes were dark, and his eye sockets were swollen, indicating he hadn't slept since getting her formula.

“Alright.” said Charles.

The car pulled over, and she got in.

Charles watched the car drive away before returning to the lab.

The taxi drove to the sixth district of Vaporleon City and

City and stopped in

in front of a clinic
