

## Her Revenge 261

### Chapter 261

“Mrs. Oliver, it was your son who admired Abigail. To attract her attention, he went to find trouble with Lea. Is it wrong for our Abigail to be beautiful and outstanding?” As Leona spoke, she walked to them. She was high and mighty and spoke righteously.

Abigail looked at her happily. These words were most suitable for Leona to say. “I didn’t receive her well for nothing. With this thought in mind, Abigail lowered her head and wiped the corners of her eyes, tacitly agreeing that what Leona said was true.

Leika straightened her back, her expression serious and self-righteous.

She thought. These things were all caused by the boy of the Oliver family. My precious daughter has also suffered.

Through the glass door in the hall, the expressions of the wealthy ladies softened as they discussed. can resist her.

“Miss Erickson is so beautiful Not many boys can

“She’s too outstanding. If I were a man. I would admire her too.”

“Yeah, it’s not her fault.”

The Oliver family can’t teach their children well, yet they blamed others.”

“Mrs. Oliver is a little unreasonable.”

“She forgot what kind of conditions and background our Abigail has. How dare the Oliver family dream of her?”

Although the glass door wall was soundproof, some sounds from inside could still be heard.

Rebecca’s expression changed as she looked at them in shock.

The last time she went to look for Lea, she saw Leona with Abigail She knew they were in cahoots.

She knew her son very well. He is a proud and courageous person. He wouldn’t have approached her if Abigail hadn’t hinted to him. Look at the faces of these people in front of me! With those thoughts in mind, Rebecca raised her voice and defended her son loudly. “Not Rex is-”

“Mrs. Oliver,” Abigail interrupted her. She took a few steps forward and said, “The Erickson family is on good terms with the Oliver family. Rex and I grew up together. We’re as close as siblings.”

Her words, once again, stated that she had not bewitched and used Rex, and everything was his wishful thinking.

She looked at Leika. “If the Erickson family can help, we will do our best.”

The mother and daughter looked at each other and Leika nodded,

Abigail turned around and looked at Rebecca. "Lea caused this matter to happen. The Andrews family also stood up for her. Mrs. Oliver, if you can ask for her forgiveness and she speaks up for you in front of the Andrews family, Mr. Larry and Mr. Neal will be fine."

A dark light surged in her eyes.

She did not expect the Andrews family to interfere because of Lea. Could it be that the Andrews family had already agreed to Milton wooing her? Abigail wondered.

Leika also felt that this was a good idea. "Mrs. Oliver, it's better to k  
look for Lea"

Leona also encouraged, "That's right. What conflict can't be resolved between classmates? Lea is young and soft-hearted. She will forgive Mr. Rcx." In the face of death, Rebecca could no longer care about anything else. This was the only hope. She looked at them a few times and left in a hurry. Leika turned to Leona. Then, she asked, "Abigail, is this your classmate?"

"Yes, Mom," Abigail replied.

"Come in and eat with us," said Leika.

Abigail led Leona and followed Leika to the hall.

Leona followed behind, feeling ecstatic. Mrs. Erickson is the first lady of the Iverton circle. The ladies she invited are the top wealthy women in the Ivenon circle. The fact that she invited me to join them for a meal meant that she valued me. If I can follow Abigail and her mother and make connections, even if anything happens to me in the Moore family in the future, I can still gain a foothold in the Iverton circle. Moreover, as long as I have these connections, the Moore family will value me. Abigail and her mother are my hope and opportunity!

On the other side, Lea returned to the hospital. The press conference had long ended. Chris and Lorrard brought interested clients to visit the

hospital and products.

The hospital's operating qualifications had also been re-issued. It could run normally. Many patients came after hearing the news, and the hospital was overcrowded.

Only some seriously ill patients were left in the hospital. The rest were recommended to be transferred to other hospitals.

Christian looked at the scene in the hospital and took his granddaughter and her career seriously again. He planned to understand the situation well.

Lea took him into the laboratory building, and they visited the pharmaceutical and mechanical research laboratory.

There were many research and development projects, and it was tight on land. However, the laboratory construction was advanced and safe. It was progressing orderly.

Lea developed all the research projects successfully in her previous life. Although they were all handed over to other PhDs for research, she inspired and directed them. She introduced them to Christian with familiarity.

The researchers and staff in the laboratory greeted Christian and Lea one after another. They respected Lea from the bottom of their hearts and naturally respected Christian.

There was also a separate artificial brain research office. Lea had recruited a few new members, and she transferred two more from Berry Group's technology department in Vaporleon City to specialize in developing artificial brains in aviation technology.

When they came out of the laboratory building, it was almost dark. The setting sun had already sunk into the horizon. The sunset was beautiful, and the clouds were treacherous.

Christian stood in front of the building, excited. He could not calm down for a long time.

What he had learned was only the tip of the iceberg. He knew his granddaughter could drive future technology. Her potential was limitless, Therefore, he felt he should do his best to protect her.

Victor received a call from Vaporleon City. He said something had happened in the corporation and needed Christian to decide. Christian greeted his granddaughter and booked a plane ticket to Vaporleon City. He left overnight.

It was not a big deal, but he wanted to go back as soon as possible and devote himself to the corporation's work so that Berry Group could become a support for his granddaughter,

Lea did not ask him to stay. She asked Luke to arrange bodyguards for Christian to accompany him back to Vaporleon City to take care of him.

The director of the hospital and the minister of the medical institution who came from Vaporleon City also went back with them.

Then, Lea got Luke to drive them to the airport personally

Christian left, and Alfred did not return to the hospital. Therefore, Lea went straight to the office to work.

Although she had been tired for a day, she did not relax. She was passionate and efficient when she worked. It was as if she had endless energy.

Chris selected a few cooperative hospitals and drug dealers and handed the information to her. Lea needed to make the final decision.

Lea flipped through the list of names on the document and the information about the relevant companies. According to her memories of her previous life, she finally deleted a few companies that were operating illegally and those that would have accidents in the future. She handed the list back to Chris and asked Chris to deal with the cooperation.

Chris looked at the list Lea had picked out again and could not help but look shocked. She couldn't find information on some companies Lea had ruled out. Based on her experience in the business world and her intuition, she also felt it was inappropriate,

She did not know how Lea could tell.

Perhaps this is the difference between a genius and an elite like me, Chris thought.

As early as in Vaporleon City, Chris firmly believed in Lea's decisions after seeing how outstanding she was

Chris carried the documents. Just as she reached the door, an assistant came to report. "Mrs. Oliver insists on meeting Miss Berry. The security guards can't stop her. If Miss Berry doesn't meet her, I'm afraid she will cause trouble downstairs,"

Chris turned and looked at Lea at the desk.

Lea frowned. "Let her in,"

Chapter 262

Lea was not afraid that Rebecca would make a scene. Now, the public thought that the Oliver family controlled the negative news about the hospital. If she made a scene, everyone would only laugh at her.

However, Lea didn't want to affect the hospital's order and delay the treatment of the patients.

"Alright, Miss Berry!" said the assistant.

After the assistant left, Chris also went to work.

Soon, Rebecca was brought to the office. The assistant closed the door and stood guard outside.

Outside, the sky darkened. The lights in the office were switched on. It was partly bright and partly dark.

Rebecca saw the girl sitting in the chair. Lea leaned against the back of the chair slightly. She was wearing a simple white T-shirt. Her long hair was black and scattered wantonly. Because she was too young and beautiful, she looked obedient and harmless.

When she looked up, it was dark outside the floor-to-ceiling windows behind her. A powerful aura burst out from her body.

Rebecca's heart suddenly sank. She walked forward solemnly and said sincerely, "I'm here to make peace"

"Oh! I don't quite understand what

you mean, Mrs. Oliver." Lea was surprised to see Rebecca here.

"Lea, my son provoked you and tried to hurt you. He has already gotten his punishment. What compensation do you want? Tell me and I satisfy your request. I only want you to tell the Andrews family not to interfere with the Oliver family's things. You're from Vaporleon City. You still don't understand Iverton's situation. In the future, with the Oliver family around, we can also be your backing and help you develop in Iverton." Rebecca's attitude was humble, and her tone was pleading.

Lea looked at her and tapped her fingers on the table. Under her long eyelashes, her eyes moved as she pondered.

"Mrs. Oliver, I'm curious. Who asked you to come here?" Lea asked.

Rebecca was shocked and said. "It's your classmates, Abigail and Leona."

Lea roughly understood what was going on. With Blake's interference, the Oliver family had no choice but to go to the Erickson family for help. The Erickson family did not dare to offend the Oliver family and did not dare to help. Therefore, Abigail asked Rebecca to make things difficult for

"Your son provoked me. I've already gotten it back myself. You said it yourself. I came from Vaporleon City. How can I influence the Andrews family's thoughts? Also, I've never helped a tyrant. Mrs. Oliver, you may leave now! Lea's tone was indifferent and her attitude was firm.

She would never show mercy to the Oliver family

She had asked Blake to interfere because she wanted to fight back. At the same time, she had also signaled to the outside world that the Andrews family had helped her.

The evidence she got by hacking could destroy the Oliver family even without the Andrews family.

"Lea!" Rebecca saw that Lea's attitude was unyielding and did not leave room for negotiation. Her attitude became tough as she threatened Lea, "You're just a university student. Aren't you afraid

your career will be affected if you make such a huge enemy in Iverton? The Andrews family can help you because of Blake's friendship with your grandfather. Favors will run out. The interactions between aristocratic families have always been about matching family backgrounds. Don't ruin your future!"

The corners of Lea's lips curled up into a cold smile. "Mrs. Oliver, you don't have to worry about me like this. Please leave"

Rebecca stared at her, thinking. How can this girl be so arrogant?"

She was helpless. She felt angry and hateful. "You're just a young lady. Why are you so ruthless? What good will it do you if the Oliver family falls? A centipede does not topple over even dead. A rabbit bites when cornered. Do you have to be so ruthless?"

In her eyes, Lea was just a genius from Vaporleon City. She thought Lea was just a little girl who had just shown her edge and, coincidentally, was related to the Andrews family, so she did not treat Lea as a powerful enemy.

Lea's expression immediately turned cold. "Mrs. Oliver, why are you so confident! The Oliver family tried to destroy me. Do I need to save you? Is it because of me that you guys have fallen into this state? You think I should have listened to you and protected you. What kind of logic is that? It looks like the Oliver family is powerful enough to have the right to not distinguish right from wrong and do things based on your preferences"

Rebecca's expression changed drastically as she looked at Lea in disbelief.

Lea said, "Mrs. Oliver, why aren't you leaving yet? Do you want me to report you? You hold an important position in the military industry, don't you? I seriously doubt your style of doing things now."

At that time, her phone rang. It was a call from the housekeeper.

She walked to the side and answered the call with her back facing Lea.

“Mrs. Oliver, bad news. Mr. Larry and Mr. Neal have been arrested...” said the housekeeper.

Rebecca’s face instantly turned pale. She did not have time to talk to Lea and quickly left the office. Her feet were unstable, and she bumped into the door frame when walking out

After Rebecca went out, a live broadcast message popped up on Lea’s computer. She opened it and saw Larry and Neal getting arrested.

Lorenzo had personally brought people to arrest them. Seeing the father and son being escorted out of the villa in handcuffs and taken away in a police car.

the surrounding protesters cheered.

The comments on the Internet were also in an uproar,

Lea thought for a few seconds, turned off the live broadcast, left the office, and went to the information technology floor.

‘Abigail must have an ulterior motive for befriending someone of Leona’s level. Leona is desperate to get close to her and has gone to the Erickson family to ease her situation in the Moore family. In my previous life, Leona was just a tool for Abigail. She did many evil things and harmed many people. Lea recalled the past.

Lea knew Abigail too well. She knew nothing good would happen when Abigail and Leona were together. They will target Shannon. With this thought in mind, Lea was worried and wanted to visit Shannon.

When she left the elevator and reached the corridor, she saw Jessie waiting outside the office. Jessie was wearing a dark autumn coat, which looked expensive and elegant. The light in the corridor was a little dim, making her look even more dignified and gloomy,

The servants and nannies waiting beside her made her look even more solemn.

As expected, the Moore family took the initiative to come to us. Lea frowned and walked over.

When Jessie saw her, her hands that were folded at her waist moved, and her eyes revealed respect. This young lady is not an ordinary genius. She is an influential figure in the medical field and can’t be underestimated.

Lea walked to her side. Jessie was about to greet her when she saw Shannon out of her office. Her attitude immediately became arrogant.

\*Miss Berry, our Shannon is still very young and is growing. She can’t work overtime with such high intensity for long. It will affect her health. The Moore family can help hire the best software engineer if necessary,” Jessie felt it was enough for a hospital.

She revered Lea’s strength and status, but Lea was still a junior in her eyes, so she acted like an elder

She came in the afternoon and waited to see Shannon, but Shannon said she had an important program to write, so she didn’t meet Jessie.

The hospital's security guards were strong and skilled Jessie had no choice but to wait

She heard Shannon had been working overtime for the past few days, especially last night. She barely slept last night and had not eaten dinner yet. 'Even a machine needs to rest, let alone a little girl Jessie thought,

Especially when she saw Shannon's dark eye circles and pale face, she could not help but reprimand Lea.

"Mrs. Moore, you're mistaken. I'm working overtime voluntarily" Shannon came forward and said sternly, I'm a university student. Lea is already taking special care of me by giving me a job. Mrs. Moore, you should know the environment I grew up in. If I didn't get this job, I would have starved to death on the streets, let alone go to university, Shannon's expression was cold, and her tone was cold too.

She had long given up on the hope for her mother and kinship because of Donna. And when she arrived at Iverton, her biological parents suddenly appeared with such an attitude. She had already given up on them.

Shannon knew why Jessie was there. She didn't want to cause trouble for Lea. She deliberately ignored Jessie until now. It was also because Chris secretly helped and asked the security guards to stop Jessie. That was why Jessie could only wait until now.

Unexpectedly, the moment they met. Jessie reprimanded Lea,

Lea had the same experience as Shannon. She had no parents and had been abused by her adoptive mother since she was young. It was difficult for her to get to where she was today.

Especially after experiencing life and death in the past few days, Shannon realized how dangerous and difficult it was

As an elder, Jessie could not understand. She even criticized Lea the moment they met. Sharon's impression of her mother worsened again. Jessie was shocked and looked at her in shock. She stood up for Shannon. She did not expect Shannon to speak to her like this.

It was as if she had been slapped in public. She looked embarrassed.

But she was here to beg Shannon, so she could only endure it.

"Shannon, I... I'm just worried about you. I can't bear to see you work so hard. Jessie's tone was gentle and close, no longer as disdainful and distant as before.

This time, she saw Riverview Hospital's strength and knew that these people had strength. She started to value them from the bottom of her heart. Then, she looked at Lea. "I want to help you for real.

No matter how good Shannon was, she was still a freshman. There were many outstanding software engineers in Iverton, and she could also give Len money to let her hire them.

As long as Lea can treat my husband, the Moore family can also invest a little. Moreover, the Moore family will benefit endlessly because of this relationship, Jessie thought.

Lea frowned and looked at her with her clear eyes.

Meeting her gaze, Jessie's heart skipped a beat. She felt panic as if she had been seen through, and her back was covered in a thin layer of sweat. She couldn't help but think, 'How can this young lady's eyes have such penetrating power at such a young age?'

Shannon's heart skipped a beat too. Alarm bells rang in her heart. She was not like Lea, who could see through Jessie's thoughts, but she also knew Jessie was up to no good.

She turned to look at Lea. From her expression, she understood Jessie's intentions.

"My biological mother is not much different from people like Donna. It's just that her methods are a little more brilliant, Shannon thought

She wouldn't let the Moore family affect Lea or repeat the same mistake.

She asked indifferently, "Mrs. Moore, what do you want to see me about?"

Jessie's heart skipped a beat. Her eyes were filled with shock and anger as she thought, She did not show me respect and was not close to me. It's not

easy to control her?

"Your father... He's seriously ill. He's your biological father no matter what, and he cares about you very much. He misses you very much. Can you visit him?" Jessie asked.

She originally wanted Shannon and Lea to arrange for her husband's treatment directly, but from their attitudes, she knew they would not listen to her.

I can't use force. I have to coax them to my house first. Everything else will be easy after that, Jessie thought.

"Mr. Moore's condition is serious. He should see a doctor. Our hospital has good medical technology and equipment," said Shannon. Previously, Lea had told Jessie that she could treat Quintin's illness. She knew Jessie had come to look for her for this matter.

Hospitals would treat patients, but she would not allow them to intervene and control her like Donna.

"Shannon..." Jessie looked at her in shock again.

Shannon's reaction was even more unyielding than before. It was completely unexpected. It is even harder to control her: Jessie thought

"If there's nothing else, please leave, Mrs. Moore, I still have important things to do" With that, Shannon turned around and left.

hand stop

"Shannon!" Jessie took a step forward anxiously and wanted to pull her, but her hand stopped midair.

Chapter 263

Shannon turned around and looked at the hand in the air. She saw Jessie's fingers gradually curled up and retracted.

Shannon's heart skipped a beat and her eyes turned red. In her eyes, I had grown up in a bottom-level sewer. She looks down on me, even if I'm her child' Humiliation and anger overwhelmed her, tearing her apart.

When Jessie saw Shannon's gaze, she was also shocked. She knew their relationship would no longer develop as the Moore family had expected.

"Shannon..." She called out anxiously.

Shannon immediately composed herself and used indifference to hide her emotions. Fortunately, the lights in the corridor were not bright, so Jessie did not see too much of her expression.

"Get to the point" She looked at Jessie sideways.

"Your father's condition is serious, Jessie said. She looked at Lea again. "Miss Berry, do you think you can arrange for him to be hospitalized as soon as possible for the sake of your relationship with Shannon?"

She was forced to say it. It was the first time in her life, and she looked unhappy.

"There's no problem," Shannon answered first. She didn't give Jessie a chance to make things difficult for Lea. After all, I'm an employee here. If I make arrangements through the internal connections, it will take at least three to four days before he can receive treatment. If you go to the emergency department, you can complete the procedures in an hour or two. The patients can also be sent to the corresponding department and specialist doctors immediately through the outpatient system. Our hospital uses the most advanced artificial intelligence system. It's very accurate, convenient, and efficient. Mrs. Moore, shall I help you arrange the internal procedures?"

Of course, she was exaggerating it. She did not want to use her connections to disrupt the order of the hospital and cause trouble for Lea. Nor would she become their tool

"Why should I do whatever they want me to do! If I agree this time, they will only become worse in the future, Shannon thought.

Jessie's expression suddenly changed. She knew Shannon was deliberately making things difficult for her and trying to cut ties with them.

When she came, she thought that Shannon would take this opportunity to get close to the Moore family and return to the family. Now, it turned out Shannon did not care at all.

'So, she won't take the initiative to help! Jessica secretly gritted her teeth.

Linda's expression also darkened. "Miss Shannon, Mrs. Moore is your mother. How can a daughter treat her mother like this? Besides, Mrs. Moore has been waiting here for a long time to see you. She's never done that before" Linda accused Shannon haughtily,

Jessie and her husband's previous reaction made these maids disregard Shannon, who had been living outside since she was young-

"Mother?" Lea sneered. 'All I saw was an arrogant person begging for treatment"

Lea was already furious at the Moore family's previous actions. Now, they still want to play these little tricks. Do they think we are weak and can be bullied"

"Miss Berry, how can you say that? Miss Shannon's life was given to her by Mrs. Moore," said Linda,

"Oh, she gave birth to Shannon but didn't raise her. Now that she needs Shannon, she comes to Shannon and orders Shannon around. Is this what a mother should do? Lea asked.

That's because there was an accident back then. It's not Mrs. Moore's fault, Linda said plausibly.

"So it's Shannon's fault? Lea was angry. "It's not Mr. and Mrs. Moore's fault. But it's also not Shannon's fault. She was only a newborn

"You." Linda was about to flare up.

"Linda" Jessie called out, stopping her from continuing,

Now that Quintin's life was in Riverview Hospital's hands, Jessie knew they could not offend Lea and Stunnon. If they continued, they would be in the wrong and embarrassed.

"Mrs. Moore, I-Linda wanted to say she felt bad for Jessie, but Jessie gave her an authoritative look, interrupting her. Linda took a step back and didn't say anything else.

Then, Jessie told Shannon, "Shannon, I know you still can't accept you

your father and me. I'm sorry. It's all our fault. If there's a chance in the future, we'll make it up to you"

She then looked at Lea. "As for my husband's hospitalization..."

Lea looked at her and thought she was good at taking temporary setbacks, Lea said, "Shannon has already said it. He will get hospitalized according to the regular procedure. However, I must remind you that our herald

what you sow if it affects the patient's treatment."

Jessie's pupils dilated, and her expression changed again. This girl was threatening me."

Jessie said. "Thank you for your reminder, Miss Berry, I wonder what conditions you want to let Dr. Berry treat my husband. We'll agree to any conditions if Dr. Berry can do it."

Lea's pupils constricted as she looked at Jessie steadily.

Chapter 264

Jessie made such a request when she asked for treatment. Even Shannon was furious.

She thought, 'Dr. Berry has conditions and standards when treating patients. Quintin is already terminally ill, and the possibility of curing him is extremely slim. Jessie proposed such a condition as soon as she came. She is condescending and forcing Lea.

She looked nervously at Lea

"If Mr. Moore meets the requirements of Dr. Berry treating him, our hospital will invite her to do it. You don't have to come if you have objections to our hospital's treatment procedures Lea's gaze was sharp and her tone was cold.

Facing her, Jessie felt a little suffocated. She originally thought that with the Moore family's background and status, they could order them to invite Dr. Berry directly.

Now, she realized she'd been wrong-

"Let Mrs. Moore decide for herself, Lea. I have something to discuss with you," said Shannon.

Lea understood and followed her into the office.

After today's press conference, they had resolved the hospital's crisis. People in the t time to get off work in the afternoon, Chris let everyone get off work and rest

technical department had been working very well. When it was

There was no one in the office now.

With a bang. Shannon pushed the door closed. Her body was trembling and her breathing became heavy.

Lea turned around and looked at her. She thought of herself in her previous life. She felt lowly and inferior because she was schemed against and used by bad people. People looked down upon her. She felt the same way.

"You know what? Today, at Kentside Garden, Blake said he would allow me to be with h Milton in front of everyone," Lea said.

"How could that be? You and Alfred. Shannon's eyes flashed as she looked at Lea in surprise.

"Many people in high positions look down on those at the bottom. This is one of their natures. The only way to win their respect is to surpass them and be in a higher position than them, said Lea

Shannon paused and looked at her in a daze, thinking, Lea is so outstanding. Among her peers, she is like a god. However, there are still people who look down on her. Therefore, it is not strange for the Moore family to look down on me.

She suddenly smiled. "Well, I don't care what they think of me. I only hope that they will leave me alone.

From the looks of it, this wish had failed.

Shannon looked at Lea gratefully. She knew Lea told her about her experience to enlighten her.

“Lea, am I doing the right thing today?” she asked.

She was still a young girl who had just reached adulthood. Donna had been suppressing her since she was young. She had seen too little and experienced even less. It was still difficult for her to deal with these people.

“You’ve done well. The next time they come to you, ask Yannis to assign you men, Lea said as she thought, “When necessary, we should take a tough approach and teach them a lesson”

“Okay, I understand” Shannon raised her head and puffed out her chest confidently.

Lea supported her and treated her as one of their own. Chris, Yannis, and Lorrard also treated her as family.

Luke and the others were protecting the hospital and everyone.

The entire hospital was like her home and her support.

“Be careful of Leona. She will think of ways to stop you from entering the Moore family. Abigail will support her from behind. They have always been unscrupulous,” Lea said.

That was why she had come to talk to Shannon,

Shannon was shocked and felt a chill in her heart.

Leona’s previous actions had already revealed her true intentions. If it weren’t for Leona, Shannon’s relationship with Jessie and Quintin wouldn’t have been so bad.

When she thought of how Donna had treated her in the past, Shannon’s eyes darkened and her lips curled into an evil smile, thinking, “Let them come. The current me is already capable of facing those things

Lea looked at her smile and was relieved. “Rest well for two days before you work.”

Shannon had been working hard and exhausting herself after she joined the hospital’s technical department. Lea hoped that she could have a good

rest.

But Shannon said, “I still have a few procedures I haven’t processed.”

“Blake treated Lea like that. If she wants to be with Alfred, she will face much resistance. I want to help her. One day, Lea will stand on the same level as the Andrews Group and make them respect her, Shannon thought.

Lea looked at the burning light in Shannon’s eyes and how excited she was. She knew what Shannon was thinking.

“Software engineering is an art. If you get too tired, you will become a mechanical working machine. You need to empty and recharge yourself,” Lea

said

Shannon fell silent.

The technical projects Lea had given her were all new, and developing them required a lot of imagination and building abilities. She did need to rest and refresh herself.

So, she said, “Okay, then I won’t work overtime tonight. What about you? What are you going to do?”

“I’m going to visit Joey” said

Lea.

The two of them parted ways. Shannon packed her bag and left the office. She took the elevator to the basement and prepared to look for Yannis.

She often sat in front of the computer and worked overtime. She felt it was time for her to go to the gym.

an expert. She felt it was enough if she could strengthen her

Yannis could train Lake and the others into experts. Shannon did not want to become an e body and have some ability to protect herself.

Soon, the elevator reached the basement floor

After the elevator door opened, she stepped out and saw a black business car driving over

Yannis, who was in the car, also saw Shannon. He drove the car to her and opened the window,

She rarely came to this floor. Usually, she came here to look for Yannis and deliver things to him. Before Archer came, Shannon was the one who took care of his life.

Shannon sized up the people in the car. There were also Archer and his assistant, Ralph, other than Yannis.

Ralph had the same experience as Luke. They picked him up from the underground boxing arena in Vaporleon City. Because of his head injury, after his head recovered, his hair didn’t grow, so he shaved his head. In addition, he was also a boxer and had a bossy and violent aura. His Temperament was a little scary.

However, she knew that he was the same as Luke. He was the hospitals guard and was a loyal and honest person.

“Are you guys going to the arena?” Shannon asked.

In his first month in Iverton, Yannis almost spent all his time in the boxing ring. He had competitions every day. Later on, people came to challenge him every day.

They had already conquered the boxing arena in the west of the city. After investing, they had obtained the management rights.

Not only was he fighting, but he was also developing his business in the boxing world.

“Yes, there’s a game tonight. Aren’t you working overtime tonight?” Yannis looked at her in confusion. She worked as hard as he did. Other than eating and sleeping as necessary, she worked

“I don’t have to work tonight. I’ll go with you,” said sh

Shannon

“You’re going?” He looked at her, startled.

She was wearing a white long-sleeved T-shirt and blue and white jeans. Her long hair was loose, and she had a see-through hang. Her beautiful eyes were sparkling, her red lips were tender, and her face was a little chubby. She looked pretty and obedient.

Although she had followed them to the boxing ring a few times, she was nervous when she saw the bloody scene. Yannis thought she didn’t like to

Chapter 265

“It’s fine. It’s not my

first time to the boxing ring.” Shannon replied. If I’m afraid of such a scene, how can I deal with the predicament I’ll face in the future! I’m also going to train myself.

Yannis looked back at her and said nothing. He didn’t want her to go tonight either, but he didn’t know how to refuse.

Shannon frowned. “What happened?”

“It’s nothing. It’s just a few more powerful challengers came. The competition has been a little intense these days,” Yannis replied. His tone was comforting because he didn’t want her to worry.

She looked at him. All she could see across the seat was the contours of his profile. There were still bruises on the corners of his mouth and the sides of his cheeks. She was used to it, but it looked worse now.

Her expression darkened. “Okay, I’ll go take a look”

“Something must have happened. I have to go. Shannon decided.

The car drove out of the underground garage and headed west of the city. They were heading one of the biggest boxing rings in Iverton, even

Acteris

Quentiner Villas, the Moore family.

The car drove into the garden parking lot. Jessie got out of it. She walked toward the hall with her handbag. Before she entered the door, she heard Quintin’s couch coming from inside. It was heavy and long, making people tremble in fear.

Linda followed behind Jessie as she complained, “How can Miss Shannon side with outsiders Instead of helping us and letting Lea arrange for the hospital to treat Mr. Moore, she’s making things difficult for you. A person raised by a nanny is indeed indiscriminate.”

power and doing special things.

Linda had been a maid in the Moore family for over 20 years. All she had seen was the Moore family using their power She would not believe what Shannon and Lea said.

Jessie also had the same resentment in her heart. However, Shannon was her biological daughter. Because of Riverview Hospital, she would have to acknowledge Shannon in the future. She thought Linda, as a maid, was scolding Shannon by saying so

Her expression darkened as she said unhappily, “She’s my daughter, the lady of the Moore Family. So Linda, do you have a problem with the Moore family?”

Linda’s expression changed and she was shocked. I was too careless,

“Mrs. Moore, I’m sorry I was wrong. When Miss Shannon comes in the future, she will become very outstanding if you guide her personally,” said

Linda

However, she still had no respect for Shannon.

Jessie listened to her husband’s cough and was not in the mood to care about this. She did not care too much either. She went up the steps and reached out to push the door open

With a creak, the door opened from the inside.

Leona stood at the door, wearing a beige dress. She had just returned home and had yet to change her clothes and jewelry.

“Mom, you’re back.” Leona greeted her.

Jessie glanced at her, handed her handbag to the maid, and went to the sofa.

Ever since she found out that Leona was not her biological daughter and had conflicts with her a few times, she had not been so close to Leona

Leona took her handbag and followed behind her. I went to Abigail’s house today. Her mother invited a few ladies to a party, I had a meal with them, and they chatted with me for a while. So, I came back late

Jessie had just reached the sofa when she heard that, so she stopped,

She thought, “Even I’m not qualified to attend Leika’s party. The ladies she mentioned are also people I want to befriend but can not. I did not expect her to be able to sit and eat with them.”

Leona briefly explained what happened at the party. From Leona’s words, Jessie could tell Leika and Abigail liked Leona. Those wealthy ladies seemed to treat her well, too.

“I’m going to the kitchen now to make Dad a cup of honey water.” She set her bag on the counter and started for the kitchen.

“There’s no need. Your father isn’t drinking it now,” said Jessie

Honey water couldn't relieve his coughing. He'd stopped drinking it long ago, but the maids still made it, so Leona helped them.

Startled, she looked worriedly at Jessie.

Jessie continued, "You've been tired all day. Go and rest. Since you're Miss Erickson's friend, don't neglect her. If you need anything, just let me know."

Leona's eyes lit up when she heard that. Even her tone became gentle. As expected, after getting to know Abigail and having something to do with her mother and the others, the Moore family will value and acknowledge me."

"Mom, then Dad, he... She looked to the bedroom and heard her father cough again.

"Are we going to Riverview Hospital?" Leona asked.

"With their reactions, they will go, she thought. She thought they had already gone there when she came home at night.

"You don't have to worry about this. Your father and I will handle it. Go and rest," said Jessie.

"Okay. I'm going to clean up. I'll see Daddy later." Leona prepared to go to the bedroom. She went up the stairs, and her lips curved into a sneer when no one else could see her.

She had heard the conversation between Jessie and Linda outside the door.

She also thought that Shannon would take this opportunity to use her relationship with Lea to curry favor with Jessie and Quintin and immediately arrange for her father to be hospitalized so that she could return to the Moore family as soon as possible

Unexpectedly. Shannon did the opposite. "Look, I didn't need to do anything Leona thought.

Right now, she didn't care whether Quintin lived or died.

It is even better if he dies. This way, I can retain my identity as the eldest daughter of the Moore family. Even if I'm not their biological daughter, as the adopted daughter, I still have the right to inherit his assets. An evil thought suddenly came to her mind. If the couple are gone, my relationship with the Moore family will never change!

At ten

o'clock at night, in a boxing arena west of the city.

The huge venue was filled with people. And there was a riot of sound.

The competition on the stage had already begun. The ringmaster was still the new boxing champion, Yannis. The challenger was Tyrant Dragon

from Crefan.

After a few months of competition, the prize pool had accumulated over 20 million dollars. If one won the championship in the competition, they would receive 12 million dollars. Apart from the high prize money, the value of the boxing champion's reputation and dominance was even higher. This was also why the boxing champion of Crefan traveled thousands of miles to challenge in Iverton.

"Bang" Yannis was punched in the chest and fell backward, hitting the fence to stabilize his body.

He had taken over ten punches in less than three minutes after he went on stage and had almost no room to fight back.

Tyrant Dragon was deliberately humiliating Yannis and embarrassing him. He had deliberately slapped Yannis's face. The corners of Yannis's mouth and eyes were already injured and bleeding.

"Hey!" A roar erupted from the audience, filled with disappointment.

These viewers were all Yannis's crazy fans and worshipped him as a god. But now, he got punched one-sidedly and could not fight back. "Don't tell me this boxing champion's strength is fake.

"Is his previous strength all an act?"

loing the fake boxing, right?"

"He was doing

"He's invincible in front of his countrymen but weak in front of foreigners."

"As expected, he can't compare to the boxing champion from Crefan

"Leave, Don't insult the title of boxing champion"

"You can't say that. Different people have different abilities. Many loyal fans felt sorry for their idol and explained softly. However, complaints and scolding drowned them quickly.

Near the boxing ring, Shannon widened her eyes and looked at the ring. She held her thigh with both hands and held her breath. Her eyes were filled with worry.

This challenger was 7.2 feet tall and as strong as a monster. His eyes shone fiercely, and he had Yannis's blood on his fists. He was abnormally excited, making people feel he was not an ordinary human

"What should Yannis do? Shannon was so nervous that her brain began to lack oxygen, and she could not think properly.

Chapter 266

Behind her, in the seat with the best line of sight.

Jonah squinted up at the stage. He wore a coffee-colored jacket, and the brown fox fur on his shoulders fluttered in the surging air currents, making him look like an agile fox

“Mr. Manning, there’s something wrong with that boxer. The secretary beside him, Lawrence, observed for a while and said. “It should be the strengthened version of the stimulant that has recently appeared on the market. Gene drugs.”

Jonah’s hands were o

on the chair’s armrest. He lightly tapped his slender fingers. When he heard this, his deep eyes lit up.

His business involved boxing. He had not studied the details in depth, but he had encountered boxers using drugs like stimulants and strength agents a few times and was relatively clear about them. However, he did not expect the

ver of drugs to develop to such an extent

That made sense. Riverview Hospital had already developed those highly effective normal medicines, so it was unsurprising that the drugs used by boxers on the stage would appear

In this world, the development of technology is changing daily. Jonah sighed.

Betting on a boxing match was a profitable field.

The boxing world had been on fire these days. A large amount of capital had surged in. He smelled a business opportunity and especially came to take a look tonight.

The popularity of this industry had indeed exceeded his imagination. The business model behind Yannis was also driving this industry. It was very promising.

Yannis, a genius boxer, had established this industry.

Tyrant Dragon had beaten Yannis on the stage until Yannis couldn’t fight back. He had already shown off enough and began to punch heavily He wanted to end this match and seize the prize money and glory. Every punch was aimed at an important part of Yannis’s head.

Yannis turned sideways and dodged the punch. He began to dodge and counterattack.

Two days ago, he had already fought with a few of these people and figured out their characteristics. Their explosive power was strong and could increase their strength explosively in an extremely short time. However, after five minutes, their strength and speed would decrease.

Therefore, in the beginning, Yannis did not dodge and counterattack, Instead, he took it head-on.

Now that Tyrant Dragon wanted to kill him, he began to retaliate.

However, when his fist landed on Tyrant Dragon’s body, it was like hitting an iron wall. Tyrant Dragon only frowned and passed.

Jonah could see Yannis’s intentions, but if this continued, he knew Yannis would be crippled as well.

He took out his phone and called Lea.

At Riverview Hospital, in the ward on the top floor, the patients had already gone to bed. Only the lights were on in the corridor, and it was quiet

After Lea came out from Joey's ward, she saw Lorrard and Trenton walking over from the opposite side. Lorrard was carrying a frozen medical kit.

"Miss Berry" Trenton greeted her.

"Mr. Phoenix, Dr." Wilson Lea also greeted them.

total of five doses. We'll use the first dose tonight."

Trenton continued, "This is the final version of the serum. There are a total

Lea replied with an "okay".

She developed this kind of serum in her previous life. It was for a plaque that erupted in Igea live years later. She gave Trenton directions and asked him to make it

"Okay." She nodded.

The three of them knocked on the door and entered the ward. Only Marcus was guarding the room. Sydney had gone home to pack her son's daily necessities.

"Miss Berry, Mr. Phoenix, Dr. Wilson Marcus greeted the three of them.

His computer was still on the table beside him. He was working on the data.

Lorrard said, "Mr. Alvarez, we'll inject Mr. Joey with medicine?"

"Alright, thank you" Marcus respected these people very much.

Lorrard gave the patient an infusion, and Trenton checked the patient's various data and drew blood for testing.

Lea stood at the side and watched. Her gaze fell on the young man's face. He looked much better. His skin was soft, and his features were well-defined. She felt a kinship probably because she knew they had some blood relation,

After Trenton finished drawing Joey's blood, he was about to leave.

"Dr. Wilson, leave the rest to Mr. Phoenix. You've worked hard for so long. Take three days off and rest," Lea said.

Trenton looked at her in shock

"Miss Berry..." He wanted to say he didn't need to take a leave

Life is so short, and I still live too much research to do. I don't need a vacation at all, Trenton thought

"Mandatory leave for three days, Lea ordered as his boss and project mentor.

These people were obsessed with research, especially a genius like them. Every achievement was a result of their hard work. She hoped that her people did not have to risk their lives and had healthy bodies.

"Okay," Trenton agreed reluctantly.

After all, she was the boss, and his research project required her guidance. She could control the rhythm of his work, so he could only listen to her.

He still took the serum away. After the checkup, the data would automatically be sent to Lorrard. Then, he would take leave after work.

After hanging the drip, Lorrard waited at the side. He needed to wait for the medicine to enter the patient's body and see his reaction.

With a squeak, the door opened. Sydney had returned

She was carrying bags and cooking for her husband. She was wearing beige knitted clothes. Her long hair was tied up at the back of her head and draped down her back. She looked like a gentle middle-aged mother,

"Dr. Phoenix, Lea" She greeted them and handed the lunch box to her husband.

Then, she walked to Lea and said anxiously, "Lea. Can I go to your laboratory building Willow has been there for two days. She hasn't picked up the call. Her phone must have run out of battery. I told the security guards to chase her out. But she didn't come out."

The couple was in the field of scientific research. They knew the laboratory was confidential, especially for places like Riverview Hospital, where research results were numerous and valuable. She had no choice but to seek Lea's approval,

"That girl is also a science fanatic. When she encounters something that interests her, she will plunge into it and not come out for a few days and nights. I'm afraid she'll ruin it and affect you guys," said Sydney.

After staying here for some time, they understood the hospital and were relieved. They did not think that their daughter would be dangerous here.

Lea was stunned. She didn't expect Willow to have been in their laboratory for two days.

However, that made sense. In her previous life, when she met Willow, Willow was already a senior researcher in neurology.

"Mrs. Alvarez, don't worry. I'll take you to her, Lea said.

Seeing Lea agree so easily, Sydney looked at her gratefully.

She wanted to say they could get someone to throw her daughter out, but she had already called her daughter before. She was afraid that her daughter would not come out, so she thought it was better to go and get her daughter herself.

"I think she's at s

some artificial brain research center," said Sydney

"Yeah" Lea nodded.

The two of them left the ward, left the inpatient department, and went to the laboratory building.

Only some offices in the entire laboratory building had lights on. As for the unlit laboratories, it was not that there weren't people doing research inside. But the interiors were sealed. They used insulation building materials. So the lights could not seep out.

They had just reached downstairs when Lea's phone rang. It was an unlisted number, but she had seen it before. She had a photographic memory.

She knew it was from Jonah.

She turned to the security guard at the door. "Take Mrs. Alvarez to the artificial brain research center to see Miss Alvarez"

the phone

"Okay, Miss Berry. With that, the security guard led the way through the door. Lea turned and took a few steps before answering the

"Miss Berry, your young boxing champion is about to be killed Jonah's lazy voice was filled with urgency and oppression.

To force someone like Jonah into such a state, the situation must be critical, Lea thought.

There was also the clamor of the scene on the phone. The audience was scolding Yannis, and the atmosphere was tense and suffocating.

Lea's pupils constricted and shattered light flickered in her eyes.

Chapter 267

In her previous life, Yannis died the moment she met him in this life.

Shannon was the same. She died in the previous summer.

In this life, although their fates had changed, Lea still felt uneasy, especially since she had experienced death once.

Her eyes darkened and she hung up.

"Hey, hey Lear" When Lea suddenly hung up. Jonah was anxious and angry. He shouted into the phone, "You don't care about your boxing champion anymore. He'll be crippled. It'll be worse than death

For a born boxing champion, if he became a cripple, it would indeed be worse than death

Everyone wanted to protect beautiful things and revered geniuses. Jonah didn't want Yannis to be destroyed by these people using such sinister methods. He was about to continue, but the call had already ended. No one would listen even if he did.

"This little girl is so.. Jonah complained. In the end, she is cold-blooded and heartless. She doesn't care about the young boxing champion's life. Or was she so frightened that she didn't know what to do?

Lawrence had never seen him so emotional before. He asked, "Mr. Manning, what should we do now?"

Jonah looked at the observation room on the second floor. Inside was Tyrant Dragon's team. The lights were dim, and something blocked his vision. He could not see the people inside clearly.

However, he could feel the bossy and oppressive gaze

Since Tyrant Dragon dared to come here to participate in the competition and use such a method, he must have absolute strength. The bodyguards we brought are far weaker than Yannis's team. How should I help? Jonah's eyes narrowed as he tried to think of a way.

Lea hung up the phone. After thinking for less than three seconds, she dialed another number. "Mr. Patton, can you do me a favor?"

On the other end of the phone, Lorenzo paused and said, "Go ahead"

Lea told him briefly what had happened.

I understand. I'll go now," said Lorenzo.

"Thanks." Lea hung up the phone and heard Willow and Sydney's voices. She turned around and saw Sydney grabbing Willow's ear as she came out "Hey, why did you go to their laboratory? You can go to our laboratory if you want to do experiments, Sydney said, "Do you know how much impact you'll have on other people's labs by doing this? Willow, this is..."

Riverview Hospital's experiments were all commercial. It was illegal to enter their labs without their official approval and permission.

"Mom, Mr. Young allowed me to go in. Otherwise, how could I have gotten in" Willow explained.

The person she was talking about was Tyrone Young. He was the former technical director of Berry Technology and the company's pioneer. He had always been in charge of the group's flight system development. He was already 65 years old this year. But he still maintained an efficient working ability.

Tyrone was also the one who guided Lea after Matilda asked Lea to develop artificial brains. He was Lea's mentor.

After Christian reorganized his team, he still let Tyrone lead the company's technical team.

When she brought Berry Technology to Iverton, Christian asked Tyrone to follow her and look after her.

"Besides, the entire hospital is Lea's. She definitely won't mind Our laboratory is so boring. It's not as exciting as this laboratory. Let me tell you, their artificial brain technology is too magical and cool! Willow's eyes lit up as she spoke excitedly.

"You... you brat!" Sydney, who had always doted on her children could not say anything harsh. She could only pinch Willow's ears heavily.

“Mom, it hurts, it hurts...” Willow screamed.

Sydney immediately let go.

“Leaf” Willow ran away and rushed forward, hugging Lea’s arm. “Lea, let me enter your laboratory and work with Mr. Young. I’ll work for you like Shannon!” Willow’s eyes were full of light, showing her love for artificial brain technology-

“Willow, artificial brains are something humans created. The advanced computing model is far inferior to the nervous system of humans. In the current understanding and research of humans, the human nervous system is the most advanced. But its research level is too difficult, so we can’t develop and use it yet Once it’s developed, it will change the entire human race,” said Lea.

In her previous life, the Alvarez family suffered a misfortune. Willow was sent to a mental hospital, and her parents were persecuted and lost their lives because their family had made a breakthrough in the neurology of their research. The evil capitalist who only cared about profit harmed their family.

When human neural development was applied, it would surpass the artificial brain.

Sydney looked at Lea in shock. She has such achievements at such a young age and is filled with reverence for scientific research. She had only seen such a mind and wisdom from one person.

It was Jacqueline Sampson, the genius goddess who was the number one in Iverton 20 years ago and was renowned internationally.

In a daze, she saw the shadow of that woman on Lea

It must be because it had been a long time, and because of what happened to Joey, I may be deranged to have such a feeling. But no matter what, Lea is amazing Sydney thought

The moment Sydney saw her daughter hugging her arm.....

“My children can’t compare to her, Sydney thought.

Willow was shocked. “But my parents’ things are very boring. I like to study artificial brains!”

She shook Lea’s arm. “Lea, I’ll work for you. Take me in.”

“Willow!” Sydney pulled her over. “Don’t mess around. With your level, you’ll only cause trouble for Lea

Then, she turned to Lea and said, “Don’t mind her. I will educate her well”

This kind of core research work not only required very professional ability but also had strict requirements for personnel.

“Mrs. Alvarez, if Willow likes it, you can let her be an intern in the laboratory” Lea said.

Sydney looked at Len’s relaxed and serious expression and could not help but be stunned.

“Our laboratory is very short of people and needs fresh blood even more. Willow has her ideas, and this is something she is interested in. She might be able to help us. Lea was very confident in Willow’s ability.

Although she was still young and had not developed her results independently, her parents had nurtured her since she was young, and she had been learning for many years. As long as the opportunity came, her foundation would erupt. Her learning ability would also be fast.

Sydney and Marcus were great researchers, to begin with. Their daughter had inherited the same talent, and they were even better at nurturing their children.

They had already nurtured Jocy

Lea’s core research team also needed her people.

Sydney looked at her. Seeing how serious Lea was, and it didn’t seem like she was only saying it, Sydney hesitated. She looked at her daughter.

“Mom, Lea agreed. I’ll go to the laboratory to find Mr. Young now!” Willow couldn’t wait to return to the laboratory immediately.

“No, you can’t go back now. How many days have you not slept?” Sydney grabbed her daughter’s collar and pulled her.

Willow was disheveled and looked like a little beggar.

“Then I’ll come to work tomorrow!” Willow felt hungry too. Her stomach growled and she wanted to eat her mother’s cooking

Sydney looked at Lea blankly.

“If Mr. and Mrs. Alvarez don’t object, you can come to work tomorrow. The human resources department will sign the employment contract with you.” Lea said.

Sydney looked at her daughter’s excited expression. Willow had been interested in many things since she was young, but Sydney had never seen her so obsessed with one thing. It’s not in keeping with our parenting style to discourage our daughter. We have to pamper our children. We’ll support her as long as it is the right thing to do. Moreover, Lea has already agreed, Sydney thought.

Willow also said happily, “Lea, thank you. We’ll go back and prepare first. We’ll look for you when we’re ready”

“Okay, Lea replied.

“Lea, then it’s a deal, Willow confirmed it with Lea again.

Lea nodded.

2/3

so happy.

Hearing this, Sydney and Lea looked at each other with deep expressions.

“Mom, let’s go and see Jory.” Willow hugged Sydney’s arm and skipped toward the inpatient department

Lea picked up her phone and looked at the time. She planned to return to the office and wait for news from Lorenzo.

Chapter 268

At the underground boxing arena west of town.

The competition had already exceeded half an hour. This was not a formal competition, nor did it adopt a standard competition system. As long as one party was defeated and admitted defeat, it would end.

However, it was rare for a competition to last more than 25 minutes.

On the stage, Yannis was knocked down again and again. He got up again and again. His face was bruised and swollen, and it was covered in blood. Sweat dripped all over the ground.

His opponent was not doing well either. He had used up all his explosive power and was exhausted, but his strength still surpassed Yannis’s

However, Yannis’s performance far exceeded their expectations. It shouldn’t be like this. I should have crippled him in ten minutes and made him unable to get up again. I must end the match. With this thought in mind, Tyrant Dragon used all his strength and rushed forward. He held Yannis’s arm with both hands and aimed his knee at Yannis’s throat.

There sounded a click..

Then, with a bang. Yannis fell heavily to the ground. The audience who were close to him suddenly had the illusion that his neck was broken. “Yannis!” Shannon yelled as she stood up

Jonah had been lying in his seat. At this time, he sat up straight, his eyes dark red.

Lawrence also stood up nervously.

Beside the boxing ring. Archer grabbed his hair with both hands when he stared at Yannis. He felt that he had made the wrong decision. I should not have let him play this match. How should it end now?”

Most of the audience were standing. At this moment, everyone held their breaths and looked at the stage in a daze. Could it be that his neck is broken and he is dead? People sometimes die in this kind of boxing ring

One second!

Two seconds!

Three seconds!

Four seconds!

Five seconds!

Time was ticking away.

Ten seconds!

Everyone felt like they were about to suffocate.

Suddenly, the person lying flat on the stage suddenly coughed out a lump of blood and his chest heaved up and down..

The referee took Tyrant Dragon's hand and was about to raise it to announce his victory when he turned to look at the person on the ground. Tyrant Dragon pushed the referee away and turned around. He looked at Yannis on the ground and his eyes widened in disbelief. His real goal today was actually to take Yannis's life.

Their team had studied Yannis for over a month and concluded that he was the most gifted boxer in the boxing world in recent decades. If such a person stayed, he would be an obstacle for them to reach the top of the boxing world and control this field. They thought they had to get rid of Yannis before he reached the peak of his strength

That attack just now was a sure-kill.

"Why is he still alive? Tyrant Dragon was shocked.

"Yannis!"

"Yannis

"Yannis!"

The entire venue erupted into cheers. There were sobs, joy, prayers, and gratitude.

Previously, they had blamed him for being inferior to his opponent and unable to withstand a single blow. However, they saw his unyielding determination now and knew he would never accept his fate even if he had to risk his life..

"What can be more inspiring and moving than this! they thought.

The shout came from afar and became clear in Yannis's mind. He slowly regained consciousness.

"P" He took a deep breath and spat out another mouthful of blood. He moved his arms and used the strength of his arms to move his upper body in an attempt to get up-

Of course, Yannis would not give Tyrant Dragon a chance to cut his throat.

These people had studied us and came prepared. We had also studied them and were fully prepared. We had even thought that Tyrant Dragon might kill me. This is the path I fought for with my life Yannis thought.

Heb

had already seen it from his father and felt it for himself. Therefore, he would not let himself die before he completed his mission.

He had just raised his shoulder slightly when he fell back with a bang. His entire body seemed to have shattered, and he was in so much pain that he wanted to die. He took a deep breath and stretched his arm again, wanting to get up

However, his every action was so slow. In the eyes of the audience, it was like a slow-motion decomposition.

“Ouch!” Yannis cried out in pain and turned over. He placed his hands on the ground and started to get up. His entire body was trembling and he could not stabilize himself at all.

I want to get up. I won't admit defeat. I still want to fight Yannis kept encouraging himself in his heart.

The audience saw a young boxer who would rather die than admit defeat

“Yannis!” the audience shouted again, choking and crying. Some of the audience had long cried. Those who did not like to cry were also filled with

“Admit defeat You've already proven your will.”

“It's not embarrassing to lose. You're the bravest

“You are the uncrowned king.”

“Admit defeat”

“Admit defeatTM

Yannis only felt that the light before him was too dazzling, making him unable to see the world. His consciousness was also in a state of chaos. The voices of everyone advising him to admit defeat kept ringing in his eardrums.

‘No, I can still hold on. I don't want to admit defeat just yet. If I admit defeat now, how can I continue on this path in the future? How can I reach that position? With those thoughts in mind, Yannis held his knees and slowly stood up, his body trembling nonstop.

Before he could stand up, his body collapsed and he staggered a few times before crashing into the fence

“Yannis!” Archer and Ralph supported him from behind through the fence

Yannis wiped the blood from his mouth. “I... I can hold on for another three minutes...”

These competitions were all his training. Only such intense training could allow him to improve more comprehensively.

“Yannis... Archer looked at him worriedly.

“Three minutes...” Yannis took a deep breath. “Then, I'll listen to you”

Archer slowly let go of him and took a step back. Then, he turned to Ralph beside him and said. “Follow plan B.

In plan B, they would cut off the power and disrupt the scene, preventing the competition from continuing. Then, they could take advantage of the chaos to save Yannis. This would affect the

reputation of the boxing ring. The other party's team would also hold the boxing ring accountable and bring trouble, but staying alive was important.

Yannis grabbed the fence and slammed his body against it. He used the elasticity to take a step forward and stand up straight. Then, he charged forward.

"Shu!" Jonah cursed angrily and turned to Lawrence. Take some people to find the power switch. Cut it off first. His thoughts were the same as Archer and the others.

"Got it" Lawrence left his seat.

Jonah looked up at the stage.

"If you want to die, I'll grant you your wish Tyrant Dragon said in Yostoudian. He took a step forward and raised his fists to show his might.

Yannis slowly curled up his body and stared at him with his deep eyes, completely focused.

"Bang"" Tyrant Dragon threw a punch, fast and fierce.

In just a few seconds, the stage fell into an intense fight again.

The audience held their breaths and did not dare to blink. They were afraid that if they blinked, their boxing champion would be crippled or even die

There was a loud bang. Jonah turned around and saw that the entrance door had already been broken open. A team of armed police rushed in with their weapons

Seeing this, the two boxers about to fight on stage also stopped.

The entire place was silent. Wherever the armed police went, the crowd quickly dodged and made way.

'Did Lea send them to save the situation? But it doesn't look so Jonah frowned.

Sure enough, the police officer led his subordinates straight to the boxing ring.

Take them all away At the leader's order, the subordinates went on stage with their weapons and detained Tyrant Dragon and Vannis"

"What are you doing? Why are you arresting me?" Tyrant Dragon shouted in Yostoudian.

"Sir, what crime have we committed? Where's the arrest warrant Archer stopped them and asked.

Seeing that Yannis was arrested, a large number of fans surrounded him.

Seeing this, the leader could only show an arrest warrant. "We're arresting the criminal according to the law. The officials will announce the exact

Archer felt as if she had been struck by lightning

Take them away too," the leader ordered. A few more police officers came forward and cuffed Archer and Ralph.

Tyrant Dragon's men also rushed over. They were about to ask when the police officer ordered his men to arrest them.

The

person in charge of the boxing arena came out and was detained before he could speak.

Nearly ten people were handcuffed and escorted out in just a few minutes

Chapter 269

The fans were all dumbfounded. Some of them who reacted quickly had already regained their senses

"What's going on!"

"What crime

did the boxing champion commit to be arrested?"

"It's not a crime to fight like this. Why?"

"That's right. Our boxing champion didn't commit any crime. He shouldn't be arrested."

"That's right!"

"Let him go!"

"Let him go!"

senses and were asking questions.

Many crazy fans rushed forward and surrounded the exit, preventing Yannis from being taken away. The agitated fans had already lost their rationality and tried to approach the armed police to protect Yannis

"Bang!" A gunshot rang out, and the entire venue fell silent. The fans were dumbfounded

Jonah rose slowly to his feet as well. He saw the lead police unit with their guns pointed upward. Smoke was still rising from them. They were murderous and imposing.

"Anyone who interferes with official business will be arrested!" said the police officer.

Although the fans wanted to protect their idol, they didn't want to get arrested. Moreover, that gun looked extremely scary. These police officers didn't look like people who would hesitate to shoot. Therefore, the fans retreated one after another.

The police officer put his gun back at his waist, turned around, and said fiercely to Yannis and the others, "A group of thugs who abuse drugs Boxing champion? Huh, take them away!"

The group was escorted and marched out

The crowd came back to their senses one after another, and there was another commotion.

“What does he mean? They said that these boxers used forbidden drugs”

“It’s probably true. Otherwise, there wouldn’t be an arrest warrant and armed police”

“No way. The boxing champion relied on his strength. He can’t take medicine.”

“The police can’t be wrong.”

“So he’s a piece of trash modified from medicine. To think that I worshipped him as a god.”

Im disillusioned. I’ll never watch boxing again.”

Many audiences recorded these scenes on their phones and shared the news on media platforms. Soon, it spread online.

Lawrence pushed his way to Jonah’s side. “Mr. Manning, it seems they’re here for the boxing champion. What should we do now?” His voice was trembling.

Jonah stared at the police force. ‘Are th

they here for Yannis? Is an orphan with no background worth such a big fuss! I have to find Lea immediately. Outside the boxing ring, the empty square was filled with police cars. Three police cars were stopped at the outermost area, in the dimness where the lights could not reach.

Lorenzo pushed open the door and got out of the car. He saw Yannis and the others being escorted out by the armed police. They were all escorted into the car and prepared to leave.

He came late

“Special organization. They are in charge of specific cases. If they suddenly came to arrest these people and manage these things... With that thought in mind, Lorenzo frowned, took out his phone, and called Lea

Lea had just returned to her office when her phone rang. When she saw that it was a call from Lorenzo, she immediately picked it up. “Someone arrested him before I did. Yannis and his men were arrested too,” said Lorenzo.

Lea sat up straight and her pupils constricted.

Lorenzo continued, “It’s a privileged department. They have a lot of power. I can’t take over now.”

After some silence, Lea’s calm voice came on the line. “I understand. Thank you. Can you still get the blood of Tyrant Dragon!”

From the moment she’d received Jonah’s call until now, she’d already used her phone to check on Tyrant Dragon’s team. As expected, they used drugs that stimulated the human body’s potential, modified the human body, stimulated one’s strength, and changed how the human body used its strength.

They were gene drugs that had only appeared recently. The existence of these drugs would attract the attention of the relevant departments

Many gene drugs like this appeared a few years later in her previous life. At that time, gene drugs were already more common than now, and their medicinal effects were stronger. They even threatened the safety of society

However, she did not expect them to appear so quickly. And now, Yannis and the others were arrested.

“Are they investigating drugs, or is it targeted at Yannis? If they were here for Yannis, their real target could only be Lea opened her eyes, and the light in them flickered.

Lorenzo paused. He didn't expect her to be so calm. He had been paying attention to the boxing world because it had a powerful force. He knew Yannis very well Riverview Hospital was their home.

They are here for Riverview Hospital. They have too many research results. While it makes people jealous, it also threatens the entire market: Lorenzo immediately realized it.

He did not believe that Lea was not even this alert. She probably wasn't afraid, he thought, I can get it,” said Lorenzo,

“Thanks. I'll wait for you” After hanging up, Lea looked at her phone. Several calls came in. They were from Jonah, Shannon, and the manager of the boxing ring. She was about to call back. At that time, Chris pushed the door open and entered the office.

“Something's happened in the boxing ring” Chris handed over her tablet

Lea took it and saw a trending news. “New boxing champion Yannis has been arrested on suspicion of taking gene drugs. It was accompanied by photos of nearly ten people being escorted out of the boxing ring.

She clicked on the news. The news was not long and the content was not much. It was an understatement, but many relevant news and videos appeared below. They were all posted by the netizens.

The popularity was not high, and it was still declining

Lea was familiar with the pattern of Internet data. She knew someone was deliberately suppressing this matter to make it a fact without attracting too much attention.

“What should we do? Should we bring Yannis back first? I heard that he's seriously injured,” said Chris.

Lea thought for a moment and shook her head. Tell Mr. Phoenix to bring people to check on Yannis's injuries and bring medicine over.” Seeing her calm expression, Chris knew she probably had clues. She asked, “Do you know who it is

police in this operation is

Lea shook her head. They will show up. Wait until they come knocking on our door. She took a deep breath. “The armed police a special organization with very high authority. It’s difficult to find connections to intervene.”

She was working for Alfred, so she knew the situation in Iverton very well.

“Should we tell Mr. Andrews?” Chris asked.

Lea shook her head again. “Let’s see what’s going on first.”

Chris knew that Lea had just entered Iverton. Although she was a genius, there were many things that she did not have the time to understand.

“Could

it be the Oliver family’s backup plan?” Chris asked.

“No” Lea was very certain. ‘With Blake’s interference, the Erickson family gave up on the Oliver family. Beata’s crimes are unforgivable. The Oliver family no longer has a way out or value. They can’t do this.

“Then who would that be?” Chris was puzzled.

“They’re probably here for our new drugs,” Lea replied.

Chris was shocked. She nodded and felt relieved. Lea has a clue.

She then asked. “So what do I do now?”

Lea had too little information on this matter. She had no clue at all and did not know how to start. But it wasn’t her style to sit back and do nothing.

“Someone will probably come to check on the hospital soon. Maintain order in the hospital and don’t affect the patient’s treatment.” Lea said.

After James’s surgery, they had many patients in serious condition in the hospital. Their lives were on the line. If there were even the slightest mistake in their treatment, these patients would die.

It was so difficult to save a life. Lea did not want any patients to be affected. Moreover, if someone died in the hospital at this time, it would only cause more chaos and things would get out of hand.

Chapter 270

“I’ll handle the rest myself,” said Lea

“Okay” Chris looked at her and nodded firmly.

This young lady still looks immature but has a deep, penetrating gaze. She is firm and steady, like a general who has planned everything perfectly” Chris felt inexplicably relieved and was even more determined to calm this storm.

She was about to get busy, but as soon as she opened the office door, a few people rushed over and almost bumped into her.

Jonah tilted his shoulder and pulled away from her. He charged straight at Lea.

“I know about the boxing ring,” she said before he could speak

When she answered Lorenzo’s call, Jonah’s call came in. The line was busy, but she knew what he wanted to say. Just as she was about to call him back, she did not expect him to come over.

Shocked, Jonah frowned as he scrutinized her. “What’s going on? What do you plan to do?”

Shannon wanted to come forward and tell Lea that Yannis had been seriously injured and needed treatment. However, Jonah’s body and aura blocked her completely..

When she was in the boxing ring, she called Lea. The line was busy. She was anxious to come here and tell Lea. But Shannon didn’t have a car. She couldn’t get a taxi at that place at that time, so she stopped Jonah’s car and asked him to send her to Riverview Hospital

When he heard she was here to look for Lea, he brought her along and sped over

Now that Lea said she already knew, Shannon stood at the back and said nothing else. Her face was pale and filled with worry.

Standing at the back, Lawrence was still panting as he looked at Jonah. This was the first time he had seen Jonah so anxious, and it was because of someone else.

Could he be... Not Lawrence denied his thoughts. There is no one more realistic than Mr. Manning, Miss Berry already has Mr. Andrews, Mr. Manning will never snatch a woman from Mr. Andrews!

“I haven’t figured it out yet. If you want to help, you can help with something.” Lea said.

“Who said I want to help you? I’m busy. Why would someone like me, who earns hundreds of millions of dollars every minute, interfere in such matters?” Jonah asked.

Lea was speechless.

She said. “Gene drugs circulating in the underground boxing arena and the black market. If you have clues, provide them to us. We’ll investigate.” Jonah was stunned. “Why are you investigating this? What does it have to do with this?”

Lea replied, “It helps a line.”

According to information from her past life, there was now an organization in Iverton that developed gene drugs. The group would grow in a few years, and the drugs they produced would have a huge impact on the market

However, eight years later, Milton would subdue and transform it. He would use her research and development results to create the world’s number-one medical group.

‘Since someone wants to use this drug to deal with me, I’ll also start from these places and look for a breakthrough. At the same time, I’ll destroy anyone who can help Milton in the future, Lea

thought.

Originally, she had planned to deal with these matters when the hospital's work progressed a little. Now that she had encountered them, she would deal with them together.

"Oh." Jonah's expression softened. "Give me the computer.

Lea handed over the notebook.

Jonah took it and pulled out a chair beside him. When he was about to sit down, he looked at her disdainfully. "Alfred is so stingy that he can't bear to spend money to support his woman. What kind of office environment is this?"

Everyone was speechless, thinking, 'Not everyone has assets worth billions of dollars, owns a first-rate hotel, and uses the entire luxurious top floor

to work!

Despite his disgust, Jonah still sat down. He logged into her computer to bring up the relevant information for her. Then, he said. "I'll ver samente

Π

to look into it again. I'll update you later."

Lawrence was speechless. 'Didn't he say that he wouldn't help? He changed too quickly.

Chris looked at them and felt much more at ease. With Jonah's strength, he will greatly help as long as he is willing to do it.

"I'll inform Mr. Phoenix first and let him see Yannis, said Chris.

Shannon opened her mouth and wanted to go with her to visit Yannis, but she swallowed the words about to come out because Lea had a lot of information to investigate and needed her. She was more useful here.

So, she asked, "Lea, what do you need me to do?"

Lea looked at her. There was a sudden accident and Shannon's vacation was gone. "Go back to the office first. Help me check for information later."

"Okay." Shannon took a deep breath and headed for her office.

Seeing Jonah looking at Shannon's back, Lea introduced, "Shannon Yancey, the technical director of our hospital, Conrad University's most hardworking computer genius, currently one of Iverton's most powerful hackers'

She believed Shannon would become the best software engineer and the world's top hacker in the future.

"Her?" Jonah said with surprise. "I couldn't tell at all."

On the surface, Shannon looked innocent and beautiful,

1. like a little rabbit.

He turned to look at Lea and paused for a moment. "This face is even more deceptive than Shannon's. If not for the first time we met, I would never believe she was such a person."

“That makes sense. The little monster is with the little monster. Although Jonah said they were little monsters, his expression was filled with respect. He admired such geniuses and respected those who worked hard and bravely.

Seeing Lea staring at him, he added, “It’s to praise you.”

Lea didn’t care about these things. She was only looking at why he paid attention to Shannon. So, it’s because he admires geniuses, she thought. “Lawrence, go out and guard the door. This was not his territory, Jonah did not believe in the safety of this place.

Lawrence went out, closed the door, and guarded the door.

Jonah sat up straight, lowered his voice, and said seriously, “Lea, you should know that those who can develop gene drugs and other medicines are not ordinary people. They also have someone backing them. Those who can support such research must have power. Unlike the Oliver family, they hide in the dark and won’t expose their weaknesses for you to manipulate. Have you considered the consequences of this?”

Lea had already sat back in her chair. She lowered her eyelashes. Under her long eyelashes, the lights in her eyes were slightly overflowing. Her eyes were deep as she said. “Is there anything worse than being defeated and destroyed by the enemy?”

She had been defeated, destroyed, and lost everything she cherished. She had experienced the most painful torture. There was nothing more terrifying than that. She knew if she didn’t want to experience it again, she should fight bravely and couldn’t fail. Even if she died in battle, it was better than that outcome.

Jonah looked up at her in shock. What kind of person is this? What had she experienced to have such an epiphany? But he couldn’t agree more with what she said. And that was why he had been through a bloody storm and went against all adversity to reach his current state.

“Makes sense.

sense. Let’s kill these bastards!” He handed the computer hack. “Here.”

Lea took it and began to look through the information. Then, Lea sent Shannon what she needed to investigate.

Eleven at night in Kentside Garden. Yellow lights were on in the reception room, and the light was just right

Blake paid a lot of attention to his health. Usually, he would sleep at 11 o’clock. But tonight, he entertained an important guest.

The two of them sat opposite each other with chess in front of them. The two people looked lazy and seemed leisurely, but they competed secretly. Their auras were oppressive.

“Theard you helped Lea with the Oliver family’s matter, Mr. Andrews, right?” the man opposite Blake asked. This man was about the same age as Blake. His hair was completely white, and he looked older than Blake. Only his eyes were bright and full of life, emitting a glow of eternal youth.

However, he addressed Blake respectfully. Blake had taught a contemporary philosophy course at Conrad University twenty years ago. This man had taken Blake's class and treated Blake as his teacher. After that, he had always treated Blake respectfully.

Blake raised his eyes and looked at him. His shiny eyes were scrutinizing this man like a soldier waiting to fight.
