

Hidden Billionaire Chapter 1176 - Who's Gonna be the Bait

C1176 Who's Gonna be the Bait

Although no one wanted to see the situation escalate to this point, the truth was as such. No one was allowed to defend themselves.

"That's what I thought too ... Of course it's best if you can figure it out! "

Sunn Hongsheng didn't say it as clearly as he said it, but the underlying meaning was already very clear.

If they truly wanted to avoid these people from attacking the commoners, the best way would be to let their targets reveal their weaknesses.

To put it bluntly, it was equivalent to fishing. If the fish didn't take the bait, how could they be willing to make a move now?

Right now, the best way to find these people was to lure them out. The only condition to lure them out was Wu Tian.

"Alright, I understand. I have no objections."

At that time, Wu Tian wasn't afraid, but he wasn't worried either. With his strength, even if these people attacked him, they might not be able to do any substantial damage to Wu Tian.

Even if Wu Tian couldn't beat them, he could at least escape.

Sunn Hongsheng looked at Wu Tian in admiration. Honestly speaking, he wasn't sure at the beginning, so he didn't know if Wu Tian would agree with him.

However, Wu Tian agreed without hesitation.

"Let's hurry up and discuss how we should act. We have to be careful in this matter!"

Sunn Hongsheng quickly pulled Wu Tian to the combat conference room in preparation for a combat conference.

Because of the many details involved this time, anyone who wanted to participate in this operation had to participate in this conference.

Sunn Hongsheng Luo Huaicheng and Tieh Jun, these people represented the country's energy, while on Wu Tian' side, there were also Su Cancan, Su Wenxin, and others.

This could be considered the gathering of both sides' strongest fighting strength. Only by doing this would they have the confidence to accomplish this task.

"Since everyone is here, I will quickly explain everything."

Sunn Hongsheng cleared his throat and said the question that he and Wu Tian had just discussed.

Su Cancan immediately frowned. Although they said that, no matter how they listened to it, it made them feel uncomfortable.

"On what basis!?" What right do you have to have our people as bait? "

Su Cancan stated her doubts straightforwardly. She didn't have a good impression of these government people, so she didn't hate them either.

However, she felt that his request was a bit of a bully.

Although they felt that these people were here for Wu Tian, it wasn't fair to let Wu Tian take the risk in front of no direct evidence.

And this time, Wu Tian also took the initiative to wipe Tieh Jun's ass. From Su Cancan's point of view, he had already done his best. There was no need for him to risk his own life.

"Su Cancan, thank you for your concern. Actually, this is also my own decision. "

Wu Tian quickly explained. Although someone spoke up for him, he was very pleased. However, Wu Tian felt that in the current situation, there didn't seem to be any better choices.

Both sides immediately started to argue with each other. Sunn Hongsheng didn't dare to say too much. He was afraid that the other side would reject him and they wouldn't have any other choice.

"How about this, all of you stop arguing!"

Tieh Jun's voice suddenly rang at this moment. He did not express his opinion earlier, but now he could no longer sit still.

"They might not be after Wu Tian, but I can be their target!"

Tieh Jun's voice was filled with determination and majesty, giving off a sense of majesty. Even Su Cancan, who was still so carefree, and some undisciplined people, obediently shut their mouths when Tieh Jun spoke.

"Director Tie, how can you do that? You're the commander of this operation!"

Wu Tian immediately objected. Tieh Jun was not young anymore. Asking him to take on such a task would probably have a huge impact on his life.

Moreover, he was only an ordinary person. If he was attacked, his safety would be severely tested.

"You don't need to say anything. It is because I am the commander of this operation that I am in charge of this greatest danger! Even if I die, I think Wu Tian can still take on this mission! "

Tieh Jun waved his hand with a look of 'no dispute'. This resolution seemed to have been insisted upon by him, and there was no way for Wu Tian to refute anything.

Seeing Wu Tian open his mouth to argue, Tieh Jun smiled at him.

"Don't worry, I, Tieh Jun, am not someone to be trifled with. Do you really think that the stars on my shoulders fell from the sky?"

Tieh Jun's joke made everyone laugh, but only Wu Tian frowned.

Su Cancancai and the others also agreed with Tieh Jun's words. After all, the one taking the risk was not one of them, so they didn't mind.

To put it bluntly, everyone was selfish. The truly selfless person would show their greatness at this moment.

"There's nothing much to say, it's only when Wu Tian goes out at this time that he seems abnormal. With such a cautious person like him, if he were to appear outside so brazenly due to the disturbance in S City, he might be suspicious."

Of course, Tieh Jun did not make such a decision without a reason. On the contrary, he made the right decision.

"If it was me, then I wouldn't have to worry about that. It's reasonable for me to be anywhere."

Tieh Jun patted his chest and laughed.

Luo Huaicheng, Sunn Hongsheng and the others all had ugly expressions on their faces. They were all very sad.

However, this matter had already been settled by Tieh Jun, so they couldn't change anything.

The only thing they could do was to try their best to protect Tieh Jun's safety during this operation.

"Then our operation will proceed according to our previous plan. Director Tie will disguise himself to secretly visit the communities where the murders occurred."

Sunn Hongsheng said with a crying face. His expression was extremely ugly.

"If the other party were to take advantage of this time to launch an attack, we would have foiled their plan at the very first moment. However, we cannot catch them all in one fell swoop. We must leave one or two for them to escape!"

As the saying goes, long line fishing for big fish. Then they had to be able to go back and spread the news.

"Our men will be responsible for protecting Director Tie's safety in the dark!"

Luo Huaicheng gave a military salute. This kind of thing was his duty and Tieh Jun was also his boss. Of course, he would spare no effort in this matter.

"Very well, our police do not have such a strong force. All we can do is to follow them and monitor them. Once the other party has taken the bait, then we have to do the rest of our business one after another. We can't even go wrong in a single place. "

Sunn Hongsheng said solemnly to everyone present. This was not something to joke about. If something went wrong, Tieh Jun's life could very well end.

Hidden Billionaire Chapter 1177 - Upper Hook of Small Fish

C1177 Upper Hook of Small Fish

The operation began one evening.

Just as they had planned, Tieh Jun just rode in a very ordinary car and headed towards that community.

In order to conceal himself, he had even put on a hat and a mask. This was more than enough for an average person.

If he didn't ask, no one would be able to tell that he was Tieh Jun.

But for those more professional, such disguises are almost the same as none.

Professionals were able to determine his identity the instant he appeared in the post. In fact, they were able to do so.

Tieh Jun got out of the car. There were only one or two soldiers in casual clothes following him. They stood at the entrance of the community and looked around cautiously.

One of the buildings in the community had already been cordoned off. This was the place that was previously sensitive.

Several policemen were there, taking photographs and carrying out investigations, which had been going on for several days.

Tieh Jun didn't say anything and they didn't go in either. He just observed the surroundings carefully.

At this moment, words came into his ears.

"Director Tie, sixty meters in front of you, there is a small house that is especially hidden. According to our thermal imaging satellite map, there are two people there. We contacted the local neighborhood committee. It's said that the house has been empty for two years. "

The technicians on Wu Tian's side immediately made a judgment on the situation.

Their analysis speed was very fast. Along with the computer, they were able to gather and organize the information within a few minutes.

"I know. In other words, they are the target we're looking for!"

Tieh Jun understood tacitly. Since he was going to be the bait, he had to be more attractive.

Therefore, Tieh Jun started to move in the direction of the target they were talking about, slowly approaching the biochemical reformers.

It would be wrong to say that he was not afraid at all. No matter who it was, it was impossible for them to not be afraid at all.

But at that very instant, Tieh Jun's heart was like a pool of stagnant water because he already put his life under the mission.

The purpose of his life was for the benefit of many, as well as to complete his mission.

Therefore, Tieh Jun would be scared and nervous, but he would not cower.

Courage was the ability to face hardships even in the face of fear. This was true courage.

If he rushed forward without knowing anything, it could only be called reckless.

"Did you find anything out?"

Tieh Jun stood beside the mysterious house and whispered to his two henchmen. Although the sound was not loud, it was sufficient for the biochemical reformers.

The two people in the room immediately pressed their ears against the wall and listened attentively to Tieh Jun's words.

"Not yet. We can't find any trace of them. They seem to have disappeared from the world!"

The two lackeys immediately said. Although they said that, their eyes were focused on the walls of the mysterious room.

If anything happened, the two of them would immediately rush to Tieh Jun's side and use their bodies as his first shield.

"Idiot, how can you find out such a simple matter?!"

Tieh Jun pretended to be angry and scolded. Then, it was the critical moment. He must think of a way to let the two of them know that they have the opportunity to lure them out.

"Quickly go in and check. Also, clean up the surrounding people to avoid being discovered."

After Tieh Jun sent the two of them away, he stood there by himself, took out a cigarette from his pocket and put it in his mouth.

Hearing the footsteps of the two as they walked away, the two biochemical reformers in the room suddenly felt a sense of joy in their hearts.

Their abilities were already far beyond ordinary people, and this time, they were facing only Tieh Jun, so they had the victory in their hands.

Such an opportunity could not be missed. The two of them immediately stood up, retreated a few steps, and fiercely dashed towards the wall.

The two biochemical reformers were just one wall away from Tieh Jun. At such a close distance, they directly crashed into the wall. Just the force of impact, and the bricks and tiles that flew out from the wall were enough to injure Tieh Jun.

The sudden sound of an explosion scared Tieh Jun, but he was already mentally prepared.

It was also at this moment that the opponent did not expect that the bricks did not hit Tieh Jun, but hit a huge steel shield behind him.

The Bio-Transformation was also very surprised. Previously, they did not notice the existence of this thing. The two of them immediately felt like they had been tricked.

However, since they had already come out, they couldn't go back. They could only bite the bullet and work things out to the end.

Out of the two biochemical reformers, one of them had abnormally developed muscles. Furthermore, there was a gigantic bone like object on his head that looked like a hammer.

He slammed his head against the shield in front of him, causing a violent sound to ring out.

The sound was like two cars colliding with each other, and also like a giant sledgehammer striking the clock.

At this time, Tieh Jun had already been pulled to the side, and beside him, was Wu Tian's Security Team.

After such a long period of training, the Security Team had long since prepared to deal with these biochemical transformers.

They were dressed in exoskeleton mechs and had shields in their hands, just like a tank.

That particularly tough guy rammed his head into the shield. Originally, he thought that the shield would shatter and even send the guy behind the shield flying.

But he never would have thought that he would actually kick a metal board. Not only was his opponent not sent flying, but he was also knocked into a bit of a daze.

The people around saw that the situation was bad and rushed over to help their comrades. However, this man didn't seem to be particularly good at fighting.

It was because there didn't seem to be anything particularly abrupt about his body. However, it was precisely because of this that the Security Team users were more cautious and prudent.

It was because Wu Tian had been taught by them many times, the more there was no obvious mark on his body, the more it proved that his ability would become more and more abnormal.

Sure enough, the team members quickly discovered that on this enemy's body, there was a flickering current of electricity. The air also emitted a sound. It was the sound of a powerful current piercing through the air.

Hidden Billionaire Chapter 1178 - Troublesome Fellow

C1178 Troublesome Fellow

Although Wu Tian was not at the scene, he had seen the situation at that time through the monitoring equipment that the Security Team s were waiting for.

"This is bad ..."

Wu Tian immediately sweated in his heart. This enemy was good at using electric currents, yet he had become the archenemy and nemesis of the Security Team Soldiers.

The equipment on the members were all driven by electricity, which was actually the easiest way to drive them.

On one hand, they were able to provide great strength, and on the other hand, they were able to accept their consumption. However, since the enemy had the same amount of power, things were not going well.

This was because the enemy's ability would very likely interfere with the movement of the exoskeleton s on the Security Team Enforcers' bodies.

This set of machinery, when able to operate, was a very powerful aid and protection, just like a perfect set of armor.

But when it lost its motivation, this set of exoskeleton mecha could very well become a huge restraint for Security Team users.

If it stopped completely, the external mecha would be an incomparably narrow prison.

However, fortunately, the Security Team user had already taken this situation into account, and someone immediately grabbed a rod from behind him, before fiercely stabbing it into the ground.

This pole had several threads, which were connected to the exoskeleton Battle Mechas on the bodies of each and every Security Team member.

The enemy's attack immediately began, as a huge electric current struck the Security Team user closest to him.

Originally, the enemy thought that this Security Team user would probably roll on the ground in extreme pain, while the air would be filled with the smell of burnt flesh.

However, to his surprise, none of this happened.

Such a powerful electric current followed the lead behind this member of the team all the way to the ground, then dissipated without a trace.

As if nothing had happened, the other party clearly had not expected such a thing to happen and was immediately stunned.

However, the Security Team users did not miss this opportunity, immediately rushing up, and directly pouncing these two enemies onto the ground.

That tough guy's strength was unfathomable. Several people rushed up to suppress him, but none of them were able to control him. He struggled with all his might to immediately push away the Security Team members.

"It really is difficult to deal with ..."

Wu Tian muttered to himself as he looked at the scene. Although he already knew this would happen, he was still unhappy when it really happened.

The gap between ordinary people and these genetically modified humans was too large. The current level of skill was still unable to completely bridge the gap between them.

He could only say that he tried his best to close the gap, but the external world was not what his body could provide, so it was much smoother and smoother.

These biochemical reformers moved very smoothly. It could be seen that they did not need much training to make good use of their own bodies and their extraordinary strength.

Seeing that this method of attack would not work, the security personnel immediately prepared to change to another method of combat.

The few people in front immediately retreated, and the few Security Team practitioners behind immediately walked over with spraying guns in their hands.

This spray gun had appeared several times before. It could shoot out a metal net with high voltage wires on it. Once it came into contact with the human body, it would emit high voltage electricity.

This was also the most powerful weapon Wu Tian and the others had against these biochemical reformers.

This sort of coordination had been practiced for a long time. Their movements were smooth and fluid, incomparably smooth.

The people in front of them had already spread out. Two metal nets were immediately thrown towards the two biochemical reformers.

However, the enemy was not weak either. The biochemical reformer who controlled the electric current immediately sensed that something was wrong the moment the metal net was released. It was as if he could feel the high voltage electric current that was being carried on it.

As a result, this fellow rushed forward and grabbed the metal net, kicking it to the side.

With his other hand, he grabbed a metal net that was flying towards his companion and pulled it away as well.

It could be said that the high voltage electricity on this metal net had no effect on this biochemical reformer.

He himself could control such an electric current, so in a sense, it was more similar to his own ability.

The Security Team Enforcers were a little flustered at this moment, they suddenly realised that they had encountered an iron plate, all of their methods did not seem to be effective against this enemy in front of them.

Seeing that, Wu Tian knew that it was not a good thing for them to forcibly continue holding on, so he quickly gave them an order from Flower Island's command room.

"Everyone retreat! Hurry up and leave with Boss Tie! "Carry out Plan Two!"

The moment Wu Tian's voice came out, the panicking team members immediately calmed down. They quickly began to move. Some of them held shields as they moved to block the rear. The other group of people carried Director Tie into the car and quickly left the place.

After a short battle, the two biochemical reformers had also gathered the courage to fight.

They didn't think that their opponent would retreat without a word. They clearly hadn't engaged in any intense battle, so they didn't have any place to vent their energy.

The two of them immediately caught up to him. As it was getting late, the sky started to darken.

In this period of time, a murder occurred within the S City. After it became night time, practically no one dared to come out and walk around, and it also happened to make things easier for Wu Tian and the others.

Save them from having to explain why such a battle scene would appear in the future, where no one was on the street, Security Team's car drove away quickly.

Behind them were two people chasing after them with their two legs. The two biochemical reformers weren't slow at all. They were running as fast as a car.

Moreover, it was impossible to tell that they were tired at all. With such intense running, the two of them seemed to be very familiar with each other as if they were breathing.

The hearts of the Security Team Enforcers started to turn heavy. They knew that the people they were facing were not ordinary people, but these people were too strong ...

"Everyone, don't worry, let's carry out the plan according to the plan. Please ensure Director Tie's safety."

Wu Tian's voice appeared in their earphones at the right time. With their leader's concern, the Security Team Practitioners could finally relax a little.

It's true that they rarely suffer very serious injuries, except in the last emergency...

These biochemical reformers were not without their flaws. A flawless person did not exist.

Hidden Billionaire Chapter 1179 - Indiscriminate Bombardment

C1179 Indiscriminate Bombardment

Seeing the situation, although Wu Tian felt that it wasn't good, he still stumbled and continued to act according to their plan.

Originally, according to Wu Tian and the others' plans, they planned to capture at least one of these two Biochemical Man and then let the other one go.

He could attract more attention from the enemies, but they had failed in this matter and had not caught a single one. Furthermore, they had to be chased down the entire way.

However, perhaps this wasn't necessarily a bad thing. Since the other party had caused such a commotion, their companions should already know about it.

If Wu Tian and the others displayed a more unyielding attitude here, they might be able to seduce these people as well.

So, this was Wu Tian and the others' plan number two. The two cars of the Security Team personnel were speeding towards the shore of the Flower Island, where there was a military base.

This place could be said to be brightly lit and had formidable firepower.

The surrounding walls were seven or eight meters high, and were wrapped with barbed wire. They were even connected to a high voltage electric net.

Furthermore, every ten meters or so, there would be a tower with two or three soldiers standing on top. They were eyeing the situation outside the base like tigers stalking their prey.

And inside the base, there were sentries at every five steps and guard posts at every ten steps. Countless soldiers were busy coming and going.

Indeed, they were not some sort of special mission, but a very ordinary army. However, they had also become an indispensable combat force against these biochemical reformers.

Their plan no. 2 was to attract these biochemical reformers to this place.

Although there were a lot of these soldiers, they were just ordinary people. Although they had a lot of firearms, it was not impossible for these biochemical reformers to break through.

The only difference was whether the difficulty was high or low.

After the car entered the base, Tieh Jun was immediately sent inside and the entire base immediately began their war preparations.

Following closely behind the caravan were the two biochemical reformers. Without a second word, these two tough guys were like an ox lying on the ground. They ran around on all fours and rammed into the door of the military base.

They were discovered almost immediately, and an alarm sounded from the towers on both sides of the gate. The machine guns also shot towards them at the same time.

For a time, the sound of gunfire rang out in the night sky. The tongues of flame continuously spat out, as they drew a brilliant line of light in the night sky.

Explosions and gunshots rang out incessantly. It was as if a new year had passed, and the atmosphere was extremely lively.

The Bio-transformation Man looked like he was about to rush to the front door, but he was hit by a machine gun.

But his speed didn't slow down. To him, this level of injury was like being bitten by a mosquito, it didn't have much effect on him.

He did not even care about the machine gun's bullets. His muscles were as hard as metal, and even if he were to shoot, it would only leave a small wound on his body.

The bullet did not pierce through his body, but bounced off somewhere else.

The soldiers could not see this situation clearly in the dark. They just thought it was strange that this man had so many guns in his body, yet he could still run as if nothing had happened.

With a "dong", the biochemical reformer slammed its head against the door of the base.

The ten centimeters thick metal door was smashed open, creating a huge crater.

Due to the huge impact, the biochemical reformer embedded itself into the door, forcibly creating a small hole that could be passed by a person.

"Hahahaha ..."

He laughed arrogantly, beating his chest continuously with his hands, feeling proud of himself like a big orangutan.

Although the soldiers were somewhat surprised, they immediately reacted.

There were many defensive positions set up right in front of the entrance. Countless machine guns were supposed to be at the opposite side of the entrance. After a short pause, even more intense machine guns started firing.

And there were bazookas, grenades, and so on. These explosives were coming at him...

The soldiers in the towers on both sides of the building had long since retreated. After the rounds of saturated firepower, the biochemical reformer as well as the nearby doors were thrown into a sea of fire.

In such a dense barrage of firepower, not to mention the Bio-transformation Man, even a mosquito or an ant would not be able to escape.

"Bring me your most powerful weapon! "Don't ever stop."

Wu Tian quickly gave the order to the commander on the spot. He wasn't this nervous for no reason. These biochemical reformers couldn't be understood by ordinary people.

Most people would definitely not be able to withstand such a powerful attack. However, what if these biochemical reformers specialized in strengthening themselves in these areas? It was very likely that such an attack would not cause much damage to them.

"But, if we really did use a temperature-pressed bomb, then our base might even ..."

The commander at the scene was a little hesitant. He didn't have a deep understanding of the situation, so he doubted Wu Tian's words.

Aren't they overusing themselves?

However, Wu Tian's tone was unquestionable at this moment.

"Enough nonsense, it's too late. This kind of artillery fire might not be able to destroy them. Don't forget that there's another one outside!"

Wu Tian's reminder immediately made the commander react. He also knew that the mission he received this time was to think of a way to eliminate the enemy at all costs.

Of course, the use of temperature-pressure bombs was also within their imagination.

After ending the call, the commander said to the messenger beside him, "Hurry up and inform everyone to take refuge. Prepare yourself. Notify the artillery behind us to fire the warm bullets!"

As the order was given, the soldiers who were trying to block the enemies immediately threw down their weapons and ran away with all they had.

The bustling battlefield suddenly turned silent, not a single sound could be heard.

As the smoke cleared, the commander looked through his binoculars in the direction of the gate.

There was nothing there anymore. The tower and the gate had all been turned to powder. There were even several large pits on the ground.

However, the scene that followed caused him to open his eyes wide in disbelief.

This was because the biochemical figure was still standing there in such an environment. His body was already pitch-black from the smoke, and his skin had long since fallen off, revealing the blood-red muscles underneath. He looked very terrifying.

But even so, he was still standing.

A devilish laughter sounded out from the biochemical reformer's throat, causing people to tremble with fear when they heard it.

Hidden Billionaire Chapter 1180 - He Do Not Have to Put in a Lot of Effort to Do a Small Thing

C1180 He Do Not Have to Put in a Lot of Effort to Do a Small Thing

The baptism of fire. Even a tank, an elephant, or a whale would not be able to withstand it, much less a person.

Yet, this person managed to survive ...

The commander put down his binoculars and mumbled, unable to believe what he was seeing.

"Is he even human ..."

Wu Tian also saw this scene from afar and felt the same regret as this commander.

But soon after, an even more intense explosion occurred at the military base.

It was the pressure grenade they had just mentioned, the weapon of mass destruction that Wu Tianqiang had asked his commander to use.

If they weren't clear about the situation, they would have thought that someone had dropped a nuclear bomb.

The explosion split into two parts. The artillery shell first exploded in the air, scattering out many powdery objects.

Next, the second explosion began. Compared to the previous explosion, it could be said to be tens of times larger.

Explosions simultaneously happened in a space of a few hundred meters. The powder that was scattered in the air was the explosives.

The scene emitted a huge fireball and soared into the sky. The fireball slowly rose with the smoke, forming a mushroom cloud.

A translucent shockwave swept out, directly knocking down all of the surrounding trees.

The other biochemical reformer who was controlling the electric current was also knocked to the ground by the shockwave, but it did not deal much damage to him.

In this explosion, the military base was gone.

This base was built with extremely thick concrete in many places. However, in the midst of such an explosion, it was like bean curd as it was smashed to pieces.

"Did it work?"

Wu Tian looked at the screen and his heart was full of sweat.

If such an explosion still wasn't able to kill the biochemical reformer, Wu Tian would really lose all hope.

One had to know that there were forty-eight others who were just as formidable ...

The only thing more powerful than this bomb was the nuclear bomb and Wu Tian's laser weapon.

However, the two properties were different, so Wu Tian wasn't sure if it would work on the remaining forty-eight people.

They must have all kinds of abilities, so Wu Tian had to have a plan to protect their foundation.

Ten minutes later, the smoke from the explosion started to dissipate, but it did not dissipate completely.

The center of the room was still extremely hot. Even steel would melt, so no one could enter.

Everyone could only stand in the distance and look around.

As the temperature was very high, intense air currents were also generated in the center of the explosion. The smoke was quickly lifted into the air, and the smoke and dust below were slowly swept away.

Wu Tian and the others were also able to see what exactly was happening at the scene of the explosion.

The military base had turned into a huge crater and had been blasted dozens of meters away.

At this moment, the biochemical reformer was lying on the ground. His body was torn apart by the explosion and both his hands and feet were broken.

He himself didn't stand up again like before, but lay on the ground without any movement.

Seeing this, Wu Tian finally felt relieved.

If nothing unexpected happened, he should be completely dead.

The effect of the temperature-explosive wasn't limited to just explosion. And a terrible suffocation.

A violent explosion would consume up all the oxygen in the air within a few hundred meters of the explosion center. As long as it was a creature that needed to breathe, it wouldn't be able to survive for more than ten minutes.

Not to mention, even though these biochemical reformers had very strong bodies, they also consumed a lot of oxygen. Asphyxiation was often the most lethal part for them.

At the same time, Wu Tian and the soldiers at the scene were also shocked, as well as his companion, the one who was controlling the electric currents.

He could also feel his companion's death in the distance, and immediately let out a sorrowful cry. His body wasn't as strong as his companion's, so he had never planned to clash head on with him from the start.

He had been hiding in the woods outside, and now that he saw his comrade dead, he immediately went berserk.

An intense lightning bolt started to emit from his body, continuously striking the surrounding trees of the small forest.

Seeing this scene, Wu Tian was still missing at least one enemy to attack, so he quickly gave the order to the commander on the spot.

The soldiers at the scene didn't even need Wu Tian to lead them. When they felt the movement in the woods, they had already fired their cannons.

The shell pierced the night sky, but before it could hit the ground, it was struck by a bolt of lightning and exploded in the air.

These powerful currents formed a semicircular shield in the air, and the projectiles that came from the air exploded upon contact with these currents.

There was no way for them to pose any real threat to the biochemical reformers inside the protective shield.

"Boss, our attacks are useless now. Whether it's the cannons or bullets, none of them will work unless we push our way to his side ..."

The commander at the scene quickly reported to Wu Tian that this situation was not something that ordinary soldiers like himself could handle.

Wu Tian frowned. He was not stupid and quickly ordered the troops to retreat.

"Take good care of Director Tie and retreat to your base to rest. I'll send someone to take over from now on."

Wu Tian felt that he wouldn't be able to deal with this situation if it were just an ordinary person. He could only do it himself.

After putting down the phone, Wu Tian quickly ran to the side and put on an exoskeleton Battle Mecha. He took a deep breath and walked out of the operations room.

Outside the combat command room, many Security Team members were already waiting.

They immediately stood up when Wu Tian came out.

"It's our turn now."

Wu Tian didn't say much, but being the vanguard was the best way to mobilize the troops.

As he was walking forward, he suddenly realized that someone was holding onto him. He turned around and the person holding his hand was Su Cancan.

"You are the commander here, what should we do if you go on stage? Moreover, he's just a small fry, there's no need for such a large fray like us. "

Su Cancan said blandly. Her gaze was not on Wu Tian, but far away.

"You should know the situation. This guy is not easy to deal with. I'm afraid that Luo Huaicheng and the others will suffer a loss if they go."

Wu Tian was very grateful towards Su Cancan's concern. However, he didn't have any better choices at the moment.

"Alright, leave this matter to me. Such an insignificant person does not enter my eyes. "

Su Cancan pushed Wu Tian back, walked to the side, pushed open the door and jumped out.
