

Hidden Billionaire Chapter 1181 - Emergency Situation

C1181 Emergency Situation

Su Cancan's figure suddenly became taller at this moment.

He didn't know if it was just Wu Tian's imagination, but he felt like this girl wasn't that difficult to get along with anymore.

However, Wu Tian was still a bit worried. After all, the guy controlling the electric current in front of him didn't seem to be easy to deal with.

Most people wouldn't be able to get that close to him. Even the weapons of the army wouldn't be able to do anything to him.

"President Wu, captain she ..." At this time, the Security Team users at the side watched Su Cancan's figure leave with worry.

She immediately jumped down from the plane, not carrying any exoskeleton mechs on her body.

"It's fine, you have to believe her!" At this time, the first thing Wu Tian had to do was to be shocked. He had to be calmer than these people, or else they would be in a mess and the rest of the enemies wouldn't be taken into account.

Su Cancan started to descend from the sky, accompanied by lightning and storms. Her body seemed to be extremely light and agile, like a swallow. Just as she was about to hit the ground, she kicked against a branch, neutralizing the huge impact.

Of course, the tree trunk that she stepped on turned into dust in an instant.

The Biochemical Man seemed to have noticed Su Cancan, and he never thought that there would actually be someone daring enough to challenge him.

Instead of coming over, he stretched out his hand, directing a bolt of lightning towards the area Su Cancan was in.

Lightning would suddenly strike a nearby tree and blow it apart.

If it hit the human body, it might be instantly carbonized and become a fertilizer for nature.

"You have some skill." Su Cancan said coldly, but this could not be considered a high evaluation. Because Su Cancan's movements were extremely light and nimble, she dodged a streak of lightning in two, then quickly rushed towards the Biochemical Man.

As she approached, she casually dispersed the poison mist in her hand.

This was their Wudu Sect's fixed program, and also their biggest characteristic.

Smoke was something that they were most afraid of. If there was no wind and the air was sealed off, there would be no way to deal with it.

No matter how strong the lightning of this Biochemical Man was, it could not stop the circulation of the air.

Coincidentally, there seemed to be some dark clouds appearing in the sky.

Gradually, a few bolts of lightning started to appear from the sky, vaguely forming a resonance with the Biochemical Man on the ground.

Wu Tian looked at the sky and was a bit worried.

"Could it be that this weather is also summoned by this fellow?"

Wu Tian was a bit worried in his heart, but he felt that this was a very possible thing and he couldn't not believe it.

"Quick, bring the plane down!"

Seeing the lightning in the sky getting bigger and bigger and the rolling thunder, Wu Tian started to worry about them. He quickly urged the pilot to land the plane.

However, the situation was not looking good. Other than their plane, there were quite a few other aircraft flying around.

At this moment, a strong gust of wind blew past, blowing the plane until it became crooked.

At this moment, everyone inside the plane started to panic. If they were to fall down from this place, some of them would fall down while the rest would die.

In a moment of desperation, Wu Tian could only place his hopes on Su Cancan. He quickly answered Su Cancan's call and asked for her help.

"Su Cancan, hurry up and think of a way to defeat that bastard. The lightning in the sky seems to have something to do with him. Our plane is out of control!"

Wu Tian's request quickly reached Su Cancan's ears. She stood on the ground and raised her head to look at the sky. As expected, the plane was floating like a leaf, looking extremely dangerous.

"What does it have to do with me? It's better if you die." Su Cancan said coldly, but her movements became even faster.

Su Cancan could already see the tree tops shaking a little. If nothing went wrong, there would be a strong wind soon. By then, Su Cancan's own poisonous fog would have no effect.

The Biochemical Man was surprised at this moment, because it realized that its attacks were useless against Su Cancan. Although Lightning's attacks were powerful, she had a major flaw, which was that she could not accurately control them.

He could only command the lightning to strike an area, which gave Su Cancan an opportunity to strike.

She jumped up and down in the gaps between the electric currents and quickly broke through to the Biochemical Man's side.

"Damn it!" The Biochemical Man found out Su Cancan's figure, but he realised that the lady did not seem to be in a hurry to attack, but was instead scattering black fog all around him.

Although he did not know if this mist was harmful to him, the Biochemical Man still used its own lightning to try and explode towards the mist.

However, the result was like a stone falling into the ocean, with no effect whatsoever.

"Die!" Seeing that there was nothing she could do, Su Cancan shouted and pulled out her dagger. She dashed out of the black fog and aimed for the man's neck.

Although the Biochemical Man's reaction speed was not that fast and he did not even raise his hand, he was not afraid at all. Just as Su Cancan's weapon was about to touch his body, a dense mass of Lightning King began to move around his body.

The strong electric current was faster than anyone, it started to spread out from the Biochemical Man's body.

Su Cancan had nowhere to run. She was hit by the lightning directly.

With a crisp explosion, Su Cancan was sent flying.

Seeing that he had succeeded, the Biochemical Man laughed arrogantly. He immediately prepared to continue his attack, but did not expect that Su Cancan had already crawled up from the ground and jumped onto a nearby tree.

Su Cancan was like a nimble kitten, dodging back and forth with the Biochemical Man.

On the other hand, the Biochemical Man was not anxious. He realized that Su Cancan had no way of getting close to his body, so he was not as scared as before.

However, Su Cancan didn't have that much time. There were still a few planes in the sky waiting for her to save them.

As she thought about it, she saw that the black fog was getting thicker and thicker, and the Biochemical Man was starting to slow down. Su Cancan knew that her chance had finally come.

She suddenly jumped up from the tree and flew to the top of the Biochemical Man's head. She retrieved an arrow from her body and blew on it in the black thick fog.

This was a pure wooden product, and the lightning had no effect on it at all. The Biochemical Man did not even feel that it had directly hit its body.

Hidden Billionaire Chapter 1182 - Angry Violent Woman

C1182 Angry Violent Woman

When Su Cancan saw that her attack had succeeded, she was overjoyed. She quickly prepared the second arrow, and before she could finish preparing the second, the Biochemical Man had already fallen to the ground.

The upper part of the arrow was obviously poisonous, and it was extremely toxic. It wouldn't even be difficult to kill an elephant with this poison.

As expected, the Biochemical Man fell to the ground, its body twitching non-stop.

"I thought he was that powerful, but it seems he isn't that powerful." Su Cancan coldly glared at the Biochemical Man and kept her weapon, preparing to return victoriously. At the same time, she looked at Wu Tian's face that was filled with shock and admiration.

As the Biochemical Man fell to the ground, the extreme weather in the sky started to slow down. Only then did Wu Tian heave a sigh of relief. He finally felt like he had survived.

However, just before Wu Tian was happy for long, the plane started to shake violently again. A lightning bolt as thick as a thigh struck the plane they were on.

The electronic instruments inside the cabin immediately began to call the police, a constant beeping sound seemed to be telling them that they really had no way to escape this calamity.

"What's going on ..."

Wu Tian quickly asked Su Cancan. He already didn't understand the situation.

"What's the situation? I have settled it! " Su Cancan said disapprovingly, probably thinking that Wu Tian was messing with her. However, another bolt of lightning struck their plane, and the sound of the sirens became even louder.

Su Cancan, who was on the ground, was also shocked by the lightning, because she saw the lightning strike Wu Tian's plane with her own eyes.

"Hurry up and save us. Hurry and see if that person is still alive!"

Wu Tian could only yell like this in desperation, but he also reminded Su Cancan to turn around quickly.

Fortunately, this reminder came in time. Su Cancan turned around and used her hands to protect her head. Because she saw that Biochemical Man, at that moment, was actually slowly floating up, from the center of his body to the outside, continuously spreading lightning.

Su Cancan couldn't dodge in time, or perhaps it could be said that she had nowhere else to dodge to. Her surroundings were struck by lightning, and explosions could be heard incessantly.

The red flame in the middle glowed with lightning, causing people to be unable to open their eyes. The Biochemical Man was revived once again, but its clothes had been completely torn apart.

This patch of forest had been turned into nothingness by the lightning. Many trees were directly struck by the lightning and turned into charcoal. There were even some trees that were already on fire. The current scene in this part of the forest was like hell.

"You want to kill me? It's not that easy. "

The Biochemical Man stuttered using the China language that he had just learned, but it didn't reduce the arrogance and arrogance in his words in the slightest.

Su Cancan struggled on the ground. She wanted to stand up, but it became very difficult.

Her body had become tattered from the destruction just now. Lightning had struck every corner of her body, piercing through it like countless needles. The pain could no longer describe what Su Cancan felt.

"Give in, repent, and prove to God that all your actions are futile, and that I, on behalf of God, will destroy you completely!"

The Biochemical Man began to become unconventional all of a sudden. His two hands were like electrodes as they continuously radiated electricity outwards. Without the protection of the trees, the small forest started to get windy.

The fog that Su Cancan had set up earlier was dispersed by the wind, and the situation was reversed in an instant.

"How is your situation?!" Wu Tian couldn't see Su Cancan's situation from here, the equipment inside the plane was destroyed by the lightning.

However, the voice of the Biochemical Man came out from his earphones. This made Wu Tian very nervous as he was afraid that Su Cancan would encounter an accident because of this.

"Hey, Su Cancan, wake up! Stand up! You can beat him!"

"Don't forget, you are the captain of the Security Team, your teammates are all looking at you from the sky, their lives need you to be saved! Could it be that this is how you are going to set an example?! "

"And your master, she's still waiting at Flower Island for you to return!"

Su Cancan heard Wu Tian's speech, one sentence at a time. Normally, Su Cancan would have gone crazy by now. She would have torn off her earphones and thrown them to the side, or even stepped on them until they shattered into pieces.

However, Su Cancan did not do so. Instead, like Wu Tian said, she slowly propped up her body.

"Shut up, I don't need you to teach me!"

Su Cancan's voice was still as cold as ever, but Wu Tian's earpiece sounded like it was made of nature. At least, this proved that Su Cancan should be fine now.

Once again standing up, Su Cancan turned around and looked at the Biochemical Man with bloodshot eyes. This time, she was truly angry.

"You're dead."

Su Cancan had nothing else to say but this one sentence, and before the Biochemical Man could react, it suddenly felt as though something had passed by in front of his eyes.

Then, he saw Su Cancan's figure disappearing from the spot he was standing a moment ago. In her hand was a blown arrow, aimed straight at the Biochemical Man.

"You're too naive!" The Biochemical Man felt that it was impossible to use the same move twice, so he did not plan to wait helplessly for death, and wanted to turn his body to dodge the arrow.

But when he wanted to push his body, he found that he couldn't move his body at all, as if this body had nothing to do with him.

His arrogant eyes suddenly turned a little frightened. He realized that he had become like a fish on a chopping board, and it was impossible for him to continue rolling around under Su Cancan's hands.

"You said I'm naive? I think you're the naive one. " Su Cancan crooked her finger at the Biochemical Man, and a little black snake with its tongue sticking out was swimming around the Biochemical Man's body.

The lightning emitted from the Biochemical Man's body had no effect on it at all. The little snake had just made two clear bloody holes on the Biochemical Man's neck as it injected its venom.

As for Su Cancan, she slowly prepared, and continued to shoot her arrows, aiming straight for the Biochemical Man.

This time, Su Cancan did not leave any leeway and directly put in a large amount of lethal potions.

The little snake swam down from the Biochemical Man's body and returned into Su Cancan's hands. It then entered her clothes and disappeared.

As for the Biochemical Man, it was writhing on the ground as it howled in pain.

In next to no time, he was completely still.

Hidden Billionaire Chapter 1183 - Gifts to Entertain Guests

C1183 Gifts to Entertain Guests

Wu Tian and the others almost suffered another lightning attack as they fell into a state of silence.

Just when they thought that they were doomed, the lightning in the sky suddenly began to lessen, and then slowly disappeared.

The dark clouds slowly dissipated, revealing the moon that had been hanging in the sky.

Looking at it now, the moon was truly beautiful.

"Su Cancan, how is your condition? Are you hurt?"

Wu Tian hurriedly asked with concern. They were fine, but if Su Cancan had any problems, he wouldn't be able to accept it either.

"I'm fine, you don't have to worry."

Actually, Su Cancan's condition wasn't that bad. She was still quite lively and spirited.

"That's good. Hurry up and come back. Tell the military to go and get them at the scene, so we don't need to participate." Wu Tian was in a hurry to get Su Cancan back. Now, this matter was completely blown up.

There were still a lot of things that needed Wu Tian and the others to do, so Su Cancan had to hurry back to recuperate.

The moment the plane landed on the ground, Tieh Jun immediately walked up. He came specially to greet Wu Tian.

"I saw your fight, it's really great!" Tieh Jun lamented from the bottom of his heart. If it wasn't for these brave warriors, no one could be sure what kind of situation they were in right now.

But at the same time, it also made Tieh Jun very shocked, because the battle strength of these two Biochemical Men was far beyond that of ordinary soldiers.

"These people are really hard to deal with. If they all had the strength to fight, I'm afraid we wouldn't have been able to avoid any losses."

Speaking of this, Tieh Jun's expression immediately became uncomfortable. The current situation was still difficult to deal with. It's not going to be that easy.

"I don't think so. Actually, this time, we underestimated our opponent. However, it is true that none of them are easy to deal with." Wu Tian still felt a lingering fear when he thought about it, but no matter what, it was impossible for these enemies to always be this powerful.

Perhaps these two were an exception.

Tieh Jun felt that what he said was more important than what others wanted to say. He didn't want to say it anymore. The most important thing right now was to have the momentum to do it.

Their mission had just ended, but a bigger threat was already waiting at the back.

Wu Tian was about to unload some of his equipment, but before he could sit down and rest, his communication phone started ringing.

"President Wu, now we have observed a large number of people heading in your direction! There are around 40 people! "

This was a message from the combat command room. They were monitoring the entire S City in real time and found out that the large amount of biochemical reformers they found were moving towards Wu Tian.

They had clearly noticed the previous battle. Such a large-scale attack probably wasn't a small matter to them.

"Alright, I understand!"

After Wu Tian hung up the call, he looked at Tieh Jun and shook his head with a sigh.

"What's coming is coming. There are still a few that haven't appeared, but I feel like we're looking for him sooner or later. If it really isn't possible, we might as well grab a few people to interrogate him."

After stretching his back, Wu Tian stood up again and was unable to rest for even a second.

Their next plan was to set up a trap for these biochemical reformers.

Wu Tian was already not far from the Flower Island. Together with Tieh Jun, they built a huge underground facility.

In fact, this was not rebuilt, but a secret military base was requisitioned.

Large numbers of people began to advance towards this secret military base, which would be their main battlefield.

Wu Tian did not try to hide anything. Rather, it was because he was afraid that they would not be noticed by the Bio-transformation Men. That was why their actions were so impressive.

On the other hand, the Security Team members had withdrawn to the Flower Island. They had to protect that place to prevent the Biochemical Man from attacking the Flower Island.

And the one who followed Wu Tian and the others into the military base was the special forces led by Luo Huaicheng.

And they would be the main force in the next battle.

"Wu, can we do it this time? Will the other side see through this trap and refuse to come? "

No matter how he thought about it, it was too obvious, so Tieh Jun started to feel uneasy.

Wu Tian smiled, Tieh Jun may not understand, but Wu Tian is clear.

"Don't worry about that, these people are well-built, but their brains aren't that smart. So they will definitely come here! "

Of course, Wu Tian had a reason for saying such words. He knew that these Biochemical Man had probably been living in their research facility since they were young, so the only way to socialize was naturally through the entire base.

They had never come into contact with the outside world, nor did they understand how unfathomable the people outside were.

Therefore, these Biochemical Man would probably not be able to properly recognize things like schemes and tricks.

"If only it was what you said!"

Although Tieh Jun was nervous, he could only trust Wu Tian. Otherwise, he wouldn't have any other choice.

The soldiers moved quickly, and in less than half an hour, everything was ready.

The Biochemical Man s were faster too, and before long, according to the satellite reports, they had gathered in the vicinity of the military base.

The door to the military base was closed, so it was impossible to just open it and let them in. However, there were no guards at the door because Wu Tian knew it was too dangerous and he couldn't let himself take the risk.

"The number of people has already reached forty-two. There might even be more."

Wu Tian nodded as he heard the report.

"Alright, it's time for us to go on stage!"

This military base was full of traps. It could be said that Wu Tian specially prepared a big meal for them.

However, it depends on whether these people will actually come in. In order to prevent them from doing this, Wu Tian even prepared something to seduce them.

There was a large loudspeaker at the entrance of the underground base, shouting out something in English.

In short, they would hear about whatever was difficult to listen to, and then unrestrainedly slander these Biochemical Man s.

Sure enough, this kind of provocation worked. Some of the stunned youths, without saying a word, rammed into the main gate of the base.

This door was not very good, it could stop a few normal people, but to these Biochemical Man, it was as weak as a piece of paper.

Hidden Billionaire Chapter 1184 - There's Always Someone Stronger than You

C1184 There's Always Someone Stronger than You

The people in front quickly made their way into the military base. This base had many levels, but the Special Team was set up with many layers of defenses, blocking the way bit by bit.

When the Biochemical Man entered, they were immediately struck by a glaring light, causing them to be unable to open their eyes, followed by a burst of gunfire.

The intense gunshots were like raindrops as they continuously shot at the door.

In the face of such intense firepower, the bodies of the few Biochemical Man that had barged in earlier were turned into sieves, as they fell onto the ground, unable to move.

If there were no surprises, they were already completely dead. Seeing the situation, Wu Tian finally felt relieved.

As expected, not all Biochemical Man were as difficult to deal with as the two before.

In the end, their fight was like a splash of blood in the sea. Very soon, a large group of people rushed over.

These Biochemical Man were touched by their companion's sacrifice, and all rushed in like they did not care for their lives.

But this time, they immediately did something different. They no longer blindly charged forward, but chose people with better defensive power to stand in front of them.

They were not brainless. Under the stimulation of losing their companions, their speed of improvement was very fast.

The few muscular men in front used their own bodies as shields. The bullets that struck their bodies were like hitting a steel plate, having no effect at all.

In just one or two minutes, twenty or thirty people had rushed in from the entrance of the base.

Seeing that they were continuing to move forward with the intention of occupying the first layer, Wu Tian promptly issued an order for Luo Huaicheng and the other frontline troops to retreat.

There were several levels to this underground facility, so there was no need for them to place all the treasures inside it.

Very quickly, the Biochemical Man felt the pressure in front of it dissipate, and they continued to rush forward, cheering.

When the comrades outside saw their progress, they also rushed into the base.

At least in the current situation, there were already 20-30 people who entered Wu Tian's pocket.

However, there were still about ten people waiting outside. They did not make a move.

Wu Tian wanted to bring the ten-odd people in, so he shouted at the top of his lungs, but these people didn't move at all.

"Wu, let's not care about the ones outside. Let's deal with the ones inside first."

At this moment, Tieh Jun was completely excited. Such a large-scale battle was rare to see, but the opportunity was fleeting.

"That's the only way."

Wu Tian immediately returned his attention back to the front lines.

These Biochemical Man were charging from the first floor to the second floor. They encountered quite a few explosions along the way, but they did not cause much damage.

These ordinary explosives could only harm the weaker portion of the people. This portion of the people had already fallen into a pool of blood from the barrage of bullets.

Those who were able to reach this point were all existences with extremely powerful bodies.

As a result, they felt that this level of harassment was not as unbearable as a single bite from a mosquito.

However, these Biochemical Man did not expect that the second floor was completely dark and devoid of anything.

The size of this military base was not small, it was more than ten thousand square meters.

On the second floor, there were some broken tables, chairs, and all sorts of things, but there was no one there.

Moreover, in the pitch darkness, many Biochemical Man could not see anything. Many people stumbled and crashed into walls, and then clashed against the broken tables and chairs.

Under their strength, the so-called tables and stools quickly turned into dust. Even their attacks were unable to withstand it.

There was no lack of capable people amongst them, one of the Biochemical Man actually had a large amount of flame rising from its hands, it was just like a human candle, becoming the only tool for lighting up.

These people began to move around like headless flies, completely unaware of the danger they might face.

However, from the ceiling, some colourless and transparent poisonous gas had already been slowly poured in.

This floor was exactly the same as the other floors, and the poison gas was provided by Su Cancan, which was very scary.

Very quickly, Biochemical Man with slightly weaker bodies began to feel that something was wrong. They discovered that their bodies had become soft and weak, and it was even difficult for them to stand.

Someone felt that something was wrong and shouted at his companion before falling to the ground.

These Biochemical Man did not have the time to make any other changes, and were just like the straw that was cut off during the autumn harvest, they fell down one by one.

Seeing this scene, Wu Tian and Tieh Jun, who were in the command room, both went silent.

Luo Huaicheng and the others on the side also didn't say anything. Although they knew these were the enemies, looking at these people falling down so powerlessly, these soldiers also felt an unspeakable pain in their hearts.

It was as if there was a feeling of victory and no wonder why the international community forbade the use of such a weapon.

This poison should not have appeared from the very beginning.

"I thought it would be very difficult, but it seems it's only this much."

Wu Tian heaved a sigh of relief, and the base immediately calmed down.

At this time, the remaining dozen or so Biochemical Man outside also sensed that something was wrong. They should also have some sensing devices and realized that the people inside did not react.

They must be dead.

There was a commotion within the group of people, it was obvious that some of the Biochemical Man were shocked, and wanted revenge.

However, there were also people who felt that rushing in in this way was nothing more than getting beaten up.

Both sides began to hold their own views and argue.

Wu Tian stood in the command room and watched this scene. He didn't know whether to laugh or cry.

Wu Tian had originally hoped that all of these people would rush in and be captured by him in one fell swoop. It seemed that not all of them were idiots.

Not long after, the argument between the Biochemical Man seemed to have come to an end. They split into two teams, one of them had four or five people guarding outside while the rest followed their comrades in front of them and entered the military base step by step.

There was already no one on the first floor, so they came to the second floor as they were already familiar with it.

Due to the huge stimulation they had received earlier, these people cautiously opened the door to the second floor. They immediately felt that there might be poison gas inside.

There's always someone stronger than you. Wu Tian had hoped that these people would be able to enter the second floor and use the same trick to poison them to death.

But he never would have thought that one of the Biochemical Man would stand out and take off his clothes to open up his hands.

Only then did the crowd realize that there was a translucent layer of flesh under his arms, and it looked like a pair of large wings.

He stood at the door and waved his hands towards the inside. His speed became faster and faster, and very soon, a whirlwind began to blow.

The poison gas was most afraid of the wind. With the push of the wind, the second floor was quickly cleared.

The remaining people continued forward. As they passed by their companions, their eyes were filled with sorrow, but mostly anger.

Hidden Billionaire Chapter 1185 - Face-to-face Challenges

C1185 Face-to-face Challenges

When Wu Tian saw this, he thought these people had no feelings.

He was wrong about that, but it would not affect the outcome.

They had only broken through the first two layers. Every level of this base was a killing move, so it wasn't that easy to break through.

Very quickly, these few people arrived at the third floor. What was different from the first two floors was that this floor was brightly lit, and Special Team members could be seen standing far away.

They had all kinds of weapons in their hands, and they aimed at these people like tigers stalking their prey.

These weapons were the latest results of Wu Tian and the others' research. It is a portable laser cannon.

Previously, Wu Tian had used this kind of weapon to defeat Zhang Zerui.

Maybe against these Biochemical Man, they would also be a very important weapon.

After all, no matter how tough their bodies were, they probably wouldn't be able to withstand such a high-intensity heat.

If a large hole were to burn through his body, he would definitely lose his ability to fight.

The Biochemical Man did not know the use of the weapons in their hands, so they did not plan to rashly advance, moving forward bit by bit.

One of them picked up a stick from the side, stepped back a few steps, and then a runner threw the stick in his hand like a javelin.

At this time, Special Team was very fast, they could clearly feel that the speed of this rod was similar to that of a cruise missile. If it really hit their comrades, a hole would probably be pierced through.

They had no choice but to use their laser cannons to break the wooden stick, at the same time exposing the performance of their weapons.

Wu Tian frowned. He knew that there was no way around what they were doing, but they were still messing up his plan.

Originally, they had planned to take advantage of the fact that the enemies would rush forward and use such a laser cannon to inflict great damage on them without their knowledge.

It could have an unexpected effect, but from the looks of things, it was unlikely.

Knowing that this was a laser weapon, the other party would definitely think of a way to deal with it.

Sure enough, a short guy from the Biochemical Man stood out. It was unknown where he took out a large jar, then poured a large pile of things into his mouth.

Wu Tian was still watching with interest while Tieh Jun and him were still researching what specialties this person had.

Immediately after, they saw this little fellow exhale large amounts of smoke from his mouth.

No one knew if the smoke was poisonous or not, but this type of weapon had the greatest impact on the laser cannon.

Without visibility, the power of the laser cannon naturally decreased dramatically.

"This is bad!"

Wu Tian, I didn't think that the other person's reaction would be so fast.

If they didn't retreat quickly, these people would have attacked them from the smoke before he could even react.

"Let's retreat!"

Hearing Wu Tian's order, Luo Huaicheng was stunned for a moment. He was still unwilling to give up. The two sides had not even directly exchanged blows. Could it be that they were going to give up on this floor?

"What are you thinking about? Get out of here!"

Seeing that Luo Huaicheng didn't move, Wu Tian quickly shouted at him, waking Luo Huaicheng up.

"Retreat!"

Following Luo Huaicheng's order, although the Special Team at the front line was a little unhappy, they knew that they no longer had the chance to fight and retreated without hesitation.

But at the same time, the place where they were staying had been equipped with some unmanned machine guns. At this time, they also began to spew out flames.

Since he did not know the location of those people, the cannons could only randomly shoot towards the smoke.

However, the other party seemed to be unaffected by the smoke. Wu Tian and the others could clearly hear the clanging sounds coming from the white mist.

It sounded like a bullet hitting steel.

The enemy had probably taken the door down and used it as a shield, because the sound was getting closer.

Suddenly, a person appeared beside the cannon. He then stepped onto it, causing the cannon to distort. Its spitting tongue was hoarse.

After using the same method two or three times, the cannons blocking their advance had been completely destroyed.

However, they still bought time for Special Team to retreat.

The third floor had already been abandoned, so Wu Tian and the others had to hold on to the fourth floor.

Their headquarters was on the fourth floor, so it could be said that they had no more dangerous places to guard.

"They really aren't easy to deal with. They don't have many people, but they do have a lot of moves."

Wu Tian muttered. However, he had to win in front of them. They had nothing to compromise on.

"You have to have confidence in them! I can see the hardships these children usually have! "

Wu could sense Liu's concern, but he still thought it was nothing to worry about. Luo Huaicheng's army was much stronger than they imagined.

Very soon, the enemies had reached the fourth floor, and their number was one less than before. It seemed like the machine gun did not deal any damage, but the blind cat had killed one of them.

This result was pretty good news for Wu Tian. At least their hard work wasn't wasted.

There were only six of them left, and when they appeared at the door to the fourth floor, all of them held their breaths.

This floor was the last killing weapon Wu Tian and the others were prepared to use. If they were unable to kill all of them in one fell swoop, Wu Tian would have no good means left.

This time, Wu Tian's preparations were much simpler.

Because the people who appeared were himself and some of the members of Special Team beside him.

They gave up on the guns in their hands and put on the exoskeleton stand that was wrapped around their bodies. In their hands, they held a few exquisite swords and sabers.

These conditions were all developed using the current method, and the sharpness could be said to have reached the pinnacle.

The exoskeleton mechs they wore were the latest products of Wu Tian's group.

On one hand, it could protect the whole body. On the other hand, it could raise one's strength and speed to the peak.

"I've wanted to try this for a long time, don't let me down."

Luo Huaicheng was standing beside Wu Tian. As the commander on the scene, it was only right for him to join the battle.

Wu Tian smiled. The quality of these equipment depended on the person who used it. If used properly, its power would naturally be greatly increased.

"Then look forward to it. By the way, I'll tell you that the price of this set of clothes is not cheap. If you fancy it, then you must prepare to pay a huge price."

They chatted happily, not because they looked down on the enemy before them, but to relax the atmosphere on their side.

It was because they knew that a great battle was about to begin. This time, it would be a confrontation between strength, and a battle between blade and blood.
