

Hidden Billionaire Chapter 841 - Explosive Events

C841 Explosive Events

Wu Tian swallowed his saliva and took a deep breath.

Since he was already here, he had no other choice. He had to complete this task.

"Good evening everyone ..."

He had just mentally prepared himself, but Wu Tian immediately said the wrong thing ...

"Just kidding. People like me have meetings every day. How could I possibly be afraid?"

Wu Tian realized this and immediately started teasing himself. On the contrary, he made the people below laugh.

"I've invited everyone here to announce a very important matter!" Wu Tian cleared his throat. The surrounding lights also went out at this moment, leaving only Wu Tian's spotlight.

"Everyone probably hasn't received any news yet. Now, I want to tell you all an explosive piece of news!"

Just as he was speaking, a loud explosion came from another direction and the scene suddenly became filled with screams.

Wu Tian was stunned on the spot. What's going on? Just as he said the explosive news, the scene exploded?

"Amazing, as expected of the Wu Group Corporation, even the press conference is so cool!"

"That's right, this explosion looks very real. I was really shocked just now ..."

For some unknown reason, the people below were not frightened by this matter. Instead, they all started to cheer and cheer, and even clapped.

Wu Tian looked nervously towards the backstage. He saw Loong Yun gesticulating at him, telling him not to worry about what was happening outside.

Su Cancan and the rest had already rushed over to deal with the situation, so it was better if he continued holding the press conference.

He watched as everyone worked so hard. If this press conference was interrupted by a terrorist attack, it wouldn't be worth it.

Wu Tian gritted his teeth and continued explaining.

"I believe everyone should know about this fanhua device that Shuangxing Company Corporation previously introduced. This is indeed a revolutionary invention. It's just that this price is too expensive, so our Wu Group company hopes for everyone to experience this kind of future gaming style, and also a brand-new way of life ... "

Wu Tian raised his cup and took a sip of water, lifting the audience's appetite to a high level.

"That's why we developed a brand-new brainwave game device — — Kaleidoscope!"

As he said that, the spotlight landed on a display stand beside Wu Tian, exposing the Kaleidoscope to the public for the first time.

"Its performance is definitely reliable, and its experience is definitely top-notch! The price is definitely to the satisfaction of everyone! "

The price of this thing was only three thousand yuan, which was the price of a phone.

To be honest, Wu Tian basically did not make money selling this Kaleidoscope.

In order to gain market share, he could not focus too much on profits. As long as he could nurture a large number of users, he would naturally be able to reap the benefits later on.

The press conference was not the end. The most exciting thing had yet to happen.

This was also Wu Tian's most detailed point.

"This time, we will also randomly bestow upon us the game our Wu Group company has developed, the Strange World! Anyone who buys our first product can get this game for free and enjoy the game world with the gamers of the entire country and even the entire world! "

After finishing the introductions, Wu Tian hurried off the stage. As for the rest of the matters, he dragged Wu Zaibin up and told him to continue explaining them to the masses.

Loong Yun knew what Wu Tian wanted to do. When she saw him come down, she first brought him something and then brought him to change into a black suit.

This dress is also the latest product. This piece of clothing was barely reflecting in the dark – it was very hard to find any traces of it.

"What happened just now?" Is it Tianying Sect? " Wu Tian's face was grave. Even now, people of Tianying Sect were unwilling to show their heads, yet they still used this kind of method to harass him. It was truly annoying.

"Director Su and the others are currently investigating, so we don't know the reason right now."

Loong Yun didn't have much information either. It was just that this matter happened too suddenly and nobody knew what was going on.

When he arrived at the scene of the explosion, he found that the place they had blown up was a garden of Wu Castle, which had just been refurbished.

It was already a mess, but luckily there were no casualties. No one was nearby when the explosion took place.

"How is it?"

Wu Tian quickly ran over and asked Su Cancan.

"I checked the monitor but did not find anyone. I suspect that this is a timed bomb... "

No one appeared to indicate that the bomb had not been placed here just now — it had been set up in advance.

"Oh my god, then do we still have bombs in other parts of this courtyard?"

Wu Tian immediately started to doubt it. Since the enemies could place bombs in the garden, logically speaking, they should be able to place them in other places as well.

It was fortunate that they didn't set up the bomb at the press conference, otherwise, many people would have died along with Wu Tian ...

"We are in the middle of an investigation. Let's not enter any rooms for the time being and wait until the investigation is complete."

Su Cancan and the others were still working efficiently, and many people with Security Team were already dressed in mine clearance equipment as they scanned every nook and cranny.

The press conference was still in a heated state, and quite a few trucks had come to deliver goods. Everyone in the media who attended the event was given a Kaleidoscope.

This is one of the simplest ways of promoting it.

By doing so, he could easily get them to write a lot of articles for him.

Whether it was good or bad, as long as everyone knew that such a thing existed, there was no need to worry about the sales.

Sunn Hongsheng also participated in the investigation. When the sun was about to rise, he finally found some clues.

They were using all of the S City's surveillance videos to search for the person from the Wu Family who had committed suicide back then — They had actually found some clues.

"You are all here, just in time, look and see if this person is the one who attacked us earlier."

Sunn Hongsheng brought a few photos, which showed the person from Wu Family walking on the street. The few photos in front were all very normal.

There was only one photo that seemed a little abnormal, because when that person from Wu Family was standing by the side of the road, a person dressed in black was currently walking towards him.

Wu Tian knew the look in the eyes of this man in black, he had seen it on Wu Yingqiu and Zheng Taiwen.

He was definitely someone from the Tianying Sect!

Hidden Billionaire Chapter 842 - Take the Initiative

C842 Take the Initiative

Wu Tian arrived at this conclusion without any hesitation.

He just didn't point it out in front of Sunn Hongsheng.

"How about this, give me these photos, I'll go ask my people if they know him."

Wu Tian asked for these photos with just a few words.

Sunn Hongsheng didn't have anything to be suspicious about, so he casually stuffed it into Wu Tian's hands. He quickly ran to the location of the explosion and prepared to investigate it together.

Wu Tian waved at Loong Yun and the others with the photos and led them back to the room.

He gave Loong Yun the photo he had noticed and told her to deal with it as soon as possible.

"This person must have made contact with him before. If there's no doubt, this man in black must be someone from Tianying Sect."

Wu Tian swore solemnly. He was beginning to have some new ideas.

"We will investigate now! And then, what's the use of knowing a person's identity? "

Su Cancan was a little puzzled. They basically wanted to carry out defense at the current stage.

The other side hadn't shown up at all, so it would be very disadvantageous for them to keep fighting guerrilla warfare.

"F * ck, f * ck him, since these Tianying Sect people aren't coming out, then we'll take the initiative to find out their positions!" Wu Tian waved his fist and said while clenching his teeth.

His patience had already been worn out by these people. Compared to his current passive state, he might as well take the initiative.

"I found it!" Loong Yun's voice immediately sounded from somewhere else. She was very excited as she jogged over.

"I checked the monitoring system for the S City and found out that the last place this person appeared in was here!"

Loong Yun pointed at an area on the map. This place was a chemical factory, so it was easy to produce some explosives here.

If nothing unexpected happened, this place would probably be the hiding place for these Tianying Sect!

"Can our people leave now?" Wu Tian stared at Su Cancan with burning eyes. This mission could be said to be very crucial, he had to ensure that there were no mistakes.

Su Cancan didn't say anything. Instead, she just turned on her walkie-talkie silently.

"Please take note of the Security Team. Go to the open area in front of the castle and gather all our equipment!"

She had already proven her attitude with her own actions.

Wu Tian nodded in satisfaction and then turned around to look at Loong Yun, "Arrange a car for me!"

"President Wu, you can't go!"

Loong Yun was straightforward. She didn't even raise her head.

"Why? How can I not go? "

Of course, Wu Tian didn't want to give in like this.

However, Loong Yun did not intend to back down either.

"Your back is still injured, so you can't participate in the battle!"

If Loong Yun hadn't said so, Wu Tian would have almost forgotten about the wound on his back.

At this moment, he couldn't help but to mention that Loong Zaian's treatment method was too powerful. Until now, Wu Tian still didn't feel any pain.

He waved his arm and even jumped a few times. He felt that his body was in good condition.

"It's fine. I will be leading from nearby. I promise not to get involved. If you are worried, you can follow me." If you don't agree, I'll drive there myself, so what do you think you can do? "

Wu Tian kicked the ball back to Loong Yun. This was indeed making things difficult for her. If she didn't agree, or if Wu Tian acted recklessly and something happened to him, no one would know.

After some thought, Loong Yun finally agreed to Wu Tian's request.

"Fine, but you have to guarantee that you won't join the battle." When Loong Yun said this, she was slightly skeptical.

Seeing Loong Yun let go, Wu Tian smirked. He then secretly took a set of exoskeleton Battle Mecha that was equipped by everybody with Security Team and placed it in the trunk of the car before Loong Yun came out.

The convoy was quickly ready, and stealthily set off under cover of the night. Just like a poisonous snake waiting for the right opportunity in the dark night, he directly pounced towards the group of people with Tianying Sect.

"Can we tell how many people they have?" Wu Tian was already getting excited while driving this car.

A fight was about to break out, and even his heart was starting to thump loudly.

"I'm not sure yet, but what I'm sure of right now is that there are about 20 people inside this factory."

Loong Yun relied on the surveillance cameras nearby to make some guesses. Being able to come up with such a conjecture was already the limit of what she could do under such circumstances.

The rest could only be determined after they reached that place.

The team had only traveled for half an hour and they had already reached the factory area.

In order to not attract attention, the caravan began to disperse from a very far distance away. Most of the Security Team practitioners were from the army, so their movements and arrangements were very standard.

A few people and a small group quickly seized some of the nearby high points.

This time, they seemed to be carrying the latest model of a weapon, a sniper rifle crossbow. Although the ammunition used was still the kind that did not have any killing effect, the power of the crossbow was still not to be underestimated.

As long as they hit from such a distance, they would definitely be unable to get up. Then, they would be electrocuted and faint.

There was no doubt about that.

Su Cancan and Wu Tian were in an alley opposite the factory, looking inside with binoculars.

Loong Yun simply took out an infrared observation device and clearly saw what was going on inside.

"There are less than 30 people inside, most of them are probably resting in this room of the factory. There are three people patrolling at the gate, two on the roof and two at the back. "

The other side's deployment was exposed in front of Wu Tian and the others without any concealment.

"What are you going to do?" Wu Tian looked at Su Cancan. Security Team was something she had trained herself, so she should be clear about how to make use of it.

"That depends on you. Do you want to cause a big commotion or do you want to cause a small commotion?"

Su Cancan gave Wu Tian an option, it seemed like she could do both.

"What do you say?" Wu Tian was confused.

"A lot of noise can be heard. I'll have someone set up a few bombs. They are very skilled and can guarantee that they will only blow up this factory and not spread to other places."

Su Cancan said indifferently, but was immediately denied by Wu Tian.

"How can that be? When the time comes, the police will be even more suspicious. If it involves us, it will be very troublesome."

"Then do something small and capture them all!" As she spoke, Su Cancan waved her hand towards the distance. The two patrolling men on the rooftop in the distance suddenly fell to the ground at the same time.

Hidden Billionaire Chapter 843 - Fall into the Trap

C843 Fall into the Trap

It happened so suddenly that Wu Tian couldn't believe it.

Just as the two of them were about to fall, two Security Team people stood on one side and supported them.

The whole process could be said to be as smooth as the moving clouds and flowing water. Not even a single sound could be heard.

"Incredible." Wu Tian immediately gave a thumbs up. He had to be convinced that they were really that powerful.

It seems that these Security Team guys still have some skills.

Soon after, there were already a dozen or so people climbing up the walls of the factory. Instead of alerting the sentry at the door, they went up to the roof.

This angle could be said to be very tricky and ordinary people would definitely not think of it.

Since there was no response from the sentry at the door, the people inside would not suspect anything.

Although Wu Tian couldn't get close to watch, Loong Yun's infrared camera could clearly display what was happening inside through the screen.

Su Cancan was also staring intently at the screen, watching the scenes transmitted by the cameras the Security Team users brought with them. She could direct them from here through the walkie-talkie.

The situation inside was a mess. There were chemical ingredients everywhere, and the quantity was huge.

There were even plastic jars on the ground, with holes sealed in them. It seemed to be a finished explosive package.

Wu Tian looked at these things and immediately recalled when he was at the door. That person from the Wu Family had these jars tied to his body.

It seemed like they really did have connections.

The situation seemed to be progressing smoothly. At this time, a dozen or so Security Team practitioners had already infiltrated, silently capturing a dozen or so people.

Most of them were asleep, and some of them were still talking, but they were easily knocked down by the crossbow bolts.

Just when everyone thought that things would continue like this, all of a sudden, the lights in the factory suddenly lit up.

Wu Tian immediately exclaimed, this is bad.

Su Cancan was even faster than Wu Tian. Her own strength was already very strong, and now that she was still wearing the exoskeleton, she had completely exceeded the limits of a human's body.

With a slight jump, she crossed a street, which could be said to have widened Wu Tian's horizons.

The Security Team users in the workshop also reacted very quickly. Although they had fallen into the enemy's trap, the crossbow arrows in their hands were extremely accurate.

The dozen men formed a circle, shooting at the approaching attackers.

Even though the people from the Tianying Sect all had some abilities, they were still unable to resist these high-tech weapons.

After all, no one would specialize in cultivating how to resist an electric shock.

With just two flashes, Su Cancan had already rushed to the entrance of the factory.

However, there were two people standing by the door, blocking Su Cancan's path like two tigers eyeing their prey.

"I've been waiting for you guys for a long time. You've finally come." A voice filled with energy came out from the depths of the factory. Wu Tian immediately frowned.

This voice must be the Tianying Sect's Sect Leader!

Wu Tian couldn't care about that anymore, he took out the exoskeleton he prepared from the trunk.

He quickly put it on. However, Wu Tian didn't head directly towards the factory. Instead, he went around to the back.

Loong Yun stared at Wu Tian coldly without saying a word.

Wu Tian didn't dare to look into Loong Yun's eyes. He had clearly agreed to it when he came, but it had only been a short while and he had already given up on his promise.

But he couldn't just leave Su Cancan and the others alone either. Wu Tian couldn't watch those Security Team members become prey for Tianying Sect.

The battle at the door was extremely intense. Although Su Cancan was alone, the improvement brought by the exoskeleton on her could be said to be a qualitative leap.

Before the two of them could understand what was going on, Su Cancan had already rushed in front of them. With a punch and a kick, the two guards fell to the ground.

They couldn't get up immediately.

Su Cancan didn't have the time to care about the two of them and rushed inside.

In the workshop, although the Security Team were surrounded, their defense was impregnable. For a moment, those people with Tianying Sect were unable to do anything.

Just as Su Cancan was about to break through the door, a muscular man walked out from the shadows.

His entire body was covered in firm muscles. The muscles on his face made him look extremely strong. When he stood up, he was at least two meters tall. He looked just like a humanoid tank.

This person twisted his neck, releasing creaking sounds, and then, step by step, he walked towards Security Team.

The team members immediately realized that this person was the greatest threat to them, so they aimed their crossbows at the burly man.

Although the crossbow bolts continued to shoot out, the moment they hit the brawny man's body, it was like scratching an itch and there was no reaction at all.

It only stopped him for a moment.

The robust man emitted a powerful pressure, instantly making the people from the Security Team understand that they couldn't defeat this person just by relying on themselves, so they too were straightforward and directly chose to retreat.

However, since they wanted to leave, the other party did not want to let them go.

Immediately, everyone from the Tianying Sect rushed up and attacked them like a swarm of bees.

Their speed and strength were originally stronger than the average person's, and their Security Team were in complete disarray.

Fortunately, all of these members were wearing exoskeletons, so they did not sustain any serious injuries.

"All of you, retreat!" At this moment, Su Cancan's voice came from behind.

However, what came faster than her voice were the two smoke bombs.

Within two to three seconds, the entire factory was shrouded in a thick layer of smoke. Adding to the darkness of the night, it was almost impossible to see one's hand in front of one's eyes.

At this time, the Security Team Enforcers quickly supported each other and ran outside with all their might.

Su Cancan helped them gain some time. The Smoke Bomb was not an ordinary item, it had the unique effect of being anesthetized by Wudu Sect.

If a person was unprepared and were to inhale in, they would lose all their strength in less than a minute.

However, the people from the Tianying Sect were naturally well-informed, and the moment they saw the smoke, they immediately covered their own noses.

When Security Team had just rushed out, Su Cancan saw that she was planning to follow closely after him.

Who would have thought that at this time, a huge gate would suddenly fall down, completely sealing off the entrance.

Su Cancan was only a second or two away from leaving.
