

Hidden Billionaire Chapter 849 - Appearance of Competitor

C849 Appearance of Competitor

Although he said that he wasn't paying attention, this Zhixing Company caused quite a big commotion.

Perhaps it was because of Wu Tian's provocation, but Technology Company were established all over the country. Many people treated Wu Tian as their target, and Wu Group Company as their rival.

Even Nangong Ying came over to discuss this with Wu Tian.

Even though it was a discussion, in the end, this guy came to eat and drink.

"I've been exhausted to death recently, but now you're better. I don't think you need to do anything. You're very free." To be honest, Nangong Ying was very envious of Wu Tian.

Thinking back to before, Wu Tian still came over to beg Nangong Ying. Now, he was already standing at Wu Tian's feet, looking up at him.

"Don't say it like that, how could I be capable? It's just that it's all due to the hard work of our colleagues." Although Wu Tian said it modestly, he didn't hide it in front of Nangong Ying and started to enjoy it.

From time to time, he would listen to a few words of flattery. It was quite pleasurable, at least, to be in a good mood.

"Don't think that I don't know. If I were you, I really wouldn't be able to do this. Your courage isn't something that ordinary people can compare to."

Nangong Ying sighed with emotion. He really wasn't talking nonsense, he was really sighing with emotion from the bottom of his heart.

As he spoke, Nangong Ying once again brought up the Shangguan Family.

Speaking of this, Wu Tian hadn't noticed them for a while and didn't know what they were doing.

"Shangguan Family? I remember that if it's not bad, they originally worked for Shuangxing Company Companies, but when they ran out of China, they seemed to have disappeared, and it seems like they transferred all their assets to other countries. "

That was also Wu Tian's final impression of Shangguan. In the past, Shangguan Junyi would show off in front of him, but now, he couldn't even find him anymore.

Nangong Ying nodded, and then continued, "They did indeed transfer the assets to the Korea, but now they have returned."

"They're back?" Wu Tian, on the other hand, started laughing. What can these people do when they come back. Once this foundation is shaken, it's easier to get rid of them.

The market. As long as you leave, there will naturally be people to make up for it.

The same was true of the Shangguan Family's markets.

"Don't underestimate them. These guys are still pretty strong, have you heard of the Zhixing Company that is currently very popular? "There seems to be Shangguan's shadow inside."

Nangong Ying knew about this inside information very quickly. This Zhixing Company's establishment didn't have much time, and it was only revealed to the public yesterday.

Even Loong Yun hadn't found anything yet.

"Zhixing Company?" Wu Tian noticed that these people seemed to have gathered together for some unknown reason.

Wasn't this a coincidence? Or rather, this was Zhang Zerui's intentional arrangement.

This Zhang Zerui was originally Chang Zairong's secretary, but now that they established this company and there was even a share of Shangguan Family in it, everyone wondered if they had formed another alliance against Wu Group.

"Yeah, don't let your guard down either. What if they really do have some skill?"

Nangong Ying had always believed in only one principle, and that was never to underestimate an opponent, even if this person was someone you've defeated before.

"Relax, since when have you seen me giving benefits? Previously, I was always the one being suppressed by others, but now I've voluntarily withdrawn from the competition to deal with the high technology. If they still have any thoughts about me, then they can't blame me for being impolite."

Wu Tian narrowed his eyes. Of course, he had to be on guard against competitors, but maintaining his superiority was more important than fighting back.

Therefore, he knew exactly what was priority and what could be delayed.

"President Wu, there's a message from the space island. The rocket is ready to fire. When can you launch? "

Loong Yun walked over calmly, interrupting their conversation. Such an exciting event coming out of her mouth was as common as eating and sleeping.

"Of course, the earlier the better!" Wu Tian was overjoyed. He had prepared for so long, and now he could finally launch his own rocket.

As long as this matter was successful, there was no need to explain any further. Many things would naturally happen.

For example, the dark materials that everyone had previously obtained from Wu Group Corporation, these impressions could be greatly improved.

"Then I'll inform the other side right now. Also, do you need to watch it on the spot? "

Wu Tian quickly nodded like a chick pecking rice.

Nangong Ying was much more excited than Wu Tian. It was right that he came this time. If it wasn't for the fact that he had been staying here all this time, he might have missed this matter.

Since this was a big matter, Wu Tian called over the company's top executives and important partners to come over. They all went to the spaceflight island to observe the rocket launch.

Although Wu Group company had only just started this matter, the first step was often the most difficult.

As long as they could break through the first step, then things would be much smoother. Money would also be flowing in in handfals and handfals.

The space island was a distance away from the China, and the cruise ship even traveled for two to three hours before reaching this place.

Most of the island still looked desolate, and many of the facilities had not been built yet because of the urgency of firing rockets.

However, this matter was not too big of a problem. With the efficiency of the Wu Group, it would not take long for this place to become a new space industrial city.

The size of the island was only the size of a small town. If he were to drive a car, he would probably be able to go back and forth in a few minutes.

The launch pad was located at the southernmost tip of the island, where a small rocket stood.

"Wu Tian, is this really done by your men?" Baili Zhenlin was the guest invited over. Although he thought that Wu Tian was just talking about it at the beginning, he didn't think that it would actually be done.

Wu Tian was incredibly proud at this moment. What else could make him more excited than this?

"Of course. Why don't you think about who I, Wu Tian, am?"

Hidden Billionaire Chapter 850 - Special Material

C850 Special Material

After the countdown ended, Wu Tian pressed the button to ignite the rocket.

A huge flame shot up into the sky, steadily pushing the rocket into space.

The launch site was instantly filled with cheers, and even Wu Tian couldn't help but feel his tears.

To be honest, he finally felt that everything he had done was meaningful. It was not just simply making money. It could even become the driving force behind development throughout the country and the entire world.

"President Wu, what are your thoughts on this matter?" With a bunch of reporters and cameras, Wu Zaiyao immediately surrounded Wu Tian.

"I'm just excited ..." Wu Tian didn't want to show the scene of him crying in front of the camera, but his tears still flowed out uncontrollably.

"Hello, President Wu. I'm a reporter from our S City Science and Technology Newspaper. There's something I want to interview you about. Our city's newly established Zhixing Company says that it wants to start up the rocket launcher business.

At this moment, a reporter suddenly scuttled to the front and asked a question that no one had expected.

Wu Tian's emotions immediately stopped.

What was going on?

This Zhixing Company actually said that they were going to start a rocket business? Are they sure they're not bragging? Did they really think that this spaceflight project could be done by anyone? If it was that simple, Wu Tian wouldn't need to spend so much effort.

"He doesn't know what he's talking about. I don't know if they know what they're talking about." Wu Tian didn't even hide his disdain.

Not to mention this newly-formed intelligence agency, even in the whole world, there were not many companies that could launch rockets.

The investment required for these things is not something an enterprise can do, it is basically in the hands of the state.

As long as Wu Tian could launch a rocket, he would be considered one of the top figures in the world.

"Then, can we understand that you are looking down on the challenge of Zhixing Company?"

Wu Tian sneered. However, for the sake of his image and face, he tried his best to control his emotions.

"I never look down on anyone."

With that, Wu Tian left on his own, leaving Wu Zaibin and the others to fend off these people's questions.

Loong Yun quickly followed him. She felt that Wu Tian wasn't in a good mood.

"President Wu, are you alright?"

Wu Tian waved his hand, indicating that he was fine.

"It's fine, you don't have to worry too much."

Originally, it was a happy occasion, but after being asked that question, Wu Tian became unhappy instead. He went back to the ship alone early and started to feel depressed.

Seeing him like this, Loong Yun didn't say anything and just silently accompanied him back.

Not many days had passed since then, when suddenly, a wave of promotion of Zhixing Company began to surge in the public opinion online.

In a contest between the strong and the weak, everyone was more inclined towards the one with the weaker strength.

This made Wu Tian even more annoyed. Even though there was clearly nothing on the Zhixing Company, their stocks had actually risen by a lot.

He had spent so much money, yet it had no effect at all. It was obvious how bad Wu Tian's mood was.

This matter was still not over yet. A few days later, Zhixing Company suddenly announced that they were going to conduct a launch mission in the outskirts of S City.

When this news came out, everyone in Wu Group Company was immediately shocked.

Wu Tian gathered all the intelligence personnel at the first possible moment.

"I don't understand. What kind of ability does this Zhixing Company have exactly? It's only been a few days and they can already fire rockets?"

Looking at Wu Tian's expression, Wei Jiaming thought for a while and then came up with an idea.

"President Wu, how about we go over and see what exactly is going on with their company."

As the saying went, knowing yourself and knowing your opponent is the best way to win a hundred battles. Now, their understanding of this opponent could be said to be completely ignorant.

He simply did not know what ability Zhixing Company had, and did not know what trump card they had.

"You should go investigate. Don't force yourself too much. You must be careful and be safe."

Wu Tian agreed to his request, but it wasn't enough.

"Loong Yun, investigate whether what they said is true or not. If it's true, where did their talents come from?"

Wu Tian didn't know what was going on with him. All he felt was that he had been worried and apprehensive.

As for the reason, he didn't know, but he was always a little worried.

After settling all these matters, if he wanted to be absolutely safe, the only way was to ensure his own strength.

Wu Tian quickly gave another order to Wu Zaibin, asking him to continue to expand the development of spaceflight.

After settling all these matters, Wu Tian finally had the intention of resting.

He just didn't expect that there was still good news waiting for him.

The result of the material on the ring that he entrusted bamboo pole to carry out the investigation is out now.

Seeing no one around, bamboo pole wasn't as careful. He took out a USB and passed it to Loong Yun.

"President Wu, the result you wanted is indeed out."

Looking at bamboo pole's expression, Wu Tian always felt that he had something to say.

"What's wrong?" Wu Tian was actually a bit nervous, afraid that something might have gone wrong.

At this moment, Loong Yun had already opened up the contents of the USB drive. It seemed to be a diagram of the material's molecular structure.

bamboo pole pointed at the image on the screen and swallowed his saliva.

"You may not be this major, and may not understand, but let me tell you this. It's just that this thing is too amazing. This is the first time I've seen such material!" bamboo pole was full of praise for this thing.

After listening to his description of these things, Wu Tian remembered something. bamboo pole said that if they could figure out how to make this thing, then it would be easy for them to win a Nobel Prize.

"Is it really that powerful?" Wu Tian was a bit skeptical, but when he thought about the ring, he immediately felt relieved.

If this thing wasn't powerful, how could Wu Tian fancy it?

Hidden Billionaire Chapter 851 - Space Competition

C851 Space Competition

What made this material powerful was its structure.

The hardness of this metal can be said to be beyond my imagination, and its melting point is unusually high as well. I have already raised the temperature to close to 10,000 degrees celsius, so this metal can still maintain its current toughness and hardness.

bamboo pole was on the verge of going crazy. This thing was the material all scientists dreamed of. Now, it had really appeared in front of them.

"This thing... See if you can figure out how to make it! " Although Wu Tian only vaguely understood what was going on, he understood that this thing must be extremely useful.

At least the fact that the temperature could reach more than 10,000 degrees Celsius surprised Wu Tian.

Regardless of anything else, with this thing, you can become the world's leader in many areas...

"This... I've already started it, but there's a material I've never seen before, so I'm not sure. Oh yeah, President Wu, do you know how you got this material? Maybe we can get some clues. "

bamboo pole was so excited that he almost couldn't say it clearly. It wasn't that simple to know the nature of the material, but it wouldn't be that easy to understand the ratio of the material.

Wu Tian was a little hesitant, but thinking about it, if he hid it from bamboo pole, it would not help him at all.

"Then let me tell you, this thing was actually smelted out of a meteorite." It is said that it was used for forty-nine days. " Wu Tian repeated what Chen Shiran said before.

bamboo pole started to feel depressed when he heard that.

There were too few meteorites and they were really found. Most of the time, it was taken away by the government for research and there would be no chance for it to spread to the people.

Not to mention having them refine it ...

"President Wu, this is too much effort. It's impossible for us to get the materials. It's impossible to get the materials, unless you go to the sky to fish up a star for me."

Although bamboo pole didn't have much hope, he had recently heard about the company's rocket launcher.

"Alright, I understand." Wu Tian probably understood bamboo pole's meaning, but the current Wu Tian was still unable to implement it for him.

After bamboo pole left, Wu Tian once again fell into deep thought.

Indeed, it was not easy to find meteorites on the ground. Then he had to change his way of thinking.

There are many meteorites here, so of course it's in outer space.

If they could use the method of firing rockets and bring back a batch of materials from space for bamboo pole to study, wouldn't there be a huge chance that they could replicate that material?

Wu Tian thought like this for a few more days. He had been considering whether it was okay for the spaceflight to develop like this or not.

What he did not expect was that within a few days, Zhixing Company's rocket had already been successfully launched.

This was equivalent to fiercely slapping Wu Tian's face.

Anyone with a discerning eye could see the unhappy expression on Wu Tian's face.

During a regular meeting, Wu Tian told them everything he knew.

"I don't know why they can launch their rockets so quickly, but shouldn't we increase our speed as well?"

Wu Tian was tied to the chariot.

"President Wu, you can't be too agitated by this. Our development must be done slowly, one step at a time!"

Loong Yun, as a rare occurrence, raised an objection towards Wu Tian's request. Everyone present was a little surprised.

Wu Tian was also stunned, but he did not intend to let it end like that.

"If we don't hurry, then we'll be overtaken by them, right? If they take over the market, what's the point of us doing this spaceflight? " Wu Tian immediately thought of a way to deal with them.

Even Wu Tian knew that in this spaceflight, one had to have a commercial presence to be able to play for long periods of time.

Otherwise, the cost alone would be enough to make him suffer.

If it wasn't for Wu Tian having the people from the military factory help him develop the rocket during this period of time, it would be impossible for them to fire the rocket that quickly.

Although they had experts like Hong Xiangtai, it was clear that their progress wouldn't be too fast.

"President Wu said that we have to increase our speed to show our superiority! "Our military factory is willing to continue to build on this existing foundation."

On the other hand, Director Wang agreed with Wu Tian's words. He was a relative practitioner and knew what the result would be if he didn't have a solid foundation in this matter.

"What if they are stronger than us?" Last time, we only launched a rocket, right? This time, if we don't get any results, it doesn't seem appropriate. "

This time, Wu Zaibin also started to stand beside Wu Tian.

"That's right, launching rockets and actually using rockets are two different situations. Our Security Team needs a reconnaissance satellite!" Even Su Cancan, who didn't usually speak in such meetings, started to make her request. Everyone started to speak for a while.

Wu Tian didn't know whether to laugh or cry as he watched the commotion below.

"Alright, alright, let's do it one by one. I also feel that having a reconnaissance satellite will be very beneficial for us. At least our company's safety must be guaranteed. Wu Zaibin, hurry up and take our people to develop this thing."

Wu Tian was straightforward. With limited resources, they had no choice but to do so.

After a while, Wu Tian finally relaxed a little. Loong Yun walked over with a worried expression and looked at Wu Tian.

"President Wu, can we really do this? The company is in need of money everywhere now, and if we do that this time, we might be in debt. "

Aerospace is a very expensive business, and the expansion of this kind of project is calculated in hundreds of millions.

"With things having gotten to this point, we have to go through with it. Otherwise, if the real market is taken away, we won't be able to make money in this space industry anymore."

Wu Tian had already thought about it. As long as they could successfully launch the satellite, they could commercialize it.

Hidden Billionaire Chapter 852 - Professional

C852 Professional

Most of these things in the world are now launched by the state.

So it's basically hard for a company to have its own satellite first.

If Wu Tian and the others could really succeed, it would mean that they could open up a precedent that would allow every company to have the opportunity to do so.

Or it could later help other nations with no space capabilities to launch, which is the same. At that time, wasn't Wu Tian going easy on him?

This was also one of the reasons why Wu Tian was so persistent about this matter. Of course, it wasn't just Wu Tian's own obsession.

After taking care of these things, Wu Tian suddenly felt free again and started playing with the Kaleidoscope.

There was also a game in there. Wu Tian thought he might as well experience it himself and see what everyone's products looked like.

Soon after the last press conference, the products were sold out, the factory was now producing almost day and night, and orders drifted in like snow.

The profits of the entire company were suddenly carried by this Kaleidoscope.

Wu Tian was shocked when he saw the financial report. He didn't expect it to be this powerful.

Therefore, the reason why he was so confident about increasing the investment in spaceflight was because of this matter.

After wearing the Kaleidoscope, Wu Tian's consciousness was immediately pulled into this virtual world.

In the interface that popped out, there were several games that Wu Tian could choose from. Needless to say, he would choose the legendary world that was sold along with the Kaleidoscope.

When he went in to take a look, Wu Tian almost thought that he had arrived at the market.

There was a sea of people everywhere. He even found it very difficult to kill monsters in the Beginner Village.

There were too many people. Wu Tian was killed before he could do anything.

Wu Tian, who was bored to death, had no choice but to stroll around the game and take a look at the scenery.

Due to the speed at which the game was being developed, there were still many areas where the game wasn't perfect.

Looking at the sky above, Wu Tian clearly felt that it was a little lousy. The cloud could barely move, and it also seemed to be fake.

"I don't know either why the beauty of this game is so bad ..."

The two girls said this. One of them seemed to be shopping around, picking and choosing different places in the game.

"Guang Yao, I think they have fallen into a kind of misunderstanding and are still using the same method as before to create the game. That's why they have such a situation."

The girl beside him seemed to understand this very well, and she explained it quite clearly.

Wu Tian, who just happened to be listening at the side, immediately looked over and saw the two girls talking non-stop as if they were talking about the development of the game.

He took the initiative to walk over and follow behind the two girls, pretending that nothing had happened.

"Sister Zhao, if you were to develop this game, what would you do? I haven't thought of our graduation plan. How about we also do a virtual reality game and hand it in?"

From their tone, they seemed to be the two girls who were about to graduate, and seemed to be from a gaming department.

"So that's how it is ..." Wu Tian said thoughtfully. Suddenly, the two girls in front turned around and looked at Wu Tian in surprise.

"Who are you? Why are you following us?" The girl with the slightly exaggerated voice had even pulled out the sword that he had given to her as a gift from a novice.

The one who was called Sister Zhao was the girl beside her who had been talking in a very orderly manner with clear thoughts. She was very tall, almost 1.8 meters.

But she did not make as much fuss as her companions.

"Don't worry about that, I just heard some of your words. I'm more interested in following you guys and listening. If possible, I'll continue listening at the side."

Wu Tian quickly raised his hand to show that he didn't mean any harm.

"Sister Zhao ..." Although this was a game, the two girls were still quite vigilant.

The tall beauty carefully chilled Wu Tian and patted the shoulder of the sister beside her.

"It's fine, he doesn't look like a bad person."

Wu Tian was touched. Being able to gain the trust of others is a very good thing.

"Thank you. Actually, I just heard what you guys said. Are you guys professional gamers?"

"What's wrong, what does this have to do with you?" The shorter girl still did not let down her guard and eyed Wu Tian like a tiger. She kept having the feeling that this guy was spying on their privacy.

Wu Tian smiled in embarrassment. He also knew that it was very easy for others to misunderstand him like this.

"I'm sorry, I forgot to introduce myself. Actually, I'm also a relevant employee in this area. When I heard that this game was released, I rushed over to see what was going on. I think our assessment is very pertinent. "

Hearing Wu Tian's words, the two girls finally felt a little relieved.

"So that's how it is. Hello, I'm Song County's County Leader, Zhao Yaqian. Both of us are graduates of the Software College." Once the short girl let down her guard, she could quickly change her attitude.

"Hello, I would like to hear some thoughts about this game, if possible." Wu Tian originally wanted to say his name, but after thinking for a bit, he quickly shut his mouth.

"Actually, there's nothing much to say. The production of this game is actually quite excellent. I can tell that it's really produced by a big company. The quality is definitely guaranteed."

Zhao Yaqian briefly explained her views and thoughts. This sort of thing was something that only the layman would look at for the fun of it.

Those who didn't know felt that this game was very good, that everything was amazing, but to those who were familiar with the game, this game still had many flaws.

"Such as?"

Wu Tian narrowed his eyes. He already liked Zhao Yaqian a little. She was definitely a talent.

"The engine used in this game is definitely one of the best in the world, but this is way too focused on the performance of the pictures, ignoring the physical details and effects. Instead, some parts of it look fake."

With that, Zhao Yaqian gave a simple example. She stretched out a finger and pointed at the clouds.

"Normally in our world, the clouds in the sky are formed by water vapor, so there would be all sorts of shapes, and what we have in the sky right now is clearly a map. No matter how real it is, it still seems fake."

Wu Tian had a deep understanding of Zhao Yaqian's words.
