

Hidden Billionaire Chapter 877 - To Sell to the Army

C877 To Sell to the Army

The investigation of the Public Prosecutor's Office had passed, and it was fortunate that they were alright.

The follow-up work was also steadily progressing, but there was no particularly good news.

After Wu Tian woke up, he would enter the game to train and find a way to defeat that 11 Devils. Lili would sometimes be with him, but most of the time, Lili would be outside to gather information.

Wu Zaibin, who had been busy outside, suddenly returned to the company. During this period of time, he had been running back and forth between the research and development department and the launch base.

"This is exhausting me to death!" The moment Wu Zaibin entered the office, he collapsed on the sofa with a tired expression. It was as if he lost all spirit.

"What's wrong? How is the task I gave you going?" Loong Yun didn't really care about this guy, she just cared more about her own project.

The thing that was given to Wu Zaibin to do was to develop the surveillance satellite that they were so short of right now.

Loong Yun really needed this item right now. Otherwise, she would have felt that there was a huge flaw in the company's security capabilities.

"Let me rest for a bit, don't you see that I'm very tired ..." Wu Caibin was out of breath now. Just the words he said were enough to make him gasp for breath.

"I don't have that time to listen to your nonsense." Loong Yun's attitude could be said to be extremely vile, but he remained unmoved.

Wu Zaibin didn't have any other choice but to take out the folder that he carried with him and take out the design manuscript of the research and development department.

"The design is already out. In order to speed up, I want to use all the available equipment."

In short, it was all for the sake of speed. In any case, the most urgent matter now was to solve the problem of whether or not there were any problems.

I'll wait until later to think about quality.

"That's great! If you can pass the test, quickly ask them to produce it. "

Loong Yun finally showed a rare smile on her face. She had to admit that she had brought him some good news.

"Alright, alright. The production is already continuing and we've pretty much finished buying the accessories by now. If we're fast, we might be able to launch them in a day or two."

Wu Zaibin wiped off the sweat on his forehead, then took a glass of water from Loong Yun's hands and gulped it down.

"It's best to do this a little faster! The faster the better! "

Loong Yun was still a little unsatisfied. It seemed that she would only feel the same after the whole time had passed.

"It's fine if you just let me work, but our engineers are already working overtime overnight ... You should at least let them rest for a while. "

At this moment, Wu Zaibin couldn't help but complain for the rest of the people in his company. The way of governing a company like Loong Yun was really too stingy.

She only makes her own demands, regardless of how you handle the situation, regardless of the difficulties you encounter.

It had to be said that during the period of time when Wu Tian was injured, Wu Zaibin felt an unprecedented heavy pressure on him.

"Alright, alright, stop talking nonsense and get back to work."

Loong Yun didn't even bother to listen to what he had to say. She waved her hand and was about to chase him out ...

Wu Zaibin was still yelling. He hadn't even seen Wu Tian's face and was kicked out. It was too miserable.

"I haven't seen President Wu yet, how is he injured?"

"He doesn't need you to worry about him for the time being. After this matter is over, there will be a lot of things waiting for you. "

When ordinary people hear their work is busy, they may feel that this is a good opportunity for them to earn money.

However, Wu Zaibin's only thought was that he wanted to have a good rest.

However, this was obviously unlikely.

The effect of the medicine that Loong Zaian made for Wu Tian was very good. It would only take a few days for his wounds to heal.

The key to Wu Tian's injury this time was his internal injury, which also included the fracture of his ribs.

The healing speed of these injuries wasn't that fast, it wasn't something that Wu Tian could deal with just by taking medicine.

Fortunately, Wu Tian had once been a person who had trained before. His physical condition and quality were all much better than that of an average person.

The healing speed of his bones was astonishingly fast as well.

"Dad, how is President Wu now?"

Loong Zaian had just finished checking on Wu Tian when his daughter, Loong Yun, dragged him to the side and questioned him in detail.

Like the police interrogating a prisoner, Loong Yun couldn't wait to ask everything Loong Zaian knew.

"The bone problem should be solved in a week or two. But now that you can get out of bed, it doesn't matter if you do something less strenuous. "

On the whole, Loong Zaian's attitude was rather optimistic, which made Loong Yun heave a sigh of relief.

At least he didn't go in a bad direction, so Wu Tian would sooner or later return to his previous state.

"That's good."

Loong Yun nodded thoughtfully. Recently, she didn't want Wu Tian to get out of bed. He was too bored.

She turned around and was about to tell the news to Wu Tian. Unexpectedly, Wu Tian had already secretly listened to them and got out of bed after putting on his clothes.

"Hurry up and prepare a car for me. I'm going out right now."

Before Loong Yun could say anything, Wu Tian had already arranged everything.

Since she had no way to say anything, she could only nod in agreement.

Wu Tian's face was full of excitement. He had been planning for the past few days, and now he could finally do it.

The car was prepared very quickly, but Loong Yun was puzzled as to what Wu Tian wanted to do.

Earlier, he had said that he had thought of a new way to make a fortune.

Could it be that this was the purpose of this trip?

"President Wu, where are you going?"

Loong Yun had a strange expression on her face. Wu Tian had been acting very secretly on this matter, so she didn't know what he was planning.

"This time's matter must be kept completely confidential! You drive the car yourself! "

Wu Tian didn't want to arrange a driver, so he just told Loong Yun to follow him.

"It's just the two of us, could it be that we're not safe ...?"

Loong Yun was a little worried. What happened before was still fresh in her mind.

"It's fine, there won't be any problems where we're going this time!"

Wu Tian patted his chest and guaranteed that if others knew where he was going, they would definitely agree with him.

The car started moving quickly. Wu Tian held a piece of paper in his hand and passed it to Loong Yun.

After asking her to drive to this place, Loong Yun took a look and immediately frowned.

Because it was shockingly written, "The address of a certain military region in S City ..."

"President Wu, what are you doing?"

Loong Yun thought Wu Tian was going to sell the munitions from the military factory ... But this sort of thing, wasn't there someone specially responsible for it?

"This time, we've made a new discovery that can greatly improve their training and exercise abilities. I believe we'll definitely be able to make money this time, even big money!"

Wu Tian said excitedly. It wasn't that he was talking nonsense, but that he had already finished his product.

Loong Yun was not sure how Wu Tian's confidence came about. However, she still drove him there skeptically.

When the two of them were at the entrance of the military sector, they were naturally stopped by someone.

If it wasn't for Wu Tian giving him some passes from the military factory, he estimated that it would be difficult to get in here.

Seeing Wu Tian's ID, the sentry glanced at him vigilantly and told Loong Yun to stop the car.

"You guys wait here, I'll go make a call and notify them!"

After saying that, the sentry rushed back to his duty station and started to call his superior.

Very quickly, a message came from inside and let Wu Tian pass.

Driving into the military camp, Loong Yun had seen much of the world, but she couldn't help but start to get nervous.

Many people who came and went looked at the car. They didn't know what kind of car it was, so they were very alert.

Hidden Billionaire Chapter 878 - Blasphemous Boast

C878 Blasphemous Boast

Coming out to receive them, they were very energetic officers.

Wearing a pair of glasses, he was standing in front of the office building, waving at Loong Yun and the other two.

To be honest, this officer seemed very friendly and amiable, but he did not look like someone who did not have a smile on his face at all.

"Are you President Wu, who called?"

Wu Tian quickly got out of the car and shook hands with him. The two of them were very happy to meet.

"That's right, that's right!" "This time, we have something good for you. We want you to experience our new product!"

The military officer also had a bright smile on his face as he nodded repeatedly.

"Alright, let's talk inside!"

This officer was actually not the commander of any unit, but was instead a cadre in charge of logistics.

There weren't many people coming and going in the building, so it was very quiet.

From time to time, they passed by some offices. From the outside, they could see that the people inside were working seriously, so they didn't make a sound.

The atmosphere here was unusually solemn and oppressive. Perhaps this was the characteristic of the army.

Wu Tian didn't dare to say a word, he could only follow behind this officer.

The two of them arrived at the elevator. When the elevator door opened, there was a military man who looked like an iron tower standing inside.

He was wearing a training uniform and his muscles were bulging. At a glance, it was obvious that he possessed explosive strength.

Just the impact of his body made others feel that he was invincible.

"Director Fan, who are these two?"

The burly soldier looked at Wu Tian and Loong Yun and asked with suspicion. He felt that they were very unfamiliar.

"Captain Luo, they are the representatives from the factory, they are here to discuss the cooperation."

Director Fan was very polite to this Captain Luo, as if he was his superior.

Captain Luo nodded as if he was deep in thought. Then, his eyes fell on the pass hanging on Wu Tian's chest.

"Didn't we give up on that military factory already? Although the quality of the products they produce is not bad, but in terms of performance and price ratio, they cannot be compared with other factories! "

As the commander of the special forces which attracted the most attention in the military sector, Luo Huaicheng had a better understanding of these weapons and equipment than anyone else.

Their Special Forces especially demanded more in this aspect. They not only wanted the best things from the company, but also wanted them to give a very good price.

Wu Tian's military factory was rejected under such circumstances.

"But this time, President Wu said he came prepared. So, I also want to see what exactly they can provide."

Director Fan hesitated for a moment, but when he remembered that Wu Tian was still behind him, he couldn't say anything bad about them.

"If you have any doubts about our products, you might as well come and experience them yourself."

Wu Tian was full of smiles, he wasn't affected by Captain Luo's questioning at all.

Captain Luo snorted contemptuously. He probably felt that Wu Tian did not know his limits.

"Great!" Then I'll follow you! If you can't do it, then don't come next time! "

Although Captain Luo was not in charge of purchasing, his comments could be said to be very instructive.

Director Fan wiped the sweat off his forehead. He probably didn't expect things to become so troublesome.

But soon after they exited the elevator, Director Fan led the two of them to an equipment showroom.

"This place is soundproof, and there is no surveillance. You can rest assured that the secret will not be leaked out."

Director Fan closed the door as he spoke. Loong Yun looked around cautiously and found that there was indeed no surveillance equipment at all. The walls were also thick sponges.

"With you saying that, I'm obviously relieved. I'll prepare you in advance. The item I brought this time was not our conventional weapon, nor was it our conventional equipment. "It's a revolutionary invention that transcends all other ages!"

Wu Tian's words were extravagant, but Captain Luo on the side had a look of disdain in his eyes, as if he felt that this guy was just a mean businessman who only knew how to boast.

"Say so much, bring out some real items!"

Captain Luo said impatiently. He looked at the two people who didn't seem to have any boxes on them. Could it be that the things were in their pockets?

Wu Tian smiled and nodded at Loong Yun.

Loong Yun placed a small suitcase that she had been holding in her hand on the table in front of her.

Then she opened the box and found a camouflaged Kaleidoscope inside.

Director Fan and Captain Luo both looked inside, seeing that thing that looked like a big hairpin. They looked at each other and didn't know what it was.

"Let me make an introduction. If you keep an eye on the latest news, you should know that this is a product that our company is proud of! The brainwave game's device — — Kaleidoscope. "

As Wu Tian was enthusiastically introducing, Captain Luo suddenly interrupted him.

"We are in an army camp! It was the army! Are you using this to fool us? "

Captain Luo's face was filled with anger. He only felt that Wu Tian was joking with him.

Director Fan did not look too good either, but he could not lose his temper like Captain Luo.

"President Wu, we are here to purchase military equipment. Aren't you bringing these over to cause trouble? Soldiers don't have the time to play games! "

Wu Tian seemed to know that they would have this kind of reaction, so he didn't panic.

"I'm not done speaking yet. Don't be anxious. Let me finish introducing this thing."

"Alright, I'm not interested!" I still have things to do! Director Fan, from now on it's better to not bring these types of people back. "

Captain Luo looked at Wu Tian in disdain and turned to leave.

"This is a device that can allow you to perform a 100% accuracy training exercise. If you don't want it, then just pretend that I didn't say anything."

Wu Tian's words suddenly stopped Captain Luo.

He was in such a hurry because he wanted to see one of his team members.

He had been injured in training and was now lying in the hospital.

This was a common occurrence for any unit because training wasn't a guarantee that they wouldn't be injured or threatened.

But because of this, they couldn't bring out their real weapons during the exercise.

If they could not simulate the most realistic battlefield, then training alone would not be enough to train these soldiers to have good psychological qualities.

One had to know, if there really was a war, the ones that would be sacrificed the most would usually be the new recruits.

Hidden Billionaire Chapter 879 - Trial

C879 Trial

Wu Tian's words hit their sore spot directly.

Captain Luo suddenly stopped and turned around to stare at Wu Tian.

"Is what you said true?"

"You guys come and experience for yourselves whether what I said is true or not!"

Wu Tian handed the Kaleidoscope in his hands over to Captain Luo.

Although he hesitated for a moment, but after some thought, he realized that this thing might really change their training greatly. Thus, he decided to accept it calmly.

Loong Yun hurried over to help Captain Luo wear it, while Wu Tian and Director Fan also helped each of them to wear it.

They entered the game space that was specially prepared for this demonstration.

As the game space was custom-made and didn't require large-scale networking, the physical effects and pictures inside were extremely realistic.

If they hadn't been so dead set on the details, it would have been easy to confuse this place with the real world outside.

"This ..."

Director Fan's eyes were wide in disbelief. He had never thought that today's technology could already achieve such a feat.

Although Captain Luo didn't say anything, the excitement in his eyes could still be seen.

Wu Tian pointed at the weapons on the ground, smiled and said, "Our device and system are all custom-made for the army. You can set the enemies and set the scenes as you wish here. It can support up to 1,000 people online at the same time. "

It could accommodate a thousand people, so it wouldn't be a small thing to say.

Captain Luo waved his fist and moved his body a bit. He found that this virtual body seemed to be more agile.

He picked up a gun from the ground, pulled the bolt, and aimed.

He fired a few shots at a distant tree.

No matter if it was the fireworks fired by the gun or the trees in the distance, everything that the game world displayed was extremely close to reality.

If there was anything wrong with that, it was that the body's performance was not as perfect as it was now.

Simply put, it didn't seem like the experimenter needed strength to do anything. Moreover, if one was injured, the experimenter would not be able to cause pain.

Although their hands and feet could move, they couldn't feel anything.

"Captain Luo, if what President Wu said is true, then we can conduct a lot of exercises here."

Director Fan said with a bit of excitement, this was really a cross-era invention.

Later on, the army's training and exercises would be carried out in accordance with the preconceived plan.

There was no need to worry about the soldiers getting injured, much less the casualties from the exercise.

As long as the real environment of the outside world was repeated in the game, there would be consistent training results both internally and externally.

"It feels alright ..."

Captain Luo kept silent for a long time before he finally said something.

Wu Tian couldn't help but laugh when he saw Ye Zichen's reaction.

"Our current development of this item is not particularly perfect, but in the future, it will definitely become more and more realistic."

What Wu Tian said was true. Even though the simulation was quite good, it didn't meet Zhao Yaqian's requirement of 10%.

It is mainly because of the server's problems that the simulation of this situation is very burdensome for the server.

"Although the feeling is not bad, but in the end, it can't be a substitute for training in the real world!" Although Captain Luo had just praised this thing, he immediately started to talk about other shortcomings.

"Captain Luo, you can't put it that way. This thing is more like a test device and a tactic to train you. It can't replace real training, but we can train the soldiers' battle awareness and combat experience."

These things couldn't be found in the training grounds. Only if they had been on the battlefield would they understand.

Wu Tian felt that he had said enough.

Whatever was left to think was up to them, and he wasn't the only one who could advise them.

At this time, Director Fan was already staring at Captain Luo with shining eyes, intending to listen to one of his suggestions.

If he said yes, then the matter could basically be settled.

"Can you give me a hundred sets first? I'll be holding a drill right now, so I can have two squadrons under my command, one of them is using traditional methods, and the other one is using a method like yours to see which one is stronger."

Captain Luo rolled his eyes and came up with a good idea.

"Captain Luo, this isn't good, we have to pay a lot of money for a hundred sets."

Wu Tian was slightly unhappy. How could there be such a situation in the business. Not only was he not sure if he should buy it, he also wanted Wu Tian to provide such a large amount of test items.

"But if we don't carry out this test, how can we possibly buy it on a large scale?"

Captain Luo seemed to insist on this point. He looked at Wu Tian with a smile and wanted to persuade Wu Tian.

Wu Tian was actually quite conflicted. The cost of a set of Kaleidoscope was almost two thousand yuan.

Just this alone was worth two hundred thousand yuan. The main problem was that the pressure on this server was too great.

If it was to rent a server from outside, Wu Tian was worried that his data would be stolen.

"I can provide you with these! However, there is one thing that we must agree on in advance! "

Wu Tian gritted his teeth and decided to negotiate with him.

"Go ahead."

Captain Luo crossed his arms and smiled at him.

Although this guy was the captain of a special forces squad, in terms of bargaining, he was not inferior at all.

"We can't provide such a large server. You'll have to figure it out on your own."

Wu Tian said indifferently. This condition did not seem to be too excessive.

After Captain Luo heard this, he turned to look at Chief Fan.

"Can we solve this problem?"

Chief Fan quickly nodded. "Last time when we were playing the game, the server used was still here."

"Alright, let's use it!"

Captain Luo immediately came to a conclusion, his speed was extremely fast, he did not hesitate at all.

"So, prepare 100 sets of equipment for us as fast as you can. We only have two days. If the troops trained with you fail during the training in two days, then I'm sorry, we won't be able to buy your thing."

Captain Luo's conditions could be said to be very harsh, but Wu Tian had no reason to refuse.

"Alright, let's make a deal then!"

Wu Tian also smiled. He wasn't an idiot. The reason he decided to make a lot of money this time was because he had some skill in it.
