

Hidden Billionaire Chapter 893 - The Person Behind the Curtain

C893 The Person Behind the Curtain

After comforting the group of people for half a day, Wu Tian finally understood the gist of it from Hong Xiangtai.

"In other words, you are the notification that the Korea Empire has given to you, requesting you to return and take over?"

Wu Tian frowned. The government of this Korea country was a little too inhumane.

Now that they saw that Wu Tian's company had improved, they immediately used various methods to establish a reputation and requested for these people to go back.

It didn't matter whether they were willing or not, they would still use some methods to ask for it.

"President Wu, we don't want to do this, but they said that if we don't go back, they will consider going back to the crime of divulging our national secrets ..."

Hong Xiangtai also had a look of helplessness on his face. This matter had already been communicated to him long before the rocket launcher.

In order to make this mission a success, Hong Xiangtai kept it a secret and didn't mention it to Wu Tian.

Now that the project was successful, Hong Xiangtai couldn't continue hiding it anymore.

Currently, Zhixing Technology Company was overbearing outside, desperately squeezing Wu Tian's market and space. Moreover, the people inside him, led by Hong Xiangtai and the others, were planning to leave ...

It was really a predicament for foreign and domestic affairs. Originally, everyone had been optimistic about this matter, but now it had actually turned into such a situation.

"Since that's the case, I'll approve it."

It wasn't that Wu Tian didn't want to think of a solution, it was just that he could not fight against an entire country with his own strength.

Using such a method to threaten these engineers on the side of the Korea, it was clear that they were planning to steal from him.

The only thing Wu Tian could do was not to be stopped and let the engineers go back early. This way, it would be too demanding.

"President Wu ..."

Hearing Wu Tian agree so easily, Hong Xiangtai and the others also felt upset.

Of course, Wu Tian also knew that these engineers didn't wholeheartedly want to leave him. They didn't want to leave this environment.

However, things were just that difficult. Their destinies were just small boats floating in the sea. They could only drift along with the waves.

"Just do what you need to do. Try your best to do the handover well ..."

Wu Tian rubbed his temples. He just wanted to calm down and do nothing.

As Wu Tian watched the group of people slowly retreat from his room, he immediately felt a sense of loss coming from all directions.

He had put in so much money over the course of half a day, but now it seemed like he was helping someone else.

His own engineer was taken away at this moment. Wu Tian never would have thought that such a thing would happen.

Although Wu Tian was already prepared before, he wanted to slowly replace these engineers from Korea.

After all, their instability was too great. In the long run, it would not be worth it.

However, this matter was too sudden, Wu Tian had no way of accepting the consequences of leaving the sect in such a large number of people.

After thinking about it, Wu Tian could only call the military factory's Superintendent Wang.

Let him arrange for some people to take over the space department.

Actually, without the technical support from the military factory, Wu Tian's spaceflight department wouldn't have made such rapid progress during the launch of the rocket.

Just that, why did the Korea Congress ask for their engineers to be withdrawn at this time, it was obvious that this was not a coincidence.

"President Wu, should we investigate this matter properly!"

Loong Yun's voice came from behind. Wu Tian thought he was alone in the room, but he didn't expect Loong Yun to be there too.

"You go ahead and check. I have my suspicions that there are people behind this as well."

Otherwise, why would they let Wu Tian get off work at this crucial point?

Hong Xiangtai also said just now that the Korea had already transmitted over before the mission was launched.

In other words, if there was someone behind the scenes, they didn't want Wu Tian to succeed in this mission at all.

Luckily, Hong Xiangtai was able to withstand the pressure and completed the rocket launch this time.

"If we can guess correctly, if we fail this time, Zhixing Technology Company would be the biggest benefit for us."

Whoever had the most motivation to do this would undoubtedly be this group of people.

Loong Yun had initially been keeping a close eye on the company. However, they had made it so watertight that she could not find any flaws.

Wu Tian agreed with Loong Yun's words. He nodded slightly as if he had thought of something, and gave Loong Yun an order: "You need to pay more attention to the relationship between this Zhixing Technology Company and the people from the Britain."

"Okay, so this matter and the people from Britain are also ..."

"We had better be mentally prepared. Based on the information I have, the techniques used in this Zhixing Technology Company should all be mature skills of the people from the Britain. "

Wu Tian didn't say how he got the information, but Loong Yun wasn't stupid.

Last time, Wu Tian went out and did something, but he still hasn't said it.

"If that's the case, then it seems that a certain amount of capital has indeed entered the S City recently. Mecca Company has a new shareholder, who seems to be a consortium's. "

Loong Yun quickly thought of other things. If these random things were put together, they might be setting up a big trap for Wu Tian.

"It seems like they want a lot of things ..." Wu Tian was also surprised when he heard the news. From the looks of it, they clearly came in full fury.

That was what was said, but Wu Tian's competitive market had actually undergone a structural change. Zhixing Technology Company could be said to be Wu Tian's only competitor.

Even if the spaceflight industry was defeated, Wu Tian's Wu Group company would still continue to develop steadily, because the current Kaleidoscope sales were just too great.

It had already far exceeded Wu Tian's expectations. Even at their peak, they were selling 1 million sets per day ...

It would not be an exaggeration to say that such a department could support the business of a company.

Putting this matter aside, Wu Tian could be said to have spent an extremely conflicted night.

On the second day, he finally got some good news.

Wu Group Corporation's reputation in society had already received a huge boost.

They had truly fulfilled his own promise and were working hard to develop the space technology. This caused the people who wore tinted glasses to begin to slowly change their thoughts.

Hidden Billionaire Chapter 894 - Talk about Conditions

C894 Talk about Conditions

This time, he had changed everyone's opinion of Wu Group Corporation. The success of these two consecutive rocket launches was sufficient to prove the strength Wu Group Corporation possessed in this area.

There were even many people who wanted to come over to talk about cooperation with Wu Tian.

Of course, there were also some big bosses among them. There were even some who found Guan Ruonan and wanted to contact Wu Tian through her.

However, Wu Tian was in an extremely bad mood, so he didn't want to bother with anyone right now.

"President Wu, the front desk said that a few more people came to visit you. Aren't you going to meet them this time ..."

Loong Yun looked at Wu Tian. Wu Tian looked listless and tired. It was obvious that he hadn't had a good rest that night.

"I won't meet them! Now that we're all in this state, how could we possibly cooperate with them? "

Wu Tian felt very uncomfortable. After all, these were all money. They were all his customers, yet he had cruelly rejected them one by one.

"I got it. I'll find a reason first and say that you're not feeling very well."

Loong Yun knew what Wu Tian was worried about, and she also knew that this matter would not be resolved easily.

Geniuses were not so easy to obtain, it was very difficult to recruit decent spaceflight talents for China.

Because most of them directly enter the country's R & D institute, they naturally looked down on private companies like Wu Tian.

And the people they could hire were definitely those with poor skills or those who didn't know anything at all.

For this kind of situation, Wu Tian could only spend a large amount of money to nurture them. However, in the short term, there was no hope for him to launch another rocket.

However, Wu Tian had already taken Cui Yongji's money. Now, this money became a hot potato in his hand.

This made Wu Tian very uneasy.

"Wait a moment!"

Seeing that Loong Yun was about to leave, Wu Tian quickly stopped her.

"President Wu?"

"Let's go out for a while!"

Loong Yun agreed immediately. This time, she wasn't as cautious as before and asked Wu Tian to stay in the company and not go anywhere.

The two hurriedly made preparations. As there were a lot of people gathered at the front door, wanting to see Wu Tian, the two of them avoided the main door.

Loong Yun brought him directly to the underground parking lot and quietly got into an unremarkable car.

Their car headed straight for the military sector. Last time, Wu Tian brought a Kaleidoscope to sell, but this time, he brought nothing with him.

As they had already gone to the military sector once, when they came back last time, Director Fan also requested a pass for Wu Tian.

The inspectors simply checked their cars and let them go.

This time, Wu Tian found Director Fan easily.

"Why is President Wu looking for me today?" Did you guys get some new equipment? "

Wu Tian nodded, but then shook his head.

"I do have some new equipment, but I'm not sure if you guys really like it, but this time I have some things that I want to work with you guys on."

During the negotiations, no one could see the worry on Wu Tian's face. It had to be said that Wu Tian did pretty well on this point and his expression management was almost invulnerable.

Director Fan hesitated for a moment, but agreed without hesitation.

"No problem with that, let's have a chat later." Do you need me to call Captain Luo over? Coincidentally, they just came back from their mission, so they should have nothing to do. "

Director Fan secretly winked at Wu Tian and muttered to him.

"I heard that this time, the effects are very good. Captain Luo even secretly praised the Kaleidoscope you guys recommended before."

Hearing this, Wu Tian's mood also improved a little, at least this business was going well.

"That's all thanks to Director Fan's recommendation!"

The atmosphere between the two of them was harmonious, continuing all the way until Captain Luo arrived.

He was very excited when he came in. Although he had just finished the task, there was no sign of fatigue on his body.

"I was just looking for you, so you came."

Captain Luo saw Wu Tian from afar and shouted at him.

"Stop shouting, I can hear you from eight hundred miles away!"

Director Fan quickly called Captain Luo over, preparing to discuss about the Kaleidoscope.

"As long as you are satisfied with it, I am at ease. I am very proud in my heart, but I never thought that we could also contribute a little to the cause of national defense."

Wu Tian's happiness this time was from the bottom of his heart.

"Not bad, not bad. But your price cannot be too high!" Our budget here is also very tight!

"

Although Captain Luo praised him, when it came to business, especially when it came to the price, he would insist on his principle.

"Don't worry!" I guarantee your satisfaction. "

Wu Tian said confidently. He already had a solution.

"It's like this. At the current stage, we plan to purchase this kind of equipment for Captain Luo's special forces. When the effect is good, we will slowly promote it throughout the military region." But I'm afraid it will be a year or two. "

Director Fan explained from the side that even if they did have money, it was impossible for them to spend it all at once.

Moreover, the military needed to slowly figure out how to use this new training method to get the best results.

"That doesn't matter, how many sets do you need now?"

Captain Luo rolled his eyes and stretched out a finger.

"A hundred? A thousand? "

Wu Tian was guessing, he didn't know how many people Captain Luo's special forces had.

However, if it was Special Team, most people would think that there were not many people.

"10,000 sets!"

Captain Luo slowly said a number that surprised Wu Tian.

What was the concept of ten thousand machines? If everyone got one, then this number would be enough to equip several teams.

"So many? "Alright!"

Wu Tian's expression didn't change much, and he happily agreed.

Although their production capacity was tight due to the excessive sales outside, even if they needed to reduce the normal sales, they still had to give priority to the army.

Countless of substitute factories were working day and night. Even so, as long as the machines appeared in the market, they would be immediately sold out.

"Then this price ..."

Director Fan finally began negotiating the price. With the amount they needed, lowering the price by 30% shouldn't be a problem.

Wu Tian smacked his lips, touched his chin and said something that was beyond the imagination of these two people.

"I will provide these facilities to you free of charge. "However, I hope that you can do me a favor."

Hidden Billionaire Chapter 895 - Redoubling of Temptation

C895 Redoubling of Temptation

Captain Luo and Chief Fan's underlings were stunned.

They had come in contact with quite a few sales staff of the military factory, and Wu Tian was probably the first one to offer conditions like this.

Ordinary people rarely made any special requests to them. After all, the nature of the army was very special.

And the army, to be honest, had nothing to give them. There were many things here that ordinary people could not use at all.

"No, I'll tell you in advance. We won't do anything that violates the law, especially since our military discipline is very strict!"

Captain Luo said righteously. He looked vigilantly at Wu Tian. Was he planning to do something bad when he got home?

"Right, let's see what you are proposing. We have our rules, so this purchase can't be bound. You can't ask us to bind and buy other things just because we want to buy something like you."

Chief Fan also chimed in on the side. They all probably felt that Wu Tian wanted to give his military factory some sales information.

Wu Tian smiled and pointed at the sky.

"It's like this. You must have heard that my company is involved in the aerospace industry, so I hope that you can help me introduce it or recruit some retired astronauts."

With regards to this request, Captain Luo and Director Fan looked at each other, unable to figure out the meaning behind Wu Tian's request.

"No, we haven't had any contact with these people either, right?"

Director Fan immediately expressed his helplessness.

Wu Tian didn't say anything after hearing that. He just looked at them with a smile.

They did not refuse, nor did they agree. This meant that the temptation was not strong enough.

However, Captain Luo didn't say anything on the side. He hid it well, but the expression on his face couldn't escape Wu Tian's observation.

Soldiers were not as active in this area as business people, so Wu Tian had a lot of advantages in such negotiations.

"You don't need to be in such a hurry to come to a conclusion. I still have a present for you."

Saying that, Wu Tian took out the video in his hands, which was the scene of them fighting against Tianying Sect in that abandoned factory.

Captain Luo grabbed the laptop and stared at the scene on the screen. His eyes were locked on by the exoskeleton Battle Mechas worn by those people.

Many of them looked like retired soldiers, and their military actions were very standard.

However, due to the help of the exoskeleton, their physical fitness had greatly improved.

They could easily raise their running speed to 50 to 60 kilometers, and a single jump could bring them up to 5 to 6 meters.

With such physique and conditions, it was obvious what it meant.

"Could it be that this is the item you're offering me this time?"

Captain Luo was so excited that he almost broke the iPad. He stared at Wu Tian.

He hadn't really paid much attention to this young man before. Unexpectedly, their company was already extraordinary.

"Yes, we are actually already selling this product. After a while, we might be able to get the video of the customer's actual application."

Wu Tian did not shy away from this question. It was impossible for the military to not have a grasp on these matters. They had already investigated Wu Tian's contents from the bottom to the bottom.

Otherwise, it would be impossible for them to interact and interact with Wu Tian.

This time, both Captain Luo and Director Fan fell into silence. This exoskeleton Battle Mecha was clearly going to be a trend in the future.

Even though the soldiers had to undergo very arduous training to improve their physical fitness.

However, there was still a limit. No matter how much they trained, they would never exceed the limits of the human body. However, if they were equipped with this exoskeleton Battle Mecha, they could greatly enhance the human body's abilities through mechanical means.

Do not underestimate this. During a battle, it is very possible that because of these differences, the victory will be affected.

"Let's try out a batch of these for us to experience first."

Captain Luo planned to do it the same way as the Kaleidoscope before. He also needed to get a certain amount of results in order to apply for these items from the higher ups.

After all, he couldn't possibly get the higher ups to allocate money for him to buy whatever he wanted. Their use of funds was also very strict, and each entry would be specifically checked for information on how they were being used.

"Of course, but I didn't bring it with me today. I will send fifty sets to you when I get back." These fifty sets were already at the limit of what Wu Tian could provide.

Unlike Kaleidoscope s, these exoskeleton mechs could only be manufactured in Wu Tian's military factory.

It was impossible for him to give them to someone else to make them for him.

Thus, the production rate was limited, and if it was necessary, Wu Tian planned to withdraw the Security Team's equipment first, giving priority to the army's needs.

"Alright!"

Captain Luo was already excited. He really wanted to see the exoskeleton mechs right now. With this equipment, he would definitely be able to beat up his opponent in the next practice.

"However, I hope that the two of you can help me consider the matter that I mentioned before."

It could be said that everything Wu Tian did was for this purpose.

"We really can't ..."

Director Fan was just about to reject Wu Tian's request, but was interrupted by Captain Luo, who was beside him.

"We'll think about it, but there's no guarantee that we'll be able to agree to it."

No matter what, with Captain Luo's opinion, Wu Tian had a lot more confidence.

If the other side didn't refuse directly, then that meant that they had already been moved.

Director Fan might not have a way to do this, but this Luo Huaicheng could.

After both sides signed the military purchase contract with great satisfaction, Wu Tian left the military camp in high spirits.

The only thing left to do was to wait for Captain Luo and the others' news.

In terms of space technology, of course, the military was even more powerful.

Many years ago, they had already filled the space with their scout satellites.

However, Wu Tian was only betting this time. He couldn't guarantee for sure that Captain Luo and Director Fan would help him.

Firstly, they did not have this obligation, and secondly, this matter was rather risky.

After all, it sounded like Wu Tian was bribing them.

Although there was no money involved, it would be quite troublesome for Captain Luo and Director Fan if someone had set their eyes on them and accused them of breaking the law.

Hidden Billionaire Chapter 896 - It's Dangerous but There's No Problem

C896 It's Dangerous but There's No Problem

Due to the progress here, Wu Tian was a lot happier on the way back.

However, the problem had yet to be resolved. This was only Wu Tian's probing method.

The key point was that it seemed like Wu Tian would lose a lot of money. It had to be known that offering Kaleidoscope for free would cost a lot of money.

"President Wu, are we really going to provide them with equipment for free from now on?"

Loong Yun had a big question on this matter. They didn't even ask the army for the materials and fees.

Providing the products for free was equivalent to saying that they would lose money, which was not a small amount for Wu Group companies.

The most important thing was that the number of purchases made by the army had always been huge. Several thousand or even tens of thousands might not mean much, but once this item was promoted ...

that they might need to provide hundreds of thousands, millions of products for free...

Wu Tian nodded. This matter was not just about losing money.

"That's right, for free! Even if we have to lose money, we have to do it for free! "

Wu Tian had already thought about it. Of course, things were provided free of charge, but when it came to debugging and maintenance, it was no longer free of charge.

"Can we afford it?"

Loong Yun was a little worried. The company that was getting better was now in a crisis, so they definitely could not let their guard down.

They should not miss such a good opportunity to make a profit.

"Don't worry, it won't be a problem." "As long as we can do this thing well, everyone will know about it and we will definitely get the support of the citizens. At that time, it will be impossible for our company to close down even if we want."

Wu Tian was optimistic. As long as he could establish a good relationship with the army, his company could rely on this to survive.

Furthermore, this Kaleidoscope could not only be used to play games, it could also be used to train the army.

For example, in other places, activities that were inconvenient to carry out in the real world could be carried out in Kaleidoscope s.

For example, the training of medical students, even the training of pilots, the training of driving schools and so on...

They could all use a device like the Kaleidoscope to simulate reality.

Loong Yun understood immediately when Wu Tian explained these things.

It was also because she lacked in consideration that focusing on the immediate benefits was not enough.

"In other words, we can treat this as a huge marketing advertisement!"

In fact, this was also an important part that Wu Tian had thought of. With the army endorsing them, it would be easy for them to sell this Kaleidoscope.

The two of them spoke with relish, but very quickly, the sound of an alarm rang from inside the car.

Wu Tian had never heard this voice before, he was still curious.

"This is bad!"

Loong Yun exclaimed and quickly took out her laptop. Inside the laptop, there was a map showing their location. There was a giant red dot quickly approaching them.

"What is this?"

Wu Tian looked over curiously, but it was too late for Loong Yun to explain. She quickly tried to brake the car.

She opened the car door and pulled Wu Tian away.

As soon as they left the car, the car was knocked several meters away by something.

The front engine room of the car was badly deformed by the impact.

If the two of them had still stayed in the car just now, they would have already been crushed into meat paste.

"What's wrong!" Wu Tian looked at the scene in front of him and immediately panicked. However, his gaze quickly fell on the person that crashed into the car.

He knew this guy, and he was also a member of the 11 Devils.

"Looks like our system is really working!" Loong Yun was both anxious and happy. This proved that her decision to launch the satellite was correct.

"Let's run!"

Wu Tian and Loong Yun both turned around and ran. Beside them were a bunch of low houses. The streets were filled with alleys and only two or three people could pass through. Normal cars wouldn't be able to get in.

They ran into the alley and soon disappeared.

They didn't know how far they had run. Wu Tian and Loong Yun stopped at a corner of the street and looked around to confirm that there was no trace of the enemy.

Loong Yun opened her laptop and looked. The red dots on it were very far away from them. For the time being, they should have escaped danger.

"What's going on? Why do you know that enemies will attack us? "

Wu Tian said in surprise. He never thought that technology had developed to such a great degree.

"Because we just launched a satellite two days ago!"

Loong Yun pointed to the sky proudly. Previously, if she had not suppressed the objections of everyone and forced the satellite program into action, they would not have received any warning before the attack this time.

Actually, the theory was also very simple. Loong Yun was using this satellite to stare at the S City.

Anyone heading in the direction of Wu Tian and the others would be deemed as a threat.

This time, the satellite easily identified the enemy. He was very fast, but he didn't change his direction along the way. He almost charged straight towards Wu Tian.

So much so that the satellite could not ignore him.

"Holy shit, is technology really that powerful?" Wu Tian couldn't help but sigh. He saw that the red dot on the screen was moving towards them again, and the number of people had increased.

"President Wu, let's retreat quickly!"

Loong Yun was not vague either. Their safety was currently the top priority.

They just met that enemy — he seemed to be the brawny guy that fought against Wu Tian at the beginning.

His unbreakable body was like a tank. It made Wu Tian suffer a great loss.

Loong Yun quickly informed Security Team to pick them up. The two of them were hiding in this small shack, and in less than ten minutes, Security Team's small helicopter arrived.

They quickly escaped. Although they didn't know how that person had found their trail, it was clear that their tracking power wasn't that strong.

It seemed that not everyone had the ability to rely on smell to locate them, so Wu Tian was slightly relieved.

However, if they did not get rid of this 11 Devils, it would still be a hidden danger. No one could endure that there would always be people who wanted to kill him in secret everyday.

Once he returned to the Wu Group company, Wu Tian immediately went to the Security Team.
