

Hidden Billionaire Chapter 933 - Meteorite Ore

C933 Meteorite Ore

The completion of this matter had made Wu Tian feel refreshed.

Wu Tian had been feeling uncomfortable for such a long time, but now he was full of pride.

As long as Elder Zhang could fulfill their promise, then the threat of Zhixing Technology Company would naturally disappear.

After all, they didn't actually have any technology of their own. They were all using someone else's technology. Without external support, they were just an empty shell.

On this day, Wu Tian hummed a tune as he scurried around the Flower Island. If anything was wrong with this place, it was too sealed off. No matter how big the island was, there would always be a time when it would be finished and it would not feel as free as it did outside.

Who knew where Wu Tian got a recliner? At this moment, he was bathing in the sun on the roof as he chatted and laughed with Shen Xue and Liu Yueyao.

Yu Naixin came over in a hurry at this moment. She sighed when she saw Wu Tian being so relaxed.

"President Wu, why are you still here? The meeting is about to start! Didn't Secretary Loong tell you?"

Wu Tian suddenly realized that he forgot about that important meeting, so he quickly got up from the chair and went to find his clothes in a fluster.

"Alright, alright, wait for me. I'll be right there."

Although he was the CEO of the company, Wu Tian never liked to be late. Not only did he not like it when others were late, he also didn't want to be late.

Seeing that there were only 10 minutes left, Wu Tian didn't have time to do anything else. He quickly put on his long pants with the help of the girls. In the meeting, he was still a bit more dignified.

This could be said to be a very important meeting for Wu Group Corporation recently, all the large and small branches and departments were almost all here.

Many of the people below were beaming with joy. It seemed that they had been having quite a good time, or else they wouldn't have been so happy.

"All of you are quite happy." Wu Tian sat on the main seat, but this time, he did not intend to be the main speaker. The most important question was still to be asked by Yu Naixin.

"President Wu, recently our sales of Kaleidoscope have started to rise again. If the legends are true and the progress is a bit faster, we can still continue to sell Kaleidoscope here."

Wu Zaibin's smile was about to reach the back of his ears. The benefits he got were great, and his body was a lot harder than usual.

"If you want our side of the development process, you have to have our good server. The server has been utilized to the maximum and the current host system is not enough for us to continue developing."

Wu Zaibin's request was immediately met with Song Junyao's protest and they used this opportunity to express their desire.

Recently, the game department could be said to be in the limelight. It was very famous throughout the company.

"That's right, the server's capabilities have been maximized. We can't continue to optimize the game." Zhao Yaqian was actually very dissatisfied with this situation. She had told Wu Tian many times before.

Wu Tian couldn't avoid it anymore, so he could only smile awkwardly, "Um, let's set up a project now. I will definitely support you in your research. Let's open a project at the institute."

Yu Naixin looked at Wu Tian. Since he had already said so, this matter had already been settled.

As soon as Wu Tian saw the project was about to proceed forward, a lot of people started to have the same idea and suggested new proposals. Wu Tian was immediately scared by this and quickly pushed the issue onto Yu Naixin before leaving in a hurry.

Coincidentally, Azure Dragon and Loong Yun, who hadn't seen each other for a long time, appeared at this moment. They didn't notice Wu Tian, so they chatted as if they went somewhere in a hurry.

Wu Tian noticed this and followed curiously. He wanted to see what the two of them were plotting.

"How's the progress? Do you need more people? Can bamboo pole manage the work there?"

Loong Yun seemed to care a lot about this and asked a lot of questions.

"Don't worry about that, I've already made the arrangements. You don't have to worry about bamboo pole. This guy could live in the abandoned factory for half a year, and he can also live in that old forest. "

Azure Dragon smiled and took out a map from his clothes. His clothes were dirty and looked like he had a lot of work to do.

"What are you talking about?"

Wu Tian's voice suddenly appeared behind the two of them, startling both Loong Yun and Azure Dragon.

"President Wu, why are you here? Didn't you go to a meeting?" Loong Yun was flabbergasted, but she wasn't nervous.

Wu Tian pursed his lips towards the meeting room and slowly said, "I asked Yu Naixin to replace me. They both came to me for projects, I really can't take it anymore. Oh right, what were you two talking about just now, sneaking around."

Hearing Wu Tian's words, Azure Dragon and Loong Yun smiled at each other and brought Wu Tian to a small room. After confirming that there was no one nearby, they slowly told him what they were doing.

"Before, I told you that we discovered a meteorite mine. That thing's material is the material of Chen Senior Taoist's metal ring, so I've always remembered this matter. This time, I took this opportunity to send Azure Dragon to investigate."

Loong Yun said as she took out the blueprint they had found and showed it to Wu Tian.

The meteorite was in a huge cave and it was probably directly smashed down from above.

"If you didn't say it, I would have forgotten. I have been busy with other matters. Can we mine this thing? " When Wu Tian heard this, he immediately became excited. He had been waiting for this for a long time.

If they were able to develop any new materials, their company would definitely be able to use this metal to become the number one company in the world.

Loong Yun nodded affirmatively. For this reason, bamboo pole was called out of the institute to be investigated together with them.

"We are already prepared to mine the ore, so we need to think of a way to deceive people."

Loong Yun was meticulous enough to know that if this item were to be leaked, it would definitely attract people's attention.

At that time, there would be countless people coveting this mine.

Hidden Billionaire Chapter 934 - Military Recognition

C934 Military Recognition

Although Wu Tian wasn't a professional in mining, he knew that this sort of thing wasn't something that could be done casually.

Normally, one needed to have a certificate to open up the mines, and then have the approval of the government.

However, it was clear that this huge meteorite mine in outer space was not within the scope of this certificate.

If he were to secretly mine it, if word were to spread out, the first person who would come knocking on his door would be none other than the government.

After thinking about it, Wu Tian could only focus his gaze on that man's figure in the end.

"I'll do it. Loong Yun, follow me to the military district."

It was easy to hide it from ordinary people, but it was impossible to hide it from the country, so it was necessary to communicate with the government.

And the best communication bridge was naturally Luo Huaicheng.

Since she knew the severity of this matter, Loong Yun did not say anything else and directly brought Wu Tian to the military base.

It wasn't their first time there either. They were already familiar with it and went straight to Luo Huaicheng's camp.

At this time, Luo Huaicheng was on the training field getting used to the new exoskeleton armor. These things were very useful for special forces like him, as they could increase their strength by several times.

"Captain Luo!" Wu Tian shouted at Luo Huaicheng from a distance and quickly waved at him.

Seeing that it was Wu Tian, Luo Huaicheng immediately smiled. In the past, he looked down on this young man, but now, Wu Tian was his VIP guest.

"Isn't this President Wu? Why did you suddenly come here? Did you get something good again?" "Hurry up and show it to me, our military is really looking forward to your new product!"

Luo Huaicheng looked curiously at Wu Tian and Loong Yun. Seeing that they didn't bring any boxes, he couldn't help but feel disappointed.

"Captain Luo, we really don't have this thing. However, I did indeed have something good to show you this time."

Saying that, Wu Tian waved mysteriously towards Captain Luo, went close to his ear and whispered to him: "We've discovered something new."

Luo Huaicheng got goosebumps all over his body as soon as he heard that. He immediately became excited as if a woman saw a new cosmetics. He was looking forward to what Wu Tian was talking about.

"Come on, let's talk inside!" Luo Huaicheng brought Wu Tian and Loong Yun into their office building. They found a room with no one in it and closed the door.

Wu Tian revealed his purpose for coming here, but Luo Huaicheng just frowned and didn't say a word.

"This is how things are. This metal material that has yet to be named has a metal property that does not exist in our world. If we develop this metal, we will definitely be able to get a great technological lead."

Wu Tian could already imagine what it would be like when they succeed, the whole world would have to submit to them.

"In the beginning, no matter how I listened to what you said, I couldn't believe you ..."
Although Luo Huaicheng wasn't a professional scientist, he still had some common sense. Wu Tian's description of many aspects of the characteristics was simply set by science fiction. Logically speaking, that should not be possible.

For example, this metal material had zero resistance and its hardness was comparable to a diamond.

Regardless of which one it was, these two properties were at the absolute peak. It was almost impossible for them to appear on the same metal at the same time.

"Don't really not believe this, we have evidence." As he said that, Wu Tian took out the video of bamboo pole taking the test previously in their hands. This was a genuine scientific test, and there was nothing fake about it.

Seeing that it was really as Wu Tian had said, Luo Huaicheng became silent. He didn't know whether he should believe Wu Tian or not.

"How about this, you leave the items behind and I'll report it." Luo Huaicheng couldn't pretend that he didn't hear it. He looked at Wu Tian as if he had brought a small bag of samples and felt that since Wu Tian was sincere, he might as well do what he had to do.

"No problem, I hope your side can do things faster." Wu Tian also agreed. The only thing left was to wait for Luo Huaicheng's news.

However, Luo Huaicheng didn't respond for nearly a week. After a week, Luo Huaicheng appeared in front of Wu Tian with a female officer.

This female officer looked very valiant and elegant. The moment Wu Tian saw her, he already felt reverence for her.

"This is President Wu of Wu Group company, he is also the person who supplies our unit with the latest equipment. "President Wu, this is our Special Response Department's senior colonel Xia Kejun."

When he introduced them, Luo Huaicheng's attitude was completely different from his usual carefree attitude. Rather, he was very respectful. When Wu Tian saw their ranks, he immediately understood what was going on.

Luo Huaicheng was the captain of Special Team, but was only a captain of one of them, so he was only a lieutenant colonel. It could be said that Xia Kejun beside him was two levels higher than him. No wonder Luo Huaicheng felt uncomfortable all over.

"Hello, hello. I'm Wu Tian. Nice to meet you. But why did you come this time?" Wu Tian vaguely felt that the opening of the mine had progressed.

"Captain Luo, please go out first. What we're going to say next is confidential!" Xia Kejun said lightly to Luo Huaicheng with a businesslike expression.

Although Luo Huaicheng really wanted to hear it, under the higher ups' request, he couldn't do anything. He could only nod in agreement and then close the door properly when he went out.

Looking at Xia Kejun, who had a strong aura, Wu Tian started to get nervous.

"What is it you want to say? Is there any progress in the meteorite mine? "

Xia Kejun put on a serious face first, "According to our country's regulations, all meteorites are owned by the country and are not allowed to be owned by private

people. "This meteorite mine also belongs to the country, so it has a very high scientific research value."

Wu Tian, who was originally filled with anticipation, suddenly felt discouraged. Did she mean that he couldn't do it anymore?

However, at this time, Xia Kejun suddenly took out a document with the seal of the organ of state power, which made Wu Tian widen his eyes.

"But in view of the reality, the military decided to build a military base in this meteorite mine as the research base for this new material. Thus, it was decided to invite Wu Group Corporation to develop it together!"

After Xia Kejun finished speaking, her serious expression immediately started to soften up. She smiled at Wu Tian and said, "This can be considered as good news."

Hidden Billionaire Chapter 935 - A Sudden Tightening Curse

C935 A Sudden Tightening Curse

Wu Tian didn't expect such a big change. He couldn't think straight for a moment.

"Mr Wu, congratulations, your company has become the first company to cooperate and develop with our military." Xia Kejun was still as heroic as ever. After hearing her voice, Wu Tian finally believed that everything they said was true.

"Thank you so much. By the way, is it okay if I use this material to make something?"

Wu Tian immediately started to have some ideas. If he could only study it, then of course he wouldn't be able to. Then it would just be a waste of time.

"Of course, we will give you a certain amount. Of course, the quantity might not be too big. After all, we have to strictly control this kind of strategic material."

Xia Kejun explained her policy to Wu Tian very clearly. After there were no more doubts, Wu Tian happily signed his name on the document, which could be considered as having reached an agreement.

Before leaving, Xia Kejun seemed to have thought of something, turned her head and said to Wu Tian, "Oh right, we must keep this matter a secret at the highest possible level ... "We are a professional department. If you are suspected of leaking information here, I'm afraid you will have to pay a heavy price."

Even though she looked like she was very young, her words made people feel that she was a menace. Wu Tian swallowed hard. How could he dare to have such thoughts?

He didn't know why, but as soon as he saw Xia Kejun, he started to get nervous. He just kept having the feeling that she knew what he was thinking and didn't try to hide anything from him.

"Don't worry about this, but I have a small request. You should also know that I have a Security Team here, and if you can give me a special certificate, I would like to equip this Security Team of mine ..." "Honestly speaking, offending too many people is a problem of safety, it's not that easy to deal with ..."

Wu Tian obviously wouldn't let go of such a good opportunity to increase his strength.

"We know what you're thinking. The people from Tianying Sect are already afraid of you to this extent. You really have no future ..." With that, Xia Kejun turned around and left, ignoring Wu Tian.

At this time, Wu Tian's face was full of shock. He didn't expect her to actually know Tianying Sect, and it seemed that she understood it very well as well.

However, thinking about it, she was part of the country, so it wasn't hard for her to know about this.

Having thought through all of this, Wu Tian started to focus his work on the construction of this military base.

Another half a month had passed. Originally, Wu Tian had already gotten used to such a normal day. Suddenly, Loong Yun walked in hastily from the outside and barged into Wu Tian's office.

"President Wu, it's bad, we received the court's ruling!"

Wu Tian looked at Loong Yun with a strange expression. This kind of thing doesn't usually need to be reported to Wu Tian.

"Don't the company have a special legal department? Just leave it to them."

"It's not that simple. This is a court order, requesting us to stop using the servers of the Britain Doyle Company!"

Loong Yun was definitely worried for a reason. If it was a small matter, how could she be in such a bad mood?

"What?" Wu Tian quickly took over the verdict and looked at the request carefully.

"This company is the branding company that we bought the servers from. Previously, Britain officials seemed to want to ban the export of this kind of advanced technology products, so we, these servers with abnormal origins, cannot continue to use it. Otherwise, it would be a violation of the rules."

This server was the server they were using to operate the legendary world. If they really shut down this server as they said, then this game would be over.

The worst thing that could happen in online games was that the server was deactivated. Even if it was just for a day, it would still have a huge impact on players.

"This is going to be troublesome. We need to hurry up and think of a way. Contact this Doyle company and see if we can negotiate or not. We can pay a certain amount of compensation."

At this time, Wu Tian knew he couldn't afford to save any more money. He didn't want to lose anything because of saving money.

"I've tried to contact them, but they don't respond at all. This plan won't work."

Loong Yun shook her head helplessly.

"Is there any other way? Are there any alternatives? Are there any other countries that have such powerful equipment?"

Wu Tian was also starting to panic a little. The higher ups had asked for only a day's time. If they couldn't solve the problem, their business would be dealt a fatal blow.

"For the time being, before our servers were developed, Doyle's servers were at the top of the world ... We don't have any alternatives to choose from. "

Facing such a monopolistic situation, Wu Tian felt powerless for the first time. His weak point was in someone else's hands. It was really because they wanted him to live or die.

Wu Tian was so anxious that he was like an ant on a hot pan. He thought of everything he could think of and even called Xia Kejun to hope that she could help. However, they were powerless in this situation, from the military to the police.

Because all their procedures are sound, and their demands are legitimate.

After a day of delay, sure enough, the court came on time.

Wu Tian's face was ashen, but he couldn't do anything about this situation.

"Hello, we are the enforcement police, supervising your execution."

Three bailiffs stood in front of Wu Tian. Although they didn't come to intentionally cause trouble, it still made Wu Tian unhappy.

"We are all China's people, don't you all feel heartache by doing this?" Wu Tian didn't have any other choice, so he could only use this kind of excuse.

Although he said that, Wu Tian was forced to take them to the game department and watch them start to back up the data step by step, shutting down the server.

"We have no other choice. The court has already accepted this matter for a long time and has delayed it for an entire month." The bailiff said there was nothing he could do. After all, it was meant to comply with the law.

It was useless to say anything at this time. Wu Tian still saw that they had logged off on the server. The legendary world had no choice but to log off at this time.

Hidden Billionaire Chapter 936 - Halfway Project

C936 Halfway Project

Since the bailiffs were already at the scene, Wu Tian was helpless about it. After all, he couldn't go against the law.

However, no matter how he thought about it, Wu Tian felt very aggrieved.

How did he become like this? Those people were just jealous that he had earned money!

The server had been sealed, but the game couldn't stop playing.

Zhao Yaqian looked at Wu Tian with grief and indignation, making him feel scared.

"That... Is there any other way? How's the development of the new server coming along? "

Since it was impossible to use someone else's server, then using his server should be possible.

"It seems like the current stage isn't too good. There's a place that isn't doing very well, and the development department is currently speeding up."

Song Junyao also had a look of helplessness on her face. If something like that happened, it meant that their game department would be completely useless.

Without the game, the players wouldn't know how much cursing would come out.

"There's no need to worry about that. There's nothing wrong with it. As long as it can be used, it's fine!" Wu Tian could only give it a try.

When they received the news, the development team led by Wu Zaibin couldn't believe that this order was true.

It has to be known that the server they developed is still in the state of a pile of components, unpackaged and stacked on the ground.

Wu Zaibin looked at the pile of items on the floor and then looked at Wu Tian, who came to check, and asked with determination, "Are you sure you want to use this?"

Wu Tian was also stunned. He didn't expect it to be this troublesome.

"This is it. We don't have to care about that anymore. Let's just take this up first. As long as it is able to ensure stability, it will be fine. " As long as he could endure for a period of time, Wu Tian would be satisfied. As for the rest, he would think of ways to quickly purchase other servers.

Since he had no other choice, Wu Zaibin could only command the others to pack up and move out.

This semi-finished product had to be put into action personally. Everyone was not sure about this, especially since this was a completely new server developed by Wu Zaibin and the others. Although its performance might not be comparable to Britain, it was still considered the best in the country.

After a long day of work, the researchers finally managed to change the server into a different room.

"Hurry up and make an identical backup and continue developing. When you get it out, we'll directly replace it."

Wu Tian had no choice but to allocate another hundred million to Wu Zaibin.

This toy was extremely expensive. One had to know that they were only buying various components for testing and assembling. If they were to develop every single one of them, they might not even be able to get out of the company even if they sold it.

There were many things that the technology of China could not reach.

For example, the A.I. Chip, or the special flash memory inside. Thinking of this problem, Wu Tian's heart ached, but if he wanted to catch up, it was not that simple, because the technology involved was not something he could catch up to in just a day or two.

It would require a large amount of investment and resources to nurture a large number of talented people.

Perhaps Wu Zaibin noticed that Wu Tian was worried about something, so he casually mentioned something in his ear.

"President Wu, there seems to be a small laboratory in the institute where a young man is researching high-performance computers. Do you want to take a look? If there's any prospects, we might be able to overtake him."

When Wu Zaibin said this, it immediately piqued Wu Tian's interest. There was still such a good project, yet it only took up a small laboratory. Could it be that no one approved of his development?

"Why didn't you say that earlier!" Wu Tian mumbled and then hastily prepared to go take a look.

Since they had this kind of talent, they naturally needed to nurture them well.

After a period of operation, the research institute that Wu Tian was building had become very prosperous.

There were many professors and students researching and researching inside, and the atmosphere was very good. It was truly an academic atmosphere.

Wu Tian and Loong Yun walked along the way and asked along the way until they found the small laboratory that Wu Zaibin talked about.

It was really a small laboratory. The room was only twenty square meters or so in size, and was smaller than an ordinary living room.

Wu Tian knocked on the door. Soon, an unenergetic head popped out of the door.

He had messy hair and his sleepy eyes were hazy, as if he had just been woken up by Wu Tian and the others.

"Who are you looking for?" The person who opened the door said lazily.

"Excuse me, is this a high-performance computer being developed?" Wu Tian asked politely. Loong Yun had wanted to scold this guy directly, but she was stopped by Wu Tian.

"That's right, what's the matter?"

Wu Tian saw that he did not find the wrong place, so he pushed open the door and was about to enter. There were electronic equipment everywhere, making it look like a trash market, just like an electronic trash heap.

And this guy had set up a stall on the floor. It seemed that he had rested here before.

"Why haven't I seen the results of your research and development?" Wu Tian looked around but didn't see the high-performance computer he had imagined. He couldn't help but feel disappointed.

"No, what the hell are you doing? "Why did you barge into my place so casually?"

Loong Yun was infuriated when she heard his words.

"What are you saying? Do you know who we are and who we are standing in front of you? "Everything here ..."

Before Loong Yun could finish her words, Wu Tian waved his hand, signaling her to stop.

"Tell me, do you have any progress here? This matter is very important to me."

The slovenly researcher could also tell that the identities of these two people were not ordinary. His eyes began to show traces of suspicion.

"There are many things here that involve secrets. Who exactly are you two? If you don't tell me, I can't say anything. "

Even though he looked a bit messy, but he seemed to insist on the principle quite well.

"Do you really want to know? My name is Wu Tian, and I'm also the chairman of Wu Group company. As I said before, we really need this research result! "

"You are ..." You are Wu Tian?! " The researcher was in disbelief. However, the aura from Wu Tian's entire body was different from that of an average person.

"How is it? Our identities have already been revealed to you. Do you have any results here?" Loong Yun was already at her limit. She didn't know what this fellow meant.

"Yes, of course there is! Otherwise, do you think that I would take up residence here and not do anything? "
