

Hidden Billionaire Chapter 937 - Fortuitous Discovery

C937 Fortuitous Discovery

The researcher pushed his glasses and combed his hair, trying to get him to look a little more tidy.

"It's like this. I have indeed developed a computer, using the latest theories. To be specific ... "It's just that the high-energy particles are ..."

This guy seemed to be full of energy. He wanted to proudly demonstrate all these theories, but was interrupted by Loong Yun.

"Alright, you don't need to talk about the principle. As long as your function is good, it's best if you can reach the world's advanced level."

The requirements of Wu Tian and the others weren't high, they were fine as long as they reached the required standard.

Unexpectedly, the researcher seemed to be unhappy.

"What do you mean? I, Li Wei, have been doing related research for more than 20 years. If the thing I invented wasn't the number one in the world, how would I have the face to take it out? Let me tell you, this computer of mine is three times more capable than the most advanced mass-produced computer in the world! "

When this messy researcher who claimed to be Li Wei said these words, his eyes were filled with pride. However, Wu Tian found this strange.

"If what you said is true, then how come I've never heard of your project before? Is there any major flaw?"

Wu Tian wasn't a fool. Of course, he knew that under all these flattery, there was something wrong. So, he saw Li Wei's expression change.

"This... "There are indeed major flaws, but I will definitely find a way to overcome them ..." Li Wei's expression immediately darkened, as if Wu Tian had pointed out his weakness.

However, he did not stay idle. From the mess, he pulled out a server console. This thing looked like a huge water tank. It seemed to really have some kind of liquid inside, and it looked like a science fiction.

Li Wei plugged this thing into the power supply and then quickly turned on the exhaust fan in the room.

"Let me show you all. I have actually already matured this thing." With that, he pressed the power switch and the computer began to react. Soon, words and pages appeared on the screen.

Wu Tian excitedly went over to take a closer look. At this moment, the liquid inside the chassis suddenly began to boil and a large amount of water vapor began to fill the air, as if a pot was boiling.

In less than a minute, the computer was out of power. The room was already filled with moisture, as if a huge fog had descended upon them.

"What is this?" Wu Tian was confused.

"This is the reason why this item is not usable yet. Its heat is too great and its energy consumption is too great. There's no good way to dissipate heat right now, so it can't work for more than a minute ..."

Li Wei opened the door and windows. It was obvious that this was not the first time he had done this.

"Not even a minute?" Such a restriction was practically a death sentence.

Wu Tian immediately became dejected. If that happened, who knows when he would be able to come up with a new computer.

"This won't do. Can't you think of a way to improve it ...?"

Wu Tian was still unwilling to give up. After all, it could be said to be the closest to the finished product, but there was no way to use it.

"We really have no other way ..." I've basically tried it, and even using liquid nitrogen to disperse the heat won't solve the problem. "

It was for this that Li Wei had been struggling for months.

"Wait!" Suddenly, something flashed across Wu Tian's mind, giving him some inspiration.

"What's wrong, President Wu?" Loong Yun was already preparing to leave this place. She felt that this project was basically hopeless.

"Have you forgotten the characteristics of the metal we're mining?"

Wu Tian said excitedly. He did not remember this incident before, but now that he thought about it, it seemed like it could solve the problem perfectly.

"No Resistance... and then has excellent thermal conductivity... " Loong Yun only casually mentioned two characteristics and she already understood what Wu Tian meant. From a certain point of view, this material seemed to be the most suitable material for making this computer.

"Okay, you know what to do about the rest of the things. Li Wei, I will now officially send you an invitation. I hope that you can join Wu Group company and let us complete your research and development together!"

Wu Tian suddenly extended his olive branch, which surprised Li Wei. Many people wanted to shove their heads in, but there was no possibility of that happening. He can actually join Wu Group company so easily?

"Really? I'm not dreaming, am I? "

"Of course it's true! Quickly pack your things and follow us to Flower Island. There are even better teams there, and even better laboratories!"

Time was of the essence, Wu Tian did not want to wait any longer, so he directly sprinted towards the Flower Island with Li Wei.

With Li Wei's addition, their progress was much faster than before, and the strength displayed by this mysterious metal really shocked them.

Just by replacing some of the key circuits in this computer with materials, the heating problem was already under extreme control.

Not only did it solve the problem of fever in one fell swoop, but it could also run continuously for a long time directly.

Seeing that, Wu Tian finally let out a sigh of relief.

So what if they don't have a patent, so what if they don't sell him good stuff. Now that he has everything, from a certain point of view, he had to thank that Poole company. If they didn't not want to sell to him and also seal up his server, Wu Tian might not have completed this breakthrough in such a short amount of time.

Of course, the good news was not only that once Zhao Yaqian obtained a new server, she would immediately start testing the game's content and update it on a large scale.

With its performance several times that of previous servers, almost all of Zhao Yaqian's ideas can be tried here.

Very quickly, the number of gamers in the legendary world began to rise. It wouldn't be an exaggeration to say that it was the number one game in the entire country.

The happy Wu Tian finally stopped worrying about their lack of good revenue. As of now, most of the company's revenue was already taken over by the game business.

Wu Tian, who had returned to his previous drunken life, was lying on the roof, enjoying the sun and juice. He was very at ease.

Loong Yun appeared all of a sudden at this moment with a panicked look on her face.

As Wu Tian saw her coming over, he knew that it was time to stop thinking about peace.

"What's wrong? Speak slowly, the sky won't collapse."

"President Wu, it's not that we're in trouble, but there's a problem with our Nanhe Securities Corporation ..."

Hidden Billionaire Chapter 938 - Help

C938 Help

Wu Tian was in disbelief, this Nanhe Securities Corporation was no longer a small company. It was almost impossible for something like this to happen.

They were the only ones who bought other people's points, so it was rare to see them being bought by someone else.

"Say it again, what happened?!" What Wu Tian wanted to hear more now was fake, or it could be said to be wrong.

Loong Yun calmed herself down and showed the latest information to Wu Tian.

"Look, this is the latest news, it's the latest transaction data from the trading market."

Wu Tian looked and suddenly became dispirited. It seemed like his extravagant request was not going to be able to meet his expectations.

The situation on the market was not good. He was on all defenses, but he never expected that there would be a problem with the Nanhe Securities Corporation.

Although it was not his company, if Nanhe Securities Corporation really became someone else's company, Wu Tian felt that it was impossible. Not to mention that he was missing a friend, if all these projects in Flower Island became others', what would happen if others made things difficult for Wu Tian in the future?

Plus, he was friends with Baili Zhenlin, and they helped each other quite a bit.

Thinking about this, Wu Tian immediately decided that he must think of a way.

He couldn't just watch his Nanhe Securities Corporation collapse. Wu Tian didn't plan to continue playing here and quickly put on his clothes.

"Hurry up and monitor the situation over here. We'll meet inside the office later." "Oh right, Loong Yun, you still have to calculate the funds that we can use. I'm afraid we'll have to pay a huge price."

Wu Tian said as he anxiously went to find clothes to wear.

Loong Yun nodded. She had already mentally prepared herself for this. Unlike the past, when she needed money for this matter, Loong Yun would not feel too disgusted with her.

It could be considered a coincidence, and was also within expectations. Nangong Ying had arrived before them in a short period of time.

Looking at how worried he was, it was obvious that he was here to discuss something with Wu Tian.

"President Wu!" You must help us! " The moment they arrived at the office, Nangong Ying almost kneeled down. The worry on his face wasn't an act.

"Don't be in such a hurry. Get up first and tell me what's going on!"

"It's like this. During this period of time, our company had a stock issue that diluted out nearly 20% of the shares. "But I didn't expect that all these shares would be eaten by someone at that time."

They were, after all, financial companies. No one would have thought that after so many years of buying, he had now become the party that was being acquired.

"Then you didn't do the risk control?" Wu Tian was also very strange. It was not supposed to be like this. Baili Zhenlin was no fool. He couldn't let people casually buy 50% of the shares.

"We did, we strictly controlled the number of stocks in the secondary market, but he had too much money. He immediately bought all of the stocks of other people, as well as our previous stocks, now they have 30% of the shares. "President Wu, you have to help us!"

Nangong Ying was also helpless. Even though the initiative was still in their hands, they were shocked by his aggressive approach. With such a powerful strength, if they were not surprised, within S City, only the Pulitzer Consortium could do such a thing.

Wu Tian frowned. Now that things had come to this, it was not so easy to deal with.

It didn't even mean that he could solve the problem just by investing money in it.

"Good!" You don't have to worry about that. Right now, your main goal is to keep your shares! However, have you all calculated how much it would cost? "

Speaking of money, Wu Tian was a bit worried. This wasn't something he was stingy with, but something he couldn't handle.

There was a lot of money in the company now. Although the monthly income was not little, the overall cost was also very high. It was the time to start saving money.

Thus, Wu Tian was unable to squeeze out much money.

"This, if I am to be honest, I am afraid it would cost at least a hundred billion ..."
Nangong Ying could already feel that the situation wasn't looking good.

Since Wu Tian said so, it was naturally due to the financial situation he was in.

They shouldn't be able to get out of the 100 billion, but other than Wu Tian, they had no one else to ask for help.

"100 billion?" Wu Tian widened his eyes. He looked at Loong Yun, who shook her head at him. It was clear that she wouldn't be able to take out the money.

"This... Mr. Nangong Ying, look and see if you can think of a way, we truly want to help you guys, but with this much money, even Wu Group companies can't afford to take it out! "

Nangong Ying's expression also started to become awkward. He knew that he was here to beg for help, but if they had a good idea, then they would have already used it and said it.

"This... Of course, we won't let you spend all that money for nothing! We will charge this debt to our company! "

After Wu Tian heard this, he waved his hand and said, "That's not what I meant. I'm not saying that I want to shirk my responsibility. It's just that we really don't have that much money right now."

The conversation between the two had reached a deadlock. No one could get any closer.

"What should we do?"

They both started to scratch their heads. Loong Yun looked at the two of them and cleared her throat.

"I have an idea."

Upon hearing Loong Yun's words, the two of them immediately shifted their gaze over.

Especially Nangong Ying, he was extremely excited.

"Oh, my mother! Loong Yun, you've really helped me a lot. Tell me what it is!"

Loong Yun was neither hurried nor slow as she watched him being so anxious.

"Since we don't have the money, we can exchange shares. Our Wu Group company has already been privatized, so even if we give you a share of the shares, the company is still in President Wu's hands."

Hearing what Loong Yun said, Wu Tian slapped his thigh.

"Why didn't I think of that!"

The originally hopeless situation was suddenly cleared up. There was a way out.

"Alright, no problem!" I can sign this agreement right now! " Nangong Ying didn't plan to return empty-handed this time. At this moment, they just signed an assignment contract.

Wu Tian gave 15% of the shares, but he used it to exchange for 30% of his Nanhe Securities Corporation.

That way, they could quickly figure out a way to take control of the remaining 20%.

Hidden Billionaire Chapter 939 - Sudden Competition

C939 Sudden Competition

After signing the contract, Nangong Ying quickly left Wu Group company and went back to report the good news.

They didn't have a lot of money with them. Although they didn't get Wu Tian's support, they still managed to free up a portion of the shares. The rest was to find ways to buy and collect the remaining 20%.

Baili Zhenlin was extremely busy. However, the enemy was also very quick and didn't give them any time to react, especially in the trading market. As long as they slowed down their attacks, there would be no chance for them.

The Pulitzer consortium's funds were extremely huge, and they did not care about the price at all. As long as there was something on the market, they would basically take it all.

Baili Zhenlin's hair had turned white overnight. Although he was slightly relieved to see the contract Nangong Ying had brought back, the current situation was still very uncertain.

"Chairman, we have already contacted all the people that we can contact. As for the shareholders, I have already made an agreement with them. "Look ..."

Nangong Ying looked at Baili Zhenlin. The rest would depend on whether his conversation would be effective or not.

"Got it, they're already here right? I'll go over right now." Baili Zhenlin quickly stood up. He had never felt such difficulty before.

His confidence began to dissipate in this moment of life and death. Perhaps it was because of his responsibility that he didn't dare to reveal his true self.

Inside the meeting room, there were already a few shareholders who had different expressions. They were all big investors and old partners who had held shares in Nanhe Securities Corporation for many years.

"How have you been? We haven't seen each other for a long time, and I didn't greet you before either."

Baili Zhenlin forced out a smile as a form of introduction.

"Chairman, you don't have to say these words. Everyone knows the current situation of the company. Don't worry, we will do our part."

A middle-aged man from bald head man spoke with confidence and looked very sly. This guy said that he also had a lot of shares. If he could get everyone's shares back, Baili Zhenlin wouldn't have to worry about that.

"With your words, I am relieved. I called everyone here this time because I want to discuss something with you. Based on the current situation, we should gather our shares and not wait for the enemies to destroy us one by one!"

Baili Zhenlin wasn't going to hide it anymore. After all, he didn't have a better way to deal with this. If they didn't want the company to be acquired, then they had to do it.

However, such an approach would clearly cause these former shareholders to feel very uneasy.

"You mean, we should hand over the shares for free?!"

All of a sudden, the shareholders were unhappy. After all, no matter who they were dealing with, they would definitely be unhappy.

"Of course it won't be for nothing. We have to make an agreement, so we will only temporarily take back the shares. Later, when Pritz no longer threatens us, I will return the shares to you."

Baili Zhenlin said in a sincere tone. He also knew that it was difficult, but at this moment, he could only hope that they could understand his difficulties.

However, the shareholders all began to look at each other, feeling troubled. No one was willing to respond to this matter.

If the shares were in their hands, that would be safe.

"This, even if you say so, this is not good. How about we make a price. Chairman, you should pay for it. That way, we won't have to worry about anything."

bald head man Nan noticed that the atmosphere wasn't right and quickly suggested a plan.

Actually, this could be considered as a common practice and there was no other way. If he didn't have a share, then he had to have money.

The stocks in these people's hands, added together, were almost worth billions of dollars. If Baili Zhenlin could pull out that much cash at once, he wouldn't have to worry about this anymore.

"This, our company's funds are all invested into the stock market and real estate. For now, we don't have that much money at all."

Baili Zhenlin also revealed a troubled expression. He had no other choice for this matter.

"Then don't blame us. Baili Zhenlin, I'm afraid we have nothing else to talk about next."

As he spoke, more than half the people in the room left furiously.

Baili Zhenlin was stunned as he looked at the fruitless discussion.

Nangong Ying saw everyone leaving and quickly ran over.

"Chairman, why didn't you say that we exchanged shares with Wu Tian? If they knew about this, they would definitely be willing to support us."

With Wu Tian's endorsement, even their stocks would rise a lot.

"We can't do that. The agreement between Wu Tian and us is a private one, so we can't casually reveal it. Also, this is our trump card. Unless it's a crucial step, don't be anxious."

While the two of them were talking, their secretary barged in with a terrible look on her face.

"Chairman, someone has barged into our company and is waiting for you at the door of the company. Quite a number of people have arrived!"

Baili Zhenlin and Nangong Ying looked at each other speechlessly. They didn't know what was going on and quickly walked out.

Arriving at the corridor, this was indeed the case. A group of black clothed people were surrounding a very gentle, bespectacled man.

Baili Zhenlin quickly walked over and stood in front of them. He said seriously: "What are you guys doing? This is the chairman's office. No one is allowed to enter! "

Zhang Zerui pushed his glasses, smiled at Baili Zhenlin and slowly walked out.

"You must be Brother Baili, right? Even now, you still do not know what happened. What I want to say is, I'm sorry, your chairman position has already been stripped away." Right now, I'm your company's first major shareholder! Moreover, I have more than fifty percent of the shares under my control. "

Zhang Zerui's voice was like a clap of thunder, directly making Baili Zhenlin paralyze and fall to the ground.

"Impossible!" "I still have so many shares in my possession, as well as those shareholders. How could you possibly ..." Baili Zhenlin was in disbelief. He just had a meeting, even if they didn't cooperate with him, they wouldn't have handed over the shares so quickly, right?
