

Hidden Billionaire Chapter 948 - Patent War

C948 Patent War

Originally, the company was extremely happy to have eliminated 11 Devils.

But when they turned around, the foreign companies threw a bucket of cold water on their heads, and everyone began to feel dejected.

Wu Tian urgently convened a meeting to discuss the current situation.

"Just how many crises have we encountered? Tell me, I want to see if there are any solutions."

When Wu Tian said that, his eyebrows creased. This was enough to show how conflicted and upset he was right now.

"Don't mention it ..." This is not easy to do. Right now, we have completely stopped the production of Kaleidoscope. On one hand, there is the problem of patents, and on the other hand, there are some imported raw materials. Others will not even be able to provide them to us. "

Wu Zaibin said in annoyance. This Kaleidoscope was originally one of their company's biggest profitable businesses. If this thing stopped, then their company would not be able to earn any money.

"Anything else?"

"Raw materials are a big problem and our other businesses have been greatly affected. The things that we import are all sealed, but as long as we, Wu Group Company go to buy them, it seems like we have already discussed on the outside, we definitely won't sell them to us. "

It was Yu Naixin's first time seeing such a wondrous sight in years. The supplier s that they had been cooperating with before had also always had a good relationship with each other.

But this time he asked them why. These supplier s did not say anything either.

Wu Tian had already started to have some doubts in his heart, but he was a bit puzzled. If this was done by Zhang Zerui, then he was too amazing. Since he could contact so many companies to boycott them together.

Therefore, things might not be so simple.

"How can these things be found in domestic alternatives?" Ignoring all else about what was going on behind the scenes, resolving the current predicament was the priority.

"Some can, some can not. Especially those high-tech products, chips, memory etc. They were not produced in the country. To be honest, our domestic productivity is indeed a bit low. "

Wu Zaibin was also helpless. He really wasn't trying to mock Wu Tian. It was the truth.

"I'm so worried ..." I never thought that there would be a day when someone would grab us by the neck. "

In order to prevent such a situation from happening, Wu Tian had already stripped away all of the low-end industries. After that, they devoted all their attention to high technology and development. However, even after doing so, they were still unable to escape the palm of Lord Tathagata's hand.

"Looks like we can't keep all our eggs in the same basket. We have to develop these things ourselves. As long as we have them, we won't have to worry about these things anymore."

Although he said that, it was not that simple if he were to really do it.

"Even our research institute, these pure academic research facilities, have received the news that they are prohibited from using the relevant patents."

Things were becoming more and more unfavorable for them, to the point where many operations could not be carried out.

"Alright, you guys can go back first. From now on, our company will have a huge change in direction. All of the development business, the entire supply chain, will be in our hands as much as possible, or we can use the domestic production companies as much as possible."

Wu Tian couldn't think of a particularly good way to solve this problem, so he could only leave the meeting.

After the meeting ended, Loong Yun accompanied Wu Tian outside. They stood on the dock and looked at the vast sea. Only then did Wu Tian's mood ease up a little.

"Is there no solution to this matter?"

Wu Tian turned around and looked at Loong Yun.

"Yes."

Loong Yun said affirmatively. There was definitely a way to deal with this, but whether it worked or not wasn't certain.

"Tell me about it."

Wu Tian looked at Loong Yun with interest. He hoped that Loong Yun could come up with a good idea.

"I'm afraid that this time, the reason why they are collecting patent fees from abroad is because they want to earn some money. "Then we can also negotiate with them and see if we can lower the price a bit."

Loong Yun had been collecting some recent information, so she quickly came to the conclusion that the other party was after their money.

"If you say so ..."

Wu Tian touched his chin. He felt that it made sense. Why would the other party not do something that could earn money?

This time, they had indeed requested to pay a sky-high price for the patent. However, it was clear that they were used to paying in the past, so they naturally didn't like to pay.

"President Wu, I suggest you negotiate with them. Perhaps meeting those big companies personally will have some effect. We are prepared to do it, but it will take time to develop our own patent technology."

Loong Yun's argument was actually more biased towards the expedient solution to the current problem.

This may not be too much for them to spend, but it will allow the company's business to continue, so to speak, a win-win business.

In short, before he found a better solution, Wu Tian felt that it was probably the best one.

"Alright, you can arrange this matter." Wu Tian nodded in agreement. He felt that he was about to be crushed. During this period of time, wave after wave of events had occurred before he had a chance to rest.

Wu Tian really wished that he could have a good rest at this moment. However, such a small request had already become a very difficult request.

Actually, not only Wu Group companies, some other China enterprises also suffered from this problem.

Many companies have been forced to stop business, without patent authorization, only for an indefinite period of time.

A great upheaval suddenly started to occur in the originally bustling economy of China. In the midst of this upheaval, Wu Group Corporation was only a boat in a storm.

Putting all these aside, Wu Tian still had some money on hand to support the operation of the company. However, if this continued for a long time, it would definitely not be a good thing.

One must know that the other party's licensing fee could go up to hundreds of millions of dollars. This price could force a batch of small businesses to death, so naturally, they could not pay it.

Very quickly, in less than a day or two, Loong Yun had already arranged for a plane to fly to Britain.

Wu Tian's goal this time was very clear. It was the A.I. Chip.

This item's skill level was very high, and its price had always been monopolized, so there was no room for negotiation. The server and Kaleidoscope that Wu Tian and the others were about to produce could not leave this thing.

So to say, from a certain point of view, it would not be wrong to say that this was the lifeline of Wu Group Corporation.

Hidden Billionaire Chapter 949 - He Was Discriminated Against

C949 He Was Discriminated Against

When he was at home, Wu Tian was like a lord. No matter where he went, there would be people trying to please him. He didn't have to worry about any company being unwilling to cooperate with his.

It could even be said that there were many enterprises that were working hard to become the suppliers of Wu Group companies.

However, the moment Wu Tian got off the plane and stepped onto the ground of Britain, he immediately felt very small.

This time, Wu Tian only brought Loong Yun to negotiate and did not bring many people with him.

No one knew if Zhang Zerui had arranged something behind the scenes, so when Wu Tian came to their home ground, he was naturally cautious and even disguised himself.

"President Wu, this time we want to meet with Bmd Company. They have always been our supplier, and this time they have also imposed an embargo on our products."

Loong Yun got a limousine from somewhere and opened the door for Wu Tian to get in.

"President Wu, I've already booked an appointment for you with the chairman of BMD. Whatever you want to say next, it will depend on your ability."

Wu Tian felt the pressure suddenly increase to the point that he couldn't even breathe.

If he didn't succeed, then wouldn't he have become a sinner for all eternity ... The company's business was completely on his shoulders.

After taking a deep breath, Wu Tian tried his best to keep himself in a good mood. Only by doing this could he better face these people.

When they got there, the BMD company's presence was very impressive. Wu Tian's horizons were broadened. BMD company was a huge European building. From afar, he thought he had come to a tourist attraction.

There were a lot of people coming and going, but they all had very confident expressions on their faces.

This point caused Wu Tian to feel deeply moved. The reason why Britain people like them could initiate a patent war on their China was naturally because they truly had extremely high strength.

Loong Yun led the way at the front, while Wu Tian followed behind her in deep thought. He actually had a lot of mixed feelings from this trip.

To be honest, there were some things that were not as simple as he had imagined.

"You must be the CEO of the Wu Group company. Hello, I'm Liu Yue from the PR Department. I'm in charge of receiving you."

Not long after they left, they saw a tall and slender woman walking towards them. She was dressed beautifully, but she did have an Asian face and spoke Chinese very fluently.

Wu Tian suddenly had a good impression of this company. He didn't expect them to be so serious in their preparations.

"Hello, please lead the way." Wu Tian nodded at her -- sort of a greeting.

However, he didn't expect that after her gaze swept over Wu Tian, she actually raised her gaze. She didn't look at Wu Tian at all, instead, it was as if she was looking at the sky.

Liu Yue walked in front by herself, ignoring Wu Tian and the others' actions.

Loong Yun could not stand it any longer. How dare a small public relations lady act so arrogantly? However, she was stopped by Wu Tian. After all, they were on someone else's territory, so it was better for them to keep a low profile.

"I thought you were the big boss, but I didn't expect you to be a beggar ..." Although Liu Yue was leading the way, she kept saying rude words. Although her voice wasn't loud, Wu Tian could clearly hear them.

But he said nothing, as if nothing had happened.

Very quickly, Liu Yue led the two of them into a small room. She only left one sentence, saying that the leader would be here soon. Then, she left the room in a hurry.

She didn't even prepare water for Wu Tian and Loong Yun.

Her actions had truly stunned them.

After about half an hour, a fat white man impatiently walked in.

He looked at Wu Tian, but didn't pay much attention to him. Instead, he immediately set his gaze on Loong Yun, who was standing beside him-- He even swallowed a mouthful of saliva.

His appearance made Loong Yun feel disgusted.

"Hello, are you the one who came to contact us?" In order to not feel too awkward, Wu Tian took the initiative to greet him. His expression was the same as before, always smiling.

"Yes, yes, yes. You are people from the China. What do you want to talk about?" The fat guy pulled open the seat and sat down. Then, he kept fanning himself with the documents in his hand.

The weather was very hot, so hot that the fatty could not stand it any longer.

"Yes, we'd like to talk about your company's patent fees for our company." Wu Tian gestured at Loong Yun and watched her hand over a document.

This document was the bill that was sent to them by this company. The amount was already 1 billion, so Wu Tian definitely wouldn't be able to pay that much money.

"Yes, this price is set by our company and there is no room for negotiation. "If you have nothing else, I'll leave first." When the fatty saw this, he stood up and was about to leave.

Wu Tian's face was full of surprise. He quickly walked up to stop the fatty. But Liu Yue came up and blocked his path.

"Alright, you're a man. We said that there's no room for negotiation, so don't mess around here, this is not China. If you dare make a move, we can call the police!"

Liu Yue's attitude wasn't good and she gave him a look of disdain.

Wu Tian was immediately angered and laughed. He let go of his hand and looked at the fatty as he walked away. Then, he turned around and looked at Liu Yue.

"Can you help me a bit? I can give you some compensation. Can your company lower the price a bit more?"

Liu Yue snorted coldly. The air was coming out of her nose.

"Come on, you poor bastards, don't mess around here if you don't have any money!"

Pauper? Wu Tian looked at Liu Yue in surprise. No matter what, this term had nothing to do with Wu Tian.

"You didn't tell them who we are?" Wu Tian looked at Loong Yun in disbelief.

Loong Yun looked helpless as she pushed her glasses, "It's not that I didn't say it, but it looks like they don't even know the strength of our Wu Group Company."

This was the funniest joke Wu Tian had ever heard. That woman looked down on him so much, and she was a Chinese.

Hidden Billionaire Chapter 950 - Negotiations Failed

C950 Negotiations Failed

Liu Yue didn't know what the two of them were talking about, she just thought this guy looked very stupid.

"If you guys don't have any money, then go back quickly. Don't waste everyone's time here, to tell the truth, I'm also very busy." Liu Yue said in disgust and began to clean up the chairs in the room.

It was clear that she wanted to chase them both away.

At this moment, the fat Caucasian man shouted an eagle's language. Liu Yue immediately rushed out as if she was injected with chicken blood. Her attitude towards Wu Tian and the others was completely different.

Wu Tian's face was gloomy and his mood immediately turned bad. He had come over to negotiate out of good intentions. It seemed like he had hit the jackpot.

If it was just that, then it would be fine, but the person who had angered him was actually someone from the same clan as him. The more he thought about it, the more sullen Wu Tian became.

"President Wu ..." Loong Yun's expression also started to blame herself. After all, she was the one who planned this, and it ended up like this. She felt that she also had some responsibility.

"It's fine, it's fine. At the very least, let me understand that we should be able to grasp these items ourselves. Everything else is just an illusion!"

Wu Tian sighed with emotion. It was nothing to be looked down upon by others. The key point was that Fatty did not want to negotiate with them on this issue. He simply felt good about himself. He felt that if he had the monopoly, then he would go against the law and looked down on others.

After saying that, the two of them turned around, intending to leave. They didn't want to stay in this company for even a moment longer.

As they were walking outside, they saw Liu Yue. She seemed to have gotten into some trouble and was being scolded by the fat Caucasian man.

Wu Tian sighed helplessly. He really couldn't say anything about this kind of person. Compared to living with even more dignity, she would rather live this kind of life in the Britain, and she even thought that she was doing better than any other people in the China.

To some extent, this person was already a cripple.

Seeing that the two of them were about to leave, the fat Caucasian man suddenly caught up and stopped Wu Tian.

"Friend, if you really want our patent, we can talk about it a little bit more. For example, we can reduce the price a little bit."

This guy suddenly acted out of the ordinary, which made Wu Tian a bit puzzled. Earlier, he said it in such a reasonable and reasonable manner, as if he didn't want to pay up. Now that he started to act like this again, it really made Wu Tian feel disgusted.

"Alright, I know what your attitude is now. Sorry, but from now on, it's best if we don't interact with each other anymore."

Wu Tian had already put this company on his blacklist.

Does he really think that he has the right to be so arrogant? At most, I won't use your things!

Wu Tian bit down on his anger and said something tough, but in the end, it made the fatty laugh.

"You China people, it's impossible for you to not use our patents. Let's put it this way, the majority of the patents on the chips around the world are all owned by our company, it's impossible for you to bypass us, so I suggest that you grab this opportunity."

The fat Caucasian man had a fake smile on his face. Looking at him, it was annoying. His eyes were filled with contempt.

"That's what you said. I've remembered it." Wu Tian Qiang suppressed his anger, stared at the Britain user, said each word, and flicked his sleeves as he left.

Hearing the laughter behind them, Wu Tian and Loong Yun were both in a bad mood.

The moment he walked to the door, Wu Tian saw that there seemed to be a few Asian faces standing at the entrance of the company.

Their expressions were heavy with anxiety.

When he looked more closely, Wu Tian saw that these people seemed to be holding a resume. If they didn't have any reaction, it was probably because they couldn't even send their resume.

"Loong Yun, go and ask them what they do for a living." Wu Tian suddenly stopped and gestured to these people.

The BMD company they visited was, in the first place, one of the most famous chip developers in the world, and there was no doubt that it was being pursued by many young people.

However, Wu Tian felt it was a pity to see them so engrossed. It would be great if such a talent could be used by him.

Soon, Loong Yun came striding back.

"They are here to be hired, but it seems like the HR department here isn't willing to recruit these people. It's enough to say what Asian race they are, they need more white faces."

Loong Yun shrugged her shoulders. She didn't care about this at all. In fact, she even thought that these people were sick. There were so many opportunities in the world, why did they hang to death on this crooked tree?

"For recruitment?" In that case, are they all talents? " Wu Tian began to have some ideas. It would be a waste of such a talented person here.

"I'm not sure if they're talents, but it seems like they're students who come to Britain to study abroad. Their initial thought was to fight for this company." Loong Yun's tone was harsh, and it could be seen that she was disdainful towards these people.

However, Wu Tian didn't think too much about it. He was angry at the fat white men, not at the yellow skin.

"I'll go take a look." Wu Tian walked over with great interest. Seeing Wu Tian coming over, the dozen of people did not know what he was doing. Their expressions started to become nervous.

"Are you here to apply?" Wu Tian smiled.

One of the more energetic young man looked Wu Tian up and down, then nodded and said, "That's right, are you from this company?"

Wu Tian shook his head and immediately denied it. He took out his business card from his pocket and handed it over.

"I'm not from here, it seems like you need to find a job. If you're a talent working for the A.I. Chip, I'm very happy to see you."

After hearing what Wu Tian said, most of them didn't quite believe him.

"Keep bragging, this industry is completely controlled by the BMD Corporation, we can only be their assistant."

"That's right, this thing burns money. If you don't have that much money, you won't be able to handle it. Even if you do, it won't be as good as it was ten years ago."

Although these words sounded ear-piercing, they were the truth.

Wu Tian did not refute him and just smiled.

"If you guys are willing to come to my place, I can build a brand-new laboratory for you, give you the best equipment, and even the latest materials. But if you don't believe me, you can pretend I didn't. I will stay in Britain for two days. The address above is for me. "

With that, Wu Tian left behind a figure, which made these people look at him in confusion.
