

Hidden Billionaire Chapter 951 - People Who Turn to Wu Tian

C951 People Who Turn to Wu Tian

Loong Yun obviously knew what Wu Tian wanted to do, but it was not easy to manage these people.

First of all, they were studying abroad, but why didn't they choose to return home? Most of them felt that overseas was better than China.

Most people despised this kind of mentality.

"President Wu, let's find someone else. There are also a lot of people in this field in China. Why do we need these people so much?"

Loong Yun did not hide her feelings at all. She hated Liu Yue.

"First of all, most of our talents are overseas. If not, our A.I. Chip would not have been growing so slowly."

Previously, it wasn't that Wu Tian didn't do any related investigations, it was just that the results of the investigations made him feel very helpless.

"But if we recruit these people back, I still feel that we can't be at ease. Our company has so many secrets, we can't guarantee that these people's hearts will be with us." Loong Yun's worry wasn't without reason.

Many people from the China knew that there were many people like Liu Yue abroad. They despised their identity as people of the China from the bottom of their hearts, and it could be said that they were extremely kneeling and licking the white man.

Therefore, everyone called them Banana People. After Wu Tian heard this, he scratched the back of his head helplessly.

"Let's talk about this later. We need to think of a way to solve the A.I. Chip's problem first."

Now, the Kaleidoscope had already fallen into a situation where production was stopped. Without the authorization of the new A.I. Chip, if they were to continue production, they would be sued by the BMD Corporation.

When the Kaleidoscope stopped selling, the market that he had spent a great deal of effort to open would come to a standstill. This industry is currently Wu Group Corporation's very big revenue pillar.

They have their troubles, and so do the young people who seek employment.

Most of the people who received the business card didn't take it seriously. They had stayed in the Britain for a few years, so they didn't know much about the affairs of China.

They did not even know what the Wu Group company on the name card was for, so it was impossible for them to change jobs.

However, there were always exceptions. The person who spoke to Wu Tian at the beginning was the one who saw everything clearly.

His name was Liu Ziyang, and he was a citizen of S City. Others might not know about the Wu Group company, but he had heard of it before. In other words, almost everyone who came from the S City knew the name of the Wu Group company.

In fact, Liu Ziyang used to have relatives working in the Wu Group company.

However, he was a little unfamiliar with the name Wu Tian. Wasn't the former chairman Wu Zhi?

"Liu Ziyang, stop looking. We should just wait for Liu Yue to come out and see if she can help us deliver our resume."

Seeing Liu Ziyang holding this name card and thinking, his companion beside him began to advise him.

"I think maybe I can ask this person, what exactly does he mean ..."

Obviously, Liu Ziyang was moved.

"What are you doing? I don't even need to look to know that the company is fake." Our only choice is this company. If it doesn't work, I might have to go to another state to find a job. "

Hearing the voices of the people around him, Liu Ziyang suddenly felt like he wasn't in sync with them, and their thoughts were completely different.

"I still have some things to do, so I'll be leaving first. Good luck." Liu Ziyang hurriedly packed his things, then greeted them. He didn't care about the others and directly left.

He prepared to go to the address on his business card. Although he was at Britain, Liu Ziyang actually lived a very ordinary life. Because he didn't have a job, he spent money very sparingly.

Wu Tian stayed in a modest hotel that was probably only 3 stars. This made Liu Ziyang feel strange. Generally, the big bosses of the company should live in very luxurious hotels.

Could it be that Wu Tian was lying? Liu Ziyang also started to have some doubts, but then he thought that he didn't have anything to lose anymore. Even if he was tricked by Wu Tian, he wouldn't lose anything.

After figuring out the situation, Liu Ziyang didn't worry about anything anymore, and directly walked in to Wu Tian's room.

Soon, there was the sound of knocking at the door. Wu Tian was arguing with Loong Yun about this. Hearing this sound, Wu Tian immediately felt that he had achieved his goal.

Wu Tian went to open the door excitedly, and found Liu Ziyang alone outside.

"You seem to be the one who greeted me?" Wu Tian looked over and felt that this Liu Ziyang was very familiar. He must have talked to him just now.

"Yes, yes. It's me. Are you Mr. Wu Tian?" I came here specifically to find out about the situation after hearing what you just said. "

Liu Ziyang's attitude was quite upright and he didn't put on any airs, which made Wu Tian feel that he was pretty good.

"Come in. "I'm really worried that no one will believe me. Now that you've come, it means that you have some trust in me." Wu Tian cleared his throat and let Liu Ziyang into the room.

"Are you sure you want to develop the chip?"

Liu Ziyang asked carefully. He was very afraid that he had broken into the base of some swindler.

"Of course, it's just that our China is really lacking in this area, and their patent fees are too expensive. I think we should use this money to develop our own businesses, but we can't let others grab hold of our necks forever, right?"

What Wu Tian said was touching. These words were from the bottom of his heart.

"If what you have said is true, then I am willing to give it a try." Liu Ziyang seemed to have made a very difficult choice, but in the end, his gaze stopped on Wu Tian.

He handed over his resume. It didn't seem like he was joking.

Wu Tian took it and turned around to smile proudly at Loong Yun.

"Look, what did I say!"

Loong Yun was speechless for a moment as she did not expect anyone to be willing to join their company.

"Come over here and have an interview first." Loong Yun waved to Liu Ziyang and found a topic to chat with him, evading Wu Tian's provocation.

Hidden Billionaire Chapter 952 - Development of New Materials

C952 Development of New Materials

The interview went smoothly. Although Liu Ziyang was the only employee, Wu Tian still felt that it was a historic breakthrough.

He was finally going to have an employee specializing in the development of microchips. At the same time, Wu Tian also realised that he could not keep his eyes on China s, it was also good to visit other countries sometimes.

Especially the Britain, they could actually attract talents from all over the world to their place. Wu Tian felt that he could also think of a way to attract talents from all over the world to his company.

After sending Liu Ziyang off, Wu Tian was just about to have a good celebration while planning out how he would start such a recruitment program in Britain.

At this moment, a message came from the company saying that a research base had been built in partnership with the military.

Although the patent issue gave Wu Tian a lot of trouble, but this issue couldn't be solved in a short period of time. Even if Wu Tian had the world's number one research and development team, it would still take time for him to develop a suitable chip.

If he wanted to solve the problem, he had to do it by other means.

Wu Tian originally planned to stay at Britain for a day or two, but seeing that no one else planned to come over to seek help, he decided to just return to the country ahead of time.

However, he didn't even plan to go back to the company and directly went to the military base in the southwest.

Wu Group Corporation could be said to have invested nearly half of its R & D staff here.

As this was a military base, there were a lot of soldiers guarding it, so Wu Tian didn't have to worry about leaking information.

And the director of research and development of this new material was the dean of the research institute, bamboo pole.

When Wu Tian found him, this guy was directing people to mine that mysterious meteorite mine.

"President Wu, why are you here?" bamboo pole was sweating profusely, but he looked very excited.

"I came to check on you. How are you? Have you made any recent progress? "

Wu Tian was looking forward to it. The characteristics of this material were too unique, almost like a masterpiece by god, possessing many technical skills that humans couldn't attain. If they could use some of these characteristics, it would definitely raise their technological level by a level.

"Of course." bamboo pole's face was full of excitement. He quickly pulled Wu Tian towards another direction.

There were many rooms here, and one of them seemed to have become an exhibition hall.

"So far, we've found a lot of unique characteristics. One of them is the anti-gravitational force!" bamboo pole's eyes lit up when he said the three words. It could be said that as a scientist, it would be worth his life to be able to experience this kind of science fiction phenomenon.

"Anti-gravitational force?" Wu Tian was a bit confused. How was this possible? Just as he was about to refute, he suddenly remembered that the first time he saw the metal hoop flying in the air, floating in the air was proof of the anti-gravitational force.

bamboo pole nodded. He pressed a button and a small metal cube slowly floated up on the table in front of them.

This scene was too shocking that Wu Tian and Loong Yun were both dumbfounded.

If this matter were to be made public, it would undoubtedly cause a huge commotion throughout the world.

"Am I seeing things?" Wu Tian's voice started to tremble. His excited words were starting to get a little unclear.

"Of course, you are not mistaken. Right now, we are all calling this thing the Angel Wings. It is practically a god's gift." bamboo pole sighed with emotion. Furthermore, this was only one of the characteristics of the Angel Wings.

This material had other properties, and was very useful as well. On one hand, its hardness was extremely high. It had good resistance, corrosion resistance, heat resistance, and cold resistance. It was an excellent industrial material.

The second was zero resistance, which had excellent processing performance. The servers developed by Wu Group Corporation were already beginning to use this material to make circuits.

Its performance seems to be an international advanced level.

If anything was more important, the military was most concerned about one characteristic of the Angel Wings — under the stimulation of a certain amount of electric and magnetic fields, this material could actually be transparent. To put it bluntly, it allows optical stealth.

After bamboo pole said so much, Wu Tian and Loong Yun were both dumbfounded. However, all they had to do was make use of a tiny bit of the Angel Wings' properties, and it would be enough for them to master a technology that was far beyond what the world's currently possessed.

"All of you should hurry up on your research. However, please do some research on this A.I. Chip for me first. This is our most urgent task right now." Wu Tian immediately thought that it would be great if they could use the technology refined from Angel Wings on their own products.

Hearing that, Loong Yun immediately came over and said, "President Wu, that's not good. This material is so rare, what if someone discovers the secret inside when we use it to make this kind of chip?"

This item was a priceless treasure, and the degree of secrecy was definitely one of the top secrets.

"You don't have to worry about that. We have already grasped a way to process this material in depth. After the product is shaped, others won't be able to study it again. Even if they want to study our secret, they won't be able to do so."

bamboo pole seemed very confident, but his answer couldn't dispel Loong Yun's doubts.

"Also, if we don't have enough of this material, it's not appropriate for us to use this material to mass produce our products. Our current Kaleidoscope sales are extremely high ..."

Her worries were not superfluous. Currently, the country's control over this material could be said to be very strict. Every gram needed to be strictly planned and prepared. At the scene of the mining materials, there were even soldiers standing on guard with guns at the side.

It was even said that several Special Team and air defense troops were stationed near the scene where the materials were being mined. The State attaches great importance to this material.

"It does seem to be difficult, but you don't have to worry. We can produce a lot of servers — all the Kaleidoscope will be using clouds to do data processing."

Although bamboo pole wasn't directly responsible for this, he was, after all, the dean of the institute, so he was indispensable to the research of the server.

"Is this really okay? If we can achieve the same results by doing this, then we won't have to worry about Britain's patent litigation right now! "

Wu Tian rubbed his hands excitedly. This method sounded pretty good, and the server was in his hands, so he didn't have to worry about someone stealing it.

Hidden Billionaire Chapter 953 - Patent Litigation

C953 Patent Litigation

He had just returned to the company, and because he had changed his mind, the Kaleidoscope, after changing his mind and getting rid of the majority of the chips, started to use cloud computing to run the game.

Under the support of the powerful server, the effect was not too different from before, and the most important point was, the cost of Kaleidoscope was also much lower.

Wu Tian simply lowered the price further and started to sell it in other countries' markets at the same time.

In Korea Nation's market, Wu Tian simply handed the work over to Time Company and cooperated with them.

As for the Char Country, it was up to Blanche, so there was naturally no need to worry about it.

In the end, not even two days after this matter had been spread out, an indictment from the A.I. Chip company in Britain was delivered.

They sued Wu Tian's company for failing to comply with the patent requirement and for not obtaining the license to start production.

And they will send a professional team to S City to investigate and prosecute.

After Wu Tian saw the lawyer's letter, he threw it into the toilet and didn't take it seriously at all.

These people merely wanted to create some trouble for themselves and gain more attention. This way, they could make more China companies fear them and collect a large amount of royalties.

However, he didn't expect Wu Tian to be so laissez-faire. In the end, he actually received a summons from the court and the other party went to the court to sue Wu Tian.

When Loong Yun came to deliver the summons, she found it funny.

"President Wu, are we still going?"

They could completely ignore this kind of thing. After all, their Kaleidoscope did not have any A.I. Chip installed.

"Go, of course we have to go. We have to make this matter bigger!" Wu Tian rolled his eyes and immediately thought of an idea.

"What do you mean?"

"Think about it, we can use this opportunity to hype up a bit. Let Wu Zaiyao spread this on the internet and publicize the other party's strength. Then we'll go to the court and do a live broadcast! I will let them know what shame is in front of all these people! "

Recalling his previous experience when he went to negotiate, Wu Tian felt a surge of anger in his chest. He had to vent his anger on this matter.

After she understood Wu Tian's meaning, Loong Yun started to make the necessary arrangements.

On the day of the court hearing, the internet had indeed already started discussing this matter.

Everyone was curious whether Wu Group company had capsized in the sewer, and many people were trying to uncover this BMD company's information, exposing the fact that they had relied on their patents to bully China companies everywhere.

All of a sudden, there was a huge uproar on the internet. Wu Tian did not expect Zhang Zerui to publicly support this BMD company, saying that he would defend the patent laws ...

The moment this argument was heard, some people started to question whether Wu Tian had truly violated the law.

In short, there were all sorts of things. In the end, no one knew the truth of the matter.

Wu Tian sat in the dock with a relaxed expression on his face. This time, they hired a lawyer who was still in his internship, showing that Wu Tian never treated his opponent as his opponent.

What Wu Tian didn't expect was that the plaintiff was Liu Yue.

He was the one who was entertained by this little girl before. Now, she was the first one to oppose him. Wu Tian really didn't know what to say anymore.

He didn't even want to look at Liu Yue.

"Judge, we believe that Wu Group Corporation would use our chip patents without our authorization and produce and sell the gaming equipment. Our company requires that Wu Group Corporation pay the relevant patent fees and impose a double fine."

Everyone present was a bit surprised by what Liu Yue said in the beginning.

Their patent fees were already over a hundred million, and they even had to pay a fine. That amount would at least amount to three to four hundred million.

Everyone immediately focused their eyes on Wu Tian, wanting to see how Wu Tian would solve this difficult problem.

"Here, we need to clarify a little, the Kaleidoscope that we are currently producing is no longer using chips that are patented by other companies!"

Loong Yun calmly took out a document and handed it over to the court.

"Impossible, at the current stage, only our products and technology can produce chips of that standard, you can't produce it yourself!" Liu Yue was taken aback for a moment before she quickly started to retort.

Their thoughts and ideas were simply outrageous.

My technology is the best in the world, so you can only use this chip to do the job. This preconceived idea directly led this company to believe that Wu Tian and the others violated the patent law.

"Truly ignorant. Let's not talk about whether we have the ability to develop this A.I. Have you checked if there are any chips inside? "

Loong Yun retorted with a question, making Liu Yue speechless.

The judge looked at the argument between the two of them and looked at Liu Yue with a serious expression.

"Have you been dismantling it? Do you have any evidence that they're still using your chip? "

Liu Yue was unable to utter a word in the face of the judge's questioning. She could only shake her head as if she had eaten sh * t.

"Since it's in court and there's a live broadcast online, we might as well explain it to everyone. We did cancel the A.I. Chip's setting in there and used cloud computing to achieve the same game effect as before."

Wu Tian noticed that the time had come. He stood up and started talking to the camera.

At this time, the internet was in an uproar. Quite a few people who had initially doubted the Wu Group company had quietly shut their mouths at this moment, and even more people were cheering for the Wu Group company from the side.

There were even quite a few people who knew about the Kaleidoscope that Wu Group Corporation had developed.

"Also, due to the high price of the A.I. Chip previously, the price of our Kaleidoscope has never been able to come down. Now, using the new cloud calculation, I announce that the price of the Kaleidoscope has been lowered by one thousand!"

As soon as he said that, it created a huge storm on the internet. Almost immediately, people started placing orders to buy Kaleidoscope.

Liu Yue, who was being ignored, looked at Wu Tian in a daze. She never thought that a business lawsuit that she was so proud of would be a failure.

Hidden Billionaire Chapter 954 - Comprehensive Economic Confrontation

C954 Comprehensive Economic Confrontation

With the judge's announcement, Wu Tian could finally lift his eyebrows and be proud of himself. Now, he no longer had to worry about these Britain Companies waging a patent war on them.

The public opinion on the web was obviously trying to bring the Wu Group company up to the altar. There were many people preaching that they were the only saviors of China.

Looking at Liu Yue's disappointed expression, Wu Tian felt really good inside. Although the internet had already insulted him, he still walked over quietly.

"What, you're not happy that you failed this time?"

Wu Tian looked at Liu Yue with a beaming smile, purposely coming to see him as a joke.

This guy must have thought that this case was certain, so he intentionally wanted to take credit in front of his superior to raise his position.

Unfortunately, his opponent this time was Wu Tian. If he chose the wrong opponent, it would be impossible for him to win.

"..."

Liu Yue's face was flushed red. He could feel the looks of disdain from the crowd. Even someone as heartless as her couldn't possibly not feel anything at this moment.

"Oh right, in the future, when you're outside, especially in Britain, don't say that you're a person of China, you're not worthy."

Wu Tian stared at her coldly. He remembered what Liu Yue did before and was still very angry inside. The reason why those people from the Britain always looked down on the people from the China was because there was such a person amongst them that pulled down the status of the people from the China.

Liu Yue could not bear to listen any longer. After packing her things, she turned and ran. Behind her, there was a hiss. Everyone seemed to be mocking her for looking down on her.

However, she deserved it. She asked for it.

This trial's victory, coupled with the effects of the live webcast, gave Wu Group Corporation a huge advertisement.

In the past, Kaleidoscope were bought by players who needed it. But now, many people who had never heard of Kaleidoscope began to buy this item as well.

Their goal was also simple. They wanted to support the national products and their national industries.

And Wu Tian, standing on the wind that they recommended, became the pillar of the nation all of a sudden.

Although such a banner would bring great benefits and advertising, it would also bring great responsibilities.

After returning to the company, Wu Tian was full of joy. He crossed his legs and sat on the sofa, looking at his heroic figure on the TV screen with a silly smile.

Loong Yun looked at his lazy look and shook her head gently. She coughed on the side and said slowly, "President Wu, another CEO is here to visit you. He said he wants to use the same technology as us to develop their products."

Many large enterprises were also deeply affected by the patent war, and today they have seen Wu Group companies with such unique channels.

They thought that perhaps by using Wu Group Company's method of calculation, they could avoid the huge amount of patent fees, so they came one after another to seek his help.

Everyone wanted to see Wu Tian, but Wu Tian didn't want to see them.

"Let Yu Naixin negotiate. Why would I let them see me? "

Wu Tian waved his hand. There was no need for him to deal with such a trivial matter.

"Actually, it doesn't seem to be just this issue. Recently, quite a few Britain companies have decided to impose an embargo on our China companies and stop trading with them. The scale of the embargo has now expanded to an extremely large extent."

Loong Yun rubbed her temples. Perhaps no one had thought that things would turn out like this. Originally, it was just a competition between a few companies, but now it had extended to the entire industry. Even the cooperation between the two countries had completely stopped.

Hearing that, Wu Tian laughed instead. This group of people were really ferocious, since they wanted to fight to the end with China people.

However, this didn't matter. Wu Tian wasn't afraid. After all, they still had other solutions.

"They are really ruthless. However, since this is a trade war, then let's go and see who is stronger."

Wu Tian was full of confidence in himself, and at the same time, he was full of confidence in the enterprises with China.

At this moment, Loong Yun frowned and handed over a report.

"Actually, there is another matter... Mecca Company have recently begun to be produced in large quantities, and it seems that they have started to lower the price in various industries, dumping them ... "

Loong Yun felt that this operation was really hard to understand. It wasn't difficult to produce a large number of products, the key was to lower the price. Some products, Mecca Company were currently being sold at a loss.

"Wait, isn't this Mecca Company already part of the Pulitzer consortium? Strictly speaking, he should also be a company with Britain Capital right now. "

Wu Tian looked at the numbers and felt that something was wrong. None of the actions of the Pulitzer consortium were good.

There must be some other conspiracy involved. If they couldn't see it, they might suffer huge losses afterwards.

"They were purchased by Pulitzer consortium with a full capital. They already occupy a monopoly in various industries."

In the past, their Mecca Company might not be able to develop all the way, but that was because they had many factions above them and their instructions were not uniform.

As of now, the entire company only needed to listen to one person, and that was Zhang Zerui, so their efficiency was greatly improved.

"If they lower the price of dumping, they want to destroy other companies. This move is really sinister! "

The Pulitzer consortium had plenty of money, so losing money in a short period of time was nothing to them.

However, this was a huge blow to other China enterprises and companies. Selling at a low price would cause all the market resources to tilt towards the Mecca Company.

After a long period of time, other companies and companies would also have to lower their prices like this. At that time, those that couldn't continue would definitely go bankrupt.

Prist's Consortium had only lost some of their funds, but it had successfully thrown the entire situation into chaos.

"So what can we do? If the China economy is destroyed by someone, our company will definitely be affected greatly as well. "

Loong Yun was a little worried. Now that she understood the principle of lips losing teeth, she understood it well. There was no company that was independent of the entire China, so everyone was actually within the Community with a shared future.

"We don't have to worry about that. "It's best to have more confidence in your own people."

Wu Tian looked relaxed. Even though there might be a huge crisis behind this, it would not be easy for the other party to succeed.

Hidden Billionaire Chapter 955 - Negative Message from Dian Gu

C955 Negative Message from Dian Gu

Ever since she captured Di Yin and Di Gu, Su Cancan had been trying to extract some useful information from them.

However, the two of them were stubborn as stone. No matter how much Su Cancan punished them, they wouldn't say anything.

It had already been several days, and Su Cancan's mind was filled with thoughts on how to get them to speak.

After thinking about it, she suddenly came up with an idea while eating.

At this time, Sunn Hongsheng was still at Wu Group company. Su Cancan quickly found him and quietly pulled Sunn Hongsheng aside.

"You are so secretive that others will misunderstand our relationship. I am the People's Police!"

Although Sunn Hongsheng said so, his body was very honest and was very compatible with Su Cancan's actions.

"Enough nonsense, I have something to say to you!"

Su Cancan rolled her eyes at him. This guy was really thinking too much, but she had something that she needed his help with, so she couldn't casually criticize him.

Sunn Hongsheng laughed. There was no one beside him. He lowered his voice and said, "Miss Su, I know you might be interested in me, but I, Old Sun, don't have a house or car right now. I'm really poor ..."

"Be more serious. If you continue to speak like this, then I'll be leaving!"

Su Cancan really wanted to give this person a slap on the face. What on earth was going on in his head? It was as if he had no business to deal with day after day.

"Alright, alright, let's not talk about jokes anymore. Tell me, what do you want me for? As long as it's something I can do, I will definitely help you!"

Sunn Hongsheng patted his chest with a manly look on his face.

Su Cancan lowered her voice and said in a low voice that only the two of them could hear, "Well, I want you to investigate the real identities of Di Yin and Di Gu."

"I seem to know you're holding them captive, but this matter didn't go through our public security system. Strictly speaking, it's illegal ..."

Sunn Hongsheng's eyes widened. He wasn't an idiot, he always stayed in Wu Group company, so he naturally knew that there were some unspoken rules.

Obviously, although these two people were unforgivable, they weren't arrested with the police's approval. Strictly speaking, Wu Group Corporation didn't have any reason to detain these two people.

However, if he really let these two go, the police station would be the first one to be unwilling. These two were terrorists that posed a huge threat to society. No one would dare to bear the consequences if they really went out and did something bad.

"I don't care, what you just said, don't tell me you've forgotten! "Just now, someone patted his chest and said, 'As long as you can do it, you will definitely help me!'"

Su Cancan seemed to have expected this situation and looked calmly at Sunn Hongsheng.

"I really can't do anything about it ..." Sunn Hongsheng knew that he couldn't argue with the ice beauty in front of him, so he decided to give in in front of her.

Su Cancan was naturally happy to hear that. She quickly took out two small bottles from her clothes. Inside the bottles were a few strands of fur.

"This is their body tissue. Go check their DNA."

Sunn Hongsheng took it and nodded. This matter was very simple to them.

"Don't worry, I'll give you the results tomorrow."

It has to be said that Sunn Hongsheng did things rather quickly. He even came out with the analysis report that night.

Looking at his excited expression, Su Cancan knew that he must have gotten some results.

"Now that their identities have been identified, what are you going to do about it?"

Sunn Hongsheng looked at Su Cancan nervously. He could feel that the woman in front of him was emitting a murderous intent. She was definitely a vicious person at this critical moment.

"You don't need to worry about that. Thank you for helping me this time."

Su Cancan nodded icily and turned to leave with the things in her hand.

Sunn Hongsheng stretched out his hand to stop her, but he opened his mouth but no words came out.

As he thought about it, he felt that it would be better not to get involved in this matter. Although this was against his conscience as a police officer, what was involved in this matter was not something he could deal with.

11 Devils were not something that ordinary people could deal with. The evil that they caused, using normal legal methods, was not enough for them to be judged.

Sometimes, one just had to use violence and evil to deal with evil.

Su Cancan, holding the report and looking at the identity of these two men, couldn't help laughing out loud.

In front of her was a huge glass wall, and the people in front of her were Di Yin and Di Gu.

"Speak, what else do you have hidden from me!"

Su Cancan looked coldly at the two stubborn fellows. No matter how hard she tried to interrogate them previously, they didn't say anything.

But now that Su Cancan had a hold on them, she wanted to see how they would behave.

"What's the point of asking such a question? Neither of us will say anything! "

Di Gu slowly closed his eyes. He looked like a dead pig that wasn't afraid of boiling water. He didn't care what Su Cancan was going to do to him.

Su Cancan sneered. She had been rejected so many times in the past few days that she had long since gotten used to it.

"Alright, I would like to ask which one of you is this Li Chengzhu?" "I saw from the information above that Li Chengzhu seems to have two younger sisters who are currently in university."

The moment Su Cancan said that, Di Gu's eyes opened up. His eyes shone brightly. It seemed that Su Cancan was right.

"I'm warning you not to attack them!"

Facing Di Gu's threat, Su Cancan found it funny. Did they not understand the current situation they were in at all?

"I actually took this thing out. That means I'm telling you clearly that if you cooperate with me, naturally, I won't attack your family."

Su Cancan said indifferently. How could she not threaten the two of them? She had gone through so much trouble to obtain the information just to get a clear look at the secrets behind them.

"Right now, you should carefully consider whether you want to say it or not."

Di Gu and Di Yin looked at each other with a complicated look in their eyes. After a few exchanges, Di Gu still painfully closed his eyes and sighed.

"We will tell you everything!"
