

I AM VARDY

Chapter 6 - Like an assassin

The amateur stadium was silent for three seconds, and then an incredible cry of exclamation sounded, as if to see God coming to the earth.

Although Valdi did not celebrate, it did not mean that his teammates would not be excited and not celebrating. Several teammates screamed from the backcourt like beasts and rushed to rush Valdi to the ground, even sitting on the bench. David also waved into the court with his jersey and pressed it to Valdy.

“Asshole, did you know you scored?”

“It’s so exciting, I feel like I’m going to burst!”

“Quick, let me see if you have an engine on your lap!”

.....

Teammates pressed on Valdy, and they were so excited that they didn’t know what to yell. These words didn’t have any practical meaning, just emotional vent!

Vardi felt like he was pressed out of breath, he didn’t understand how excited these teammates who could not remember his name.

He feels that this amateur team warm-up is not worthy of too much attention. He is a man destined to reach the peak. The Premier League and the Champions League are his stage.

But what he didn’t know is that for his unnamed teammates, such amateur games are their stage of life. They may also hope to play in the top league,

but if they return to reality, they still have to play in this amateur. The club plays football.

opponents are stronger than them, they were overwhelmed in the first half, and the score was still behind. Now that Valdy has scored such an explosive goal, how could they not be excited!

“Cough, cough, guys, if you still don’t let me get up, I think you will ask the boss to leave for my funeral tomorrow!” Valdi said it with difficulty under oppression before she escaped.

And at this time, the coach of the steel team on the sidelines gave a thumbs up to Vardi. At the same time, he was also very happy in his heart. It is really a wise move to put Valdi on the court!

Langley also smiled, and in this goal, he saw a lot of things, whether it is Valdy’s speed or explosiveness, it must be the top level in the same age group; in dealing with the ball, it is also very reasonable , At the time of the electric light fire, choose to shoot and break the goal, indicating that this is not a reckless man. At least he will not be dazed at the critical moment. In addition, the most important technical aspect, although only seeing his kick, there is no doubt. In such a high-speed sprint, he can still control the ball under his feet, indicating that he has a good foundation.

He really picked up the treasure. He has repeatedly raised the potential value of Valdy in his mind, but now he has suddenly found that he seems to have no way to judge the extent to which Valdy will reach in the future?

Golden Boy Irving?

or the super killer Henry?

Even Ronaldo known as an alien?

Langley didn't know, and didn't want to know, he had only one thought left in his mind now-at all costs to bring Valdy back to the Carrington training base.

He should belong there!

Opponent players see Vardy's expression is no longer full of jokes, this little fart kid who should have been nursing in their eyes has scored such a wonderful goal, especially the terrible speed, not at all. Those who could resist felt as if they had been deceived by Valdy's harmless animals and animals.

The game restarted quickly. After all, it was just a warm-up game, and there was no professional referee. Even David, a substitute player, rushed into the court and was not warned by a yellow card.

Although the score is still leading, the steel team's opponents have become cautious. Obviously, Valdi's goal just made the heart tremble. If the steel team fights back, I am afraid that it will make people unable to bear the **** long-distance attack. Staged.

The steel team will naturally not miss this opportunity, they have already burst into momentum, they started a Jedi counterattack, with the momentum of the bonus, they fight with the opponent in the midfield, and even can prevail. Such a scene in the game It is definitely rare.

The coach of the steel team turned on the roar mode again on the sidelines, telling the players how to play, and even Valdi was asked to rush forward!

rolled his eyes helplessly, Valdy would like to ask the head coach, do you know what is called offside?

And Langley re-seat back on the sidelines. Now that he has set his attention, there is no need to hesitate. Then I just know that I just enjoy the game.

Although the steel team has some advantages in the midfield, the opponent's strength is stronger than the steel team after all, so the steel team's offense is difficult to hit the opponent's hinterland, and it is difficult to really threaten the opponent's goal.

Valdy wants to retreat to take the ball, but the opponent doesn't give himself this opportunity at all. No matter where he goes, there will always be two players in front of or behind to trap himself, even not letting himself take the ball. Used his body to shock himself, and Vardy was not well on the court.

"Damn, these guys' muscles are harder than wood. UU reading www.uukanshu.com really doesn't know that the muscles used to practice this body are fart, and they are not playing amateur football!" The painful shoulder could not help but secretly slander.

Slowly, the opponent found that the steel team seemed unable to play any decent offense, so finally could not help but strengthen the strength in the midfield, and as a result, the steel team was beaten back to the original form, the midfield again lost, Was pressed back into the half.

It seemed that the scene was back before Valdy played, and some people couldn't help but think of the eye-stimulating goal just now.

Valdi did not aggressively **** as he did when he first played. He silently accumulated energy. It is best that everyone forgets himself, just like an assassin, hidden in the dark, unobtrusive, but at the crucial moment, but Suddenly appeared in front of everyone, cold light flashed, fatal blow...

Although Valdi seems to disappear on the field now, Langley's eyes appreciate it more. Now Valdi reminds him of Inzaghi and Rossi...

In fact, sometimes football is really unreasonable, just like in a game, if a forward is like a sleepwalker, then after the game he will be scolded by dog blood sprinklers, criticism is endless;

In the same situation, although the striker still sleepwalked the whole game, he suddenly came forward and scored a goal when no one could see him, so he became the team's hero.

It's hard to explain the truth, as if you can't boo Inzaghi because he didn't touch the ball for most of the game, because he didn't know when he appeared in the most dangerous position and sent the ball into the opponent's goal.

In Langley's eyes, Valdi is now hiding himself and waiting for the moment of the outbreak!
