

# I! GOD LEVEL ELEMENTALIST

## Chapter 14

"Ding! Congratulations to the host for completing the first god-level challenge, rewards have begun to be distributed....."

"Reward an ice beast core (level 4)!"

"Reward a first-level genetic medicine (perfect level)!"

"Reward a fragment of the Ice God Seal!"

Qin Feng thought, and there was an ice beast core in his hand.

He swallowed it directly.

The beast core quickly dissolved and turned into powerful energy, flowing to his limbs and bones, quickly strengthening his body, and his strength was increasing rapidly. promote.....

"Ding! Successfully swallowed the level 4 beast core...The ice quality reached 100%..."

The ice system has also reached the quasi-elemental master level.

Qin Feng couldn't wait to pull out the attribute light screen.

Challenger: Qin Feng (Lord Level)

Level: Level 5 (Quasi Elemental Master Realm)

Talent Skills: God Level Devouring

Combat Power Index: 500 points

"The combat power has just reached the threshold of a one-star elemental master. I also changed from elite level to lord level."

Qin Feng smiled.

On the surface, he is still a quasi-elemental master, but his strength is already comparable to that of an early one-star elemental master.

Now it is not an exaggeration to say that he is invincible at the same level.

The next second, Qin Feng's hands There was another test-tube-like glass, which contained a milky white potion.

Light screens popped up in his eyes.

Item name: First-level genetic medicine (perfect level)

Notes: This genetic medicine has no side effects and is 100 times more effective than ordinary genetic medicine.%

"There are no side effects! That's great!"

Qin Feng looked surprised.

There are four levels of genetic medicine on the earth, namely first-level genetic medicine, second-level genetic medicine, third-level, and fourth-level.

Taking first-level genetic medicine can make ordinary people become first-level genetic warriors..

However, this genetic medicine has strong body rejection, and the success rate is only 80%. Failure is death.

Even if the elemental master fails to take it, it will cause great harm, ranging from the reduction of talent to the disappearance of talent. It has even occurred. Death.

Therefore, the vast majority of elemental masters are unwilling to take genetic medicine and feel that there is no need to take the risk.

Besides, taking genetic medicine will only have limited improvement in their strength, and is far inferior to improving the power of elements.

This causes elemental masters and Almost no one who is a master of physical enhancement takes genetic medicine.

But it is undeniable that those who take genetic medicine will definitely be stronger physically and their strength will be improved.

"Chu Chu has no talent for cultivation yet! This genetic medicine has no side effects. I can give it to her and turn this little girl into a genetic warrior."

Qin Feng thought happily.

If it were replaced by ordinary genetic medicine, he would not dare to let Chu Chu take it.

"Ding! The system mall is activated and the host can check it by himself!"

Qin Feng was curious and pulled out the system light screen. As expected, there was an additional mall option.

He selected the mall and entered a sales page.

There are only four types of products in the mall, namely first-level genetic medicine (perfect level) and second-level genetic medicine. (Perfect level), Level 3 genetic medicine (Perfect level), Level 4 genetic medicine (Perfect level)

"There are so few products!"

"Ding! Prompt the host that the system mall will gradually upgrade according to the host's cultivation level, and more rare products will be sold."

"Currently, this mall is the lowest level 1 mall."

Qin Feng suddenly realized, and his heart was full of expectations.

According to this development, maybe he can make Chu Chu an elemental master in the future.

Chu Chu has a two-system physique.

During the original test, her ice sensitivity was 0.5, and there was a The system is an unknown and mysterious system. The sensitivity has reached 0.9, and the talent is almost awakened.

This made the staff who tested Chu Chu feel regretful.

The staff also said that Chu Chu's unknown and mysterious system has only three people in the world. It has been found on the body.

But the sensitivity is poor, and Chu Chu's is the highest.

What the specific series is, someone needs to practice to know, which also makes Qin Feng very curious.

Qin Feng continues to browse the products in the mall.

First-level genes The price of the medicine (perfect level) is 1.5 million coins.

The price is the same as the ordinary genetic medicines outside, which is really good value for money.

The second-level genetic medicine (perfect level), the price is 3 million coins.

The third-level genetic medicine (perfect level) ), the price is 5 million coins.

The fourth-level genetic medicine (perfect level), the price is 8 million coins.

The price of these genetic medicines is the same as outside, but the effect is 100% enhanced and there are no side effects.

Qin Feng saw a smile on his face..

Ordinary second-level genetic medicines can only be taken by first-level gene warriors, and the success rate is only 70%.

Only second-level gene warriors can take third-level genetic medicines, and the success rate is 60%.

Level-four genetic medicines can only be taken by third-level gene warriors. The success rate is 50%.

In this conversion, for an ordinary person to successfully become a fourth-level genetic warrior, the success rate is only 16.8%.

This is not only a matter of money, but also requires a lot of courage.

With these medicines, Qin Feng can do without Anyone who is dangerous will have completed the fourth-level gene enhancement for himself and Chu Chu.

The only thing he lacks now is money!

Thinking of money, Qin Feng clicked on the recycling option on the right side of the mall.

Here you can directly recycle crystal cores, or you can recycle ferocious beasts. The price of the corpse of the monster beast is the same as outside, which is very convenient.

Qin Feng recycled all the crystal cores he had obtained before and got more than 5 million coins in a blink of an eye.

Making money is so easy.

Then, he spent 4.5 million coins directly , bought the first-level genetic medicine and the second-level genetic medicine, and took them.

The first-level genetic medicine liquid entered the body, and Qin Feng felt hot and a little itchy. It seemed that every cell had been soaked and transformed, and the strength of the whole body was also quietly Increased.

He closed his eyes and immersed himself in the transformation silently.

This perfect genetic medicine took effect very quickly.

After ten minutes, all transformations were completed without any rejection.

"Ding! Congratulations to the host, the transformation was successful after taking the first-level genetic medicine (perfect level), and the combat power increased by 30 points....."

"Sure enough, the effect was enhanced by 100% ! "

Qin Feng was a little surprised.

Ordinary first-level genetic medicine can increase combat power by about 15 points.

Qin Feng couldn't wait to take the second-level genetic medicine

"Ding! Congratulations to the host, the transformation was successful after taking the second-level genetic medicine (perfect level)Combat power +40 points...."

Qin Feng brought up the character panel.

Challenger: Qin Feng (Lord Level)

Level: Level 5 (Quasi Elemental Master Realm)

Talent Skills: God Level Devouring

Combat Power Index: 570 points

"If I continue to develop at this rate, I will complete the fourth level of gene enhancement and my combat power will reach 700 points, which can be compared with a mid-level one-star elementalist."

The combat power threshold for a mid-level one-star elementalist is 700.

Qin Feng licked his lips, feeling a little unfinished.

He wanted to take the third-level and fourth-level genetic medicine now, but unfortunately he only had more than 1.3 million coins left.

It seems that this wish can only be fulfilled next time.....
