

I! God level elementalist

C 21-25

A night of silence.

Chu Chu played with his cell phone for half the night and then fell asleep unknowingly. Qin Feng practiced all night, and now he was racing against time to break through to the elemental master.

After practicing this night, he gained a lot.

Early this morning, he pulled out the training template and checked the progress of his training.

Practitioner: Qin

Feng Wind Realm: Quasi-Elemental Master (Divine Seal Completion Degree 52%)

Thunder Realm: Quasi-Elemental Master (Divine Seal Completion Degree 41%)

Ice Realm: Quasi-Elemental Master (Divine Seal Completion Degree 60.5%)

Talent Skill: God-level Devouring

Combat Skill: Violent Blow

Combat Power Index: 700 Points

After practicing this night, the completion degree of the wind and thunder divine seals increased by 11%.

The ice talent is worse, only increased by 0.5%.

But this progress has been extremely fast.

Lin Tianyang, who is known as the number one genius of the younger generation, only has excellent talents, and he is also from the ice system.

After practicing overnight, his divine seal completion rate was 0.05%, which was pretty good, and was incomparable to Qin Feng.

Therefore, Qin Feng is very satisfied with his progress.

At this rate, his wind element will break through to the elemental master within five days.

An hour later, both brother and sister finished washing.

Qin Feng started to make breakfast.

Chu Chu is taking care of the hygiene at home.

It is said that people feel refreshed when happy events occur.

This early in the morning, Chu Chu was in a particularly good mood. She mopped the floor and hummed a tune.

"Chuchu, after breakfast, we go to the city to buy you some equipment. Tomorrow, we will go on patrol mission"

"OK!", Chu Chu is very happy.

She has long dreamed of this day.

This is an era where girls worship force.

It can be said that they don't like red makeup, but love armed weapons.

"Brother, you are a Quanmin. As long as you reveal your identity, you won't have to perform patrol duties."

"Little girl, I am accompanying you on this mission to protect you!"

"Brother, you have already said that I am now more powerful than a quasi-elementalist. So what am I afraid of? Even if I encounter a ferocious beast, I won't be afraid anymore"

"What's more, I'm patrolling near the city, so I rarely encounter ferocious beasts, and it's even less likely to see monsters. There's nothing dangerous about it."

The little girl is very proud now.

With a little strength, she is starting to feel a little bit arrogant."

"Little girl, what do you know? You now have all the fighting power, but no fighting experience. How can my brother be relieved?"

Qin Feng patted the little girl's head angrily.

"oh!"

Chu Chu stuck out her cute little tongue and felt happy.

Brother really loves her.

"We have almost finished mopping the floor and have dinner together."

Qin Feng shook his head slightly and filled two bowls of the freshly made porridge.

He was telling the truth. Chu Chu has combat power now, but his fighting skills are lacking and he still needs to hone them.

However, he can improve in this aspect. Teach Chu Chu.

He has god-level fighting experience taught systematically.

Of course, even if Chu Chu has no fighting experience, with her current strength, even the fourth-level ferocious beast cannot hurt her.

Now, Qin Feng is not worried about ferocious beasts, but Lin Xuyang.

In the original earth world, tomorrow was the day when Lin Xuyang hit Chu Chu with his car.

Perhaps, in this world, tomorrow is the day when Lin Xuyang takes action against Chu Chu.

Therefore, Qin Feng must always protect Chu Chu.

At the same time, he must do more After breakfast

, the brother and sister took a taxi and went to the city center for shopping.

Qin Feng first bought several sets of beautiful skirts for Chu Chu.

The little girl put on new clothes, as beautiful as a little princess, attracting a lot of attention. Chu Chu was very happy

, and walked around in front of Qin Feng several times, asking Qin Feng if he looked good.

After the two of them purchased some daily necessities, Qin Feng bought some thermal weapons.

Then, the two went I bought two sets of monster armors from a large war gear store.

These monster armors cover more than 70% of the body. They are well-made and have a cool and domineering appearance. There are also many exquisite decorations on them.

They are all made of a Made from the skin of a star monster, it has high defense and can withstand attacks from level four monsters, and can also resist some attacks from one-star monsters.

Qin Feng and Chu Chu both like it.

However, these two sets of armor are not cheap. Buying two sets costs 2.3 million coins, which ordinary genetic warriors cannot afford.

Many genetic warriors wear alloy armors.

Those alloy armors are not as defensive as monster armors, and they are also extremely bulky and affect Speed.

Then, the two went to a high-end weapons store.

Chu Chu chose a women's long sword.

The hilt was inlaid with jade, and the blade was made of titanium-manganese alloy. It could break the defense of one-star monsters. It was both beautiful and powerful, and the price 1 million coins.

After this shopping trip, Qin Feng only had about 2 million coins left.

Qin Feng felt it was worth it.

With the armor and weapons, the overall strength of the two of them has improved a lot.

At least Yao Yao Below the beast, almost nothing can hurt Chu Chu.

The two continued shopping.

Soon they arrived at the entrance of a large genetic pharmacy.

Entering the door, there were many genetic warriors and many ordinary people. They were very popular.

Some people were holding I just bought the genetic medicine, and some people are holding test data or something in their hands.

"Brother, should we go in and take a look?"

Chu Chu became interested in this genetic pharmacy.

"Let's go!" Qin Feng was also a little interested.

The two entered the drugstore.

The store was exquisitely decorated, brightly lit, and the tiles on the floor were smooth and translucent, and people could be seen clearly in the reflection. The surrounding decoration was very high-end, and there were all kinds of exquisite large-scale Beautiful ornaments

"Hello sir! welcome to our store!"

A beautiful female shopping guide took the initiative to come over.

She looked at Qin Feng with a smile, and her eyes suddenly lit up.

Wow! This boy is so handsome!

This fair and delicate facial features, this gentle and jade-like temperament , it feels so comfortable to look at, and actually makes people feel excited.

The beautiful shopping guide was amazed by Qin Feng's appearance.

It was as if Qin Feng had his own light, lighting up the entire hall.

Qin Feng is a great person. Handsome guy.

After this period of practice, his temperament has become more and more outstanding, and the rate of turning heads is getting higher and higher.

In the hall, many women also saw Qin Feng, and they all showed stunning looks.

"Huh! That little girl is so beautiful!"

Many people also expressed admiration when they saw Chu Chu.

This brother and sister are very good-looking, and they attracted attention as soon as they appeared.

"Sir, are you here to buy genetic medicine? Our store is the only genetic pharmacy in Yunyang City. It has a history of a hundred years. The quality of our products has passed the standard and our reputation has always been guaranteed."

The beautiful shopping guide introduced her very professionally. Qin Feng took a look at her and found that this woman was a first-level genetic warrior with regular facial features and an excellent figure. She was a standard beauty with a curvy front and back. It seems that this woman

The background of this pharmacy is not simple, even the shopping guides are female genetic warriors

"I'll just take a look!", Qin Feng said casually

"Sir, let me take you on a tour and introduce you to some of the latest products. The success rate of these latest products has reached over 82%, which is the top level in the industry."

The beautiful shopping guide had a sweet smile. She had a strong interest in Qin Feng.

"good! Go check it out!", Qin Feng nodded casually.

But at this moment, roars came from the crowd in front

"Why?! Why don't you sell it to me! The market price of first-level genetic medicine is 1.5 million, and I offer 7.5 million, but you won't sell it. what do you mean?!"

This roar startled everyone.

Qin Feng followed the sound.

In the crowd, I saw a handsome young man whose face was red with anger.....

I! God level elementalist

Chapter 22

This roar startled everyone.

Qin Feng followed the sound.

In the crowd, I saw a handsome young man whose face was red with anger.

Another middle-aged man who looked like a pharmacy manager had a sad face and kept smiling.

Qin Feng could tell that the supervisor was a level four genetic warrior.

But the handsome young man is just an ordinary person.

At this moment, the handsome young man's face was full of anger:"Don't you think the money is too little? 5 times is not enough, then I will use 10 times! 15 million to buy your first-level genetic medicine!"

The supervisor almost cried: "Young Master Wang, It's not that we don't want to sell you. The Lord of the City has clearly ordered that our pharmacy cannot sell genetic medicine to you. Otherwise, we will all be severely punished! Prince, please spare us!"

"City Lord! City Lord! It's him again! How many times have I said this, this is my own business, and if anything goes wrong, it has nothing to do with you."

The handsome young man's neck turned red.

The supervisor begged: "Mr. Wang, it's okay if nothing happens. If something happens, we can't afford it!" You'd better let us go!"

"snort! You are all assholes! A bunch of gutless bastards!"

The handsome young man cursed angrily.

Then, he walked away angrily.

Everyone in the hall looked at each other.

"Who is that person? Why doesn't the city lord let you sell genetic medicine to him?" Qin Feng was a little curious.

The beautiful shopping guide whispered: "That's Mr. Wang, he is the grandson of the old city lord. He has no talent for cultivation, but he is not willing to be an ordinary person, so he wants to become a genetic warrior. But you also know that taking genetic medicine is dangerous"

"The son of the old city lord died in the beast wave in his early years, and now he is just a grandson. If something happened to his grandson, the old city owner would not even have a descendant, so the old city owner would not let his grandson take genetic medicine at all.

Qin Feng asked again: "How does this matter have anything to do with the city lord?"

The beautiful shopping guide said: "The current city lord is the apprentice of the old city lord. The city lord will naturally obey the old city lord's instructions. Today, there are only two places in Yunyang City that possess genetic medicine. One is the city lord's mansion, and the other is our pharmacy."

"As long as these two places are controlled, it will be almost impossible for the prince to obtain genetic medicine."

"Why! In fact, the old city lord has no choice. If the prince can leave a few descendants to the old city lord, maybe the old city lord will let the prince take the risk. But this prince

doesn't know what's going on. He just doesn't have a girlfriend and remains single all the time....."

The beautiful shopping guide started gossiping.

Qin Feng narrowed his eyes slightly, secretly thinking that this prince should be a rich man.

However, he is short of money!

"Madam, I'll come back later. Chuchu, let's go!"

"hello sir...."

Qin Feng ignored the beautiful shopping guide and took Chu Chu out.

As soon as he went out, he saw Prince Wang in front of him from a distance, cursing.

Behind the prince, there was an old man with gray hair, who seemed to be protecting the prince.

Qin Feng took a closer look and was surprised to find that the old man was actually a one-star wind elemental master.

Among elemental masters, ice masters, wind masters, and thunder masters are rare.

Five elemental masters such as water elemental masters, fire elemental masters, and earth elemental masters are very common.

At the same level, ice, wind, and thunder elemental masters are much stronger than five-star elemental masters.

Of course, in addition to the above elemental masters, there are other magical elemental masters, such as magnetic elemental masters, shadow elemental masters, beast elemental masters, etc., all of which have incredible abilities.

Another example is that Chu Chu has an elemental ability that has never appeared on earth and has not yet been developed.

Qin Feng did not hesitate and followed directly.

The old man was a mid-level one-star Feng Yuan master, but he was not Qin Feng's opponent yet.

Although Qin Feng is now a quasi-elemental master, his overall strength is comparable to a one-star Dzogchen

"Brother, where are we going?", Chu Chu curiously asked

"Follow me!", Qin Feng didn't explain much.

Not long after, he caught up with Mr. Wang

"Mr. Wang, I heard that you want to buy a first-level genetic medicine?"

Qin Feng's words cheered up the scolding Prince Wang.

When he looked back, he found that the other person was a boy of seventeen or eighteen years old, and he couldn't help but reveal a trace of disappointment.

What can such a young boy do?

However, , this boy is so handsome!

Mr. Wang was a little surprised, and the look he looked at Qin Feng was a little gentle.

Qin Feng got goosebumps inexplicably.

Why did this guy look so weird?

The beautiful shopping guide just kept talking. He said, for some reason, this prince has never found a girlfriend. How could a man like this, who has such a good family background and good looks, not be able to find a girlfriend?

Could it be that this prince...

Qin Feng seemed to have thought of something, and he was covered in There were more goosebumps.

However, for the sake of money, he still insisted on communicating.

"This little brother, what are you calling me for?", Prince Wang asked pleasantly.

"Mr. Wang, don't you want to buy first-level genetic medicine? If I say, I have one here, do you want to buy it?"

Qin Feng smiled and said what he meant.

Prince Wang was surprised:"What do you mean, you have a first-level genetic medicine in your body?!"

"good!", Qin Feng smiled and nodded.

"Boy, do you know what you are doing?"

The old man who was protecting the prince immediately came over and interrupted.

His expression was very unkind.

"Young man, the city lord has explicitly prohibited anyone from selling genetic medicine to my young master. Do you not know this rule or are you just ignorant?"

The old man was very unhappy. This young man is too ignorant.

If he does this, he will not only harm his son, but also himself.

"Uncle Liu, I am responsible for my own affairs. Don't worry!"

Master Wang was a little anxious.

He finally met someone who was willing to sell medicine to him, how could he just miss it.

But Uncle Liu sighed: "Master, have you ever thought about it? If something happens to you, this guy won't survive"

"But...but what if I succeed?", Prince Wang's tone was a little uncertain.

He looked at Qin Feng's handsome and flawless face, and suddenly he couldn't bear it.

If he really died, this young man would definitely be buried with him, which would be a cruel thing.

If it were replaced by Others, he had no such idea at all.

Uncle Liu sighed again: "Sir, you also know that you are different from ordinary people. Your constitution is highly resistant to genetic medicine. For ordinary people, the success rate of first-level genetic medicine is about 80%, but for you, it is only about 50%."

"If the success rate hadn't been so low, the old city lord wouldn't have stopped you from taking genetic medicine..."

Uncle Liu sighed helplessly.

"But.....", Prince Wang was not reconciled.

In fact, he was also very depressed.

He has a single-element constitution, but that element is very strange and has a strong repellency to genetic medicine.

However, the sensitivity of that element is 0.9, which does not meet the standard of awakening talent.

This resulted in him being unable to become both an elemental master and a genetic warrior. He could only remain an ordinary person.

This is a huge blow to him who is so strong.

"Young Master, there is nothing to be ashamed of. For your safety. I will stop you from trading."

After saying this, Uncle Liu looked at Qin Feng again and said seriously: "Young man, you are brightly dressed and have an extraordinary bearing. You are not like ordinary children. You should not be short of money."

"Even if you want to make money, don't engage in these opportunistic investments, as that will harm yourself. Just now, you heard everything clearly. My young master has a special constitution and is very resistant to genetic medicine. He only has a 50% success rate."

"Come to think of it, you also know the identity of my young master. If something happens to him after taking your medicine, you won't survive. A 50% chance of success is gambling, don't make fun of your own life. If you have any sense, you'd better leave quickly!"

As soon as these words came out, Prince Wang was in despair.

When most people heard this, they would definitely turn around and run away, how could they dare to trade.

This kind of thing has happened many times before.

Uncle Liu also waited quietly for Qin Feng himself Leave.

But without thinking, Qin Feng smiled and said: "Old sir, why should I leave? This time, my medicine is sold".....

I! God level elemental

Hearing Qin Feng's words, Prince Wang's eyes lit up.

This young man was so brave and did not let himself down.

Uncle Liu frowned:"Nonsense! Young man, why is it so hard to make money, why do you insist on gambling with your own life?"

Qin Feng smiled and said:"Old sir, who said I came here to gamble. I am sure that Wang The young master was promoted to a first-level genetic warrior because my medicine is a little special."

"oh? What kind of special law?", Uncle Liu asked casually

"My level of genetic medicine has no side effects and the success rate is 100%%"

"How can this be! Young man, do you think I am an ignorant old man?" Uncle Liu didn't believe it at all.

Even Prince Wang was doubtful:"Little brother, is your medicine really so miraculous?"

Qin Feng said with confidence:"The magic is not only the success rate, but also the amplitude effect on combat power is increased by about 100%."

"real or fake?", Prince Wang's eyes glowed.

It would be a lie to say that he was not looking forward to it.

Qin Feng changed his mind:"However, my master has spent countless years of time and effort on my medicine, and there is a huge amount of it. It was developed only with R&D resources. Today, the whole world only has one share. This is the price?"

"Little brother, as long as your medicine is really that powerful, money is not a problem. Tell me, how much is it?"

"This number!", Qin Feng stretched out two fingers.

Prince Wang smiled:"It's only two million. This is no problem!"

Qin Feng glared angrily:"I said 20 million!"

"What?! twenty million?!" Prince Wang thought he heard wrongly.

Uncle Liu immediately said angrily:"Master, don't you understand yet? This guy is a big liar! Ordinary first-level genetic medicine only costs 1.5 million, but this guy asked for 20 million, which suddenly increased more than ten times! He just wants to steal your money!"

As soon as these words came out, Chu Chu on the side quit.

She said unhappily: "Who said my brother lied? My brother told the truth. Also, you just shouted in the hall that you wanted 15 million to buy medicine. That is ordinary medicine, but our medicine is not ordinary. 20 million is not expensive at all!"

Uncle Liu sneered: "Little girl, you learn to lie to others at a young age." The success rate is 100% and the effect is enhanced by 100%. How could there be such a miracle medicine in this world? This is simply a miracle medicine!

Qin Feng smiled and said: "Old sir, you are right, this is the magic medicine!" Otherwise, I wouldn't sell it so expensively"

"Little brother, if what you say is true, I agree to trade with you for 20 million. But how can you prove that your medicine is real?" Mr. Wang took a deep breath. He was really tempted.

Qin Feng said confidently: "It's very simple! Before taking genetic medicine, a body rejection test is usually done. Mr. Wang, you can do a test first, then you will know whether it is true or false."

"That's right! Then let's go to the drugstore and do a test!"

Mr. Wang became even more curious.

Even Uncle Liu showed doubts.

Could it be that what this boy said was true?

This is impossible!

The group quickly returned to the pharmacy.

When the supervisor saw Mr. Wang coming back, he was so frightened that his legs became weak, this is an enemy

"Mr. Wang, why... why are you back?", the supervisor's voice was filled with tears.

Mr. Wang said angrily: "Don't worry! I'm not here to buy medicine this time. This time I came to do a physical rejection test. Manager Chen, is this okay?"

"no problem! no problem!"

Manager Chen nodded repeatedly and breathed a sigh of relief.

"Mr. Wang, then follow me into the testing room."

Director Chen enthusiastically led Mr. Wang and his entourage into the testing room.

The testing room was not small. There were several testing machines displayed inside, and many staff members in white coats were busy.

On the sofas at the door, there were Several test takers sit waiting for results

"Prince Wang, you can choose a bottle of medicine first, and we will do the rejection test. However, we agreed first that we would only do testing and not sell medicine."

Manager Chen said carefully.

"Who wants your medicine? Little brother, where is your medicine?" Prince Wang looked at Qin Feng politely.

Qin Feng had already secretly bought a bottle of first-level genetic medicine (perfect level).

As a result, the remaining money on his body was only 400,000 yuan.

He handed the bottle of genetic medicine to Director Chen.

Director Chen glanced at Qin Feng in surprise.

Did this guy want to sell medicine to Prince Wang?

Did he not want to live?

However, he didn't say much.

At this time , a beautiful staff member drew a tube of blood for Mr. Wang.

Then, Manager Chen took out a drop of liquid medicine from the medicine bottle, took some blood, and personally performed the rejection test on the testing machine nearby.

Mr. Wang and others People were waiting anxiously.

This test is very simple.

After a few minutes, the test results will come out.

As soon as Director Chen saw the test results, he was stunned

"The rejection rate is 0%? Xiao Zhou, come over and see if this machine is broken!"

"Director Chen, haven't the results come out yet?"Mr. Wang couldn't wait any longer.

Manager Chen hesitated for a moment:"Mr. Wang, the results are out. However, this test result should be wrong. I don't know if the machine is broken. I asked Xiao Zhou to come over and take a look."

"Oh, what's the result?"The prince is very concerned about this issue.

"Exclusion is 0% ! "

As soon as these words came out, there was an uproar around him.

Many people who were also testing shook their heads.

A gene warrior even laughed and said:"Haha!! 0% rejection rate? This is so wrong! Director Chen, there must be something wrong with your machine. Which gene in the world has a 0% rejection rate?" Medicine."

But Prince Wang and Uncle Liu were shocked.

The two looked at each other and couldn't help but look at Qin Feng.

I saw Old God Qin Feng sitting there, as if he had expected it.

Does this medicine really have a 100% success rate?

At this time, the staff member Xiao Zhou checked it for a while, scratched the back of his head, and said with a puzzled look on his face:"Director Chen, there is nothing wrong with this machine!"

"no problem? Could it be that my operation is not standard? Xiaoyan, come and test it again." Supervisor Chen asked a very professional subordinate to do the test. Soon, the subordinate also tested it.

She also looked surprised and said:"Supervisor, the result of my test is that the rejection is also 0!"

"What? Did you measure 0 too?!"Director Chen was stunned.

The testers around him also looked at each other and were a little surprised.

Mr. Wang stood up from his seat and said excitedly:"Director Chen, stop talking nonsense. Hurry up and arrange a medication observation room for me. I need to take medicine!"

"This... Mr. Wang, I don't know if this machine is broken. Let's try another machine to test it."

Director Chen is still a relatively responsible person.

The most important thing is that he is afraid that Mr. Wang will die in their pharmacy.

He does not believe that there are genetic medicines in the world with a 0% rejection rate.

But Mr. Wang is impatient: "There are so many things. Please arrange an observation room for me."

"Mr. Wang, I suggest you test it again.....", Manager Chen is really afraid that something will happen

"Young Master, it's not a bad thing to confirm again.", Uncle Liu also persuaded

"Oh well!" Young Master Wang was right, your life is still the most important thing.

At this time, another beautiful staff member came over and said with a smile: "Young Master Wang, I'm so sorry, I have to draw another tube of blood. Not enough blood! Mr.

Wang rolled his eyes weakly: "Sooner or later, I will be anemic by you!"

After drawing the blood, Director Chen quickly arranged for one of the most experienced personnel to change a machine for testing.

People around him also waited curiously.

A few minutes later, the results came out.

The rejection rate was still 0.

This Suddenly, Manager Chen and others were stunned.

The testers were even more commotion.

"Oh My God! There really is a drug with a rejection rate of 0!"

"Isn't that a miracle medicine?"

Prince Wang was extremely excited: "Haha!!" Director Chen, I just said there's no need to do so much. Hurry and arrange an observation room for me!"

"good! good! I'll make arrangements now!! Prince Wang, come with me!"

Manager Chen did not dare to neglect, and quickly led Mr. Wang and his group to leave.

As soon as they went out, the testing room became lively.

The testers grabbed the staff one by one and asked excitedly

"Is that drug a new variety developed by you? Say it! How much? I'm willing to pay double the price!"

"I want to buy it too! I'm willing to pay three times!"

A staff member quickly said:"Everyone, there is a misunderstanding! Misunderstand! That's the medicine Prince Wang brought himself. We don't have it in the store."

"I go! It belongs to Prince Wang himself!"

"Why! It seems we can't even buy it if we want to."

"hehe!! How can ordinary people get this magical medicine? Only a big shot like Wang Gongzi can get it!"

Everyone felt sorry.

Wang Gongzi and others did not go far.

Hearing the discussion in the testing room, Wang Gongzi felt secretly happy, as if he had got an incredible opportunity.

His mood instantly became much more relaxed.

People are like this, others What you can't get, but you can get, is happiness.

At that moment, Prince Wang's eyes changed when he looked at Qin Feng.

And Uncle Liu's eyes when he looked at Qin Feng also changed. There is indeed something real about this boy. , not like a liar.....

I! God level elemental

Manager Chen took Mr. Wang and others up to the second floor.

There are many medication observation rooms on the second floor.

Those who have bought genetic medicine can take it at home or take it in this pharmacy.

If you take it in a pharmacy, you need to sign a will and be accompanied by relatives and friends before you can take it.

After all, genetic medicine has a fatality rate.

But this prince was different. The medicine he brought had no objectionable properties, and Manager Chen could not find a reason to refuse it.

A high-end medication observation room was chosen, and Director Chen stood outside, waiting uneasily.

Although the test result of the drug is that there is no rejection, who can guarantee that if you continue to take it, there will be absolutely no problems?

If something happened, he would be in big trouble.

In the observation room, Qin Feng sat on the sofa, picked up the energy drink on the table, opened the can and took a sip.

This observation room is luxuriously decorated. In addition to the matching bed, it is also equipped with a dynamometer.

"Little brother, I'm ready to take the medicine. Is there anything else I need to pay attention to? Mr.

Wang asked politely.

Qin Feng took a sip of the drink and said casually: "There is nothing to pay attention to. Just drink it directly and you will see the effect in ten minutes."

"So fast!"

Both Prince Wang and Uncle Liu were a little surprised.

Generally, it takes three hours to strengthen genetic medicine.

Prince Wang no longer hesitated and drank the genetic medicine in one gulp.

After the liquid entered his body, Prince Wang's whole body felt hot, as if every cell All were activated, and there were bursts of itching.

He quickly closed his eyes and immersed himself in the transformation.

Uncle Liu watched nervously.

Ten minutes later, everything was transformed.

Prince Wang opened his eyes.

"Sir, how's it going?" Uncle Liu asked nervously.

He didn't feel anything like a ferocious beast from Mr. Wang.

Could it be that the enhancement failed?

Or was the medicine not effective at all?

Mr. Wang didn't speak, but there was a hint of excitement in his eyes.

He felt all over his body. They were all full of explosive power.

However, he wanted to confirm it.

He walked quickly to the dynamometer on the side and punched out with all his strength.

Boom~~!

A dull bang!

The eardrum vibrated!

Ding~~! Ding ~~!Ding~~!

The data on the electronic watch jumped rapidly, and finally settled on the value '30'

"30!"

Oh my God!

This effect is really enhanced by 100%.

Uncle Liu was shocked.

The combat power index of an ordinary first-level genetic warrior is about 15 points

"30! It's 30! Ha ha!! Uncle Liu, I have really become a genetic warrior, haha!!"

The prince was so excited that his eyes were a little red with excitement.

He had been looking forward to this day for so many years, but he didn't expect it to finally come true.

He finally became a first-level genetic warrior, and he was not an ordinary genetic warrior.

"good! good!!"

Uncle Liu showed a happy smile.

He had watched Mr. Wang grow up, and he hadn't seen Mr. Wang so happy for a long time.

After being excited, Mr. Wang walked to Qin Feng enthusiastically.

"Thank you so much, little brother. What's your bank card number? I'll transfer the money to you now!"

Qin Feng told him the bank card number.

Mr. Wang took out his mobile phone and started operating it.

In this era, mobile banking is very popular.

Many elementalists and gene warriors complete transactions in the wild in this way.

A few minutes later, Qin Feng's mobile phone Here comes the bank text message

"Your card number **5358, on August 9th, 20,000,000.00 Tong currency [Tonglian Bank] was received.

20 million was received!

Qin Feng showed a satisfied smile on his lips.

He can buy Doudou a level 4 genetic medicine (perfect level).

Prince Wang also had a smile on his face.

Both parties were happy.

"By the way, little brother, do you still have this kind of second-level genetic medicine in your hand? If there is, I can buy it for 40 million."

The prince is full of expectations.

He is the only grandson of the old city lord, so he is not short of money!

"this....", Qin Feng pretended to hesitate.

He really needs a lot of money now.

For example, buying a house, buying a luxury car, buying Yuanwu-level equipment, etc., all require a large amount of currency.

In particular, he needs a piece of Yuanwu-level equipment most now.

According to his training speed, he will become an elemental master in five days.

But once he becomes an elemental master, he will lose his last chance to challenge at the god level.

He had to complete the last god-level challenge before becoming an elementalist, but he was not sure he could pass it.

Unless, he can get another piece of Yuan-level equipment.

But the lowest-level low-grade Yuanwu is worth 100 million to 500 million, and he can't afford it.

"Little brother, if you have any questions, tell me!" Prince Wang asked uneasily.

Qin Feng sighed: "To tell you frankly, my master spent countless efforts and money to develop this genetic medicine. At present, he has only developed genetic medicines below level three, and level four has not been developed yet!"

"So, the little brother has Level 2 and Level 3 in his hands? Qin

Feng rolled his eyes: "Yes, there is, but it's just one bottle. My master just left it here with me and didn't ask me to sell it. I'm afraid of being blamed by the master!"

"Ha ha!! Little brother, what are you worried about? I can offer more. Even if your master knew about it, he wouldn't blame you. Let's do this, I want both the second and third levels, and I'll pay 150 million!"

As soon as these words came out, Chu Chu was moved by it.

Is the price too high?

Uncle Liu couldn't help but said: "Sir, I think 100 million is about the same. But Mr.

Wang shook his head: "Uncle Liu, can my little brother's medicine be compared with ordinary medicine?" Its medicine is not only safe, but also twice as effective as ordinary genetic medicines. This is a miracle medicine! As the saying goes, it's hard to buy a good thing, but I am willing to spend this money!

Chu Chu also interjected: "That's right!" With ordinary first-level genetic medicine, Wang Gongzi's success rate is only 50%. If you replace it with a second-level gene medicine, the success rate is probably less than 30%. Using it is almost equivalent to death."

The little girl spoke freely.

But the expressions of Mr. Wang and Uncle Liu changed slightly after hearing this.

Not to mention, what this little girl told is the truth.

Mr. Wang has no way to take ordinary genetic medicine.

The little girl continued: "Besides, what is the status of Prince Wang? Your life is worth even 200 million, let alone 150 million.

Prince Wang suddenly realized: "Not bad!" My young master just said it was too little. Little brother, I am willing to pay 200 million! I hope my little brother will sell me the medicine!"

"Forehead....", Qin Feng glanced at Chu Chu in surprise.

I didn't expect that this girl has such a skill.

It seems that I got it from going to the vegetable market every day to buy food.

"Little brother, just sell it to me!"

"All right! Mr. Wang is so sincere, even if the master turns around and scolds me. I admit it too!"

"Ha ha!! Thanks a lot, little brother!"

Mr. Wang laughed heartily and looked at Qin Feng with a kind of tenderness.

Qin Feng felt a little numb, why did this guy look at people so weirdly.

At that moment, the two of them finished happily. Transaction.

Prince Wang was very happy to get the medicine and transferred the money directly.

This guy is not short of money.

After a few minutes, 200 million arrived, and Qin Feng felt extremely happy.

Making money is so easy!

Liu on the side Bo looked very regretful.

He regretted that he talked too much. If he had not interrupted, he might have completed the deal with 150 million.

However, he also saw that his young master was so generous and seemed to intend to make friends with this young man.....

I! God level elementalist

Soon, Prince Wang finished taking the second-level genetic medicine and the third-level genetic medicine.

Everything went very smoothly without any rejection.

After the genetic medicine was completely modified, Prince Wang couldn't wait to walk to the dynamometer and punch out.

Bang~~!

The huge attack power made the whole room tremble.

Outside the door, Manager Chen was so frightened that he dropped the cigarette butts in his hand.

What a powerful attack!

Was it an attack from a level four gene warrior just now?

This doesn't look like it!

Level four genetic warriors simply don't have such a strong attack!

In the room, Prince Wang and Uncle Liu were completely stunned.

Both of them stared blankly at the number on the monitor - 127.

127?

OMG!

Not to mention the fourth-level gene warriors, even the quasi-elemental masters don't have such high combat power!

The combat power of a fourth-level genetic warrior is generally around 90 points.

Quasi-elementalist is about 100 points

"Am I that strong?!"

Master Wang looked at his fists in disbelief.

This is only a third-level genetic warrior!

Uncle Liu couldn't help but swallowed.

He was a little tempted.

Of course, he just thought about it.

It really made him But he didn't dare to take it.

Because taking genetic medicine, there is a 90% chance that the cultivation qualifications will be reduced, which is a common sense.

Elementalists attach great importance to the cultivation qualifications, and no one is willing to lose a big thing for a small amount.

Naturally, he doesn't know, Perfect genetic medicine without any side effects

"Worth it! It's so worth it!"

Master Wang was extremely happy.

"Little brother, you are my friend. My name is Wang Xiao, what is your name?"

"Qin Feng!"

"Brother Qin Feng, what is your WeChat ID? How much is the mobile phone? Add your contact information!"

Wang Xiao is very enthusiastic.

In this era, there are mobile banks, various social software such as WeChat, and even Meituan Takeout, but there is no Taobao.

For no other reason, human base cities are surrounded by ferocious beasts and monsters. Online shopping cannot take shape.

You can't let an elementalist work as a courier!

In addition, there is no talent named Ma Yun in this world.

Qin Feng sometimes thinks, if he cleans up all the vicious beasts and monsters in the future After all, building a shopping platform similar to Taobao will definitely be very profitable.

Wang Xiao is interested in making friends with Qin Feng.

Qin Feng did not refuse.

The two parties exchanged contact information.

Wang Xiao said with a flattering look: "Brother Qin Feng, Your master must be a very expert. I wonder, how is his research on the fourth-level genetic medicine going?"

"There is still some heat left, so it will probably take some time to figure it out.", Qin Feng was talking nonsense.

"oh!" Wang Xiao nodded repeatedly, "Brother Qin, if your master develops a fourth-level genetic medicine in the future, remember to be the first to notify me! I want to buy!"

Qin Feng sighed: "Hey! Brother Wang, this time, I still don't know how to explain to the master, that level four genetic medicine....."

Wang Xiao patted Qin Feng on the shoulder: "Brother, whether I can become a fourth-level genetic warrior in the future depends on you. I hope you can help me with this matter. I owe you a favor.""

"Okay, I'll try my best! Wang Xiao was overjoyed:"

Qin Feng, from now on, you are my brother." If you need anything in the future, just come to me. In this Yunyang City, my words are of some use!"

Qin Feng smiled and didn't say much.

Then, a group of people left the observation room.

Manager Chen at the door breathed a big sigh of relief when he saw that Wang Xiao was safe and sound.

"Prince Wang, have you succeeded?", Manager Chen asked curiously

"Of course! My brother's medicine is a miracle medicine, not comparable to your medicine.", Wang Xiao was in a very happy mood

"yes! yes!", Supervisor Chen smiled fawningly.

But he was shocked in his heart.

Oh my god!

The genetic medicine with 0% rejection is actually real!

This is incredible!

Supervisor Chen immediately looked at Qin Feng, with a look on his face. Smiling ingratiatingly: "Little brother, are you interested in letting us have a chat?"

Manager Chen seemed to smell a business opportunity.

"Feel sorry! I have something else to do!" Qin Feng lacked interest.

He didn't want to sell perfect genetic medicine in large quantities, which would weaken Chu Chu and his own basic advantages. He could just sell a little bit occasionally.

"Ha ha!! Little brother, if you don't have time this time, we can talk next time. This is our business card. If you are interested again that day, you can contact me directly."

Manager Chen handed over a business card enthusiastically.

Qin Feng put it away casually.

Wang Xiao thought for a moment and then looked at Director Chen seriously: "Manager Chen, this is my brother. If nothing happens in the future, don't disturb my brother, otherwise I will be in a bad mood and you will be uncomfortable too."

These semi-threatening words startled Director Chen.

Who is Mr. Wang?

He is not a second-generation official who just waits for death and does not do any serious work all day long.

He has a wide network of contacts in private, is good at communication, and is himself He is a powerful character. He is very prestigious in the circle of second-generation officials.

This is also related to his strong character.

If he hadn't been unable to practice, he would have become famous throughout Yunyang City. How dare he offend Director Chen?

"Ha ha! Prince, you are joking, I will not disturb my little brother unless he takes the initiative to contact me."

Wang Xiao smiled lightly and didn't say much.

Manager Chen naturally didn't dare to pester Qin Feng anymore.

Then, the group left the pharmacy

"Qin Feng, we need to contact and communicate more in the future."

"Easy to say! Easy to say!"

The two parties parted.

Before leaving, Wang Xiao's eyes were a little reluctant to leave.

Qin Feng felt a little numb, and he pulled Chu Chu away as if running away.

Not long after, the two came to a remote alley.

Chu Chu suddenly said: "Brother, I think that Prince Wang is a little weird!"

"good! I also think he's a little weird!", Qin Feng nodded repeatedly.

Chu Chu smiled and said: "I said he is strange because he smells so good and his skin is so white. He can't be a woman, right?"

"What are you talking about?" Qin Feng patted the little girl on the head angrily, "Don't you see that his chest is so flat?"

As soon as he said these words, Qin Feng regretted it.

He found that the little girl's pretty face was red, and it seemed that he had let something slip.

This little girl's breasts are not flat. She must be thinking wildly.....
