

I Play Yu-Gi 1081

Chapter 1081: Gaia VS Stardust

“Then it’s my turn, draw.”

Although President Kaiba had developed a D-Wheel prototype, it was obviously not comparable to future technology. For example, the “autopilot” system that was common in the 5DS timeline was not available now.

In other words, Yuei Vu’s first “Riding Duel” could not rely on computer-controlled autopilot, and must be manually driven by the driver himself.

Yuei Vu had to play cards while riding a bike, which was indeed a difficult job for a first-time riding duelist.

Fortunately, Yuei Vu had already prepared for this day. Because he had long predicted that riding a motorbike and playing cards would be the future trend, Yuei Vu had also asked Kaiba to design a special motorbike for him, and he usually trained in driving skills—especially the skill of riding a motorbike and playing cards at the same time.

So although it was his first experience, he was not completely unfamiliar with it.

"Activate the Spell Card ‘Graceful Charity’." The D-Wheel galloping under Yuei Vu flipped out a green Spell Card, "Draw 3 cards, then discard 2 cards."

The hand changed, and then he showed another card in his hand.

"The effect of ‘Gaia the Magical Knight!’" Yuei Vu said, "This card can be directly Normal Summoned without Tributing if I control no monsters, or the opponent controls a monster with 2300 or more ATK."

Come on, Gaia the Magical Knight!"

The neighing of the horse and the sound of horse hooves seemed to approach from the void. The red horse rushed out in the wind, with a dark cloak flying behind the knight and a pair of spiral double guns in his hands.

[Gaia the Magical Knight, ATK 2300]

Yusei's D-Wheel galloped in front, and there was dust behind the tires. He turned his head and looked through the windshield at the knight who appeared from Yuei Vu's side and rode his horse and walked on the side of the D-Wheel. His mind moved slightly.

"Are you using the Gaia deck this time?"

"Gaia the Magical Knight's second effect!" Yuei Vu said, "If this card is Normal or Special Summoned: I can Special Summon 1 Level 5 Dragon monster from my hand or GY in Defense Position."

He drew another card in his hand.

"I special summon the Level 5 Dragon in my hand – ‘Curse of Dragonfire!’"

The red flames swirled into a vortex on the field, and the flames burst out. The golden dragon, whose body was burned red, rushed out and spread its wings from high above!

[Curse of Dragonfire, DEF 1500]

"Next is the effect of 'Curse of Dragonfire!'" Yuei Vu swept his arm, "Once per turn, I can Fusion Summon 1 Fusion Monster from my Extra Deck, using monsters I control as Fusion Materials, including this card!"

He picked up two cards on the Duel Disk in one breath.

"I use the two monsters on the field, 'Curse of Dragonfire' and 'Gaia the Magical Knight', as materials for fusion!"

The fusion condition is 1 'Gaia The Fierce Knight' monster + 1 Level 5 Dragon monster! Fusion Summon!

The golden storm, the knight who controls the cursed dragon——

——Gaia the Magical Knight of Dragons!!!"

The golden dragon and the knight on the horse disappeared in the galloping wind, and a beam of fire stabbed out like a sword! The golden dragon spread its wings and flew up from the flames. The knight waved his spiral double guns in both hands, and the whirlwind of fire pierced through the sky and the earth.

[Gaia the Magical Knight of Dragons, ATK 2600]

"The effect of Gaia the Magical Knight of Dragons," Yuei Vu waved his hand, "Target 1 other card on the field; this card loses exactly 2600 ATK, and destroy that card."

I destroy the 'Stardust Dragon!'"

Yusei's eyes moved slightly.

Thinking back to the time when chasing the future man Paradox, Yusei had fought side by side with Yuei Vu. Others may not know the Synchro Monster "Stardust Dragon" from the future, but Yuei Vu should remember its effect.

Stardust Dragon could invalidate and destroy any effect that included "destroy cards". It was the natural enemy of card-blasting effects, and it happened to be in a restrained relationship with "Gaia the Magical Knight of Dragons" that relied on card-blasting.

Mr. Yuei Vu knew this and deliberately activated Gaia's effect. Is it a trap?

Yusei's mind raced in a flash, but he finally chose to go with the flow.

"Activate the effect of Stardust Dragon!" Yusei counterattacked unceremoniously, "When a card or effect is activated that would destroy a card on the field, I can Tribute 'Stardust Dragon'; negate the activation and destroy it! Victim Sanctuary!"

The Stardust Dragon spread its wings and flew into the air, emitting a sharp and high-pitched dragon roar. The light of the star points covered the entire body of the silver dragon, causing it to gradually dissipate, and a layer of transparent silver-white light immediately bound and enveloped the spiral spear stabbed by Gaia.

The domineering energy backfired, and it seemed that Gaia himself was about to be blown to pieces.

But at this moment, Yuei Vu quickly pulled out Gaia on the duel disk and showed another card in his hand.

"At this moment, the effect of 'Soldier Gaia the Fierce Knight' in the hand is activated!" Yuei Vu said, "This card can be Special Summoned from the hand by Tributing a Dragon Fusion Monster on my field.

This effect can also be activated during the opponent's turn!

I offer the 'Gaia the Magical Knight of Dragons' on the field as a sacrifice to Special Summon 'Soldier Gaia the Fierce Knight'!"

The Magical Knight of Dragons, who was locked by the Stardust Dragon's counterattack, immediately turned into a light spot and dissipated from the field. The silver-white impact was fierce and fell into the air. The Soldier Knight took his place immediately, wearing gorgeous blue armor, holding a silver trident, and a flying cloak behind him.

[Soldier Gaia the Fierce Knight, ATK 2600]

Yusei's mind moved slightly.

Is the purpose to lure me to use the effect of Stardust, and use the second attack to cause greater damage?

"Battle!" Yuei Vu said, "Soldier Gaia the Fierce Knight, attack Yusei directly!"

The Gaia Warrior flying beside him suddenly accelerated and flashed to the side of Yusei's D-Wheel as fast as a flash. The trident drew a scarlet trajectory and chopped him down without saying anything!

But Yusei still had a defense method!

"Open the set card: Trap Card - Scrap-Iron Scarecrow!" Yusei said, "When an opponent's monster declares an attack: Target the attacking monster; negate the attack!"

The Gaia Warrior's trident attacked fiercely, but only a simple and ridiculous scarecrow was released from the flipped trap, and the red eyes seemed to be mocking.

The trident hit the scarecrow's body violently, and sparks flew like raindrops. The scarecrow shook violently, and quickly retracted into the trap card, and returned to the covered state.

"'Scrap-Iron Scarecrow' will not be sent to the graveyard after activation, but can be Set back to the field instead," Yusei explained.

Some of the students watching were shocked.

"If it is not sent to the graveyard, does it mean that it can block an attack every turn?"

"Is this too strong?"

Yuei Vu was not surprised, and just quietly drew two cards.

"Set two cards, I end my turn."

"At this moment, the effect of Stardust Dragon in the graveyard is activated!" Yusei said, "Stardust Dragon Tributed by its own effect can be Special Summoned from my GY at the end of the turn.

Fly again——

——Stardust Dragon!!!"

The starlight fell, and the silver-white dragon rushed out of the vortex of the underworld again, dragging the starlight all over the sky, and the brilliance seemed to be even brighter than before!

[Stardust Dragon, ATK 2500]

"It's my turn next, draw!"

A new card was drawn, and the D-Wheel rushed through another corner with the pleasant hum of the perpetual motion machine.

At this time, they had already run half a lap along the temporary track.

"I activate the effect of Jet Synchron in the Graveyard." Yusei removed a card from the Graveyard. "If this card is in the Graveyard, send a card from my hand to the Graveyard, and Jet Synchron can be Special Summoned from the Graveyard.

If this card Special Summoned by this effect leaves the field, it will be removed from the game without being sent to the Graveyard.

Come on, Jet Synchron!"

A card from your hand was discarded to the Graveyard, and then a rocket-shaped anthropomorphic small machine immediately rushed out, with a dazzling golden tail flame sprayed from its tail.

[Jet Synchron, ATK 500]

"The card I just sent to the graveyard is 'Stardust Xiaolong'." Yusei continued, "If I have 'Stardust Dragon' on my field, I can directly special summon it from the graveyard in face-up Attack Position.

Resurrect from the graveyard, Stardust Xiaolong!" (anime effect)

The stars shone, and a miniature version of Stardust Dragon jumped onto the field, galloping along the side of Yusei's D-Wheel.

[Stardust Xiaolong, ATK 100]

Yuei Vu looked at the formation on Yusei's field and quickly realized something.

Stardust Dragon, one Tuner, and one non-Tuner...

Is it coming?

Many players also began to realize it, and they became restless, saying things like "Accel Synchro" and "Clear Mind" that others couldn't understand, and they kept shouting one after another.

"Mr. Yuei Vu!" Yusei said with a sudden rise in his voice, "I told you that we must go all out in this duel! Then please see the further evolution of Synchro Summon!"

The hope and answer for the future are hidden in the high speed of the Riding Duel!"

As he said this, he waved his hand.

"Level 1 Tuner Monster 'Jet Synchron', Level 1 'Stardust Xiaolong', tuning!" Yusei shouted, "Gathering wishes will call out a new speed's horizon! Become the path that lights the way! Synchro Summon! The power of hope –

– Synchro Tuner, Formula Synchron!"

[1+1=2]

The two monsters turned into starlight and disappeared, and a small monster with an anthropomorphic racing car shape immediately appeared on the field.

[Formula Synchron, DEF 1500]

The students who had not yet fully accepted the new setting of "Synchro Summon" were even more confused at this time. They didn't know how powerful the new monster summoned by Yusei was.

But President Kaiba, who has been studying "Synchro Summon" for many years, immediately noticed the abnormality.

Synchro Tuner?

Normally, the summoning condition of Synchro Monsters was "1 Tuner + 1 or more non-Tuner monster", and "Synchro Summon" could be achieved when the combined Levels of the materials were equal to the Synchro Monster's Level.

The simplest example was the Level 3 Tuner monster "Junk Synchron" plus the Level 2 non-Tuner "Speed Warrior" could Synchro Summon the Level 5 "Junk Warrior".

But the monster that appeared in front of him actually had both the identities of "Synchro Monster" and "Tuner Monster"!

In other words, this Synchro Monster originally existed as a springboard for a more powerful monster?!

Kaiba, who was watching the game in the office, quickly smelled something strange. He quickly sat up straight, full of anticipation for what might happen next.

What he was going to witness next might be a brand new attitude of Duel Monsters after its evolution, and a brand new future for the game!

And of course, Yusei would not let him go so smoothly.

"Open the set card: Trap Card – Spiral Reborn!" A face-up card next to Yusei turned over, "Special summon 1 Level 7 or lower Dragon monster in my GY."

A card was withdrawn from the graveyard area and was taken by Yusei.

"I special summon 'Gaia the Magical Knight of Dragons' in the graveyard!"

The black vortex opened, the golden storm carried the hellfire, and the knight returned from the depths of the underworld with two spears in hand and a golden cursed dragon astride.

[Gaia the Magical Knight of Dragons, DEF 2100]

Yusei quickly thought of something: "The effect of this card is..."

"The effect of 'Gaia the Magical Knight of Dragons' is activated!" Yuyu stepped on the accelerator and accelerated to the side and rear of Yusei, "Once per turn, target 1 other card on the field; this card loses exactly 2600 ATK, and destroy that card.

This effect can also be activated during the Main Phase of the opponent's turn."

He pointed directly at Yusei's field.

"I reduce the attack power of 'Gaia the Magical Knight of Dragons' by 2600 points, and destroy 'Formula Synchron'!"

[Gaia the Magical Knight of Dragons, ATK 2600 → ATK 0]

As the attack power decreased, the Hellfire Dragon opened its mouth, and the surging flames and the power of the Dragon Knight were poured into the red spiral spear in his hand, and it was thrown into the air as his arms danced!

Yusei said without hesitation: "Then activate the effect of 'Stardust Dragon'!

When a card or effect is activated that would destroy a card on the field, I can Tribute this card; negate the activation, and destroy it!

Victim Sanctuary!"

The power of Stardust was activated, and the silver-white noble dragon turned into starlight again. The brilliance dissipated like raindrops, and the spiral beam blasted by Gaia dissipated and disintegrated immediately.

However, when the power of Stardust Dragon backfired and blasted toward the face, Gaia crossed his arms, and the two spiral spears overlapped in front of him to resist the impact of the starlight.

"Another effect of the Trap Card 'Spiral Reborn.'" Yuei Vu said, "If the monster resurrected by 'Spiral Reborn' is 'Gaia the Dragon Champion', that monster will not become the target of the opponent's card effects, nor will it be destroyed by the opponent's card effects.

Therefore, the resurrected Gaia will not be destroyed by the effect of 'Stardust Dragon'."

At this time, Marufuji Sho was confused: "But, if he knows that the effect will be negated, why does he deliberately reduce Gaia's attack power to activate its effect?

Obviously, 'Stardust Dragon' will return to the field at the end of the turn."

"I don't know." This time, even the outstanding student representative Misawa Daichi was a little confused, "But since this is Principal Yuei Vu, he must have his own considerations."

Yusei glanced at Yuei Vu who was accelerating behind him.

As expected of Mr. Yuei Vu, he actually destroyed the "Accel Synchro" formation by intuition?!

The combination of "Formula Synchro" and "Stardust Dragon" could call out Yusei's new trump card.

However...

"I activate the effect of 'Formula Synchron'," Yusei said, "Once per turn, draw a card from the deck." (Animation effect)

Yusei paused and said, "Mr. Yuei Vu, your intuition is indeed very accurate. If Stardust Dragon is not on the field, I can't summon a new trump card here.

But I have a countermeasure for this!

Open the set card: Trap Card – Stardust Flash! Target 1 'Stardust' monster in my GY; Special Summon it!

Fly again, Stardust Dragon!!!"

The shining starlight gathered into a vortex, like a storm rushing into the sky, and the silver-white dragon bloomed with starlight again!

[Stardust Dragon, ATK 2500]

Marufuji Sho: "Ah, Stardust is back on the field."

Yusei stepped on the accelerator hard, and the perpetual motion machine of the D-Wheel cheered as if it couldn't wait.

"Please watch, Mr. Yuei Vu! Ahead of the road to the duel, there is a miracle called 'Accel Synchro!'"

Chapter 1083: Accel Synchro

After the words fell, the onlookers shouted and acted very excited, just like they were riding and playing cards on the track.

Kaiba also raised his eyebrows when he heard Yusei's words.

Accel Synchro? What is that?

Yusei stepped on the pedal of the D-Wheel and stepped on the throttle to the limit! Countless Planetary Particles burst out with the operation of the perpetual motion machine, covering the entire D-Wheel and the monsters following Yusei on both sides.

The D-Wheel accelerated at an astonishing rate and quickly opened up the distance between it and Yuei Vu. Even the oncoming wind and air waves seemed to be burned red!

Clear Mind!

That was a new realm that only the top D-Wheelers could comprehend, and this realm was also a prerequisite for entering the field of "Accel Synchro".

This was exactly the direction of Yusei's evolution as a duelist!

"Level 2 Synchro Tuner 'Formula Synchron', Level 8 'Stardust Dragon', tuning!"

With extreme acceleration, a milky white hemispherical shield appeared in front of the D-Wheel. Formula Synchro turned into two shining stars, and the ring formed wrapped Stardust Dragon and Yusei's D-Wheel together, reaching an ultra-high speed that humans could not imagine in a very short moment!

"Gathering dreams crystallize to open a new door of evolution! Become the path that lights the way! Accel Synchro!!!"

The Stardust Road was paved in the void, and the D-Wheel rushed straight out along the shining avenue until it disappeared out of thin air and disappeared from the track!

Everyone was shocked and could hardly believe their eyes.

What kind of operation is it that someone disappears while playing cards! ?

Not only did Yusei disappear in the live screen, but the icon representing Yusei on the duel field also disappeared in this brief moment.

It's like he evaporated from the face of the earth!

Kaiba, who was sitting in his office, also widened his eyes, staring at the scene unfolding on the screen without blinking.

He believed in science and firmly believed that everything could be explained by science.

There must be a reasonable explanation for the disappearance of a person in playing cards!

"Behind!" Mokuba was the first to shout.

Sure enough, a beam of light chased up from behind Yusei. Somehow, Yusei's D-Wheel rushed out from behind him again, passed by Yusei at an outrageous speed, and returned to the track in front again.

At the same time, rushing out with him, there was also the extremely gorgeous white dragon that rushed out like a meteor across the sky!

"Arise——

——Shooting Star Dragon!!!"

Like a meteor piercing the sky, the white dragon swooped down, drew a gorgeous and chic arc in the sky, and then slowly fell to Yusei's side.

[Shooting Star Dragon, ATK 3300]

"Shooting Star Dragon..." Misawa looked bewildered, "Such a powerful monster is unheard of!"

Is that dragon even more powerful than my Blue-Eyes?

While thinking, President Kaiba's soul of a duelist in his heart was also getting more and more restless and could not be restrained.

"Brother, the energy reading is soaring rapidly!" Mokuba's voice was a little excited, "The appearance of this dragon has greatly increased the duel energy. There is hope if this continues!"

Yusei returned to the field after a gorgeous space jump on his D-Wheel, and the duel continued immediately.

"Then the effect of 'Shooting Star Dragon' is activated!" Yusei waved his hand, "Once per turn, I can look at the top 5 cards of my Deck, and this card can make as many

attacks on the opponent's monsters as the number of Tuner monsters among those cards!"

"The effect of multiple attacks!" Marufuji Sho said.

"But the number of attacks must be increased according to the number of confirmed 'Tuner Monsters'." The gold medal commentator Misawa responded again, "If it is based on the number of confirmed monster cards, it is easy to say, but not only does it require monster cards, but it is also limited to Tuner monsters. From a probabilistic point of view, the possibility is not high.

It stands to reason that the possibility of not having any Tuners among the five cards randomly excavated from the deck should be very high. One Tuner is already very good."

At this time, Yusei has turned over the top five cards in one breath, glanced at them, and immediately displayed them.

"Among the five cards I excavated, there are 'Drill Synchron', 'Turbo Synchron', and 'Effect Veiler', three Tuners!" Yusei said, "Therefore, Shooting Star Dragon can attack three times this turn!"

"What!?" Many onlookers were shocked.

Especially some players have started to make a commotion.

"Don't lie to me! The effect of Shooting Star Dragon is clearly 'give up the opportunity to attack this turn and reshuffle the deck!'"

"Why can't my Shooting Star Dragon attack even once when other people's Shooting Star Dragon starts with three consecutive attacks?"

"Don't ask, the answer is that your bond with the deck is not enough."

On the other hand, President Kaiba seemed very calm about the result. His expression seemed to say –

– Hum, isn't this inevitable for a real duelist?

"..."

Of course, Yusei Vu, as the person involved, was not surprised at all.

After all, according to the animation, Shooting Star Dragon's three consecutive attacks were also Yusei's regular performance. In ordinary duels, as long as he activated the effect of Shooting Star Dragon, it was usually three consecutive attacks.

If the plot required it or the opponent was very strong, it was often five consecutive attacks.

Of course, even for players with hairstyles like Yusei, the five consecutive attacks required the power-up of BGM.

"Battle!"

Yusei raised his hand, and at the same time, the Shooting Star Dragon in the air was split into three, transforming into red, blue, and yellow Shooting Star Dragon afterimages.

"First, the first shot," Yusei waved his hand, "Use 'Shooting Star Dragon' to attack 'Soldier Gaia the Fierce Knight!'"

The red afterimage flew out, and the Shooting Star Dragon pierced through the solid armor on the chest of the Gaia Warrior. Gaia groaned miserably, and exploded after being penetrated from the chest to the back.

[Yuei Vu, LP 4000 → LP 3300]

"Second shot!" Yusei said, "Shooting Star Dragon, attack 'Gaia the Magical Knight of Dragons'!"

The second phantom locked onto the remaining dragon knights on Yusei's field!

"Monsters revived by 'Spiral Reborn' cannot be destroyed by card effects, nor can they be the target of card effects," Yusei said, "but they can be destroyed in battle!"

"That's not necessarily true." Yusei grabbed the handlebars with his left hand and swept his right arm, "Open the set card: Trap Card – Intrigue Shield! Equip it to 'Gaia the Magical Knight of Dragons'!"

Gaia immediately had a shield with complicated patterns in his hand, and the phantom of the Shooting Star Dragon slammed into the shield and exploded, but failed to cause any substantial damage.

"Monsters equipped with 'Intrigue Shield' cannot be destroyed by battle once per turn." Yusei said, "and the battle damage caused to the player is also 0."

"But it's only once!" Yusei said, "Shooting Star Dragon, the third shot! Stardust Mirage!"

The third phantom, this time it was a blue Shooting Star Dragon! As if it was going to penetrate even the space itself, the afterimage left by the meteor split the sky and pounced on the dragon knight on Yusei's field again!

But it still didn't work!

The phantom exploded on the shield again, and the dive bombing of the Shooting Star Dragon was bounced back, and once again failed to cause even the slightest impact.

"What?" Yusei was a little surprised.

"The effect of the 'Shield Warrior' in the graveyard," Yuei Vu withdrew a card from his GY, "During damage calculation, in either player's turn: I can banish this card from my Graveyard; monsters I control cannot be destroyed by this battle."

"Beautiful!" Aster clenched his fist and praised, "All three attacks were tanked, worthy of being Principal Yuei Vu!"

Yusei also nodded slightly to express his admiration, and at the same time, the three phantoms overlapped together again, and turned back into the silver Shooting Star Dragon.

"Then my turn is over."

Chapter 1084: Breaking The Blockade

Yusei's turn ended, and the electronic screen of D-Wheel popped up a prompt for Yuei Vu's turn to start.

Yuei Vu simply confirmed the situation on the field again, looked up and glanced at the Shooting Star Dragon flying over Yusei, which had gorgeous special effects and was very imposing.

Good guy, although we have to get serious, I didn't expect that he would even bring out the Shooting Star Dragon

But it doesn't matter.

Anyway, sooner or later, Yuei Vu also planned to get in touch with "Accel Synchro". It was not a bad thing to experience this power in person in the daily duel that was not a life-and-death game.

And it was said in advance that the original purpose of this duel was to open the Supreme King's door to the other world again by releasing enough powerful energy.

The energy level of an Accel Synchro trump card such as the Shooting Star Dragon was naturally not comparable to that of ordinary spirits, and it could be said to be of great benefit to achieving their goals.

So now, Yuei Vu couldn't fall behind.

"It's my turn, draw." Yuei Vu said, "Activate the Field Spell 'Galloping Gaia!'"

The green field card appeared beside him, and the track where the two were racing and the dense forests on both sides of the road changed instantly. The hellfire spread, and the tail of the D-Wheel dragged the raging flames, flying along the outside of the road to draw a huge arc.

If it was a Riding Duel in the 5DS era, Field Spell could not be used. But although they were currently playing a Riding Duel, it was still just the prototype of this form of duel, so naturally there were not so many restrictions.

"Then activate 'Card of Sanctity', and both sides will draw cards from the deck until they have six cards in their hands."

The cards popped out from the top of the decks of both sides, and they were drawn into their hands, and then stuffed into the area on the armrest on one side of the D-Wheel that was specially used to fix the cards.

"Activate the Spell Card 'Reinforcement of the Army!' Add 1 Level 4 or lower Warrior monster from my Deck to my hand."

I add 'Gaia the Fierce Knight Origin' from the deck to my hand."

The card popped out of the deck and was drawn by Yuei Vu into his hand.

"Activate the effect of the Field Spell 'Galloping Gaia!'" Yuei Vu waved his hand, "Once per turn, by revealing 1 'Gaia the Fierce Knight' monster in my hand to the opponent, add 1 Level 5 Dragon monster from my deck to my hand."

He showed the card he had just taken.

"I show 'Gaia the Fierce Knight Origin' and add 'Curse of Dragon, the Cursed Dragon' from the deck to my hand!"

The Cursed Dragon was drawn by him and also stuffed into the fixed area of the hand. The deck continued to automatically shuffle in the slot.

"Then, the 'Gaia the Fierce Knight Origin' can be Special Summoned directly from the hand by discarding a Level 5 or higher monster."

I discard the 'Curse of Dragon, the Cursed Dragon' that I just retrieved, and Special Summon the 'Gaia the Fierce Knight Origin!'"

Another horse with red mane rushed out, but this time the knight's armor on its back was relatively light, and its body was not as burly as before.

[Gaia the Fierce Knight Origin, ATK 1600]

"Did you retrieve the Cursed Dragon from the deck just to discard it as a cost?" Yusei was a little concerned.

"Then I'll sacrifice 'Gaia the Fierce Knight Origin!'" Yuei Vu pointed to the Gaia Knight who was running beside him following D-Wheel, "When 'Gaia the Fierce Knight Origin' is used for the Tribute Summon of a Warrior monster, this card can be treated as 2 Tributes!"

While speaking, Gaia Origin had split into two, transforming into two clones. Both clones turned into beams and flew up, overlapping into the vortex of chaos.

"Sacrifice the 'Gaia the Fierce Knight Origin' as two sacrifices, and Tribute Summon ——
——Gaia the Magical Knight!"

The violent energy burst out from the broken field, and the horse was wrapped in flames, carrying the knight bathed in fire like a hellhound!

[Gaia the Magical Knight, ATK 2300]

"It's this card again," Yusei couldn't help but care more.

He remembered that Gaia the Magical Knight could be Normal Summoned without Tributing when there was a monster with 2300 or more ATK on the opponent's field.

In other words, with Shooting Star Dragon on the field, Yuei Vu didn't need to go to the trouble of jumping out Gaia Origin first and then using Gaia Origin as a sacrifice for a Tribute Summon.

No matter how you looked at it, this seemed to be a deliberate card loss.

Unless the opponent's purpose was not as simple as it seemed.

"Gaia the Magical Knight's effect! If this card is Normal or Special Summoned: I can Special Summon 1 Level 5 Dragon monster from my hand or GY in Defense Position." Yuei Vu said, "I Special Summon the 'Curse of Dragon, the Cursed Dragon' that I just discarded to the Graveyard!"

A storm rolled up, and the golden dragon covered with skeleton-like armor rushed out from the underworld, then spread its wings and landed on the field.

[Curse of Dragon, the Cursed Dragon, DEF 1500]

"At this moment, the effect of 'Curse of Dragon, the Cursed Dragon' is also activated!" Yuei Vu continued to operate, "If this card is Normal or Special Summoned: I can add 1 Spell/Trap that specifically lists the card 'Gaia the Dragon Champion' in its text from my deck to my hand.

I add the Spell Card 'Spiral Fusion' to my hand!"

Yusei's pupils shrank slightly.

"By the way, that card is..."

"Spell Card 'Spiral Fusion!'" Yuei Vu flipped the Spell Card on his side, "Send Fusion Material Monster Cards from my hand and field to the Graveyard, and Fusion Summon a Dragon Fusion Monster!"

I send the 'Gaia the Magical Knight' and 'Curse of Dragon, the Cursed Dragon' on the field to the Graveyard for fusion!

The knight who has studied magic to the extreme, uses the magic of darkness to free the golden dragon from the curse! Fusion Summon——

——Gaia the Magical Knight of Dragons!!!"

After another fusion, the knight and the dragon turned into beams of light and rushed into the vortex. The burst of energy stirred the entire field, and flames swirled around the Magic Knight like a fire dragon!

[Gaia the Magical Knight of Dragons, ATK 2600]

Yusei: "The second Magical Knight of Dragons..."

"The effect of 'Spiral Fusion!'" Yuei Vu said, "If the monster summoned by 'Spiral Fusion' is 'Gaia the Dragon Champion', it gains 2600 ATK, also it can make up to 2 attacks on monsters during each Battle Phase!"

Yusei narrowed his eyes and looked at the knight riding the golden dragon who had just appeared on Yuei Vu's field.

"That monster..."

"Gaia the Magical Knight of Dragons, while on the field, can also be treated as 'Gaia the Dragon Champion!'" Yuei Vu said, "So Gaia's ATK increases by 2600!"

[Gaia the Magical Knight of Dragons, ATK 2600 → ATK 5200]

Yusei's eyes became slightly more serious.

An ATK of 5200, and the ability to attack continuously. No, that's not all.

If it was just the high attack power, it was not terrible. His defense could also be called a solid wall. The "Scrap-Iron Scarecrow" in his back field could block an attack every turn, and the Shooting Star Dragon itself also had the ability to negate an attack.

But another terrible thing about Gaia was the Field Spell "Gallop Gaia".

As long as this field existed and there was "Gaia the Dragon Champion" on the field, the opponent player could not activate cards or effects during the Battle Phase.

In other words, as long as the Battle Phase was entered, the entire field would be dominated by Gaia! Whether it was the Scrap-Iron Scarecrow or the Shooting Star Dragon, or other hand traps and grave traps, they couldn't stop Gaia's fatal blow!

"And the effect of 'Curse of Dragon, the Cursed Dragon' that was just sent to the Graveyard as a fusion material has also been activated!" Yuei Vu said, "When this card is sent to the Graveyard, I can target 1 'Gaia the Dragon Champion' in my Monster Zone."

Negate the effects of face-up monsters the opponent currently controls with ATK less than or equal to it until the end of this turn!"

Of course, he chose Gaia, who had just appeared on the field.

"I choose 'Gaia the Magical Knight of Dragons', whose attack power is 5200!" Yuei Vu said, "Shooting Star Dragon's attack power is lower than this value, so its effect is negated!"

"In that case..."

Yusei waved his hand.

"At this moment, the effect of Shooting Star Dragon is activated!" Yusei shouted, "Once during the opponent's turn, I can remove this card from play. This turn, I can negate 1 attack from a monster the opponent controls!" (Animation effect)

Chapter 1085: Shooting Star!

"The effect of Shooting Star Dragon!" Yusei said, "Remove itself from the game. Once this turn, I can negate the attack from a monster the opponent controls!"

Yuei Vu's eyes slightly raised, slightly surprised.

Over the years, he almost forgot the animation effect of Shooting Star Dragon.

Because most of the effects of the real-life Shooting Star Dragon and the animation Shooting Star Dragon were the same, he has forgotten this subtle difference.

The real-life Shooting Star Dragon could only negate the opponent's attack by removing itself from the game when the opponent declared an attack. But the animation effect was different. The Shooting Star Dragon in the animation could remove itself from the game at any time during the opponent's turn, and then retain the opportunity to "negate the attack" throughout the entire turn.

The biggest difference was that the original very useless attack declaration trigger effect in the real card was replaced with an active effect that could be triggered at will.

This could be seen as a disguised way to add a very strong resistance to Shooting Star Dragon. Once the opponent launched a tricky clearing effect, or targeted Shooting Star Dragon for a card effect target such as removing from the game or returning to the deck, Yusei could choose to actively chain Shooting Star Dragon's effect, allowing it to be banished to avoid the opponent's attack.

In this way, Shooting Star Dragon could return from the banishment zone at the end of the turn and still exist in the next turn.

This made it particularly difficult to defeat.

In the moment of distraction, Shooting Star Dragon has turned into starlight and disappeared from Yusei's field. The light of the star points blocked around Yuei Vu's "Gaia the Magical Knight of Dragons", as if it was ready to restrain him as long as he had any intention of making any rash moves.

"I see." Asuka held up her delicate chin, "If it removes itself from the game, Gaia with an attack power of 5200 will be negated even if it launches an attack."

Moreover, the monsters created by 'Spiral Fusion' can only launch two consecutive attacks when there are monsters on the opponent's field. But now this duelist called Yusei has taken the initiative to remove his own monster, and there is nothing on the field, so Gaia can't launch a second attack."

"Not only that, the Field Spell 'Galloping Gaia' can block all effects in the Battle Phase." Misawa Daichi explained, "But now the effect of 'Shooting Star Dragon' has been activated in the Main phase, even 'Galloping Gaia' can't interfere."

In this way, even in Gaia's field, Shooting Star Dragon can negate Gaia's attack!"

A card with similar effect processing was the "Necro Gardna" that Judai loved to use. The effect of the Necro Gardna could also be activated at any time during the opponent's turn, and the opponent's attack was negated once during this turn. It was basically the same as the animation effect of Shooting Star Dragon.

"Awesome!" Although the poor student Marufuji Sho didn't fully understand, he was still full of admiration, "Did this duelist calculate so much? So strong!"

Yuei Vu thought about it and turned a card placed horizontally on the Duel Disk over.

"I'll turn the first 'Gaia the Magical Knight of Dragons' left on the field last turn back to attack position."

[Gaia the Magical Knight of Dragons, DEF 2100 → ATK 0]

Yusei was slightly surprised.

Gaia's attack power has been reduced to 0 in the last round because of the card explosion effect. What's the point of turning him to attack position in this situation?

"Battle!"

Yuei Vu directly entered the Battle Phase, and the field seemed to come alive at this moment. Waves of heat rolled in the middle of the field one after another, and the two D-Wheels circled along the outer edge at high speed, one after the other, and the spinning tires dragged dragon-like flames.

"At this moment, the effect of the Field Spell 'Galloping Gaia' is applied." Yuei Vu said, "As long as 'Dragon Knight Gaia' is on the field, the opponent cannot activate any card or effect during the Battle Phase."

Sure enough, Yusei turned his head and found that the life-saving charm "Scrap-Iron Scarecrow" in his backfield had been tied up by the shackles of flames and fell into a paralyzed state.

"Gaia the Magical Knight of Dragons, attack directly!"

The first to rush out was Gaia Unit No.2 summoned this turn. With an attack power of 5,200, the hellfire wrapped around the spiral spear, roaring out with the golden dragon!

Yusei waved his hand: "Then the effect of 'Shooting Star Dragon' is applied!"

I negate the attack of 'Gaia the Magical Knight of Dragons'!"

The Shooting Star Dragon, which had already left the field, reappeared in the form of an afterimage, like a shield blocking its owner, firmly blocking Gaia's fatal shot.

Then the shadow disappeared, and Gaia was forced to bounce back to the original place.

"Because I don't have a monster on the field, 'Gaia the Magical Knight of Dragons' can't attack for the second time," Yusei said.

"I know." Yuei Vu didn't care, "Then I will use another 'Gaia the Magical Knight of Dragons' to attack directly!"

[Gaia the Magical Knight of Dragons, ATK 0]

Yusei: "!"

Attack with Gaia whose attack power is 0?

Will there really be someone who is greedy for this extremely insulting slap? No way, no way?

However, the facts proved that Yuei Vu was certainly not that bored. Just when Gaia flew out on the dragon and stabbed with the spear in his hand, a card was ejected from Yuei Vu's graveyard.

"In the graveyard, the effect of 'Gaia the Fierce Knight Origin' is activated." He said, "During the Battle Phase, I can banish this card from my GY, then target 1 monster on the field whose current ATK is different from its original ATK; its ATK becomes its original ATK."

Yusei's pupils narrowed slightly.

The attack power is different from the original attack power...

That's right!

Gaia the Magical Knight of Dragons' effect is "reduce 2600 ATK and destroy a card", after the card is destroyed, the attack power will become 0, of course, different from the original attack power.

Gaia Origin is a card that exists to cooperate with this effect!

"I see," Yusei murmured, "That's why you specifically summoned Gaia the Fierce Knight Origin first, and then used him as a sacrifice to unfold the combo. The purpose is to send that card to the graveyard."

As expected of Mr. Yuei Vu, your calculations are one step ahead of mine."

Gaia the Fierce Knight Origin in the graveyard was banished, and the surging power quickly poured into the body of the charging knight!

[Gaia the Magical Knight of Dragons, ATK 0 → ATK 2600]

The ultimate charge, the red gun energy pierced through Yusei and his D-Wheel! The strong vibration touch made him groan, and the D-Wheel tilted and bumped violently on the track. For a moment, it looked like it was about to fall.

[Yusei, LP 4000 → LP 1400]

"The Battle Phase is over." Yuei Vu's D-Wheel caught up, and he was not giving up, "Then activate the Quick-Play Spell-

–'Burial from a Different Dimension!'"

Yusei: "!"

"Up to 3 banished monsters will be returned to the graveyard." Yuei Vu smiled, "Which card should be returned? I don't need to say more, right?"

I return your 'Shooting Star Dragon' from the Banishment Zone to the graveyard!"

The Shooting Star Dragon cried out in the void, but was soon captured by an irresistible force and forcibly dragged to the depths of the underworld.

"When the Shooting Star Dragon is banished by its own effect, it will be Special Summoned from the Banishment Zone during the End Phase." Yuei Vu said, "But if it is no longer in the Banishment Zone at that time, this effect cannot be resolved."

As he said this, he drew three more cards.

"Set three cards, I end my turn."

Chapter 1086: Before Synchro Summoning

"Amazing!" Mokuba exclaimed, "He broke through Yusei's defenses in one go, dealing heavy damage to the guy.

Not only that, but he even managed to deal with the tricky 'Shooting Star Dragon'."

After the fierce battle just now, Yusei's D-Wheel slowed down involuntarily under the impact of the virtual touch, and he unconsciously slowed down by two gears while trying to stabilize the front of the vehicle.

Yuei Vu took this opportunity to overtake him, and for the first time in this duel, he went from being a chaser to a leader.

Yusei stabilized the D-Wheel, chased behind, and let out a long sigh.

"As expected of Mr. Yuei Vu, even so many years ago, he should not be underestimated."

Thinking of this, Yusei's mouth corners slightly raised, revealing a smile.

"In that case, please allow me to go all out!" An invisible flame seemed to be burning in Yusei's azure eyes, "My turn, draw!"

He swung his arm, and a card drawn from the deck fixed in the D-Wheel card slot was held between his fingertips.

Although he might seem a little cold and ruthless on the surface, being the type of person who didn't talk much, but in fact, under that cold appearance, Yusei actually hid a hot heart.

"It's time, Mr. Yuei Vu!" Yusei shouted, "Activate the Spell Card 'Tuning'! Add a 'Synchron' monster from the deck to my hand, and then send the top card of the deck to the graveyard."

He drew a card that popped out of the deck.

"I'll add the Tuner Monster 'Quickdraw Synchron' to my hand from the deck." He said, "Then send the top card of the deck to the graveyard."

Then he drew two cards from his hand in one breath, discarding one and showing the other directly.

"'Quickdraw Synchron' can be Special Summoned directly by discarding a monster card from my hand. Come on! Quickdraw Synchron!"

[Quickdraw Synchron, DEF 1400]

"The card discarded to the Graveyard is 'Level Eater'." Yusei said, "If this card is in my Graveyard: I can target 1 Level 5 or higher monster I control; reduce its Level by 1, and Special Summon this card.

I lowered the Level 5 'Quickdraw Synchron' to Level 4, and Special Summoned the 'Level Eater' in the Graveyard!"

[Quickdraw Synchron, LV 5 →LV 4]

"At this moment, the effect of 'Doppelwarrior' is activated!" Yusei showed another card, "When a monster is Special Summoned from my GY, this card can be Special Summoned from my hand.

I special summon 'Doppelwarrior'!"

[Doppelwarrior, ATK 800]

"Spell Card 'The Warrior Returning Alive!' Target 1 Warrior monster in my GY; add that target to my hand." Yusei drew a card returned from the graveyard, and then directly slapped it, "I return 'Junk Synchron' to my hand.

Then 'Junk Synchron' is Normal Summoned!"

With a burst of starlight, the hardworking Synchron with orange armor and a white scarf returned to the field again.

[Junk Synchron, ATK 1300]

"Effect of Junk Synchron!" Yusei waved his hand, "When this card is Normal Summoned: I can target 1 Level 2 or lower monster in my GY; Special Summon that target in Defense Position, but negate its effects.

I special summon the Level 2 'Formula Synchron' in the graveyard!"

Junk Synchron opened his hand, and the vortex on his side opened, and the car that had left the field last time jumped back onto the field again.

This extreme deployment ability and speed of operation surprised many people who were watching the game.

Yuei Vu rushed in front, squinting at the monsters that jumped out of the field behind Yusei, and thought quickly.

Looking at this lineup and this posture, he seemed to understand what Yusei was going to do.

Because this lineup was very familiar to card players. It was the standard formation of the meta deck that was once called "Junk Doppelganger", and it was the only way to call Yusei's super ace!

Next, Yusei would use the Level 4 "Quickdraw Synchron" and "Level Eater" to Synchro Summon the Level 5 Junk Warrior; use "Junk Synchron" and "Doppelwarrior" to Synchro Summon another Level 5 monster.

Finally, two Level 5 Synchro monsters, plus the Level 2 Synchro Tuner "Formula Synchron", would be tuned again and Synchro Summon the miraculous trump card that Yusei printed in the 5DS finale!

That was the symbol of "Over Top Clear Mind" that Yusei has comprehended, the product of "Limit Over Accel Synchro", a trump card comparable to God——

—— Shooting Quasar Dragon!

But Yusei would not make it that easy.

"At this moment, the effect of 'Gaia the Magical Knight of Dragons' is activated!" Yusei said, "Once per turn, target 1 other card on the field; this card loses exactly 2600 ATK, and destroy that card!

I will reduce Gaia's attack power by 2600 points and destroy the Tuner monster 'Junk Synchron'!"

[Gaia the Magical Knight of Dragons, ATK 2600 → ATK 0]

Yes, although there were two Gaias on the field, Yusei chose the one with 2600 attack power to activate the effect. Because this Gaia was also equipped with an "Intrigue Shield". Even if the attack power became 0 and was attacked, it would cause no battle damage.

As soon as the voice fell, the spiral spear was thrown out in the air, like a spear, piercing the Junk Synchron's chest and blasting it to pieces.

In this way, Yusei's lineup, which he had finally put together, was broken again.

Shooting Quasar Dragon was the product of "Limit Over Accel Synchro". It must be summoned with two or more Synchro Monsters plus a Synchro Tuner, and the summoning conditions were very harsh.

It was rare for Yusei to put together a lineup that met the conditions in one go. Losing "Junk Synchron" here was undoubtedly a huge blow.

But he only frowned slightly and quickly continued the next operation: "Activate the Continuous Spell 'Synchro Chase'!"

Yusei said, "If I Synchro Summon a 'Warrior', 'Synchron', or 'Stardust' Synchro Monster: I can target 1 monster in my GY used as its material; Special Summon it in Defense Position."

"Level 4 Tuner 'Quickdraw Synchron', Level 1 'Level Eater', tuning!

Gathering stars call forth a new power! Become the path that lights the way! Synchro Summon——

——Junk Warrior!"

After another synchro summon, the second Junk Warrior descended and split his legs like the most standard fork.

[Junk Warrior, ATK 2300]

"Junk Warrior's attack power will be increased by the total attack power of all face-up Level 2 and lower monsters on my side." Yusei said, "I have 'Formula Synchron' and 'Doppelwarrrior' on the field, with a total attack power of 1000!

Therefore, Junk Warrior's attack power increases by 1000!"

[Junk Warrior, ATK 2300 → ATK 3300]

"The effect of the Continuous Spell 'Synchro Chase'!" Yusei continued, "'Quickdraw Synchron', which is the synchro material of Junk Warrior, is special summoned from the graveyard!"

Yusei took a deep breath.

Although the plan of "Limit Over Accel Synchro" was interrupted, he still has a way to remedy it.

The real battle has just begun!

Chapter 1087: Limit Over Accel Synchro!

"Activate the effect of the 'Level Eater' in the graveyard again!" Yusei shouted, "Reducing the level of 'Junk Warrior' by one, and Level Eater can be Special Summoned!"

[Junk Warrior, LV5 → LV4]

The bug pierced through the chest and abdomen of the blue warrior, took a star in its mouth, and jumped back to the field.

"Level 5 Tuner 'Quickdraw Synchron', level 2 'Doppelwarrior', level 1 'Level Eater', tuning!"

Yusei stepped on the accelerator again and began to chant loudly.

"Gathering hopes will evoke a new horizon! Become the path that lights the way!"

[5+2+1=8]

"Synchro Summon!" Yusei shouted, "Dash onward, Road Warrior!!!"

Another new synchro, this time a Level 8 warrior appeared. The warrior's burly body was covered with golden armor, and he fell to the ground like a heavy mecha, and scarlet light pierced from his eyes like a sharp sword.

[Road Warrior, ATK 3000]

"This person..." Marufuji Sho said in surprise, "Can he continue to operate in this situation?"

No one spoke, but Yusei was proving with his actions that there was no problem at all!

"Road Warrior, activate the effect!" Yusei said, "Once per turn, Special Summon a Level 2 or lower Warrior or Machine-Type monster from the deck.

I'm going to summon a Level 2 Machine-Type monster – Turbo Rocket!"

[Turbo Rocket, ATK 0]

"Then activate the effect of the 'Level Eater' in the graveyard again!" Yusei said, "Decrease the level of 'Road Warrior' on the field by one star, and Special Summon yourself again!"

[Road Warrior, LV 8 → LV 7]

The Level Eater passed through the chest of the domineering golden warrior and returned to the field again.

[Level Eater, ATK 600]

"Level 2 Tuner Monster 'Turbo Rocket', Level 1 'Level Eater', tuning again!"

The Tuner Monster transformed into a green ring again, and the star transformed by the monster was set in the middle of the ring. The special effects of Synchro Summoning appeared for who knows how many times, and everyone was dazzled.

"Synchro Summoning... It can be performed so many times in one turn!?" Marufuji Sho was dumbfounded.

"A duel that completely surpassed our imagination." Misawa also looked solemn, "This duelist called Yusei... his strength is simply not in the same dimension as ours."

"Synchro Summon!" Yusei completed Synchro Summoning for who knows how many times this turn, "Level 3, Turbo Cannon!"

[Turbo Cannon, DEF 0]

"A Synchro Monster with 0 ATK and DEF?" Manjoume was surprised.

"Turbo Cannon's effect is activated!" Yusei shouted, "Once per turn, destroy a face-up monster on the field, and inflict damage equal to half of its ATK to its controller!"

Go, Turbo Cannon! Destroy 'Gaia the Magical Knight of Dragons!'"

Yuei Vu had two "Gaia the Magical Knight of Dragons" on the field, but it's obvious that Yusei was targeting the one with 5200 ATK.

Turbo Cannon spun in the air with a golden tail flame, raised his arms, and fired two dazzling tail flames at Gaia head-on!

The Dragon Knight exploded, and the Cursed Dragon under his crotch screamed sharply, falling with the Knight.

[Yuei Vu, LP 3300 → LP 700]

With the impact of 2600 damage, Yuei Vu's D-wheel also suffered a severe shock, and the speed dropped sharply. Yusei stepped up his power, overtook him again, and returned to the leading position.

"Then activate the effect of the 'Level Eater' in the graveyard again!" Yusei continued, "The level of the Road Warrior is reduced by one, and the 'Level Eater' is special summoned from the graveyard!"

[Road Warrior, LV 7 → LV 6]

[Level Eater, DEF 0]

Yuei Vu raised his eyebrows slightly.

In this way, the level of the Road Warrior was reduced from the original eight stars to six stars. And the Junk Warrior was also eaten by the Level Eater once, from the original five stars to the current four stars.

In this way, the conditions were ready again!

"Level 2 Synchro Tuner 'Formula Synchron'! Level 4, Synchro Monster 'Junk Warrior'! Level 6, Synchro Monster 'Road Warrior'——

——tuning!!!"

Yusei's voice fell loudly, and the three Synchro Monsters began to synchronize to the extreme!

Formula Synchron turned into a ring, and both Synchro Warriors were trapped in it. Ten stars were connected in a string, plus two rings, and the total level was twelve—that was also the top level in the Duel Monster World, and it was even two levels higher than the Egyptian God!

"When the gathering stars become one, a new bond will illuminate the future! Become the path that lights the way!"

The world changed suddenly, and even the surrounding air seemed to become red hot. The hot air, the super-high-speed storm, the synchronized light column, the speeding D-Wheel, and the scorching wind, all merged into one.

That was a speed that surpassed light, and even space itself was pierced!

The electric current exploded, and the red D-Wheel was like the ghost of the god of death! He rushed out at full speed, broke through the invisible barrier, and evaporated from the field again!

Yuei Vu only felt a scorching light passing by his side and transformed into the form of D-Wheel and rider in front of him. Yusei returned to the track again, accompanied by an extremely huge and extremely sacred dragon of light!

That was the ultimate realm that Yusei comprehended in the finale, his trump card, the ultimate form evolved by the power of Stardust!

"Limit Over Accel Synchro!" Yusei shouted, "The light of evolution, Shooting Quasar Dragon!!!"

[Shooting Quasar Dragon, ATK 4000]

Everyone was shocked.

What a sacred monster it was!

The strange scene of the sky and earth when it appeared, and the scene of even the duelist teleporting at super-speed were enough to shock everyone's three views, and the arrival of this super synchro monster at this time made everyone drop their jaws.

Even Kaiba Seto, who had seen a lot of storms, couldn't help but shrink his pupils and look at the ultimate dragon in disbelief.

Even with his wide experience, monsters like this were rare, and he had only seen a few in his life.

Although Yuei Vu also faced the legendary Shooting Quasar Dragon for the first time, he was mentally prepared and was not too surprised.

It stood to reason that the Shooting Quasar here should be an animation effect – the animation effect of the Shooting Quasar can be said to be tailor-made for the environment of Yusei's fierce battle at that time and printed on the spot, but in fact, the practicality is not as strong as the real card effect.

"Shooting Quasar Dragon can attack as many times as the number of Synchro Monsters used as Material in the same Battle Phase." Yusei said, "Because there are three Synchro Materials, Shooting Quasar Dragon can attack three times per turn!" (Animation effect)

"With an attack power of 4000, it can attack three times?" Mokuba was surprised.

Kaiba frowned: "Is it the same type of ability as my 'Neo Blue-Eyes Ultimate Dragon'?"

But he also felt that the power of this dragon must be far from that simple.

"Shooting Quasar Dragon!" Yusei swung his fist, "Attack 'Gaia the Magical Knight of Dragons'!!!"

Shooting Quasar Dragon flew into the sky, stardust radiance swirling around its body, and it seemed to pierce the sky when it dived!

Creation Burst!!!

Only Gaia, whose attack power dropped to 0, was left on Yusei's field, and naturally, it was impossible to resist this shot.

"But the effect of the Trap Card 'Intrigue Shield' equipped on Gaia is that the equipped monster cannot be destroyed by battle once per turn!"

"It's useless." Yusei said, "When Shooting Quasar Dragon attacks, negate all the effects that include negating destruction of cards! Therefore, the effect of 'Intrigue Shield' equipped monster cannot be destroyed is negated!" (Animation effect)

Gaia was completely powerless in front of this ball of light in the sprint of the creation of heaven and earth. In just a moment, it was destroyed by the endless power of Shooting Quasar!

Yusei stabilized the D-Wheel in the impact and light flow: "But the other effect of 'Intrigue Shield' is still effective – the battle damage caused to me by the battle of the equipped monster is 0."

"But in this way, Mr. Yusei, you have no monsters to defend, and Shooting Quasar Dragon still has two attacks left!" Yusei shouted, "Go, Shooting Quasar Dragon! Attack directly!"

The second burst of impact, the light curtain covered the earth, and the overwhelming pressure was like an invisible hand pressing on the heart, making it almost difficult to breathe!

"The energy is close to the peak!" Mokuba looked at his brother, "It is many times stronger than the energy released when the 'Duel Link' system collapsed last time!"

Just a little bit more, the dimensional door will be opened."

The appearance of Shooting Quasar has maximized the release of the Planetary Particles. The terrifying energy almost tore the space apart, and a crack was looming in the dense black clouds.

Just the last bit!

But if Yusei took this blow here, the duel would end here, and maybe their efforts would fail. The energy might not be enough to open the passage to the other world.

Yusei looked up at Shooting Quasar who was swooping down, and the corners of his mouth rose slightly.

"Just a little bit more? Let me add a little fire."

Yusei snapped his fingers.

"Open the set card: Trap Card – Super Team Buddy Force Unite!" Yusei said, "Target 1 face-up monster on the field; Special Summon 1 monster from my hand or GY, with the same Type as that monster's, but with a different original name."

I'm going to choose 'Shooting Quasar Dragon'!"

Yusei frowned, "Shooting Quasar Dragon is a dragon, Mr. Yuei Vu, are you going to summon a dragon here?"

"No." Yuei Vu smiled, "At this moment, I chain with the Continuous Trap 'DNA Surgery'. Declare 1 Monster Type. All face-up monsters on the field become that Type.

And the Type I want to declare is——

——Divine-Beast!"

Yusei: "!"

Everyone: "!!!"

Divine-Beast!? Doesn't that mean...

"The effect of 'Super Team Buddy Force Unite' is resolved!" Yuei Vu shouted, "Because 'Shooting Quasar Dragon' has been rewritten as a Divine-Beast, I can special summon a Divine-Beast monster with a different name from my hand or graveyard!

The burning wind blows wildly across the earth, suppressing everything with absolute divine power! Descend——

——The God of Destruction, Obelisk the Tormentor!!!"

Chapter 1088: Crossing

The God of Destruction, Obelisk the Tormentor!!!

The venue cracked with a wailing sound, and the ground exploded! A blue giant emerged from it, and his body slowly rose up. His scarlet eyes seemed to contain boiling lava and endless rage, as if he wanted to burn everything to ashes.

[Obelisk the Tormentor, ATK 4000]

"Egyptian God!" Some students were already stunned.

"Obelisk... that's right!" Yusei suddenly remembered, "It was at the beginning of the duel. You discarded two cards by the effect of 'Graceful Charity'. One of them was the 'Shield Warrior'...

...The other one is Obelisk!"

Did Mr. Yuei Vu foresee the end from the beginning?

As expected of the duelist I admired the most!

Dark clouds and thunder and lightning covered the entire Duel Academy Island, and everyone clearly saw this earth-shaking scene.

The white dragon covered by the holy light, and the giant with blue flames burning all over. The whole world seemed to be divided into two, half of which belonged to the giant dragon, and the other half belonged to the blue giant.

The two existences confronted each other, and the aura and energy had been invisibly bombarded countless times in the air.

The two D-Wheels were running at full speed in the energy field, and the endless wandering particles were like spirits that had been imprisoned for thousands of years and finally released, occupying the entire space with cheers!

The wandering particles were released without hindrance, and the space was constantly impacted. Everyone saw cracks in the sky, like glass with cracks smashed by a heavy hammer, and the cracks were expanding little by little.

The dimension began to crack!

The duel continued.

If it was a normal duel process, Yusei should undoubtedly cancel the attack command of "Shooting Quasar Dragon" according to the Battle Replay.

The Egyptian God special summoned to the field by the card effect had only three minutes... eh, only one turn to act.

At the end of the turn, Obelisk would have to return to the graveyard under its own effect. In that case, Yusei's field would become empty again, and Yusei still had the trump card monster "Shooting Quasar Dragon", which was an absolute advantage.

Of course, that's just under normal circumstances.

But the purpose of this duel was not to win or lose. From the beginning, they tried to create a gap in the dimension through the energy of the Riding Duel.

Now that they were only one step away from success, they couldn't retreat here.

"The battle continues!" Yusei made a quick decision, "Shooting Quasar Dragon, attack 'Obelisk the Tormentor'!"

Creation Burst!!!"

Shooting Quasar Dragon's second shot! It spun in the air, gathered its strength again, and used its body to turn into a meteor that opened up the world, drawing a straight line to blast the God of Destruction!

"Obelisk, fight back!" Yusei also ordered, "God Hand Crusher!!!"

Obelisk was not to be outdone, and swung his fist at the Shooting Quasar Dragon shrouded in glory in the sky. God's fist seemed to set off a storm, and the blue energy wave was like a huge tsunami!

The attack power was also 4000, and the result would undoubtedly be a lose-lose situation – the Shooting Quasar Dragon and the Tormentor would be destroyed under this blow, and their energy would be released to the maximum in such a fierce bombardment.

But the two energies rushed into the sky together and sank into the dimensional crack. Although the crack was visibly torn a little, it seemed that it was still a little short.

"Mr. Yusei, I feel some kind of resistance!" Yusei tried to stabilize the D-Wheel in the energy storm and shouted, "It's like there is some force preventing us from passing!"

Indeed, it stood to reason that the energy created by this duel was already huge enough, and it should be enough to create a tunnel. But Yusei also felt that there seemed to be some obstacles on the other side, as if some force was blocking the door to the other dimension from opening to them.

Then it seems that we need to add some fuel to the fire.

"Open the set card!"

Yuei Vu flipped the card in the back row – it was also his last set card.

"Trap Card 'Final Fusion!'" The trap turned over beside Yuei Vu, and a huge energy burst, "When a face-up monster I control battles an opponent's monster, each player takes damage equal to the combined ATK of the battling monsters!" (Animation effect)

Yusei: "!"

Kaiba who was watching the battle also jumped his eyelids: "Does Yuei Vu intend to use this method to add up the energy of the two monsters and detonate them in one go?"

"Obelisk and Shooting Quasar Dragon have a total attack power of 8,000!" Yuei Vu's voice was almost swallowed by the storm, "That is to say, we will each receive 8,000 points of effect damage"

The strong light pierced everyone's eyes. Obelisk roared, and his huge fist broke little by little under the backlash of light, like a cracked and collapsed wood, until the giant was shattered into powder.

The Shooting Quasar Dragon let out a mournful cry, and his noble and sacred body also disintegrated and collapsed until it was completely broken.

The flesh was shattered, and powerful energy burst out from both sides as if it had lost its shackles! The god-level power pierced the sky, and the sky was finally torn apart, revealing a tunnel leading to another world.

A beam of light fell heavily and hit the ground of the academy island fiercely as if the entire land had sunk down a section!

The sea surface was surging, and the seawater violently slapped on both sides of the coast, and gravel and dust splashed everywhere.

Yusei and Yuei Vu in the center of the duel were naturally the first to bear the brunt – the light curtain first swallowed them both and the car into it, just like sinking into a bridge of light and disappearing to the other side of the dimension.

Then more people also reacted.

The first to react the fastest were the players present – they could no longer contain their passion, and rushed towards the light column, shouting excitedly while running, and some people jumped and rolled.

No wonder they were so excited, after all, it meant changing the map.

What does changing the map mean?

It means limited activities, more experience, more duel disks and more decks!

No one can resist such a temptation! No one!

Then it was the friends of Judai who reacted.

They had all made up their minds long ago to follow Principal Yuei Vu to fight and take back what Judai had lost, so there was naturally nothing to hesitate at this time.

Each of them had irreplaceable memories with Judai, their own reasons, and the awareness that they must save their companions!

So the group rushed towards the light column without saying anything.

It lasted for a full three minutes before the huge light curtain finally slowly disappeared.

It was like a fierce tornado of light, coming violently and leaving quickly. Soon, the light seemed to be withdrawn into the crack in the sky, until the crack gradually disappeared without a trace.

Chapter 1089: Different Dimensions

The sky was spinning, as if the whole world was turned upside down, and then turned upside down again. In the strong light, everyone was sucked into a different dimension by gravity, and they were violently bumped along the long energy tunnel, feeling like being thrown into a huge flush toilet.

The solid ground suddenly hit everyone's body hard. Before they could come to their senses, they were thrown to the ground, and the cold sand and gravel covered their faces.

Yuei Vu stood up first, patted the dust on his windbreaker, and looked around to take a look at the situation.

Everywhere in sight was a wasteland, empty and nothing. The ground was covered with soft white sand and gravel, desolate like a dead land.

The players also jumped up excitedly – some people did not forget to care about their students. They all began to look around the surrounding environment.

There was no sun in the sky, but there was a little faint light so that this space was not so dark.

"Is this the other dimension?"

The students who were determined to help Judai were a little timid when they really came to the other dimension. When they thought that this was a completely unknown world with completely unknown enemies waiting in front of them, even these young people with excellent grades and strong strength were a little nervous.

The players were very excited, and their eyes were full of enthusiasm for exploration and looting.

The only thing that stopped them from running around and exploring the map was Yuei Vu. After all, based on experience, they all knew that whenever there was a large-scale event, following Yuei Vu's arrangements would often be the most profitable.

"I'll go investigate the geology here."

The speaker was Jim, a student from the Southern Branch. This guy wore a handsome wide-brimmed hat, covered one eye with a bandage, and carried a huge crocodile on his back.

Yes, a living crocodile, which was said to be his pet.

"Huh?" Only now that Sho noticed this companion, "Jim? Why are you here too?"

Then he turned his gaze to the black man next to Jim: "You are O'Brien from the Duel Academy West Branch? How come you are all..."

"Although we haven't known each other for long, Judai is already our companion." Jim gave a thumbs up, "When a companion is in trouble, we must naturally help him."

It was only then that Sho discovered that among the four classmates who came from other schools for exchanges this semester, in addition to the mysterious foreign young man Adrian Gecko, the other three Jim, O'Brien and Jesse all came to this different world with him.

It seemed that Judai's brainwashing method may be really good. In just a few days, he actually assimilated several new classmates from other schools into his own shape, and they were willing to go through hell for him, rushing to the other dimension.

"Anyway, I'll go and survey it." Jim said, "Geological survey is my specialty, you guys just wait here."

"No need."

Yuei Vu interrupted him, and when he spoke, he had already walked to the foot of a mountain not far from them.

He walked slowly along the arc of the mountain wall, knocking on the stone wall with his knuckles as he walked.

He stopped at a certain place, knocked for a while, and then raised his foot to kick the mountain wall. The rock that looked solid and hard was actually covered with spider-web-like cracks under this kick, and it shattered with a bang.

Everyone gathered around and looked into the hole that was kicked open, and found that it turned out that there was a huge hole behind the mountain wall. A steep slope extended down into the endless darkness, and no one knew where it led.

Fudo Yusei, who had been following him, showed an admiring expression: "Mr. Yuei Vu, how did you notice the hole here?"

"Because I was looking for it from the beginning." Yuei Vu said.

He recognized it the moment he landed. This was one of the twelve dimensions led by the Supreme King, and it was also the dimension where Yuki Judai and his friends landed when they crossed the dimension for the second time in the original work.

The surface of this dimension was a complete desert, with no living creatures inhabited. In the original work, Judai was exploring this dimension when he unconsciously rested his palm on the mountain wall beside him to catch his breath, but unexpectedly, the tofu-like stone wall broke on the spot, and he fell into it suddenly, and then he found that the underground space was a different world.

Yuei Vu took the lead in entering the hole he kicked open and slid down the slope.

Then everyone saw him taking the lead, looked at each other for a moment, and then followed one after another.

After sliding down the steep slope for a while, the bottom suddenly became clear.

They fell into a huge hole, and the light filled the entire space. Artificial lights were hung on the stone walls around, and the lights illuminated every aspect of the cave.

The cave was connected in all directions, with countless passages crisscrossing. There were also railroad tracks laid on the ground, crawling on the ground like a long steel snake.

It felt like a huge mine.

It could be imagined that this underground space was very large. The tunnels with railroad tracks under the mine were like highways built between cities, connecting in all directions and endless. If you rush around rashly, you may never get out.

At this time, it would be great if you could have a local guide.

Just thinking about this, the person they needed appeared at the right time.

A figure suddenly flew out, a gorgeous somersault flew over the heads of everyone, landed handsomely like a superhero, a 360-degree turn, and a sweeping kick rolled up a cloud of dust on the ground.

That figure was burly, as strong as a mountain, and their gorgeous appearance looked like a martial arts master.

Everyone immediately imagined a master like "the gatekeeper of another world", and they were ready to fight.

But the figure stood up and opened the duel disk without saying a word – this action made the students feel relieved. It seems that not only aliens but also people from other dimensions were used to playing cards to decide the outcome.

They were not afraid of how strong the enemy was, they were only afraid that the enemy would not play cards

But when they saw the appearance of the person, they were stunned.

"Tania?" Misawa shouted.

The dust that blocked the view settled, and the person opposite was dark-skinned, strong, and muscular, but it seemed to be a woman.

Tania, one of the "Seven Stars" who attacked the Duel Academy, a female Shadow Duelist of the Amazon tribe. At that time, it was Misawa Daichi who came forward to fight on the academy side, and successfully defeated Tania and won the victory.

However, although Misawa won the game, he lost the war – probably because this muscular girl with a strong back and strong waist poked Misawa's fetish for no reason. After a game of cards, Misawa was actually attracted to this tigress.

By the way, the tigress here was not a rhetorical device. Because Tania's true identity was suspected to be an Amazoness monster spirit. She was originally a tigress, but she turned into a human with the help of dark power, similar to "transfiguration".

But although Misawa knew this, he didn't care but became more excited.

"So cute." Misawa was eager to move.

Unfortunately, Tania didn't give him a good face at all. She tilted her head, as if she had been thinking hard for a long time, and then said: "Who are you? I remember that you seem to be called... Gojawa Tenko?"

Misawa Daichi spat out a mouthful of blood.

Chapter 1090: A Life-Or-Death Duel

Fortunately, Misawa's presence didn't seem to be completely reduced to zero. Tania at least still remembered him.

While leading the way ahead and leading everyone forward, Tania acted as a qualified guide and began to explain the information of this world.

"After that battle, I had already returned to my own world." She explained.

Tania was originally a spirit, so she naturally lived in the spirit world. It's just that "the spirit world" was not a single world. There were many parallel dimensions with various spirits.

Not long ago, a change happened to happen in the dimension where Tania lived.

"The world we live in cracked, and the sky and the earth broke without warning." Tania said, "The unknown cracks suddenly became everywhere, sucking all of us in one after another.

When I woke up, I was already here, this completely strange, but hellish world."

"Hellish world?" This word made Aster feel uncomfortable.

"Literally." Tania glanced at them, "But there is an entrance hole not far ahead. It's better for you to see it with your own eyes than hearing my explanation."

Sure enough, they soon turned out of the intricate tunnel after following her around.

The light intensity in the space increased significantly several times. They walked out of a long corridor, and a whole open world suddenly came into view.

It looked like a city, with densely packed buildings standing in rows, shaped like spikes rising from the ground. That style made everyone feel unprecedented.

The hemispherical ceiling covered the entire space, so large that it seemed that there was no boundary. The circular light strip was installed on the dome, circling around, like ripples on the water, extending to the end of the horizon, illuminating the entire city.

They stood on the cliff at the entrance of the cave, looking down from a high place, and soon saw the residents below.

A group of monsters that were obviously winged-beasts dominated the city. They all looked ferocious, wielding long knives and whips, and enslaving and driving weak monsters to work and do hard labor.

The enslaved monsters all looked like low-level spirits. For example, "Petit Angel" – a level 3 Normie with only 600 attack power, basically makes a living by being cute in the duel monster world.

But now these low-star monsters have become coolies enslaved by the winged-beasts, whipped by long whips, and driven to work like animals.

Some of them were spirits that the students were closer to. Some poor spirits would even die of exhaustion in the high-intensity slavery – or simply be whipped to death by the winged-beasts.

Some students couldn't stand it anymore. Asuka looked up and asked, "Is there anything we can do?"

"We are trying to organize a counterattack." Tania said, "My companions have been planning for a long time. We found the nest of the winged-beasts that control this city. That's it."

She pointed to the most unique building in the center of the city. It looked like a big mechanical mushroom, leading all the way to the center of the light strip on the ceiling.

"I see," said Aster, "It's a place like the government, right?"

"In other words, all we have to do is destroy it, right?" said Manjoume.

"Almost." Tania nodded, "That place is equivalent to the heart of the winged-beast tribe. If we take it, we will have the absolute initiative, and it will only be a matter of time before we take over the city."

Seeing the students' eagerness to try, she quickly added: "But don't act rashly. This is their city, and there is no chance of success if we act rashly.

We must be cautious, collect as much intelligence as possible, formulate a perfect plan, select the most appropriate method, and integrate all forces before proceeding."

"Well, it sounds good." Sho reminded in a low voice, "But it seems to be too late."

"Huh?"

Tania was stunned for a moment and looked in the direction of his finger. Suddenly, she saw a large wave of screwballs swooping down from the cliff at some point, pushing towards the city border in a mighty manner, still shouting something excitedly, as if they were afraid that the winged-beast guards standing guard at the border would not find them.

Tania was stunned.

"What are they doing!? Do they want to commit suicide?" She shouted from behind, "Stop, come back! The duels in this world are not like the duels in your place!

All the monsters summoned in this world are entities, in other words, all duel damage is real damage!

If you lose here, you will really die!"

After hearing this, those screwballs were not afraid or turned back, but rushed even more happily.

"Did you hear that? The NPC gave a hint!" Someone shouted, "Monsters summoned here can be directly materialized!"

"I must attack them immediately!"

The players had already summoned their own monsters while running, and all kinds of gorgeous attacks were pushed toward the opposite side, instantly blowing away a large number of guards and tearing a crack in the city border.

Tania was stunned: "Why? Aren't they afraid of death?"

"Don't worry." Yuei Vu smiled, "They know it in their hearts."

It's hard to say whether the screwballs know it, but at least Yuei Vu knew it in his heart.

According to the animation, he knew that this dimension was at the bottom of the twelve dimensions ruled by the Supreme King. These seemingly dominant winged-beasts were actually just a group of low-star noobs, and their card-playing skills were probably comparable to the simple AI Bot of the Kaiba Corp.

It should be easy for players to deal with these small fries.

Even if someone was too unlucky and got killed, it wouldn't be a big problem. Anyway, they had three lives and could be a hero again in a few hours.

As Yuei Vu expected, the winged-beasts that enslaved the spirits under the feet of the crowd were quickly killed. The leading winged-beast actually had a duel disk, and it showed the duel disk and screamed twice, wanting to decide the outcome by playing cards.

However, his strength might not be very good. In just two turns, he was beheaded by "Great Shogun Shien" controlled by Yuei Cannot Escape Fae.

The enslaved spirits looked at each other, and after a moment they seemed to realize that the opportunity to fight back had come. They soon joined the charge of the screwballs and followed them to charge deeper into the city.

Seeing the instructors so brave, the students' blood was also mobilized.

"Everyone! Let's follow the mentors!"

Yuei Vu did not stop them.

Anyway, the dueling strength of the winged-beasts in this dimension was just so-so, and it was obviously impossible for them to be the opponents of these elite students.

Tania was stunned for a long time before finally accepting this fact. She had to grind her teeth, pick up the duel disk, and follow.
