

## **I Play Yu-Gi 1141**

Chapter 1141: From The Future

Z-ONE.

Because he had appeared once before, and his equipment was so unique, everyone who had seen him at the event venue of Kaiba Corporation last time remembered this appearance.

"The savior from the end of time?" President Kaiba narrowed his eyes, "We meet again."

Z-ONE glanced at Kaiba coldly from the heavy iron shell and said calmly: "Oh, I almost forgot. For you, we have met before."

"For us?" Yuei Vu noticed this strange wording.

"Maybe it's a little hard for you to understand, but the me you met is not the same person as I am now," Z-ONE said.

"Z-ONE!" Yusei Fudo stood up and said loudly, "I don't know what you have experienced since then, but what you are doing now is definitely wrong!"

Z-ONE glanced at him coldly.

"Why do you say that, Fudo Yusei?"

"The problems of each era should be solved by the people of each era themselves." Yusei said seriously, "Only such evolution is meaningful.

I have proved to you that history can be changed, right?"

Hearing this, Yuei Vu's mind was slightly moved.

He already knew that the Fudo Yusei in front of him was from the finale of "Yu-Gi-Oh! 5DS", because he had comprehended the realm of "Limit Over Accel Synchro" and printed the final monster "Shooting Quasar Dragon".

That should be what Yusei said "changing history".

In the 5DS animation, it was explained that the Shooting Quasar Dragon is a monster that should not have existed in history.

Z-ONE's goal was to change the fate of human destruction and rewrite the history of the world. In the duel of the finale, Yusei summoned "Shooting Quasar Dragon". This act itself proved that history has been rewritten and a new timeline has been born. To some extent, Z-ONE's goal has been achieved.

So in the end he chose to believe Yusei, entrusted his future to Yusei, and ended his remaining life with his own hands.

So from the current conversation between Yusei and Z-ONE, Yuei Vu could speculate that both of them were from the timeline after the ending of the 5DS animation.

Then the question was: At the end of the animation, after the battle with Yusei Fudo, Z-ONE should have died.

Yuei Vu quickly thought of the previous conversation with Yusei in the other dimension.

When he asked if Yusei had defeated Z-ONE, Yusei gave a negative answer, only saying that the situation was a bit complicated.

Now it seemed that the situation may be quite complicated.

"Maybe, you did change history, Yusei Fudo." Z-ONE said, "I also thought that it meant that I succeeded, the future was changed, and mankind regained hope.

But not long after that, I found that I was too naive. The future has indeed changed, but it has not become better."

He glanced at everyone present with a cold and somewhat numb look.

"The fate of the world must change from here."

"Are you testing me again this time?" Yuei Vu looked at Z-ONE and asked, "Or have you not given up on trying to change the future?"

"I guess so, but it's a little different from before." Z-ONE didn't seem to have any intention of explaining in detail, and only said, "But from now on, all of you here will never be able to leave the twelve dimensions and return to Earth."

Yuei Vu narrowed his eyes: "Is it still to curb the development of Duel Monsters?"

It seemed reasonable. After all, Yuei Vu, the Duel King, was here, Yu Judai, the protagonist of the world, was here, and President Kaiba, who might be the number one contributor to Duel Monsters in the history of mankind, was also here.

If all of them were locked up in another dimension and never released, it may indeed rewrite the history of Duel Monsters.

"Have you ever thought about why the door between the Earth and the other dimension opened?" Z-ONE changed the subject, "Why can those Duel Monsters from the other dimension find the way to the Earth and stimulate the awakening of the Supreme King?"

Is it really just because of the incident of the Light of Destruction that the dimensional barrier loosened?"

Many people's faces changed slightly when they heard this.

"You mean," Yuei Vu said, "From the beginning, this was all arranged by you?"

"To some extent, yes." Z-ONE admitted openly, "Because I need you to stay in this dimension, it will be the best option for the Earth."

He then glanced at Yusei.

"According to your timeline, your world will soon usher in a major event." He said, "That event will be an important dividing line, directly determining the fate of countless people in an entire era.

Yusei Fudo also knows this, and he came for this reason."

Everyone's eyes turned to Yusei.

Yuei Vu immediately remembered that Yusei seemed to have mentioned that something big was about to happen in their world, and Yusei returned to this era for this reason.

"Maybe we did come back here for the same thing." Yusei frowned, "But even if you lock the duelists of this era in another dimension, it won't solve the problem."

"That's hard to say," Z-ONE said.

"That's not up to you to decide," Yusei said.

"Maybe, but unfortunately the world doesn't have many options anymore." Z-ONE said lightly, "In my era, I was the only option."

"I won't allow you to do that, Z-ONE."

Yusei stepped forward and pointed at Z-ONE.

"Fight me again, Z-ONE!" he said, "If I win, you have to let everyone leave this dimension, and we'll work together for the future."

"No, Yusei, if what he said is true, then this is our battle." Yuei Vu interrupted, "I'll do it myself."

"Go away, Yuei↑ Vu↓!" Kaiba waved his hand and shouted, "If the opponent's goal is to the Duel Monster game itself, then I have to accept this duel!"

It could be seen that President Kaiba has been developing the D-Wheel and studying dimension crossing recently. He has spent so much effort to chase the other dimension, but in the end, except for the duel with the commander of the Dark World, he didn't participate in any important card games, and he was feeling very depressed.

But Yuei Vu must not give this duel to the president.

Because although the president might be unhappy if he told the truth, to be honest, Yuei Vu felt that the possibility of the president winning Z-ONE was very small.

Even he himself didn't dare to say how confident he was.

Unexpectedly, Judai also spoke up: "No, President Kaiba, Mr. Yuei Vu, it's my fault that everyone is trapped in this dimension. This duel should be my turn."

Unexpectedly, they didn't get this chance in the end.

Z-ONE's eyes turned cold under the mask, and his indifferent voice suddenly became a little irritated.

"You?"

"Yes, it's me again."

The voice sounded from above everyone's head.

Everyone looked in the direction of the voice and saw a man wearing a white windbreaker, a navy hat, his hands in his pockets, and his feet suspended in the air like a god.

He had a unique temperament and a unique appearance, as if he had engraved his elegance into his DNA, making it impossible for people to make a mistake after seeing him once.

Because of this, everyone's pupils contracted and their eyes widened in disbelief.

Even Judai was surprised for a while. His heterochromatic eyes moved back and forth between the figure that appeared in the air and Yuei Vu beside him several times, and finally, he spoke uncertainly: "Yuei... Yuei Vu-sensei?"

That's right, the figure that appeared in the air was Yuei Vu.

He looked exactly like Yuei Vu standing among the crowd.

Chapter 1142: The Duel King Of The Future

"There are... two Yuei Vu-sensei!?" Judai said in surprise.

Most people were stunned for a moment, but Yuei Vu himself accepted it the fastest.

"I see." Yuei Vu understood, "My future self?"

This was very reasonable.

The future Yusei could travel through time and space, and Z-ONE and his friends ran around in every era, so why couldn't he do the same?

And Yuei Vu looked up at the figure in the air and nodded slightly.

Heh, even after so many years, my Charm 95 is still completely irresistible. Worthy of me.

But at the same time, he also found some noteworthy details.

If that was my future self, why didn't he look old at all?

But Yuei Vu didn't say anything, just quietly retreated, sat back on his D-Wheel, and put on a look of watching a show.

Since the future self has followed, there was probably nothing for him to do next.

It just so happened that Yuei Vu himself was also very curious about what his future self's deck would be.

"..."

"Mr. Yuei Vu!" Yusei took a step forward, but he was not calling the Yuei Vu next to him, but the one who was obviously falling from the sky.

"Stand down, Yusei, it's not time for you to appear on stage yet."

The future Yuei Vu landed gently on the ground and waved his hand to signal Yusei to step back.

"Leave this guy to me."

The sharp eyes shot out from under the iron shell of Z-ONE were fixed directly on the white-clothed Yuei Vu.

"You are really relentless in pursuit." He said, "Across one era after another, and now one dimension after another, you finally caught up with me."

"That should be my words." Future Yuei Vu raised the corner of his mouth and smiled, "If I must say it, you chased me first."

Z-ONE knew he was referring to the Yuei Vu of this era.

"I have to say, your methods are getting more and more low-level." Future Yuei Vu said, "Contact the Vampire Vamp, intending to trigger a chain reaction from the empire of that dimension, causing turmoil in the twelve dimensions.

If it were you in the past, you would not have taken such low-level methods."

Upon hearing this, Vampire Fraulein immediately appeared, staring at the human hidden in the mechanical device with scarlet eyes.

"So it was you?"

The one who turned Vampire Vamp against her was this person?

"That's how time works. You throw any stone into the long river of time, expecting it to cause a shocking change to the entire timeline."

Z-ONE said calmly.

"If you fail, just keep trying. I have tried thousands of times and failed thousands of times. As long as there is even a slight possibility of affecting the timeline, it is worth trying, there is no difference between high and low."

After a pause, he added: "Besides, your relentless pursuit has left me with few options to operate."

"So it's still my fault." Future Yuei Vu shrugged.

"But it's obviously not a solution to keep going like this."

Z-ONE activated the huge device under him. A pair of huge mechanical arms stretched out from both sides of the suspended vehicle, and a deck of cards was automatically shuffled in the unique Duel Disk mounted on the device.

"Then let's end it in this era and this dimension."

Future Yuei Vu didn't say much nonsense and directly opened the Duel Disk.

"That's what I meant."

At this time, Yuei Vu noticed that his future self's Duel Disk had obviously been updated again. It was a model he had never seen before, with a white shell, and the style was a bit like the alien technology in the movie. When activated, the entire Duel Disk was covered with light blue lines, a bit like the flashing neon lights in the city at night.

He knew that this was a bit ridiculous, but at this moment, he was even a little moved by the Duel Disk in his future self's hand.

Z-ONE's life support device was activated, and it took off at high speed like a mecha, and flew to the air dozens of meters before stopping.

What was even more weird was that the future Yuei Vu actually followed him and flew up to the air directly with his body in an anti-physical way, and his white windbreaker fluttered in the wind.

Many people below stared straight at him.

One player directly said: "Fuck, this is too cool, isn't it?"

"The Yu- prefix guy's once-in-a-lifetime flight!"

"Calm down, calm down, this is a basic operation."

"As we all know, when a duelist reaches a certain level, they can fly."

Z-ONE seemed to have calmly accepted the setting that "duelists can fly". He looked at the white-clothed Yuei Vu flying to the same height as himself, and manipulated the huge mechanical arm to draw five cards in one breath.

"Duel!" x2

[Z-ONE, LP 4000]

[Future Yuei Vu, LP 4000]

"It looks like I'll have the first move."

Future Yuei Vu glanced at the words on the electronic display of the Duel Disk, then looked up at Z-ONE and smiled slightly.

"How about it? If you want me to give you the first move, it's no problem."

He looked relaxed, and it seemed that he would take the initiative to give up the first move right as long as Z-ONE asked.

In the later stages of Yu-Gi-Oh, almost everyone knew that the first player has a much higher advantage than the second player. If you went first, you won more than half of the time. Statistics showed that the second player lost about 20% of the chance of winning.

Players who have entered the game early know that for more than ten years, Yu-Gi-Oh had maintained the rule of "both sides start with six cards". It was not until the game developed to the point where the first player had an increasing advantage and there was a vague trend of being out of control that the official changed the rule to "The first player no longer draws during their first Draw Phase".

In other words, it was to balance the strength of the first player and the second player by letting the first player have one less card than the second player.

For Yu-Gi-Oh, a card game where card difference is king, you could imagine how much it will weaken the first player by directly cutting off one card.

But even so, actual combat has proved that the first player still has an overwhelming advantage, and the gap in the chance of winning would be huge in comparison.

Under such conditions, Future Yuei Vu still calmly said that he could give up the first move. He had already suppressed Z-ONE in momentum before the fight started, as if it didn't matter to him even if he gave up the first move advantage.

"It doesn't matter."

Z-ONE seemed confident enough and disdained to accept the generosity from his opponent.

"Oh? Then I won't be polite."

Future Yuei Vu put away his relaxed smile and looked a little more serious.

"Then I'll go first, draw!"

After drawing the card, Future Yuei Vu directly showed the two cards in his hand.

"Activate the effect of 'Junk Converter' – Discard this card and a Tuner monster, then add a 'Synchron' monster from my Deck to my hand.

I discard 'Junk Converter' and the Tuner monster 'Jet Synchron' to the Graveyard, and add 'Junk Synchron' from my deck to my hand!"

Seeing the first operation, Yuei Vu, who was sitting in the spectator seat, was moved.

Will my future self use the same "Synchron" as Yusei?

This was indeed reasonable. Yusei gave him a "Drill Synchron" back then, so Yuei Vu actually already had a whole deck based on the "Synchron" series. It's just that due to the limitations of the times, he couldn't use "Synchro Summon", so he couldn't exert his combat power.

If the future self gets a complete Synchron deck, then in the 5DS stage with "Synchron Summon" as the core, it was indeed possible to get the most advanced combat power in the current Yu-Gi-Oh card pool.

Whether this was the case or not, it depended on how he proceeded next.

Chapter 1143: Will People In The Future Duel Like This?

Yuei Vu found that Yusei, who was standing beside him, did not seem to be surprised at all that he would start with "Synchron" in the future. Judging from his reaction, it seemed that he already knew it.

Yuei Vu couldn't help but think of the previous duel with Judai, when Yusei mentioned "the power brought by the bond of companions", he glanced at him intentionally or unintentionally.

Is there any connection between this and the relationship between me and Yusei in the future?

Will he and I be partners in the future? Teammates? Or like the relationship between him and Judai, mentor and student?

At the same time, Future Yuei Vu's turn was also continuing.

"I add 'Junk Synchron' to my hand!" said Future Yuei Vu, "Then I Normal Summon 'Junk Synchron'."

The most classic Synchron monster came to the field wearing wide and cute goggles and orange armor, but his small body seemed extremely reliable.

"Junk Synchron's effect is activated." Future Yuei Vu continued, "When this card is Normal Summoned: I can target 1 Level 2 or lower monster in my GY; Special Summon that target in Defense Position, but negate its effects.

I Special Summon the 'Junk Converter' in the graveyard."

Junk Synchron stretched out his little hand, opened his five fingers, and a black vortex immediately opened up on his side. The small mechanical junk monster jumped out and landed lightly on the field.

[Junk Converter, DEF 200]

"Level 3 Tuner 'Junk Synchron', Level 2 'Junk Converter', tuning!"

The orange-red warrior leaped into the air, raised his hand, and pulled the stretch behind him, and his body turned into three green rings. The mechanical warrior was wrapped in layers of rings and turned into two shining new stars, arranged in a straight line.

[3+2=5]

"Gathering stars are galloping on the endless evolutionary road! Become the path that lights the way!"

Future Yuei Vu raised his arms high.

"Synchro Summon! Level 5–

–Junk Speeder!!!"

The synchronized starlight, the warrior in silver-white armor flew out handsomely! He seemed to be stepping on the sound waves, his figure was like a swung blade drawing silver light in the air, and a volley sweeping kick kicked out a chic arc.

[Junk Speeder, DEF 1800]

When this Synchro Monster appeared, those who didn't know him were fine, but the players around him who were already in a commotion suddenly went crazy.

"Fuck, fuck, fuck! It's Speeder!"

"As expected of the future Yuei Vu-san, this is going to be beyond godlike!"

"Yuei Vu-san, the protagonist of the world is confirmed again, and he even has Speeder, this is not taking off"

Junk Speeder, a Synchro Monster with epoch-making significance for Yusei Immovable's protagonist deck. His design was obviously a combination of Yusei's favorite monsters "Junk Warrior" and "Speed Warrior" in the animation.

He had armor with the same design style as Junk Warrior, but the color of the armor was similar to that of Speed Warrior. And unlike Junk Warrior, who used punches as the main means of attack, from the card picture, Speeder's main means of attack was kicks, which was also more similar to Speed Warrior.

Just as its name suggests, its appearance directly "speeds up" Yusei's Synchro deck, bringing the operation speed of the entire deck to a whole new level.

The students of the Duel Academy were still confused at this time. But they didn't need their silly teachers to explain, they soon realized the abnormality of the Speeder.

"Junk Speeder's effect is activated." Future Yuei Vu said, "If this card is Synchro Summoned: I can Special Summon as many 'Synchro' Tuners as possible with different Levels from my Deck, in Defense Position."

As soon as these words came out, the students were also dumbfounded, and even suspected that they had heard it wrong.

What the hell is this?

Pick any monster from the deck according to your own preferences to Special Summon? And "as many as possible"?

Especially those students who had received education from "teachers" and had a certain understanding of the operation of powerful decks could feel its abnormality from this short effect description.

It was indeed true. In the era of "Yu-Gi-Oh! GX" where these students lived, the cross-era Synchro Monsters such as Junk Speeder could indeed be said to be equivalent to the existence of fake cards.

The effect of Junk Speeder allowed the duelist to tell stories and synchronize in the first round, and by the end of the round, they could arrange a basically invincible lineup on the field. The only thing left for the second player was absolutely irresistible and bottomless despair.

So if it was in this era, Junk Speeder was equivalent to a super fake card that the duel is over when the duelist takes the initiative.

Of course, it was limited to "in this era".

Such a shameless fake card was not so dazzling in the era when Speeder was born.

If you want to ask why...

Z-ONE, the man from the end of time, quickly gave an answer.

He controlled the mechanical arm and slowly showed a hand card.

"Then I discard this card from my hand to activate its effect." He said calmly, "Tuner monster—  
—Ash Blossom & Joyous Spring!"

When Z-ONE played this card, not only the players but also Yuei Vu almost vomited blood.

What!?! Z-ONE, how can you use such a fake card!?

However, the students of the academy obviously did not understand the horror of this card at first, and only expressed their confusion at the silly teachers' fussing.

When Z-ONE threw the monster card to the graveyard, a little loli with white and transparent skin and a wide forehead jumped out of the field. She had a pair of crystal-clear feet bare, a pair of cute rabbit-like ears on her blonde hair, and a red bow on her little head.

Marufuji Sho was instantly overwhelmed: "Ka... kawaii~"

Asuka was also awakened to her girlish heart: "What a cute monster."

However, many gentlemen who licked any girls and even non-human species, when facing this cute little loli, no longer said something like "my waifu". Instead, they were either dazed or trembling with their heads in their hands, as if they recalled the fear of being dominated by something extremely terrifying.

Cute? Cute as hell!

That's Ash Blossom & Joyous Spring!

The most ferocious and evil monster in the history of Yu-Gi-Oh!

"Ash Blossom & Joyous Spring's effect is activated." Z-ONE said, "Discard this card from my hand to negate the effects of magic, traps, and monsters with the following effects

Add a card from your deck to your hand, or special summon a monster from your deck, or send a card from your deck to the graveyard."

Z-ONE pointed his huge mechanical hand at the speed-increasing warrior on the opposite field.

"The effect of 'Junk Speeder' includes 'Special Summon a monster from the Deck'," he said, "So I discard 'Ash Blossom & Joyous Spring' and negate that effect!"

Chapter 1144: Battle of Gods

Ash Blossom & Joyous Spring, by discarding it from the hand, could invalidate the effects including drawing, deck searching, graveyard feeding and special summoning from the deck.

Card masters who knew Yu-Gi-Oh could see that this basically includes all the effects that must be used by meta decks in all generations to build the field.

Therefore, Ash Blossom & Joyous Spring alone could strangle countless combos in the cradle and make people die on the spot.

Let's not talk about the distant past, just talk about the "Junk Speeder" summoned on the field now.

In the past generations of Yu-Gi-Oh environment, Junk Speeder was basically the first move to directly determine the victory or defeat. You just needed to Synchro Summon Junk Speeder, activate its effect to call as many Synchron monsters as possible from the deck in one breath, and then after a long series of operations, you could definitely arrange an invincible lineup.

For example, when the effects of the five monsters you summoned on the field were all "negate the Spell/Traps/Monster Effects and destroy it", imagine that the opponent only had six cards in his hand at the beginning, and five of them were destined to be directly negated. Facing this lineup, the opponent had no room for resistance.

But the sudden appearance of Ash Blossom & Joyous Spring changed this situation.

One Ash Blossom & Joyous Spring could directly make the fake card effect of the Junk Speeder invalid. And not only that, because you might have used up the precious normal summon opportunity that only came once per turn when you summoned the Junk Speeder, you would most likely not be able to continue to deploy after eating Ash Blossom & Joyous Spring.

All you can do was to leave a Junk Speeder with a defense of only 1800 on the field alone and end this round helplessly. Then in the next opponent's turn, you would helplessly watch the opposite side operate and OTK you.

However, like the old saying "there is no invincible card, only invincible player", even for a vicious and lawless loli like "Ash Blossom & Joyous Spring", there were things that could punish her.

"Then I chain to your activated 'Ash Blossom & Joyous Spring'," Future Yuei Vu said slowly, and then showed a card from his hand, "Quick-Play Spell 'Called by the Grave'.

Target 1 monster in the opponent's GY; banish it, and its effects are negated until the end of the next turn, as well as the activated effects and effects on the field of monsters with the same original name!"

The players were all dumbfounded.

"What? Graveyard's Finger?"

"Battle of gods, truly a battle of gods..."

Called by the Grave, from this effect description, it can be seen that this card is the "natural enemy of hand traps".

Hand traps, as the name suggests, were cards that acted like a trap that came from the hand. From the early Kuriboh, to the later Sphere Kuriboh, Kiteroid, Swift Scarecrow, Battle Fader, etc., to the "Ash Blossom & Joyous Spring" known as the most terrifying hand trap in history, they were all activated by this method.

No matter what the effect was, the common point of these hand traps was that they must be "sent from the hand to the graveyard" before their effect could be activated.

Unfortunately, "Called by the Grave" could just remove monsters in the graveyard and negate their effects.

Even "the most vicious and evil monster in history" Ash Blossom & Joyous Spring was no exception.

"I remove the 'Ash Blossom & Joyous Spring' in your graveyard from the game." Yuei Vu said, "Its effect is negated. Therefore, the activation of 'Junk Speeder' continues."

The shadow of the broad-foreheaded little loli emerged from the graveyard. She pouted unhappily and was helplessly sucked into the vortex of the other dimension, leaving this game early.

"Is the activation of 'Ash Blossom & Joyous Spring' negated?" Z-ONE said expressionlessly, "Then I will activate the effect of this card in my hand——

——Tuner monster, Effect Veiler!"

The players ran wild again.

"It's dirty!"

"It's hard, my fist is hard!"

"Effect Veiler! Damn, are these two gods?!"

The students in the academy felt a little strange when they saw the instructors' violent reactions.

In fact, in the eyes of most students, these instructors all give people an unfathomable impression.

In the past, every time students saw some ridiculously strong and almost unreasonable horror cards – such as cards with super high attack power, multiple attack capabilities, field explosion capabilities or extremely high resistance – and so on, the instructors often showed disdain.

This made the students feel that although these instructors looked silly, they were knowledgeable. Those cards that made the students shout that they were abnormal were nothing more than that in the eyes of the instructors.

On the contrary, things like Ash Blossom & Joyous Spring and Called by the Grave seemed quite ordinary to the students. They didn't know why the instructors reacted so strongly, even more exaggerated than seeing the three Egyptian Gods...

Now what the hell is this "Effect Veiler"?

Effect Veiler was also the nightmare of a generation of Yu-Gi-Oh players. It was called "stockings" and the reason was easy to understand. Because Effect Veiler not only had angelic wings and cute twin ponytails but also a pair of unforgettable black stockings...

But the cute appearance did not affect its horror.

"Effect Veiler's effect – Discard this card from my hand during the opponent's main phase," Z-ONE said coldly, "A monster on the opponent's field has its effect negated until the end of the turn."

His huge mechanical arm raised and pointed at the Junk Speeder on the opponent's field again.

"Junk Speeder's effect is negated again."

This time there was no protection like "Called by the Grave". After a series of short and fierce confrontations, the invincible Junk Speeder finally failed to activate his powerful effect successfully.

It was worth mentioning that "Effect Veiler", an epoch-making hand trap that also shook the entire Yu-Gi-Oh environment, was also a common card used by Yusei in the animation.

The protagonists of all generations always have a few hand traps and grave traps.

"Is the ability of 'Junk Speeder' still invalid?" Future Yuei Vu asked.

"Duel King Yuei Vu, I have studied your duel for more than one era." Z-ONE replied coldly, "Do you really think I will be unprepared for your tactics?"

"That's right. But in that case, you should not have forgotten the effect of 'Junk Converter', right?" Future Yuei Vu smiled, "The moment it entered the graveyard, the second effect of 'Junk Converter' was activated."

If this card is sent to the GY as Synchro Material: I can target 1 Tuner in my GY; Special Summon it in Defense Position."

From his Graveyard Zone, Future Yuei Vu withdrew a card, which he slapped on the Duel Disk again.

"Special Summon the 'Junk Synchron' in the graveyard once again!"

[Junk Synchron, DEF 500]

"Level 3 Tuner 'Junk Synchron', Level 5 'Junk Speeder', tuning!"

Junk Synchron pulled the rope behind him, and his body turned into green halos again, wrapping the Speeder in the middle, and transformed into five stars arranged in a straight line.

[3+5=8]

"Shine the wings that store the holy light, and strike down your enemies with its radiance! Synchro Summon——

——Crystal Wing Synchro Dragon!"

The players who were watching the show went berserk for the Nth time.

"Nana Nana Nani!?"

Chapter 1145: Timelord

Synchronous starlight fell vertically, and the crystal-clear, almost transparent wings seemed to cut the light curtain like a sharp blade.

Starlight fell from the sky in a scattering manner, like falling raindrops. The silver-white dragon was like a cannonball, spiraling into the sky at a rapid speed, tearing through the clouds, and then like a dive bomber, falling like a meteor across the sky.

The dragon was wearing white armor, and the transparent wings were shaped like steel knives. The surrounding starlight was like elves flying all over the sky, making it look dreamy and sacred.

[Crystal Wing Synchro Dragon, ATK 3000]

When a monster was strong enough to be rare, others could feel their extraordinariness from the momentum just by summoning them in a duel.

For example, this "Crystal Wing Synchro Dragon" was exactly like this.

Although it was also a Synchro Monster, this dragon is not from the 5DS, but from the later Yu-Gi-Oh animation. In the animation, this dragon was also the protagonist's ace monster. From the spirit level, it was a rare strong one among Synchro Monsters.

The moment this dragon appeared, everyone really felt a strong sense of oppression, and couldn't help but admire the nobility of this dragon from the bottom of their hearts.

Especially President Kaiba, who reacted the most uncalmly.

Yuei↑Vu↓ this bastard... Did the future you actually get this kind of dragon that can rival my Blue Eyes!?

That's right, this "Crystal Wing Synchro Dragon" had an attack power of 3000 and a defense power of 2500. It was a typical "Blue-Eyes White Dragon"-expy monster.

"Synchro Monster... is another existence that needs to be wiped out."

Z-ONE said dryly, and the mechanical arm showed another card.

"Then I activate the Trap Card 'Empress's Crown' from my hand." Z-ONE said dully, "This card can be activated from the hand when the opponent Special Summon a Synchro Monster. For each Synchro Monster on the opponent's field, I draw two cards." (Animation card)

The mechanical arm swung violently, and two cards were drawn.

"Because you have 'Crystal Wing Synchro Dragon' on your field, I draw two cards."

"My turn is over." Future Yuei Vu said.

"Then it's my turn, draw."

It was Z-ONE's turn. The future savior returned the drawn card indifferently to his hand, and then showed another card: "Activate the Spell Card 'Foolish Burial'. Send a monster card from my deck to the graveyard.

I send 'Makyura the Destructor' from my deck to my graveyard."

Watching Z-ONE send this ancient divine card to the graveyard, Yuei Vu, who was watching the game below, couldn't help but raise his eyebrows.

Oh my god, how come Z-ONE has also started to use Makyura?

Why don't you learn from the good ones, but only from me?

But just from the details of this turn, it could be seen that as the final BOSS throughout the first three Yu-Gi-Oh games, Z-ONE had become stronger than himself in the original work.

Apart from other things, the hand traps that dominated the environment in real life, such as Ash Blossom & Joyous Spring and Effect Veiler, were enough to directly raise the strength of his deck by a large margin.

"Spell Card 'Card of Adversity'! If I control no monsters and the opponent controls a Special Summoned monster: Draw 2 cards."

Z-ONE mechanically drew two cards with his steel arm, and then immediately slapped one of the cards in his hand.

"According to the effect of 'Makyura the Destructor', I can activate a trap card from my hand during this turn." He said, "So, I activate the Continuous Trap 'Empty Machine' from my hand!"

The continuous trap card appeared beside Z-ONE.

Empty Machine: If you control no monsters, you can Tribute Summon 1 Level 10 or higher monster without Tributing. The ATK of all face-up monsters you control becomes 0. (anime effect)

It was the key card for calling the Timelord in the animation.

However, Z-ONE did not activate its effect and showed the next card directly.

"Next is the Trap Card 'Multiple Destruction'," Z-ONE said, "This card can only be activated when both players have three or more cards in their hands. Both players discard all their cards and receive damage equal to the number of cards discarded x 100. Then both players draw five cards each." (Animation card)

[Z-ONE, LP 4000 → LP 3700]

[Yuei Vu, LP 4000 → LP 3700]

"Activate the Continuous Trap 'Infinite Machine!'" he said, "This card can only be activated by sending the Continuous Trap 'Empty Machine' on my field to the Graveyard.

While this card is face-up on the field, I can Special Summon Level 10 or higher monsters from my hand." (Animation effect)

Z-ONE then raised his voice: "The effect of the Continuous Trap 'Infinite Machine' is activated!"

His mechanical hand flipped over and showed the four newly drawn cards in one breath.

"I special summon all four Level 10 Timelords in my hand through the effect of 'Infinite Machine!'"

He threw the four cards directly into the air, and each of them turned into a huge steel angel entity on the field, like four giants standing tall!

[Metaion the Timelord, ATK 0]

[Lazion the Timelord, ATK 0]

[Michion the Timelord, ATK 0]

[Zaphion the Timelord, ATK 0]

Timelord's quadruple summon!

Timelord series, Z-ONE's real deck, was considered to be a relatively high-end deck among the previous Yu-Gi-Oh bosses.

The source of the power of the Timelord was the "Kabbalah the Tree of Life", which was a relatively high-end existence even in the power system of the Yu-Gi-Oh world.

The Timelords themselves were all Level 10 monsters, and each monster was the ace-level killer of the deck.

In addition to making people feel powerful and majestic, these Timelords who appeared on the stage also revealed a different kind of weirdness. Each of them had a body similar to a metal structure and a sacred appearance, but the main part of the torso was, without exception, topped with a weird-shaped face, which looked grotesque and weird.

"When the Continuous Trap 'Infinite Machine' is on my field, the attack power of all monsters I control becomes 0." Z-ONE said, "Of course, the attack power of the Timelord is originally 0."

"Summoning so many Level 10 monsters at once!" Marufuji Sho's face turned pale.

"And the attack power is all 0." Manjoume looked serious.

As we all know, things with 0 attack power are real monsters.

Especially these monsters came with special effects, a unique style, and a strong aura, and they were all level 10. When things that meet these conditions were all 0 ATK, it was quite noteworthy.

After a pause, he raised a mechanical arm.

"Battle!" Z-ONE said coldly, "First, 'Metaion the Timelord,' attacks 'Crystal Wing Synchro Dragon.'"

The light on the first Timelord rippled, and he began to prepare for an offensive.

It was a red Timelord, with a face with wide eyes on his chest, and a terrifying look in his eyes.

Given the huge difference in attack power, if they fought normally, Metaion certainly couldn't be the rival of Crystal Wing Synchro Dragon.

But the terrifying thing about the Timelord was exactly that.

To fight this kind of thing, you had to put aside common sense. Because they would never "fight normally" with you.

"All Timelord monsters cannot be destroyed by battle, and the battle damage they cause to the controller is all 0," Z-ONE said.

"Ah," Judai said, "this effect..."

He couldn't help but look at Yubel beside him.

Yubel also nodded: "It's the same type of monster as me, and it must be more than that."

"And all the different Timelord will activate different effects after the battle." Z-ONE said, "When Metaion battles, all monsters on the opponent's field will be returned to the owner's hand.

And according to this effect, inflict 300 damage to the opponent for each monster returned."

The students were dumbfounded.

"What... What!?"

What the hell is this effect?

Chapter 1146: The Assault Of The Timelords!

"The effect of Metaion is that when he battles, all monsters on the opponent's field will be returned to the hand of the holder, and the opponent will receive 300 points of damage for each monster returned by this effect!"

Z-ONE's words were as loud as a bell, and the students of the academy were almost dumbfounded.

What kind of effect is this!?

It cannot be destroyed by battle, and it does not take battle damage, and as long as you punch it... all your monsters will be returned to the hand?!

It was worth noting that this effect was "all returned to the hand", which was neither destroy nor target.

In other words, even a top heavy-hitter like Blue-Eyes Chaos MAX Dragon, who "cannot be targeted or destroyed by card effects", could only leave with hatred in the face of such absolute power.

"No, it's more than that." President Kaiba Seto's face also showed a rare solemn look, "This effect... Even among the three Egyptian Gods, perhaps only the highest-level 'The Winged Dragon of Ra' can resist it."

The students showed even more astonished expressions.

These monsters... can they fight against gods?

Many people didn't know the specific effects of gods, but as a former holder, Kaiba Seto naturally understood this.

The Egyptian Gods had absolute resistance to Traps, absolute resistance to the effects of monsters below Level 10, and could not be forced to leave the field by Spells. These resistances combined are enough to make the Egyptian Gods invincible in most cases.

But it was common in the animation that Obelisk would be blown up by the "Thunder Summon Bullet" of the Traitor Dragon, and the Obelisk and the Traitor Dragon had been cleared by the effect of Ra more than once.

The explanation of the effects of the Egyptian Gods in the animation was vague, and most of them were inferred by the audience based on actual combat performance.

For example, the animation only said that the Egyptian God would accept the Spell effect for only one turn, and never said that it could not be forced to leave the field. That supplementary explanation was an inference based on the performance of the animation.

In addition, the animation only said that the Egyptian God has absolute resistance to traps. As for the effects of monsters, it seemed that it was sometimes effective and sometimes ineffective according to the plot.

Finally, based on the summary of all scenes, many people tended to agree that the Egyptian Gods only accept the effects of Level 10 or above monsters.

Unfortunately, all the Timelords were Level 10.

In fact, this was reasonable. Even after more than 20 years of development, there were not many monsters above Level 10 in the entire Yu-Gi-Oh card pool. Most of the monsters that could touch this level threshold were powerful and had a background. Even according to the setting of the animation, it was not surprising that the ability of monsters of this level was effective against the gods.

There was no need to say more about the Timelord. After all, the power of the Timelord came from the equally powerful system "Kabbalah the Tree of Life", and its holder was the BOSS throughout the three generations of Yu-Gi-Oh and the candidate for the highest BOSS of all generations, Z-ONE, so naturally it was not weak.

But Future Yueli Vu also responded: "Then at this moment, the effect of Crystal Wing Synchro Dragon is activated! Once per turn, when another monster's effect is activated: I can negate the activation and destroy that monster, then this card gains ATK equal to the destroyed monster's original ATK until the end of this turn!"

Misawa couldn't help but say again: "This dragon's effect is also very strong!"

This time, the silly instructors did not show disdain.

After all, Crystal Wing Synchro Dragon was a Synchro big brother that had a place in the extremely brutal real-life environment more than ten years later, so of course it must be awesome.

Future Yuei Vu waved his hand: "Negate the effect of 'Metaion the Timelord'."

The white dragon spread its transparent wings, and the dragon's body was covered with white shining light, drawing a brilliant arc trajectory in the air.

It raised its head and let out a high-pitched dragon roar that pierced the sky. The fierce attack of the Timelord was smashed to pieces by that power. The white energy beam continued to move forward, piercing the solid shell of the Timelord like a sharp blade, but it seemed that it could not shake the indestructible body.

"Not a bad counterattack." Z-ONE said calmly, "But the Timelord cannot be destroyed by effects."

The students were a little overwhelmed.

"It cannot be destroyed by battle, cannot be destroyed by effects, and cannot cause battle damage. If it fights, it will bounce away all the monsters on the opponent's field!" Kenzan shouted, "Isn't this thing too OP?"

"And this is just one of the Timelords." Aster frowned, "We must assume that all other 'Timelords' have the same degree of power as this Timelord."

Judai couldn't help but say: "Similar effect to Yubel, but more practical..."

In fact, Judai was still a little polite. After all, although they were all Level 10 monsters, the Timelord was easier to summon than Yubel, had more comprehensive resistance, and had a better field-clearing effect.

But as if realizing that it was inappropriate to say so, Judai said "ah" and looked at Yubel beside him: "Of course, your effect is also very useful."

Yubel rolled his eyes at him, pouted, and kept silent.

"Should... shouldn't it be?" Marufuji Sho said uncertainly, "Maybe the one just now is the strongest of these Timelords? If all monsters have such strong abilities, it would be too outrageous..."

However, his fantasy was soon shattered.

Z-ONE said indifferently: "The first attack was blocked, but you won't be so lucky next time. The battle continues, and the next attack is the attack of 'Lazion the Timelord'."

The second Timelord moved. This was a Timelord in red armor, and his shoulders on both sides were like huge steel braziers, with hot flames leaping in them.

There was also a terrifying face in the middle of his torso, with fierce eyes and a thick black beard on his chin, like an old man who was intimidating without anger.

"Lazion will not be destroyed by battle or effects, and the battle damage he causes to me is also 0."

Z-ONE continued to speak indifferently.

"Moreover, when Lazion battles, all monsters the opponent controls and all cards in their Graveyard... must be returned to the deck and shuffled!"

Everyone was dumbfounded again.

"What the hell!?"

Just a few seconds ago, they were still lucky, thinking that Metaion, who was just defended, might be the most powerful and unscientific one among the Timelords.

As a result, now it was even more outrageous!

Metaion at least just "returned the monster on the field to the hand", but this thing bounced directly back to the deck!

Not only it was neither destroy nor target, but this time even the cards in the graveyard must be returned to the deck!

What did this mean? It meant that the resources that the opponent had worked hard to accumulate in the graveyard would also be directly emptied under the attack of this Timelord!

In other words, Lazion's punch not only swept the opponent's field but also greatly killed the opponent's endurance and extinguished the hope of a counterattack!

"Timelord..." Misawa swallowed his saliva, "What kind of monsters are these..."

"Do Timelords all have the terrifying power to instantly crush the opponent's will to resist?" Unlike other people, President Kaiba's mouth twitched slightly when he saw these monsters, showing an interested expression, "Interesting..."

Chapter 1147: Burning Ace!

The effect of the Crystal Wing Synchro Dragon was only once per turn, so naturally it could no longer block the attack of the second Timelord. The power of the Timelord came like a tidal wave, and the white dragon was drawn into the vortex of energy. It roared unwillingly and then hurriedly left the field.

In this way, the field on the side of Future Yuei Vu was empty.

"Next is 'Michion the Timelord'," Z-ONE continued, "Direct attack."

The red Timelord spread out three pairs of six golden wings, punched through the air, and the fist force turned into visible red energy that swept through Future Yuei Vu's body, causing his clothes to rise and fall like white waves.

Of course, the attack power of the Timelord was 0, and the attack could not cause battle damage.

"At this moment, the effect of 'Michion the Timelord' is activated." Z-ONE said, "When Michion battles, the opponent's LP is halved."

The strong impact was wrapped in the tide of energy, like a heavy hammer hitting Future Yuei Vu's body. However, his body only bent slightly, and his feet slid back half a step under the action of inertia, and then he stood firm.

[Future Yuei Vu, LP 3700 → LP 1850]

"Is that Timelord the type that can always deal a lot of damage and suppress the LP value no matter how many monsters and what kind of defense the opponent has on the field?" Misawa analyzed, "Sure enough, each of them has a terrifying ability..."

"My turn is over." Z-ONE finally announced the end of his turn.

The Timelord series was also a type with a large difference between the real card and the animation effect, but it was difficult to say which one was stronger and which one was weaker.

In terms of offensive ability and effect strength, the animation card was definitely much stronger than the real card. However, in terms of practicality, the real card might be stronger.

Because although the strength of the real-life Timelords had been weakened, they had the effect "If you control no monsters, you can Normal Summon this card without Tributing", so they could always be played as long as you drew them.

The animated Timelords did not have a similar effect. Either you had to use two monsters as sacrifices for the Tribute Summon, or you had to rely on the "Empty Machine", "Infinite Machine" and "Infinite Light" which specially supported the Timelords.

So you could imagine that if it was really made into a real-life card according to the animation effect, the degree of the dead draw in this deck was enough to make any player doubt his life.

But as we all knew, for anime characters, especially big shots like Z-ONE whose Duelist Rank was at least ten or above, the problem of the dead draw was not within his consideration at all.

This made his Timelord system extremely powerful.

"Then it's my turn." Future Yuei Vu said, "Draw!"

"At this moment, another effect of 'Lazion the Timelord' is activated." Z-ONE slowly raised a mechanical arm, "When the opponent draws a card during the Draw Phase, inflict 1000 damage to the opponent."

The dark red energy beam was like a transparent sharp blade, suddenly piercing through the heart of Future Yuei Vu, shaking his body slightly.

[Future Yuei Vu, LP 1850 → LP 850]

"Timelord... Such a strong suppression power." Aster said seriously, "It's completely different from the style of any other deck..."

"That Continuous Trap," Manjoume's eyes fell on the "Infinite Machine" next to Z-ONE, "All Timelords are summoned through that Continuous Trap, and that card should be the key."

Indeed, the anime Timelords could not be summoned directly through their own effect without sacrifice. This Continuous Trap was the key to the appearance of the Timelord.

Not only that, but because the animation Timelord was too powerful, each card had an additional side effect, which was "While you control this face-up card, you cannot Summon monsters."

However, the Continuous Trap "Void Machine" has the function of "Negate any effects of 'Timelord' monsters that prevent Summoning monsters." It was because of this card that Z-ONE

could summon so many Timelords in one go. Otherwise, normally, as long as there was a Timelord on the field, other monsters could not be summoned.

"It's not that easy." Fudo Yusei, who was also watching the game, shook his head, "The Continuous Trap 'Infinite Machine' cannot be destroyed by card effects. If you want to deal with this card, you must think of another way."

Future Yuei Vu said, "Activate the Spell Card 'Take Over Five'. Send five cards from the top of the deck to the graveyard."

Five cards were sent to the graveyard in turn, and he then drew another card: "Activate the Spell Card 'Reinforcement of the Army'. Add 1 Level 4 or lower Warrior monster from the deck to my hand.

I added the 'Junk Synchron' that you shuffled back to my deck last turn.

Then I Normal Summon 'Junk Synchron'!"

[Junk Synchron, ATK 1300]

"Junk Synchron's effect." Future Yuei Vu continued, "When this card is Normal Summoned: I can target 1 Level 2 or lower monster in my GY; Special Summon that target in Defense Position, but negate its effects.

I Special Summon the 'Junk Converter' that I just sent to the graveyard!"

[Junk Converter, DEF 200]

"Level 3 Tuner 'Junk Synchron', Level 2 'Junk Converter', tuning!"

[3+2=5]

"Gathering stars are galloping on the endless evolutionary road! Become the path that lights the way!

Synchro Summon! Appear again—

——Junk Speeder!"

The warrior wrapped in silver-white armor once again appeared in style, and his right leg kicked in the air like a blade out of the sheath.

[Junk Speeder, DEF 1800]

"Junk Speeder's effect is activated." Future Yuei Vu Yu said, "If this card is Synchro Summoned: I can Special Summon as many 'Synchron' Tuners as possible with different Levels from my Deck, in Defense Position."

Z-ONE's hand was 0, so this time there was naturally no such thing as "Ash Blossom & Joyous Spring" that could become an obstacle to the Speeder.

Having said that, it was still not so easy to deal with the four Timelords. After all, each of the Timelords has dual resistance to combat and effect destruction, and they don't take damage. If you attack rashly, you will be counterattacked.

But Yuei Vu also had a countermeasure.

"And the moment Junk Speeder's effect is activated, I will chain with the effect of 'Junk Converter' in the graveyard!" He said, "If this card is sent to the GY as Synchro Material: I can target 1 Tuner in my GY; Special Summon it in Defense Position.

Return to the field, Junk Synchron!"

[Junk Synchron, DEF 500]

"Next is the effect of Speeder," Future Yuei Vu continued, "I Special Summon three 'Synchron' monsters with different Levels from my Deck.

Level 1, Jet Synchron!

Level 2, Fleur Synchron!

Level 4, Hyper Synchron!"

[Jet Synchron, DEF 0]

[Fleur Synchron, DEF 200]

[Hyper Synchron, DEF 800]

"I'll show you right here, Z-ONE, the fiery trump card that will defeat your Timelord and suppress everything with absolute power!"

He raised his arms high.

"Level 1 Tuner, Jet Synchron!

Level 2 Tuner, Fleur Synchron!

Level 4 Tuner, Hyper Synchron!

Level 5 Synchro Monster, Junk Speeder!"

Yuei Vu clenched his right hand into a fist and raised his voice.

"The summoning conditions are 3 Tuners + 1 or more non-Tuner Synchro Monsters! Here I use four monsters with a total level of twelve –

– Triple Tuning!"

Everyone was stunned.

Triple Tuning!?

For normal Synchro Summoning, the summoning condition was "1 Tuner + 1 or more non-Tuner". Generally, there could only be one Tuner monster as Synchro Material.

And now what he is going to summon... requires three Tuners!?

Not only that, but in addition to the three Tuners, the remaining Synchro Materials must also be Synchro Monsters!

With such harsh summoning conditions, what will appear?

"The three sages welcome the King. The Red Star won't die, only the fool will be crushed! Savage soul, mark the time of the creation of the heavens and earth!

Level 12! Burning ace——

——Red Supernova Dragon!!!"

Chapter 1148: The Protagonist Of The World Can Do Whatever He Wants

The rotating pillar of flame rushed into the sky, like an erupting volcano... No, it should be said that it was like a group of volcanoes erupting at the same time!

The black smoke billowed, the high temperature was scorching, and even the two figures who were dueling in the air, as well as the sacred time-mechanical gods in the center of the venue, became illusory.

The scorched air was magical and ethereal, and the domain of the time-mechanical gods seemed to be torn into pieces. A brand-new lava force field expanded in the air, domineering, fiery, and irresistible, like the inviolable majesty of the supreme king.

The spiral pillar of fire gradually condensed into a solid body, and the surging flames formed the entity of the claws, followed by thick arms, as huge as a mountain, and as solid as an alloy.

It was a kingly dragon, its red body looked like cracked lava, and the hot liquid like magma glowed and flowed along the grooves of its body. The extremely high temperature distorted the space, making it look almost unreal.

The ultimate power, strong and violent, the domain released seemed to decompose and melt anything that invaded it.

Level 12 Synchro, triple tuning ultimate monster——

——Red Supernova Dragon!

Unlike the students who were simply shocked by the god-like majesty of this monster, the players who were familiar with this monster were even more shocked.

"Crap, how come Yuei Vu-san from the future even has Jack's very soul?"

"Yuei Vu-san won't take over the decks of the entire protagonist group by himself, right..."

That's right, although this super-powerful "Red Supernova Dragon" had never appeared in the anime, it could be seen from the style that it was obviously the monster of Jack Atlas, the second protagonist of "Yu-Gi-Oh! 5DS".

As we all know, if the protagonist of each generation of Yu-Gi-Oh that has been passed down to later generations corresponded to Yugi Muto in the first generation, then there must be a character corresponding to Seto Kaiba in each generation.

Jack Atlas in 5DS played such a role.

In the anime, after he obtained a new realm called "Blazing Soul", his trump card "Red Dragon Archfiend" evolved into a new form called "Red Nova Dragon", which is also Jack's final trump card in the anime.

At this time, the "Red Supernova Dragon" summoned by Future Yuei Vu was the final form after it evolved again on that basis.

"Red Supernova... I didn't expect you to have this kind of power." Z-ONE's gaze under the mask seemed to be a little colder, "You always exceed my expectations time and time again. You are indeed an extremely dangerous existence, the first generation Duel King..."

[Red Supernova Dragon, ATK 4000]

"The attack power of the Synchro Monster using 'Hyper Synchro' as the material increases by 800." Future Yuei Vu said.

[Red Supernova Dragon, ATK 4000 → ATK 4800]

"In addition, Red Supernova Dragon will gain 500 ATK for each Tuner in my GY." Future Yuei Vu continued, "Now I have two 'Jet Synchro', one 'Fleur Synchro', and one 'Hyper Synchro' in my graveyard, a total of four Tuners.

So Red Supernova Dragon's attack power increases by 2000!"

[Red Supernova Dragon, ATK 4800 → ATK 6800]

"That's 6,800 attack power in one go!" Marufuji Sho said in surprise.

"But no matter how high the attack power is, it is meaningless in front of the Timelord." Although Kenzan was also shocked by the aura of this king dragon, he still analyzed calmly, "The Timelord cannot be defeated by battle."

Future Yuei Vu's operation was not over yet: "Then the next is the effect of the 'Fleur Synchro' in the graveyard.

If this card is sent to the GY as Synchro Material: I can Special Summon 1 Level 2 or lower monster from my hand."

He showed a hand card: "I special summon 'Doppelwarrior!'"

[Doppelwarrior, ATK 800]

"Then activate the effect of 'Jet Synchro' in the graveyard." Future Yuei Vu said, "If this card is in my GY: I can send 1 card from my hand to the GY; Special Summon this card!"

[Jet Synchro, DEF 0]

"However, the 'Jet Synchro' special summoned by this effect must be banished when it leaves the field."

Future Yuei Vu pointed to his own field again.

"Level 3 Tuner 'Junk Synchro', level 2 'Doppelwarrior', tuning!"

Gathering the wishes to evolve a new speed, break through the horizon and lead to a new era!"

The green ring enveloped the black warrior's body, and two bright stars connected into a golden beam of light that fell to the ground.

[3+2=5]

"Synchro Summon!" Future Yusei Yu shouted, "Level 5 —  
— Synchro Tuner, Accel Synchron!!!"

The new Synchro Tuner monster seemed to foreshadow the new possibilities of Synchro Summoning!

If you observed more carefully, you could even find that this "Accel Synchron" actually looked very familiar. Because this Synchro Monster was actually Yusei's D-Wheel.

That's right, the unscrupulous card dealer Consortium K even printed Yusei's D-Wheel into a card. Accel Synchron looked like Yusei's D-wheel has become a Transformer, standing up and transforming into a robot.

[Accel Synchron, DEF 2100]

"Synchro Tuner?"

Although the students watching the game knew nothing about Synchro, they also roughly understood the meaning of the magnificent monster.

"Mr. Yusei Yu, after summoning a super monster with "Triple Tuning", can you further summon other ace monsters?"

To be honest, the operation has already surpassed the limited imagination of the duelists of this era. They might never dream that duel monsters could develop to this level...

"The effect of the "Doppelwarrior" sent to the graveyard as a Synchro Material is activated." Future Yusei Yu said calmly, "Special Summon two "Doppel Tokens" on the field."

[Doppel Token, ATK 400] x2

"Level 1 "Jet Synchron", plus two Level 1 "Doppel Tokens', tuning!"

Because it was a one-star Tuner, there was only one ring this time, and there were only two light spots covered in it.

**【1+1+1=3】**

"Synchron Summon! Level 3, Goyo Defender!"

**【Goyo Defender, DEF 1000】**

"Accel Synchron's effect is activated!" Future Yu said, "Once per turn, send a 'Synchron' monster from the deck to the graveyard, and the level of 'Accel Synchron' can be increased or decreased by the level of that monster."

He pulled out a card that popped out automatically from the deck.

"I send the level 2 'Nitro Synchron' from the deck to the graveyard, and increase the level of 'Accel Synchron' by two!"

**【Accel Synchron, LV 5 → LV 7】**

"Level 7, Synchro Tuner 'Accel Synchron'!

Level 3, Synchro Monster 'Goyo Defender'!"

**【3+7=10】**

Future Yuei Vu looked stern, and his eyes seemed to reflect ripples of golden light, and his entire aura became hot.

The players started to make a commotion: "Wait, is Yuei Vu-san going to..."

"Gathering bonds, overlay with the soul of a friend. Light up! Beyond our future!——

—— Accel Synchro!!!"

"What!?"

The card players stood there in surprise, with expressions of shattered worldviews.

"Can you Accel Synchro Summon without a D-Wheel?"

"Can the protagonist of the world really do whatever he wants!?"

"Be born! Level 10——

—— Shooting Star Dragon T.G. EX!!!"

Chapter 1149: Dangerous Existence

Like a silver missile shot through the sky, the tail flame accompanied by the starlight pierced the sky.

The dragon wrapped in starlight slowly slowed down, circled in the air and flew back to the Yuei Vu field from the future, revealing its true appearance.

The dragon seemed to be wearing a metal armor, full of technological texture, and the solid body lines were clear. The posture was clearly Yusei's trump card "Shooting Star Dragon", but it was equipped with black armor and various technological weapons, like a gun with real ammunition.

[Shooting Star Dragon T.G. EX, ATK 3300]

The new form of the Shooting Star Dragon was clearly reflected in Z-ONE's azure eyes, and his eyes became a little blurred for a while.

"It looks like... you really want to go against me to the end."

"At this point, there is no point in saying this, right?" Future Yuei Vu shrugged, and then without hesitation, "Enter the Battle Phase.

Red Supernova Dragon, attack 'Michion the Timelord'!"

The huge dragon raised its claws, and a huge vortex was brewing in its palm. The power of the king was stirring in its palm, and the ultra-high temperature vortex was like a huge supernova taking shape in its hand.

It was a supernova, burning everything in the world, an absolute power that could not be stopped by anyone or anything!

"But attacking the Timelord is meaningless!" Sho clenched his fist nervously, "Not only that, if you hit it this time, it will trigger the effect of the Timelord..."

But Yuei Vu certainly had some considerations.

Red Supernova Dragon was a supernova that truly swept everything! Any enemy or obstacle would be reduced to ashes under the high temperature of that explosion!

Just as the counterattack effect of "Michion the Timelord" was automatically triggered, intending to kill the Crimson Supernova Dragon, Future Yuei Vu waved his hand.

"At this moment, Red Supernova Dragon's final ability is activated!" He shouted, "Once per turn, it can be activated when the opponent's monster declares an attack or the opponent's monster activates an effect!

Red Supernova Dragon itself, as well as all the cards on the opponent's field...

...are all removed from the game!"

The students of the Duel Academy almost stared straight at the eyes.

"Na... Nani!?"

All the cards on the opponent's field are banished?! What kind of fake card effect is this?

The students began to doubt more and more that they might not be playing the same game.

Why are all the monster effects of these people bug effects that return all the cards on the field to the deck and are all excluded from the game?

Many people tried to put themselves on the field and tried to imagine what it would be like if they were facing such a monster.

The answer was, of course.... no chance of winning.

The red dragon roared, a roar that seemed to burn its own determination! Its iron-clad body melted bit by bit, and super-high temperatures that ordinary people could not imagine burst out from that body.

The dragon completely transformed into a supernova at its peak!

Nothing could resist the high temperature of a supernova, even beings as strong as the Timelord.

The Timelords, who had the resistance of "absolutely indestructible", also seemed unprecedentedly powerless in front of this power. They were helplessly melted one by one, their limbs were decomposed and turned into a mass of molten iron until they completely disappeared from the field.

Not only that, but the crucial trap in the backcourt of Z-ONE also disappeared.

The Continuous Trap "Void Machine".

In the animation Timelord deck, the Continuous Trap was the key to the operation of the Timelord deck. However, because these traps had the same "indestructible" resistance as the Timelord, it was normally difficult to solve them.

Of course, it was only "indestructible".

In front of the nearly invincible "Red Supernova Dragon", Z-ONE's traps were powerless.

Looking at the burning afterimage of the red dragon on the field, Future Yuei Vu said calmly: "Red Supernova Dragon, after being banished by its own effect, will be Special Summoned to my field at the end of my next turn."

Many people couldn't help but take a breath.

"Not only can it be removed from the entire field... but it will also return to the field after being removed?" Kenzan was amazed, "How can there be such a monster?"

President Kaiba said nothing, but at this time, a storm had already been set off in his heart.

Yuei↑Vu↓!

How strong will you become in the future!?

In addition, the president couldn't help but start to ponder another more thought-provoking question.

In the era when this guy came, would my future self... still be his opponent?

"But the effect of 'Michion the Timelord' has also been activated." Z-ONE said slowly, "When Michion battles, the opponent's LP is halved."

[Future Yuei Vu, LP 850 → LP 425]

"Next, the effect of 'Zaphion the Timelord' is activated." Z-ONE continued, "When this card is removed from the field, the controller of this card draws cards until they have 5 cards in their hand." (Animation effect)

The players spit blood again.

"What the hell? Is this Timelord so shameless?"

"The real card effect can only draw one card, and it can only be activated if it is sent from the field to the graveyard..."

Well, it's obvious that this kind of effect couldn't be made into a real card.

But the attack from Future Yuei Vu was not over yet: "Shooting Star Dragon T.G. EX, direct attack!"

After receiving the command, Shooting Star Dragon accelerated into the air, and the thrusters installed behind it spewed out a long tail flame, which intertwined with the starlight it swung, leaving a beautiful arc.

Shooting Star Dragon T.G. EX broke through the clouds and began to dive down! The black barrel on its body locked the target, the fire flashed, and missiles flew down one after another. The fierce firepower intertwined into a network, sweeping towards Z-ONE!

Boom!!!

After a series of dense and harsh explosions, Z-ONE was trapped in the center of the firepower network, and dense bullets and missiles hit one after another, and finally, the Shooting Star Dragon itself dived.

The detonation of gunpowder and the ultra-high-speed collision formed a transparent shock wave in the air, and the hot fireball expanded rapidly, so dazzling that people could not look directly at it.

The tortoise-shell-like life support device broke out from between the fireball and the black smoke, falling like an unbalanced airplane, spinning several times before regaining its balance, and then rising back to its original height in one breath.

[Z-ONE, LP 3700 → LP 400]

Only a trace of life was left.

Future Yuei Vu raised his hand.

"Set a card, I end my turn."

Z-ONE's field was completely cleared, and Future Yuei Vu still had the powerful "Shooting Star Dragon T.G. EX" left.

Although this form of Shooting Star Dragon did not have the same destruction resistance as the original version, it could negate "monster effects that target monsters on its own field."

In addition, when the opponent declared an attack, Shooting Star Dragon T.G. EX could also negate that attack once per turn.

This attack-blocking effect was still quite useful against the Timelord.

Now that the Continuous Trap "Void Machine" has been removed from the game, Z-ONE could only summon one Timelord at most in the next turn – after all, when the Timelord was on the field, the controller could not summon other monsters.

Although the effects of each Timelord were powerful, all of them must be activated by battle. Therefore, no matter what Timelord Z-ONE summoned in the next turn, its attack would be sealed by "Shooting Star Dragon T.G. EX".

In addition, at the end of the next turn of Yuei Vu – if Z-ONE had not lost by then, the unreasonable strong "Red Supernova Dragon" that just left the field would return.

At least from the scene, Z-ONE's chances of winning were already very low.

Z-ONE narrowed his eyes under the mask.

"Synchro Monsters... are still dangerous existences after all."

Chapter 1150: Ultimate Timelord

"Synchro Monsters... are they really something that shouldn't exist?" Z-ONE narrowed his eyes.

Yu-Gi-Oh had been updated for more than 20 years, and the animation had been released for six generations – although there were a total of seven, one of them was generally regarded as an official fan work and could not be counted – the card pool had a total of more than 10,000 cards, but even

in the era of the latest works, monsters of the level of the Egyptian Gods in the first generation of animation were still rare.

Not every generation of cards would have such god-level monsters, but many of them seemed to be Synchro monsters.

"Are you still unwilling to give up, want to erase the existence of 'synchro monsters'?" Future Yuei Vu said.

".....That's not the case. I've passed this stage." Z-ONE shook his head. "You have proved to me the possibility of Synchro Monsters.

Maybe Synchro Monsters should not be responsible for what happens in the future, but this cannot change what I want to do.

Duel King Yuei Vu, you have also been a person who has carried the whole world on his back. Very few people in the world can understand what I carry, but if there are, I think you should be one of them.

The feeling that all the expectations of all your companions and the weight of the whole world fall on your shoulders, the pressure that no one can count on and there is no way out, makes you unable to retreat, and forces you to surpass your limits again and again."

"....."

"This is exactly the situation we are facing. So I can't lose no matter what, even if I have to do whatever it takes.

It's my turn, draw."

The huge mechanical arm waved at high speed, and the low metallic humming sound was accompanied by the card drawing.

Without the exclusive continuous trap, it stood to reason that Z-ONE could only summon one Timelord at most. Although a single Timelord was generally powerful enough, it was no match for Shooting Star Dragon T.G. EX.

"I will activate this card next."

Z-ONE threw out the next card, which was thrown out from the mechanical palm and spun at high speed in the transparent storm.

"The evil phantom that penetrates the dimension, at the cost of blood and soul, opens the door to the dimension! Activate the Spell Card——

——Illusion Gate!!!"

"What!?" Many onlookers were surprised.

Although the students of Duel Academy had never seen this card in actual combat, most of them had heard of it.

It was the trump card of Vampire Camula, one of the "Seven Stars" who attacked Duel Academy last year!

Illusion Gate, a fake card with the ability to single-handedly decide the outcome of the duel. After this card was activated, all monsters on both sides' fields were destroyed, and then the user could choose any monster from any graveyard to special summon on their own field regardless of the summoning conditions.

"Powerful cards always come with corresponding risks." Future Yvei Vu said, "The price of the Illusion Gate is that if the player loses in this duel, their soul will become a sacrifice to the Sacred Beasts."

"That's how it was originally, but there are loopholes." Z-ONE said calmly, "This price does not necessarily have to be your own soul. Just prepare other souls as the cost in advance."

That's true. In the animation, when Camula activated "Illusion Gate", she did not honestly bet her own soul, but used a trick to threaten Marufuji Sho's soul, and used this to force Marufuji Ryo to give up resistance and surrender.

It's a pity that although "Shooting Star Dragon T.G. EX" was more practical than Shooting Star Dragon itself, it did not have the "destruction negation" protection effect of Shooting Star Dragon.

A huge door fell, and the heavy door slowly opened. The purple-black fog was engulfed in the dark hurricane, swallowing up the Shooting Star Dragon until it disappeared from the field.

"After that, I can Special Summon any monster from the Graveyard regardless of the summoning conditions."

Z-ONE's eyes were as cold as a very low glacier, and there was no fluctuation in his azure eyes.

"Within the light of freedom where the Timelords were born, there is a hidden Da'at where only the chosen ones can venture. The source of nothingness and existence, the ultimate Timelord that was born from infinite light!"

The light path was connected in the sky, forming the totem of the legendary "Tree of Life". All the nodes were lit up in turn, and the colorful light flickered on the tree diagram.

That was the precursor of the advent of "Infinity"!

Z-ONE took out a card returned from the Graveyard.

It was not any of the Timelords that had been summoned before, but one of the three cards discarded to the Graveyard through the trap "Multiple Destruction".

"Descend!" Z-ONE waved his mechanical arm, "Sepylon the Ultimate Timelord!!!"

The sacred light illuminated the sky, as if a huge hole had been drilled through the curtain of the night.

From that hole, God descended.

The noble and illustrious golden body and the pure gold wings flashed with a sacred luster. The center of its torso, like other Timelords, was a grotesque face that looked like an old man with a large white beard, wise and full of divinity.

[Sepylon the Ultimate Timelord, ATK 4000]

Facing the sacred, god-like Ultimate Timelord, almost everyone held their breath.

This duel has almost shattered the three views of the students in these academies. Both sides kept summoning some god-level monsters that ordinary duelists could not even imagine, and the effects of one after another seemed like fake cards.

And now, the Ultimate God who commanded all the Timelords had finally appeared.

"Sephylon the Ultimate Timelord's effect is activated." Z-ONE shouted, "Once per turn, special summon as many 'Timelord' monsters as possible from my hand, deck, or graveyard!" (animation effect)

"What!?"

Those Timelords that are so strong that they look like fake cards... can actually pop out like this at will?

Why don't you just write the word "invincible" in its effect?

At the same time, four cards have already flown out into Z-ONE's hands.

"Timelord, here you come!"

Four cards were thrown out by him, and four beams of light pierced through the sky and the earth! Metal bodies, angelic wings, and strange and bizarre faces installed on their chests, the four Timelords descended from the deck and the graveyard at the same time!

[Metaion the Timelord, ATK 0]

[Lazion the Timelord, ATK 0]

[Zaphion the Timelord, ATK 0]

[Sadion the Timelord, ATK 0]

Each of the four Timelords had the terrifying power to sweep across the field and crush the opponent's will to resist!

Finally, there was the ultimate Timelord who commanded all Timelords.

"The subsequent effect of the Sephylon the Ultimate Timelord," Z-ONE said coldly, "all the Timelords summoned by his effect will have their attack power changed to 4000!"

[Metaion the Timelord, ATK 0 → ATK 4000]

[Lazion the Timelord, ATK 0 → ATK 4000]

[Zaphion the Timelord, ATK 0 → ATK 4000]

[Sadion the Timelord, ATK 0 → ATK 4000]

"And finally, Sephylon's attack power...will increase by the total attack power of all other Timelords!"

[Sephylon the Ultimate Timelord, ATK 4000 → ATK 20000]

Marufuji Sho almost stopped breathing: "Attack power...20,000!?"
