

I Play Yu-Gi 151

Chapter 151: This Time I Play A Pure HERO Deck

The virtual world, the duel arena in the Kaiba Corps HQ.

Yuei Vu and Kaiba Gozaburo stood on both sides of the duel arena, and their respective decks had been set.

Sure enough, in the end, you still had to rely on playing cards to solve the problem.

However, this time, the two sides did not adopt the painful Deck Master rules formulated by Noah, and instead fought according to the normal Battle City rules.

Of course, all the cards in the card pool could still be selected.

However, just like the duel between Yuei Vu and Noah before, the pile of deck-thinning cards was cut off a lot.

This was actually not unreasonable. After all, if you built a solitaire Exodia deck, the duel itself was meaningless.

Of course, Gozaburo didnt know that, with the unlimited card library, there were a lot of tactics that Yuei Vu could play, lacking one was no problem

After Gozaburo selected the deck, he squinted his eyes and looked at Yuei Vu for a moment.

He also saw the cards and tactics used by Yuei Vu in the duel with Noah just now. Although he had never heard of the tactics of that HERO deck, he admitted that its instant burst was indeed terrifying. But after seeing it once, Gozaburo felt that it was not impossible to counter.

Its just a simple super-fast attack, summoning a large number of fusion monsters in an instant, and OTK opponents with super high damage output.

Then it was worth noting that the Absolute Acid combo that could instantly clear the opponents field, ensuring the success rate of OTL.

It was indeed a very terrifying combination, but he already had a countermeasure.

This was originally the best tactic he planned to use against Seto Kaiba, but now he didnt mind trying the guy in front of him first.

Although Gozaburo himself was not interested in duels, since he wanted to take revenge on Kaiba Seto, he must defeat the opponent in the field that Seto was most proud of. Therefore, he also prepared (printing on the spot) a special set of cards.

In the original animation, this virtual space that took so many years and resources to finally build was actually directly blown up by Noah, which was a pity to think about.

If this space was not destroyed after the remaining of Kaiba Gozaburo was eliminated, when the Battle City was over, Kaiba Company could recycle this place and renovate it directly into a game project, named Minecraft, or set up a global online competitive duel club called Duel Art Online, or do something else

In short, there were more uses!

Then, when the time came, Yuei Vu would go to get platform administrator privileges or something, and then run to sell tickets for screwball players to become a member. Wouldn't it be possible to attract more fresh chives waiting to be harvested?

A long-term stable income!

He even thought about the lines at that time.

Dont miss it when you pass by! Dominos first online dueling venue is now online!

Member monthly pass is only 998! The original price of 999 is now 998, with no discount!

Can other ads do it? In this day and age of discounts, there are still a few ads that dont discount at all like us! ?

Then the players would take a breath: Fuck it, Yuei Vus advertisements are so fresh and refined! Shut up and take my crystals

Of course, in any case, he had to destroy the Kaiba Gozaburo in this computer world first.

As long as this ghostly AI was killed, this virtual space was basically equivalent to an unowned thing.

Duel! x2

Gozaburo Kaiba, LP 4000

Yuei Vu, LP 4000

You go first, Gozaburo said lightly.

Although the random result of the Duel Disk chose Gozaburo, he could also choose to give up this first turn to the opponent.

It seemed that Gozaburo may have a little fear in his heart after seeing the HERO in the battle with Noah before, and chose to attack first.

He made the right decision. Its just that the HERO that Yuei Vu played this time may be slightly different

My turn, draw! Yuei Vu drew out a card in his hand, I summon Neo-Spacian Air Hummingbird in defensive position!

The whirlwind rolled up, and the birdman with a red body and white wings flew out, shouted in mid-air, and slowly landed on the ground.

Gozaburo was startled: Neo-Spacian? What is this?

His heart skipped a beat, and he couldn't help but get nervous again.

Its a different deck from when you faced Noah just now!

As a character in the DM era, Gozaburo has never heard of it, but YGO veterans should be familiar with this series.

Neo-Spacian series was a brand-new power that Yuki Judai, the protagonist of Yu-Gi-Oh! GX, gained in addition to his original Elemental HERO series.

Although Yuei Vu has not been able to open this series in the system card pool so far, Neo-Spacian and Elemental HERO was the most closely related series, there were also common cards between the two series, so in this virtual space, the system card pool has also temporarily opened some cards of the Neo-Spacian series to Yuei Vu.

When it came to the Neo-Spacian, we had to mention that the ace monster of Yuki Judai, the symbol of his own deck, a monster that has the same status as the Dark Magician in Yugis deck Elemental HERO Neos.

also commonly known as Ultraman by players.

This was because according to the plot setting, Neos was an Elemental HERO who accepted the fluctuations of the universe, and obtained the power from the far side of the starry sky, which was inexplicably similar to the setting of the hero from Nebula M78.

In addition, Neos himself also looked like Ultraman, and the fusion monsters of the Neos series also have the negative effect of only existing on the field for one turn, which made people inexplicably reminiscent of the famous being a true man for three minutes (1)

Whats more interesting is that Yuki Judais ace series Masked HERO in the manga obviously based on another famous special series Kamen Rider.

A man who could control the power of Ultraman and Kamen Rider at the same time.

So here you may be able to understand why Yuki Judai, as the only YGO protagonist who did not dye his hairstyle, could still be so awesome

Yuei Vu continued: The effect of the Neo-Spacian Air Hummingbird: Once per turn, I can gain 500 LP for each card in the opponents hand.

Now you have five cards in hand, so I gain 2500 LP.

The Air Hummingbird flapped its wings and soared into the sky, and a huge flower sprouted on each card in Gozaburo's hand. The Air Hummingbird floated in the air, absorbing all the honey in those flowers, and through the flapping wings, turning the energy into health and sending it to Yuei Vu behind him.

Yuei Vu, LP 4000 LP 6500

Set two cards. There were two more set cards that appeared at Yuei Vu's feet, I end my turn.

My turn. Gozaburo hummed, Ill let you see the strongest tactics Ive integrated after collecting countless duel data!

Activate Spell Card Painful Choice!

Yuei Vu was speechless when he looked at a super old banned card that appeared in front of him.

is this your strongest tactic?

Painful Choices effect is to choose five cards from the deck, then let the opponent choose one to add to my hand, and the remaining four will be discarded into the graveyard. Gozaburo laughed, The cards I want to choose are these five!

Of course, even if Yuei Vu didnt look at it, he knew what card he picked.

What Gozaburo chose was the five parts of Exodia!

Chapter 152: Invincible Monster

Five parts of Exodia!

Gozaburo, who selected the five cards and projected them in front of Yuei Vu, had a smug smile on his face as if he was expecting a shocked expression.

Any problem? Exodia is not your patent. That's what he wanted to say.

However, Yuei Vu was expressionless, and without hesitation, he pointed to the Exodia the Forbidden One card the upper body part of Exodia the Forbidden One.

I choose this one, he said.

It didn't matter which one he chose since Gozaburo was going to throw it to GY anyway.

Not being able to see the surprised expression on Yuei Vu's face, Gozaburo seemed a little disappointed. But he snorted and continued: Then according to the effect of Painful Choice, I sent Right Arm of the Forbidden One, Left Arm of the Forbidden One, Right Leg of the Forbidden One and Left Leg of the Forbidden One to my GY, and I added Exodia the Forbidden One to my hand.

Then I play a Quick-Play Spell from my hand Hand Destruction!

A green Spell Card appeared in front of Gozaburo. The card picture was a swordsman wielding a sword, and four cards flew around.

Both players send two cards in their hands to the graveyard, Gozaburo took out two cards from his hands and discarded them in the graveyard, and then draw two more cards.

Yuei Vu threw away two cards in his hand without saying a word and drew two cards.

He knew that Gozaburo had thrown the last piece of Exodia the Forbidden One in his hand to the GY, so that the five parts were collected in Gozaburo's graveyard.

He knew better what Gozaburo was going to do next.

Hey, at this moment your defeat is certain! Gozaburo suddenly laughed, Activate the Spell Card from the hand Contract with Exodia!

The image of magic appeared, and in the center of the Kathu screen was the terrifying face of the Egyptian defender. There were five stone tablets standing around the huge head, each of which was clearly engraved with the symbol of life in ancient Egypt, surrounded by electric currents.

Gozaburo explained with a sneer: This is a Spell Card that can only be activated when all five parts of Exodia are in the graveyard at the same time. This card will lead directly to your defeat, calling out a monster that you can't even imagine.

Exodia Necross. Yuei Vu blurted out.

What!?! Gozaburo was surprised.

At the same time as Yuei Vu's voice fell, the pitch-black statue descended on Gozaburo's field.

He has the exact same appearance as Exodia the Forbidden One, but his entire body was pitch-black, his eyes flashing with dangerous red light, and his body was shrouded in an extremely ominous aura of death.

[Exodia Necross, ATK 1800]

Gozaburo looked at Yuei Vu with some doubts.

Exodia Necross was the card he specially prepared (printed by himself) to deal with Seto. Because he clearly knew that the biggest shadow in Kaiba's heart was the defeat of Blue-Eyes White Dragon when facing Exodia the Forbidden One, so he specially printed such an invincible monster to deal with Kaiba.

But this should be his trump card at the bottom of the box. There was absolutely no other person in the world who had this card. How did this young man in front of him know?

In addition to why the other party could use the power of the Egyptian god in the virtual space before, it was another mystery.

But he quickly forced himself to calm down.

After all, this was still the virtual world, a space that he dominated. In here, he was absolutely invincible, there was nothing to fear.

He glanced at the Exodia Necross summoned on the field, hummed, and felt more at ease.

Exodia Necross was an absolutely invincible monster (he thought so), no matter what kind of weird card the opponent used, nothing could defeat this monster!

Although Kaiba Gozaburo has become a computer program, the basis of his consciousness was still a human after all, and he has not been able to transcend the fixed thinking of human beings.

To put it bluntly, although this old guy could no longer be considered a human being, as an AI, he was only half-baked. In fact, he was quite a failure.

Battle! Gozaburo ordered directly, Exodia Necross, attack Neo-Spacian Air Hummingbird!

The dark statue flew forward and slammed a huge fist. The power of the cannonball-like punch was like rolling waves, tearing the tiny hummingbird into powder in an instant.

At this moment, Exodia Necross effect is activated. Gozaburo hummed, Exodia Necross is an invincible monster whose attack power increases by 1000 after each battle!

[Exodia Necross, ATK 1800 ATK 2800]

Gozaburo waved his hand as he spoke, and the image of the five parts of the old Egyptian sleeping in his cemetery appeared in front of him.

Look! The parts of Exodia slumbering in the graveyard grant infinite power to Exodia Necross!

When Exodia the Forbidden One exists in the graveyard, Exodia Necross will not be destroyed by battle.

When Left Leg of the Forbidden One exists in the graveyard, Exodia Necross will not be destroyed by the effect of Spell Cards.

When Right Leg of the Forbidden One is in the graveyard, Exodia Necross will not be destroyed by the effect of Trap Cards.

When Left Arm of the Forbidden One is in the Graveyard, Exodia Necross will not be destroyed by the monster effect.

When Right Arm of the Forbidden One exists in the graveyard, the attack power of Exodia Necross will increase by 1000 at the end of the damage step of each battle!

Gozaburo became more confident the more he talked, and finally he couldn't help laughing.

How about that? This monster is invincible and absolutely cannot be defeated!

Yuei Vu still looked calm: Are you done?

Hmph, are you pretending to be calm? But the moment this monster is summoned, the outcome of the duel is doomed. I end my turn.

Come on, if you think you can beat this invincible monster, give it a try.

Really? Yuei Vu smiled lightly, Since you said so, then I won't hesitate. My turn, draw!

He glanced at the cards in his hand, and first played a Spell Card: Activate Upstart Goblin! I draw a card from the deck, and you gain 1000 LP.

Although after Yuei Vu killed Soichiro with the Exodia the Forbidden One deck, many of the deck-thinning cards in the system list were eliminated by Noah, Upstart Goblin stayed.

It may be that Noah also thought that this card, which gave zero card advantage and even had a huge negative effect that allowed the opponent to recover 1000LP, was completely useless.

Gozaburo, LP 4000 LP 5000

Hmph, you actually gave me 1000 LP? Gozaburo sneered, Is this giving up the struggle and seeking death?

You'll find out soon who is seeking death. Yuei Vu sent the card to the cemetery, and then played the next card, Activate Spell Card Convert Contact!

This card can only be activated if I control no monsters. Send 2 Neo-Spacian monsters (1 from the hand and 1 from the Deck) to the GY, then draw 2 cards.

I send Neo-Spacian Grand Mole from my hand and Neo-Spacian Aqua Dolphin from my deck to the graveyard, and draw two cards from the deck.

Watching Yuei Vu's actions of feeding the GY and drawing cards, Gozaburo suddenly had a very ominous feeling in his heart for no reason

Chapter 153: Do You Think I'm Playing Pure HERO?

Yuei Vu sent the Convert Contact to the graveyard, but the operation was not over yet.

I activate the second Convert Contact! Yuei Vu continued to play the next card, This time, I send Neo-Spacian Flare Scarab from my hand and Neo-Spacian Dark Panther from my deck to the graveyard and draw two more from the deck!

Gozaburo narrowed his eyes: What are you trying to do?

Yuei Vu ignored it completely: Then the third one! Send the Neo-SpacianGlow Moss from my hand and the second Neo-SpacianAqua Dolphin from my deck to the graveyard. Draw two more cards from the deck!

In this way, Yuei Vus hand has reached a full seven cards, and the graveyard has collected six types of Neo-Spacian, a total of seven copies. His deck thickness was also decreasing at a palpable rate.

Kaiba Gozaburo looked at his bewildering series of operations, and his mind flew.

What do you want to do when you draw cards like this?

Does this guy still want to speed up the draw to gather Exodia parts?

But when looking at Yuei Vu, it didnt seem like he had this plan

The next thing I want to activate is the set card on the field! Yuei Vu pointed to his feet, Trap Card NEXT! Special Summon any number of monsters with different names from my hand and/or GY, in Defense Position, that are all Neo-Spacian monsters or Elemental HERO Neos, but negate their effects.

At the same time as Yuei Vu spoke, a golden light had already been released from the Duel Disks graveyard area, and five cards were ejected from the graveyard in sequence.

With a burst of golden light, five heroes from the Neo Space appeared on the field in front of Yuei Vu in a squat.

[Neo-Spacian Aqua Dolphin, DEF 800]

[Neo-Spacian Air Hummingbird, DEF 600]

[Neo-Spacian Flare Scarab, DEF 500]

[Neo-Spacian Grand Mole, DEF 300]

[Neo-Spacian Dark Panther, DEF 500]

Summon five monsters in an instant? Gozaburos face changed slightly, and he snorted, thinking he saw through Yuei Vus intentions, I see, do you want to use wall monsters to delay time and wait for an opportunity?

But it wont work! The Exodia Necross cannot be defeated. Even if you linger, he will only grow stronger with each battle

But he didnt speak, and just continued the operation process: Activate the Spell Card Space Gift! When this card is activated, I can draw 1 card for each different Neo-Spacian name on the monsters I control.

The projected Spell Card shines with rainbow-like colorful light effects. Several Neo-Spacian lit up their respective lights one after another, and the colorful beams flew out like arrows and fell into the deck on Yuei Vus Duel Disk.

There are five Neo-Spacian on my field, so I draw five cards from the deck!

Gozaburo frowned: Did you draw five cards in an instant? But even so

Its not over yet! Activate the Spell Card Space Gift again! Since there are five Neo-Spacian on the field, I will draw five more cards!

What!?! Gozaburo was shocked.

And then the third Space Gift! Yuei Vu said, I will draw five more cards from the deck!

As a result, Yuei Vus hand has reached a terrifying nineteen!

Gozaburo looked at Yuei Vus deck with only the last few cards left, and couldnt help breaking out in a cold sweat.

What the hell are you trying to do?

With that, the preparation was complete.

Yuei Vu held up a card in his hand and shouted loudly, I use Aqua Dolphin, Air Hummingbird, and Flare Scarab as sacrifices

Come on, God!

The Winged Dragon of Ra!

A golden light shot out of the sky and scorched the ground. The giant bird wrapped in the scorching golden light slowly stretched out its body, spread out its burning wings, and spit out phoenix-like flames towards the sky, roaring in a low voice.

The Winged Dragon of Ra descended!

What? How did Yuei Vu have the winged dragon?

Of course

His Sky Dragon called the older brother to help!

As mentioned before, in this virtual world, the related series of cards in Yuei Vus hand would be automatically unlocked. So now that he held the Slifer the Sky Dragon in his hand, then there were naturally related cards in the system card pool Obelisk the Tormentor and The Winged Dragon of Ra.

Thats right, Yuei Vu wasnt playing a HERO deck at all.

Do you think Im playing pure HERO?

In fact, Im playing three Egyptian Gods!

What? Why do you say that it takes so much effort to summon these phantom gods that are troublesome and useless in the real card version?

Of course, its because they are my soul cards!

Well, not really.

Because from the beginning, Yuei Vus goal was not only to win but also to obliterate the consciousness of Kaiba Gozaburo in the computer world through this duel.

But if he just won a duel, it would definitely not have any effect on Gozaburo who was now a program.

Therefore, the best choice for Yuei Vu here was to release part of the power of Egyptian Gods through the three God cards in the system card pool, and completely destroy the existence of Gozaburo!

Even if he was data, he couldn't escape divine punishment.

Now that the power of God has intervened in this data world, Gozaburo, who has no supernatural power, could not escape no matter what form he took.

At this time, Gozaburo couldn't understand it no matter what card it was, it should only be a mass of data in this virtual space.

But if it was really a mass of data, why could he feel such terrifying pressure from the golden bird in front of him?

Gozaburo had already realized that something was wrong, and he wanted to forcibly end the card, so he turned his head and ran away.

But it's too late.

He found that his program seemed to be locked in this duel, and no matter how hard he tried, he couldn't get out of the game.

Soon Gozaburo understood that the only way to get out of there was to finish the game.

It's almost like the legendary Shadow Game.

Is this the power of God?

It's not over yet!

Activate set card! Yuei Vu pointed to his feet, Trap Card Super Team Buddy Force Unite! Target 1 face-up monster on the field; Special Summon 1 monster from my hand or Graveyard, with the same original Type as that monster's, but with a different original name!

Gozaburo was stunned: The same race as The Winged Dragon? It can't be!?

That's right, the one I want to resurrect is another god who was sent to the graveyard by your Hand Destruction!

While speaking, the tomb area of Yuei Vu's Duel Disk has already flashed a dazzling blue light, and energy is overflowing from it. At the same time, a card was ejected from the graveyard area into Yuei Vu's hand.

Come, the second god

God of Destruction, Obelisk the Tormentor!

The space of the virtual world was screaming, and the ground of the duel field was cracking open with a rumble like Moses' cane separating the Red Sea, as if the space itself was making way for some kind of great existence.

The blue giant's body rose up like a mountain and stood in front of Gozaburo. Lightning struck the sky, and dark clouds rolled up in the atmosphere of the virtual world.

Gozaburo felt that his program process seemed to be locked.

Why? How?

This was the virtual world he had mastered, obviously, he did not run the program to change the weather at all. Why was the coming of the gods accompanied by such earth-shattering movements?

Could this so-summoned mighty power of God still affect computer data?

This was too absurd!

Finally, I activate a Spell Card from my hand Monster Reborn. Yuei Vu turned over one of the remaining eighteen cards in his hand, What is it that is going to be resurrected, I believe I dont need to say more?

Gozaburo discovered absurdly that, as a program, he couldnt help but swallow his saliva.

The fear of death he had long forgotten as a human being with a body was vividly recalled at this moment.

Through the underworld and reality, recover in the chaos of the sky and thunder! The third god

God of the underworld, Osiris the Sky Dragon!

Chapter 154: A True Duelist

While Yuei Vu and Gozaburo were fighting, Kaiba Noah was also leading the Big Five to continue to trouble others.

The Big Five might be good at cheating, but it would be a bit too hard for them to play cards with a bunch of top duelists, including the Duel King.

Although the Big Five have repeatedly used some Deck Masters with effects like fake cards, and even tamper with the dice points thrown by Jonouchi

and yet they still lost in the end.

The defeated five were completely obliterated by Noah this time, and the last fragment of consciousness that was lingering in the computer world also disappeared with their obsession with the flesh body.

Yugi and others, who have overcome many obstacles, successively repelling the attacks of the Big Five, have finally been able to face Kaiba Noah and entered the BOSS battle.

However, because Noah learned in advance that Gozaburo was still alive, and knew that he had been abandoned by Gozaburo, he was already shaken when he met Yugi, Kaiba, and others.

Then in the BOSS battle, Noah even waved his hand fearlessly, pointing to the two people (Yugi and Kaiba) saying: I, Kaiba Noah, was going to fight all of you by myself today!

then

So he was beaten up by the mixed doubles between Yugi and Kaiba, and he was beaten up so much that his own father couldnt even recognize him

oh wait a minute, his fathers situation seemed to be even worse at the moment.

A few minutes later, Gozaburo would be bombarded so badly that he couldn't even recognize his own son.

Noah, who was abandoned by his father and denied the value of his entire life, was already on the verge of collapse. At this time, he was educated in doubles by Yugi and Kaiba, and he could not help but doubt his life. A good AI almost shut down the whole thing directly.

Then, after playing the card game, Yami Yugi went offline at the speed of light, and quickly changed to the Yugi Muto who was known as the warm-hearted little angel.

Yugi quickly activated the main characters halo in an instant. As if Naruto Uzumaki, Kurosaki Ichigo, and Kamijou Touma possessed his body at the same time, he briefly opened the most powerful technique among the legendary skills of all worlds Talk no Jutsu.

Talk no Jutsu, the most powerful skill of the protagonist, could affect the five senses of the enemy at the same time. First, taking away the hearing of the other party, so that the other party would never hear any other words for life. Next was the eyes and nose, which exert a huge mental influence on the enemy through sight and smell, making them lose their fighting consciousness and all defense capabilities, and had the terrifying effect of defense penetration and ignoring immunity. From gods to street fighters, all beings were equal in front of this skill(1)

In the end, when Noah was swaying and was about to be taken away by this ultimate technique, Mokuba came up to make up for it in time: Come back with us, Noah! Even if you don't have Gozaburo, you still have two of us!

When we go back, my brother and I will help you find a new body! Of course, it can't be a living person. But with Kaiba's technology, it's not a problem at all to make a perfect android!

Right, bro?

After Mokuba finished speaking, he did not forget to turn his head and wink at President Kaiba.

Kaiba folded his arms and snorted, looked aside, and said nothing.

Noah was a little confused: You are willing to give me but why?

Does that need to be said? Mokuba patted his shoulder kindly and smiled, It's because we are brothers!

Noah was stunned.

I was just greedy for your body, but you treated me as a brother?

But Noah, who has lost his goal and is alone, was deeply touched by this. This wave of Mokuba's innocence and true feelings directly and perfectly took away Noah's last bit of LP, and the whitewashing progress reached 100% in one breath.

What a carefree guy. Noah snorted, Okay. I'll take you to the exit of this world.

Just after he said that, suddenly there was lightning and thunder in the sky. Dark clouds appeared on all the maps of the entire virtual world at the same time, lightning continued to fall, and some thunderbolts rolled to the ground and exploded continuously. The air was filled with the scorched smell of something being scorched.

What?

Everyones eyes turned to Noah, and the meaning in their eyes was what are you doing this time.

Noah was also taken aback: This this is not what I did.

While speaking, there seemed to be a high-pitched dragon roar that shook the world from somewhere on the other end of the virtual space.

The virtual sky seemed to be torn apart, and there were fissures like a broken mirror. Everyone looked at the sky. Although they were far away and separated by many maps, they could still vaguely see the body of the red dragon, rising into the sky from nowhere, releasing the divine might that seemed to dominate the entire space.

That is Gods power! Kaiba, who was also the holder of the God card, quickly recognized this power.

Impossible! Noah was shocked, There is no god card in this virtual world.

Seeing everyone looking at him, he immediately explained: I have tried to input data, but the power contained in the God card Even with my technology, I cant understand it.

I cant restore the data of the God card in this world, so there shouldnt be any god here thats right!

Noah suddenly realized.

Its your companion, the duelist named Yuei Vu, right? Noah held his chin, It must be so. Like I told you before, I just discovered that my fathers consciousness was also stored in this virtual space.

Father said that he was very interested in the duelist named Yuei Vu and invited him over. So the two of them should be dueling over there now

Yugi said: So, is it Yuei Vu who summoned out the gods here?

Two players who were watching the CG quietly after finishing the plot mission: Yuei Vu is awesome!

Jonouchi was surprised: But didnt Noah say that there is no God Card in this virtual space?

Kaiba folded his arms and his nostrils turned up: Hmph, nothing is impossible for a true duelist! (referring to drawing a God card from the floor) (2)

Yugi also nodded with a regular operation expression: Yeah. If you are a real duelist, if you have a deep enough bond with your own monsters, you can indeed call for miracles.

At this moment, the duel arena.

Osiris the Sky Dragon, summon!

The red dragon descended from the sky, exuding the endless majesty of a king. It coiled up its huge body and lowered it slowly between the lightning and thunder, breathing heavily and turbidly in its mouth.

[Osiris the Sky Dragon, ATK 17000]

Gozaburos face was distorted: AttackAttack power 17000!?

The god in charge of the underworld landed on the field, staring at Gozaburo and the tiny dark undead on the field with burning eyes, his eyes seemed to ask

Little brother, what did you just say is invincible?

The battle is over. Yuei Vu raised his hand and pointed at Gozaburo, Let the dead rest in their graves. Osiris the Sky Dragon, attack! Superconducting Wave Thunder Cannon!

The Sky Dragon opened its mouth, and a choppy golden light spurted out of its mouth.

Exodia Necross would not be destroyed by battle, but the controller still took the battle damage.

The Sky Dragon with 17000 attack power could send Gozaburo to see Hades as soon as he got hit.

As for the Obelisk and the Winged Dragon In fact, from the point of view of a duel, Yuei Vu didnt need them at all. The reason why the three Egyptian gods were gathered on the field was to increase the suppression force as much as possible, ensuring that Gozaburo had no chance to run away.

Gozaburos body was engulfed by the light of the Superconducting Wave Thunder Cannon, and even the program itself began to disintegrate. He shouted in his throat in the torment of strong light: Uhhhhhh!!! Impossible! I must be immortal! How can ahhhhhhhhhhh

Gozaburo, LP 0

Gozaburo Kaiba could never raise again.

Chapter 155: March At Full Speed

The glass door of the hibernate cabin slowly opened. Yuei Vu slowly opened his eyes, his vision had just recovered, and what caught his eyes was the Dark Magician Girl with a magic hat on her head and an anxious face that looked like she was about to cry.

Master! Dark Magician Girl was full of joy, Youre awake!

She quickly floated aside when Yuei Vu sat up.

This was a hidden base under the sea, built by Gozaburo when he was still in power in the Kaiba Corp. When the Battle Ship was hijacked by Noah, it flew to this base. Everyone was unknowingly arranged by Noah into these hibernate cabins, and connected to the virtual world just now through the equipment here.

After Yuei Vu used the Sky Dragon to eliminate Gozaburo, this quest was basically equal to clear. Soon he found one of the logout points of the virtual world behind Gozaburos office. After pushing the door, he woke up here the next second.

Yuei Vu glanced sideways at his side and found that he seemed to be the first to wake up.

Next to him was President Kaiba, and beyond that was the Presidents younger brother, Mokuba. On Mokubas side was Snow Wave who was lucky enough to participate in this part of the plot

However, Snow Wave was different from others even lying in the hibernate cabin. While twisting his body, he was still smirking hehehe, like a wet dream, and he didnt know what he was doing in the virtual world

Master, are you okay? Are you injured anywhere? Dark Magician Girl asked.

Here, Yuei Vu must first appease his own spirit partner: It doesn't matter. Didn't I tell you before I came down? Don't worry about what happens later, I know it will end like this.

But master, you have been sleeping for a long time. The Dark Magician Girl played with a small staff in her hand, I wanted to let you out before, but there are so many buttons and so many messy lines, I have been studying for a long time and can't figure out what it is for. I'm afraid I'll mess with the master by touching things that shouldn't be touched.

Yuei Vu imagined that when he fell asleep in the hibernate cabin, Dark Magician Girl was floating around in the control room, facing such a large number of computers and black technology devices, her little head was full of question marks.

seemed pretty cute.

After a while, others also woke up one after another.

Everyone got up one after another, and after confirming that there was no abnormality, President Kaiba immediately stopped in front of Yuei Vu.

Noah said you saw Gozaburo, is that true?

Yeah. There was nothing to hide, so Yuei Vu admitted directly, Kaiba Gozaburo uploaded his consciousness into the computer before he died, and survived in the same form as Noah.

He also mentioned you, Kaiba, and he said he hated you to the core. Because you beat him at his best in chess, he wants to beat you with your best in dueling monster.

Kaiba frowned: So, you duel with him?

I did. Yuei Vu nodded, Gozaburo has been turned into data garbage in the online world under the attack of Osiris, and no longer exists.

Kaiba narrowed his eyes and stared at him for a moment.

Hmph. He turned his head away. Mind your own business next time.

After that, President Kaiba never mentioned it again.

On the contrary, Mokuba made a special trip to explain to Yuei Vu: Sorry for involving you in our affairs.

Gozaburo is my brother's biggest enemy so far, and the only past that my brother has made up his mind to surpass. If there is no way to take this step, neither my brother nor I will be able to move forward.

So if my brother says that, don't take it to heart. Although he doesn't say it, my brother must be grateful for the fact that you completely defeated Gozaburo and shattered the curse that haunted him.

Enough, Mokuba. Kaiba, who had already stepped aside, had a dark face.

Only the president's own younger brother dared to open his eyes and tell the truth. If it was someone else, he might have been thrown into the sea to feed the fish by the president.

Yuei Vu smiled and said he didn't care.

It's okay if you don't say anything, we all know.

After all, no matter how calm the presidents face is, the string of Favorability +1 on his forehead will not deceive people

If you really want to express your gratitude, just give the card meaning.

There is no need for any special rare and powerful cards, just some normal cards are fine. For example, the presidents Card of Demise is not bad

Mokuba patted his chest and said that: This was all trivial, and that Kaiba Corp never lacked cards. After this competition was over, I would send you a briefcase full of cards.

President Kaiba turned his back and didnt say anything as if he didnt hear or care. However, Yuei Vu boldly speculated that he should have heard it, and this attitude may have acquiesced

In fact, Yuei Vu felt a little strange at this moment.

From the very first contact with President Kaiba, he just wanted to revise the card game rules of the Battle City to make it easier for him to get used to it. He obviously didnt do anything deliberately, but the presidents favorability seemed to have been UP continuously

Could it be that the arrogant on the surface was actually sullen on the inside?

At this time, Yuei Vu felt for the first time that maybe it would be better for him to pay more attention to this aspect.

Its a good thing to have a slightly higher favorability among big men-maybe the president would secretly add chicken legs behind his back when he is in a good mood when he goes back. However, if it was too high, it may not be beautiful.

Especially when the other party was President Kaiba, it was even more noteworthy, because the expression of the presidents high favorability may be a bit dangerous.

Thinking of the presidents obsession with going to the underworld to drag Atem back to play poker, Yuei Vu made up his mind a little, feeling that if the president came to him, his body might be overwhelmed

Everyone recovered, cleaned up their mood, and prepared to leave the base and return to the Battle Ship.

After everyone got up, they came to the door of this room. The metal door that was locked was slid open with a beep under Noahs remote control, opening the way for everyone to leave.

And what appeared behind the door was

a six-year-old whos concentrating on cipher dials?

Everyone:

Yami Marik:

Looking at this scene, you could roughly guess what is going on here.

Not long after everyone entered the fortress, the six-year-old could not sit still on the boat and his hands were itchy. He wanted to come down and do something but was blocked by the combination lock of this door.

Yuei Vu speculated that the six-year-olds cognitive level of modern technology was probably about the same level as that of the janitor at the gate of his high school, which belonged to the kind of barely be able to use a mobile phone

Marik was about to try to use the metaphysical power of the Millennium Rod to try to brute force a solution, but before he succeeded, the door opened by himself.

The six-year-old saw that he had not finished his work yet, and everyone came out so safely. He snorted and turned his head away with a flick of his cloak.

After he walked away, everyone noticed that the entire passage was littered with the wreckage of military robots that had been beaten and scrapped. The walls and ceilings of the surrounding passages were filled with bullet casings, and there were traces of laser burns everywhere as if a fierce battle had taken place.

After a while, Jonouchi said leisurely: Could it be that when we were dueling in the virtual world Marik has been fighting robots here all the time?

Imagine that Marik was alone in a bloody battle with military robots while they are all lying in the hibernate cabin and playing cards

It felt like the six-year-olds life was quite hard.

Back on the Battle Ship, the airship restarted and left the underwater fortress to move on.

Because of such a huge change, Kaiba Corp must have a contact person to deal with the aftermath. Everyone who has suffered a huge mental blow in the virtual world also needed physical and psychological medical help, and there were still many procedures to follow. Therefore, the Battle City finals scheduled to be held today could only be temporarily postponed

hell no!

The president said that no matter what happened, it couldnt interfere with our playing cards!

Even if the sky fell and the world was destroyed tomorrow, we have to finish this competition!

So the president waved his hand

March at full speed! Target, Alcatraz!

Chapter 156: The Order Of Playing Cards

Even the apocalypse will not stop the presidents card addiction, this sentence definitely did not contain any exaggeration.

The little trouble with Noah and Gozaburo did not affect the presidents determination to play cards at all. The dueling boat that regained control quickly returned to its normal track and began to march towards the final location Alcatraz island.

As mentioned before, Alcatraz was the wreckage left by Gozaburos ambition to conquer the world. In fact, for President Kaiba, this match on Alcatraz was a crucial turning point in his entire life.

Seto and Mokuba lost their parents when they were young, and their relatives fought over the inheritance. The brothers ended up in an orphanage with no one to care about.

Seto won the opportunity to turn around in his life through his own strength, but after becoming the adopted son of Gozaburo, his childhood was still gloomy. From beginning to end, Gozaburo just treated him as a business machine, trying to squeeze all the value out of his genius mind, and in the end, he even conspired to take away his body as well, making him a container for Noah.

Now, these have all been overcome by the Kaiba. He preemptively knocked down the opponent before Gozaburo started, and won the Kaiba Corp, becoming the winner who stood until the end. But there was nothing worth looking back on on the road of Kaiba's life that has come to this point.

All he saw was the future.

In Kaiba's eyes, the future had infinite possibilities, while the past was just a footprint. What has passed has no meaning, and the true king should always look to the future.

That's what he wanted to do win the title of Duel King in the duel on Alcatraz Island, say goodbye to everything in the past, and take a new step.

Before reaching the target, of course, Yusei Kudo did not hesitate to get all the new crystals from the Noah mission and smashed them all into the system card pool.

In fact, in all fairness, the reward given by this plot mission was really rich: 3000 crystals for one quest.

Such a huge amount was enough to make most players smile in their sleep, but Yusei Kudo, who was used to harvesting, felt it was not much.

As expected, nothing of high rarity came out. Among the few URs and SRs, most of them were duplicates of his existing cards.

On the contrary, Mokuba kept his promise, and immediately dragged him a box of cards to replenish ammunition after getting on the airship.

It was conceivable that since it was presented by the Kaiba Corp, the box contained entirely rare cards.

It's just that most of them were actually useless Normies. The proportions could be roughly referred to in the first episode of Yu-Gi-Oh! DM, when President Kaiba tried to use it to fool Yugi's grandpa and wanted to exchange Blue Eyes White Dragon with a case of Normies.

But there were still a few useful cards.

One was the Card of Demise that Yusei Kudo has long been thinking about. If possible, he actually wanted to get a few more, but maybe the president felt that it was useless to bring too much of this stuff, so only one was given in the box.

In addition to this, there was another Thousands of Years Banned Card from the DM era Ring of Destruction.

Ring of Destruction (Normal Trap Card): Destroys a monster on the field, and inflicts damage equal to the ATK of the destroyed monster to all players.

A simple and rude, yet powerful and effective Trap Card, that's why in the real card environment it has been banned for a long time. In the DM, President Kaiba usually used it, and it has also appeared many times in the GX anime.

This was indeed a good card that might come in handy.

The sincerity was indeed enough. Yuei Vu boldly speculates that although President Kaiba was full of nosy disgust every time he saw him, he may actually be grateful.

Its just that he didnt say it himself, and let his brother do it all for him.

The dueling boat landed on the ruined island. Everyone followed Kaiba and walked into the towering iron tower in front of them. There was a sense of sacred ceremony.

So do we still have to draw lots now? Jonouchi consciously stood in the auditorium and looked around, Hey! Kaiba, you wont cheat at this, will you? For example, deliberately assigned to be in the same group with Yugi or something

Kaiba folded his arms and snorted, ignoring it.

At the same time, four metal door panels were automatically opened on the surrounding walls, and an elevator equipped with a computer was placed behind each door.

The invincible referee, Uncle Isono, appeared again and calmly explained the semi-final grouping rules to everyone.

Each of the top four players must stand on one of the elevators, spread out to four different corners, and each fight for a four-person Battle Royal.

Under the Battle Royal rules, all players could not attack in the first round. Each player represented their own side. There were no teammates. Participants could attack any side they like.

The players LP was connected directly to the elevator computer under them. Whenever a player lost LP, the lift would rise by the corresponding height.

The grouping rule was also simple. The two people whose LPs were down to zero first were the first group, and the remaining two whose LPs were not reset to zero were the second group.

The two winners in each of the semifinals would enter the final, and the champion would get the title of Duel King.

This plan was really very President Kaiba-ish there was no problem in the world that could not be solved by playing cards, and even the order of playing cards could be solved by playing cards

But in this way, winning or losing the duel became irrelevant. There was no benefit in winning or losing, it was nothing more than a way to decide the opponents of the top four.

Thinking of this, the brains of the participants quickly became active.

Especially if you looked at the president, he has just stood on the elevator platform, the machine has not started yet, his eyes are already fixed on the opposite Yugi, and his heart may still be crying silently

Yu Gi !

This duel will be the site of our fateful battle, so get ready to go full speed ahead!

During this period, the president seemed to remember something, glanced at Yuei Vu, and seemed to think of the Osiris the Sky Dragon in his hand, and also thought of the cards they couldnt finish because the Duel Disks screw was lost.

The president pondered for a second or two
and then looked back at Yugi with burning eyes.

Sure enough, the opponent I want to fight the most is you! Yu Gi !

Although Yuei Vu was also a man recognized by the president, their duel was just a draw. But for him, Yugi was a peak standing in his heart. Yugi has made him feel powerless to fight back more than once. It was an existence he was eager to surpass.

In addition to this Yugi torture me a thousand times mentality, Kaiba felt that there seemed to be something beyond time and space that guided him to fight Yugi again, like an invisible rope. brought them together although he wouldnt admit to this supernatural trick.

And compared to Yugi, Yuei Vu

. just be a bit handsome.

Marik was even more undisguised. He was not even on the elevator, yet has already started to laugh vulgarly while staring at the back of Yugi, like a perverted uncle following a loli.

Looking at President Kaiba and six-year-old Marik, all four eyes fell on Yugi, Yuei Vu deeply felt that he was like a little transparent who was ignored, he couldnt help but feel worried about the insecurity of the Pharaoh

The contestants each boarded their own lift platform with their thoughts in mind. The device was activated, and the four-person lift platform rose to the designated height at the same time and stopped.

With the order of the referee Isono, this great Battle Royal that was involving the reincarnation of the Pharaoh three thousand years ago, the priest and the next pharaoh, the descendants of the Tomb Keepers who bear the fate of revenge and an outsider with the Yu prefix, has been kicked off.

Duel! x4

Yami Yugi went first: My turn, draw! I summon Celtic Guardian in attack position!

The projection equipment in the duel venue was running, and the light and shadow effect projected the image of a swordsman in steel armor and a cloak, holding a sword horizontally in front of the chest, protecting it in front of the master.

[Celtic Guardian, ATK 1400]

This guy was also one of the representative monsters of Muto Yugi. His appearance rate may even be as high as that of Yugis ace Dark Magician.

Its just that his name may be slightly wrong, and it may be more appropriate to change it to Elf Swordsman Who Was Tossed by the Enemy. Because the role of this poor swordsman every time was cannon fodder summoned to the field by Yugi to be beaten first. He was also affectionately called cannon fodder swordsman by the players

I end my turn. Yugi declared.

Then its my turn next, draw! It was President Kaibas turn, I summon the Vorse Raider in attack position!

[Vorse Raider, ATK 1900]

Set another card, I end my turn!

After quickly completing the action of playing cards, the presidents eyes returned to Yugi again, and there was a great urge to go up and put Yugi on the ground to play cards with him

Chapter 157: Giving You A Level 8 Beatstick

My turn, now its Yuei Vus turn, draw.

Although he felt like an outsider now, he still had to continue.

According to the rules of Battle Royal, no one could attack in the first turn, so this turn should mainly focus on consolidating the defense and preparing for the next battle.

It was precisely because of this rule that Yugi dared to leave only a cannon fodder swordsman in the attack position on the field without even a set card.

It should be said that he was worthy of being a Pharaoh, and he was so confident.

He left a cannon fodder swordsman standing on the field, and when others saw that the field was empty with only one cannon fodder, they immediately had the illusion of playing against a simple bot, and immediately relaxed their vigilance. Then Yugi counterattacked immediately when they were unprepared

Is this the Duel Kings tactics? I got it.

However, Yugi dared to be so turbulent because he would be the one who could attack first.

Summon Elemental HERO Solid Soldier in defense position.

A hero in silver and white hard armor appeared on Yuei Vus field with a loud snort, his arms were staggered like shields for protection, and his body was half-squatted to block in front of Yuei Vu.

[Elemental HERO Solid Soldier, DEF 1100]

Solid Soldiers effect When this card is Normal Summoned, I can Special Summon 1 Level 4 or lower HERO monster from my hand. Come on! Elemental HERO Clayman, in Defense Position!

[Elemental HERO Clayman, DEF 2000]

Set a card, and I end my turn. Yuei Vu also finished playing cards.

Yugi glanced at him, thinking: Two defensive monsters, and one of them has a defense power of 2000. That set card might also be a card to consolidate defense As expected of the duelist who defeated Jonouchi. In the first turn, he already builds an iron wall of defense.

But at this time, the six-year-old watched Yugi then glanced at Yuei Vus side, and only laughed gloomily.

My turn, draw! Dark Marik drew a card and laughed, Its really hard for you to put up such a lineup in your first turn! Then as a reward, I will give you this powerful monster!

I take the Elemental HERO Solid Soldier and Elemental HERO Clayman on your field as sacrifices, and special summon to your field a powerful Level 8 monster Lava Golem! ! !

Yuei Vu: ..

The scorching flames rose out of thin air and enveloped the bodies of the two heroes on the Yuei Vus field. The heroes disappeared in the swirling flames, and the pillar of fire rose into the sky like a magma eruption.

A giant body covered in fire appeared behind Yuei Vu, and the iron cage hanging on his chest locked Yuei Vu in the middle. But because it was a virtual image, it looked like the giants body was penetrating through the wall, as if the entire wall was burnt red.

[Lava Golem, ATK 3000]

Lava Golem, one of Yami Mariks signature monsters, was also the originator of the release solution monsters that had a dread reputation among Yu-Gi-Oh players.

Its feature is that it could tribute two monsters on the opponents field and Special Summon itself to the opponents field.

It was worth noting that Lava Golem used two monsters on the opponents field as a sacrifice, which was a summoning condition, and its nature was the same as the controllers summoning of two monsters on his field as a sacrifice.

In other words, even if the monsters on the opponents field have absolute resistances like cannot be targeted by card effects or unaffected by effects, they could still be sacrificed by Lava Golem.

With that said, you might be able to see how hellish this thing was. For example, even if two Egyptian gods with strong animation resistance jumped out on the opposite side, you could still send them to the underworld and force the opponent to accept this Level 8 monster

However, neither Yugi nor Kaiba have seen this kind of monster, and they were all suspicious at this time when did Marik be so good? Why did he take the initiative to give the opponent a beatstick whose attack power was equal to the Blue-Eyes White Dragon?

Do you really want to make friends with each other through a duel?

And its not over yet!

Hey, but it wont be good if you use Lava Golem to attack me, so Im going to play this card just in case Spell Card Mask of the Accursed! Equip to Lava Golem!

An ugly mask full of metal barbs emerged and flew in front of Lava Golem, smearing his burning face without saying a word.

Lava Golem let out a low roar, followed by his arms hanging down, and the whole person was stunned.

Hahaha! Monsters equipped with Mask of the Accursed cannot attack or defend, and the controller will lose 500 LP each turn! Marik laughed, Then the effect of Lava Golem will also deduct 1000LP each turn, so it will be 1500LP of damage in each of your Standby Phases!

Yuei Vu:

Marik burst into a standard M-style laugh, then set three cards and ended the turn directly.

As expected of a nether duelist, he started by giving a Level 8 monster to the opponent and then placed three pits in the Spell Trap Zone, which made your scalp numb.

At the end of the first round, the attack restrictions of all players were lifted, and the real battle would follow.

My turn, draw! Yugi pointed to the elf swordsman in front of him, I sacrificed the Celtic Guardian Summon the Archfiend of Gilfer!

Anyway, cannon-fodder swordsman has never had any human rights. At least this time he didnt get beaten.

The white whirlwind wrapped the elf swordsman in the middle, turning into a blue starlight and disappearing. The body of the pitch-black demon flew out of the vortex of sacrifice, flapping its blood-red wings, and its fangs reflected silver light.

[Archfiend of Gilfer, ATK 2200]

Yugi glanced at the situation on the field and began to think.

In the original animation, the one that Yugi wanted to fight the most in the semi-finals was his friend Jonouchi. Even though President Kaiba blinked and sneered at him frantically, Yugi still ignored the president throughout, and all he could see was Jonouchi.

However, President Kaiba became smarter in this timeline. He eliminated the threat of Jonouchi with his own hands first in the quarterfinals, so that he would be able to monopolize the priority of playing with Yugi!

Sure enough, the tacit understanding between Yugi and Kaiba was still there. Without the third wheel Jonouchi, Yugi immediately understood Kaibas eyes.

Yugi made up its mind.

Well, if you think so, Kaiba, then we will end our grievances in the semi-finals!

So what he had to do now was to make the other two LPs except Kaiba get to zero and leave early, so that he and Kaiba would be in the same group.

Then the eyes of Yugi wandered between Yvei Vu and Marik for a moment, and soon the one who was more ill-mannered was selected based on his appearance

Archfiend of Gilfer! Yugi pointed to the six-year-old, Directly attack Marik!

The demon took the order, opened his mouth with a roar, and the chaotic shock swirled and whirled towards Marik.

Chapter 158: Everyone Would Understand

Archfiend of Gilfer, attack Marik directly! Yugi directly designated the six-year-old.

The pitch-black demon spat out a chaotic shock, flying over Mariks empty Monster Zone, and roaring towards him.

However, even someone who was thinking with his feet also knew that the three set cards in the Spell Trap Zone of the six-year-old must not be all decorations.

The six-year-old laughed and waved directly: Is it really that simple, Yugi? Activate Trap Card Call of the Earthbound!

The red trap card was opened, and a dark ghost flew out from the gloomy and dark card surface, flying over the field like a lonely ghost to Yuei Vu and disappearing.

Then, for some reason, Archfiend of Gilfer suddenly turned in a different direction halfway through, turning his head one hundred and eighty degrees, and rushing towards Yuei Vu.

Call of the Earthbound is a trap that allows me to determine the target of the opponents attack. Marik sneered and turned his eyes toward Yuei Vu with malicious intent.

Lava Golem cannot defend when equipped with Mask of the Accursed, so now your field is empty. Go! Yugi's Archfiend of Gilfer, attack Yuei Vu directly!

Yuei Vu narrowed his eyes.

Damn Marik, why did you target me?

Didn't I just pull out five or six decks, three or four Duel Disks and a Sky Dragon?

So much grudge for such a little loss?

What a stingy guy, no wonder Ghouls would be disbanded so soon

The attack power of the Archfiend of Gilfer was 2200 points. If Yuei Vu was hit, then when its his turn, he would lose 1500LP due to the effect of Lava Golem and Mask of the Accursed and only have 300LP left, which was like a candle in the wind

Well, that doesn't seem like a bad thing?

However, Yuei Vu didn't plan to lock blood so quickly. He raised his hand and prepared to press the button on the Duel Disk: Then I will also open the set

It turned out that someone was faster than him: Open the set card!

Everyone looked at the source in unison, and found that it was Kaiba who had been watching the play with his arms folded till now.

In this era, the concept of priority hasn't been invented, when the effect was chained, whoever shouted faster and louder could activate it first. In terms of voice, Yuei Vu was obviously no match to the president here, so Kaiba's card would turn over before his

Quick-Play Spell- Command Silencer! (anime card)

The Spell Card with the Quick Play icon was opened, and a sound wave device was projected on the field in the center of the four people, and the transparent sound waves presented by the three-dimensional images were released in the closed space.

Command Silencer is a Quick-Play Spell that can cancel the player's attack declaration. After the activation is successful, I can draw a card from the deck. The president snorted with his arms crossed, I use the Command Silencer to cancel Yugi's attack declaration!

Since Archfiend of Gilfer is a monster of Yugi, the attack itself will not be established! Call of the Earthbound naturally also failed!

This made Yuei Vu a little surprised.

Didn't the president want to play cards with Yugi? Why did he still activate the set card to cover me?

After the president finished speaking, he did not forget to squint at Yuei.

However, before the president opened his mouth, Yuei Vu quickly understood and pointed to himself: President, you don't need to explain. You just drew a card and didn't intend to cover me up. Don't worry, I didn't misunderstand.

Kaiba snorted and ignored him.

Marik felt a bit of a pain in the ass. He narrowed his eyes: Do all the extra things Hmph, since you want to draw cards so much, I'll let you do it!

Activate Counter Trap Dark Bribe!

The set card in the center in front of Marik was also turned over.

Hey, this card can negate the activation of a Spell Trap Card and destroy it, but the opponent can draw a card. Marik hummed, Your Command Silencer has been negated, President, hahahaha!

Well, draw cards as you wish, but the attack still has to continue!

Kaiba frowned and pouted: Grr

Marik did the face art again, and he put on a twisted smile: Go on Archfiend of Gilfer! Give me a direct attack on Yuei Vu!

That's not necessarily true. Yuei Vu chuckled.

What? Marik frowned.

This was really thanks to the president. If the president hadn't activated the Command Silencer to help him step on Marik's Dark Bribe, the situation might have been completely different now.

Open the set card! Yuei Vu continued to open the card that was interrupted by the president before, Counter Trap Card Seven Tools of the Bandit!

What!? Marik was shocked.

Seven Tools of the Bandit's effect, Yuei Vu said, Pay 1000 LP, negate the activation of a Trap Card and destroy it!

I negate the activation of Dark Bribe, so that Kaiba's Command Silencer activation will be effective! The attack order of the Archfiend of Gilfer has been eliminated!

In front of Marik, the card Dark Bribe was torn apart by another counter-trap, and the effect disappeared. Kaiba's Command Silencer continued to take effect, Yugi's attack command was eliminated, and the chaotic shock spewed out by the Archfiend of Gilfer became invisible.

At this time, Archfiend of Gilfer, who had experienced many twists and turns during an attack, was dumbfounded. At this moment, he may have been stunned by the chain of four people.

Archfiend of Gilfer: Who am I? Where am I? Who am I going to hit?

What? I didn't hear what the master said just now, why did I suddenly stop attacking? (@_@;)

Hmph. Marik glanced at Yuei Vu unhappily, as if he was angry that the attack didn't work.

But for that trap, 1000LP must be paid. Marik looked at Yuei Vu fiercely, as if he was afraid that Yuei Vu wanted to ignore the 1000 LP price while everyone was not paying attention

I know. Yuei Vu said lightly.

Yuei Vu, LP 4000 LP 3000

The elevator platform that Yuei Vu was riding on climbed up a bit. After stopping, he turned his head to remind Kaiba: The activation of the Command Silencer is valid. President, you can draw cards.

Kaiba smiled and snorted, and drew a card.

I end my turn, said Yugi.

Looking at Mariks three set cards in the Spell Trap Zone, he predicted that they must be all traps.

Yugi didnt expect this simple attack to be effective at all. His purpose itself was to tear down Mariks Spell Trap Zone defense.

Now his Spell Trap Zone has only the last set card left.

Marik snorted and glanced at Yuei Vu: But there is still Lava Golem who cannot attack or defend on the field. Coupled with the effect of Mask of the Accursed, 1500LP will still be deducted in your turn. .

He said and laughed a few times slyly.

Hehe, it seems that the first to be sent up is decided to be you.

My turn, draw! This time it was Kaibas turn.

If you keep dragging it on, we wont be able to decide the order. Just let me eliminate one within this round! Kaiba shouted loudly, Activate a Spell Card from the hand Soul Exchange!

The remaining three were surprised at the same time.

Did the president actually dig out his Soul Exchange in this situation?

Hmph, Soul Exchange allows the player to Tribute monsters controlled by their opponent, as if those monsters were under their control. Kaiba sneered, According to the rules of Battle Royal, everyone except myself is regarded as an opponent, so I can choose any monster on the field to be sacrificed. (animation effect)

Kaiba waved his hand: The monster I want to choose is Yugis Archfiend of Gilfer! Then Yuei Vus Lava Golem!

Marik: What!?

Tribute Archfiend of Gilfer and Lava Golem! Slash the sky with your claws and dispel the darkness with endless light!

My strongest servant- Blue-Eyes White Dragon! ! !

A hurricane rolled up in the space, followed by the dragon roar whose might was approaching the gods. The white dragon spread its wings and landed in front of the Kaiba, hissing, and roaring.

Hahahaha!!! Kaiba started laughing.

If the Lava Golem was tributed, the Mask of the Accursed equipped on it would naturally be destroyed.

Therefore, in Yuei Vu's next turn, he naturally did not need to be deducted 1500LP.

Of course, President Kaiba couldn't do good deeds so deliberately. The reason why he sacrificed the Lava Golem was just to summon his wife, not to help Yuei Vu clear the trouble. Everyone would understand.

Chapter 159: The Whole World Is Working Against Me

Hahaha! Look, this is my strongest servant, Blue-Eyes White Dragon!

President Kaiba burst into a three-stage laugh, and Blue-Eyes White Dragon also called out to the side with great respect. After the president finished laughing, he turned around and began to decide on the target to attack.

The president's eyes wandered back and forth.

At this time, Archfiend of Gilfer on Yugi's field and Lava Golem on Yuei Vu's field were sacrificed by the effect of the Kaiba Spell Card. All three fields were now empty.

In this turn, only President Kaiba had Blue-Eyes White Dragon and Vorse Raider on the field, with a combined attack power of 4900. In theory, he could defeat any one of the three in this turn.

This was the peculiarity of the Battle Royal under which individual strength was difficult to be fully exploited.

After all, after one player finished playing cards, he would have to wait for three consecutive turns of other players before it was his turn again. If the other three decided to kill him first, even the fairy couldn't turn the table.

Just like now

The first person to leave the stage has been decided! Kaiba shouted, Blue-Eyes White Dragon, attack Marik directly! Burst Stream of Destruction!

Marik's mouth twitched, and he couldn't help but curse in his heart

*F*ck your mother!*

Why does it seem like the whole world is working against me?

Thinking about it carefully, this was really not his imagination. In the last turn, Yugi, without thinking, ordered the Archfiend of Gilfer to attack Marik, and Kaiba's Command Silencer was also given to Marik. Yuei Vu used his Seven Tools of the Bandit to counter Marik too.

He handed Yuei Vu a Level 8 monster that automatically damaged the controller's LP, but it was manually sacrificed by Kaiba before the effect could be activated.

Is this what you call a Battle Royal? You all work together to drive me out!

The six-year-old suddenly felt angry that he seemed to be arranged by the three people in front of him.

Although he didn't say it, Yuei Vu could probably guess what Marik was thinking.

But is it right to blame the three of us?

Marik, can you think about what you have done, and reflect on why the other people gathered and beat you as soon as you came up?

But Marik still has a set card: Activate Continuous Trap Nightmare Wheel!

The Trap Card was flipped, and it is also Marik's last trap. The stereoscopic projection system projected images of black metal wheels in mid-air, flanked by fang-like silver barbs. The huge metal wheel spun rapidly and shot straight toward the white dragon.

Nightmare Wheel's effect targets 1 monster the opponent controls; it cannot attack or change its battle position! Marik shouted, As long as Nightmare Wheel exists, the monster's controller will take 500 damage in each of their Standby Phases!

Another very Marik-style nether trap, and the artwork was a bit horror.

Originally, Nightmare Wheel was a trap that would bind the target monster in a discordant posture. However, the Blue-Eyes White Dragon was too large to be tied to the wheel, so the wheel with barbs plunged into Blue Eyes' chest.

The white dragon let out a moan, but the light bullets that had been brewing in its mouth helplessly dissipated. Its head drooped, and it seemed to call out to its master apologetically.

Blue-Eyes! Kaiba gritted his teeth angrily.

At this time, Yuei Vu suddenly realized why Kaiba's wife always seemed to be loaded with strange things

Damn, are you still struggling? Kaiba waved his hand, but I still have the Vorse Raider who hasn't attacked. Fight! Vorse Raider, attack Marik directly!

The Vorse Raider flew out and fell down with an axe. Marik's resources were finally exhausted this time, and he ate the axe firmly.

Marik, LP 4000 LP 2100

I end my turn! President Kaiba snorted.

My turn! Yuei Vu drew a card, Activate Spell Card E Emergency Call, and add Elemental HERO Avian from my deck to my hand.

Then I activate Spell Card Polymerization, fuse Elemental HERO Avian and Elemental HERO Burstinatrix!

Fusion Summon! Elemental HERO Flame Wingman!

The images of Avian and Burstinatrix emerged, turning into green and red light beams, which merged into the swirling vortex and gave birth to a new power.

[Elemental HERO Flame Wingman, ATK 2100]

Seeing this hero appearing, Marik seemed to have guessed the next card in Yuei Vu's hand at this moment

Finally, the Spell Card Quick Attack is activated! Yuei Vu inserted the card into the Duel Disk and waved his hand, Give the Elemental HERO Flame Wingman the ability to attack in this turn!

Elemental HERO Flame Wingman, directly attack Marik!

Marik: @!#&

NMD, three to one, is this cheating?

What about everyone except myself is regarded as an opponent?

Its all a lie!

What about the organizer? Where is the organizer? Im going to complain that they discriminate against me. Three Japanese gangs up on one Egyptian! The contest has a shady scene!

Oh, the organizer is also one of them?

The green body of the hero was wrapped in flames and flew out, hitting Marik's body straight like a burning human cannonball.

The flames exploded violently, and at the same time, a large cloud of smoke exploded, engulfing Marik and the elevator below him.

Player Marik narrowly missed being disqualified from the competition for being aggressive, misusing words, and allegedly slandering the organizers.

[Marik, LP 2100 LP 0]

Marik gritted his teeth, snorted, and didn't speak, his elevator went up first because the LP was zeroed.

Marik Ishtar, as expected, was the first to go out.

But in fact, this duel was only to determine the opponent and the order of playing cards. So the loss didn't really matter.

So the six-year-old was unhappy just because the other three teamed up to smash him

Since this guy got out first, there was no suspense.

At this time, Yugi and Kaiba have already met, and the two seem to have made up their minds to fall in love, er, kill each other in the semi-finals, to put an end to their destiny or something.

Here, Yuei Vu used the Flame Wingman to take Marik away, and his back row was completely empty. Next, he had to go through the turns of Kaiba and Yugi. Even thinking with his feet, he would know the result.

As expected, Yuei Vu couldn't wait until his next turn. His lift platform soon flew up to the same height as Marik.

But Yuei Vu didn't care about it.

After all, I had a chance to beat you up, it was so cool!

Moreover, Yuei Vu's performance could be regarded as picking the weakest player to be his opponent in the semi-finals. From the perspective of promotion, it may not be a loss

Chapter 160: Quasi-Final

With the order of the referee Isono, the grouping process ended here. The lifts under all the contestants started at the same time, and they bounced toward the top of the tower with a swoosh.

After a while, the four of them came to the top of the dueling tower one after another.

This was the same as the schedule in the animation. From the grouping process to the first game of the semi-finals, there was not much rest time, and the players in the first game only had about ten minutes to adjust.

Players could choose to use these ten minutes to make the final deck tactical adjustment according to the opponent they would face, or they could choose to interact friendly with the opponents players, greet each others family members or something, and warm up for the upcoming duel.

As for the deck, Yuei Vu has already adjusted it a long time ago, and now he just needed to check it for the last time. Because of the understanding of the anime plot, Yuei Vu already knew that Kaiba would use the Battle Royal method to decide the opponent. Naturally, it was easy to predict that his opponent in the first battle would be Marik, so the deck was adjusted a long time ago.

As the so-called high risk, high return, although if he lost against Marik, there was a risk of being consumed by the Shadow Game, from the perspective of promotion, among the top four he would have a slightly greater chance of advancing when fighting against Marik.

In the animation, Mariks arrogance was all based on out-of-the-table tricks. The effect of The Winged Dragon of Ra was awesome, and the key was that no one except him knew the specific effect.

However, this problem did not exist for Yuei Vu, as he knew exactly what effects The Winged Dragon has.

Strictly speaking, Marik didnt win against Mai and Jonouchi in the anime. Yuei Vu felt that he has a good chance.

At this moment, the onlookers also came from the passenger elevator to the top of the tower. Jonouchi and a group of friends came up and started shouting, Come on, Yuei Vu!

Sister Shizuka blushed: Yuei Vu, come on~

However, none of them did as hard as Snow Wave and Miss Yuehua: Yuei Vu! Use your invincible Elemental HERO to kill that pervert!

It seemed that suddenly everyone has become a fan of Yuei Vu and a cheerleader, in stark contrast to the lonely six-year-old standing across from him with his arms crossed.

Even Mariks own sister cheered for his opponent.

At this moment, Ishizu also came to the top of the tower and solemnly bowed to Yuei Vu: My brother Marik Please. Please eliminate the evil thoughts in his heart.

Yuei Vu nodded: Well, I will try my best.

President Kaiba, of course, would not express his dissent as clearly as others. However, he stood aside with his arms crossed, and pretended to casually remind: The Winged Dragon of Ras abilities are far beyond your imagination.

Take it easy. After winning Yugi, my next target is you. Ill be waiting for you in the final, dont let me down.

There was a reason for the president to remind him so. After all, he was the man who interpreted the effect of The Winged Dragon of Ra on Mariks Duel Disk through satellite aerial photography

What? You said he was cheating by peeping?

He was the organizer of the competition Could that be called cheating?

If you didnt believe me, ask the referee on the stage to see whether or not this was cheating.

Then Isono might say: This competition adopted the special duel rules of Kaiba Corp! Peeping Duel Disk with satellites did not count as cheating! (if you can afford to buy satellites)

The lonely six-year-old stood in front of everyone by himself, holding a Millennium Rod and cradling his arms, laughing.

To be honest, he didnt take Yuei Vu to heart at all.

Although the six-year-old was not good at playing cards, he was very addicted to cards, and he was inexplicably confident that he was very good at it.

He felt that Ghouls had suffered many losses in Yuei Vus hand until now entirely because his main personality was too naive. His current mentality was a bit like an audience who was watching the whole process and feel that if it was me, it would do better.

After all, from his point of view, Yuei Vu has no Millennium Items or background, and he was not the reincarnation of a big boss, but a mere mortal.

Facing him, wasnt it a one-sided massacre?

The first game of the semi-finals, the referee Isono, who was used to seeing big scenes, waved his hand, Player Yuei Vu vs. Player Marik, start!

Yuei Vu, LP 4000

Marik, LP 4000

Im the one who goes first, draw! The duel started from Mariks side.

Player Marik came up to perform a wave of face art, and then laughed vainly for a while, and without a word, took out a Millennium Rod from the four-dimensional asshole.

Come on! The Shadow Game of betting on both sides lives has begun! Hahahaha!

The darkness was released, and the pitch-black field instantly swept the audience, enveloping the two people in the battle and the entire field.

The powerful force hit immediately, and the pressure was so overwhelming. The field surrounds like a sphere, and there seem to be countless ghosts traveling back and forth in the surrounding darkness.

Master!

The Dark Magician Girl appeared in time to relieve Yuei Vus pressure.

At the same time, Yuei Vu can also feel another power released from the deck in his hand a power even stronger than Dark Magician Girl, like forming an invisible force field to protect him in the center.

There was no doubt that the Sky Dragon in his deck was also protecting him.

This was also one of the reliances on which Yuei Vu dared to accept the challenge of Mariks Shadow Game.

As long as there were means to check and balance the opponents off-board moves, he had confidence in playing cards.

Hey, youll soon know whats the use of this.

Marik said and took out a card, licked the back of it with his tongue, and said, This guy is what Im going to summon this turn Vampiric Leech! (anime card)

A huge maggot with a disgusting shape and constant squirming appeared on Mariks field, and the red tentacles around it kept flapping.

[Vampiric Leech, ATK 500]

Hey, Vampiric Leech has the special effect that allows it to attack in the first turn. Mariks eyes turned white, and he waved his arms, Go, Vampiric Leech! Directly attack Yuei Vu!

The Vampiric Leech flew out, and its sharp teeth bit Yuei Vus arm.

Although it was only a mere 500 points of damage, the intense pain still struck violently. A tingling shock to the scalp, and a brief loss of sensation in the arm. Yuei Vu felt his feet stumble, and his breathing in his chest was interrupted for a moment.

Yuei Vu, LP 4000 LP 3500

It should be said that it was indeed the power of the Millennium Items. Although Yami Marik was not good at playing cards, his dark power level was much more powerful than an average Shadow Duelist.

Hahahaha! Pay attention to your own right hand!

Yuei Vu turned his head to the side, and a small part of his arm disappeared out of thin air!

Although it did not affect the movement of the hand at all, it really looked like the arm has been cut off from his body.

Hey, the rule of this Shadow Game is that if you get LP damage in this game, part of your body will be swallowed by darkness. Marik sneered, People whose LP is zero will be buried by darkness from head to toe. There is no bone left.

Yuei Vu was mentally prepared, but his spirit partner was a little frightened.

MasterMaster The Dark Magician Girl looked worried.

Its okay. Yuei Vu waved his hand and turned to Marik, Okay, stop talking nonsense, are you done?

Humph.

Marik was a little unhappy that his intimidation didn't have the desired effect he had hoped that Yuei Vu would piss directly when he saw this scene.

But he has more opportunities.

I set a card. Then at the End Phase, activate the follow-up effect of Vampiric Leech. This card can be changed to Defense Position by discarding a card from my hand.

Marik discarded a card from his hand, and the disgusting maggot on the field crouched down and turned from offense to defense.

[Vampiric Leech, DEF 1200]

Yuei Vu looked at the card Marik threw into the Graveyard and narrowed his eyes.

In the animation, Yami Marik's tactics were completely different from those of the main personality. He did not intend to gather three sacrifices to summon The Winged Dragon of Ra at all, but always tried to throw The Winged Dragon of Ra to GY first, and then used Monster Reborn to pull it back from the Graveyard to make an OTK.

Therefore, there was a high probability that the card he threw in the Graveyard just now was The Winged Dragon of Ra.

Okay, I end my turn. Marik lowered his arms. Come on, it's your turn. Try to please me, hehehe

Then he took out the Millennium Rod and licked it with his tongue.

Yuei Vu couldn't help but think: This guy sticks his tongue out and licks everywhere, is he really not afraid of licking something that shouldn't be licked one day
