

ILY Monster 165

As the war continued, Sei, Zaki and Princess Fei were heading into the country's border.

That same moment, the Red rebels who attacked the capital were caught off guard. It was because the moment they entered the City, the military who was supposed to be immobilized due to Sei's attack was perfectly prepared as though they knew they were coming and were waiting for them.

Well, no one among the rebels knew that before Sei shut down the bases, he actually sent secret coded messages, warning the government for an upcoming attack.

That day was the end of the once fearsome group called Red rebels. However, what happened to them and the news of Sei's escape immediately made the Blackleaf's leader to crumble in fear. They realize that there's a certain monster that manipulated the fate of the entire army of Red rebels. And that monster was no other than Sei, the child hacker prodigy that surpassed any existing hacker kings.

...

That same day, the hellish town of Zemei where Sei lived a year ago suddenly blasted by a nuclear weapon. Annihilating the entire town along with half of its population.

Sei wasn't aware of what has happened as they continued with their escape. However, for unknown reason, the government of Country X suddenly released a statement that their nuclear missile located in the town of Zemei has been hacked and detonated that caused the recent explosion. Causing an extreme uproar and unrest. They also revealed the hacker behind the attack. And it was no other than Sei. They distributed his information, saying that he was the notorious cyber-criminal who was responsible for the annihilation of the whole town of Zemei. Telling the world that he was a monster who was capable to destroy the world in his hand.

Meanwhile, Sei, along with Zaki and princess Fei has infiltrated through a small airport near the border. Zaki manage to hijack a private jet, while Sei asked for help.

Sei hacked his father's phone and told him they were escaping and he asked him to meet them in the border of country J.

However, as soon as they set foot to the ground, the father that they expected waiting for them wasn't there. Instead, Zaki saw the approaching military choppers, causing Sei to grit his teeth in anger as they immediately turned back towards the jet when out of nowhere, just before they could enter the plane, Fei was shot from behind.

That moment, Sei's world halted as he caught his fallen mother in his arms, as tears began to fall in his eyes. Sei's eyes widened and he couldn't even talk when Fei told him to leave immediately.

"Son... please, you should live. Promise me you'll live. I'll always be watching you wherever you go..." she said and before her last breath, she asked Zaki to take him away and leave.

Realizing the grave approaching danger, Zaki then took the Princess in Sei's arm and she laid her on the ground while Sei remained there like a broken doll who can't even cry anymore.

And a second later, as the choppers approaches, Zaki snatched the almost lifeless Sei and threw him inside the plane to escape.
