

ILY Monster 90

Moments later, Sei raised his head when he heard the girl's soft steps as she walked down the stairs. Then he just looked at her as she came closer towards him.

She was already dressed nicely as usual. Although her clothes were simple, seemed normal and not expensive, her natural elegance and unspoiled beauty just pulled anything she wears into a different level. She always looked as though, the clothes she wears were originally made just for her.

"I'm leaving," she said as soon as she got closed to him and the man stood right away to walk her out.

By the time they reached the entrance, a car was already parked in front of them just three meters away. Davi then looked at him and he just nodded at her, thus, Davi began walking towards the car.

The butler immediately opened the car's door for her, but she suddenly paused. She turned and looked at the motionless man rooted at the entrance and just looking at her quietly.

And in the next second, she hastily walked back as she looked intently at him.

"I need something," she suddenly said, causing the man to went a bit curious and surprised at the same time because the girl is finally asking something she needed from him.

"What is it?"

"I felt like lady luck wasn't on my side this day so... give me something to boost my luck."

"..."

Hearing her words, Sei was speechless. He even thought about giving her the most expensive car in existence if she asks for it, and yet she's asking for a luck booster?

Sei didn't get what exactly was she asking for. And yet Davi still lifted her hand as if she was an adorable little girl asking her dad to buy her candy.

That moment, the man just stared silently at her as if he's trying to figure out what she really wanted, not knowing that Davi was actually in her mission mode.

'Step #21; tease him gently'

Hinari advised her to do some cute teasing occasionally or even more often if needed. Although she didn't said much about this step, she did reminded her not to overdo it and to always make it clear that she's kidding to avoid being misinterpreted wrongly.

Thus, Davi was actually planning to say the words 'Just kidding' and then stole a kiss from him before she will run away as usual.

However, at that same moment, someone who was standing beside the butler not far from them was miming like crazy, signaling Sei to give her a kiss.

Sei on the other hand glanced at him and he immediately understood what Zaki was trying to convey, causing him to began whacking his brain if she's really actually asking for a kiss. That moment, Sei remembered that Davi was always giving him a kiss every time he leaves. And the thought of it

convinced him that those kisses must be her way to wish him luck. And that this time that she's the one leaving, she's asking him to wish her good luck in return.

That same moment, Davi was about to do her plan, but, before she could even open her mouth, she was stunned as if a lightning bolt just struck her hard when Sei's lips suddenly landed unto hers, causing her world to immediately went into a halt.
