

REBORN : SPACE INTELLIGENT WOMAN

Chapter 14: Take a Look at the Pagoda (2)

Chapter 14: Take a Look at the Pagoda (2)

Yu Qi together with Bo Ya entered the lift. The door closed. Yu Qi looked around and thought about this lift. 'How it was functioning?' It was really weird. Then she felt the lift was stopped and the door was opened. She walked out followed by Bo Ya at her back. There was only one door in front of her.

She put her hand at the door handle and pulled it to open the door. She looked very shocked seeing the scene in front of her eyes. This door seemed to lead her to another world. There was a building in front of her. She recognized it. It looks like a lab or hospital to her.

"Welcome master, this is the medical world. You can choose what you want to learn here. You can choose as many as you want. There was no limit on it." Mary's voice can be heard.

Yu Qi looked at her surroundings and saw the same pattern mirror that she found earlier. She approached the mirror. Only she did not see her own reflection but a touch screen. It looks like a computer. On that screen, there are many medical topics that she can choose. She clicked on Chinese Herb.

"Master had chosen Chinese Herb topic. You can enter that building. Find a room called the learning room. You can learn about Chinese herb there. The lesson will be started when you enter the room. If you want to stop, just go out from the room. If you wish to practice what you had learned, you can go to practical room." Mary explained to Yu Qi.

Now Yu Qi really wanted to meet her real master of this space. The system looked very systematic. Walking toward the building which looks like kind of hospital, she entered and found the room that called learning room. She sat at the empty chair. The moment she sat, the large screen appeared with a voice. The voice started giving her lecture about chinese herbs. Now, she felt like a college student.

The lesson was very helpful. To learn about the herb, one must get to know the herb. Observation, touch, smell, and even the taste is very important. During the lesson, when the voice lectured about the herb, she has also been given the true herb.

Bo Ya sat quietly beside his master. Looking at his master, she looks like very happy with this space. He believed his master will come here every day. Even though his master may not spend time playing with him, he totally satisfied when she was together with him.

Yu Qi stands up and stretched her body. She had listened to a lecture for about 3 hours. "Thank you for the lecture." She bows to the screen and walked out from the room.

"I should go out now. It already 3 hours since I entered the space. Madam Sheng definitely comes to see me in that room." She keeps stretching her body while walking.

"I forget to tell that time flow in this space is different in the outside world. One day outside is equal to three days inside. Master only spent in this space for three hours which mean it only one hour outside.

"What? Really? It's very convenient. Then I want to spend one more hours inside here. I saw something like a small garden outside the pagoda. I want to take a look there." She spoke with excited.

Bo Ya was looking at his master. Right now, his master seemed to be a child who got something interesting to play. It was very different when she was outside the space.

Coming out from the pagoda, Yu Qi saw a small garden. When she came closer to the garden, it was not a small garden. It was very large. It contained many kinds of plants. Fruit like orange, apple, even grape, and strawberry also here. Some vegetable also planted here.

"Who planted those here? Who the one been taken care of them until they are looking this good?" She looked at Bo Ya.

Bo Ya answered with a little bit shy while scratching his nose. "Me. I planted them using the seed that the previous master left to me. It is kind of my hobby. Oh, master can take them. You can eat or sell them." He offered her.

"Really? It was your hard work." Of course, Yu Qi felt hesitated. Bo Ya worked really hard to plant and take care of them.

"Master, just take in. No one eats them anyways. I planted them a long time ago. They grew nicely until they stopped at a certain point but the fruit and

vegetable still fresh and not going rotten. I also try to pick some and they produced the fruits back."

"Wow, interesting. Let me try some." Yu Qi picked strawberry and ate. It was very delicious. A lot better from the outside world.
