Chapter 911: Maddening Laughter

Drowning people would grab anything near them for help. The survivors at Hope City felt the same. Even if Han Fei were a ghost, they would get help from him. The light shining through despair lit up people's hope. Han Fei brought flames that could burn the Pure Hatreds. The survivors saw everything clearly. It was Han Fei who single-handedly turned the situation around for them.

The headquarters changed their tactical plan. The members of the investigation center and then the persona users focused their power on Han Fei. They pierced through the Pure Hatreds that guarded the center of the ghost territory. Han Fei had God's eyes. Nothing could hide before him. He could also rewrite parts of the rules. "This battle is too important. It'll affect the altar world's future and whether Mad Laughter can revive or not."

Han Fei was embraced by the paper doll and bound by sins. Rest in Peace resonated with the starlight in his mind. Every ghost he touched would be cut. The center once decided that Han Fei was an investigator who could control ghosts, but now his fighting power was about as strong as Fu Lie. Since the center was established, Han Fei was the strongest investigator they had ever 'cultivated'.

"Don't hold back. This battle will be the stepping stone for you to become stronger." There were wandering spirits everywhere. Sacrifices that couldn't be found normally were all here. Unfortunately, only the winning party had the qualification to enjoy them.

Sensing the desire within Han Fei, Wu Chang became the craziest ghost. It had been with Gao Cheng since it was the weakest. He would not give up to fate. He wouldn't be a ghost that was always bullied. He wanted to be like Gao Cheng. He would do anything to fight for fairness. His eyes turned red. Wu Chang's obsession turned red under Gao Cheng's influence. He seemed to be born for battle. While he was crazy in battle, he still retained some rationality. As he killed, the fate chains around Wu Chang loosened. The fate arranged for him by God was shattered!

Images flashed in Wu Chang's eyes. They were memories that didn't belong to him. As Gao Xing's past and present were killed, his control over the altar weakened. More ghosts and survivors escaped from the binding of fate. Branches of fate changed their courses. Gao Xing's anticipated future strayed from the course.

God treated the souls inside his altar as toys. He didn't expect that one day these toys would yank him down from the altar. The influence of this battle was huge. It meant that the old rules had been shaken, and the blood sacrifice failed. The path of fate turned at this moment!

God's eyes found all the Pure Hatred on the battlefield. As they fought, Han Fei mobilized his Pure Hatreds to hunt them down. He didn't even need to release Immortal. More cracks appeared on the ghost territory. After Han Fei consumed two Pure Hatreds, the bond that made up the ghost territory collapsed.

The Pure Hatreds and Lingering Spirits were willing to hunt humans in the dark, but they wouldn't risk dying under the sun. The nature of the battle changed. It was originally a battle between humans and ghosts but now, it was the clashing between two waves of tragedies. Many ghosts thought of retreating. It was fine for the normal ghost but once the Pure Hatreds that formed the ghost territory retreated, the territory that had enveloped Hope City for three days would collapse. None of the Pure Hatred wanted to see that. However, if they didn't escape now, they might not have the chance later.

The blood sacrifice was to celebrate God's birthday. The survivors were fighting because if they didn't, they would die. Their purposes were completely different.

When Han Fei targeted the third Pure Hatred, his target cleverly chose to escape. This caused a chain effect. The ghost territory that had encapsulated Hope City for three days imploded.

"Don't let them go! Every ghost who has stepped into Hope City has to die!" The survivors rarely had to chance to hunt ghosts like this. Han Fei saved them and also returned to them the dignity of being human. All the persona users rushed forward. If they fell, another one would take their places.

The battle was turning around, but overall, the situation was still very chaotic. Hope City was infiltrated by endless ghosts. Many buildings were cursed. Ghosts could be hidden in any room. Murders occurred everywhere.

In a spot no one was paying attention to, several young children climbed up the wall to look at Han Fei, who was chasing away the ghosts. Their faces had a maturity that didn't match their age.

"Our teacher has woken up at least 12 hours earlier than expected. That is not part of the plan." No. 4 sounded like he was complaining, but he also let out a long sigh. "In three days, Hope City's buffer and outer zones have almost fallen. We have collected a lot of blood food. It should be almost enough."

“Almost?” No. 2 stared at Han Fei. “That word shouldn’t exist in our vocabulary. Why did he wake up earlier than planned? Did someone else intervene?”

“Perhaps he has changed his fate so that something went wrong with your calculation.” No. 4 shrugged. “We should prepare to leave, or else we might be captured by him. Once this battle is over, his reputation will rise again. A new world where ghosts and humans could coexist might really come into being under his guidance.”

Seeing how unmoved No. 2 was, No. 4 carried him up directly. “You are used to having your fate grabbed in your hands, but sometimes, I think you should try to trust others, just like... how you were willing to trust No. 0.”

“They are not the same.” No. 2 said, “What if I tell you that one day, one of them will permanently disappear? Will you let him or No. 0 disappear?”

“This question should be answered by them.” No. 4 carried No. 2 away. The ghost territory had been destroyed, so it was the perfect time to leave. They came to a building in the outer zone. They didn’t alert anyone. They moved through the underground tunnel to the basement of the headquarters of Immortal Pharmacy.

The three days of murder created endless souls and flesh. All the sacrifice was guided by ‘God’ to head underground. Among the many broken Gao Xing figurines, there was a new figurine. This figurine had almost fleshy skin. It looked just like Gao Xing. There was a severe cough. The blind boy slowly got up as he saw No. 2 return. The moment he stood up, his face and body slowly changed until he became No. 3.

The study persona, No. 3 had a very normal persona. However, he mastered this persona to the maximum. He could copy any persona and manipulate them better than the original users did.

After the blind boy was killed, No. 3 borrowed Gao Xing’s soul and directed the blood sacrifice. Even if he didn’t participate, the blood sacrifice would happen. They merely directed the sacrifice meant for Gao Xing to Mad Laughter.

“How’s the progress?” No. 2 said with complication.

“There’s still a bit more before we can achieve a flesh body. But come closer and listen.” No. 3 waved at No. 2. Once they got closer, they could hear sound coming from the figurine. It sounded like a madman was laughing. “Millions of people started to trust in No. 0. They based their faith on No. 0. They didn’t want to forget him.”

Being remembered by more people was the most important thing for a God.

“It looks like our teacher has been busy too. He has been using his own method to revive No. 0, this God who might kill him.” No. 4 turned to No. 2. “Do you still insist on your opinion now?”

Chapter 912: A Brand New City

“I’ve never thought teacher is our enemy. In fact, I’ve been helping him. However, I’ll never underestimate the complexity of human nature.” No. 2 didn’t really answer No. 4. He turned to the other kids. “Bring No. 0’s figurine. We need to leave this place. If we’re captured, we might be misunderstood by the other survivors.”

The kids of Class Seven retreated. They were the biggest winner of this battle. The blood on the ground dried. Han Fei led the persona users of the three bases and chased after the Pure Hatreds until they disappeared. It was not that Han Fei didn’t want to consume more of them, but his mind didn’t allow him to control more ghosts. Standing between the old city and the new city, Han Fei’s image was forever branded in everyone’s mind. The survivors in the city never expected reinforcement like Han Fei. They managed to chase the ghosts back. The blood flowed like a river, and dark clouds gathered above them. God was angry, but humans cheered. This was the first time they had turned fate around with their own energy.

“After this, I’ll lead you to take back the things that belong to us.” Han Fei looked down at the city. His ambition burned like fire. In the past, people bowed to the admins of Hope City due to the need for protection. Now they followed Han Fei due to faith. Something within their hearts awakened. The thing made them fearless. It gave them bravery and strength.

“We are not food for ghosts or slaves for big bases. We’ve done everything for ourselves, for our families, and for our children.” Han Fei turned around to address the survivors. “I’ll stand at the forefront until we eliminate these evil threats!”

The abyss and starlight appeared at the same time. Han Fei was powerful enough to give this promise. He didn’t need anyone to die for his purpose. He wanted to protect everyone. His actions spoke louder than actions. He was more convincing than the Hope City admins, who were the first to go into hiding.

The thick clouds that represented the old god were torn apart. Rays of sunlight shone on the battlefield. The battle gave Han Fei an immense increase in reputation. He saved the survivors on his own. Gao Cheng's name gained far more meaning than Gao Xing's. The battle of usurpation officially began. Gao Cheng was slowly walking out of Gao Xing's shadows. Han Fei and all the persona users returned to Hope City. This was the first time humans had returned as the victors. .com

The citizens walked out to the street. They respected their savior a lot. Doors opened. With the admins' invitation, Han Fei entered the core zone of Hope City for the first time. Even during the worst moment of the war, the core zone was not affected. This was the headquarters of Deep Space Tech and the last bastion of humanity's greatest mind. Han Fei contacted Kong Tiancheng in his mind. He wanted to try something which was about to topple the era. Even Fu Sheng had not done this before. The real rules of Hope City waited for Han Fei. They loved and hated Han Fei.

They loved Han Fei because Han Fei resolved the biggest problem they had ever faced. They hated him because Han Fei's appearance shook their power. They were worried that Han Fei would take their power away. A normal persona user wasn't as scary as Han Fei. These admins were used to controlling persona users, but Han Fei was far too powerful for them to control. As Han Fei walked in, some of the political clowns immediately wanted to get to know him, but Han Fei ignored all of them.

The management at Hope City had been sent out to clean up the battlefield and rescue the wounded. Han Fei entered the largest conference room. Han Fei saw the leaders of the three survivor bases.

Hope City was led by a council made up of seven people. Among them was the fighter with eight awakenings, the manager of Deep Space Tech, as well as the master of logistics who handled the food and accommodation of more than 60,000 people. All seven of them were the real power holder in Hope City.

Beside them was the leader of the Tragedy Investigation Center, Li Xue, as well as the two leaders from Freedom Port.

Freedom Port was the port between Xin Lu and the outside world. The two representatives were not simple. The user with two awakenings was the youngest son of the highest leader of Freedom Port. The user with eight awakenings was the guardian of Freedom Port's underground market. Han Fei stood on the other side of the table alone. He looked at everyone. "The danger at Hope City is temporarily over, but a bigger tragedy is coming." He told them about Gao Xing, the fight between ghosts and survivors.

When the actual Gao Xing descended, all the survivors would be killed. If the people present didn't want to be enslaved and killed, they had to stand with Han Fei.

"God will appear on his birthday at the latest. But I hope you can cooperate with me before that and help the New God take over the altar. Then, you'll retain everything you have. I can promise you that." Empty promises had no value. The people in the conference room didn't really care about what Han Fei said. When they were threatened, they would work together, but once the danger was over, they would start fighting each other again.

"You don't need to worry about me. When I'm fully rested, I'll enter the Taboo Building, Immortal Skyscraper alone to destroy the door that connects our world to the ghost's world."

Compared to the ghosts, the admins of Hope City were more worried about Han Fei. He managed to chase the Pure Hatreds away from Hope City on his own. Han Fei's influence among the citizens had far exceeded the admins. Han Fei shook the foundation of their rule. However, they couldn't deal with Han Fei the way they dealt with ghosts. The only way they could deal with Han Fei was to pray that Han Fei would be killed by ghosts.

"But no one has managed to leave the Taboo Building alive before. Are you sure about this?" The representative from Deep Space Tech scanned Han Fei. He saw something about Han Fei that wasn't present in the other rulers. The young man's eyes burned. His ambition couldn't be contained in a city.

"Yes. I can guarantee that I won't get involved in the management of the three bases. However, I need your full cooperation before God's birthday." If the usurpation failed, God's birthday would be everyone's death. He didn't need more time.

"How do you want us to cooperate?" The user with eight awakenings from Hope City finally spoke. He was cautious of Han Fei. They both had eight awakenings, but he knew how much weaker he was compared to Han Fei.

"I will cleanse the mental corruption of everyone. But I need to build the figurine of the New God in the city. I need the faith of all the survivors." Faith was something superfluous. After the representatives had a chat, they signaled Han Fei to continue.

"Secondly, I want to discover a method where both humans and ghosts can coexist."

When Han Fei said that, even Li Xue's expression changed.

"After the tragedy, the hatred between humans and ghosts can't be resolved by a single person. The fear humans have against ghosts is deeply embedded. You're dreaming if you think humans can coexist with ghosts!" The eight awakening persona user from Hope City mocked.

"Ghosts live on living human's fear and negative emotions. The more afraid we are, the happier they'll be. That is how most Pure Hatreds come into being. Furthermore, not all ghosts are mindless. Some of them still retain their living memory. They are not so different from you and me!" Han Fei's abyss opened slightly.

Everyone in the meeting room became guarded. "What are you doing?" "I'm going to have you meet a few ghosts." Han Fei released Kong Tiancheng's soul. Then he let out a few black merchants and finally a few souls who were related to the Hope City admins.

He had been preparing for this. He had the black merchants find these ghosts and protect them.

"The ghosts you hate so much were once the people you love."

Chapter 913: God's Weakness

Han Fei didn't want any infighting. He wanted to focus all his power on fighting Gao Xing. Han Fei had Kong Tiancheng talk to everyone. As the admin of Deep Space Tech, Kong Tiancheng knew the tragedy very well. Actually, when Kong Tiancheng appeared, the representative from Deep Space Tech was already nervous. He knew how important Kong Tiancheng was to Deep Space Tech. With communication from Kong Tiancheng, a few admins relaxed, but most were still guarded.

We can't agree to your second request. Hope City will not change. An elder from Hope City said clearly. The others nodded.

I don't need to change. I'll save more people in Zone A and prove to you that this method works. Han Fei didn't give up. His main goal was still his first goal. He was actually ready for his second goal to be rejected. However, that was exactly how negotiation worked. He threw out one easy and one hard request. Once one was rejected, there was a higher chance for the other to be accepted. Reviving Mad Laughter was the most important. The coexistence between ghosts and humans was something Han Fei

needed to explore further. Whether the usurpation was successful or not, this altar world would change. Han Fei wanted to plant the seed in this limited time to change this worst future.

For Han Fei and the kids of Class Seven, this city was just the altar world, but for the souls living here, this was their everything.

You're afraid of ghosts now because you're too weak. The unevenness of strength makes you unsure. Han Fei activated masterful acting. He started the new topic. The meeting lasted for three hours. Han Fei gained everything he wanted. Mad Laughters figurine would be placed inside the three survivor bases. Han Fei could also lead the survivors to launch retaliation against the ghosts before God's birthday. The bloody war woke up all the survivors. The Evil God they worshiped didn't plan to let them go. He only treated them as livestock. Because of that, more and more people wanted to follow Han Fei to fight the ghosts. Some of the persona users even decided to leave the safe Hope City and join the center. The power of the three bases changed. The fourth largest base in Zone A became more well-known as well. The base where humans and ghosts coexisted became the topic of conversation for many survivors. Han Fei didn't leave Hope City after the war to heal the wounded. The survivors needed to pay a hefty price or sacrifice their bodies. They only needed to give faith in the New God. A lot of survivors entered Hope City. Han Fei's healing persona became stronger as he healed more people. At first, he didn't feel any changes, but after a few days, his healing persona reached another new stage. However, the strange thing was the healing persona's breakthrough didn't trigger any system notification. It felt like this power belonged to Han Fei and had nothing to do with the black box.

While Han Fei was doing this, the admins of Hope City were worried. Han Fei's appearance brought two most precious things to the citizens of Hope City, safety and health. Mental corruption, which troubled the tragedy researchers, was cleansed by Han Fei so easily. With just that, Han Fei could turn Hope City around. To chase Han Fei away, the Hope City admins gave in to many of Han Fei's simpler requests. They personally prepared the resources for Han Fei. They only had one goal, which was to get Han Fei out of Hope City as soon as possible.

Han Fei knew what the admins were up to. They didn't want to get into an argument with them either so he played along. Han Fei brought along the resources Hope City prepared for him. He entered the city dominated by ghosts on the third day of the battle. He returned to Third Optometrist Hospital. Han Fei stopped by Gao Cheng's secret base. When he first came here, he couldn't even retain his rationality, much less use any ghosts' power. He almost died, but he had come a long way since then. The cars of the three bases surrounded the hospital. There were more than 100 persona users for Han Fei to order. There were even users with eight awakenings. Other than these people, Han Fei had his own following. Most of them were persona users Han Fei saved on the battlefield. Ill break the ghost territory. Don't go in without me. Han Fei always led the way. As long as he was there, no one would back off. Without even knowing it, the fighting spirit of Han Fei's following had surpassed that of the center. Pure Hatred tore open the ghost territory of Third Optometrist Hospital. Han Fei had the rest stay outside the

hospital while he entered it alone. The hospital was an important locale for both Gao Cheng and Gao Xing. Their fates were exchanged here.

Gao Cheng's emotions were raging. All his memories turned red. The familiar sight reminded Gao Cheng of many things. Han Fei was affected as well. Blood filled his sight, and then some other colors followed. The images cleared. It symbolized the blind regaining his sight.

While these memories appeared, a soul-wrenching yell came from deep inside Third Optometrist Hospital. All the medical devices bled. Curses entered the hospital. The world in Han Fei's eyes twisted. Everything inside Third Optometrist Hospital turned into monsters that wanted to harm Han Fei. A poisonous worm crawled out of an apple. The pills turned into white pupils. Two arms grew out of the scalpel. Even the pictures grinned wickedly. Everything was filled with sins. Everything was his enemy. This appears to be the world in Gao Xing's eyes. He was tricked by his parents into surrendering his eyes to another kid. Gao Xing couldn't trust anything anymore. He was too young to do anything. Everything bullied him, and he had nowhere else to run. The world was huge, but his world was so small.

The straps became arms. The surgical tables grew teeth. With God watching, the monsters inside the hospital charged at Han Fei.

Deep Sea Aquarium has Gao Xing's regret, and Gu Yang Tian Nian Home has Gao Xing's hope, so what is hidden here? Why would Gao Xing's wife say that his weakness is here?

Han Fei used the black band to contact the people out. All the persona users used their power to weaken the ghost territory of the hospital. Han Fei also opened the greed abyss to summon several Pure Hatreds. The tragedy that befell Gao Xing was about to occur again. The screams that came from deep inside the hospital became clearer. It sounded like a man struggling for his life.

Normally, a Top Pure Hatred will be hiding inside a Taboo Building, but Third Optometrist Hospital appears to be quite unique. Han Fei reached into his pocket to pull out two fake eyes. One was taken out by Gao Cheng from this building a long time ago, and the other was given to him by Ghost Mother. Since the scream appeared, the two eyes started to bleed. The eyes were filled with sadness.

Gao Cheng's fake eyes are related to this hospital too. The Pure Hatred here doesn't seem to be fully under Gao Xing's control. It has helped Gao Cheng too. With Gao Cheng's capability back then, he couldn't have brought a cursed object out of a Taboo Building unless someone was helping him.

The screams came from Surgical Room Three. Is there where they switched eyes?

Chapter 914: Regret and Guilt

Third Optometrist Hospital was different from all the Taboo Buildings Han Fei had encountered before. This building was twisted by malice. This was like a world imagined by a blind kid. Everything was different from what it should be. They became scary. Most areas were covered by darkness. There were bits of light at the edges, but when a person tried to get close to the lights, the lights would be dragged into the shadows. The scene outside the hospital window was special too. One side was blurrily red, while the other was covered in chaotic darkness. The different sceneries seemed to represent the sight of the two children on the operating table.

With the Pure Hatreds help, Han Fei walked down the winding corridor and came to Surgical Room Three. Compared to the other rooms, this surgical room was the most normal. It retained the medical devices and equipment a surgical room should have. At least, that was the case on the surface. Screams came from the surgical room. The tortured souls cried for help, but no one was willing to help them. Gods eyes dripped with blood. Gao Cheng appeared to be familiar with the screams inside the room. His emotion was affected as well.

Is it not Gao Xing on the surgical table? Han Fei entered the surgical room. With each of his step, everything around him became larger. Before the cold devices, he appeared so small. This was what Gao Xing once saw. The world was evil towards Han Fei. Everything wanted to kill him. Without the protection of the Pure Hatreds, Han Fei wouldnt escape from this place unscathed. Pulling back the curtain of the inner room, Han Fei saw something that chilled him to his core.

A pair of blind old couple was tied to the table. Their bodies had grown to join with the hospital. All the devices moved on their own as they shoved different scary things into the couples eyes. After the tragedy, the hospital continued to work like normal. However, there were only two patients, and they were Gao Xings adopted parents. They kept having ocular operations. The screams were endless. The blood froze on their faces. The fear and hatred in their hearts were absorbed and then pumped underground.

Are they his parents?

Gao Cheng didnt have much impression of his birth parents. He had been staying with Gao Xings birth parents. Gao Xing became a complete monster and hated this pair of thieves who stole his fate. Han Fei moved to the table and looked into the couples eye sockets. There was no light but endless stain and sin. Gao Xing turned his parents into a trash site. He turned his parents eyes into prisons to trap his enemies. Such madness. Han Fei had no idea how insane a person must be to come up with something like this. Han Fei took out Rest in Peace to cut off the straps on the couple. He was about to reach out

toward them when the husband and wife suddenly turned around. They had no eyes. Their empty holes looked at Han Fei. novel.com

Gao Cheng? The blind mother appeared to know who had appeared. Blood tears leaked out of her eyes. The blind father also recognized this name other parents had given his own child.

Go. Dont come here. The blind mothers voice shook. She didnt even know what her child looked like before she died.

Im here to save you. Han Fei reached out to the couple. However, before his fingers could touch them, their bodies started to melt. The icy surgical tables sunk. Even without the straps, they didnt leave the tables.

You Han Fei understood one thing then. The couple was not bound there by Gao Xing. Even if they were given freedom, they would choose to stay to receive Gao Xings torment.

You dont need to save us. Leave. This is not where you should be. The blind father spoke. He was uneducated, and his body was deformed. Weve done too many wrong things. Weve ruined our beloved child. We need to atone. With the couple cooperating, the two surgical tables started to collapse. They were like two dark eye sockets or endless wells. The blind couple sunk with the surgical tables. Gao Cheng wanted to change the rules. Gods eyes looked at the surgical tables and lit up the underground of the hospital. The dead black capillaries bound together. The blood capillaries were inserted into different monsters. In Gao Xings tragic life, there were many people who bullied him. After he became an Unmentionable, those who bullied him became his targets of torment. Third Optometrist Hospital was a prison for the sinners. No one maintained their human forms underneath the hospital. It was their fault that Gao Xing was no longer human.

Gao Xing trapped everyone who ruined his life. He was inhuman and crazy. Since many people called him an animal, then he would give up being human. He would let those people see what kind of animal he was. Gao Xing was crazy, and he didnt disguise it. He looked down on Butterflys trickery. He wanted to be feared and filled the world with evil. The capillaries sucked out the blood from the monsters and pumped them with black juices. As the surgical tables sunk underground, the real appearance of the Third Optometrist Hospital was revealed.

The dead capillaries bound together to form two giant eye sockets underground. The blind parents lay in the center of each one. No one was able to leave. They would experience pain forever. Hatred exuded from each monster and flowed back to the couple. Carrying regret and guilt, the twos bodies were

broken down. The blood expanded in the socket and formed a pair of red eyes underground. When they were alive, Gao Xing was their eyes, and after death, the blind parents became Gao Xing's eyes. All the sins and evils were hidden in this pair of eyes. Those viewed by the eyes would have their inner sin released. Those without strong constitutions would be controlled with just one glance.

I can understand why you're doing this. If there's someone who's still siding with Gao Xing, it's the both of you. Han Fei took out the two fake eyes. I'm just curious about one thing. Did Gao Cheng eventually use Gao Xing's eyes? How could a blind child grow up to become the founder of the three largest criminal organizations in Xin Lu?

Han Fei's question went unanswered. The pair of red eyes stared at Han Fei with hostility. Perhaps we all deserve a better ending.

Han Fei's world of sins enveloped the hospital. He looked at God's eyes. Gao Cheng, this is between you and your birth parents. You can handle this whichever way you want.

God's eyes from Deep Sea Aquarium and the eyes formed from the blind parents stared at each other. Currently, the scene was cut into two. One half was red, and the other was dark; one half was regret, and the other was despair; one half was the parents' determination, and the other was God's hesitation.

With Pure Hatred's protection, Han Fei entered the hospital underground. Every monster trapped there represented one of Gao Xing's painful past. Walking through it was like a review of Gao Xing's tragic life. He had never experienced love since he was born. Due to his blind parents, he was bullied and ostracized by his peers. Even when he was bullied, he didn't say anything because he didn't want his parents to worry. He didn't do anything, and he couldn't change anything. On that old street, his family was bullied by others. His dignity was worth nothing. Even if he was bullied, he needed to apologize to others with his parents. Living was never something that made him happy. His only hope was to grow up. Everything around him was oppressive. He wanted to escape, but his parents were like two chains binding him to the old, dirty street.

Through the monsters, Han Fei saw the various incidents Gao Xing had experienced when he was young. His twisted childhood was the main reason Gao Xing became a monster. Han Fei walked deeper under he saw a doctor at the deepest part of the underground hospital.

Are you the doctor who swapped Gao Xing and Gao Cheng's eyes? Han Fei cut off the blood capillaries and released the doctor.

The surgery couldn't succeed. I've said that many times. The doctor's eyes had been dug out. He didn't know who had arrived.

Chapter 915: Out of Love

So does Gao Cheng have Gao Xing's eyes or not? Han Fei picked up the doctor and cleansed his mental corruption. When he realized the doctor was still incommunicable, he used Soul-depth Touch. The darkest fear within the doctor was from surgery. Han Fei immersed himself in it.

Inside the office, the doctor explained to Gao Xing and Gao Cheng's parents again, The eyes are a very complicated organ. Once the nerves are cut off, it's basically impossible to heal. The capillaries on them are thinner than hair. The biggest thing we can do is to replace the broken parts with something else so that he could see at least blurrily.

What are the chances of my child regaining his sight? The woman gripped her hands tightly. She had been preparing a long time for this day.

There's still a chance. The doctor didn't look at the blind parents. He only focused on the rich woman. The flowery perfume of the woman made the blind couple feel uncomfortable. They were very nervous.

The best solution is to do a temporary transplant surgery. If you agree, please sign here. The doctor personally poured the rich woman a cup of hot tea. There was not even a cup before the blind couple. You can trust me. I won't earn one extra dime from you. Plus, there's no one else in this city that would do such a dangerous surgery.

But the price is to cost another child to lose his sight and the success rate is so low

The woman wanted to say no when the doctor took out another document. The chance of finding a child who has eyes compatible with your son is one in a million. Plus, this surgery is no longer possible when your son is older. Even if you don't like it, you have to consider your son. The world is so beautiful. Do you really want your son to be blind permanently?

But you never told me that the eyes would come from another living child! The woman put the contract away. I thought it would come from a donor but I've seen that boy at the aquarium. He's perfectly healthy!

His parents have already agreed. Why wont you? The doctor mocked the blind couple. They need the money and you need the eyes. Its a fair trade.

The door suddenly opened. A man in a branded coat hurried in. When the woman saw the man, she seemed to have found support. She told the man everything the doctor said. On the surface, the man supported his wife but after the wife left, the man didnt hesitate to sign the contract. Gao Chengs mothers kindness was that she didnt want to take away the light from a stranger while Gao Chengs fathers kindness was to give the doctor and the blind doctor more money. Once the contract was signed, the doctors soul cracked. Han Fei used the healing persona to stabilize it. Once the surgery started, Han Feis question was solved as well. Due to many different reasons, the transplant surgery didnt happen for both eyes at once. The doctor swapped one eye only. It wasnt considered a success or a failure either. Gao Cheng didnt recover his sight. He could only see blurry shadows at first. The fates of the two children intertwined. After the woman knew the truth, she stopped the surgery for the second eye. Then, the nightmare began for everyone.

The doctors daughter was splashed in the face with acid one day she went home from school. Her eyes were injured. The neighbors who once bullied the blind parents had their houses set on fire. The students who mocked Gao Xing at school disappeared. As time progressed, scarier things occurred. It was not until the blind parents were killed by thieves that the tragedy stopped for a moment.

During the last memory of the doctor, Han Fei saw the woman holding two missing person reports. Both Gao Cheng and Gao Xing were missing.

Other than Gao Xings birth mother, no one cares about him.

The only person who treated Gao Xing well was his birth mother. No wonder Gao Xing is so desperate for his mothers love. He is now a ghost feared by everyone. He can force everyone to fear him, but he cant force others to love him.

Han Fei walked among the dead blood vessels. Gods Eyes fought with Gao Chengs birth parents. The two pairs of eyes collided, and the entire world shook. The blind parents drew power from the Taboo Building. This meant that Han Fei very successfully came to the hospitals lowest level. Deep inside the layers of capillaries, there was the dead body of a child. It looked around five or six. His body was covered in wounds. All the black capillaries came out of this child. Its mottled face looked up into the sky. Han Fei noticed the child looked very similar to the picture of the boy in the missing persons report.

Is this the young Gao Xing? The blind parents were not protecting the adult Gao Xing but the child that they raised. Their guilt was because of this dead body. After all, they ruined this child's life.

Han Fei walked to the boy's body. He used Soul-Depth Touch and touched the boy's hand. The child underneath Third Optometrist Hospital was Gao Xing's abandoned humanity. It contained his kindness, fear, weakness, and some love.

Is this Gao Xing's weakness?

Han Fei picked up the boy. A lot of black capillaries crawled out of the boy. They wanted to dig into Han Fei's eyes. The blind parents felt something. They abandoned fighting Gao Cheng and rushed at Han Fei.

I've once entered Mirror God's altar world. Every Unmentionable will move the key moment of their life into the altar. For Gao Xing, the hospital is where his life changed. Han Fei cut off the blood capillaries and placed the blade on the boy's neck. If I destroy this body, the hospital will crumble. However, Gao Xing will forever lose his sense of weakness, fear, and love. After a moment's hesitation, Han Fei opened the greed abyss. He stood under the healing starlight and looked at the blind couple. You are Gao Cheng's birth parents. I don't want to see blood kins fight each other. Give up and surrender. Han Fei pressed the blade down, and blood oozed out of the boy's neck. If you continue to struggle, I'll destroy this boy's body, and then I'll destroy the both of you.

Several Pure Hatreds surrounded Han Fei. He had the backing to say something like that. The bloodred eyes formed by the blind parents dulled. Han Fei used the boy as bait and drew the blind couple into the abyss.

Notification for Player 0000! You've unlocked Top Pure Hatred, Guilt, and Regret.

Guilt and Regret: The meaning of our existence is to atone. We regret everything we did to you. We are ashamed of our selfishness. We're the worst parents in the world. I'm sorry, my child.

The eyes were called guilt and regret respectively. They were made from the atonement of the sinners. Some of them did horrible things to Gao Xing. Others were tricked by Gao Xing into believing that they had sinned.

Gao Cheng didnt know how to face his blind parents. They were his birth parents, but he didnt have any good impression of them. In Gao Chengs heart, he only had one mother, and that was the woman who told him how beautiful the world was and gave him all the love. Actually, this was punishment for the blind parents. Their greed turned them into the saddest people.

No matter what, they are your birth parents. You should explain everything to them. Han Fei communicated with Gao Cheng. To improve Gods eyes, the best solution was to absorb the two red eyes. If that were successful, Han Fei would get closer to the ninth awakening and break the limitation set by God. Gao Cheng knew that usurpation had reached a critical moment. He had to convince his birth parents. Gods eyes slowly approached the dissolving blood-red eyes. The family reunited. Han Fei didnt interrupt Gao Cheng. After he swallowed Third Optometrist Hospital, he led Pure Hatred to study the boys body.

With Tong Xins help, Han Fei successfully pulled out Gao Xings weakness, fear, and kindness. The boys body turned into ash, and only an ashy heart remained.

Chapter 916: Group Photo

Notification for Player 0000! Youve obtained Gao Xings weakness. You can only use this once. Be careful.

Gao Xings weakness: Inside this heart abandoned by him a long time ago hides the thing he doesnt want to face.

Han Fei handed Gao Xings fear to Immortal so that Gao Xing would feel fear when he faced Immortal. Han Fei handed Gao Xings weakness to Gao Cheng so that hed reveal his weakness before Gao Cheng. Lastly, Han Fei dissolved Gao Xings kindness with Rest in Peace. The three emotions came from Gao Xing. In the future, they might come into play when fighting Gao Xing. As for the heart, Han Fei tried many methods but couldnt draw the emotions out. With no other choice, Han Fei put the grey heart away for now. Ive found Gao Xings weakness. Its time to head to the Taboo Building. The three Strange Buildings had been taken down by Han Fei. He was at the edge of the ninth awakening. As the strongest survivor after the tragedy, Han Fei was ready to find the source of the tragedy.

The altar world represented the worst future. Everything here could happen in real life. If he could investigate everything clearly, it meant that he would know the future.

Gao Cheng still hadnt resolved everything with his blind parents. In the meantime, Han Fei planned to collect the resources of the three survivor bases to start the final birthday party.

With the promotion from the center, most survivors knew that Han Fei was going to the Taboo Building. Han Fei didn't mind sacrificing his life for humanity's future. His reputation rose again. Pressured by the public, Hope City and Freedom Port was forced to support Han Fei. Every survivor united to face Gao Xing. They were led by Han Fei.

In the next five days, Han Fei and several other awakening users worked together to sweep through the city to chase away the ghosts. At first, everyone expected Han Fei, who promoted coexistence between humans and ghosts would go easy on the ghosts, but he didn't hold back at all. Pure Hatreds who followed the Old God were killed mercilessly. Pure Hatred with special powers was eaten. As more Pure Hatreds were trapped inside the abyss, Han Fei's mental realm became scarier than the city. With food provided by Han Fei, the Executioner and Wu Chang grew to gain black flame. To Han Fei's surprise, after completing Wu Chang's mission, he could bring this ghost out of the altar world!

Five days of the massacre gave the survivors a lot of morale. Many ghosts went into hiding. That was impossible to imagine in the past.

All the ghosts in Zone C have been chased away. Pure Hatred in Zone B has been hunted down. Pure Hatreds in Zone A have retreated to the center zone. They are afraid! Dong Quan reported to Han Fei. Ever since the tragedy, they had never been so happy.

We can stop now. Han Fei sitting on Big Sin carried a paper doll.

Stop? Dong Quan said with confusion, Now is the time to strike! We're just one step away from taking back the city! If we can take back the center, in the future

We shouldn't be concerned about the future. Han Fei interrupted Dong Quan. God's birthday is in three days. Once the Old God returns, he can kill us easily. The killing for the past five days is to collect faith and energy. The real duel is going to start then.

Ah Nian, who followed behind Dong Quan, patted the latter's shoulder, Ghosts can't be killed fully. There's a path underneath Immortal Skyscraper. If we don't close it, ghosts will keep on coming.

A path?

Ah Nian noticed Dong Quans confusion, but he didnt explain. He said casually, This is a battle between the Old God and New God. Were just the pieces on the board. After he said that, he handed a map to Han Fei. Leader, weve destroyed all of Gao Xings figurines. Altars of the New God have been set up in all the human bases. Plus, with how youve cleansed everyones mental corruption for free, there are already more than ten thousand survivors who believe in New God. The influence has reached beyond the city outside of Xin Lu.

Have there been any changes to the figurines? Han Fei was very satisfied.

The two figurines at Sky Garden and Hope City have fully fleshified. To prevent them from scaring people, we have built altars to cover them. Other than that, more voices came from the figurines. The New God is getting close to us. Ah Nian became Han Feis most loyal follower. In the past, he only thought Han Fei was a good person, but as he spent more time with him, he realized the world could only improve with Han Fei leading it.

Han Fei nodded. He also started to hear Mad Laughter in his mind. His effort was getting repaid. Gao Xings last altar is hidden inside Immortal Skyscraper. We need to destroy it before his birthday. On that day, Mad Laughter has to be the only God alive in this world. (f)ree

Right. The God Carcass you fished out of the blood lake in the orphanage has been found by the survivors. Ah Nian reminded Han Fei.

Where is it now?

Its with the kids of Class Seven. Someone saw the kids without the legs talking to it. He seems to be able to control the carcass. Ah Nian hesitated. Do we really dont need to control the kids of Class Seven? They are at least your students. I hear they are planning to go to the Taboo Building too

Ill have a chat with them. Han Fei didnt know what No. 2 was planning. He planned to shoulder all the difficulties, but the kids still hadnt fully trusted him. It was not because they thought Han Fei would betray him but because they thought Han Fei couldnt complete the usurpation on his own.

Is there anything else? Since Ah Nian and Dong Quan didnt leave, Han Fei asked. Ah Nian reached into his pocket. There were blind date invitations from the admins of several human bases. They wanted to use this primitive method to bind Han Fei with benefits. Some of the girls were very nice, but when Ah

Nian saw Han Fei hugging the paper doll, he was too ashamed to take the invitations out. Who would have thought that Han Fei actually loved paper dolls?

Its nothing. Dong Quan and Ah Nian left the room. Han Fei put Rest in Peace aside. He looked at the face of the red paper doll. Gao Xings altar world moved him a lot. He knew the basic difference between Pure Hatred and Unmentionable. Pure Hatred needed to turn their obsessions into a world to become Unmentionable. Xu Qin was a source of curses. As long as she found enough curses, it shouldnt be hard for her to control her world of curses.

Han Fei had been helping out. He sucked all the curses he found into the world of sins so that they could be eaten by the doll. The doll now had an impressive number of curses. When Han Fei left the altar world, all the curses would go into Xu Qin and become part of her. Han Feis idea was romance was to present her with all the curses in the world.

The greed abyss has been filled with Pure Hatred. Red eyes and Gods Eyes are merging. Theres no need to wait anymore. Han Fei sat on Big Sin and headed to school. It was here Han Fei and the kids of Class Seven first awakened. No. 5 sneaked a message to Han Fei and decided to meet with Han Fei there.

The school had been destroyed. The field was overgrown. There were no more students about. Han Fei went into Class Seven and stood on the podium. The kids werent there, but a letter was placed on every table. The letter recorded the words the kids wanted to tell Han Fei.

When you read this letter, were probably inside the Taboo Building already. We cant escape certain things. Fate has given the answer a long time ago

Han Fei collected all the letters. The letters were not simple stationery. Every word on them contained some kind of power. They surrounded Han Fei. After reading all the letters, the image of all the kids appeared in Han Feis mind. He took out the Grade C Cursed Item, Group Photo from his inventory.

The human faces in the picture changed. The item fully belonged to Han Fei now.

Ill protect all of you. After we leave this place, well take another group picture.

Chapter 917: Han Fei, Researcher

Han Fei and Big Sin left the school. They came to Sky Garden and found Gao Xings wife. Gao Xings wife temporarily escaped Gao Xings control too. Han Fei hoped she would accompany him to the Taboo Building. Gao Xings wife was different from the other Pure Hatreds inside the altar. She existed in real life and knew Gao Xing very well.

Gao Xing forbade me from going there. I also dont know whats inside. However, I hear that you cant survive there without power. Immortal Skyscraper has their own rules. Those who dont follow the rules will be killed. Gao Xings wife kindly rejected Han Fei. Gao Xings birth mother might be there. She is more important to him than I am. Therefore, theres no need for me to accompany you.

Theres still three more days to Gao Xings birthday. If he successfully returns, well all die. Youll lose your freedom and continue to be tortured. Han Fei didnt even use Cursed Words. We need to give it our all to complete the usurpation. This is our last chance. It took Han Fei a long time to convince Han Fei. After they decided on the rules, Gao Xings wife finally agreed.

After he got the first member, Han Fei went to find Fu Lie and Ah Nian. They had both escaped from Immortal Skyscraper, so they knew something of it. They knew of the dangers inside the building, but they agreed to join Han Fei. That night, Han Fei and the persona users of the three bases entered the center of Zone A. They cut a bloody path to Immortal Skyscraper. The survivors moved Mad Laughters altar to the front door of Immortal Skyscraper. The figurine gave everyone hope. After I shatter Gao Xings last altar, Mad Laughter will become the New God here.

Han Fei stood before Immortal Skyscraper. Behind him stood Fu Lie, Ah Nian, and a woman who was wrapped in a black robe. Immortal Skyscraper was different from other buildings. The whole building was like a giant altar. It was protected by a unique force. Outsiders couldnt detect anything inside. To find out more, one had to enter it. Several persona users cooperated to shatter the front door. It was fully dark inside the building. There was not even the shadow of a ghost.

No one can leave this building alive, but I hope youre an exception. Li Xue walked out of the car. The center will guard this place until Gods birthday.

It shouldnt take that long. Han Fei and three members walked forward. Currently, the sky was red, signaling how angry God was.

Enter the building! The moment they crossed the threshold, they saw a God standing facing away from them inside the lobby. This presence stunned everyone and everyone paused at the same time. God started to turn around. When they were about to see Gods face, all the power the members gained

within the altar world was taken away, and they were randomly teleported to different rooms. Everything happened too quickly. Before they could react, the team was separated.

Notification for Player 0000! Youve triggered Grade C Main MissionWorst Day!

Worst Day: This is the worst day of your life, and you need to survive!

Youve entered Gods taboo zone. God has taken back the power youve gained in the altar world, and youre given the lowest compensation! Only by destroying the figurines inside the building can you regain your power!

Mission 1: Destroy as many figurines inside Immortal Skyscraper as you can find.

Mission 2: Gods last altar is hidden on the 19th floor. Destroy it, and you will find an escape!

Mission 3: The time has been frozen to the day before the tragedy. This is the best day for God and the worst day for humanity. The truth you want to know is hidden in these 24 hours. This is the last chance you have to find out the truth.

The system woke Han Fei up immediately. He wanted to enter his mental realm but realized he was blocked. Not only that, his persona was corrupted as well.

Gao Xing is a living Unmentionable. Hes still controlling the altar. He can take back everything inside the altar unless hes killed! Han Fei suddenly understood why No. 2 didnt want him to pursue absolute strength. They knew the rules of the altar from the start. Everything he had gathered became food for God. The feeling was horrible. Han Fei could imagine how horrible the people who entered the Taboo Building felt.

No wonder nobody has been able to leave this place alive. This is a trap placed by Gao Xing to reap the survivors standing at the top of the altar world Han Fei didnt give up. He thought back to the mission hints. He discovered something important. After his power was taken away, he would be compensated at the lowest level.

My persona power was at the limit of the altar world. I should be compensated. Han Fei looked around. He was standing inside a resting room. There were lab coats on the wall. There was a computer and an ID card on the table. When Han Fei picked up the card, Han Fei's current info appeared on the card: Latest Immortal Pharma Grade F Researcher. Kind and gentle. Weak research ability and no special power. Immediately, Han Fei got the immediate system notification.

Notification for Player 0000. Your ability to use the eighth awakening power has been removed, instead, you're given a mutated power. Tong Xin has been taken away. Temporarily you've been given passive ability, high-level research, and you can understand all the language in the taboo zone. Immortal has been taken away. You are given five extra lives. White Hair has been taken away. Your inventory has been expanded.

Han Fei had prepared a lot for the final battle. He led the survivors and hunted all the Pure Hatreds in the past five days. He was able to collect almost 30 Pure Hatreds in his abyss. No one was able to do what Han Fei did. He brought more than 20 Pure Hatreds into Immortal Skyscraper. Even if God had taken Han Fei's control of Pure Hatred away, the system had to compensate him quite a bit for the loss of more than 20 Pure Hatreds. After the system notification ended, Han Fei looked at the ID again. His info had been edited.

Immortal Pharma Grade A+ researcher. He is kind and gentle with extremely strong research energy. He is highly adaptive to different environments. San Value has reached the maximum limit possible. He has super strong luck and charm. He has an expanded backpack, the night patrol map for the test zone, Grade A research member card. He knows how to operate all the equipment. Each Pure Hatred provided Han Fei with one or two special powers. He also still had Rest in Peace, a cursed photo, and a paper doll.

The key point was Han Fei's healing persona wasn't a gift from God. He could sense the existence of the healing persona. His persona was fighting for control with some other power.

A normal persona user with eight awakenings would only get around 3 abilities when they get in here. Is this considered some kind of bug? Han Fei picked up the lab record on the table to read.

x Month x Day, Thursday, 8.01 am. Everything is running fine in Perfect Life. The 11000 candidates we've picked out are fine as well.

Immortal Project has successfully entered the second phase. We'll start the first attempt to guide the individuals wandering in Perfect Life into a new body!

Only Grade A researchers could read this confidential info. Immortal Pharma had been pursuing immortality. They sent the consciousness of the dead into Perfect Life for them to become NPC. Among them included billionaires with cancer, volunteers, and so on. The first phase of the Immortal Project succeeded, but no one really knew anything. Then, they planned to guide the consciousness of the dead into brand-new bodies.

Han Fei glanced at the electronic screen. The time was 9.15 am. He was about to leave the room when the siren rang. Red lights shone in the lobby. At the same time, Han Fei received a notice on his computer.

x Month x Day, Thursday, 9.40 am. Perfect Life is running like usual. Three focused candidates have died in the process! Seven are experiencing anomalies! The first guidance failed! All free researchers, head to Lab 2 now!

The nightmare no one expected happened during the second phase of the Immortal Project. The souls and consciousness that entered the new bodies didn't come from the dead inside Perfect Life but something much more sinister.

Chapter 918: Discovery

The email required all the free researchers to head to Lab No. 2. The worst day started at this moment. Han Fei took out the night patrol map. Lab No. 2 was located underground. It was mainly used to tell the interaction between the supercomputer and human consciousness. It was built by Deep Space Tech and Immortal Pharma. The altar is hidden on the 19th floor. My first goal is to destroy the altar. Along the way, I need to destroy Gao Xing's altar to regain my strength and finally uncover the truth.

Han Fei looked around the map. Immortal Skyscraper had 33 floors aboveground and 18 floors underground. If the system is not wrong, the altar should be upstairs. But what if the map is wrong?

Han Fei had much experience exploring altar worlds. Most altars would be deeply hidden. It wouldn't be placed in the open.

The siren continued to ring. Before Han Fei could come to a decision, footsteps came from the corridor outside. Then, the door opened. Han Fei turned around to look. A serious-looking middle-aged man stood at the door. He wanted to scold Han Fei, but when he saw the Grade A+ Id Han Fei had, his attitude shifted immediately. There's a problem with the second stage of Immortal Project. Everyone is being summoned. I was worried that you didn't receive the mail, so I came to inform you.

Are you sure its a human summoning us? Han Fei stunned the man.

What do you mean?

Is there a possibility that its something else who summoned us? Han Fei stared at the man until the latter shivered.

I have no idea what youre talking about. I came to relay the messages from the superior. I hope you can go there now. The man said and left. Han Fei cleaned up all the things in the room. He ate and left. The room he was in was in the second-floor basement. Due to the confidential contract he had signed with Immortal Pharma, he couldnt leave the building before the project was a success.

The corridor was filled with cameras. There were locks every few meters. The underground of Immortal Skyscraper was like a giant prison. This place was worse than a horror movie. Immortal Pharma seemed to be afraid that the thing from underground would escape and set up all these layers.

Do they need this kind of defense if its just a brain experiment?

Han Fei had just turned the corner when the middle-aged man he had seen earlier appeared again. The man looked as serious as before, like he had just met Han Fei. Hello. Theres an issue with the second stage of Project Immortal. The leaders require all the researchers to head to Lab No. 2. The man had the same message and tone. He held a red document.

You Han Fei looked at the man. He didnt change, but something was off about him. Han Fei couldnt pinpoint it, but it was weird. The problem with the second stage is very serious. You need to hurry over. The man urged Han Fei again. He took the document and headed to another lab resting room.

Havent I met him earlier? If the man earlier was also real, then what was this? Han Fei took out Rest in Peace and silently tailed the man. The man seemed to only repeat the same words. He knocked on every door and reminded all the researchers to gather.

What is wrong Han Fei soon realized the problem. Han Fei ambushed the man and took him down in just a few seconds. Dont move!

Han Fei had a special analytical method. He cut the mans arm. The blinding light sliced the mans skin, but the strange thing was the mans wound didnt bleed. After he knew that he had been exposed, a powerful force exploded from within the man. There was another face hidden inside his mouth. The new face was rapidly growing. There were not many researchers who could fight as Han Fei did. Normally, they wouldnt bring a butchers knife to work either.

The middle-aged man didnt expect Han Fei to be so strong. He had just raised his hands as his head fell to the ground. The waving hands reached toward his neck. The mans neck had no blood or flesh. Instead, there was a pattern that looked like a tree ring. The fallen head revealed a scared expression and screamed. However, its voice didnt appear to be able to be heard by human ears.

Han Fei ran towards the head. However, after he turned a corner, the head disappeared. Even Han Fei, with the hide and seek talent, couldnt find it. That was definitely not human. What is Immortal Pharma experimenting here?

Han Fei retraced his step and returned to the spot where he fought the middle-aged man. The dead body on the ground had already disappeared, and only some broken pieces remained. Looking at the claw marks among the pieces, Han Fei frowned. Was the body eaten by some giant beast?

Immortal Skyscraper was the place closest to reality. The building repeated the day Gao Xing was most excited about. Everything here would happen in reality. In other words, the strange experiments were being carried out by Immortal Pharma in real life too. It turns out real life is scarier than the cryptic world. Most people merely dont know about it. Han Fei picked up the red document. It recorded the info of many researchers, and it contained their pictures. However, some of the pictures looked strange. The siren became more intense. Han Fei didnt take the elevator. Out of habit, he took the stairs. Han Fei broke the lock and realized there was no road behind the door but a thick metallic slab. Is there no path here, or was the path sealed due to the emergency? Han Fei had no choice but to head to the elevator lobby. There were already people waiting there. He silently memorized the faces of everyone. Most of them are normal. The elevator opened. The researchers rushed in. Only Han Fei stayed outside.

Get in! Dont waste time! Someone waved at Han Fei impatiently. Someone even wanted to yank Han Fei into the elevator booth. I forgot to take an important lab record. Han Fei turned and ran. He only paused when he heard the door close. He turned around to look. The number on the elevator panel changed rapidly. In an instant, it went from negative two to negative eighteen.

Lab No. 2 is at the second-floor basement. Why is it going to the eighteenth floor? Or is something summoning them there? The other elevator opened, and a chilling breeze flowed out. Han Fei realized that he had no other path. The stairs were blocked, and he had to take the elevator to reach the other floors.

Sacrificing Immortal has given me five extra lives. It should be fine for me to take the elevator. Han Fei was still very careful. He used 20 minutes to check the entire second-floor basement. He returned to the elevator after checking there was no other possibility of leaving. Han Fei pressed the button to go to the third-floor basement and squatted at the corner of the booth. The door slowly closed. When the door opened, he was already in the third-floor basement. The siren was still ringing, but there was no one around.

Technically speaking, there should be a lot of people around to discuss how to celebrate the second stage issue. It has only been 20 minutes since the siren. How come it feels like everyone has disappeared? Han Fei hid Rest in Peace inside his sleeve. He followed the clean metallic road and came to the door of Lab No. 2.

Han Fei used his Grade A card to open the metallic door. Transparent treatment hubs appeared before him. Some of the experiments were connected to tubes. Some had their heads cut open. Their mouths opened and closed like fish, like they were screaming for help. Han Fei walked past the hubs. Han Fei noticed that they were all in poor condition. The devices were mainly there to mainly their basic life support.

Have the children at the orphanage been through these before?

Han Fei found the main control panel for the lab room. He had just sat down when he saw someone had written a sentence on the screen with a red pen, Perfect Life might have an irreparable bug! I have a scary hypothesis! It might have betrayed us! No matter who you are, you have to send out my message! We might have been tricked by it!

The writer didn't have much time, and his writing was all over the place.

The computer is right here. Why would he write with the pen?

Han Fei pondered when another emergency message popped up on the screen.

x Month x Day, Thursday, 9.46 am. Perfect Life is running like usual. The number of death has increased to 51! All free researchers, head to Lab No. 2 now!

Seeing the message that said Perfect Life was running normally, Han Fei touched the main control screen. The handwritten message and the email are different. Has the system tricked everyone? Or someone higher in the chain of command is purposely releasing false info?

Chapter 919: Traitor

The written message stressed that there was a problem with Perfect Life, but the email said that there was only a problem with the second stage. Between the computer and the researcher, one had to be lying. Han Fei tried to control the computer, but even with his Grade A+ access, that was impossible. If the supercomputer didn't become sentient, then it means someone with access higher than A+ has betrayed Immortal Pharma from within.

Ever since Fu Sheng was forgotten, Fu Tian became the sole owner of Immortal Pharma. His family controlled every facet of the company. Immortal Pharma is behind many illegal experiments. Most of these experiments are managed by Fu Tian's children. In that case, the person who betrayed the company is most likely one of Fu Tian's children. Immortal Pharma's many experiments were related to the cryptic world and black box. In fact, the company was so successful due to the things Fu Sheng found in the black box. In a way, Han Fei was the real owner of Immortal Pharma because he had inherited the black box.

The email made Han Fei uneasy. The computer told all the researchers to gather at Lab No. 2, but there was no one there. It was like everyone had disappeared. Where has the computer brought the researchers?

The water glass on the table trembled. Small bubbles appeared in the water. The glass suddenly cracked, and Han Fei's ears bled. Something invisible was communicating with sounds Han Fei couldn't hear. They had discovered Han Fei. The lights dimmed, and the medical hubs opened. The patients fell to the ground. They climbed up like puppets and stumbled toward Han Fei.

Is someone controlling them? Most of the patients were extremely weak, but some of them had superhuman abilities. In a way, they were not humans anymore. These were more like clothes created by Immortal Pharma for the returners to wear.

The billionaires sent their consciousness into Perfect Life, and Immortal Pharma created a new body for them. When the technology is there, they will send their consciousness into the bodies. In this way, human bodies are no different from clothes. This giant room is like the rich's changing room. They can pick any body they want. Immortal Pharma is trying to be God. Han Fei cut off the connection between the patients and the machines. Most of them died permanently while some of the patients appeared to have gained sentience. Even without the machine, they could still commit to simple actions like walking and running.

With the paper doll and Rest in Peace, Han Fei was not afraid of these creations. The worst day was only beginning. He hadn't even seen the thing underground yet.

I need to destroy the figurines and altar. Han Fei tried to leave the lab, but his actions appeared to be monitored. As he tried to escape, a new problem appeared. The siren rang, and the red light flashed. A metallic wall in Lab No. 2 slowly opened. A giant darkroom appeared before Han Fei. The smell of blood wafted out. Even light couldn't cut into that room. It appeared to be a human-made black hole. Han Fei slowly inched toward the room. He saw the patients lying on the ground. They were marked with numbers and prices. They were like clothes waiting to be sold.

Is someone watching me? Han Fei was too careful to enter somewhere dangerous. However, something inside the room was calling him. The summoning was hard to describe. It was not a sound or smell. It was more like instinct. Han Fei used Rest in Light as a source of light. He seemed to see a small, blurry figure in the dark. It was a child.

As he slowly moved forward, the blurry figure didn't clarify. In fact, as Han Fei got closer, the figure became even harder to see. The light behind him faded away. Han Fei seemed to sink into the mud. He was familiar with this feeling. A long time ago, he had turned away from the light to struggle in despair.

Could that figure be the childhood me? Is there a possibility that Immortal Pharma has retained the data of a younger me? Han Fei's way of thinking was different than most since he was young.

Something attacked Han Fei from the dark. It was so fast. Without the protection of the paper doll, Han Fei would have been injured. Han Fei reached his hands forward and touched something. It was the thing the doll killed. Is it a bat or a strung-up head? Han Fei had examined many human heads in the cryptic world. He could be considered an expert. He carefully studied the head. The head that attacked him was very similar to the head of the workers in the fleshy hell. This head was more like a weapon that could be remotely controlled.

The meat puppets in Gao Xing's fleshy factory have found prototypes in real life. The wind blew in the dark room. Endless heads attacked Han Fei. Han Fei didn't retreat. Blood dyed the coat red. Han Fei entered the deepest part of the room. He borrowed the light from Rest in Peace and finally saw the secret of Lab No. 2.

In this large room, there was a specialized wall. The wall was made from many clear nutrient tanks. Each tank contained a brain. All the brains mimicked a brain fragment in the center. A number was pasted on the tank that held the brain fragment, 0002.

Is this No. 2's brain? Seeing the wall of brains before him, Han Fei chilled. He didn't even feel such fear when facing a ghost. Using his access power, Han Fei opened one of the tanks. The moment he did, the brain inside lost its list. The brain vessels on the brain snapped. Afraid that he'd damage the core brain, Han Fei didn't dare to do anything else. Is the figure I saw earlier a mirage or a hint from No. 2? Han Fei found more research documents on human brains and consciousness.

Then, he discovered something horrifying. Deep Space Tech and Immortal Pharma had been collecting brain data through the psychological devices they produced decades ago. They had been collecting people's private data as experimental data. Since they hadn't been discovered, they became more brazen. When they developed Perfect Life, they did the same thing. Everyone who sued Perfect became experimental targets for the two giants. However, only 99 percent of the users were valid data.

Is this what they're hiding? Gao Xing was deeply connected to the traitor inside Immortal Pharma. These secrets would help Han Fei in future negotiations. In the past, he thought that Immortal Pharma was impossible to defeat, but the situation was changing. I can't believe this would be my biggest reward. Who would have thought the company was so ugly on the inside? As long as Han Fei could leave this place alive, he had confidence he could deal with Immortal Pharma. Han Fei walked behind the wall of brains. Han Fei saw that the big brain reached underground. A part of this lab was buried in the fourth-floor basement.

There should be another path. Using his luck and hide-and-seek talent, Han Fei found a hidden elevator inside the room. The elevator could only reach specific floors, the 4th floor, the 9th floor, the 18th-floor basement, and the 31st-floor aboveground.

Han Fei compared them with the patrol map. The fourth-floor basement is also marked Lab No. 2. The ninth-floor basement is the waste treatment center. The eighteenth-floor basement is not marked. The 31st floor is the admin office. I remember it was Fu Tian's second son who took over the management after Fu Tian died.

Could he be the traitor? But he already owns everything. Why would he choose to betray his father?

Chapter 920: Mad Laughter's Home

The human heart was the most complicated thing. Even family would betray each other if the circumstance were right. The black box changed two worlds and created Immortal Pharma. However, as time progressed, Immortal Pharma had forgotten its purpose.

Han Fei entered the secret elevator. One had to use an id card to activate the elevator. He tried to scan his A+ card, and only a few buttons lit up on the panel. They were for the 4th and 9th floors basement. Only grade A researchers can use the secret elevator, but even they cant go to the 31st-floor and 18th-floor basement. Without hesitation, Han Fei used the elevator to go to the 4th-floor basement. The elevator opened to another dark room. This place seemed to simulate the womb. It was completely dark, but one wouldnt feel cold. If anything, there was a warm current.

Han Fei took out Rest in Peace. As the light chased away the darkness, Han Feis eyes narrowed. There were fetuses in the room. They had no names, only personalities, and numbers. Babies were made into products. Immortal Pharma could fully design a baby as per the clients requirement. These children were all the orders!

Immortal Pharma really views itself as God. Han Feis feelings were complicated. Reading the introduction on the tanks, it felt like an introduction to various cans. It was cruel and absurd.

Whats the point of this? If everyone in the world is of the same origin, itll feel so numb.

That was the case, but when the technology was mature, most parents would order their babies from Immortal Pharma because they didnt want their children to lag behind. Everyone knew that this was wrong, but once someone succeeded, the others would follow. The moral bottom line would lower until perhaps Immortal Pharma would be hailed as the harbinger of a new era. After all, what was right and wrong was different in different eras.

With his powerful memory, Han Fei memorized all the details of the order. When he returned to real life, hed cooperate with the police to capture these clients. After searching the dark room, he returned to the secret elevator.

The supercomputer released the email to have all the researchers gather in Lab No. 2. It probably wants to use the human heads in the secret room to attack all of them. Han Fei thought to himself. Immortal Pharma has three labs underground. They are Lab No. 2 in the third and fourth floors basement, Lab No. 3 from the fifth to the seventh-floor basement; and Lab No. 4 from the 13th to 18th floor basement. How come there is no Lab No. 1? The content of the map was not complete. Immortal Pharma had secrets that even Grade A researchers didnt know.

Han Fei pressed the button for the ninth-floor basement. He wanted to check out the other floors. If possible, he wanted to save more people so they could look after each other after dark. The number on the screen changed rapidly. When the door opened, Han Fei was hit by a horrible scent of medicine. f(r)ee

This floor is the waste treatment center. Why would the admin office be connected to this place? Just what kind of waste are they dealing with? The 9th-floor basement was completely different from the other floors. This place had many plants Han Fei hadnt seen before. This place looked more like a resting place meant for dying patients. I wouldnt be surprised if this place sees a living human as waste.

Moving through the complicated tunnels, Han Fei soon realized the path didnt match the map he had at all. Many rooms and roads didnt show up on the map. It was clear that something special was hidden here.

Han Fei entered the employees room and read through the document. The workers at the waste treatment center were managed directly by the admin. Every worker was specially picked. Most of them were orphans from Immortal Pharma. They were loyal to the company. Of all the giant companies, Immortal Pharma donated the most to charity. It was why it had such a good reputation in public. Who would have thought theyd be doing something like this behind the scene?

The failed experiments will be destroyed here and wiped without a trace Han Fei stayed there until 1 pm. During that period, he received more mail from the supercomputer. It urged all the researchers to gather at Lab No. 3. The siren never stopped either. The building was on full lock-on. All the researchers realized a problem, but they couldnt escape anymore. Han Fei knew that as time carried on, his situation would be more dangerous too. After he used Rest in Peace to persuade two workers, he got the real map and id card to the entire floor.

Immortal Pharma had done many human experiments. This meant that they had many failed volunteers. These people were drawn here by the high monetary reward. Some of them wouldnt wake up forever, and some of them had their consciousness trapped inside the game. They couldnt differentiate between the fake and the real. Immortal Pharma would find a valid excuse to kill them. There was a secret path

that connected the 9th-floor basement to the outside world. Only the admin had the power to use this path. Before Han Fei arrived, the workers received the notice that they would receive a new batch of products from outside. It was worth noting that the secret path was normally used to transport the waste out, but this time, it was used to move the products in. Han Fei suspected this was how the traitor invited the core members of the criminal organization into Immortal Skyscraper.

Han Fei memorized the time when the product would be delivered, At 12 noon on Thursday, something entered Immortal Skyscraper from the path in the 9th-floor basement. Compelled by Han Fei's charisma, the workers led Han Fei to inspect the new batch of products. In the large garage, only shattered pieces of glass remained. Han Fei picked up a piece, and his fingers were cut. He looked at it. The mirror didn't reflect his face but an empty altar.

This looks like a mirror from the cryptic world. Is Gao Xing hidden inside the mirror? Han Fei remembered the mirrors at the murderers' clubs. The mirrors could draw a living person's soul into the cryptic world. He now suspected that Gao Xing had entered Immortal Skyscraper before the tragedy!

He's a real Unmentionable. Han Fei hadn't met an Unmentionable in real life. They would be extremely dangerous. Han Fei held the broken mirror and his throat moved. To destroy the altar, I need to kill Gao Xing's three souls. Gao Xing's present and past have been destroyed, and only Gao Xing's future remains.

The Immortal Skyscraper was repeating Gao Xing's most anticipated day. In other words, the Gao Xing Han Fei was about to meet would be Gao Xing's last soul!

But how am I supposed to deal with an Unmentionable? Han Fei took a deep breath and quickly calmed down. Gao Xing's most anticipated day happened in real life. If he used a power greater than allowed, will something happen to him? Han Fei placed a broken mirror piece into his back. He found the employee and forced the man to lead him to the product that had been moved to the lab.

Be it in real life or the altar world, Han Fei didn't want Gao Xing to succeed. The employee led Han Fei down the path filled with trash. They walked for a long time. Han Fei was about to lose his patience when the worker took out a key and opened a well-hidden door.

Is the batch of products inside this room? If you dare to lie to me, I'll have my doll crawl into your eyes and exit from the top of your head. The worker quickly nodded. Before he met Han Fei, he was an atheist, but now he had full faith in Han Fei. Han Fei entered the room and looked around. Suddenly, the back of his head throbbed with pain. Laughter echoed in his ears.

Why is there an orphanage underground?

It is modeled after an orphanage. The worker whispered, We normally call this place Lab No. 1. All the experiments started here. But for some reason, this lab was closed, and all the projects were destroyed. Now, its only a shell.
